

who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: The proposed survey will take advantage of an existing, CAMEO on-line listserv of respondents. Thus, the only burden imposed by the survey on respondents will be the time required to complete the survey. Based upon pretest interviews, EPA estimates that this will involve an average of one-half hour (0.5 hours) per respondent. With 600 respondents completing the survey, EPA estimates the total burden to be 300 hours. Based on an average hourly rate of \$70.60 (including employer costs of all employee benefits), the one-time total cost to all respondents will be \$21,180. Because this information collection is voluntary and does not involve any special equipment, respondents will not incur any capital or operation and maintenance (O&M) costs.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: CAMEO Users.

Estimated Number of Respondents: 600.

Frequency of Response: One-time.

Estimated Total Annual Hour Burden: 300.

Estimated Total Annualized Capital, O&M Cost Burden: \$0.

Dated: February 26, 2004.
