

Extranet Connectivity

The IRS is capable of supporting a moderate number of Trading Partners who wish to use an encryption technology termed "IPSec", with a shared secret key from their facilities, over the Internet to IRS selected ISPs handling IRS EXTRANET termination points. These termination points will contain only IRS equipment. The protocol within this connection would be the same as the current dedicated line filers, but would not guarantee any level of performance. Transmitters wishing to use this method would need to notify the IRS, following procedures outlined in IRS Publication 1346.

Cost Impacts and Taxpayer Burdens

The cost impact of the Internet SSL method to IRS e-filers is expected to be minimal. The transmitters will incur the cost of the ISP, however, many of them already have and use an ISP. Currently the e-filers must pay for the long distance telephone call to the IRS front-end sites, and must make multiple calls if their transmission volume is high. Historic technologies also incur "dropped" calls. These occurrences are expected to be reduced when the Internet is used. Calls now would be to the usually local ISP phone number and its alternates.

Implementation Schedule

The Internal Revenue Service will make known to the registered trading partners and software developers the software standards and scripting opportunities on or before March 31, 2004, to allow completion of any software changes in their products. The IRS will attempt to ensure that those standards are generally compliant to those adopted by other IRS e-commerce Internet interfaces. The Internal Revenue Service will make known to the registered trading partners and software developers the URLs for the "Secure Web" service model by July 31, 2004. The Internal Revenue Service will make a "Secure Web" test facility available to its registered users on or about July 31, 2004, and have a production Assurance Testing (ATS) facility for the "Secure Web" method by November 1, 2004.

The Internal Revenue Service encourages all current and prospective e-filers to begin using one or both of the two new encryption methods by November 1, 2004. Dedicated line filers are encouraged to implement encryption at their earliest convenience and at a time that is mutually agreeable to both the trading partner and the Internal

Revenue Service, prior to November 1, 2004.

Discontinuance of Existing Dial-Up Analog and Dial-Up ISDN Service

Effective December 1, 2003, the Service is no longer accepting requests for support of IRS dial-up ISDN services. During 2005, the IRS will phase down the number of its existing analog, PSTN dial-up line services and its companion existing ISDN dial-up line services, and will discontinue them on November 30, 2005.

ADDRESSES: Carolyn E. Davis, Senior Program Analyst, IRS, Electronic Tax Administration, OS:CIO:I:ET:S:SP, 5000 Ellin Road, Room C4-187, Lanham, MD 20706.

FOR FURTHER INFORMATION CONTACT:

Questions or concerns will also be taken over the telephone. Call Carolyn Davis—202-283-0589 (not a toll-free number). You may e-mail responses entitled *e-file Transmission Encryption* to efile.transmission.encryption@irs.gov.

Dated: December 18, 2003.

Jo Ann Bass,

*Director Strategic Services Division,
Electronic Tax Administration.*
