SUPPLEMENTARY INFORMATION:

I. Abstract

The National Aeronautics and Space Administration (NASA) plans to renew an ongoing collection designed to collect information needed to evaluate bids and proposals submitted to NASA for the award of contracts with a value less than \$500,000 for goods and services in support of NASA's mission, and in response to contractual requirements. Solicitations for bids and proposals, and requirements for contract deliverables, are prepared in accordance with the OFPP Policy Act as amended by Pub. L. 96-83, the NASA Space Act, 42 U.S.C. *et seq.*, and approved mission requirements. As the need arises for goods and services, NASA follows the procedures set forth in Parts 14 and 15 of the FAR for the issuance of Invitation for Bids (IFBs) and Request for Proposals (RFPs) before a contract can be awarded. Similarly, in bids and proposals voluntarily submitted in response to IFBs and RFPs, contractors must furnish all information required by the FAR, the NFS, and Agency needs. This solicited information is used by NASA project and procurement managers to determine the responsiveness of bids and proposals and come to a decision on which contractor can provide the greatest benefit to the Agency and, ultimately, who will be awarded a contract.

NUCLEAR REGULATORY COMMISSION

State of Utah: NRC Staff Draft Assessment of a Proposed Amendment to Agreement Between the Nuclear Regulatory Commission and the State of Utah

AGENCY: Nuclear Regulatory Commission.

ACTION: Fourth notice of a proposed amendment to the Agreement with the State of Utah; request for comment.

SUMMARY: By letter dated January 2, 2003, Governor Michael O. Leavitt of Utah requested that the U.S. Nuclear Regulatory Commission (NRC) enter into an amendment to the Agreement with Utah (the Agreement) as authorized by section 274 of the Atomic Energy Act of 1954, as amended (Act).

Under the proposed amendment to the Agreement, the Commission would relinquish, and Utah would assume, an additional portion of the Commission's regulatory authority exercised within the State. As required by the Act, NRC is publishing the proposed amendment to the Agreement for public comment. NRC is also publishing the summary of a draft assessment by the NRC staff of the portion of the regulatory program Utah would assume. Comments are requested on the proposed amendment to the Agreement and the staff's draft assessment, which finds the program to be adequate to protect public health and safety and compatible with NRC's program for regulation of 11e.(2) byproduct material.

The proposed amendment to the Agreement would release (exempt) persons who possess or use certain radioactive materials in Utah from portions of the Commission's regulatory authority. The Act requires that NRC publish those exemptions. Notice is hereby given that the pertinent exemptions have been previously published in the **Federal Register** and are codified in the Commission's regulations as 10 CFR part 150.

DATES: The comment period expires March 15, 2004. Comments received after this date will be considered if it is practical to do so, but the Commission cannot assure consideration of comments received after the expiration date.
