**SUPPLEMENTARY INFORMATION:** The World Trade Center Memorial and Redevelopment Plan (Proposed Action) would provide for the construction on the Project Site of a World Trade Center Memorial (Memorial) and memorial-related improvements, up to 10 million square feet of above-grade Class A office space, plus associated below-grade parking, storage, mechanical, loading, and other non-office space, up to 1 million square feet of retail space, a hotel with up to 800 rooms and up to

150,000 square feet of conference space, new open space areas, museum and cultural facilities, and certain infrastructure improvements. The proposed action would be assisted in part by HUD Community Development Block Grant funds appropriated by Congress for World Trade Center disaster recovery and rebuilding efforts.

The Project Site consists of the World Trade Center Site (WTC Site) and the Adjacent Sites in Lower Manhattan, New York, New York. The WTC Site is an approximately 16 acre parcel bounded by Liberty Street, Church Street, Vesey Street, and Route 9A. The Adjacent Sites include the Southern Site and the below-grade portion of Site 26 at Battery Park City. The Southern Site comprises two adjacent blocks south of the WTC Site—one bounded by Liberty, Washington, Albany, and Greenwich Streets, and the other bounded by Liberty, Cedar, and Washington Streets and Route 9A—and portions of two streets: Liberty Street between those blocks and the WTC Site, and Washington Street between Cedar and Liberty Streets. Site 26 is bounded by the one-half block of North End Avenue, Murray and Vesey Streets, and Route 9A on the eastern side of the Embassy Suites Hotel.

The proposed design would extend Fulton and Greenwich Streets through the WTC Site, dividing the site into quadrants. The Memorial, museum, and cultural buildings would occupy the southwest quadrant where the Twin Towers once stood. At the northwest corner of the WTC Site would be the tallest structure in the complex, Freedom Tower. The three other proposed towers would descend in height clockwise to the fifth tower on the Southern Site.

The Southern Site would be reconfigured by the opening of Cedar Street between Greenwich and Washington Streets and the closing of Washington Street between Liberty and Cedar Streets. This would allow the creation of a single large open space on the new block south of Liberty Street as well as the tower site between Cedar and Albany Streets.

The Proposed Action also provides for infrastructure and utilities to support the operations of the Project Site as a whole, including below-grade freight servicing and loading and a below-grade bus parking garage serving the Memorial, a parking garage for building tenants and safety and security-related facilities.

The Draft GEIS analyzes the Proposed Action's potential impacts to land use and public policy, urban design and visual resources, historic resources,

open space, shadows, community facilities, socioeconomic conditions, neighborhood character, hazardous materials, infrastructure/safety/security, traffic and parking, transit and pedestrians, air quality, noise, coastal zone, floodplain, natural resources, electromagnetic fields, environmental justice, and construction. The Draft GEIS also considers mitigation measures, alternatives, unavoidable adverse impacts, short-term effects vs. long-term benefits, irreversible and irretrievable commitments of resources, indirect and cumulative effects and other areas of potential environmental impact.

Alternatives that will be looked at in the Draft GEIS will include a no-action alternative, and a reasonable range of other alternatives, including a Memorial-only alternative, a restoration alternative, a rebuilding alternative, a WTC Site-only alternative, an enhanced green construction alternative, and a reduced impact alternative.

The estimated total cost for construction of the Proposed Action is expected to be in excess of \$8 billion.

Questions may be directed to the individual named above under the heading "For Further Information Contact."
