**SUPPLEMENTARY INFORMATION:**

**I. Abstract**

The Survey of Industrial Research and Development (R&D), has been conducted annually since 1953. The information collection involves the estimation of the expenditures on research and development performed within the United States by industrial firms. Historically, the survey has been sponsored by the National Science Foundation (NSF), with the Census Bureau acting as the collection agent. Under a joint project agreement between NSF and the Census Bureau, the Census Bureau plans to assume sponsorship and submit the R&D Survey for OMB review as a new collection.

Industry accounts for over 70 percent of total U.S. R&D each year and since its inception, the survey has provided continuity of statistics on R&D expenditures by major industry groups and by source of funds. The survey is the industrial component of the NSF

statistical program that seeks “\* \* \* to provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources and to provide a source of information for policy formulation by other agencies of the Federal government,” as mandated in the National Science Foundation Act of 1950. Statistics from the survey will be released by the Census Bureau and published in NSF’s annual publication series Research and Development in Industry. The proposed collection will continue the survey for three years.

**II. Method of Collection**

The survey will be mailed to a statistical sample of approximately 31,100 companies to collect information on the amount and sources of funds for and character of R&D performed and contracted out by industrial firms, and information on sales and employment of the firms themselves.

**SUPPLEMENTARY INFORMATION:**

**I. Abstract**

The information is needed to enable the Department to confirm whether an exporter has resolved red flags surrounding their export transaction, thus qualifying for a safe harbor and avoiding prosecution. The information report is not mandatory. Exporters can qualify for this safe harbor on their own by taking certain steps outlined in the Export Administration Regulations. It is hoped that by offering exporters this option, it will provide additional
