

- The acquisition of state and private inholdings within the Monument and private lands contiguous to the Monument will be considered.

- The plan alternatives will address transportation, vehicular, and other types of access.

Preliminary issues and management concerns have been identified by the BLM personnel, other agencies, the Pueblo de Cochiti, and individuals. They represent the BLM's knowledge to date on the existing issues and concerns with current management. After gathering public comments, the suggested issues will be placed in one of three categories:

1. Issues to be resolved in the plan.
2. Issues to be resolved independently of the plan.
3. Issues beyond the scope of the plan.

The BLM will address category one above in the land-use planning process and give rationale in the plan for issues placed in the other categories. Concepts for alternatives will be generated from category one.

In addition to the preceding issues, management questions and concerns that may be addressed in the plan include but are not limited to the following: management of culturally sensitive areas; protection and interpretation of cultural resources; use of Monument resources for scientific and educational purposes; fire and fuels management; wildlife habitat; threatened and endangered species habitat; scenic values; facilities and infrastructure needed to administer the area and provide visitor services; and an appropriate level of visitor use, since the Monument is located within a 1-hour drive of the growing major cities of Albuquerque, Rio Rancho, and Santa Fe, New Mexico.
