SUPPLEMENTARY INFORMATION:

Title: Export of Animal Products from the United States.

OMB Number: 0579-XXXX.

Type of Request: Approval of a new information collection.

Abstract: The export of agricultural commodities, including animals and animal products, is a major business in the United States and contributes to a favorable balance of trade. To facilitate the export of U.S. animals and products, the Animal and Plant Health Inspection Service (APHIS), U.S. Department of Agriculture (USDA), maintains information regarding the import health requirements of other countries for animals and animal products exported from the United States.

Many countries that import animal products from the United States require a certification from APHIS that the United States is free of certain diseases. These countries may also require that our certification statement contain additional declarations regarding the U.S. animal products being exported. This certification must carry the USDA seal and be endorsed by a Federal or approved APHIS representative (*i.e.*, a Plant Protection and Quarantine port officer). Veterinary Services Form 16-4, Health Certificate—Export Certificate—Animal Products, is used to meet these requirements.

Regulations pertaining to export certification of animals and animal products are contained in 9 CFR parts 91 and 156.

We are asking the Office of Management and Budget (OMB) to approve our use of this form.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the information collection on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.5 hours per response.

Respondents: U.S. exporters of animal products.

Estimated annual number of respondents: 30,000.

Estimated annual number of responses per respondent: 4.

Estimated annual number of responses: 120,000.

Estimated total annual burden on respondents: 60,000 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 3rd day of February 2004.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.
