SUPPLEMENTARY INFORMATION: Detailed project studies have included consideration of a number of basin-wide and local flood damage reduction measures including floodwall/levee systems protecting Pikeville and Coal Run, non-structural flood-proofing measures, floodplain acquisition and ring walls protecting several individual structures. The project would provide flood protection measures to approximately 2,000 structures, 75 percent of which are residential. Three alternatives, based on these flood damage reduction measures, along with the no action alternative, have been evaluated in detail and the results documented in the DEIS.

A public hearing on the DEIS will be held at Pikeville High School (see **DATES**). The hearing will provide an opportunity for the public to present oral and/or written comments. All persons and organizations that have an interest in the Levisa Fork Basin flooding problems as they affect Pike County and the environment are urged to participate in this meeting.
