

(October–November) 2003 and Summer (June–August) 2004.

The pilot study data will not be used to evaluate program performance or child outcomes, but to test the feasibility of different evaluation designs that could be used during an eventual national evaluation of MSHS programs. A primary issue to be tested is whether, or under what conditions, it is possible to assess program factors and child and family outcomes in different program sites among children and families who routinely migrate through

multiple sites in a relatively unpredictable manner throughout a given growing season. Another issue to test is whether standardized measures of children’s competencies, and parent/teacher reports of these competencies, are appropriate for this largely Spanish-speaking sample, many of whom speak unique non-Spanish/non-English languages, and whose cultural backgrounds are also unique. This pilot study is also designed to determine how children and families can be tracked

across these multiple sites, and determine the kinds and intensities of MSHS program services they obtain, including such aspects as children’s curriculum and care, parent services, and coordination with community resources and services.
