

Since the publication of the *Preliminary Determination*, no interested parties have commented on our application of adverse facts available with respect to the LTFV determination. Accordingly, for the final determination, we continue to use the highest margin stated in the notice of initiation for DNP and UC. The "All Others" rate remains unchanged as well.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs by parties to this investigation are addressed in the "Issues and Decision Memorandum for the Final Results of Sales at Less Than Fair Value and Affirmative Final Determination of Critical Circumstances: Wax and Wax/Resin Thermal Transfer Ribbons from Japan" from Joseph Spetrini to James J. Jochum (March 1, 2004) (Decision Memo), which is hereby adopted by this notice. A list of the issues which parties raised and to which we respond in the Decision Memo is attached to this notice as an Appendix. The Decision Memo is a public document and is on file in the Central Records Unit, Main Commerce Building, Room B-099, and is accessible on the Web at www.ia.ita.doc.gov.

Final Critical Circumstances Determination

On November 26, 2003 the petitioner in this investigation, International Imaging Materials Inc. (IIMAK), submitted an allegation of critical circumstances with respect to imports of wax and wax/resin thermal transfer ribbons from Japan. On December 22, 2003, the Department issued its *Preliminary Determination* that it had reason to believe or suspect critical circumstances exist with respect to imports of TTR from Japan. See *Preliminary Determination*, 68 FR at 71074-76. We now find that critical circumstances exist for imports of wax and wax/resin thermal transfer ribbons from Japan. See Decision Memo at Comment 2.

Continuation of Suspension of Liquidation

In accordance with section 735(c)(1)(B) of the Act, we are directing CBP to continue to suspend liquidation of all entries of subject merchandise from Japan, that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of the *Preliminary Determination* for "all other" Japanese exporters. The Department will direct CBP to suspend liquidation of all entries of TTR from Japan that are entered, or withdrawn from warehouse, on or after

90 days before the date of publication of the *Preliminary Determination* for DNP and UC. CBP shall continue to require a cash deposit or posting of a bond equal to the estimated amount by which the normal value exceeds the U.S. price as shown below. This suspension of liquidation instructions will remain in effect until further notice.

We determine that the following dumping margins exist for the POI:

Manufacturer/exporter	Margin (percent)
DNP	147.30
UC	147.30
All Others	106.60

International Trade Commission Notification

In accordance with section 735(d) of the Act, we have notified the International Trade Commission (ITC) of our determination. The ITC will determine, within 45 days, whether imports of subject merchandise from Japan are causing material injury, or threaten material injury, to an industry in the United States. If the ITC determines that material injury or threat of injury does not exist, this proceeding will be terminated and all securities posted will be refunded or canceled. If the ITC determines that such injury does exist, the Department will issue an antidumping duty order directing CBP officials to assess antidumping duties on all imports of the subject merchandise entered, or withdrawn from warehouse for consumption on or after the effective date of the suspension of liquidation.

This notice also serves as a reminder to parties subject to APO of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

This determination is issued and published in accordance with sections 735(d) and 777(i)(1) of the Act.

Dated: March 1, 2004.

James J. Jochum,
Assistant Secretary for Import Administration.

Title: Suspended Dry-Dock Platform.

Abstract: A cable-supported platform that can precisely manipulate workers, tools/equipment and loads using position, velocity and force control modes. The platform uses six cables that attach to four support points on towers, walls or other structural supports so as to provide constraint and control of the suspended platform. The cable lengths can be independently controlled by hoist drive-mechanisms and coordinated to achieve intuitive platform movement in all six degrees-of-freedom (side-to-side, forward-and-back, up-and-down, and all three rotations

about these motions: roll, pitch and yaw). The platform, consisting of servo components (*i.e.*, hoist, amplifier, servo interface, sensory feedback), can be rapidly reconfigured to adjust to new applications. Initial applications address worker/equipment access challenges in dry dock ship and submarine repair and conversion. It can also be used for construction, high bays, and dam repair and maintenance. Various combinations of manual and automatic control can also be implemented. The hoists can be controlled manually by a multi-axis joystick, or can be automatically controlled by a computer.

ACTION: Notice of availability and request for comment.

SUMMARY: Notice is hereby given that NMFS has prepared a draft Environmental Assessment (EA) under the National Environmental Policy Act (NEPA) of the impacts on the human environment of the potential issuance of an enhancement permit authorizing take of listed chinook salmon in Johnson Creek, a tributary of the East Fork South Fork Salmon River in Idaho, associated with the operation of an artificial propagation program. The objectives of the program, which would be operated by the Nez Perce Tribe, are to conduct artificial propagation and research activities to enhance the propagation and survival of the population of naturally spawning summer chinook salmon in Johnson Creek, which are listed under the Endangered Species Act (ESA) as part of the threatened Snake River spring/summer chinook salmon Evolutionarily Significant Unit (ESU). This document serves to notify the public of the availability of the draft EA for review and comment before a final decision on whether to issue a Finding of No Significant Impact is made by NMFS.

DATES: Written comments on the draft EA must be received at the appropriate address or fax number (see **ADDRESSES**)
