

Changes in the Estimates: There is a decrease of 359,904 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is due to a decrease in the respondent universe, as well as decreases in the burden assumptions.

The assumptions for the burden associated with understanding the regulations, calculated when the regulations were new, have been revised after consultations with respondents.

II. What Action is the Agency Taking?

EPA has recently been informed that the parent company to EPA contractor Dyncorp Systems and Solutions LLC (DSS), finalized a merger agreement with Computer Sciences Corporation (CSC) of El Segundo, California.

In the coming months, the DSS contracts will be amended to reflect the change of status in the contractor. Until that time, EPA continues to hold DSS, and its successor, CSC, responsible for performance, including adherence to all rules and procedures providing for the

access and protection of TSCA CBI under existing contracts.

DSS has stated that from a technical performance standpoint, no changes in support of management personnel are envisioned as a result of the merger. From a contractual point of view, Dyncorp represents that it will continue contracting with EPA as the same legal entity - DSS. The merger between DSS's parent company (Dyncorp) and CSC is intended to make Dyncorp a CSC company.

At all times during this corporate acquisition or merger, all contractor employees were trained and cleared for access to TSCA CBI. In addition, all employees had signed and remained subject to the standard non-disclosure agreements required of all such persons working with TSCA CBI.

Aside from providing this notice, EPA is not immediately engaging in any other action. In the next 6 months, EPA expects that there will be an effort to modify the existing contracts with EPA and when this occurs, there will be a series of actions intended to effectuate this, including notices, as required under existing regulations.
