BILLING CODE 3510-DR-P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

Notice of Government Owned Invention Available for Nonexclusive Licensing

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice of Government owned invention available for nonexclusive licensing.

SUMMARY: The invention listed below is owned in whole by the U.S. Government, as represented by the Department of Commerce. The invention is available for nonexclusive licensing in accordance with 35 U.S.C. 207 and 37 CFR part 404 to achieve expeditious commercialization of results of federally funded research and development.

FOR FURTHER INFORMATION CONTACT: Technical and licensing information on this invention may be obtained by writing to: National Institute of Standards and Technology, Office of Technology Partnerships, Attn: Mary Clague, Building 820, Room 213, Gaithersburg, MD 20899. Information is also available via telephone: 301-975-4188, fax 301-869-2751, or e-mail: mary.clague@nist.gov. Any request for information should include the NIST Docket number and title for the invention as indicated below.

SUPPLEMENTARY INFORMATION: NIST may enter into a Cooperative Research and Development Agreement ("CRADA") with the licensee to perform further research on the invention for purposes of commercialization. The invention available for nonexclusive licensing is:

NIST Docket Number: 00-028US

Title: Suspended Dry-Dock Platform.

Abstract: A cable-supported platform that can precisely manipulate workers, tools/equipment and loads using position, velocity and force control modes. The platform uses six cables that attach to four support points on towers, walls or other structural supports so as to provide constraint and control of the suspended platform. The cable lengths can be independently controlled by hoist drive-mechanisms and coordinated to achieve intuitive platform movement in all six degrees-of-freedom (side-to-side, forward-and-back, up-and-down, and all three rotations

about these motions: roll, pitch and yaw). The platform, consisting of servo components (*i.e.*, hoist, amplifier, servo interface, sensory feedback), can be rapidly reconfigured to adjust to new applications. Initial applications address worker/equipment access challenges in dry dock ship and submarine repair and conversion. It can also be used for construction, high bays, and dam repair and maintenance. Various combinations of manual and automatic control can also be implemented. The hoists can be controlled manually by a multi-axis joystick, or can be automatically controlled by a computer.

Dated: March 5, 2004.

Hratch G. Semerjian,
Acting Director.

BILLING CODE 3510-13-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Correction

Accordingly, in Column 3, under the heading "Meeting Dates, Times, and Locations," in line 4, remove the following text "Alaska local time (ALT)" and replace it with the following: "Pacific local time", and in line 9, remove the following text "ALT" and replace it with the following: "Alaska local time (ALT)".

Authority: 16 U.S.C. 1801 *et seq.*

Dated: March 8, 2004.

Bruce C. Morehead,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 030404E]

Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability and request for comment.

SUMMARY: Notice is hereby given that NMFS has prepared a draft Environmental Assessment (EA) under the National Environmental Policy Act (NEPA) of the impacts on the human environment of the potential issuance of an enhancement permit authorizing take of listed chinook salmon in Johnson Creek, a tributary of the East Fork South Fork Salmon River in Idaho, associated with the operation of an artificial propagation program. The objectives of the program, which would be operated by the Nez Perce Tribe, are to conduct artificial propagation and research activities to enhance the propagation and survival of the population of naturally spawning summer chinook salmon in Johnson Creek, which are listed under the Endangered Species Act (ESA) as part of the threatened Snake River spring/summer chinook salmon Evolutionarily Significant Unit (ESU). This document serves to notify the public of the availability of the draft EA for review and comment before a final decision on whether to issue a Finding of No Significant Impact is made by NMFS.

DATES: Written comments on the draft EA must be received at the appropriate address or fax number (see **ADDRESSES**)

Groundfish Fisheries of the Bering Sea and Aleutian Islands (BSAI) Area and the Gulf of Alaska, King and Tanner Crab Fisheries in the BSAI, Scallop and Salmon Fisheries off the Coast of Alaska; Correction

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce; Correction.

ACTION: Correction to a notice.

SUMMARY: This document corrects a March 5, 2004, notice of public meetings for the Draft Environmental Impact Statement (DEIS) for Essential Fish Habitat (EFH) Identification and Conservation in Alaska. This action is necessary to correct an error in the meeting time for the Seattle, Washington, meeting.

DATES: Effective March 12, 2004.

FOR FURTHER INFORMATION CONTACT: Mary B. Goode, (907) 586-7636.

SUPPLEMENTARY INFORMATION: NMFS published a notice announcing public meetings during the DEIS's comment period on March 5, 2004 (69 FR 190428), FR Doc. 04-5019. Meetings will be held in three locations: Seattle, WA, Anchorage, AK, and Juneau, AK. The notice erroneously announced times for the Seattle meeting as Alaska local time, rather than Pacific local time. This action corrects this error.

no later than 5 p.m. Pacific standard time on April 12, 2004.

ADDRESSES: Written comments and requests for copies of the draft EA should be addressed to Herb Pollard, Salmon Recovery Division, 10215 W. Emerald, Suite 180, Boise, ID 83704, or faxed to (208) 378-5699. Comments on this draft EA may be submitted by e-mail. The mailbox address for providing e-mail comments is

JCAPE.nwr@noaa.gov. Include in the subject line the following document identifier: "JCAPE permit assessment". The documents are also available on the Internet at <http://www.nwr.noaa.gov/1sustfsh/10permits/>.

FOR FURTHER INFORMATION CONTACT: Herb Pollard, Boise, ID, at phone number (208) 378-5614 or e-mail: *herbert.pollard@noaa.gov*.

SUPPLEMENTARY INFORMATION: This notice is relevant to the following species and evolutionarily significant units (ESUs):

Chinook salmon (*Oncorhynchus tshawytscha*): threatened Snake River spring/summer-run.

Steelhead (*O. mykiss*): threatened Snake River Basin.

Background

NEPA requires Federal agencies to conduct an environmental analysis of their proposed actions to determine if the actions may affect the human environment. NMFS expects to take action on an ESA section 10(a)(1)(A) submittal received from the applicants. Therefore the Service is seeking public input on the scope of the required NEPA analysis, including the range of reasonable alternatives and associated impacts of any alternatives.

The Columbia River Intertribal Fish Commission (CRITFC) has submitted an application for a section 10(a)(1)(A) enhancement permit for operation of an artificial propagation program on Johnson Creek, ID. Notice of receipt of this permit application was published in the **Federal Register** on May 11, 2000 (65 FR 30391) and closed on June 12, 2000.

The primary goal of CRITFC's proposed hatchery supplementation program is to increase the abundance of the natural chinook salmon population in Johnson Creek and to avoid further losses of the genetic variation that may be necessary to recover the population. NMFS proposes to issue a section 10(a)(1)(A) permit for operation of the program to rear and release approximately 100,000 juveniles annually. The artificial propagation action would include collecting and spawning adult threatened Snake River

spring/summer chinook salmon, using the resulting progeny in scientific research, enhancing the propagation or survival of the listed population, and subsequently releasing juveniles that are the progeny of listed fish into the wild. The Nez Perce Tribe, acting under the permit requested by CRITFC, also proposes to install and operate a weir, a trap, and holding facilities for collection of listed Snake River spring/summer chinook salmon adults from Johnson Creek to enhance the propagation and conduct research on the listed species of salmon.

The general effects on the environment considered include the impacts on the physical, biological, and socioeconomic environments of the Snake River Basin, particularly in the Johnson Creek sub-basin.

Dated: March 8, 2004.

Phil Williams,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 030304F]

Mid-Atlantic Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Trawl Survey Advisory Committee, composed of representatives from the Northeast Fisheries Science Center (NEFSC), the Mid-Atlantic Fishery Management Council (MAFMC), the New England Fishery Management Council (NEFMC), and several independent scientific researchers, will hold a public meeting.

DATES: The meeting will be held on Thursday, April 15, 2004, from 9 a.m. to 5 p.m. and Friday, April 16, 2004, from 8 a.m. to 4 p.m.

ADDRESSES: The meeting will be held at the Radisson Airport Hotel Providence, 2081 Post Road, Warwick, RI; telephone: 401-739-3000.

Council address: Mid-Atlantic Fishery Management Council, 300 S. New Street, Room 2115, Dover, DE 19904.

FOR FURTHER INFORMATION CONTACT: Daniel T. Furlong, Executive Director, Mid-Atlantic Fishery Management

Council; telephone: 302-674-2331, ext. 19.

SUPPLEMENTARY INFORMATION: The purpose of this meeting is to assist the NEFSC in developing effective and consistent trawl survey protocols and practices for the trawl surveys. The Committee will be describing what they envision the scientific sampling gear should do in terms of the sampling focus and performance. They will be making recommendations on the new gear fishing package for the new research vessel.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Joanna Davis at the Mid-Atlantic Council office (see **ADDRESSES**) at least 5 days prior to the meeting date.

Dated: March 4, 2004.

Peter H. Fricke,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
