

activities associated with FRPs depend largely on the physical and operating characteristics of the facility, three facility size categories were defined as: Small facilities with a total storage capacity greater than 1,320 gallons, but less than or equal to 42,000 gallons; Medium facilities with a total storage capacity greater than 42,000 gallons but less than or equal to one million gallons; and Large facilities with a total storage capacity greater than one million gallons. Because FRP regulations apply to facilities with an oil storage capacity of over one million gallons, or over 42,000 gallons if the facility transfers oil over water or to and from vessels, the "small" facilities were excluded from the burden estimates. The FRP facility

type categories were based on how oil is used at a facility. Facilities were classified as using oil in one of three ways: Storage/Consumption facilities that consume oil as a raw material or end-use product; Storage/Distribution facilities market and distribute oil as a wholesale or retail product; and Production facilities pump oil from the ground as part of exploration or production activities.

The total hour burden to the entire regulated community over the three-year period covered by the renewal ICR is approximately 1,904,980 hours, or 634,994 hours annually. Exhibit 1 displays the recordkeeping and reporting burden for affected facilities. The public reporting and recordkeeping

burdens to newly regulated facilities where the owners or operators are not required to prepare FRPs (*i.e.*, facilities where the owner or operators certify that they do not meet the "substantial harm" criteria) are 0.1 hours for recordkeeping and 0.4 hours for reporting per year. The annual reporting and recordkeeping burdens to newly regulated facilities where the owners or operators are required to prepare FRPs (*i.e.*, first-year costs for plan development) are 8.3 hours and 237 hours, respectively. The average annual reporting and recordkeeping burdens to facilities where the owners or operators maintain FRPs (*i.e.*, subsequent year costs for annual plan maintenance) are 1.2 hours and 98 hours, respectively.

EXHIBIT 1.—FRP RECORDKEEPING AND REPORTING BURDEN FOR AFFECTED FACILITIES

	Total average annual burden (hours)	Number of facilities per year (respondents)	Average annual burden per respondent (hours)
FRP Certification			
Recordkeeping	435	4,354	0.1
Reporting	1,813	4,354	0.4
FRP Preparation			
Recordkeeping	548	66	8.3
Reporting	15,658	66	237.0
FRP Maintenance			
Recordkeeping	7,469	6,224	1.2
Reporting	609,070	6,224	98.0

Capital costs are incurred by respondents that must prepare an FRP for the first time. The total capital cost to comply with the FRP information collection requirements is \$62,147 over the three-year period covered by the renewal ICR, or \$20,716 per year. This includes one-time start-up costs such as telephone calls, postage, photocopying, and other costs related to the preparation and submission of an FRP. O&M costs are considered to be negligible since it is expected that facility owners and operators will incur no additional costs due to hard copy storage of their FRPs (*e.g.*, placed on existing shelves or in existing file cabinets) or electronic storage (*e.g.*, saved on a facility's existing computer hard drive or network).

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology

and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.
