

alternatives developed that meet the purpose and need and address major issues identified during scoping. Alternatives may have different amounts, locations, and types of project activities.

Comments received in response to this notice, including names and addresses of those who comment, will be part of the project record and available for public review.

The Forest Service is seeking information and comments from other Federal, State, and local agencies; Tribal governments; organizations; and individuals who may be interested in or affected by the proposed action. This input will be used in preparation of the EIS.

Comments will be appreciated throughout the analysis process. The comment period on the draft EIS will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register**. It is important that those interested in the management of the Payette National Forest participate at that time.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon v. Hodel*, 803 F.2d 1016, 1002 (9th Cir. 1986) and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is important that those interested in this proposed action participate by the close of the 45 day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues raised by the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement.

Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

After the 45-day comment period ends on the draft EIS, the Forest Service will analyze comments received and address them in the final EIS. The final EIS is scheduled to be completed in 2004. The Responsible Official is the Payette National Forest Supervisor. The decision will be documented, including the rationale for the decision, in a Record of Decision (ROD). The decision will be subject to review under the Forest Service administrative appeal regulations at 36 CFR 215.

Dated: February 18, 2004.

**Mark M. Madrid,**

*Forest Supervisor.*
