##### **Background**

Codex was established in 1962 by two United Nations organizations, the Food and Agriculture Organization and the World Health Organization. Codex is the major international organization for encouraging fair international trade in food and protecting the health and economic interests of consumers. Through adoption of food standards, codes of practice and other guidelines developed by its committees, and by promoting their adoption and implementation by governments, Codex seeks to ensure that the world's food supply is sound, wholesome, free from adulteration and correctly labeled.

The Codex Committee on Milk and Milk Products was established to elaborate codes and standards for Milk and Milk Products. The Government of New Zealand hosts this committee and will chair the committee meeting.
