

certified and recertified presses; and notifying an OSHA-recognized third-party validation organization when a safety system component fails, the employer modifies the safety system, or a point-of-operation injury occurs. In addition, Appendix A of § 1910.217 provides detailed information and procedures required to meet the certification/validation provisions, as well as the design requirements, contained in the Standard. Accordingly, Appendix A supplements and explains the certification/validation provisions of the PSDI Standard, and does not specify new or additional paperwork requirements for employers. Appendix C of § 1910.217 describes the requirements and procedures for obtaining OSHA recognition as a third-party validation organization; therefore, the paperwork requirements specified by this appendix do not impose burden hours or cost directly on employers who use PSDs.

By complying with these paperwork requirements, employers ensure that PSDI-equipped mechanical power presses are in safe working order, thereby preventing severe injury and death to press operators and other employees who work near this equipment. In addition, these records provide the most efficient means for an OSHA compliance officer to determine that an employer performed the requirements and that the equipment is safe.

To date no third-party organization is available to validate employer and manufacturer certifications that their PSDI equipment and practices meet the requirements of the Standard. Therefore, the Agency cannot attribute burden hours and cost to the paperwork requirements of the Standard.

The Agency is currently conducting a Lookback Review on PSDI pursuant to Section 610 of the Regulatory Flexibility Act and section 5 of Executive Order 12866 on Regulatory Planning and Review (67 FR 55181, Docket No. S225A). The purpose of this review is to determine, while protecting worker safety, whether there are ways to modify this standard to make implementation more practical, to reduce regulatory burden on small business and to improve its effectiveness. The Lookback Review process is scheduled to be completed in March 2004.

III. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information-collection requirements are necessary for the proper performance of the Agency's functions to protect workers,

including whether the information is useful;

- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information-collection and transmission techniques.

III. Proposed Actions

OSHA is proposing to extend the information collection requirements in the Standard on Presence Sensing Device Initiation (PSDI) (29 CFR 1910.217(h)). The Agency will summarize the comments submitted in response to this notice, and will include this summary in the request to OMB to extend the approval of the information-collection requirements contained in the Standard.
