This notice identifies information collections RSPA is submitting to OMB for renewal and extension. These collections are contained in 49 CFR parts 110 and 130 and the Hazardous Materials Regulations (HMR; 49 CFR parts 171-180). RSPA has revised burden estimates, where appropriate, to reflect current reporting levels or adjustments based on changes in proposed or final rules published since the information collections were last approved. The following information is provided for each information collection: (1) Title of the information collection, including former title if a change is being made; (2) OMB control number; (3) summary of the information collection activity; (4) description of affected public; (5) estimate of total annual reporting and recordkeeping burden; and (6) frequency of collection. RSPA requests comments on the following information collections:

Title: Requirements for Cargo Tanks.

OMB Control Number: 2137-0014.

Summary: This information collection consolidates and describes the information collection provisions in parts 178 and 180 of the HMR involving the manufacture, qualification, maintenance and use of all specification cargo tank motor vehicles. It also includes the information collection and recordkeeping requirements for persons who are engaged in the manufacture, assembly, requalification and maintenance of DOT specification cargo tank motor vehicles. The types of information collected include:

(1) **Registration statements:** Cargo tank manufacturers and repairers, and cargo tank motor vehicle assemblers are required to register with DOT by furnishing information relative to their qualifications to perform the functions in accordance with the HMR. The registration statements are used by DOT to ensure that these persons possess the knowledge and skills necessary to perform the required functions and that they are performing the specified functions in accordance with the applicable regulations.

(2) **Requalification and maintenance reports:** These reports are prepared by persons who requalify or maintain cargo tanks. This information is used by cargo

tank owners, operators and users, and DOT compliance personnel to verify that the cargo tanks are requalified, maintained and are in proper condition for the transportation of hazardous materials in accordance with the HMR.

(3) **Manufacturers' data reports, certificates and related papers:** These reports are prepared by cargo tank manufacturers and certifiers, and are used by cargo tank owners, operators, users and DOT compliance personnel to verify that a cargo tank motor vehicle was designed and constructed to meet all requirements of the applicable specification.

Affected Public: Manufacturers, assemblers, repairers, requalifiers, certifiers and owners of cargo tanks.

Annual Reporting and Recordkeeping Burden:

Number of Respondents: 41,366.

Title: Inspection and Testing of Portable Tanks and Intermediate Bulk Containers.

OMB Control Number: 2137-0018.

Summary: This information collection consolidates provisions for documenting qualifications, inspections, tests and approvals pertaining to the manufacture and use of portable tanks and intermediate bulk containers under various provisions of the HMR. It is necessary to ascertain whether portable tanks and intermediate bulk containers have been qualified, inspected and retested in accordance with the HMR. The information is used to verify that certain portable tanks and intermediate bulk containers meet required performance standards prior to their being authorized for use, and to document periodic requalification and testing to ensure the packagings have not deteriorated due to age or physical abuse to a degree that would render them unsafe for the transportation of hazardous materials. Applicable sections are as follows: § 173.32—requirements for the use of portable tanks; § 173.35—hazardous materials in intermediate bulk containers; § 178.245-6—certification markings for DOT-51 portable tanks; § 178.245-7—manufacturer's data report for DOT-51 portable tanks; § 178.255-14—certification markings for DOT-60 portable tanks; § 178.255-15—manufacturer's data report for DOT-60 portable tanks; § 178.270-14—certification marking of IM portable tanks; § 178.801—testing, retesting and recordkeeping for intermediate bulk containers; and § 180.352—periodic retests and inspections for intermediate bulk containers.

Affected Public: Manufacturers and owners of portable tanks and intermediate bulk containers.

Recordkeeping:

Number of Respondents: 8,770.

Total Annual Responses: 86,100.

Total Annual Burden Hours: 66,390.

Frequency of collection: On occasion.

Title: Hazardous Materials Incident Reports.

OMB Control Number: 2137-0039.

Summary: This collection is applicable when an incident occurs in transportation as prescribed in §§ 171.15 and 171.16 of the HMR. A Hazardous Materials Incident Report, DOT Form F 5800.1, must be completed by the person in physical possession of the hazardous material at the time a hazardous material incident occurs in transportation, such as a release of materials, serious accident, evacuation, or closure of a major transportation artery. Incidents meeting criteria in § 171.15 also require a telephonic report. This information collection enhances the Department's ability to evaluate the effectiveness of its regulatory program, determine the need for regulatory changes, and address emerging hazardous materials transportation safety issues. The requirements apply to all interstate and intrastate carriers engaged in the transportation of hazardous materials by rail, air, water, and highway.

Affected Public: Person in physical possession of a hazardous material at the time an incident occurs in transportation.

Title: Flammable Cryogenic Liquids.

OMB Control Number: 2137-0542.

Summary: Paragraph (h) of § 177.840 specifies certain safety procedures and documentation requirements for drivers of these motor vehicles. Provisions in § 177.840(l) of the HMR require the carriage on a motor vehicle of written procedures for venting flammable cryogenic liquids and for emergency response. These requirements are intended to ensure a high level of safety when transporting flammable cryogenics, which are characterized by extreme flammability and high compression ratio when in a liquid state.

Title: Testing Requirements for Non-bulk Packaging.

OMB Control Number: 2137-0572.

Summary: Detailed packaging manufacturing specifications have been replaced by a series of performance tests that a non-bulk packaging must be capable of passing before it is authorized to be used for transporting hazardous materials. The HMR require proof that packagings meet these testing requirements. Manufacturers must retain records of design qualification tests and periodic retests. Manufacturers must notify, in writing, persons to whom packagings are transferred of any specification requirements that have not been met at the time of transfer; and the type and dimensions of any closures, including gaskets, needed to satisfy performance test requirements. Subsequent distributors must also provide written notification. Performance-oriented packaging standards allow manufacturers and shippers much greater flexibility in selecting more economical packagings.

Affected Public: Each non-bulk packaging manufacturer that tests packagings to ensure compliance with the HMR and subsequent distributors.

Annual Reporting and Recordkeeping:
