- whether the recipient of the funds is in compliance (or the extent of compliance) with Title III of HAVA 2002 and other state and federal statutes or the extent to which the recipient is in compliance;
- the recipient's efforts in maintenance of current funding levels for its ongoing election efforts;
- the availability of local funds, or other funding sources, for purposes of local funding matches (e.g., criteria for local matching funds may include but are not limited to education, certification and training expenses for local election officials and staff and/or traveling and lodging expenses for state conducted HAVA training. Also included in this match criterion will be any equipment contributions made by local election officials. The equipment will be subject to HAVA certification requirements as part of ensuring the integrity of the election or registration system as a whole.);
- the level of cooperation in the implementation and maintenance of the statewide voter registration list and the implementation of timely voter registration list purging activities and other requirements imposed by rule or regulation by the Secretary of State;
- the actual need for the payment of funds for compliance with HAVA 2002;
- the acknowledgement and contractual obligation by the recipient that, should the recipient fail to meet the deadlines or duties imposed by HAVA 2002 or the Secretary of State, that the recipient will fully reimburse the Secretary of State;
- the acknowledgement and contractual obligation by the recipient that, should the funds be diverted to uses other than approved by the Secretary of State, that the recipient will reimburse the Secretary of State;
- the execution and attachment of certifications required by state and federal law;
- the development of a comprehensive evaluation tool to measure the attainment of goals and timelines;
- the development of comprehensive accounting and audit plans in accordance with state and federal guidelines so that the federal funds can be separately identified and tracked; and
- the requirement that the recipient prepare and submit comprehensive monthly reports to the Secretary of State detailing the expenditures and their relationship to complying with Title III of HAVA 2002.

These criteria will be agreed to in writing in advance by the local government entity receiving the payment and the Secretary of State.

[2] H.B. 03-1356, enacted at the First Regular Session of the Sixty-fourth General Assembly, State of Colorado.
[3] Section 1-1.5-104 (1) (a), Colorado Revised Statutes.
[4] Section 1-1.5-104 (1) (c), Colorado Revised Statutes.

In addition to these safeguards, the Secretary of State will independently monitor the compliance and performance of activities on a case-by-case basis. The Secretary of State will implement financial controls that establish financial reporting methods and will develop performance indicators on a case-by-case basis for all activities funded. Monitoring and systems audits will assess the performance measurements of both the monetary and functionality of the HAVA implementation. To that end the Secretary of State plans to include members of the election community, local governing bodies, state information and technology systems experts, and state and local auditors in both the financial and data systems analysis in a review panel to ensure not only financial compliance but also system compatibility.

Section 3 – Education and Training

How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III.
-- HAVA §254(a) (3)

The human component of voting, filling out that ballot and casting that vote is the sum total of a centuries old Constitutional right of self-determination. Election Day is the result of months of training and preparation. While technology has enhanced this process with safeguards to protect the secrecy and integrity of the process, whether by polling place, absentee ballot or mail ballot, an election still requires state and local teamwork to accomplish that one important goal, a seemingly effortless election. As a result of HAVA direction and funding, the Secretary of State will reach out to its electorate, election staff and local election officials with an effective program of election education and outreach.

Through a curriculum of election law, process and Election Day administration the Office of the Secretary of State will provide local election officials and their staff members with a certification program that can be completed within a two-year period. In a broad partnership, the Secretary of State will integrate staff, guest speakers, peers in the election process and consultants into the curriculum. Technology has provided many forms of media that can be employed not only in the presentation of this training but the mobility of it as well. Electronic formats will allow for the internal use of these programs within the local entity offices as resources for training staff as well as review. Programs will be divided into regional training seminars utilizing local accommodations or educational facilities when possible. Certification of local election officials and their staff members will require completion of course work and testing. Funds spent by local election officials will be considered as criteria for local matching funds for HAVA purposes.

The greatest challenge in Election Day administration can be the hiring and training of Election Day judges. Colorado is fortunate to have had in place for the last two general elections the Junior Judges Program, which allows high school students to work as election judges alongside their senior counterparts on Election Day. The partnership has been a great success in providing the seasoned judge with the technical aptitude of a younger generation who has literally grown up with computers. The student judges are equally pleased for the chance to participate in the election process, be paid for their time and hear the war stories of past elections. Local election officials have utilized this program to bring students into the electoral process by serving as election judges.

The State recognizes the need for additional recruitment tools for encouraging participation in the election process. Marketing techniques currently under review include not only more effective ways of recruiting judges from the political parties but also investigating ways to engage the private sector, higher education, community groups, Ad Councils and service organizations.

Once recruited, the Secretary of State regards the training of these Election Day workers as a critical issue. HAVA subcommittees are currently reviewing election judge training programs nationwide. The Secretary of State and the subcommittees intend to incorporate a combination of training methods and performance measures to determine the most effective method of training.

Voter outreach is a critical part of the implementation of this particular phase of HAVA 2002. HAVA 2002 is much more than a new variation of an old theme. Centralized election administration, voter registration, complaint processes, provisional ballots and accessibility give Colorado voters' greater autonomy and responsibility. It also provides the Secretary of State the challenge of relating these changes in formats that reach potential voters with divergent educational, language and accessibility issues. While Colorado utilized provisional ballots in the 2002 election, HAVA 2002 and state legislation[5] in the 2003 legislative session have affected changes to the process. In order to inform the voters effectively, community stakeholders in the Help America Vote Committee have agreed to work with the Secretary of State to utilize their networking resources to educate electors.

Part of the outreach program includes our stakeholders working with media and personally with "talking" groups that travel to within the community groups, political organizations, the press, schools etc. to communicate these changes. The Secretary of State will utilize a multitude of media options in the method of voter education.

[5] H.B. 03-1006, enacted in the First Regular Session of the Sixty-fourth General Assembly, State of Colorado

Section 4 – Voting System Guidelines and Processes

How the State will adopt voting system guidelines and processes, which are consistent with the requirements of section 301.
-- HAVA §254 (a) (4)

Since June 1, 1991, the State of Colorado has required all voting systems, voting machines, electronic voting devices, punch cards and non-punch card electronic voting systems to meet the standards promulgated by the Federal Election Commission. Recognized independent testing authorities have the statutory authority to test, approve and qualify electronic voting systems for sale and use in the State of Colorado if certain criteria are met.

Those criteria include the following:

- Any independent testing authority will be recognized and granted the authority to qualify electronic voting systems for use in Colorado only when it has met all of the obligations and ongoing requirements necessary to gain certification as an independent testing authority from the National Association of State Election Directors (NASED) of other national authority recognized by the Federal Election Commission (FEC) for the purpose of certifying independent testing authorities.
- The independent testing authority conducts any and all tests required by NASED or other national authority recognized by the FEC for granting certification to independent testing authorities to verify the integrity of the electronic voting systems to be used in Colorado.
- Prior to the use of any electronic voting devices or electronic voting systems in any public election in Colorado, such devices must be certified by the Secretary of State following a successful qualification testing conducted by a recognized independent testing authority.

With the passage of the HAVA 2002, NASED and the Federal Election Commission will no longer offer certification of independent testing authorities, as this function will be taken over by the National Institute of Standards and Technology (NIST). However, Colorado will still require successful testing of all new voting systems by both a certified independent testing authority as well as the State of Colorado, through the Office of the Secretary of State.

Section 231(a)(2) of the HAVA 2002 allows the states the option to provide for the testing, certification, de-certification or re-certification of its voting system hardware and software by the laboratories accredited by the Election Assistance Commission. Colorado will require certification of all integrated voting systems in use in the State of Colorado. Historically, Colorado has certified individual voting systems. However, with the definition of "system" found in HAVA 2002, the integration of all systems in each county in the State of Colorado will also have to be tested. Therefore, Colorado will require each county to have its integrated voting system tested and certified as meeting the requirements of HAVA 2002 and state election code.

Existing voting systems in the State of Colorado will be required to meet the standards set out in Section 301 of the Help America Vote Act of 2002. The voting system standards include the following:

- Permits the voter to verify in a private and independent manner the votes selected by the voter on the ballot before the ballot is cast and counted;
- Provides the voter with the opportunity, in a private and independent manner, to change the ballot or correct any error before the ballot is cast and counted; and
- Notification to the voter of any over votes, the effect of the over vote and the opportunity to correct. In central count optical scan counties, this will be achieved through extensive voter education of the standards, including instructions to the voter at the polling place.

All voting systems in Colorado either already meet or will meet the error rate standards established under Section 3.2.1 of the Voting Systems Standards issued by the FEC, a manual audit capacity, a permanent paper record for recount purposes, and the opportunity for the voter to change the ballot or correct any error before the permanent paper record is produced. Colorado will also ensure that at least 1 DRE voting system that meets the standards for accessibility for voters with special needs is in each polling place in the State by the January 1, 2006 deadline.

In August 2002, the State of Colorado formally adopted Rule 27, Rules Concerning Uniform Ballot Counting Standards. These rules outline those criteria that constitute a vote for each type of voting system in use in the State of Colorado. These rules were formulated with the assistance of voting system vendors, county clerks and recorders acting as the chief local election officials, their staffs, the Secretary of State, and the Elections Division staff of the Office of the Secretary of State. A copy is attached as *Appendix A - Rule 27: Rules Concerning Uniform Ballot Counting Standards*. These rules define terms and outline what constitutes a vote for paper ballots, central count optical scan, precinct count optical scan, and punch card voting systems. It should be noted that only one county continues to utilize a punch card system in Colorado, and it is anticipated that the county will opt for another voting system. Criteria for what constitutes a vote for DREs would not be applicable.

Section 5 – Fund Management

How the State will establish a fund described in subsection (b) for purposes of administering the State's activities under this part, including information on fund management.
-- HAVA §254 (a) (5)

Prior to the enactment of state enabling legislation, a separate fund was first established administratively by the Secretary of State and the State Controller. The State's initial payment of Title I monies was then deposited into this fund.

Subsequently, a fund was established statutorily by the State HAVA enabling legislation (House Bill 03-1356), which establishes the fund as the "Federal Elections Assistance Fund".[6]

Pursuant to the new legislation, all federal funds received by the State pursuant to HAVA 2002 are deposited into the Fund, along with state and county monies appropriated for the purpose of meeting the State's 5% match requirement. In addition, net interest earned by the State Treasurer from the investment of Fund monies will be credited to the Fund.

All monies in the Fund are statutorily appropriated to the Secretary of State "for the proper administration, implementation, and enforcement of HAVA".[7] The statute also expressly requires that, "Any moneys received by the state from the federal government pursuant to HAVA shall be used by the state only for the purposes specified by the provisions of HAVA under which the moneys were provided."[8]

The Fund will be administered by the Secretary of State in accordance with the financial controls and accounting standards required by Colorado and federal law. Such controls and standards involve legal responsibilities carried out by the State Controller, the State Treasurer, and the State Auditor. (See, for example, sections 2-3-103, 24-22-107, and 24-30-201, Colorado Revised Statutes.)

[6] Section 1-1.5-106, Colorado Revised Statutes.
[7] Section 1-1.5-106 (2) (b), Colorado Revised Statutes.
[8] Section 1-1.5-106 (2) (a), Colorado Revised Statutes.

Section 6 - Budget

The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on—

(A) the costs of the activities required to be carried out to meet the requirements of Title III;

(B) the portion of the requirements payment which will be used to carry out activities to meet such requirements; and

(C) the portion of the requirements payment, which will be used to carry out other activities.

-- HAVA §254 (a)(6)

The Office of the Secretary of State originally estimated that Colorado may receive as much as $52.3 million dollars of federal funding over the next three years. The budget in Table-6.3 is based on one broad estimate of costs and activities necessary to meet the mandates of HAVA 2002. If HAVA activities are less than fully funded by the U.S. Congress, Colorado's State Plan and the planned budget will likely be modified to more fully reflect the funds – federal, state and local – that are available. Based on the risk and variability of the federal funding, the budget will be modified as the federal funds are appropriated.

Table-6.1 shows anticipated HAVA funding based on current federal funds appropriated for FY 2002-03. Federal funding for future years is included in this table in the amounts authorized by the Act. Actual figures may differ from the estimates, depending on the level of appropriation actually provided by the federal government.

Table-6.1

Anticipated Federal, State & Local HAVA Funding for Colorado - Current FY 2002-03 Appropriation

	HAVA 101	HAVA 102	HAVA 252 & 257	Total Federal Funding	State & Local Matching Funds	**TOTAL FUNDING by Fiscal Year**
FY 2002-03 - based on Appropriated Federal Funds	4,860,301	2,177,094	12,527,135	19,564,530	626,357	**20,190,887**
FY 2003-04 Estimate - assuming Full Federal Appropriation	-	-	15,092,933	15,092,933	754,647	**15,847,580**
FY 2004-05 Estimate - assuming Full Federal Appropriation	-	-	9,055,760	9,055,760	452,788	**9,508,548**
TOTAL Funding by Category	**4,860,301**	**2,177,094**	**36,675,828**	**43,713,223**	**1,833,791**	**45,547,014**

Table-6.2 provides funding estimates based on the full federal funding authorized by the Act for comparison with the actual appropriation for FY 2002-03. As indicated above, federal funding for future years is in the amounts authorized by the Act, and may change based on the actual appropriation.

Table-6.2

Anticipated Federal, State & Local HAVA Funding for Colorado - Full Appropriation

	HAVA 101	HAVA 102	HAVA 252 & 257	Total Federal Funding	State & Local Matching Funds	**TOTAL FUNDING by Fiscal Year**
FY 2002-03 - based on Full Appropriation of Authorized Federal Funding	4,860,301	2,177,094	21,130,107	28,167,502	1,056,505	**29,224,007**
FY 2003-04 Estimate - assuming Full Federal Appropriation	-	-	15,092,933	15,092,933	754,647	**15,847,580**
FY 2004-05 Estimate - assuming Full Federal Appropriation	-	-	9,055,760	9,055,760	452,788	**9,508,548**
TOTAL Funding by Category	**4,860,301**	**2,177,094**	**45,278,800**	**52,316,195**	**2,263,940**	**54,580,135**

Table-6.3 shows Colorado's estimated budget for HAVA activities. Over the next three fiscal years, the Secretary of State estimates that Colorado is eligible for up to $45.3 million in requirements payments authorized by Title II. At the time of submission of this Plan, full funding for FY 2003 was not appropriated and it is impossible to know how much will be appropriated in future years.

HAVA 2002 will change the landscape of elections across the nation. It requires that election officials take steps to increase voter awareness, provide a voice for those who may have been aggrieved, provide access to polling places for persons with special needs, and maintain centralized, more accurate information on voters and voter participation. Maintaining compliance with HAVA 2002 in future years will require continuing operational funding for those activities. Any funds remaining in the state's Election Fund when federal funding ceases will be used to defray the operational costs of the state's HAVA activities.

Table-6.3

HAVA Budget Funding ($ in thousands)				
	Estimated Initial Cost	Estimated Ongoing Cost (Annual Cost)	Cost (Initial + One Year Annual Costs)	Duration
Title III Requirements				
Section 301				
Voting Systems - Punchcard Replacement	$ 2,287	-	$ 2,287	Jan 2003 - Jan 2004
Voting Systems - Accessible Equipment (DRE's)	$ 7,852	-	$ 7,852	Jan 2004 - Jan 2006
Subtotal	**$ 10,139**	-	**$ 10,139**	
Section 302 - Provisional Voting and Voter Information Requirements	**$ 4,000**	**$ 800**	**$ 4,800**	Jan 2003 - Jan 2006
Section 303 - Centralized Voter Registration System, including support for special district and precinct locater functions	**$ 12,000 to $ 24,000**	**$ 2,400 to $ 4,800**	**$ 14,400 to $ 28,800**	Jul 2003 - Jan 2006
Other Election Reform Activities				
Network Infrastructure Costs for Centralized Voter Registration System	$ 2,025	$ 1,800	$ 3,825	Jan 2005 - Jan 2006
Requirements for first time voters who register by mail	$ 1,000	$ 200	$ 1,200	Jan 2003 - Jan 2005
Voter Education, Election Official Training	$ 6,000 to $ 10,000	$ 1,200 to $ 2,000	$ 7,200 to $ 12,000	Jul 2003 - Jul 2005
Establishment of and Training on Complaint Procedures	$ 1,000	$ 200	$ 1,200	Jul 2003 - Jul 2005
State Budget and Fiscal Controls	$ 1,000	$ 200	$ 1,200	Jan 2003 - Jan 2006
Election Reform Program Management	$ 3,000	$ 1,000	$ 4,000	Jan 2003 - Jan 2006
Subtotal	**$ 14,025 to $ 18,025**	**$ 4,600 to $ 5,400**	**$ 18,625 to $ 23,425**	
TOTALS	**$ 40,164 to $ 56,164**	**$ 7,800 to $ 11,000**	**$ 47,964 to $ 67,164**	
*** Any unspent Federal Funds will be set aside in the state's Election Fund for payment of long-term costs of complying with HAVA*				

Section 7 – Maintenance of Effort

How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.
-- HAVA §254 (a)(7)

The State will maintain state expenditures for activities funded by the requirements payment at a level at or above the expenditure level that existed prior to the receipt of federal funds. No federal funds for requirements payments will be used to supplement the state budget for operation and administration of the Office of the Secretary of State, or to supplant funding historically received from state sources for election-related purposes.

Colorado's HAVA enabling legislation (H.B. 03-1356) contains a number of provisions that, taken together, require maintenance of effort that meets and exceeds the requirements of HAVA 2002. These provisions include the following:

- Federal monies may only be used for the purposes specified by HAVA 2002[9].
- Monies in the State Fund are statutorily appropriated only for "the proper administration, implementation, and enforcement of HAVA", and such monies may not be transferred to any other fund.[10]
- Every year that the State receives federal funds, the General Assembly is required to make annual appropriations for "election-related purposes that is not less than the level of expenditures for such purposes maintained by the state for the 2001-02 fiscal year".[11]
- Every year that the State receives federal funds, the Secretary of State is required to maintain expenditures to support the statewide voter registration system from nonfederal monies at a level at or above the level for the 2001-02 fiscal year.[12]
- Every county fiscal year that the State receives federal funds, each county is required to maintain the same level of expenditures on activities arising under Title III of HAVA 2002 that it expended in fiscal year ending prior to November 2002.[13]

As can be seen, these state requirements exceed the maintenance of effort required by HAVA 2002. First, the State legislation requires maintenance of all election-related funding at previous levels, but HAVA 2002 only requires maintenance of those election expenditures that are related to Title III activities.

Second, HAVA 2002 only requires maintaining state expenditures at the level of State Fiscal Year 99-00 level (the first fiscal year ending prior to November 2000). The State legislation uses a later and higher base year, FY 2001-02.

Third, the State's legislation imposes an additional maintenance-of-effort requirement on counties that is not required by HAVA 2002. Under section 1-1.5-106 (6), above, "each county shall maintain not less than the same amount of expenditures on activities arising under Title III

[9] Section 1-1.5-106 (2) (a), Colorado Revised Statutes.
[10] Section 1-1.5-106 (2) (b), Colorado Revised Statutes
[11] Section 1-1.5-106 (4), Colorado Revised Statutes
[12] Section 1-1.5-106 (5), Colorado Revised Statutes
[13] Section 1-1.5-106 (6), Colorado Revised Statutes.

of HAVA 2002 that it expended on such activities for its fiscal year ending prior to November 2002".

Section 8 – Performance Goals and Measures

How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.
-- HAVA §254 (a)(8)

Colorado understands that accurate measurement and tracking of performance goals is paramount in achieving a successful implementation of P.L. 107-252. Performance goals provide a high-level view of a project's direction. The State's goal is to achieve election reform and compliance with HAVA requirements through the successful implementation of the programs outlined in the State Plan. Below, in Table-8.1, details are provided of each performance goal, desired outcome, timeline and responsible parties for ensuring that each goal is met.

Subsequent plans will include the detailed metrics and criteria for which these measures will be baselined and measured.

Table-8.1

PROGRAM PERFORMANCE GOAL	DESIRED OUTCOME	TIMELINE FOR MEETING OUTCOME	RESPONSIBLE PARTIES
Eliminate punch card machines in polling places	Elimination of punchcard machines in any polling place in Colorado	April 2004	Secretary of State and Local Election Officials
Implement a centralized statewide voter registration system	Assimilation of accurate voter registration information from various county election systems into a centralized system; assimilation and continuation of voter registration and election management functionality from local election systems	Commence deployment no later than April of 2005	Secretary of State and Local Election Officials
Decrease the time lag between a registered elector updating or changing their voter registration information	A consistent reduction in the number of provisional ballots cast for lack of updated voter registration information	Continual; baseline derived from November 2002 election	Secretary of State and Local Election Officials
Increase the accessibility of polling places to persons with special access needs	A dwindling number of polling place accessibility complaints found to have a basis in fact	Continual	Local Election Officials
Increase the timeliness of resolution of grievances	Quick resolution of grievances filed under the state's complaint process	Baseline will be derived after the first election in which the state's grievance process is in place	Secretary of State

PROGRAM PERFORMANCE GOAL	DESIRED OUTCOME	TIMELINE FOR MEETING OUTCOME	RESPONSIBLE PARTIES
Increase the timeliness of removing a deceased voter from the voter registration rolls	Maintain an accurate voter registration system with respect to deceased persons	Continual – will commence with the deployment of the centralized voter registration system	Secretary of State and the Colorado Department of Health, Vital Records Division
Increase the timeliness of removing convicted felons from the voter registration rolls	Maintain an accurate voter registration system with respect to persons losing the right to vote based on a criminal conviction	Continual – will commence with the deployment of the centralized voter registration system	Secretary of State, the Colorado Department of Corrections, and the U.S. Department of Justice
Eliminate duplicate voter registrations across counties within Colorado	Quick update of the centralized voter registration system based on apparent duplicate registration within Colorado	Continual – baseline derived after the November 2003 election	Secretary of State and Local Election Officials

Section 9 – Complaint Procedures

A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402.
-- HAVA §254 (a)(9)
Deadline for Compliance: Prior to certification of State Plan, but no later than January 1, 2004; no waiver permitted.

The Secretary of State will develop a unified statewide complaint system process for tracking and managing suspected violations of Title III of P.L. 107-252. This process must meet the following requirements:

- The procedures are uniform and nondiscriminatory.
- Any person who believes there is a violation of Title III may file a complaint.
- Complaints shall be in writing and notarized, signed and sworn by the person filing the complaint.
- The state may consolidate complaints.
- At complainant's request, there shall be a hearing on the record.
- The state shall provide an appropriate remedy if it finds a violation has occurred.
- If no violation is found, the complaint shall be dismissed and the results published.
- Complaints shall have a final resolution within 90 days of the complaint being filed, unless the complainant consents to a longer period.
- If the complaint cannot be resolved within that period, an alternative dispute resolution procedure must be provided.

The Secretary of State has formed a subcommittee to address this HAVA requirement effectively. This subcommittee is comprised of various stakeholders representing:

- County Clerk and Recorders
- County elections staff
- Colorado Civil Rights Commission
- Colorado General Assembly
- Political parties
- State Attorney General's Office
- Office of the Secretary of State.

This subcommittee has developed guiding principles for the complaint process to the requirements listed above. The complaint process:

- must follow federal and state law;
- should not be complicated for the aggrieved party;
- should be easily accessible for the disabled;
- should be public within the parameters of state and federal law;
- should be easily tracked by all interested parties;
- should allow for local filing and resolution;
- should allow for timely resolution within HAVA timelines; and
- should address alternate language needs as required by law.

The subcommittee has agreed to address the complaint procedures by breaking down the tasks into the following sections:

- Submission Process
- Review Process
- Alternative Dispute Resolution
- Forms
- Manuals
- Resolution Process
- HAVA Timelines

Submission Process

The Submission Process[14] will allow for the local receipt of complaints or filing directly with the Secretary of State. Upon receipt of a HAVA 2002 Title III complaint, the local election official will forward the complaint within one business day to the Secretary of State who will receive and track all HAVA complaints.

In accordance with state and federal law, the complaint must be in writing and notarized, signed and sworn by the person filing the complaint, involve a HAVA 2002 Title III alleged violation, and filed within one year from the date of the alleged violation or the election, whichever is later. A form will be developed to aid the complainant in providing the required information. The complainant has the option of utilizing the form or filing a letter with required information.

Complaints filed with the local election official will be faxed to the Secretary of State within one business day of receipt. The original will be mailed and a copy retained for the local file. Conversely, complaints filed with the Secretary of State will be faxed to the local election official within one business day of receipt. A copy will be mailed and the Secretary of State will retain the original.

Upon receipt at the Office of the Secretary of State, the complaint will be date stamped, logged in, and assigned a state ID number for tracking. A receipted copy will be faxed to the local election official.

The complaint form or letter will be checked for required information, and an acknowledgement of receipt will be sent to the complainant. The acknowledgement shall indicate the tracking number and general instructions for tracking the complaint.

Review Process

The Colorado Help America Vote Act, exempts the HAVA Administrative Complaint Procedures from the Administrative Procedure Act in C.R.S. 1-1.5-105(3)(b).

[14] §1-1.5-105, Colorado Revised Statutes.

Under the Review Process, the Secretary of State will have several options available;

- Local Resolution
- Resolution/Remedy without a hearing
- Dismissal
- Consolidation
- Extension
- Hearing
- Determination

The Code of Colorado Regulations, 8CCR 1505-3, Rule 1, Declaratory Orders, shall be modified and drafted into rules for the HAVA Administrative Complaint Procedure.

Alternative Dispute Resolution

The Alternative Dispute Resolution (ADR) procedure is required if the Secretary of State does not issue a final determination concerning the complaint within 90 days of filing.

An agreement will be drafted between the Colorado Judicial Office of Dispute Resolution and the Secretary of State to address the ADR requirements for the HAVA Administrative Complaint Procedure. Modifications in the process may be required to adapt the current procedure to the Help America Vote Act.

Forms

A form for the filing of a complaint has been drafted to aid the complainant in providing the required information. The complainant will not be required to utilize the form, but will be required by rules to provide certain information in a written, notarized complaint.

Manuals

Instructions to aid the complainant in filing and tracking a complaint will be drafted and updated as modifications are made to the process. The instructions will be posted on the Secretary of State website and available in alternative languages in counties as required by law.

An instruction sheet for local election officials will provide uniformity in handling the complaints statewide.

Resolution Process

A brief outline of the resolution process includes the following basic elements:

- Filing
- Tracking
- Review (with or without hearing)
- Consolidation and Extension
- Determination, which may include dismissal
- Alternative Dispute Resolution (if no determination within 90 day timeframe)

- Court Appeal (if complainant is not satisfied with final determination or ADR is unsuccessful)

HAVA Timelines

The timelines for filing a complaint under the HAVA Colorado Administrative Complaint Procedure and disposition/resolution of the complaint are clearly outlined in federal and state law:

WITHIN ONE BUSINESS DAY the local election official shall transmit a Title III HAVA complaint filed with the local official to the Secretary of State.

WITHIN ONE YEAR of the occurrence of the alleged violation or of the election giving rise to the complaint, whichever, is later; the complaint must be filed with the Secretary of State. [C.R.S. 1-1.5-105(2)(d)]

WITHIN 90 DAYS of the date the complaint is filed, the Secretary of State must issue a decision on the complaint [C.R.S. 1-1.5-105(2)(i)], unless the complainant consents to a longer period for making such determination. [HAVA Section 402(a)(2)(H)]

WITHIN 60 DAYS following the 90-day time frame, if the Secretary of State fails to issue a final decision on the complaint, the complaint shall be resolved under the Alternative Dispute Resolution Procedure established by the Secretary of State. [C.R.S. 1-1.5-105(2)(j) and HAVA Section 402(a)(2)(I)]

WITHIN 30 DAYS following the final determination by the Secretary of State, an aggrieved party may appeal the Secretary's determination to the District Court in and for the City and County of Denver. [C.R.S. 1-1.5-105(4)]

Section 10 – Effect of Title I Payments

If the State received any payment under title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.
-- HAVA §254 (a)(10)

It is estimated that Colorado will receive approximately $7.1 million under Title I of P.L. 107-252. These funds will be split between activities listed in §101 and §102.

§101 – Payments to states for activities to improve administration of elections

It is estimated that Colorado will receive approximately $4.9 million to improve the administration of elections. This is the amount of funds remaining after the calculation of §102 funding.

It is predicted that Colorado will use these funds to address the following activities:

- Comply with Title III requirements
- Improve administration of elections for Federal office
- Educate Voters
- Training Elections Officials, election judges and volunteers
- Developing the State Plan for requirements payments
- Replacing voting systems and technology for casting and counting votes
- Improving accessibility and quantity of polling places

§102 – Replacement of punch card or lever voting machines

It is estimated that Colorado will receive approximately $2.2 million for replacement of voting machines. This is calculated by multiplying the number of qualifying precincts (682) by $3,192 as currently estimated.

Table-10.1 lists the Colorado precincts for equipment buy-out:

Table-10.1

COUNTY	PRECINCTS	DESCRIPTION
Boulder*	249	Includes 4 early voting sites with 6-12 machines per site
Jefferson**	322	Includes 8 early voting sites (total of 10 punch card machines for early voting)
Mesa**	71	Includes 1 absentee precinct and 4 early voting precincts
Montrose	22	Includes 1 absentee precinct
Pitkin***	18	Includes 1 absentee precinct and 1 early voting precinct
Total	**682**	

** Boulder is in the process of replacing punchcard systems with DREs*
*** Jefferson and Mesa County have already replaced their punch-card systems and qualify for reimbursement under HAVA 2002.*
**** Pitkin County leases its optical scan system that replaced a punch card system used in the November 2000 election.*

Section 11 – State Plan Management

How the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change—

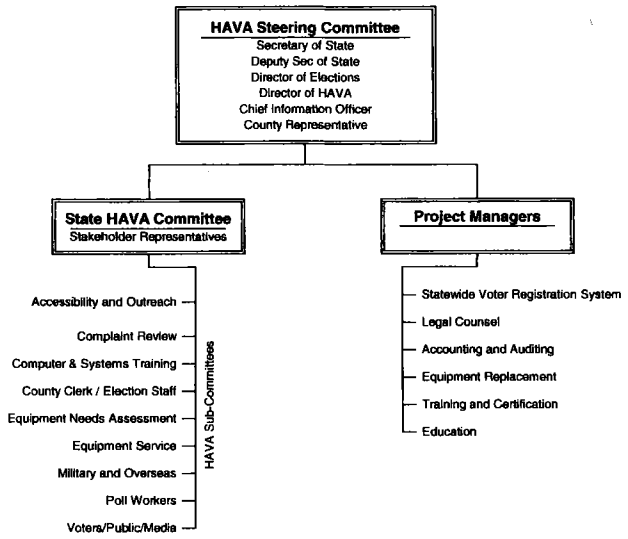
(A) is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;

(B) is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and

(C) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).

-- HAVA §254 (a)(11)

Colorado will use the State Plan as the basis for managing the activities necessary for the implementation of HAVA requirements. The Secretary of State, with guidance from the HAVA Steering Committee, will be responsible for the management and implementation of the State Plan.



Title II of the Help America Vote Act requires each state to describe how it will manage the implementation of its proposed HAVA plan. This description must include who is responsible for implementation and monitoring, the process for changing the state plan, implementation timelines, and reporting requirements for counties and projects. Colorado will conduct plan management at four levels:

Secretary of State – In Colorado, the Chief State Election Official is the Secretary of State. Accordingly, the Secretary of State has the ultimate responsibility for the implementation of HAVA requirements. As a result, the Secretary of State will possess the final authority in decision-making and management of the HAVA program.

State HAVA Steering Committee – The primary responsibility of the Steering Committee is to provide overall guidance, leadership and direction to all HAVA activities. This committee will meet on a regular basis to address the needs of the HAVA activities in a timely manner.

State HAVA Committee / HAVA Subcommittees – These committees are comprised of various volunteers at the state and county levels that represent a cross section of interests. They are responsible for research, analysis, and development of select HAVA needs. All HAVA projects will rely on this resource pool to accomplish their respective objectives.

Project Managers – Individual leaders will have responsibility for the day-to-day coordination and implementation of distinct projects within the HAVA plan. These project managers may be State HAVA Steering Committee members, Elections Division staff, Contractors, or county representatives. These individuals are responsible for reporting project activities, progress, and resource needs/expenditures to the State HAVA Steering Committee. Project managers and project/task leaders will determine appropriate reporting based upon the needs, requirements, complexity, and risk factors of each project.

The State of Colorado will comply with HAVA requirements related to ongoing management of the State Plan. Material changes in the administration of the State Plan will not be made unless the change is developed and published in the Federal Register in accordance with HAVA §255, is subject to public notice and comment in accordance with HAVA §256, and takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register.

Preliminary Implementation Schedule

Task	Start Date	Finish Date
TITLE III Requirements - Preliminary Schedule	**01/01/03**	**01/01/06**
Section 301 - Voting System Standards	07/03/03	01/01/06
Section 302 - Provisional Voting	01/01/03	12/31/03
Section 302 - Voting Requirements	03/01/03	12/31/03
Section 303 - Statewide Voter Registration System	07/02/03	12/31/05
Section 303 - Register by Mail Requirements	01/01/03	01/01/04

Section 12 – Changes to State Plan from Prior Year

In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year.
-- HAVA §254 (a) (12)

This State Plan is the initial submission of the plan as required under P.L. 197-252. This section will be updated in subsequent fiscal years, reflecting changes to the plan, as well as a summary of the successes from the prior fiscal year.

Section 13 – Colorado HAVA Team

This vision of elections to come in Colorado is a direct result of the dedicated teamwork of community stakeholders who have donated their time and talent to this long-term project. Ensuring integrity, independence and self-determination is an exciting challenge that the Help America Vote Act Committee and Subcommittees have embraced enthusiastically.

APPENDIX A – Rule 27: Rules Concerning Uniform Ballot Counting Standards

27.1 Definitions

27.1.1 Blank Ballot. A blank ballot is one on which the voter has made no marks in any voting position, or has been marked with an unreadable marker, or is one which has been consistently marked outside of the "read" area of the scanner.

27.1.1 Chad. Chad is the small piece of paper or cardboard produced from a punch card ballot when a voter pierces a hole in a perforated, designated position on the ballot with a marking device to record the voter's candidate, question, or issue choice.

27.1.2 Damaged Ballot. A damaged ballot is one that has been torn, bent, or otherwise mutilated or rendered unreadable, so that it cannot be processed by the optical scanner ballot reader.

27.1.3 Duplicated Ballot. A duplicated ballot is one for which a true copy is made in order to be properly processed and counted due to damage, improper marking or some other reason which would prevent a ballot tabulating machine from accurately counting the ballot.

27.1.4 Punch Card Ballot. A punch card ballot is a ballot card that contains small perforated design positions that a marking device must pierce to form a hole that records a voter's candidate, question, or issue choice.

27.1.5 Over vote. An over vote is a race, question or issue which contains votes for more than the maximum number of candidates or responses for a ballot question or issue allowed.

27.1.6 Under vote. An under vote occurs when the voter does not vote for a candidate, question, or issue, or when more than one person in a race is available, the voter does not vote for the maximum number of votes allowed.

27.1.7 Vote in Optical Scan Ballots. A correctly voted optical scan ballot occurs when a voter, using a readable marker, fills in or connects the minimum number of ovals/arrows per race, question, or issue, not to exceed the maximum allowable votes per race, question or issue, without extending the vote mark beyond the parameters of the instructions.

27.1.8 Write-In Vote. A vote on a ballot on which the voter physically writes in the name of a legally qualified write-in candidate in the space reserved on the ballot for write-in votes and properly marks the oval or connects the arrow on optical scan ballots according to the directions provided to the voter. C.R.S. 1-7-304

27.2 Uniform Counting Standards for Paper Ballots

27.2.1 Judges counting ballots on Election Day shall take into consideration the intent of the voter.

27.2.1 If a ballot contains markings for more than the maximum votes allowed in a candidate race or for a ballot issue or question, no vote shall count for that race, question, or issue. Judges shall take into consideration any notation by the voter that would clearly indicate the choice of the voter.

27.2.2 If an issue, question or candidate race contains no markings by the voter, no tally will be made for that race, question, or issue, but all other candidate races, issues, or questions properly marked by the voter on the ballot shall be counted.

27.2.3 A ballot which has no markings for any candidate races, issues or questions shall be tallied as a blank ballot, but the voter shall be given credit for voting.

27.2.4 If the intent of the voter is clear on a write-in vote, the write-in vote shall be counted for a legally qualified candidate.

27.3 27.3.1 Testing of Optical Scan Equipment

(a) Optical scan equipment must be set to consistent and uniform sensitivity standards for each system type.

(b) Pre-election testing should be performed by the designated election official in accordance with C.R.S. 1-7-506(1) and Rule 11.4.

(c) Election Day count machine settings should sort blank ballots, over votes, and write-in votes for the resolution board.

27.3.2 Precinct Optical Scan Procedures

(a) Voters whose ballots are rejected or sorted by the precinct counter as a blank or over voted ballot shall be given the opportunity to correct their ballot.

(b) Ballots sorted to a write-in bin shall be tallied at the conclusion of the voting and delivered to the central county center in a secure container.

27.3.3 Central Count Optical Scan Procedures

(a) A resolution board, consisting of a team(s) of one (1) Republican and one (1) Democrat for partisan elections or two (2) qualified election judges for nonpartisan elections, shall resolve all ballots sorted by the central count optical scan equipment.

(1) The board shall be observed by two (2) witnesses, who in any partisan election shall be representatives of each major political party, who may not handle or process ballots.

(2) All persons engaged in the counting and processing of ballots shall be deputized or take an oath to faithfully perform their duties.

(3) The resolution board shall maintain a log for each step of verification, duplication, and counting according to Rule 11.5.58.

(b) Sequence of Resolution Procedures

(1) Testing of the optical scanner shall begin immediately prior to counting official ballots.

(2) A zero tape shall be run indicating no votes cast or counted before the counting begins.

(3) Official ballots shall be processed through the optical scanner, with sorted over votes, blank ballots, and write-in ballots viewed and resolved by the resolution board. If there are no legally qualified write-in candidates, the write-in sort option shall not be utilized. The number of each duplicated or clarified ballot shall be entered on the resolution board log sheet.

(4) All ballots which are sorted by the optical scanner and resolved by the resolution board either by duplication or clarification are to be indicated as such and kept separate from the standard run ballots for the precinct.

(5) The precinct judge's ballot return form is compared to the number of scanned ballots for the precinct.

(6) After the final precinct has been tallied, the total write-in votes shall be indicated on the final summary along with the seal numbers for each sealed box of scanned ballots.

(7) The optical scanner shall be tested again by tabulating the test deck at the conclusion of the count.

(c) Resolution of optical scan ballots

(1) Damaged or defective ballots shall be repaired, if possible, to be accepted by the optical scan equipment. If the ballot is damaged beyond repair, the ballot shall be duplicated utilizing the ballot duplication procedures.

(2) Blank ballots shall be examined by the resolution board to determine if the ballot is a true blank ballot or one that has been marked with a non-detectable device. The resolution board may clarify a non-detectable mark in such a manner that the original voter mark is preserved, such as making a detectable line through the non-detectable mark, placing a removable label over the non-detectable mark and marking with the proper device, or placing cellophane tape over the mark and a marked removable label to properly reflect the voter's intent. Resolution board members must initial the clarification in a non-readable area on the ballot next to the clarification. The election official may also choose to make a duplicate copy of the ballot utilizing the ballot duplication procedures. If a ballot is truly blank it shall be sent back for the resolution pass through the scanner, and the ballot tabulated with no races, issues or questions voted.

(3) Over voted ballots shall be inspected by the resolution board. Any marks that are clearly identified as unintentional but register an over vote on the scanner may be clarified by the resolution board by the placement of a removable adhesive sticker over the unintentional mark. The two members of the resolution board must initial next to the clarification in a non-readable portion of the ballot. The election official may also choose to make a true duplicate copy of the ballot utilizing the procedures for duplication of ballots.

(4) Write-in votes sorted by the optical scan equipment on Election Day shall be delivered to the assigned write-in board for hand counting. In order to be counted, the oval must be darkened or the arrow connected according to the appropriate voting instructions. Only votes for legally qualified write-in candidates shall be counted.

(5) The resolution board shall duplicate ballots by clearly labeling the new duplicate ballot as a "DUPLICATE" and assign a serial number which shall be recorded on both the original and duplicate ballot. For example, the first ballot in Precinct # 1 to be duplicated could be labeled as #1/001 with the duplicate labeled D#1/001. Original ballots shall be separated from the duplicate ballots and placed in an envelope clearly marked "ORIGINAL BALLOTS." The duplicate ballots shall be counted in lieu of the original ballots.

(d) Recount Procedures for Optical Scan

(1) Optical scan equipment must be set to consistent sensitivity standards for each system type, must be tested prior to the recount, and shall be programmed to sort under votes for the individual race(s), issue(s) or question(s) being recounted.

(2) Recounts will include a visual inspection of all ballots cast for write-in candidates in the contested race(s) to determine voter intent.

27.4 Uniform Counting Standards – Punch Card Voting Systems[15] C.R.S. 1-7-503

27.4.1 Inspection of Ballots. Prior to the counting of the ballots by automatic tabulating equipment, at least one team of election personnel, which except in non-partisan elections shall consist of one member from each political party, shall inspect the ballots for loose chad, ballot damage, including holes that are too large, a ballot that is torn in the mail, etc., written instructions and corrections, and write-in votes. The purpose of the inspection shall be to insure that all ballots are machine-readable and that the voter's intent will be recorded correctly and accurately. In some instances, duplication of the ballot may be necessary in order to count the ballot.

(a) All loose chad shall be removed to ensure that all of the voter's choices on the ballot are correctly and accurately reflected in the count.

(1) A chad that is unattached on two or more corners represents a vote and shall be removed.

(2) If a chad is attached to a punch card ballot by three or four corners, no vote shall be recorded for that candidate, issue or question choice at that particular ballot position, and the chad shall not be removed.

(b) Dimpled mark or puncture on the attached chad.

(1) If a ballot has been punched according to instructions, but there exists a random dimpled mark or puncture located wholly on the non-removed chad, that mark or puncture shall be considered a random mark or puncture.

(2) If the ballot has nowhere been punched according to instructions, but consists of a series of dimpled marks or punctures located wholly on the attached chad, those marks or punctures shall represent the voter's intent to vote for that designated position, and the ballot shall be duplicated accordingly.

(3) If a dimpled mark or puncture appears on the ballot anywhere other than completely on the chad, voter intent cannot be determined, and the ballot shall be duplicated without that dimple mark or puncture.

(c) Damaged ballots. If the ballot has damage or defects that would cause problems in tallying, such as a ballot being torn in the mail, the ballot shall be duplicated to the extent possible, evidencing the voter's intent. If the voter's intent cannot be determined for a specific office, issue or question on the damaged ballot, that position shall be left blank on the duplicate ballot.

[15] Rule 27.4 providing for uniform counting standards for punch card voting systems will remain in effect pending the replacement of these voting systems pursuant to HAVA.

(d) Voter instructions. If other material is included with the ballot or is attached to the secrecy envelope, the material shall be inspected to determine if it has a bearing on the voter's intent. If the material has a bearing on the voter's intent, the original ballot shall be duplicated as necessary and the original ballot, along with the material, shall be placed in an envelope marked "Duplicate Ballot." If the material has no bearing on the voter's intent, it shall be discarded.

(e) Write-In Votes.

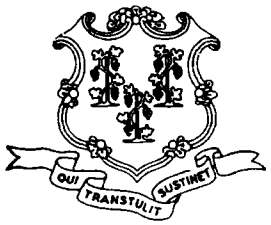
(1) Write-in votes shall be recorded on the secrecy envelope.

(2) Only votes cast for legally qualified write-in candidates shall be considered valid and counted. Any write-in votes for candidates who are not legally qualified shall be disregarded and not counted.

(3) On the punch card secrecy envelope, the voter must indicate both the name of the candidate being written in the office for which the candidate is running. If either candidate's name or the office for which the candidate is running is left off the secrecy envelope, then the intent of the voter cannot be determined and the vote shall not be counted. If the write-in vote is disregarded, any vote for that office on the punch card ballot itself shall be tabulated and counted.

(4) If both the office name and the candidate's name are included in the write-in option on the secrecy envelope, the punch card ballot must be checked for any other votes for that office. If the write-in vote does not result in an over vote for that office, then all votes shall be tabulated and counted. If the write-in vote creates an over vote for that office, then neither vote shall be counted, and the punch card ballot shall be duplicated to reflect an over vote.

(5) If the write-in line contains a name that is the same as the one that is printed on the ballot for that office, regardless of whether the ballot position for that candidate is punched out or not, then the write-in vote shall be disregarded, and the ballot shall be duplicated, if necessary, so that the tabulating machine will count the vote as a vote for the selected candidate.



27.4.2 Duplication of Ballots.

(a) Using the damaged ballot as the guide, a blank ballot shall be marked by a duplicating team, so that the votes recorded are identical to those indicated on the damaged ballot, and shall be proofed to insure that is marked properly and accurately.

(b) A unique number shall be assigned to both the original and duplicated ballot. This will reference the two ballots together and provide an audit trail. (Example: the ballots may be marked XX-NNN, where XX is the precinct number and NNN are consecutive numbers starting with the number one.)

(c) The duplicate ballot shall be placed with all other ballots to be counted.

(d) The damaged or unreadable original ballot shall be marked "DUPLICATED" to indicate that the ballot has been duplicated and the duplication is completed. All duplicated original ballots for a precinct along with any applicable printed material shall be placed in an envelope and clearly marked "BALLOTS THAT HAVE BEEN DUPLICATED."

INTRODUCTION

As the Chief Election Official for the State of Connecticut I am proud to present the Connecticut State Plan. Development of a state plan is required by Section 253(b) of the Help America Vote Act of 2002, Public Law 107-252 (hereinafter "HAVA") to detail the implementation of the Act in Connecticut. HAVA is one of the most significant and influential election reform bills passed in recent years. Although some provisions of HAVA will require reform of Connecticut's election laws, I am proud to say that Connecticut stands at the forefront of states with regard to many of the provisions. With the appropriate amount of federal financial support, the State of Connecticut will have the opportunity to build upon our effective administration of elections when implementing the provisions of HAVA.

This State Plan, developed in conjunction with the Connecticut State Planning Committee, establishes a solid outline for compliance with the provisions of HAVA. The committee is comprised of a vast array of participants and stakeholders each representing an important aspect of our community.

In addition, this State Plan was developed mindful of pending legislation in the State of Connecticut, H.B. 6592, An Act Concerning Implementation and Administration of the Help America Vote Act. This document recognizes that the proposed legislation will result in an effective implementation of all of the provisions of the HAVA.

Although each of our 169 municipalities will remain responsible for the administration of our elections at the local level and any additional requirements prescribed by HAVA, the Office of the Secretary of the State will seek to provide them with the tools and financial support necessary to fulfill their expanded duties under HAVA.

The State of Connecticut will continue to encourage accessibility for individuals with disabilities and work toward the common goal of allowing all citizens in the state the opportunity to vote in private. We will work hard to remain at the very forefront of implementing a uniform statewide voter registration system and will continue to investigate all aspects of voting systems to identify which systems will most benefit all electors in our state.

Connecticut will continue to update and refine the State Plan as necessary to reflect changes and progress in election reform. I am confident that the State of Connecticut will become a model for other states as we work toward compliance with HAVA.

Susan Bysiewicz
Secretary of the State

Secretary of the State of Connecticut
Preliminary State Plan

STATE PLAN APPROACH

The State of Connecticut administers elections through a two-tiered system. The Secretary of the State is the Chief Election Official and through the Secretary's agency administers and supervises the electoral process at the state level. Each of the 169 towns in Connecticut have a town clerk who is either elected or appointed and two registrars of voters who are elected for two or four year terms. These officials work in cooperation to effectively administer successful elections at the local level. The Secretary of the State, as an advisor, the town clerks, and registrars of voters must work together to serve all political candidates and the nearly 2 million registered voters in Connecticut.

Status of State of Connecticut's HAVA implementation:

The State of Connecticut is near completion of a centralized voter registration system that will connect all 169 towns to a central database of all registered voters in the State. Currently, the State of Connecticut has 149 towns out of 169 towns connected to the centralized voter registration system. An additional 10 towns have committed to joining the system before the Federally mandated deadline and have sent in the appropriate information to the State of Connecticut to enable them to join. Upon completion, the centralized voter registration system will allow registrars of voters to effectively monitor their official registry list, to keep track of those electors who may have moved in or out of their municipalities, and to more effectively prevent voter fraud and duplicate registration.

Considerable efforts are necessary for the State to meet all of the other HAVA requirements. The State of Connecticut will need to complete the centralized voter registration system by adding the remaining towns to the system (in accordance with recent State legislation passed, Connecticut Public Act 03-117, An Act Concerning the State-Wide Centralized Voter Registration System, requiring all towns to participate on the centralized voter registration system by September 1, 2003), redesign the election administration processes, establish a provisional ballot system, revamp training, and investigate voting system alternatives (through passage of H.B. 6592, An Act Concerning Implementation and Administration of the Help America Vote Act). The State of Connecticut's ability to provide ongoing operations as well as maintenance of new and required capabilities is dependent on adequate resources and funding from the Federal level.

State of Connecticut's Future Approach:

This State Plan is organized as specified in HAVA §254. Each section of this document corresponds to a subsection of §254 and addresses a State Plan requirement specified in HAVA. The plan outlines HAVA requirements and the State's current status in regard to those requirements, and defines the actions planned to help the State meet those requirements.

STATE PLAN REQUIRED ELEMENTS

A. TITLE III REQUIREMENTS AND OTHER ACTIVITIES

How the State will use the requirements payment to meet the requirements of title III, and, if applicable under section 251(b)(2), to carry out other activities to improve the administration of elections. (HAVA §254(a)(3)).

1) §301(a) Voting System Standards Requirements
Deadline for Compliance: January 1, 2006

The State currently uses two voting systems in its 169 towns, lever voting systems, and optical scan voting systems. Before the enactment of HAVA, the State of Connecticut began investigating other voting technologies. In the 2001 and 2002 legislative and special sessions there was proposed legislation that would have allowed at least three municipalities to participate in a voting demonstration project using electronic voting technology. This legislation was not passed. In the 2003 legislative session, the Secretary of the State again proposed legislation that would allow at least three municipalities to participate in a voting demonstration project using electronic voting technology. On April 29, 2003, Governor John Rowland signed Connecticut Public Act 03-7, An Act Concerning a Demonstration Project for the use of Electronic Equipment for the Casting and Counting of Ballots and Prohibiting the use of Punch-Card Voting Machines, that allows the State of Connecticut to test electronic voting technologies in different municipalities. After the demonstration, a full report will be issued to the legislative committee having cognizance over this matter detailing the success and failures of the different voting technologies along with individual voter feedback. This report will be useful as the State of Connecticut begins the process of moving toward electronic voting systems.

Three of Connecticut's 169 municipalities currently use optical scan voting systems to tabulate the results of the full election ballot. Several of the State's 169 municipalities use optical scan voting systems for absentee balloting. The remaining municipalities use lever voting systems. Pursuant to Connecticut General Statutes §9-238, one lever voting machine is required for each nine-hundred or fraction of nine-hundred electors whose names appear on the last completed registry list of the municipality. This results in approximately 3,308 lever voting systems used throughout the entire State. Research with regard to the electronic voting systems capacity as to how many voters the electronic systems can accommodate during an election must be continued. The electronic voting systems will be closely monitored during the demonstration project to determine the actual number of voters each electronic voting system can accommodate during Election Day.

It is expected that the State of Connecticut will incur significant costs to train poll workers and election officials and to conduct voter outreach on the use of the new electronic voting equipment. Adequate federal funding is vital to ensure the State of

Connecticut's compliance with this provision of HAVA. If the electronic voting equipment available can accommodate 900-1000 voters per Election Day, it would require Connecticut to purchase 3,308 electronic voting systems. Implementation of these systems would cost approximately $16 million for hardware (3,308 x $5000 / per machine).

In addition, the State of Connecticut is actively reviewing whether the current lever machines used in the municipalities would be compliant with HAVA if they were "retro-fitted" with a "print-o-matic" function. This function would allow election officials to make a carbon copy of the official counters located inside the machine by use of a special device that makes an imprint on the carbon paper. This method would produce a paper record of the machine results for audit purposes. It remains unclear whether the paper audit record required by HAVA is a paper audit record for the machine or a paper audit record for each vote. The State of Connecticut understands that several of the electronic voting systems available comply with both the disability and audit requirements provided in HAVA.

The ultimate goal of the Secretary of the State was to replace all lever voting systems within the State. However, with the rejection of the State of Connecticut's HAVA §102 application, which would have provided additional funds and authority to replace all lever voting systems in the State, this ultimate goal may be delayed. Therefore, to fully comply with the provisions of HAVA regarding accessibility for individuals with disabilities, the State of Connecticut will purchase one electronic voting system for each polling location in Connecticut (currently 746 statewide) for use by individuals with disabilities. In addition, the State of Connecticut is now working with all municipalities on a "Phase-In" plan (described below) for replacement of lever voting systems.

Finally, §301(a) of HAVA requires states to define what constitutes a legal vote for each type of voting system used in the State. Connecticut already complies with this provision. For each voting system in current use, the Secretary of the State produces a manual defining what constitutes a legal vote in the case of a canvass or recanvass. The State will continue to define a legal vote in a uniform manner for each voting system used in the State.

Implementation of Connecticut's Voting System Compliance will progress as follows:

a) Planning - Connecticut will conduct a demonstration project using electronic voting technology pursuant to Connecticut Public Act 03-7. Such demonstration project will require a full written report of the results of such project. The report will then be used as a reference when Connecticut proceeds with final certification of electronic voting equipment.
b) Implementation – The State of Connecticut will place one electronic voting system in each polling location in Connecticut. After such initial step, Connecticut will require each municipality to assess the overall condition of their voting equipment and submit a plan to the Secretary of the State

indicating whether the municipality will seek to replace all lever voting systems; only a portion of the lever voting systems; or continue to rely solely on such systems for all elections in the municipality. Such plan will also detail the municipality's plan of implementation if lever voting systems are to be replaced. Upon receipt of such plan, Connecticut will review procurement options for the electronic voting systems and create schedules, work plans and trainings to effectively replace all noncompliant voting systems in the State.

A more detailed explanation of Connecticut's compliance with Section 301, Voting System Standards, can be found in *Appendix A.*

2) §302, Provisional Voting and Voting Information Requirements
Deadline for Compliance: January 1, 2004

HAVA addresses the process of provisional voting to ensure that no individual who appears at the polls intending to cast a ballot is turned away without having the opportunity to do so. Currently, Connecticut General Statutes §9-232 allows an elector to cast a challenge ballot if the elector's name appears on the last completed registry list but the elector is challenged on the grounds of want of identity, disfranchisement or lack of bona fide residence.

In reaction to the passage of HAVA, the Office of the Secretary of the State assessed the State's current challenge ballot procedures to determine those elements needing modification in order to fully comply with HAVA. The Secretary of the State determined that the HAVA requirements on provisional ballots differ greatly from the current challenge ballot procedures in state statute. Therefore, the Secretary of the State drafted new legislation, H.B. 6502, An Act Concerning Implementation and Administration of the "Help America Vote Act", currently before the General Assembly, that creates a provisional ballot procedure compliant with the procedures set forth in HAVA.

In addition to provisional voting requirements, HAVA mandates that states publicly post specific information at the polls on Election Day. Connecticut currently displays certain voting information at each polling place, however, the Secretary of the State must adjust and include some content to these postings in order to comply with HAVA.

HAVA further provides that voters who vote (pursuant to a court or other order), during extended hours after the normal close of a polling place, cast provisional ballots. These ballots must be kept separate from other provisional ballots. As with other provisional ballot requirements, the State of Connecticut does not currently have this provision in state statute. Therefore, H.B. 6592 creates a procedure for this circumstance.

Implementation of Connecticut's Provisional Voting Procedures will progress as follows:

a) Impact Assessment - The Secretary of the State assessed the requirements of HAVA §302 and reviewed and compared existing State law with HAVA.

b) Implementing Revisions - The Secretary of the State developed revisions and additions to State law and will facilitate passage of such law in the State legislature. Once such legislation has passed, the Secretary of the State will place the new law into operation with revised procedures, training, and outreach.

Details on the current status of provisional voting and Election Day postings can be found in *Appendix B.*

3) §303 Computerized Statewide Voter Registration List Requirements and Requirements for Voters Who Register by Mail
Deadline for Compliance: January 1, 2004.

Currently, 159 of Connecticut's 169 municipalities participate or have agreed to participate on the State of Connecticut's Centralized Voter Registration System ("CVRS"). Each user who participates on CVRS has access to the information stored on the mainframe through individual computers located within their offices. Persons desiring to register to vote either present their qualifications in person at the registrars of voters or Town Clerk's office or mail their application to such office. Once received, an applicant's qualifications are reviewed and the applicant is either accepted or rejected as a qualified elector. If accepted, the registrars of voters enter the applicant's registration information into CVRS at the local level where such entry automatically updates the central mainframe. CVRS is not only used for voter registration purposes but it is also used to create and print the official registry list used in all elections, primaries and referenda in the municipalities. The central database that houses all voter information is located at the State of Connecticut's Department of Information Technology on the same mainframe as the Connecticut State Police. This location was chosen because of the high security associated with such location and because the location is regularly audited by the Federal government for security purposes. Because of the central location, the Secretary of the State is able to review the database on a regular basis to identify potential duplicate voters and forward such findings to the local registrars of voters for additional review. Finally, the Secretary of the State has already established a procedure with the Department of Corrections to identify those persons who have lost their voting privileges because of a felony conviction. The State of Connecticut is currently reviewing similar arrangements with the Department of Motor Vehicles and the Department of Public Health to satisfy the additional provisions of HAVA.

As explained above, the State's CVRS is a "single, uniform, official, centralized, interactive, computerized statewide voter registration list" as required by HAVA. Moreover, the State's CVRS already has many of the specific requirements of HAVA such as a field for driver's license numbers. In the 2003 legislative session the General Assembly passed Connecticut Public Act 03-117, An Act Concerning the State-Wide Centralized Voter Registration System, requiring all remaining towns to participate on CVRS by September 1, 2003.

In addition, the Office of the Secretary of the State has already redesigned the State's mail-in voter registration application as required by HAVA and proposed legislation to modify the verification of identification provided by first-time voters who register by mail.

Implementation of Connecticut's Centralized Voter Registration System will progress as follows:

a) Planning - The Secretary of the State has reviewed HAVA §303 to determine any additional requirements needed for CVRS and any necessary changes in procedures and/or state law. In addition, the Secretary of the State has determine options for development of data integration between the Department of Motor Vehicles and the Department of Public Health modeling such agreement after the one already in place between the Secretary of the State and the Department of Corrections.
b) Implementing - The Secretary of the State will implement the necessary changes to procedures and state law necessary to comply with the provisions of HAVA. In addition, the Secretary of the State will design, test and deploy any additions or upgrades to CVRS as required by HAVA and develop and deliver appropriate training and outreach to ensure successful implementation of CVRS to the remaining towns not already participating on CVRS.
c) Operating and Maintaining - The Secretary of the State will continually maintain and improve the software used in CVRS and maintain a technical infrastructure necessary for all users of CVRS.

Details on the current status of Connecticut's Centralized Voter Registration System and Identification Provisions can be found in *Appendix C.*

4) §304, Minimum Requirements

The State of Connecticut understands that the requirements outlined in Title III of HAVA are the minimum requirements required to be implemented by law and that the State may establish different election technology and administration requirements. Any different requirement that the State imposes will comply with all Title III requirements, as well as the laws described in HAVA §906.

5) §305, Methods of Implementation Left to Discretion of State

The State may choose various means to comply with the requirements of HAVA. Specific details on the implementation methodology chosen can be found in prior sections of this plan.

6) §311, Adoption of Voluntary Guidance by Commission

Once the federal Election Assistance Commission has issued its voluntary recommendation with respect to Title III, the State will consider that guidance in updating the State Plan. The State will incorporate those recommendations deemed appropriate into subsequent versions of the State Plan.

7) §312, Process for Adoption

The State will monitor the progress of the Election Assistance Commission on developing the Title III recommendations. If appropriate, the State will provide feedback on the new recommendations issued by the Election Assistance Commission during the public comment period.

8) HAVA §251(b)(2) – Other Activities

The State proposes to establish a solid foundation to build and sustain the people, processes, and technology necessary to maintain the new capabilities.

B. CONNECTICUT'S DISTRIBUTION OF REQUIREMENTS PAYMENT

How the State will distribute and monitor the distribution of the requirements payments to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of—

(A) the criteria to be used to determine the eligibility of such units or entities for receiving the payment; and

(B) the methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8). (HAVA §254(a)(2)).

1) Eligibility of local units to receive the payment

The Secretary of the State will centrally manage initiatives funded by requirements payments. The Secretary of the State will be responsible to account for all expenditures, funding levels, program controls, and outcomes. The Secretary of the State will follow applicable Connecticut law regarding the expenditure of federal funds. The Secretary of the State will provide such support as is feasible and appropriate to the municipalities and other organizations within the State if they seek HAVA grants outside the scope of requirements payments.

2) Performance measures for local units

The Secretary of the State will centrally manage the funds as described in Subsection 1 of this Section and the Secretary of the State will monitor the initiatives for which those funds are authorized.

The Secretary of the State will monitor the performance of each initiative that is funded by requirements payments in three areas; financial controls, compliance with standards, and program results.

Financial Controls: The Secretary of the State will develop and use standard financial reporting, as outlined by state and federal law, for all initiatives funded by requirements payments.

Compliance with Standards: The Secretary of the State will develop and use standard program management reporting for all initiatives that are funded by requirements payments to ensure that any program funded by requirements payments comply with the provisions of HAVA.

Program Results: The Secretary of the State will develop key performance indicators for each expenditure of requirements payments. Specific performance goals and measures are detailed in Section "H" of this report.

Secretary of the State of Connecticut
Preliminary State Plan

C) VOTER EDUCATION, ELECTION OFFICIAL EDUCATION AND TRAINING, AND POLL WORKER TRAINING

How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III. (HAVA §254(a)(3)).

Education and training programs are critical to a successful program of election reform in Connecticut. The proposed milestones in this document will require change management to ensure that all stakeholders (poll workers, election officials, voters, etc.) are comfortable with the new policies/laws and supporting technologies that HAVA requires.

Currently, training programs in the State are predominantly localized and, in some cases, informal. The Secretary of the State distributes policies and procedures to each registrar of voters and town clerk, and the registrar of voters and town clerks are then responsible as local election officials for how the messages are delivered to staff members, poll workers, and the public. Often, knowledge is distributed in meetings and at conferences, rather than in formal training sessions.

In general, voter outreach programs within the State are limited. Voters can obtain voting information through the Secretary of the State's website and other State websites, as well as through public service announcements. However, when new voting systems or laws directly affect the voter, outreach increases exponentially. For example, in the recent implementation of a new felon restoration law, the Secretary of the State worked with the Department of Corrections, local registrars of voters, town clerks and various civic organizations to inform the public of the recent change in the law. The Secretary of the State also updated the agency website, voter registration cards, informational pamphlets and conducted several media and public service announcements on the subject.

It is important to develop the training and outreach program with the participation of the registrars of voters and town clerks as they are a critical component to the current and future process. Also, the program must account for the changing poll worker and election official workforce, so that training is effective for a group with diverse skills. Finally, HAVA brings increased accessibility to elections. Training programs and subsequent training materials must address the needs of persons with disabilities and individuals with alternative language considerations. In collaboration with the registrars of voters and town clerks, uniform training utilizing technology as a method of outreach will help provide for smooth implementation of the State Plan.

To ensure the success of election reform programs, the HAVA State Planning Committee continues to review all aspects of training. One of the most important points to recognize is that training must be uniform and provided to the Registrars of Voters in writing so that they can continue to train poll workers, moderators, machine mechanics and the general public.

D) VOTING SYSTEM GUIDELINES AND PROCESSES

How the State will adopt voting system guidelines and processes, which are consistent with the requirements of section 301. (HAVA §254 (a) (4)).

Currently, Connecticut does not require uniform voting systems for polling place and absentee voting. With the assistance of the HAVA State Planning Committee, the Secretary of the State will review the possibility of recommending to the Connecticut State Legislature uniform standards to be set in place by 2006. Any system mandated by the State will meet the requirements of HAVA §301. As the implementation of the new voting systems continue, the Secretary of the State will maintain and create any new guidelines and processes as necessary to complete such implementation as provided by HAVA. New processes at the Secretary of the State can take the form of internal procedures, regulations, or State legislation. The Secretary of the State will determine the appropriate method to publicize any new voting system guidelines and processes.

In addition, as discussed in "Section A", subsection 1 "§301(a) Voting System Standards Requirements", Connecticut will require each of the municipalities to submit a plan to the Secretary of the State indicating the method of implementation and compliance that the municipality will use with regard to voting systems. Each municipality will be required to assess their existing voting systems and determine if they will replace some or all lever voting systems with electronic voting systems. If a municipality chooses not to replace all of their lever voting systems, each municipality will be required to submit a plan indicating that they will comply with the provisions of the HAVA. The Secretary of the State will purchase and place one electronic voting system in each polling location within the State in compliance with §301 of HAVA.

E) CONNECTICUT'S HAVA FUND MANAGEMENT

How the State will establish a fund described in subsection (b) for purposes of administering the State's activities under this part, including information on fund management. (HAVA §254 (a) (5)).

Connecticut H.B. 6592 An Act Concerning Implementation and Administration of the "Help America Vote Act" will establish a new fund for election reform that is kept separate and distinct from all other funds within the general fund. This fund will contain both federal and state funds. The federal portion of the fund will represent the federal funds provided to the State and expend by the State. The state portion of the fund will represent the funds contributed or spent by the State that represent the 5% match required under HAVA.

The Secretary of the State's Office will work with the State Comptroller, Treasurer and the State Auditors to follow and enforce all mandated fiscal controls and policies.

F) Connecticut's HAVA Budget

The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on—

- *a. the costs of the activities required to be carried out to meet the requirements of title III;*
- *b. the portion of the requirements payment which will be used to carry out activities to meet such requirements; and*
- c. *the portion of the requirements payment, which will be used to carry out other activities. (HAVA §254 (a)(6)).*

At the time of the writing of this plan, HAVA appropriations were less than amounts authorized within the Act. The following table outlines the assumptions regarding federal funding that the State used in creating its budget for HAVA activities.

Federal Funding Assumptions for Connecticut (in Millions)

Federal Fiscal Year	Total Federal Funds	Connecticut Share	5% State Match Requirement**
Early Payments	$650 (Appropriated)	$5.00	N/A
2003	$833 (Appropriated)	$9.88	$0.52
2004	$500 (President's Budget; authorized at $1,000)	$5.83	$0.31
2005	$600 (Authorized)	$7.14	$0.38
Total	**$2,583**	**$27.8**	**$1.2**

**5% State Match Requirement is calculated as 5% of the total of the State Match portion plus the federal requirements payment portion of cost. To determine the 5% State Match based on federal requirements payment amount, use .0526 as the multiplier. Example from Connecticut FY 2003: $9.88M x 0.0526 = $0.52M

Based on these funding levels, the State HAVA budget is representative of the activities to implement and conduct operations and maintenance through calendar year 2005 for the HAVA Title III requirements and "other" activities. The budget will continue to be revised based on the most current information available regarding federal funding.

The State made the following additional assumptions in preparing the budget:

- The State is planning to implement new electronic voting systems.
- The cost for the centralized voter registration system (§303(a)) is presented as an average, because the State will upgrade its current system to meet HAVA requirements. Minimal compliance changes will result in a cost that will be lower while substantive changes will result in a cost that will be higher.
- The cost for education, training, and outreach (§254 (3)) is presented as an average due to the variety of educational options available to the State. Additionally, the State anticipates concurrent initiatives to implement the voting system and centralized voter registration system. The State will need to develop a core curriculum to respond to increased demands on resources.

The State's budget to carry out activities to meet HAVA requirements is provided in the following table:

Connecticut's budget for HAVA Activities

HAVA Requirements and Activities	Federal Funds	State Funds	Local Funds	Anticipated Expenditures	Anticipated Obligations	Remaining Balance	Duration	Duration
§301 Voting systems	$20.5	-	-	$19.42	$1.08	-	2002-2006	Thru 2005
§302 Provisional voting and voting information requirements	$0.5	$0.16	-	$0.32	$0.02	-	2002-2003	Thru 2005
§303 Centralized voter registration system and requirements for voters who register by mail	$2.0	-	-	$1.89	$0.11	-	2002-2004	Thru 2005
§254(3) Voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of title III	$2.5	$2.5	-	-	-	-	2002-2005	Thru 2005
§402 Establishment of State-based administrative complaint procedures to remedy grievances	$0.05	$0.05	-	-	-	-	2003	Thru 2005
State Plan – Budget and Fiscal Controls	$0.49	$0.49	-	-	-	-	2003	Thru 2005
State Plan – Technical Infrastructure Strategy	$0.5	$0.5	-	-	-	-	2003	Thru 2005
State Plan- Election Administration Process Redesign	$0.8	$0.8	-	-	-	-	2003	Thru 2005
State Plan – Election Reform Program Management	$0.5	$0.5	-	-	-	-	2003	Thru 2005
Total	$27.8	$5.00	-	$21.7	$1.21	-		

Notes:

1. State's portion of HAVA funding is estimated based on the funding assumptions outlined above and will be comprised of funds contributed by the State as well as funds already expended to the extent allowable by HAVA. Source for the State's portion of these funds is the Congressional Research Service, *Funds Allocations to States Based on P.L. 107-252: the Help America Vote Act of 2002* (November 15, 2002).
2. Funding source options: State funding other than 5% match, local jurisdiction funding, and/or additional federal funding.
3. Duration for each budget activity is through calendar year 2005.

G) MAINTENANCE OF EFFORT

How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2002- (HAVA §254(a)(7)).

Consistent with HAVA §254(a)(7), in using any requirements payment, Connecticut will maintain expenditures of the State for activities funded by the payment at a level equal to or greater than the level of such expenditures in State FY2000.

As in many states, however, this level of funding represents only a small portion of the statewide aggregate operating budget expenditures needed to sustain elections in a given fiscal year, election administration resources have historically been allocated to the municipalities as well. Connecticut's 169 municipality office budgets typically support year-round core staff and operating expenses for continuous functions such as voter registration and IT support. In addition, the registrars of voters and town clerks require an increase in funding for each specific election for poll workers, office staff, ballot production, mailings and Election Day support.

It is therefore important to note that the projected HAVA budget set forth above is based on the assumption that the municipalities will maintain their election operating expenses at existing levels. As a safeguard for this assumption, the State will require proof from each municipality that they have budgeted for future elections at a level not less then the prior years budget for an election of the same type. Without this safeguard in place, the short-term infusion of funds HAVA provides would not be sufficient to maintain the new State election environment in the long term.

H) HAVA PERFORMANCE GOALS AND MEASURES

How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met. (HAVA §254 (a)(8)).

The Secretary of the State will establish performance goals and will institute a process to measure progress toward the achievement of these goals. This process will provide the registrars of voters and town clerks with structure and continued measurable targets for accomplishment. The performance goals and measures will align with the requirements of HAVA.

The Secretary of the State will establish a procedure to oversee continuous management of the State Plan. This procedure will monitor and ensure a uniform performance evaluation process.

Performance Goals

Performance goals provide a high-level view of a project's direction and progress. The State's goal is to achieve election reform compliance with HAVA requirements through the successful implementation of the programs outlined in the State Plan. Below is a detailed chart that will provide the title of the official who is responsible for ensuring that each plan element is met, and the timeline for meeting each of the elements of the Plan.

Plan Elements	State Office	Time frame
Voting Systems: -- §301	Secretary of the State	To be implemented by January 1, 2006
Provisional Voting: -- §302	Secretary of the State	To be implemented by January 1, 2004
Voter Registration: -- §303(a) -- §303(b)	Secretary of the State	§303(a) to be implemented by January 1, 2004 §303(b) to be implemented by January 1, 2004
Other Activities -- §101 (b)(1), §251(b)(2)	Secretary of the State	
Technical Infrastructure	Secretary of the State	TBD
End to End Process Redesign	Secretary of the State	TBD
Election Reform Program Management	Secretary of the State	TBD
Education and Training: -- §254 (a)(3)	Initially, Secretary of the State Local – Registrar of Voters	TBD
Budget and Fiscal Controls: -- §254 (a)(6) -- §254 (a)(2) -- §254 (a)(7) -- §254 (a)(10)	Secretary of the State	TBD
Complaint Procedures: --Title II, §254 (a)(9) --Title IV, §402	State Elections Enforcement Commission	TBD

Performance Measures

The State will measure the following five critical areas of each project: scope, schedule, resource, quality, and risk. The Office of the Secretary of the State will develop detailed metrics to collect data to report on performance. The measures will provide the State with the ability to understand, predict, and improve overall performance and communication expectations at the State and local levels.

a) scope - measures internal and external events that may affect cost, implementation schedule, or quality;
b) schedule - measures target start and stop dates, actual start and stop dates, percent complete and overall progress toward a goal;
c) resources - measures estimated and actual cost, estimated and actual project resource needs;
d) quality - measures effectiveness of project to ensure that it meets expectations (error rates, deliverable quality, value to client); and
e) risk - measures impact of events on operations and overall goal.

I) STATE BASED AMINISTRATIVE COMPLAINT PROCEDURES

A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402. (HAVA §254 (a)(9)).

Deadline for Compliance: Prior to certification of State Plan, not later than January 1, 2004

The State of Connecticut has two agencies that are involved in the electoral process. The Secretary of the State is responsible for the administration of elections and the State Elections Enforcement Commission is responsible for the investigation and enforcement of alleged violations of the election laws. The State Elections Enforcement Commission is designed to handle complaints and alleged violations of election laws. Therefore, the State Elections Enforcement Commission will be the agency charged with the implementation of the administration complaint procedure.

The Secretary of the State has submitted legislation (H.B. 6592 An Act Concerning Implementation and Administration of the "Help America Vote Act") that authorizes the State Elections Enforcement Commission to administer the administrative complaint procedure according to the provisions set forth in HAVA.

J) EFFECT OF TITLE I PAYMENTS

If the State received any payment under title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities. (HAVA §254 (a)(10)).

To date, the State of Connecticut has received $5.0M in Title I payments.

§101. Payments to States for activities to improve administration of elections.

Connecticut has received the minimum payment available ($5.0M) under §101. These funds will be used for activities to meet the following requirements:

§302 Provisional Ballots	$0.16M
§254 Voter Education	$2.5M
§402 Administrative Complaint Procedure	$0.05M
State Plan – Budget Administration	$0.49M
State Plan – Technical Infrastructure	$0.5M
State Plan – Election Administration Redesign	$0.8M
State Plan – Election Reform Management	$0.5M
Total	**$5.00M**

§102. Replacement of punch card or lever voting machines.

Connecticut was eligible for an additional $1.6M under §102, as calculated in the following chart. However, the State of Connecticut's initial submission of the certification required pursuant to such section was rejected by the GSA pursuant to a request by the Honorable John G. Rowland, Governor of Connecticut. Therefore, the State of Connecticut is not eligible for the additional payment available pursuant to §102. (Table below illustrates the full calculation of Title I and Title II payments available to the State of Connecticut).

Number of Districts		Maximum Payment Amount ($4,000 per District)
734		$3,136,000
§101 Calculated Payments		$3,490,000
Subtotal		**$6,626,000**
§101 Minimum Payment		($5,000,000)
Total §102 Additional Payment Available		**$1,626,000**

K) CONNECTICUT'S HAVA STATE PLAN MANAGEMENT

How the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change—

(A) is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;

(B) is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and

(C) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A). (HAVA §254 (a)(11)).

The State intends to use the State Plan as the foundation for its future strategic direction. Consequently, sound and responsible management of the State Plan will be an essential component of the State election community's future success. The State will develop a procedure to administer and oversee ongoing management of the State Plan to ensure all required elements of HAVA are fully implemented.

The State understands and agrees to comply with HAVA requirements related to ongoing management of the State Plan. More specifically, the State agrees that it may not make any material change in the administration of the State Plan unless the change:

(A) is developed and published in the Federal Register in accordance with HAVA §255 in the same manner as the State Plan;

(B) is subject to public notice and comment in accordance with HAVA §256 in the same manner as the State Plan; and

(C) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).

L) CHANGES TO STATE PLAN FROM PREVIOUS FISCAL YEAR

In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year. (HAVA §254 (a) (12)).

This FY 2003 Plan is the State's inaugural plan under HAVA. This section will be updated in the FY 2004 Plan, reflecting changes to the Plan, as well as a summary of 2003 successes.

M) STATE PLAN DEVELOPMENT AND COMMITTEE

A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the committee under such section 255 and section 256. (HAVA §254 (a)(13)).

The Chief State Election Official, Susan Bysiewicz, Secretary of the State invited the following diverse group of stakeholders to participate on the State Planning Committee. As part of the State Plan development, the committee members were divided into three separate subcommittees: 1) Voter Education, 2) Voter Registration, and 3) Voting Systems Standards. These subcommittees met separately from the full committee and reported back advice and ideas to the Planning Committee as a whole.

Members of the State Plan Committee, and the primary qualification of each for being a committee member, are as follows: *Note: If the initial invitee appointed a representative to serve in their place, such individual is noted in parenthesis after the invitee.*

- The Honorable John G. Rowland, Governor (Melinda Decker);
- The Honorable Susan Bysiewicz, Secretary of the State;
- The Honorable Richard Blumenthal, Attorney General (Richard Kehoe);
- The Honorable Nancy Wyman, Comptroller (Andrea Jackson-Brooks)
- The Honorable Denise Nappier, Treasurer (Linda Hershman)
- Senator Donald DeFronzo, Chair, Government Administration and Elections Committee;
- Representative James O'Rourke, Chair, Government Administration and Elections Committee;
- Senator Andrew Roraback, Ranking Member, Government Administration and Elections Committee;
- Representative Livvy Floren, Ranking Member, Government Administration and Elections Committee;
- Maria M. Greenslade, Deputy Secretary of the State;
- Thomas H. Ferguson, Director of Elections, Secretary of the State;
- Theodore E. Bromley, Staff Attorney, Elections, Secretary of the State;
- O. Pearl Williams, Elections Officer, Secretary of the State;
- Marisa Morello, Legislative Program Director, Secretary of the State;
- Jeffrey Garfield, Executive Director and General Counsel, State Elections Enforcement Commission;
- Andy Sauer, Executive Director, Common Cause of Connecticut;
- George H. Comer, Registrar of Voters; City of Bridgeport;
- Americo Santiago, Policy and Program Director, Democracy Works;
- Sandra Hutton, President, Connecticut Town Clerks Association
- Michael Cordero, Board of Education and Services for the Blind;
- David Denvir; Council of Small Towns, 1st Selectman Killingworth;
- Fernando Betancourt, Executive Director, Latino and Puerto Rican Affairs Commission;

- Bettye Jo Pakulis, Northeast Regional Director, Center for Policy Alternatives;
- Edna N. Negroñ Rosario, Connecticut and Rhode Island Regional Director, Puerto Rico Federal Affairs Administration;
- Enid Oresman, President of the League of Women Voters of Connecticut;
- Sal Bramante, Deputy Registrar of Voters, City of Hartford;
- Wesley Johnson, Mayor, Ledyard, Connecticut Conference of Municipalities;
- Daniel Carey, Hartford City Clerk, City of Hartford;
- James McGaughey, Executive Director, Office of Protection and Advocacy for Persons with Disabilities;
- Olga Aviles, Registrar of Voters, City of Hartford;
- James Griffin, President, Connecticut Conference of NAACP Branches;
- Chris Kuell, National Federation for the Blind;

- Hector Diaz, Bridgeport Town Clerk;
- Lisa Parziale, Bridgeport Registrar of Voters

Based on an objective analysis of the State's current status, this State Plan highlights necessary adjustments and potential next steps in Connecticut's election reform process.

The State Plan Committee will comply with the requirements of §255 and §256 of HAVA.

APPENDIX

A

Requirement	State of Connecticut's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
SEC. 301. VOTING SYSTEMS STANDARDS		
(a) REQUIREMENTS- Each voting system used in an election for Federal office shall meet the following requirements		
(1) IN GENERAL-		
(A) Except as provided in subparagraph (B), the voting system (including any lever voting system, optical scanning voting system, or direct recording electronic system) shall		
(i) permit the voter to verify (in a private and independent manner) the votes selected by the voter on the ballot before the ballot is cast and counted;	Does Not Meet.	The State of Connecticut will meet this provision after implementation of the Voting System Standards plan set forth above.
(ii) provide the voter with the opportunity (in a private and independent manner) to change the ballot or correct any error before the ballot is cast and counted (including the opportunity to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error); and	Does Not Meet.	The State of Connecticut will meet this provision after implementation of the Voting System Standards plan set forth above.
(iii) if the voter selects votes for more than one candidate for a single office-- (I) notify the voter that the voter has selected more than one candidate for a single office on the ballot; (II) notify the voter before the ballot is cast and counted of the effect of casting multiple votes for the office; and (III) provide the voter with the opportunity to correct the ballot before the ballot is cast and counted.	Meets.	No action needed.
(B) A State or jurisdiction that uses a paper ballot voting system, a punch card voting system, or a central count voting system (including mail-in absentee ballots and mail-in ballots), may meet the requirements of subparagraph (A)(iii) by		

Requirement	State of Connecticut's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(i) establishing a voter education program specific to that voting system that notifies each voter of the effect of casting multiple votes for an office; and	Meets.	No action needed.
(ii) providing the voter with instructions on how to correct the ballot before it is cast and counted (including instructions on how to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error)	Meets.	No action needed.
(C) The voting system shall ensure that any notification required under this paragraph preserves the privacy of the voter and the confidentiality of the ballot.	Meets	No action needed.
(2) AUDIT CAPACITY-		
(A) IN GENERAL- The voting system shall produce a record with an audit capacity for such system.	Partially Meets. • A portion of lever machines used by municipalities have a "print-o-matic" function. • The remaining lever machines do not have the "print-o-matic" function but maybe capable of being retro-fitted with such a function.	The State of Connecticut needs to further investigate the issue of whether lever voting machines with "print-o-matic" functions comply with the audit capacity provisions of HAVA.
(B) MANUAL AUDIT CAPACITY-		
(i) The voting system shall produce a permanent paper record with a manual audit capacity for such system.	Does Not Meet. • Lever machines that have a "print-o-matic" function are capable of producing a permanent paper record of the total votes cast on the system. • CT will continue to research whether the paper audit trail required by HAVA is a record of the voting system or of each vote cast.	If lever machines with a "print-o-matic" function do comply with the provisions of HAVA all lever machines would need to be retro-fitted with that function. If lever machines with a "print-o-matic" function do not comply with the provisions of HAVA new voting systems will have to be implemented statewide as explained above.

Requirement	State of Connecticut's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(ii) The voting system shall provide the voter with an opportunity to change the ballot or correct any error before the permanent paper record is produced.	Meets.	No action needed.
(iii) The paper record produced under subparagraph (A) shall be available as an official record for any recount conducted with respect to any election in which the system is used.	Meets.	No action needed.
(3) ACCESSIBILITY FOR INDIVIDUALS WITH DISABILITIES- The voting system shall-		
(A) be accessible for individuals with disabilities, including nonvisual accessibility for the blind and visually impaired, in a manner that provides the same opportunity for access and participation (including privacy and independence) as for other voters;	Does not meet	The State will meet this requirement upon implementation of the State voting systems program described above.
(B) satisfy the requirement of subparagraph (A) through the use of at least one direct recording electronic voting system or other voting system equipped for individuals with disabilities at each polling place; and	Does not meet.	The State will meet this requirement upon implementation of the State voting systems program described above.
(C) if purchased with funds made available under title II on or after January 1, 2007, meet the voting system standards for disability access (as outlined in this paragraph).	N/A	The State will meet this requirement upon implementation of the State voting systems program described above.
(4) ALTERNATIVE LANGUAGE ACCESSIBILITY- The voting system shall provide alternative language accessibility pursuant to the requirements of section 203 of the Voting Rights Act of 1965 (42 U.S.C. 1973aa-1a).	Partially Meets.	The State will continue to educate the local election officials regarding their duties pursuant to this requirement.

Requirement	State of Connecticut's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(5) ERROR RATES- The error rate of the voting system in counting ballots (determined by taking into account only those errors which are attributable to the voting system and not attributable to an act of the voter) shall comply with the error rate standards established under section 3.2.1 of the voting systems standards issued by the Federal Election Commission which are in effect on the date of the enactment of this Act.	Meets.	No action needed.
(6) UNIFORM DEFINITION OF WHAT CONSTITUTES A VOTE- Each State shall adopt uniform and nondiscriminatory standards that define what constitutes a vote and what will be counted as a vote for each category of voting system used in the State.	Meets.	The State will continue to develop procedure manuals that define what constitutes a vote for each system used in the State.

APPENDIX B

Requirement	State of Connecticut's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
SEC. 302. PROVISIONAL VOTING AND VOTING INFORMATION REQUIREMENTS.		
(a) PROVISIONAL VOTING REQUIREMENTS- If an individual declares that such individual is a registered voter in the jurisdiction in which the individual desires to vote and that the individual is eligible to vote in an election for Federal office, but the name of the individual does not appear on the official list of eligible voters for the polling place or an election official asserts that the individual is not eligible to vote, such individual shall be permitted to cast a provisional ballot as follows:		
(1) An election official at the polling place shall notify the individual that the individual may cast a provisional ballot in that election.	Does not meet.	The State will meet this requirement upon implementation of the provisional voting legislation described above.
(2) The individual shall be permitted to cast a provisional ballot at that polling place upon the execution of a written affirmation by the individual before an election official at the polling place stating that the individual is--		
(A) a registered voter in the jurisdiction in which the individual desires to vote; and	Does not meet.	The State will meet this requirement upon implementation of the provisional voting legislation described above.
(B) eligible to vote in that election.	Does not meet.	The State will meet this requirement upon implementation of the provisional voting legislation described above.

Requirement	State of Connecticut's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(3) An election official at the polling place shall transmit the ballot cast by the individual or the voter information contained in the written affirmation executed by the individual under paragraph (2) to an appropriate State or local election official for prompt verification under paragraph (4).	Does not meet.	The State will meet this requirement upon implementation of the provisional voting legislation described above.
(4) If the appropriate State or local election official to whom the ballot or voter information is transmitted under paragraph (3) determines that the individual is eligible under State law to vote, the individual's provisional ballot shall be counted as a vote in that election in accordance with State law.	Does not meet.	The State will meet this requirement upon implementation of the provisional voting legislation described above.
(5)(A) At the time that an individual casts a provisional ballot, the appropriate State or local election official shall give the individual written information that states that any individual who casts a provisional ballot will be able to ascertain under the system established under subparagraph (B) whether the vote was counted, and, if the vote was not counted, the reason that the vote was not counted.	Does not meet.	The State will meet this requirement upon implementation of the provisional voting legislation described above.
(B) The appropriate State or local election official shall establish a free access system (such as a toll-free telephone number or an Internet website) that any individual who casts a provisional ballot may access to discover whether the vote of that individual was counted, and, if the vote was not counted, the reason that the vote was not counted.	Does not meet.	The State will meet this requirement upon implementation of the provisional voting legislation described above..

Requirement	State of Connecticut's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
States described in section 4(b) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-2(b)) may meet the requirements of this subsection using voter registration procedures established under applicable State law. The appropriate State or local official shall establish and maintain reasonable procedures necessary to protect the security, confidentiality, and integrity of personal information collected, stored, or otherwise used by the free access system established under paragraph (5)(B). Access to information about an individual provisional ballot shall be restricted to the individual who cast the ballot.	N/A	Connecticut is not a state described in §4(b) of the NVRA.
(b) VOTING INFORMATION REQUIREMENTS-		
(1) PUBLIC POSTING ON ELECTION DAY- The appropriate State or local election official shall cause voting information to be publicly posted at each polling place on the day of each election for Federal office.	Meets.	The State complies in terms of posting information, but actual details posted will be adjusted. See below for further detail.
(2) VOTING INFORMATION DEFINED- In this section, the term 'voting information' means--		
(A) a sample version of the ballot that will be used for that election;	Meets.	No action needed
(B) information regarding the date of the election and the hours during which polling places will be open;	Meets.	No action needed
(C) instructions on how to vote, including how to cast a vote and how to cast a provisional ballot;	Partially Meets. • Needs update to reach full compliance	The State will meet this requirement upon implementation of the provisional voting legislation described above.
(D) instructions for mail-in registrants and first-time voters under section 303(b);	Does Not Meet. • Information not included in current posting	The State will meet this requirement upon implementation of the provisional voting legislation described above..

Requirement		State of Connecticut's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
	(E) general information on voting rights under applicable Federal and State laws, including information on the right of an individual to cast a provisional ballot and instructions on how to contact the appropriate officials if these rights are alleged to have been violated; and	Partially Meets. • Need more detail for full compliance	The State will meet this requirement upon implementation of the provisional voting legislation described above.
	(F) general information on Federal and State laws regarding prohibitions on acts of fraud and misrepresentation.	Does Not Meet. • Information not included in current posting	The State will meet this requirement upon implementation of the provisional voting legislation described above.
(c) VOTERS WHO VOTE AFTER THE POLLS CLOSE- Any individual who votes in an election for Federal office as a result of a Federal or State court order or any other order extending the time established for closing the polls by a State law in effect 10 days before the date of that election may only vote in that election by casting a provisional ballot under subsection (a). Any such ballot cast under the preceding sentence shall be separated and held apart from other provisional ballots cast by those not affected by the order.		Does Not Meet. • No procedures exist currently for this requirement	The State will meet this requirement upon implementation of the provisional voting legislation described above..

APPENDIX C

Requirement	State of Connecticut's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
SEC. 303. COMPUTERIZED STATEWIDE VOTER REGISTRATION LIST REQUIREMENTS AND REQUIREMENTS FOR VOTERS WHO REGISTER BY MAIL.		
(a) COMPUTERIZED STATEWIDE VOTER REGISTRATION LIST REQUIREMENTS-		
(1) IMPLEMENTATION-		
(A) IN GENERAL- Except as provided in subparagraph (B), each State, acting through the chief State election official, shall implement, in a uniform and nondiscriminatory manner, a single, uniform, official, centralized, interactive computerized statewide voter registration list defined, maintained, and administered at the State level that contains the name and registration information of every legally registered voter in the State and assigns a unique identifier to each legally registered voter in the State (in this subsection referred to as the computerized list), and includes the following:	Partially Meets. • The State has developed and implemented a single uniform official centralized interactive computerized statewide voter registration list. • Not all 169 municipalities participate on CVRS.	The State will meet this requirement upon complete implementation of CVRS.
(i) The computerized list shall serve as the single system for storing and managing the official list of registered voters throughout the State.	Partially Meets. • For those municipalities that currently participate on CVRS, the system is the sole system used to produce the official registry list. • Those municipalities that do not participate on CVRS use a local system to produce the official registry list.	The State will meet this requirement upon complete implementation of CVRS.
(ii) The computerized list contains the name and registration information of every legally registered voter in the State.	Partially Meets. • For those municipalities that currently participate on CVRS, the system does contain the name and registration information of every legally registered voter in the State. • Those municipalities that do not participate on CVRS use a local system	The State will meet this requirement upon complete implementation of CVRS.

Requirement		State of Connecticut's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
		which contains such information.	
	(iii) Under the computerized list, a unique identifier is assigned to each legally registered voter in the State.	Partially Meets. • CVRS does provide unique identification numbers for each legally registered voter. • The systems used by those municipalities that do not participate on CVRS may not assign such numbers.	The State will meet this requirement upon complete implementation of CVRS.
	(iv) The computerized list shall be coordinated with other agency databases within the State.	Partially Meets. • Currently some coordination with Department of Corrections (receive text file from them monthly). • Need to establish agreements with Department of Motor Vehicles and Department of Health.	Secretary of the State will work to the extent possible with other State agencies to meet this requirement.
	(v) Any election official in the State, including any local election official, may obtain immediate electronic access to the information contained in the computerized list.	Partially Meets. • Local election officials (town clerks and registrars of voters) have access to CVRS or if not participating on CVRS to their local system. • State election officials have access to CVRS only.	The State will meet this requirement upon complete implementation of CVRS.
	(vi) All voter registration information obtained by any local election official in the State shall be electronically entered into the computerized list on an expedited basis at the time the information is provided to the local official.	Partially Meets. • Upon receiving a voter registration card, such information is entered at the local level directly onto the CVRS mainframe by the registrars of voters. • Municipalities not participating on CVRS do not have this capability.	The State will meet this requirement upon complete implementation of CVRS.
	(vii) The chief State election official shall provide such support as may be required so that local election officials are able to enter information as described in clause (vi).	Partially Meets. • The Secretary of the State provides technical support to those municipalities participating on CVRS.	The State will meet this requirement upon complete implementation of CVRS.

Secretary of the State of Connecticut
Preliminary State Plan

Requirement	State of Connecticut's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
	• Towns not participating on CVRS doe not receive support from the State of Connecticut.	
(viii) The computerized list shall serve as the official voter registration list for the conduct of all elections for Federal office in the State.	Partially Meets. • CVRS creates the official registry list for those municipalities currently participating on the system. • Towns not participating on CVRS produce official registry lists from local systems only.	The State will meet this requirement upon complete implementation of CVRS.
(B) EXCEPTION- The requirement under subparagraph (A) shall not apply to a State in which, under a State law in effect continuously on and after the date of the enactment of this Act, there is no voter registration requirement for individuals in the State with respect to elections for Federal office.		
(2) COMPUTERIZED LIST MAINTENANCE-		
(A) IN GENERAL- The appropriate State or local election official shall perform list maintenance with respect to the computerized list on a regular basis as follows:		
(i) If an individual is to be removed from the computerized list, such individual shall be removed in accordance with the provisions of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg et seq.), including subsections (a)(4), (c)(2), (d), and (e) of section 8 of such Act (42 U.S.C. 1973gg-6).	Meets.	No action needed.
(ii) For purposes of removing names of ineligible voters from the official list of eligible voters-- (I) under section 8(a)(3)(B) of such Act (42 U.S.C. 1973gg-6(a)(3)(B)), the State shall coordinate the computerized list with State agency records on felony status; and (II) by reason of the death of the registrant under section 8(a)(4)(A) of such Act (42 U.S.C. 1973gg-6(a)(4)(A)), the State shall coordinate the computerized list with State agency records on death	Partially Meets. • Convictions sent to State in text file, local election officials process against voter registration rolls	The Secretary of the State will work to the extent possible with other State agencies to meet this requirement.

Secretary of the State of Connecticut
Preliminary State Plan

Requirement	State of Connecticut's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(iii) Notwithstanding the preceding provisions of this subparagraph, if a State is described in section 4(b) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-2(b)), that State shall remove the names of ineligible voters from the computerized list in accordance with State law.	N/A	Connecticut is not a state described in 4(b) of the NVRA.
(B) CONDUCT- The list maintenance performed under subparagraph (A) shall be conducted in a manner that ensures that--		
(i) the name of each registered voter appears in the computerized list;	Meets.	No action needed.
(ii) only voters who are not registered or who are not eligible to vote are removed from the computerized list; and	Meets.	No action needed.
(iii) duplicate names are eliminated from the computerized list.	Partially Meets. • The Secretary of the State generates a list of possible duplicate voters for those towns who participate on CVRS. • Towns not participating on CVRS do not receive a list of possible duplicate voters.	The State will meet this requirement upon complete implementation of CVRS.
(3) TECHNOLOGICAL SECURITY OF COMPUTERIZED LIST- The appropriate State or local official shall provide adequate technological security measures to prevent the unauthorized access to the computerized list established under this section.	Meets. • CVRS is housed at the State of Connecticut's Department of Information Technology on the same mainframe as the Connecticut State Police.	No action needed.
(4) MINIMUM STANDARD FOR ACCURACY OF STATE VOTER REGISTRATION RECORDS- The State election system shall include provisions to ensure that voter registration records in the State are accurate and are updated regularly, including the following:		

Requirement	State of Connecticut's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(A) A system of file maintenance that makes a reasonable effort to remove registrants who are ineligible to vote from the official list of eligible voters. Under such system, consistent with the National Voter Registration Act of 1993 (42 U.S.C. 1973gg et seq.), registrants who have not responded to a notice and who have not voted in 2 consecutive general elections for Federal office shall be removed from the official list of eligible voters, except that no registrant may be removed solely by reason of a failure to vote.	Partially Meets. • Voters who have remained on the inactive list for 4 consecutive years are removed from the official registry list.	The State will meet this requirement by submitting legislation that includes voters who have not voted in 2 consecutive general elections for Federal office.
(B) Safeguards to ensure that eligible voters are not removed in error from the official list of eligible voters.	Meets.	No action needed.
(5) VERIFICATION OF VOTER REGISTRATION INFORMATION-		
(A) REQUIRING PROVISION OF CERTAIN INFORMATION BY APPLICANTS-		
(i) IN GENERAL- Except as provided in clause (ii), notwithstanding any other provision of law, an application for voter registration for an election for Federal office may not be accepted or processed by a State unless the application includes-- (I) in the case of an applicant who has been issued a current and valid driver's license, the applicant's driver's license number; or (II) in the case of any other applicant (other than an applicant to whom clause (ii) applies), the last 4 digits of the applicant's social security number.	Does Not Meet. • No procedures for this currently • System stores driver's license number • Storage of last four digits of social security number planned.	The State will meet this requirement upon complete implementation of CVRS.
(ii) SPECIAL RULE FOR APPLICANTS WITHOUT DRIVER'S LICENSE OR SOCIAL SECURITY NUMBER- If an applicant for voter registration for an election for Federal office has not been issued a current and valid driver's license or a social security number, the State shall assign the applicant a number which will serve to identify the applicant for voter registration purposes. To the extent that the State has a computerized list in effect under this subsection and the list assigns unique identifying numbers to registrants, the number assigned under this clause shall be the unique identifying number assigned under the list.	Meets.	No action needed.

Requirement	State of Connecticut's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(iii) DETERMINATION OF VALIDITY OF NUMBERS PROVIDED- The State shall determine whether the information provided by an individual is sufficient to meet the requirements of this subparagraph, in accordance with State law.	N/A	The State will consider what verification of voter identification information is necessary and develop appropriate standards.
(B) REQUIREMENTS FOR STATE OFFICIALS-		
(i) SHARING INFORMATION IN DATABASES- The chief State election official and the official responsible for the State motor vehicle authority of a State shall enter into an agreement to match information in the database of the statewide voter registration system with information in the database of the motor vehicle authority to the extent required to enable each such official to verify the accuracy of the information provided on applications for voter registration.	Does Not Meet. • No current agreement in place between Department of Motor Vehicles and Secretary of the State.	The Secretary of the State will work to the extent possible with DMV to meet this requirement.
(ii) AGREEMENTS WITH COMMISSIONER OF SOCIAL SECURITY- The official responsible for the State motor vehicle authority shall enter into an agreement with the Commissioner of Social Security under section 205(r)(8) of the Social Security Act (as added by subparagraph (C)).	Meets. • Agreement between the two parties.	No action needed.
(b) REQUIREMENTS FOR VOTERS WHO REGISTER BY MAIL-		
(1) IN GENERAL- Notwithstanding section 6(c) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4(c)) and subject to paragraph (3), a State shall, in a uniform and nondiscriminatory manner, require an individual to meet the requirements of paragraph (2) if--		
(A) the individual registered to vote in a jurisdiction by mail; and		
(B)(i) the individual has not previously voted in an election for Federal office in the State; or		
(ii) the individual has not previously voted in such an election in the jurisdiction and the jurisdiction is located in a State that does not have a computerized list that complies with the requirements of subsection (a).		
(2) REQUIREMENTS-		
(A) IN GENERAL- An individual meets the requirements of this paragraph if the individual--		

Requirement	State of Connecticut's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(i) in the case of an individual who votes in person-- (I) presents to the appropriate State or local election official a current and valid photo identification; or (II) presents to the appropriate State or local election official a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter;	Does Not Meet. • Current voter registration and polling place voter identification procedures do not meet this requirement	The State will meet this requirement upon complete implementation of the legislation explained above.
(ii) in the case of an individual who votes by mail, submits with the ballot-- (I) a copy of a current and valid photo identification; or (II) a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter	Does Not Meet. • Current voter registration and absentee voting procedures do not meet this requirement	The State will meet this requirement upon complete implementation of the legislation explained above.
(B) FAIL-SAFE VOTING-		
(i) IN PERSON- An individual who desires to vote in person, but who does not meet the requirements of subparagraph (A)(i), may cast a provisional ballot under section 302(a).	Does Not Meet. • No procedures exist for this requirement	The State will meet this requirement upon implementation of a Provisional Voting Program.
(ii) BY MAIL- An individual who desires to vote by mail but who does not meet the requirements of subparagraph (A)(ii) may cast such a ballot by mail and the ballot shall be counted as a provisional ballot in accordance with section 302(a).	Does Not Meet. • No procedures exist for this requirement	The State will meet this requirement upon implementation of a Provisional Voting Program.
(3) INAPPLICABILITY- Paragraph (1) shall not apply in the case of a person-		
(A) who registers to vote by mail under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) and submits as part of such registration either--		
(i) a copy of a current and valid photo identification; or	Partially Meets. • Registrars of voters are now prepared to accept identification information if voluntarily provided • Voter registration procedures being updated to advise mail-in registrants of HAVA requirements	The State will meet this requirement upon complete implementation of the legislation explained above.

Requirement	State of Connecticut's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(ii) a copy of a current utility bill, bank statement, government check, paycheck, or government document that shows the name and address of the voter;	Partially Meets. • Registrars of voters are now prepared to accept identification information if voluntarily provided • Voter registration procedures being updated to advise mail-in registrants of HAVA requirements	The State will meet this requirement upon complete implementation of the legislation explained above.
(B)(i) who registers to vote by mail under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) and submits with such registration either-- (I) a driver's license number; or (II) at least the last 4 digits of the individual's social security number; and	Does Not Meet. • Voter registration forms and procedures being updated to collect the appropriate numbers	The State will meet this requirement upon complete implementation of legislation explained above.
(ii) with respect to whom a State or local election official matches the information submitted under clause (i) with an existing State identification record bearing the same number, name and date of birth as provided in such registration; or	Does Not Meet. • Voter registration forms and procedures being updated to require the matching of records	The State will meet this requirement upon complete implementation of CVRS.
(C) who is--		
(i) entitled to vote by absentee ballot under the Uniformed and Overseas Citizens Absentee Voting Act (42 U.S.C. 1973ff-1 et seq.);	N/A	The State procedure will recognize this exemption.
(ii) provided the right to vote otherwise than in person under section 3(b)(2)(B)(ii) of the Voting Accessibility for the Elderly and Handicapped Act (42 U.S.C. 1973ee-1(b)(2)(B)(ii)); or	N/A	The State procedure will recognize this exemption.
(iii) entitled to vote otherwise than in person under any other Federal law.	N/A	The State procedure will recognize this exemption.
(4) CONTENTS OF MAIL-IN REGISTRATION FORM-		
(A) IN GENERAL- The mail voter registration form developed under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) shall include the following:		
(i) The question `Are you a citizen of the United States of America?' and boxes for the applicant to check to indicate whether the applicant is or is not a citizen of the United States.	Meets.	No action planned.

Requirement		State of Connecticut's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
	(ii) The question 'Will you be 18 years of age on or before Election Day?' and boxes for the applicant to check to indicate whether or not the applicant will be 18 years of age or older on Election Day.	Does Not Meet. • Voter registration forms and procedures being updated to require this information.	The State will meet this requirement upon complete implementation of the legislation explained above.
	(iii) The statement 'If you checked 'no' in response to either of these questions, do not complete this form.'	Partially Meets. • Question of citizenship is asked; question of age to be added in 2003	The State will meet this requirement upon complete implementation of the legislation explained above.
	(iv) A statement informing the individual that if the form is submitted by mail and the individual is registering for the first time, the appropriate information required under this section must be submitted with the mail-in registration form in order to avoid the additional identification requirements upon voting for the first time.	Does Not Meet. • Voter registration forms and procedures being updated to provide this information.	The State will meet this requirement upon complete implementation of the legislation explained above.
	(B) INCOMPLETE FORMS- If an applicant for voter registration fails to answer the question included on the mail voter registration form pursuant to subparagraph (A)(i), the registrar shall notify the applicant of the failure and provide the applicant with an opportunity to complete the form in a timely manner to allow for the completion of the registration form prior to the next election for Federal office (subject to State law).	Partially Meets. • Registrars of voters obtain information missing on the form.	The State will meet this requirement upon complete implementation of the legislation explained above.

APPENDIX B – HAVA LEGISLATION 37

The Help America Vote Act of 2002 (HAVA) is federal legislation that directs all states to implement several mandates as a means of improving the administration of elections for federal office. This legislation establishes standards for voting equipment, provides for Provisional Voting, requires that states have a centralized voter registration list, and other changes. The legislation authorizes federal funding to assist the states in complying with the mandates. If fully funded by the federal government, Delaware would receive $20 million for implementing the mandates and improving the administration of elections. Delaware is obligated to provide a 5% match for up to $15,000,000.00 of the federal funds.

Delaware is one of six states in the nation that has replaced punch card or lever machines. Delaware purchased Direct Recording Electronic (DRE) machines in 1996 as replacements for the state's lever machines that had been used since the mid-1950s. We have had a statewide voter registration system since the early 1990s using standard procedures to collect information from the Departments of Election in each county and that data is housed under one central authority.

The state, in order to receive federal funds to implement the Help America Vote Act mandates, must publish a State Plan describing how the state will meet the requirements. I established a task force comprised of government, advocacy and private sector stakeholders to develop this plan. Members of the task force were appointed from various government and private sector stakeholders whose comments were considered in the writing of the state plan. The spirit of the comments will also help guide us in the implementation of the plan.

Delaware's elections community views the Help America Vote Act as an opportunity to build on Delaware's previous successes as well as further enhance the accessibility of the electoral system to all citizens. We in elections consider HAVA another step in the continuing process to achieve excellence. We are improving physical accessibility, voter education programs, access to the voting process, and election administration technology standards, and election staff training.

I look forward to the challenges HAVA brings to Delaware.

Frank B. Calio,
Delaware Commissioner of Elections

INTRODUCTION

The Help America Vote Act of 2002 (HAVA) requires and helps states to upgrade elements of their electoral processes and to achieve uniform and non-discriminatory administration of elections. Delaware has already made a substantial investment in the State's election system. It replaced lever voting machines in 1996 and created a statewide election management system in the early 1990's. Having purchased new voting equipment and having created a computerized statewide voter file, the State already complies with many HAVA mandates. Delaware welcomes the opportunity to further enhance its electoral system.

The administration of elections in Delaware is a state responsibility. Four state agencies are involved: the Commissioner of Elections and the Departments of Elections for each of Delaware's three counties. The Commissioner of Elections is a gubernatorial appointee who has responsibility for ensuring uniformity in the conduct of elections, among other duties. The Departments of Elections for each county report to respective Boards of Election that are appointed by the Governor. The Departments conduct elections in accordance with the Delaware Code and with standards and operating procedures developed by the Commissioner in collaboration with the Departments.

To plan the implementation of the Help America Vote Act (HAVA), the Commissioner appointed the HAVA Committee, whose membership is listed in Section 13 of this report, and established a state HAVA website to receive comments as the plan evolved. To facilitate work on the plan, the Commissioner's Office analyzed HAVA requirements noting where the State was already in compliance and where changes were needed. That analysis is included as Appendix A to this report. Implementation of HAVA requires several changes to state law which have been passed by Delaware's General Assembly prior to their adjournment. The statute is included in Appendix B.

Because Delaware is a small state, the Commissioner's Office and the Departments of Elections for the counties have been able to coordinate the uniform application of law, standards, and procedures affecting the essential elements of the electoral process while recognizing that the counties have distinct histories and needs. To formalize this coordination, the Commissioner, in collaboration with the Departments of Elections for the counties, will produce a manual covering the application of all HAVA requirements and other aspects of the election system where statewide uniformity is necessary. The goal is that everything directly affecting the voter and the determination of how votes are counted will be uniform throughout the State.

To accomplish our current goals and those of HAVA, the State will implement critical programs and to begin training election staff and citizens. Adequate resources and funding, and their management, are essential for small state agencies to complete this project by 2006. Cost effectiveness and continuing maintenance administration are integral parts of the planning process.

STATE PLAN REQUIRED ELEMENTS

TITLE III REQUIREMENTS AND OTHER ACTIVITIES

SEC. 254 (1) TITLE III REQUIREMENTS AND 251 (A)(2).

(a) IN GENERAL - The state plan shall contain a description of each of the following:

(1) How the State will use the requirements payment to meet the requirements of title III (equipment and administration), and, if applicable under section 251 (a)(2), to carry out other activities to improve the administration of elections

Delaware is currently planning to devote its FY 03 requirements payment entirely to meeting the Title III requirements. The allocation of future requirements payments will depend upon both the amount of the payments and the as-yet-unknown cost of meeting the section 301 voting system requirements.

A. SEC. 301 (a) REQUIREMENTS VOTING SYSTEM STANDARDS

All primary, general and special elections conducted in accordance with Delaware Code, Title 15, are conducted using Danaher Controls *ELECT*ronic 1242 (model 6T) full-face ballot Direct Recording Electronic (DRE) voting machines. The machines are stored, maintained, programmed and prepared by the Departments of Elections for the counties. The Departments also certify and secure the machines for each election. These voting machines meet the requirements of section 301 except for 301(a)(3), accessibility for individuals with disabilities.

The State has identified three options for meeting the Section 301 mandates: (1) upgrade some or all of the existing equipment to meet the accessibility requirement; (2) purchase one new and fully accessible DRE system for each polling place; and (3) purchase all new voting equipment. The State will determine whether option 1 is viable by evaluating a promised upgrade later in 2003. Information from that evaluation will provide information that the State will use in determining which option to pursue. That decision, in turn, will influence the budget for other requirements since the voting system is the most expensive item in the budget.

Delaying the voting system decision will also increase the probability of gaining additional information about future federal funding. The budget presented in section 6 of this plan is based only on the federal funds that are already appropriated plus the State's match. This is not necessarily an optimal allocation. For example, the upgrading of existing equipment may not be a viable option or, if additional funds are available, the State might prefer to purchase new DREs in order to better accommodate language minorities, even though no jurisdiction is required to do so at this time. If possible, the State will defer a final decision on voting systems until federal HAVA appropriations for the next fiscal year are known. Full funding of the remaining HAVA authorization would allow Delaware to revise its current plan for a better long-term approach.

Delaware uses paper ballots for absentee voting. To comply with section 301, the State will create an education program and provide instructions as required by section 301(a)(1)(B). Under existing provisions of the Delaware Code, the Commissioner prepares the instructions based upon input from the Departments of Elections for the counties. The Attorney General reviews and approves them.

Delaware must also define what constitutes a vote for each voting system in use. Legislation to accomplish this task was signed into law in July 2003 and is included in Appendix B. While the new rules are very similar to the rules that they replaced, modifications to existing Election Officer training and instructional manuals will be necessary to ensure uniform application of the new counting rules.

Requirements payments will be used to:

- Upgrade, supplement, and/or replace voting machines;
- Train poll workers on new or modified voting equipment;
- Purchase additional voting machines as necessary, to make sure that there are sufficient voting machines for hands-on training of poll workers.

B. SEC. 302 PROVISIONAL VOTING AND VOTING INFORMATION

Recently enacted legislation included authorizes provisional voting. Poll workers will be trained to offer provisional ballots under the conditions set forth in Section 302 of HAVA. As a transition measure, the state intends to hire additional poll workers so that provisional voters will not be discouraged by long waits to cast their ballots. The ballots will be cast on paper and sealed using a double envelope system similar to that used for absentee ballots. Each completed ballot will be assigned a tracking number. The Departments of Elections for each of the counties will meet the day following the election to determine the eligibility of provisional voters in accordance with Delaware law. The Commissioner of Elections will create and maintain a "free access" system so that provisional voters can determine whether their ballots were counted and, if not, the reason why.

The Department of Elections in each county will post voting information on Election Day at each polling place as follows:

- A sample of the election day ballot;
- The election date and polling place hours;
- Instructions on how to vote and how to vote by provisional ballot;
- Instructions about mail-in registrants and information for first- time voters;
- General information on voting rights under applicable federal and state laws, including information on the right of an individual to cast a provisional ballot and instructions on how to contact the appropriate officials if these rights are alleged to have been violated;
- General information on federal and state laws regarding prohibitions on acts of fraud and misrepresentation.

Standards adopted by the Commissioner of Elections in collaboration with the Departments of Elections for the counties will ensure statewide uniformity of essential information.

These changes will require funds for:

- Printing instructions and ballots for Provisional Voting;
- Preparing and printing HAVA-unique training materials for poll workers;
- Hiring additional poll workers to handle Provisional Voting;
- Creating a web- and telephone-based free access system;
- Programming to integrate provisional votes into the Vote Tally system;
- Preparing and printing information required by HAVA for posting on Election Day.

C. SEC. 303 COMPUTERIZED STATEWIDE VOTER REGISTRATION REQUIREMENTS AND REQUIREMENTS FOR VOTERS WHO REGISTER BY MAIL

Delaware currently has a statewide, computerized voter registration database. It is administered, maintained, and evaluated by the Commissioner of Elections in collaboration with the Departments of Elections for the counties. The Departments of Elections for the counties register voters from applications collected by the Department, forwarded from the Division of Motor Vehicles and other state agencies as required by the National Voter Registration Act, and from voter registration drives. Voters register on paper forms. The Departments of Elections for the counties verify the information before registering applicants and entering their names into the system. All election officials have immediate access to the data once it is entered. The file is already coordinated with state agencies.

Delaware will have to make several changes to implement HAVA. At present, the State requests, but does not require, the Social Security Number on the voter registration form. The forms will have to be revised to ask for the driver's license number. The State assigns a unique identifier to persons who do not provide a driver's license or Social Security number. The State has an on-going file maintenance program. Legislation has been enacted to comply with the mandates regarding identification for persons who register by mail after January 1, 2003. The State's Division of Motor Vehicles has to complete an agreement with the Social Security Administration to match information as required by section 303(a)(5)(B).

Implementing these changes will require:

- Programming to enhance the computerized statewide database;
- The redesign and reprinting of registration forms;
- Training for agency and election office personnel who take and process registration applications;
- Training for poll workers to know when to ask for voter identification and what forms of identification are acceptable;
- General education for voters.

SEC. 254 (2) DISTRIBUTION OF REQUIREMENTS PAYMENTS

(2) How the State will distribute and monitor the distribution of the requirements payment to units of local government and other entities in the State for carrying out the activities described in paragraph (1) including a description of –

(A) the criteria to be used to determine the eligibility of such units or entities for receiving the payment; and

(B) the methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8).

A. ELIGIBILITY CRITERIA - LOCAL GOVERNMENT UNITS AND OTHER ENTITIES

There are no local government units involved. The three Departments of Elections for the counties are state agencies, each with its own budget appropriated by the General Assembly. They do, however, serve counties and they will receive resources to carry out HAVA mandates. These distributions will be on a formula basis.

Additional voting machines and upgrades to existing voting machines will be purchased by the State. Additional machines shall be distributed to the Departments of Elections for the counties in accordance with existing formula (based on registered voters) plus a spare factor. Upgrades will be installed in all voting machines.

If the State decides to put one new fully accessible DRE in each polling place, distribution would be based on the number of polling places plus additional machines for growth and as spares. The State would place, at a minimum, one additional Election Officer in each Polling Place to operate the new DRE.

B. MONITORING PERFORMANCE OF LOCAL UNITS

Any funds received by the Departments of Elections for the counties will be maintained in separate lines so that HAVA expenditures can be identified and tracked. The State will audit all HAVA expenditures through its normal audit procedures. The three county Departments of Elections will report to the Commissioner of Elections on how the expenditures contribute to the appropriate performance measures that will be adopted as described in section 8.

SEC. 254 (3) EDUCATIONAL PROGRAMS FOR VOTERS, ELECTION OFFICIALS AND POLL WORKERS

(3) How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III.

Currently the Departments of Elections for the counties train the poll workers in their respective counties. The Commissioner of Elections provides training for state agencies, like the Department of Motor Vehicles, and registrars for organized voter registration drives. To implement HAVA, the Commissioner, in collaboration with the Departments of Elections for the counties, will:

- Develop statewide standards for training Election Officers;
- Hold an annual seminar for elections for elections officials;
- Create an enhanced program or programs to educate the public, candidates, elected officials and other stakeholders in the electoral process and methods of voting;
- Disseminate instructions on voter identification requirements and provide other training as appropriate to organized groups involved in mail registration campaigns;
- Research innovative models and technologies for training delivery.

The Departments of Elections for the counties will train poll workers in a manner that meets statewide standards.

SEC. 254 (4) VOTING SYSTEM GUIDELINES

(4) How the State will adopt voting system guidelines and processes which are consistent with the requirements of section 301.

The State purchases voting equipment in Delaware. Legislation enacted in July 2003 requires that all voting systems purchased in the future be certified by the National Association of State Election Directors and/or the Election Assistance Commission. The DRE equipment now in use throughout the State is HAVA compliant except for disabled access. A proposed upgrade to make the system totally compliant will be evaluated later in 2003. The Commissioner will appoint a committee representing the Departments of Elections for the counties, the disability community, and representatives from the Delaware Technology and Information Department to take part in the evaluation and make recommendations. If the upgrade is not acceptable, the state will purchase at least one advanced DRE that is fully compliant for each Election District.

SEC. 254 (5) STATE ELECTION FUND

(5) How the State will establish a fund described in subsection (b) (Elections Fund) for purposes of administering the State's activities under this part, including information on fund management.

The State has established an election fund with the Mellon Financial Corporation (State of Delaware-General Collection Account). The Commissioner of Elections, as the chief state election official, is the single managing authority for the administration of the election fund.

The management of the election fund will be consistent with current Delaware financial management practices. The State understands that it must provide periodic reports on the use of the Election Fund to the Election Assistance Commission and that the Election Fund is subject to audit by various federal and state entities. The Commissioner of Elections will report the status of the fund at least annually to the State Plan Task Force Committee.

HELP AMERICA VOTE ACT - DELAWARE STATE PLAN

Table 1 – Budget for Requirements Payments	Requirements Payments + Match	Title I Funds
301 Voting systems		
a. Upgrades for existing voting systems	$1,901,900	
b. Additional voting systems, basic units being purchased with Title I funds and upgrades purchased with Title II funds.	209,000	$500,000
c. Additional voting systems for demonstrations	180,000	
d. Programming	2,600	
e. Educational program for absentee voters using paper ballots	20,000	
302 Provisional ballots and voting information		
a. Programming	250,000	
b. Transitional poll workers	354,750	
c. Supplies and printing	150,000	
303. Computerized statewide voter registration list	800,000	
402. Complaint procedure	100,000	
General		
a. Education and training programs	250,000	
b. Standards manual	10,000	
c. Requirements administration	42,903	
Totals	$4,271,153	$,500,000

301a. Delaware currently deploys 910 voting machines. The estimated cost of upgrades is $2,090 per machine, including warrantees and site licenses for three years.

301b. Delaware law bases the number of voting machines on the number of registered voters per polling place. Under the existing formula, the State will need to acquire additional machines. The funds listed under Title II are for the upgrades to make this equipment HAVA compliant.

COMMISSIONER OF ELECTIONS 32 W. LOOCKERMAN STREET M101 DOVER DE 19904

SEC. 254 (6) DELAWARE'S PROPOSED BUDGET

The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on -

(A) the costs of the activities required to be carried out to meet the requirements of title III;

(B) the portion of the requirements payment which will be used to carry out activities to meet such requirements; and

(C) the portion of the requirements payment which will be used to carry out other activities.

Delaware is faced with two major uncertainties: whether the proposed upgrade to the existing voting systems will be satisfactory and how much of the authorized requirements payments for FY '04 and FY '05 will be appropriated. Table 1, below, is based upon known funding (the FY '03 requirements payments from Title I and Title II plus Delaware's match) and the assumption that the proposed voting system upgrade will be acceptable. If the upgrade is not acceptable, Delaware will have to reconsider this budget in order to meet the requirements. Once the amount of new federal funding is known, Delaware may consider purchasing new DRE equipment instead of upgrading its existing equipment. The current budget, however, projects the following:

(A) The cost of Title III requirements - $4,297,350;
(B) The portion of the requirements payment used to carry out these activities – 100%;
(C) The portion of the requirements payment used to carry out other activities – 0%.

See Table on page 14.

COMMISSIONER OF ELECTIONS 32 W. LOOCKERMAN STREET M101 DOVER DE 19904

SEC. 254 (7) MAINTENANCE LEVEL OF STATE FUNDING

(7) How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.

The state will fund the Commissioner's Office and the Departments of Elections for the counties for expenditures at or above 2000 levels for activities consistent with HAVA. The total appropriation prior to 2000 was $3,264,102.73. Currently the State exceeds this expenditure level.

HELP AMERICA VOTE ACT - DELAWARE STATE PLAN

301c The State will purchase sufficient voting machines to ensure that there are voting machines to provide hands-on training for poll workers and demonstrations for voters while the required number of voting machines are being prepared for use in the election.

301d This cost is programming to integrate the upgrades or new equipment with existing software.

301e. This is to fulfill the education program and instruction requirement in section 301(a)(1)(B) of HAVA.

302a. Programming is required to (1) integrate the results of the provisional ballots into the vote totals, and (2) provide a secure means of tracking provisional ballots so that voters can determine their disposition.

302b. Delaware will hire one additional poll worker per polling place for the three years of HAVA implementation to facilitate the transition to provisional balloting.

302c. The printing costs are for provisional ballots and the instructions required by section 302(b) of HAVA.

303a. Delaware has a computerized central voter file. These expenditures are to enhance it and make it fully HAVA compliant.

402. This is for the development and printing of forms and instructions, as well as programming to integrate the system into the election management system.

General

a. Education and training programs for voters, election officials, and poll workers as required by HAVA section 254(a)(3).

b. The Commissioner, in collaboration with the Departments of Elections for the counties will produce a manual of standards and procedures.

c. The estimated cost of administering HAVA requirements.

SEC. 254 (8) STATE PERFORMANCE MEASURES AND GOALS

(8) How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.

Implementation requires two types of measures: 1. "Milestones" are steps toward the achievement of a definite goal, such as the implementation of the voter identification requirement, together with an assignment of responsibilities and timelines; 2. Delaware uses the term, "performance measure," for indicators of how well a system is working. For example, the percentage of first-time mail registrants who fail to provide the required identification either when they register or at the polling place is an indicator of how effective the voter information component of the mail registration system is. The Commissioner, in collaboration with the Departments of Elections for the counties, will develop milestones and performance measures for HAVA implementation as part of the FY '05 budget preparation process, which concludes in October of 2003.

SEC. 254 (9) ADMINISTRATIVE COMPLAINT PROCEDURES

A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402.

The process is described in the legislation that was enacted in July, 2003. A copy is of the Act is in Appendix B.

SEC. 254 (10) EFFECT OF TITLE I PAYMENTS

(10) If the State received any payment under title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

The only effect of Title I payments is indirect. Delaware plans to spend $500,000 on new voting systems. This is a state need, not a HAVA requirement. However, this equipment must be upgraded to meet the HAVA accessibility requirement. The upgrades are to be funded from Title II monies. Thus, the effect of the Title I expenditure is indirect.

SEC. 254 (11) STATE PLAN MANAGEMENT

(11) How the State will conduct ongoing management of the plan except that the State may not make any material change in the administration of the plan unless the change
(A) is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;
(B) is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and
(C) takes effect only after the expiration of the 30-day period, which begins on the date the change, is published in the Federal Register in accordance with subparagraph (A).

The Commissioner of Elections will manage the plan in collaboration with the Departments of Elections for the counties. Standards and procedures for essential elements of HAVA administration will be embodied in a state manual to ensure uniformity of application.

The Commissioner of Elections will conduct annual meetings with the HAVA Task Force to review reports from the Departments of Elections for the counties and the Commissioner's Office on achievement of implementation milestones and any changes in expected costs or federal appropriations. The Task Force may recommend changes to the plan. If the Commissioner of Elections determines the State Plan requires material change, he will conduct public hearings and resubmit those changes according to procedures in the original State Plan. Because of the uncertainties affecting the development of the initial plan, Delaware is prepared to make significant changes or publish new plans as necessary.

SEC. 254 (12) STATE PLAN EFFECTS FROM PREVIOUS FISCAL YEAR

(12) In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year.

This State Plan is the initial State Plan required under the Help America Vote Act of 2002 (HAVA). There was no plan in effect during the previous fiscal year.

SEC 254. (13) DESCRIPTION OF HAVA COMMITTEE

(13) A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the committee under such section and section 256.

Pursuant to Section 255, the chief state election official, Frank B. Calio, Commissioner of Elections, appointed an advisory committee composed of citizens, elections officials, the Governor's Office, and state officials to help in the development of the State Plan in March of 2003.

To plan the implementation of the Help America Vote Act (HAVA), the Commissioner appointed the HAVA Committee, whose membership is listed below, and established a state HAVA website to receive comments as the plan evolved. To facilitate work on the plan, the Commissioner's Office analyzed HAVA requirements noting where the State was already in compliance and where changes were needed. That analysis is included as Appendix A to this report.

The task force met for the first time on March 13, 2003, in Dover, Delaware. The membership formed subject matter committees during the April 3, 2003 meeting at the Silver Lake Conference Center. These groups scheduled meetings to draft sections of the State Plan. The draft sections were consolidated into one state plan. The plan was published on May 16, 2003 on the State's HAVA website. The website was established to provide public information and notice. It also served as an on-line work area for committee members to make suggestions and share information electronically. It enabled the public to transmit comments electronically, as well as, to view or download information about the State Plan for Delaware. The Task Force met again on June 16 to review comments and approve a plan. Dr. Robert Montjoy, of Auburn University, participated in the meeting. The committee agreed to make a number of changes, especially in the language describing the roles of the different elections offices, the budget for meeting Title III requirements, and the manner in which sections of the plan covered by pending legislation are presented.

MEMBER NAME		REPRESENTING

GAP ANALYSIS		
VOTING SYSTEM STANDARDS	**REQUIREMENT STATUS**	**ACTION REQUIRED**
(5) Error rates. — The error rate of the voting system in counting ballots (determined by taking into account only those errors which are attributable to the voting system and not attributable to an act of the voter) shall comply with the error rate standards established under section 3.2.1 of the voting systems standards issued by the Federal Election Commission which are in effect on the date of the enactment of this Act.	MEETS	NONE
(6) Uniform definition of what constitutes a vote. — Each State shall adopt uniform and nondiscriminatory standards that define what constitutes a vote and what will be counted as a vote for each category of voting system used in the State.	DOES NOT MEET	The State will legislatively meet this requirement.
(d) Effective Date.--Each State and jurisdiction shall be required to comply with the requirements of this section on and after January 1, 2006.	DOES NOT MEET	The State will meet this requirement
(a) Provisional Voting Requirements.–If an individual declares that such individual is a registered voter in the jurisdiction in which the individual desires to vote and that the individual is eligible to vote in an election for Federal office, but the name of the individual does not appear on the official list of eligible voters for the polling place or an election official asserts that the individual is not eligible to vote, such individual shall be permitted to cast a provisional ballot as follows:		
(1) An election official at the polling place shall notify the individual that the individual may cast a provisional ballot in that election.	DOES NOT MEET	The State will legislatively meet this requirement.
(2) The individual shall be permitted to cast a provisional ballot at that polling place upon the execution of a written affirmation by the individual before an election official at the polling place stating that the individual is–	DOES NOT MEET	The State will legislatively meet this requirement.
(A) a registered voter in the jurisdiction in which the individual desires to vote; and	DOES NOT MEET	The State will legislatively meet this requirement.
(B) Eligible to vote in that election.	DOES NOT MEET	The State will legislatively meet this requirement.

SEC. 302. PROVISIONAL VOTING AND VOTING INFORMATION REQUIREMENTS.		
(3) An election official at the polling place shall transmit the ballot cast by the individual or the voter information contained in the written affirmation executed by the individual under paragraph (2) to an appropriate State or local election official for prompt verification under paragraph (4).	DOES NOT MEET	The State will legislatively meet this requirement.
(4) If the appropriate State or local election official to whom the ballot or voter information is transmitted under Paragraph (3) determines that the individual is eligible under State law to vote, the individual's provisional ballot shall be counted as a vote in that election in accordance with State law.	DOES NOT MEET	The State will legislatively meet this requirement.
(5)(A) At the time that an individual casts a provisional ballot, the appropriate State or local election official shall give the individual written information that states that any individual who casts a provisional ballot will be able to ascertain under the system established under subparagraph (B) whether the vote was counted, and, if the vote was not counted the reason that the vote was not counted.	DOES NOT MEET	The State will legislatively meet this requirement.
(B) The appropriate State or local election official shall establish a free access system (such as a toll-free telephone number or an internet website) that any individual who casts a provisional ballot may access to discover whether the vote of that individual was counted, and, if the vote was not counted, the reason that the vote was not counted.	DOES NOT MEET	The State will legislatively meet this requirement.

PROVISIONAL VOTING	**CURRENT STATE STATUS**	**ACTION REQUIRED**
States described in section 4(b) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-2(b)) may meet the requirements of this subsection using voter registration procedures established under applicable State law. The appropriate State or local official shall establish and maintain reasonable procedures necessary to protect the security, confidentiality, and integrity of personal information collected, stored, or otherwise used by the free access system established under paragraph (5)(B). Access to information about an individual provisional ballot shall be restricted to the individual who cast the ballot.	NA	Delaware is not described in this section.
(b) Voting Information Requirements.--		
(1) Public posting on election day.--The appropriate State or local election official shall cause voting information to be publicly posted at each polling place on the day of each election for Federal office.	PARTIALLY Informational changes required	The State will meet this requirement.
(2) Voting information defined.--In this section, the term ``voting information'' means--		
(A) a sample version of the ballot that will be used for that election;	DOES NOT MEET	The State will meet this requirement.
(B) information regarding the date of the election and the hours during which polling places will be open;	DOES NOT MEET	The State will meet this requirement.
(C) instructions on how to vote, including how to cast a vote and how to cast a provisional ballot;	PARTIALLY	The State will meet this requirement.
(D) instructions for mail-in registrants and first- time voters Under section 303(b);	DOES NOT MEET	The State will meet this requirement.
(E) general information on voting rights under applicable Federal and State laws, including information on the right of an individual to cast a provisional ballot and instructions on how to contact the appropriate officials if these rights are alleged to have been violated; and	PARTIALLY	The State will meet this requirement.

COMPUTERIZED VOTER REGISTRATION	**CURRENT STATE STATUS**	**ACTION REQUIRED**
(a) Computerized Statewide Voter Registration List Requirements.–		
(1) Implementation.–		
(A) In general.--Except as provided in subparagraph (B), each State, acting through the chief State election official, shall implement, in a uniform and nondiscriminatory manner, a single, uniform, official, centralized, interactive computerized statewide voter registration list defined, maintained, and administered at the State level that contains the name and registration information of every legally registered voter in the State and assigns a unique identifier to each legally registered voter in the State (in this subsection referred to as the ``computerized list''), and includes the following:	MEETS	NONE
(I)The computerized list shall serve as the single system for storing and managing the official list of registered voters throughout the State.	MEETS	NONE
(ii) The computerized list contains the name and registration information of every legally registered voter in the State.	MEETS	NONE
(iii) Under the computerized list, a unique identifier is assigned to each legally registered voter in the State.	MEETS	NONE
(iv) The computerized list shall be coordinated with other agency databases within the State.	MEETS	The State will make enhancements to the system and pursue automating interaction with agencies that now have a manual interface.
(v) Any election official in the State, including any local election official, may obtain immediate electronic access to the information contained in the computerized list.	MEETS	NONE

GAP ANALYSIS		
COMPUTERIZED VOTER REGISTRATION	**CURRENT STATE STATUS**	**ACTION REQUIRED**
(vi) All voter registration information obtained by any local election official in the State shall be electronically entered into the computerized list on an expedited basis at the time the information is provided to the local official.	MEETS	NONE
(vii) The chief State election official shall provide such support as may be required so that local election officials are able to enter information as described in clause (vi).	MEETS	NONE
(viii) The computerized list shall serve as the official voter registration list for the conduct of all elections for Federal office in the State.	MEETS	NONE
(B) Exception.--The requirement under subparagraph (A) shall not apply to a State in which, under a State law in effect continuously on and after the date of the enactment of this Act, there is no voter registration requirement for individuals in the State with respect to elections for Federal office.	NA	NA
(2) Computerized list maintenance.--		
(A) In general.--The appropriate State or local election official shall perform list maintenance with respect to the computerized list on a regular basis as follows:		
(i) If an individual is to be removed from the computerized list, such individual shall be removed in accordance with the provisions of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg et seq.), including subsections (a)(4), (c)(2), (d), and (e) of section 8 of such Act (42 U.S.C. 1973gg-6).	MEETS	NONE

COMPUTERIZED VOTER REGISTRATION	**CURRENT STATE STATUS**	**ACTION REQUIRED**
(ii) For purposes of removing names of ineligible voters from the official list of eligible voters--(I) under section 8(a)(3)(B) of such Act (42 U.S.C. 1973gg-6(a)(3)(B)), the State shall coordinate the computerized list with State agency records on felony status; and (II) by reason of the death of the registrant under section 8(a)(4)(A) of such Act (42 U.S.C. 1973gg-6(a)(4)(A)), the State shall coordinate the computerized list with State agency records on death.	MEETS	NONE
(iii) Notwithstanding the preceding provisions of this subparagraph, if a State is described in section 4(b) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-2(b)), that State shall remove the names of ineligible voters from the computerized list in accordance with State law.	MEETS	NONE
(A) Conduct.--The list maintenance performed under subparagraph (A) shall be conducted in a manner that ensures that--		
(i) the name of each registered voter appears in the computerized list;	MEETS	NONE
(ii) only voters who are not registered or who are not eligible to vote are removed from the computerized list; and	MEETS	NONE
(iii) duplicate names are eliminated from the computerized list.	MEETS	NONE
(3) Technological security of computerized list.--The appropriate State or local official shall provide adequate technological security measures to prevent the unauthorized access to the computerized list established under this section.	MEETS	NONE

GAP ANALYSIS		
COMPUTERIZED VOTER REGISTRATION	**CURRENT STATE STATUS**	**ACTION REQUIRED**
(4) Minimum standard for accuracy of state voter registration records.-- The State election system shall include provisions to ensure that voter registration records in the State are accurate and are updated regularly, including the following:	MEETS	NONE
(A) A system of file maintenance that makes a reasonable effort to remove registrants who are ineligible to vote from the official list of registered voters. Under such a system, consistent with the National Voter Registration Act of 1993 (42 U.S.C. 1973gg et seq.), registrants who have not responded to a notice and who have not voted in 2 consecutive general elections for Federal office shall be removed from the official list of registered voters, except that no registrant may be removed solely by reason of failure to vote.	MEETS	NONE
(B) Safeguards to ensure that eligible voters are not removed in error from the official list of eligible voters.	MEETS	NONE
(5) Verification of voter registration information.-- (A) Requiring provision of certain information by applicants.--		
(i) In general.--Except as provided in clause (ii), withstanding any other provision of law, an application for voter registration for an election for Federal office may not be accepted or processed by a State unless the application includes—in the case of an applicant who has been issued a current and valid driver's license, the applicant's driver's license number; or in the case of any other applicant (other than an applicant to whom this clause (ii) applies), the last 4 digits of the applicant's social security number.	DOES NOT MEET	The State will meet this requirement.

COMPUTERIZED VOTER REGISTRATION	**CURRENT STATE STATUS**	**ACTION REQUIRED**
(ii) Special rule for applicants without driver's license or social security number.--If an applicant for voter registration for an election for Federal office has not been issued a current and valid driver's license or a social security number, the State shall assign the applicant a number which will serve to identify the applicant for voter registration purposes. To the extent that the State has a computerized list in effect under this subsection and the list assigns unique identifying numbers to registrants, the number assigned under this clause shall be the unique identifying number assigned under the list.	MEETS	NONE
(iii) Determination of validity of numbers provided.--The State shall determine whether the information provided by an individual is sufficient to meet the requirements of this subparagraph, in accordance with State law.	MEETS	NONE
(B) Requirements for state officials.--		
(i) Sharing information in databases.--The chief State election official and the official responsible for the State motor vehicle authority of a State shall enter into an agreement to match information in the database of the statewide voter registration system with information in the database of the motor vehicle authority to the extent required to enable each such official to verify the accuracy of the information provided on applications for voter registration.	PARTIALLY	The State will meet this requirement
(ii) Agreements with commissioner of social security.— The official responsible for the State motor vehicle authority shall enter into an agreement with the Commissioner of Social Security under section 205(r)(8) of the Social Security Act (as added by subparagraph (C)).	DOES NOT MEET	The DMV is awaiting a response from the Social Security Administration.

COMPUTERIZED VOTER REGISTRATION	**CURRENT STATE STATUS**	**ACTION REQUIRED**
(b) Requirements for Voters Who Register by Mail.-- (1) In general.--Notwithstanding section 6(c) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4(c)) and subject to paragraph (3), a State shall, in a uniform and nondiscriminatory manner, require an individual to meet the requirements of paragraph (2) if--		
(A) the individual registered to vote in a jurisdiction by mail; and		
(B)(i) the individual has not previously voted in an election for Federal office in the State; or		
(ii) the individual has not previously voted in such an election in the jurisdiction and the jurisdiction is located in a State that does not have a computerized list that complies with the requirements of subsection (a).		
(2) Requirements.-- (A) In general.--An individual meets the requirements of this paragraph if the individual--		
(i) in the case of an individual who votes in person— (I) presents to the appropriate State or local election official a current and valid photo identification; or (II) presents to the appropriate State or local election official a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter; or	DOES NOT MEET	The State will meet this requirement.
(ii) in the case of an individual who votes by mail, submits with the ballot--(I) a copy of a current and valid photo identification; or (II) a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter.	DOES NOT MEET	The State will meet this requirement.
(B) Provisional Voting.--		
(i) In person.--An individual who desires to vote in person, but who does not meet the requirements of subparagraph (A)(i), may cast a provisional ballot under section 302(a).	DOES NOT MEET	The State will meet this requirement.

COMPUTERIZED VOTER REGISTRATION	**CURRENT STATE STATUS**	**ACTION REQUIRED**
(4) Contents of mail registration form.-- (A) In general.--The mail voter registration form developed under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) shall include the following:		
(i) The question ``Are you a citizen of the United States of America?'' and boxes for the applicant to check to indicate whether the applicant is or is not a citizen of the United States.	NA	
(ii) The question ``Will you be 18 years of age on or before election day?'' and boxes for the applicant to check to indicate whether or not the applicant will be 18 years of age or older on election day.	NA	
(ii) The statement ``If you checked `no' in response to either of these questions, do not complete this form.''.	NA	
(iv) A statement informing the individual that the form is submitted by mail and the individual is registering for the first time, the appropriate information required under this section must be submitted with the mail-in registration form in order to avoid the additional identification requirements upon voting for the first time.	NA	
(B) Incomplete forms.--If an applicant for voter registration fails to answer the question included on the voter registration form pursuant to subparagraph (A)(i), the registrar shall notify the applicant of the failure and provide the applicant with an opportunity to complete the form in a timely manner to allow for the completion of the registration form prior to the next election for Federal office (subject to State law).	MEETS	NONE

APPENDIX B – HAVA LEGISLATION

STATE SENATE

142nd GENERAL ASSEMBLY

SENATE BILL NO. 153

AN ACT TO AMEND TITLE 15 OF THE DELAWARE CODE RELATING TO ELECTIONS.

WHEREAS, the Help America Vote Act of 2002 imposes several mandates upon the state; and

WHEREAS, it is necessary to implement the Help America Vote Act of 2002;

NOW, THEREFORE BE IT ENACTED BY THE GENERAL ASSEMBLY OF THE STATE OF DELAWARE:

Section 1. Amend Delaware Code, Title 15, §1302 by striking the aforesaid section in its entirety and substituting in lieu thereof:

§ 1302 Voter registration application.

(a) The Commissioner of Elections, in consultation with the Departments of Elections for the counties, shall promulgate the voter registration application and shall set the effective date of each new version. The application shall be updated as necessary to comply with state and federal law and/or to facilitate administration of the State's voter registration program. The application shall be uniform throughout the state and shall be used for all voter registration transactions within the state.

(b) The application shall be in two parts. The Departments of Elections for the counties shall send the original part of each application that was accepted and processed to the Commissioner of Elections office. The Departments of Elections for the counties shall maintain the second copy in the County Master Record. The records contained in the County Master Record shall remain in the office of each department and not be removed for any reason except as provided by law.

(c) The voter registration application shall include a question asking whether or not the applicant is a citizen of the United States. The Departments of Elections for the counties shall reject the applications of new registrants who indicate that they are not citizens of the United States or who fail to answer the question. The departments shall notify such persons by first-class mail that their application has been rejected and the reason(s) thereto. Persons already registered to vote who indicate that they are not citizens of the United States shall be notified by first-class mail that their voter registration shall be

cancelled at the expiration of 15 days if they do not affirm in writing that they are citizens of the United States. The departments shall cancel the voter registration of any person who fails to affirm in writing that they are United States citizens after the expiration of the aforesaid 15-day period. Persons who subsequently affirm in writing to a department that they are United States citizens shall be reinstated by the department as a registered voter.

(d) The voter registration application shall include a place for the applicant's home telephone number; provided, however, that the provision of a telephone number shall be annotated on the form as being optional, and no application shall be rejected for lack thereof. Any registered voter may have his/her telephone number removed from the electronic voter registration files by making a request of the department of elections for the county in which they are registered either by telephone or in writing.

(e) The applicant's signature may be a digitized signature obtained by a state agency as part of a process that includes registering a person to vote or updating his/her voter registration information.

(f) The Commissioner of Elections, in collaboration with the Departments of Elections for the counties, may examine methods to streamline the voter registration process through the application of technology. The Commissioner of Elections, in consultation with the Departments of Elections for the counties, may adopt and implement such technology. In the event that the process adopted conflicts with subsection "(b)" above, that subsection shall be considered null and void. These innovations may include adoption of a paperless or semi-paperless registration process.

(g) The Commissioner of Elections shall make the State's Voter Registration Application available on the Internet by January 1, 2006.

Section 2. Amend Delaware Code, Title 15 by inserting as § 2015 the following:

§ 2015. Late registration procedures for military and overseas citizens.

An individual who has been discharged or separated from the Uniformed Services, the merchant marine, or from employment outside of the territorial limits of the United States too late to register to vote for a primary or general election but within 60 days of the date of a primary or general election, shall be entitled to register to vote for the purpose of voting in that and ensuing primary or general elections after presenting documentation of his/her discharge, separation, or termination of employment to the Department of Elections for the county in which he/she resides. This exception includes any accompanying family members who are otherwise eligible to register to vote.

Section 3. Amend Delaware Code, Title 15 by inserting as § 2016 the following:

§ 2016. Enfranchisement of citizens who have never resided in the United States.

If a United States citizen outside of the United States who has never lived in the United States has a parent who is a qualified elector of the State, then that person is eligible to register and vote where his/her parent is a qualified elector.

Section 4. Amend Delaware Code, Title 15 by inserting as § 2033 the following:

§ 2033. Special procedures for persons who register to vote by mail and have not voted in the State in an election for federal office.

a. A person who registers to vote by mail on or after January 1, 2003 shall submit with his/her application a copy of a current and valid photo identification or a copy of a current utility bill, bank statement, government check, paycheck or other government document that shows the name and address of the voter. Should the person not include a copy of the required identification with the voter registration application, the voter shall provide a valid photo identification or a copy of a current utility bill, bank statement, government check, paycheck or other government document that shows the name and address of the voter prior to voting for the first time at a polling place in the State. If the person fails to show required identification at the polling place, he/she shall be permitted to vote by Provisional Ballot. The poll lists and signature cards for each polling place shall identify those persons who must show proper identification before being permitted to vote.

b. A registrant may satisfy the requirement to submit identification by subsequently submitting a voter registration application through a source not subject to the provisions of this section (e.g. through the Division of Motor Vehicles).

c. A person who votes by absentee ballot and who registered to vote for the first time by mail and did not submit a copy of any of the required identification documents shall submit a copy of one or more of the documents listed in subsection "a" above showing the person's name and address with the Absentee Ballot. The Absentee Ballot from a person who is required to submit identification, and who does not, shall not be counted.

d. This section does not apply to persons listed in § 5502 (1) and § 5502 (2) of this title or to persons identified in subsection "a" above who submitted their driver's license number (includes State ID card number) or Social Security Number that the Department of Elections for a county is able to use to verify an existing State Identification record bearing the same number, the name and date of birth as provided by the applicant.

Section 5. Amend Delaware Code, Title 15, Chapter 49, by inserting as subchapter IV the following:

Subchapter IV. Administrative Complaint Procedure

§ 4990. Applicability.

The Administrative Complaint Process shall only apply to alleged violations of Title III of the Help America Vote Act of 2002 to include an alleged violation that has occurred, is occurring or is about to occur.

§ 4991. Process.

The person making a complaint shall submit the complaint to the Commissioner of Elections or any of the Departments of Elections for the counties. The complaint shall be in writing, notarized, and signed and sworn to by the person making the complaint.

If one of the Departments for the counties receives such a complaint, the Department shall forward it to the Commissioner of Elections on the same business day that it is received.

The Commissioner of Elections shall notify the complainant(s) of receipt of the complaint and provide the complainant(s) a description of the complaint resolution process.

The Commissioner of Elections may consolidate similar complaints.

If requested by the complainant(s), there shall be a hearing for the record.

The Commissioner of Elections shall appoint a person or persons to examine the complaint, gather information about the circumstances and then determine whether or not there was a violation of Title III.

If the person handling the complaint determines that a violation has occurred, he/she shall recommend a suitable remedy to the Commissioner of Elections. The Commissioner may accept, reject or modify any proposed remedy.

If the person handling the complaint determines that a violation did not occur, the complaint shall be dismissed.

The Commissioner of Elections shall publish the results of the resolution of each complaint as he/she sees fit.

A final determination shall be made on each complaint as quickly as possible, but no later than 90 days following the date that the complaint was filed unless the complainant consents to a longer period for resolving the complaint.

If the complaint is not resolved within 90 days and the complainant has not agreed to a longer period, the Commissioner of Elections shall take such steps as necessary to resolve the complaint within the next 60 days. The original complaint and all information developed in the previous attempt(s) to resolve the issue(s) shall be made available to the person(s) subsequently charged with resolving the complaint.

The Commissioner of Elections shall develop a system for tracking complaints alleging Title III violations.

Section 6. Amend Delaware Code, Title 15, § 4910 (a) by striking said subsection in its entirety and substituting in lieu thereof:

(a) The Commissioner of Elections, in collaboration with the Departments of Elections for the counties, shall design poster(s) that will be uniform throughout the State. The poster(s) shall be publicly displayed in each polling place on the day of the election. The poster(s) shall contain the following information:

Information stating the date and hours during which the polling place will be open;

Instructions on how to vote, including how to cast a vote and how to cast a Provisional Ballot;

Instructions for mail-in registrants who are first-time voters under Section 303(b) of the Help America Vote Act of 2002;

General information on voting rights under applicable Federal and State laws, including information on the right of an individual to cast a provisional ballot and instructions on how to contact the appropriate officials if these rights are alleged to have been violated; and

General information on Federal and State laws regarding prohibitions on acts of fraud and misrepresentation.

Section 7. Amend Subchapter II, Chapter 49, Title 15 of the Delaware Code by inserting as § 4948 the following:

§ 4948. Provisional Ballots.

(a) Provisional ballots shall be used in primary and general elections conducted under the provisions of this title. Provisional ballots shall not be used in public school elections or municipal elections unless specifically authorized in Title 14, Title 15 and/or the respective town or city charter.

(b) A person claiming to be properly registered in an Election District, but whose eligibility to vote at that Election District cannot be determined, shall be entitled to vote a Provisional Ballot. Election officers shall inform a person who is not being permitted to vote for whatever reason that he/she may cast a provisional ballot in that election. The Inspector shall return all voted Provisional Ballots to the Department of Elections for the county responsible for the Election District on the night of the election.

(c) Persons voting a Provisional Ballot shall present proof of identity and address to the Election Officers. The type of ID shown by the voter shall be annotated on the Provisional Ballot Envelope. If the person does not show proof of identity or address, the person shall be permitted to vote by Provisional Ballot and the fact that he/she did not show proof of identity and/or address shall be annotated on the Provisional Ballot Envelope.

(d) If Superior Court or another court of competent jurisdiction orders that some or all polling places in a county of the state be kept open beyond the normal time for closing, all persons who arrive to vote at the polling place(s) ordered to be kept open after the normal time for closing shall vote by Provisional Ballot. The Election Officers shall keep such ballots separate and return them to the Department of Elections for the county responsible for the Election District on the night of the election.

(e) Provisional Ballots shall be as much as possible in the same form as Absentee Ballots except that only federal offices shall be listed and they shall be labeled as Provisional Ballots. The Departments of Elections for the counties shall provide to each Election District Provisional Ballots for 6% of the registered voters in the Election District as of 45 days prior to the date of the election. Regardless of the number of ballots required by this subsection, the Departments of Elections for the counties shall provide a minimum of 15 Provisional Ballots to each Election District. Each Department of Elections for the counties shall deliver additional Provisional Ballots, envelopes, instructions or voter information sheets to the polling place for an Election District when notified by an Election Officer from the district that the supply of some or all of the Provisional Ballot materials is very low.

(f) Election Officers shall give whatever assistance is requested by a voter who is voting by Provisional Ballot. When that assistance includes marking or assisting in marking the person's ballot, two Election Officers with different political party affiliations shall provide that assistance.

(g) A voter who spoils his or her ballot shall, upon request, be given a replacement ballot after surrendering the spoiled ballot.

(h) Tallying Provisional Ballots.

1) At 12 noon the day following an election in which Provisional Ballots were used, the Department of Elections for each county shall meet to examine the Provisional Ballots, determine which of the ballots should be tallied in accordance with the rules stated below, and then tally those ballots.

2) The Attorney General shall appoint a Deputy Attorney General to advise each of the Departments of Elections for the counties as requested during the Provisional Ballot tallying process.

3) The county chairperson of each political party with a candidate on a Provisional Ballot within the county may appoint in writing one observer to be in the room where Provisional Ballots are being reviewed and tallied.

4) The Departments of Elections for each county shall sit until the disposition of every Provisional Ballot has been determined. Each county Department of Elections shall establish an appropriate schedule of breaks, meals and rest periods.

5) Where the Provisional Ballot affidavit is incomplete, the ballot shall be set aside, not opened and the votes not tallied. An incomplete affidavit shall be defined as one that does not include all of the following information: full name, complete address, political party affiliation (Primary Elections only), and date of birth.

6) Where the person who voted by Provisional Ballot did not show suitable identification at the polling place, the ballot shall be set aside, not opened and the votes not tallied.

7) Provisional Ballots cast by persons who are not registered to vote in the state or who are not registered to vote in the Election District in which they were cast shall be set aside, not opened and the votes not tallied.

8) A Provisional Ballot cast by a person who is registered to vote and who has moved into the Election District shall be counted if the person voted at the correct polling place for his/her new address.

9) Each Department of Elections for a county shall tally the Provisional Ballots that meet the above criteria. After all of the Provisional Ballots determined as meeting the above criteria have been tallied, the Department of Elections for the county shall deliver one copy of the Provisional Ballot Tally Sheet for each Election District, all the Provisional Ballots cast in the election, and all affidavits, envelopes and supporting documentation to the Prothonotary.

(i) Post election processing and notification.

10) As soon as practical, but not later than 30 days following an election in which Provisional Ballots were used, the Department of Elections for each county shall enter the appropriate data into a free access system so that a person who voted by Provisional Ballot may determine whether or not his/her ballot was counted, and if it was not counted, the reason(s) for which it was not counted.

11) The respective Department of Elections for a county shall use the Provisional Ballot affidavit as authority to register a person to vote who voted by Provisional Ballot in an election and who is not already registered to vote providing that the minimum information required to register a person to vote is provided. The Provisional Ballot envelope shall be used to transfer a registered voter's address and/or update his/her name when the address and/or name is different than the information on the person's voter registration record.

Section 8. Amend Delaware Code, Title 15, § 4972, by striking the aforesaid section in its entirety and substituting in lieu thereof the following.

§ 4972. Rules regarding what constitutes a legal vote.

a. Votes cast on a direct recording electronic voting machine shall be considered legal votes once the voter has taken the necessary action(s) to cast his/her ballot. A

voter who has cast his/her ballot on a direct recording electronic voting machine shall not be permitted to cast a second ballot under any circumstances.

b. Votes cast at any election on paper ballots shall be counted for whom they are intended as far as can be ascertained by the marks on the ballot. The following rules shall be observed in determining those votes on paper ballots that shall be counted:

1) The voter shall mark the ballot for his/her selections by placing a distinct mark in the box at the right of the name of the candidate and or response to a question for which he/she wants to vote;

2) Where a voter indicates his/her selections in a manner not in accordance with paragraph "1" above, the Election Officers shall attempt to determine from the marks on the ballot the candidate or response that the voter intended to select;

3) If it is not possible to determine a voter's choice for an office or response to a question, the ballot shall not be counted for that office or question but shall be counted for all other offices and questions on the ballot where the voter's intention can be determined;

4) A voter may only vote for two or more choices for any office or question when specifically instructed on the ballot that it is allowable;

5) Where a voter is permitted to make more than one choice for candidates and or responses to a question, he/she may make fewer than the allowable number of choices;

6) If a ballot is marked for more names or responses than are permitted, it shall not be counted for that office or question, but it shall be counted for all other offices or questions on the ballot in accordance with these rules; and

7) If a ballot has been defaced or torn so that it is impossible to determine the voter's choice for one or more offices or questions, it shall not be counted for such offices or questions but shall be counted for all other offices and questions where the voter's choice(s) can be determined.

Section 9. Amend Delaware Code, Title 15, § 5001A (a) by inserting as subsections (12) and (13) the following:

(12) It shall permit the voter to verify (in a private and independent manner) the votes selected by the voter on the ballot before the ballot is cast and counted.

(13) It shall provide the voter the opportunity (in a private and independent manner) to change the ballot or correct any error before the ballot is cast and corrected (including

(14) the opportunity to correct the error through the issuance of a replacement ballot before the voter has cast his/her ballot if the voter was otherwise unable to change the ballot or correct any error).

Section 10. Amend Delaware Code, Title 15, § 5001A (b) by striking the second sentence in its entirety and substituting in lieu thereof the following:

All voting devices used in any election shall provide the voter the opportunity to make his/her selections and cast his/her ballot in secrecy through placement of the devices in the polling place or through the use of curtains or other devices.

Section 11. Amend Delaware Code, Title 15, § 5001A by adding the following as subsection (d):

(d) Any voting device, machine or system purchased by the State shall be certified by the National Association of State Election Directors or the Election Assistance Commission as meeting or exceeding the Voluntary Voting Systems Standards or Guidelines as promulgated by the Federal Election Commission or the Election Assistance Commission prior to delivery to and acceptance by the State.

Section 12. Amend Delaware Code, Title 15, § 5004A by inserting the following at the end of the section:

The Commissioner of Elections, in collaboration with the Departments of Elections for the counties, shall gather information from other jurisdictions using the same or similar systems and then establish an appropriate registered voter to voting device ratio for voting systems purchased after July 1, 2003.

Section 13. Amend Delaware Code, Title 15, § 5005A by adding the following as subsection (d):

(d) Nothing in this section shall preclude the use of an electronic device where the ballot is electronically generated and displayed or which has the capability to generate and display multiple ballots.

Section 14. Amend Delaware Code, Title 15, § 5503 (d) by adding the following as the second sentence:

Additionally, the Departments of Elections for the counties shall accept facsimile transmissions of affidavits for absentee ballots.

Section 15. Amend Delaware Code, Title 15, § 5523 by inserting the following as subsection (d):

(e) An FPCA submitted by a person who qualifies under any of the reasons set forth in § 5502(1) or §5502(2) of this chapter shall be valid for the next two general elections.

Section 16. Amend Delaware Code, Title 15, by inserting as § 5526 the following:

§ 5526. Emergency Authority for the Commissioner of Elections.

In the event that a national or local emergency makes substantial compliance with the provisions of this title and/or the Uniformed and Overseas Citizens Absentee Voting Act impossible or unreasonable for some of all of the citizens covered under § 5502(1) or § 5502(2) of this title, the Commissioner of Elections may direct the use of special procedures to facilitate absentee voting for those citizens directly affected who are eligible to vote in the State. Such an emergency may be a natural and/or humanitarian disaster; and/or armed conflict involving United States Armed Forces to include mobilized State National Guard and/or Reserve components.

The Commissioner of Elections shall consult with the Governor and the Federal Voting Assistance Program or its successor prior to directing the use of the special procedures cited in subsection "a" above.

The Commissioner of Elections, in collaboration with the Departments of Elections for the counties, shall promulgate special procedures to be followed in the event that such a national or local emergency occurs.

Ssynopsis

This legislation if enacted will implement the Help America Vote Act of 2002 (HAVA), implement some recommendations regarding voting and registration of military and overseas and make other changes. Specifically, it provides that the Commissioner of Elections shall promulgate the voter registration application and deletes the list of items required in order to provide flexibility in quickly dealing with changes in federal law. It directs that a question dealing with citizenship be added and that a digitized signature obtained by a state agency in a process that includes voter registration be acceptable as an applicant's signature. It authorizes the Departments of Elections for the counties to accept facsimile transmissions of Affidavits for Absentee Ballots from all citizens. It adds the following provisions to comply with HAVA: establishes procedures for dealing with persons who registered by mail and have not voted in an election for federal office, establishes an Administrative Complaints Procedure for handling violations of HAVA's Title III mandate, provides for posting additional information in the polling place, authorizes Provisional Voting, defines what constitutes a legal vote, and modifies the standards for electronic voting systems, devices and/or machines. It, also, provides that military and overseas citizens who return to the United States within 60 days of an election and establish residence in Delaware can register to vote after the normal deadline, that citizens born abroad who have never lived in the State can register and vote if one of their parents is a qualified elector, and gives the Commissioner of Elections authority to direct the use of special procedures in handling the delivery and transmission of ballots to military and overseas citizens in the event of a national or local emergency.

INTRODUCTION

In 2002, Congress passed the Help America Vote Act ("HAVA"), Public Law No. 107-252, 116 Stat. 1666 (2002), landmark legislation to improve the administration of elections in the United States. According to the authors of this legislation, the purpose of HAVA is to ensure that all eligible voters are able to cast a vote and have that vote counted. The District of Columbia Board of Elections and Ethics is proud to say the District of Columbia is already substantially in compliance with the new federal standards – much to the credit of citizen advocates, previous and current Board members and staff.

When it passed HAVA, Congress also authorized federal funds to assist states and localities to meet these new standards. To receive these funds, states – including, as in this case, a federal district – are required to solicit public advice and recommendations in developing a plan for meeting the new standards. In March of 2003, the Board of Elections and Ethics ("the Board") established the District of Columbia State Planning Committee and charged the committee with producing a roadmap for the future of elections in the District of Columbia (see Appendix A for a list of the Planning Committee members).

The Plan that follows builds on the recommendations of the Planning Committee. Following publication of the Preliminary Plan in the *District of Columbia Register*, the Board solicited and received public comments both in writing and at a public hearing held on July 5th. The Preliminary Plan was also posted on the Board's website. Following the one-month comment period, the Board reviewed all comments and incorporated suggested changes. A final version of the Plan will be published in the *Federal Register*, as required in § 256 of HAVA.

The Board is grateful to the members of the Planning Committee for the energy, time and expertise they devoted to this effort. All voters in the District of Columbia will benefit from the hard work of this committee.

After a review of the current election system, the Planning Committee agreed that HAVA funds should go to modernizing the existing statewide computerized registration system, improving pollworker recruitment and training, expanding voter education, promoting barrier-free voting for persons with disabilities, and strengthening the infrastructure of the elections process over the long term.

The 2000 Presidential Election shone a spotlight on weaknesses in the nation's election system, and in particular on problems with antiquated voting equipment. Prior to this election, the Board had already acted to modernize its election system and ensure that every eligible voter is able to cast a vote and have that vote counted. Under this initiative, the Board made the decision to replace its aging punch card voting system with voting systems that reduced the likelihood of voter error and allowed for second-chance voting.

In September of 2001, five District of Columbia voters, the Disability Rights Council and the American Association for People with Disabilities, filed suit against the District of Columbia claiming that inaccessible voting systems and polling places were violations of the Americans with Disabilities Act. The suit was eventually settled pursuant to an agreement that requires the city to purchase at least one accessible voting system for every polling place by the 2004 primary and sets a goal that "best efforts" will be made to ensure that all polling sites will be accessible by the same date. The Board expects these voting machines to be in place for the Presidential Primary in 2004, bringing the city into full compliance with the new federal voting systems standards prior to the November 2006 deadline specified in HAVA.

District of Columbia voters are already given the protection of provisional ballots now required by HAVA; only minor changes are necessary to comply with the process set forth in the federal law. Actions to comply with the new requirement to post voter information at the polling place will be one component in a larger program of vigorous voter outreach and education.

Ten years prior to the National Voter Registration Act ("NVRA")[1] in 1993, the Board created a computerized registration list. Consequently, the District of Columbia already complies with one of the most significant changes mandated by the new federal law – the requirement that every state have a single, statewide, computerized voter registration list. Budget constraints have prevented the Board from updating this system and taking advantage of changes in information technology that can make it more efficient, more accurate and more secure.

The Board is drafting legislation and rules to modify current registration processes to conform to new federal requirements. In the process, the Board will strive to design procedures that keep the voter list accurate, verify eligibility and secure voter information without placing an undue burden on the voter or increasing the possibility of erroneously removing eligible voters.

The new funds appropriated under HAVA will allow the Board to update its registration system by creating interactive links with other agencies, giving pollworkers access to the list at the polling place on Election Day, and improving security.

Elections depend on technology, but they also depend on the army of temporary workers brought in on Election Day to manage the polls. Up-to-date technology and voting systems cannot compensate for weaknesses in the polling place operations. Accordingly, the Board will use HAVA funds to address vulnerabilities in the current system of pollworker recruitment and training. The Board will also use funds to increase voter

[1] 42 U.S.C. § 1973gg et seq.

education and facilitate broader participation in the election, particularly among voters with low English proficiency.

Finally, the Board plans to use HAVA funds to make improvements in the infrastructure of the elections system that will reap long-term benefits for District of Columbia voters.

Sound elections require public confidence. The Board puts a high premium on openness and accountability to the public. In addition to bringing election laws and procedures into compliance with HAVA, the Board will institute procedures to enhance accountability and transparency. As required by HAVA, the Board is creating an administrative dispute resolution process for handling voter complaints relative to HAVA compliance. The expenditure of HAVA funds will adhere to federal and city reporting and accounting requirements.

I. Unique Characteristics of the District of Columbia

In title III, "Uniform and Non-Discriminatory Voting Technology and Election Administration Requirements," HAVA sets forth important new federal requirements for voting systems, for polling place operations and for voter registration. States are required in their plans to provide an account of how they will use the new federal funds to meet these requirements. Several provisions within the new requirements, however, do not apply to the District of Columbia as they are intended to shift accountability for elections from localities to the state and promote more centralized administration. The District of Columbia is a single jurisdiction with only one election authority, the District of Columbia Board of Elections and Ethics. Accountability for elections in the District of Columbia resides with the Board. This section enumerates and explains both those components of the plan required under § 254 (a) of HAVA that do not apply to the District of Columbia and those components that must be redefined in order to apply to the characteristics of this unique jurisdiction.

According to HAVA, the state's plan must discuss "how the State will monitor distribution of the requirements payment to units of local government"[2]. There are no applicable units of local government in the District of Columbia; the Board will be the sole government agency to receive funds under HAVA and the sole agency with authority to spend HAVA funds. The Plan includes a detailed description of how the Board will work to ensure the highest standards of public accountability in the use of these funds.

[2] *See* Help America Vote Act of 2002, Public Law No. 107-252, § 254 (a)(2) (2002) (advising that state plans must describe "[h]ow the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State....").

HAVA requires states to describe how they will "provide for programs for election official education and training"[3]. Again, the District of Columbia is a single entity with only one election authority; the Board's only responsibility is to train its staff and pollworkers. As described elsewhere in this Plan, the Board will train relevant staff and poll workers on election administration requirements.

HAVA also requires that states adopt performance goals and measures to "determine the success of local government in carrying out the plan."[4]. For the purposes of this provision, the District of Columbia must function in effect as both a state and local entity. In other words, applied to the District, the Board is required to devise the goals and measures by which the Board itself will be judged. To ensure the evaluation is objective and has the confidence of the public, the Board will ensure it is a public and independent process.

Finally, § 702 of HAVA requires states to create a single office within the state for carrying out responsibilities under the Uniformed and Overseas Citizens Absentee Voter Act. The Board, the sole agency responsible for administering these requirements, already complies with this new requirement.

While provisions in HAVA seek to address a problem that the District of Columbia does not experience, namely, centralizing authority at the state level, the Board, like every other state election authority, faces a challenge in ensuring uniform application of the law. Within the context of elections in the District of Columbia, uniformity of election administration will be defined as uniformity across the jurisdiction. The Board will seek to ensure the new requirements are applied uniformly in every polling place.

II. A Plan for Meeting New Requirements of the Help America Vote Act in the District of Columbia

The heart of the Help America Vote Act lies in the "Uniform and Nondiscriminatory Election Technology and Administration Requirements" set forth under title III. These requirements establish minimum standards for voting systems, polling place procedures, and voter registration. The following outlines how the Board will meet – and surpass – these new requirements.

[3] *See* Help America Vote Act of 2002, Public Law No. 107-252, §§ 254 (a)(3) (2002) (advising that state plans must describe "[h]ow the State will provide for programs for ... election official education and training ... which will assist the State in meeting the requirements of title III").
[4] *See* HAVA, Public Law No. 107-252, § 254(a)(8) (2002) (advising that the plan include a description of "[h]ow the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan....").

Meeting New Voting System Requirements under HAVA[5]

In passing HAVA, Congress established a set of minimum standards for all voting systems used in federal elections. The standards, set out in § 301, require voting systems to do the following: notify voters of errors, including over-voting; provide voters with the opportunity to review their ballot and correct errors; provide a paper record for audit purposes; provide voters with disabilities the opportunity to cast a private ballot independently; provide ballots in multiple languages; and not exceed the machine error rate set by the Federal Election Commission. States are also required to provide a definition of what constitutes a vote for each type of system used.

Prior to the 2000 Presidential Election, the District of Columbia had already begun an overhaul of its voting systems consistent with the goals outlined in the federal bill. By the 2002 elections, the punch card voting system had been replaced with the Optech Eagle P III optical scan voting system. This system allows voters to review their ballots, notifies the voter of an over-vote and allows voters to correct the ballot in case of an error. The city will continue and expand its efforts to educate voters on the use of the optical scan system for its upcoming elections. In addition, by 2004 the Board will have added one machine per precinct that is accessible to persons who are visually and mobility impaired – the Sequoia Edge Direct Recording Equipment ("DRE") machine – in all of the city's 142 precincts. The optical scan and the DRE system meet the federal standards for auditibility and acceptable machine error rate required under § 301.

The Board has drafted legislation requiring voting systems in the District of Columbia to meet the standards specified in § 301 of HAVA. These requirements are minimum standards and will not prevent the Board from procuring systems that offer additional features and safeguards. In addition to purchasing systems that meet the new requirements, the Board will, consistent with its former practice, abide by the voluntary standards issued by the Election Assistance Commission.

As explained more fully below, the Board expects to be in full compliance with the new HAVA voting system standards by the Presidential Primary in 2004. The Board plans to use HAVA funding to take additional steps that will ensure the transition to new voting systems is completed successfully.

Over-vote notification, ballot review and ballot correction
With its purchase of new optical scan systems and DREs, the Board significantly improved the process by which voters in the District of Columbia cast ballots. Both systems have safeguards to ensure the voter is able to express his or her intent accurately. The optical scan systems accomplish this goal by means of an in-precinct scanner. Voters insert their ballots into the scanner, which rejects ballots with errors, including over-votes, thus confirming for the voter that he or she has produced a ballot that can be

[5] *See* Help America Vote Act of 2002, Pub. L. No. 107-252, §§ 254 (a)(1), 254(a)(4) (2002) (advising that state plans must indicate "[h]ow the state will use the requirements payment to meet the requirements of title III," and [h]ow the State will adopt voting system guidelines and processes which are consistent with the requirements of section 301.").

machine-read. The touch-screen DRE systems prevent voters from making errors and provide an automatic review of the ballot prior to its being cast.

Since the cost of these new technologies has proved prohibitive in the past, the Board phased in improvements gradually. After the 2000 election, the Board replaced its punch card voting system with the optical scan system. The Optech Eagle optical scan system now in use in every precinct permits voters casting their ballot in person to review their ballots. The system also allows for private and independent correction, as well as replacement of damaged or over-voted ballots. The Board will develop instructions for all voters, including absentee voters, explaining the effect of an over-vote and procedures for obtaining a replacement ballot – including procedures for replacing absentee ballots.

The Sequoia Edge DREs purchased by the Board (described more fully below) for use in 2004 are in full compliance with this provision of § 301 of HAVA. They do not permit over-voting; they provide automatic ballot review; and they notify the voter of errors and how to correct those errors.

Accessibility to persons with disabilities
Prior to passage of the HAVA, five District of Columbia voters, the American Association of People With Disabilities, and the Disability Rights Council of Greater Washington filed suit in the U.S. District Court claiming that the purchase of the new optical scan voting system, which is not accessible to voters with disabilities, violated the Americans with Disabilities Act of 1990.

In settling the case, the District of Columbia government and the Board agreed to provide at least one accessible DRE voting machine in every polling place in the city by the May Presidential Primary election. During the September 2002 primary election, the Sequoia Edge DREs were on display at 70 polling places. For a blind voter, the machines produce an audio reading of the ballot to which a voter listens using headphones. The voter moves through the ballot using arrow keys and pushes the "select" button for his or her choice. Each button has a distinctive shape, such as an "up" arrow, and is identified in Braille. People who cannot use their hands to hold a pencil can use the touch screen feature of the machine. The voter sees the ballot on the screen and touches the screen with any part of the hand or a wand held in the mouth. All voters can also use the machines to write in a candidate by spelling the candidate's name either on a keyboard on the touch-screen or by selecting letters recited orally.

The Board anticipates having all of the machines ready for use in polling places by the 2004 Presidential Primary.

Auditability
The Board places a high premium on an open vote-casting and tabulation process that merits the trust and confidence of the voters. The voting systems procured by the Board have already been tested and certified by the Independent Testing Authority under the auspices of the National Association of State Election Directors. All ITA-certified

systems meet established federal standards for auditability and security. The Board provides additional safeguards to ensure the integrity of these systems:

The DRE Edge is capable of providing a paper audit trail that can serve as an official record in the event of a recount. The system requests the voter to review his or her choices prior to submitting the ballot, at which time the system creates the permanent record.

The Optech Eagle uses paper ballots that can be used as an official record in the event of a recount.

Alternative Language Accessibility
The District of Columbia is home to an increasingly diverse population. Although the District of Columbia was not included on the Bureau of the Census list of jurisdictions required to provide multi-lingual ballots under the Voting Rights Act of 1965 ("VRA")[6], certain wards certainly meet the threshold percentage of voters with low English proficiency. The Board is therefore providing ballots and election materials in Spanish at every precinct in the 2004 elections.

The Sequoia Edge DREs can be programmed to produce ballots in multiple languages and are therefore compliant with this provision.

Error rates
HAVA requires that no voting systems exceed the acceptable machine error rate established in the Federal Election Commission's voluntary Voting System Standards. As a matter of practice, the Board only purchases voting systems that meet these federal standards. Systems now in use – both the Optech Eagle and the Sequoia Edge DRE – have been tested and qualified by the Independent Testing Authority under the auspices of the National Association of State Election Directors.

Standards for what constitutes a vote
The Board's administrative regulations, set forth in § 809 of title 3 of the District of Columbia Municipal Regulations contain clear guidelines on what constitutes a vote on the optical scan ballots. These standards are applied only in the event of a recount. The DRE systems define what constitutes a vote as part of the interface with the voter and so require no such guidelines.

In addition to the steps outlined above, the Board plans to adopt the following measures to facilitate a smooth transition to new voting systems in the 2004 Presidential Primary and general election:

- Review and modify polling place signage, materials and procedures to ensure that both pollworkers and voters understand the process for casting a ballot that accurately reflects the voter's intent and that will be counted. At a minimum, the Board will: (1) post an easily legible sign near the scanners instructing voters to review their ballots carefully to ensure they have clearly voted in pencil for the candidate(s) of their choice, that there are no stray marks on the ballot, and that they have not over-voted; and (2) instruct voters to watch the completed ballot being fed into the scanner.

- Conduct an educational campaign in cooperation with political parties, civic organizations and groups representing voters with disabilities using a wide range of media to familiarize the public with new voting systems, as well as new procedures. At the polling place, an additional pollworker will be dedicated to providing information to voters. Instructions on how to cast a ballot will be included with sample ballots.

- Develop instructional video and audio programs in English and Spanish on the use of the optical scan and DRE voting systems, and develop an outreach plan for educating District of Columbia voters, including voters with disabilities.

- To assure private and independent voting on the optical scan system, the Board will, cost permitting, replace the old punch card stations with new, simpler and more flexible privacy areas.

- Make DREs available in at least two locations during the in-person absentee voting period for voters with disabilities or voters who may need extra time for assistance in voting.

Table 1 – Compliance with § 301 Voting System Requirements	**Compliant**	**Not Compliant**	**Actions Needed for Compliance**
(a) (1)(A) The voting system shall permit private and independent voter verification before the ballot is cast and counted; shall provide the voter with the opportunity (in a private and independent manner) to correct the ballot; and shall notify the voter in the case of an over-vote and allow the voter to correct the ballot.	X		
(a)(1)(B) A State or jurisdiction that uses a paper ballot voting system (including mail-in absentee ballots and mail-in ballots), may meet these requirements by establishing a voter education program specific to that voting system that notifies each voter of the effect of casting multiple votes for an office and providing the voter with instructions on how to correct and replace the ballot.		X	The Board is developing a program and materials to educate absentee and other voters on the use of optical scan system.
(a) (1)(C) The voting system shall ensure that any notification required under this			

[6] 42 U.S.C. § 1971 (1965).

Table 1 – Compliance with § 301 Voting System Requirements	Compliant	Not Compliant	Actions Needed for Compliance
that any notification required under this paragraph preserves the privacy of the voter and the confidentiality of the ballot.	X		
(a)(2) The voting system shall produce a record with an audit capacity. The voting system shall produce a permanent paper record with a manual audit capacity. The voting system shall provide the voter with an opportunity to change the ballot or correct any error before the permanent paper record is produced. The paper record shall be available as an official record for any recount conducted with respect to any election in which the system is used.	X		
(a)(3) The voting system shall be accessible for individuals with disabilities, including non-visual accessibility for the blind and visually impaired, in a manner that provides the same opportunity for access and participation (including privacy and independence) as for other voters. The voting system shall satisfy this requirement through the use of at least 1 direct recording electronic voting system or other voting system equipped for individuals with disabilities at each polling place.		X	The District of Columbia is contracting with Sequoia for the purchase of a sufficient number of DREs to meet this requirement.
(a)(4) The voting system shall provide alternative language accessibility pursuant to the requirements of section 203 of the Voting Rights Act of 1965 (42 U.S.C. 1973aa-1a).	X		
(a)(5) The error rate of the voting system in counting ballots (taking into account only those errors which are attributable to the voting system and not attributable to an act of the voter) shall comply with the error rate standards established under section 3.2.1	X		

Table 1 – Compliance with § 301 Voting System Requirements	Compliant	Not Compliant	Actions Needed for Compliance
of the voting systems standards issued by the Federal Election Commission.			
(a)(6) Each State shall adopt uniform and nondiscriminatory standards that define what constitutes a vote and what will be counted as a vote for each category of voting system used in the State.	X		
(b) The term ``voting system'' means-- (1) the total combination of mechanical, electromechanical, or electronic equipment (including the software, firmware, and documentation required to program, control, and support the equipment) that is used-- (A) to define ballots; (B) to cast and count votes; (C) to report or display election results; and (D) to maintain and produce any audit trail information; and (2) the practices and associated documentation used-- (A) to identify system components and versions of such components; (B) to test the system during its development and maintenance; (C) to maintain records of system errors and defects; (D) to determine specific system changes to be made to a system after the initial qualification of the system; and (E) to make available any materials to the voter (such as notices, instructions, forms, or paper ballots).		X	Legislation is pending to adopt this definition.

Implementing the New Polling Place Procedures

In addition to establishing new standards for voting systems, HAVA also institutes new safeguards for voters on Election Day. In § 302, the law requires that voters whose eligibility is questioned be allowed to cast a ballot that will be counted if the election officials later determine the voter is eligible. In HAVA, this contingent ballot is called a

"provisional ballot." The law also requires that following the election voters have the means, using a free-access system, to find out if their ballot was counted, further stipulating that only the voter who cast the ballot shall have access to that information.

The new polling place procedures also include posting at every polling place the following information: a sample ballot; the polling place hours of operation; instructions for first-time, mail-in registrants; instructions for casting a provisional ballot; information on the voter's rights under federal and state law; and the penalties for voter fraud.

Finally, § 302 requires that should a polling place be kept open past the established closing time, all voters casting ballots during the extended period will cast provisional ballots that will be segregated from other provisional ballots.

Provisional voting
Under current law in the District of Columbia, voters whose names do not appear in the precinct register may vote a provisional or, as it is termed in the District of Columbia Official Code, a "special ballot." Voters whose names do not appear because they may have moved fill out an Election Day Change of Address form and vote a provisional ballot. In practice, the special ballot process ensures that every person desiring to vote on Election Day and claiming to be registered may cast a ballot. All such voters are instructed verbally and in writing about how to find out if their vote will be counted. After Election Day, the Board investigates the eligibility of the voters and makes a preliminary determination. A list of voters whose ballots are not deemed valid is made public. Voters and challengers may request a public hearing to appeal the preliminary decision.

Changes needed to bring the polling place administration of special ballots into compliance with HAVA are minimal. The Board has drafted legislation specifying the new uses of special ballots: (1) as a fail-safe mechanism for first-time mail-in registrants whose eligibility has not been verified prior to voting, and (2) the required method for voters casting their ballots after regular voting hours in the event of a court order to keep the polls open.

As noted above, the new DRE system will be programmed to segregate special ballots so that voters with disabilities may cast provisional ballots on accessible machines.

Because the Board interprets HAVA to include challenged ballots within § 302 of HAVA, the current procedures for publishing the results of challenges must be revised to restrict access to information about the disposition of special ballots to the voter who cast the ballot. The Board is drafting legislation to make the necessary revisions. The Board will set up a toll-free telephone number that will allow voters to access information on the disposition of their special ballots. In addition, the Board is adding safeguards so that only the voter who cast the ballot has access to the information.

The Board will take the following additional steps to assure effective implementation of special ballot process:

- Since voters casting special ballots in the District of Columbia are required to cast these ballots in their assigned precinct, the Board will act to inform all voters of their assigned precinct in an election mailing prior to Election Day. As in the past, a trained pollworker will be designated to help a voter determine his or her assigned precinct and direct them to the appropriate polling place.
- DREs will be programmed to allow for segregating special ballots.
- The Board will work to devise administrative procedures that are simple and straightforward, and will conduct training to ensure pollworkers understand the new process.

Posting of voter information
The Board currently posts at the polling place the following information: qualifications for voting, a sample ballot, instructions for casting a special ballot, and the penalty for perjury. The Board has drafted legislation and regulations to bring the District of Columbia into compliance with this provision by adding a requirement to post the following:

- information regarding the date of the election and the hours during which polling places will be open;
- instructions for mail-in registrants and first-time voters under § 303(b);
- information on voting rights under applicable Federal and District laws (the District of Columbia Voter's Rights Notice), including information on the right of an individual to cast a provisional (special) ballot and instructions on how to contact the appropriate officials if these rights are alleged to have been violated; and
- general information on Federal and District laws regarding prohibitions on acts of fraud and misrepresentation.

Voters voting after the polls close
HAVA requires that voters casting their ballots after regular voting hours in the event of a court order to keep the polls open cast a special ballot. The law further requires that such ballots be kept separate from other provisional ballots.

The Board has drafted legislation specifying the use of special ballots in this circumstance. The Board will modify its procedures to accommodate this new use of special ballots and to allow these ballots to be segregated prior to a determination of their validity.

Table 2 – Compliance with § 302 Provisional Voting and Voting Information Requirements	Compliant	Not Compliant	Actions Needed for Compliance
(a) **Provisional voting requirements**. If an individual declares that he or she is a registered voter in the jurisdiction and that he or she is eligible to vote in a Federal election, but the name of the individual does not appear on the official list of eligible voters for the polling place or an election official asserts that the individual is not eligible to vote, such individual shall be permitted to cast a provisional ballot as follows	X		
(a)(1) An election official at the polling place shall notify the individual that the individual may cast a provisional ballot in that election.	X		
(a) (2) The individual shall be permitted to cast a provisional ballot at that polling place upon the execution of a written affirmation by the individual before an election official at the polling place stating that the individual is-- (A) a registered voter in the jurisdiction in which the individual desires to vote; and (B) eligible to vote in that election.	X		
(a)(3) An election official at the polling place shall transmit the ballot cast by the individual to an appropriate election official for prompt verification.	X		
(a)(4) If the election official to whom the ballot or voter information is transmitted determines that the individual is eligible under State law to vote, the individual's provisional ballot shall be counted as a vote in that election in accordance with State law.	X		
(a)(5)(A) At the time that an individual casts a provisional ballot, the appropriate	X		

Table 2 – Compliance with § 302 Provisional Voting and Voting Information Requirements	Compliant	Not Compliant	Actions Needed for Compliance
election official shall give the individual written information that states that any individual who casts a provisional ballot will be able to ascertain under the system established under subparagraph (B) whether the vote was counted, and, if the vote was not counted, the reason that the vote was not counted.			
(a) (5)(B) The appropriate election official shall establish a free access system (such as a toll-free telephone number or an Internet website) that any individual who casts a provisional ballot may access to discover whether the vote of that individual was counted, and, if the vote was not counted, the reason that the vote was not counted.		X	Legislation and proposed rulemaking are pending to meet this requirement.
(a) ...The appropriate State or local official shall establish and maintain reasonable procedures necessary to protect the security, confidentiality, and integrity of personal information collected, stored, or otherwise used by the free access system established under paragraph (5)(B). Access to information about an individual provisional ballot shall be restricted to the individual who cast the ballot.		X	Legislation and proposed rulemaking are pending to meet this requirement.
(b) **Voting information requirements**. The appropriate election official shall cause voting information to be publicly posted at each polling place on the day of each election for Federal office.		X	Legislation and proposed rulemaking are pending to meet this requirement.
(b)(2)(A) a sample version of the ballot that will be used for that election;	X		
(b)(2) (B) information regarding the date of the election and the hours during which polling places will be open;		X	Legislation and proposed rulemaking are pending to meet

Table 2 – Compliance with § 302 Provisional Voting and Voting Information Requirements	Compliant	Not Compliant	Actions Needed for Compliance
			this requirement.
(b)(2)(C) instructions on how to vote, including how to cast a vote and how to cast a provisional ballot;		X	Legislation and proposed rulemaking are pending to meet this requirement.
(b)(2)(D) instructions for mail-in registrants and first-time voters whose identity has not been verified prior to Election Day;		X	Legislation and proposed rulemaking are pending to meet this requirement.
(b)(2)(E) general information on voting rights under applicable Federal and State laws, including information on the right of an individual to cast a provisional ballot and instructions on how to contact the appropriate officials if these rights are alleged to have been violated;		X	Legislation and proposed rulemaking are pending to meet this requirement.
(b)(2)(F) general information on Federal and State laws regarding prohibitions on acts of fraud and misrepresentation.		X	Legislation and proposed rulemaking are pending to meet this requirement.
(c) **Voters who vote after the polls close.** Any individual who votes in a Federal election as a result of a court order or any other order extending the time established for closing the polls by a State law in effect 10 days before the date of that election may only vote in that election by casting a provisional ballot. Any such ballot cast under the preceding sentence shall be separated and held apart from other provisional ballots cast by those not affected by the order.		X	Legislation and proposed rulemaking are pending to meet this requirement.

Meeting New Registration Requirements

For all voters, applying to register is the first contact with the Board and the elections process. The District of Columbia has been energetic in its outreach to voters, offering registration opportunities at six city agencies and working in partnership with civic organizations, political campaigns, and media outlets to increase the number of registered voters. These efforts have been successful: 78.7 percent of the city's voting age population is registered to vote. New funds available under HAVA for improving and modernizing the registration process will allow the Board to increase the efficiency of the registration system.

The authors of HAVA understood that standards regulating the voter registration process are just as important as standards regulating the voting process; accordingly, in §303 HAVA establishes new requirements not only for the voter registration process but also for how election officials will verify and manage voter registration information.

Most significantly, the law requires that every state maintain a single, uniform, centralized, computerized statewide voter registration list and in so doing shifts responsibility for voter registration from localities to states. The District of Columbia administers a single, computerized voter registration list that is, as noted earlier, already in compliance with this requirement.

Many of the list-cleaning provisions set forth in § 303 of HAVA serve to reinforce those established ten years ago in the National Voter Registration Act (NVRA); HAVA authorizes the resources necessary to meet these requirements. In a departure from the NVRA, which merely recommended that registration agencies coordinate and share information with other agencies to increase accuracy, HAVA mandates election officials to match voter records against the records of driver's license agencies and the Social Security Administration. To this end, HAVA requires that voters provide their driver's license number, if they have one, or the last four digits of their Social Security number (SSN) in order for their application to be processed. If the voter has neither a driver's license nor an SSN, the voter will be assigned a unique identifier. At the same time, the law mandates safeguards to protect the privacy of this information.

The law also spells out new procedures for handling voters registering for the first-time who register by mail. If the election authority is unable to match the records of these voters against other records prior to Election Day, these voters will be required to present ID at the polling place or send copies of ID with their absentee ballot. If the voter lacks the forms of identification called for under this provision, the vote will be considered a special ballot and counted according to state law.

Computerized voter registration list

The District of Columbia is in the enviable position of being in full compliance with § 303 (a)(1) of HAVA. The Board currently administers a single, uniform, computerized list that is used as the official list in all precincts. As the District of Columbia is a single jurisdiction, the requirements pertaining to the transmission of data and voter information from the county to the state do not apply.

The Board currently complies with all HAVA list maintenance requirements, as well as with all requirements in the NVRA. Records from the U.S. District and D.C. Superior Courts and the Department of Vital Statistics are matched against Board records to identify incarcerated felony convicts, deceased voters and other individuals who are no longer eligible to vote.

The Board also matches its computerized list against records received from the National Change of Address biannually. Information indicating that a voter has moved prompts a mailing to the voter for confirmation. Consistent with procedures established in the NVRA, the Board conducts a citywide canvass and removes those voters whose mail is returned as undeliverable and who have not voted in two federal elections. The District of Columbia regulations stipulate that the Board must confirm that a voter is ineligible before removing the record from the rolls. These procedures will not change under HAVA; rather, the money appropriated under HAVA will allow the Board to make improvements and reduce the administrative burden of such list-cleaning measures.

HAVA requires that the official list used in the conduct of elections contain the names of all legally registered voters. Since inactive voters, that is, voters who have moved within the District and who have not responded to a mailing, are legally registered, Board will include the names of inactive voters on the list used at the precinct on Election Day.

The Board's Chief Technology Officer has responsibility for maintaining the integrity and security of the list of registered voters. Under the current system, access to voter registration information requires both a user ID and a password. The chief technology officer will strengthen the security of the list by creating a hierarchy of access to data.

Although compliant with all HAVA requirements, the voter registration database system does not take full advantage of contemporary information technology. Currently, all voter registration applications filled out at voter registration sites other than that of the Board office are transmitted in paper form. The Board intends to move to a system of electronic transmission between agencies. The Board plans to make the following improvements to reduce the administrative burden in managing the system (which will reduce costs over the long term) and ensure that the voter registration list is current, accurate, secure and reliable:

- secure agreements with voter registration agencies, including the Medical Assistance Administration, the Office on Aging, Income Maintenance Administration, Mental Retardation and Developmental Disabilities Administration, Recreation and Parks Senior Citizens' Branch, Rehabilitation Services Administration and the Supplemental Program for Women, Infants and Children to create interactive links that allow for the electronic transmission of voter information and registration applications;

- facilitate access to the entire registration list at each polling place; and

- establish new security measures to ensure that voter information remains private and protected.

Verification of registration information

The Board has designed its registration process on the principle that registration should not be a barrier to voting – indeed, by maintaining an accurate list of registered voters, the registration process allows the communication with voters vital to fostering healthy and full participation in elections. To ensure registration does not inhibit participation, procedures to verify voter information should be as transparent to the voter as possible.

Currently, the Board requests but does not require applicants to provide their SSNs. The voters are assigned a unique identifier that is random and specific to the Board's list (this system requires no modification). To comply with the new requirement under HAVA, the Board is revising registration forms to include a request for the applicant's driver's license number or the last four digits of the Social Security Number and modifying the database to store the new information.

The Board currently does not regularly match voter information with Department of Motor Vehicles ("DMV") records. As required by HAVA, the Chief Election Official will work with the appropriate official at the DMV to enter into an agreement authorizing the sharing of information between the two agencies. The Board will develop mechanisms for sharing data that will allow for verification of voter information. (Prior to linking the two systems, this match will be accomplished through file downloads from the DMV to the Board.) The Board will simultaneously institute safeguards to ensure that voters are not denied registration because of erroneous or out-of-date information contained on either database.

Requirements for first-time, mail-in registrants

Under HAVA, citizens registering to vote for the first time in the District of Columbia who submit their registration application by mail – specifically, applications sent to the Board via the United States Postal Service – are required to present at the polling place documents verifying identity. The acceptable forms of documentation specified in HAVA are: a copy of a current and valid photo identification or a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter. If such voters vote absentee, they are required to submit copies of ID or the other verifying documents with their absentee ballot. The Board has drafted legislation that will bring the District of Columbia into compliance with this requirement and is modifying the voter registration system to track such voters.

The Board is concerned, however, that instituting special procedures at the polling place for certain voters may lead to the perception that some voters are being treated differently. In addition, special procedures inevitably add to possible confusion at the polling place. For this reason, the Board plans to incorporate procedures into the new registration process for verifying the voter's eligibility prior to their voting and thereby reduce the burden on both pollworkers and voters.

The Board will take the following additional steps to ensure effective implementation of new registration and first-time voter requirements:

- In designing the new registration applications, the Board will consult a literacy expert to ensure that each request for information on the voter registration form is readily understandable and can be satisfied with a concise answer or mark.
- In processing registration applications received by mail, the Board will make every effort to obtain missing registration information prior to the next election. This provision may require the Board to send multiple mailings to the registrant.
- The Board will work with city agencies that issue identification and encourage them to include both name and address on all government-issued ID.
- Develop training, including an instructional video, on the new requirements of HAVA for citizens and other community groups who conduct voter registration drives and register other citizens.

Table 3 – Compliance with § 303 Computerized Voter Registration List Requirements and Requirements for Voters Who Register by Mail	**Compliant**	**Not Compliant**	**Actions Needed for Compliance**
(a) (1)(A) **Computerized statewide registration list requirements.** Each State, acting through the chief State election official, shall implement, in a uniform and nondiscriminatory manner, a single, uniform, official, centralized, interactive, computerized statewide voter registration list defined, maintained, and administered at the State level that contains the name and registration information of every legally registered voter in the State (in this subsection referred to as the computerized list), and includes the following:	X		
(a)(1)(A)(i) The computerized list shall serve as the single system for storing and managing the official list of registered voters throughout the state.	X		
(a)(1)(A)(ii) The list contains the name and registration information of every legally registered voter in the State.		X	The Board will merge active and inactive voters on the official list.

Table 3 – Compliance with § 303 Computerized Voter Registration List Requirements and Requirements for Voters Who Register by Mail	**Compliant**	**Not Compliant**	**Actions Needed for Compliance**
(a)(1)(A)(iii) Under the computerized list, a unique identifier is assigned to each legally registered voter in the State.	X		
(a)(1)(A)(iv) The computerized list shall be coordinated with other agency databases in the State.	X		
(a)(1)(A)(v) Any election official in the State, including any local election official, may obtain immediate electronic access to the information contained in the computerized list.	N/A		
(a)(1)(A)(vi) All voter information obtained by any local election official shall be electronically entered into the computerized list on an expedited basis at the time the information is provided to the local official.	N/A		
(a)(1)(A)(vii) The chief State election official shall provide such support as may be required so that local election officials are able to enter information.	N/A		
(a)(1)(A)(viii)The computerized list shall serve as the official voter registration list for the conduct of all elections for Federal office in the State.	X		
(a)(2) **Computerized list maintenance.** The appropriate election official shall perform list maintenance with respect to the computerized list on a regular basis as follows: (a)(2)(A)(i) If an individual is to be removed from the computerized list, such individual shall be removed in accordance with the provisions of the National Voter	X		

Table 3 – Compliance with § 303 Computerized Voter Registration List Requirements and Requirements for Voters Who Register by Mail	Compliant	Not Compliant	Actions Needed for Compliance
Registration Act of 1993 (42 U.S.C 1973gg et seq.).			
(a)(2)(A)(ii) For purposes of removing names of ineligible voters, from the official list of eligible voters – (I) under section 8(a)(3)(B) of such Act (42 U.S.C 1973gg-6(a)(3)(B)), the State shall coordinate with State agency records on felony status; and (II) by reason of the death of the registrant under section 8(a)(4)(A) of such Act (42 U.S.C 1973gg-6(a)(4)(A)), the State shall coordinate the computerized list with State agency records on death.	X		
(a)(2)(B) The list maintenance performed under subparagraph (A) shall be conducted in a manner that ensures that – (i) the name of each registered voter appears in the computerized list;	X		
(a)(2)(B) (ii) only voters who are not registered or who are not eligible to vote are removed from the computerized list; and	X		
(a)(2)(B)(iii) duplicate names are eliminated from the computerized list.	X		
(a)(3) Technological security. The appropriate official shall provide adequate technological security measures to prevent the unauthorized access to the computerized list established under this section.	X		
(a)(4) Minimum standard of accuracy for state records. – The State election system shall include provisions to ensure that voter	X		

Table 3 – Compliance with § 303 Computerized Voter Registration List Requirements and Requirements for Voters Who Register by Mail	Compliant	Not Compliant	Actions Needed for Compliance
registration records in the State are accurate and are updated regularly, including the following: (a)(4)(A) A system of file maintenance that makes a reasonable effort to remove registrants who are ineligible to vote from the official list of eligible voters. Under such system, consistent with the National Voter Registration Act of 1993 (42 U.S.C 1973gg et seq.), registrants who have not responded to a notice and who have not voted in 2 consecutive general elections for Federal office shall be removed from the official list of eligible voters, except that no registrant may be removed solely by reason of a failure to vote.			
(a)(4)(B) Safeguards to ensure that eligible voters are not removed in error from the official list of eligible voters.	X		
(a)(5) Verification of voter registration information. (a)(5)(A)(i) Except as provided in clause (ii), notwithstanding any other provision of law, an application for voter registration for an election for Federal office may not be accepted or processed unless the application includes— (I) in the case of an applicant who has been issued a current and valid driver's license, the applicant's driver's license number; or (II) in the case of any other applicant (other than an applicant to whom clause (ii) applies), the last 4 digits of the applicant's social security number.		X	Legislation and proposed rulemaking to meet this requirement are pending. Application form and computerized registration list are being revised to accommodate this requirement.
(a)(5)(A)(ii) Special rule for applicants without driver's license or Social Security Numbers. If an applicant for voter registration for an election for Federal office has not been issued a current and valid driver's license or a social security number, the State shall assign the applicant a number which will serve to identify the applicant for voter registration		X	Legislation and proposed rulemaking are pending to meet this requirement.

Table 3 – Compliance with § 303 Computerized Voter Registration List Requirements and Requirements for Voters Who Register by Mail	Compliant	Not Compliant	Actions Needed for Compliance
purposes. To the extent that the State has a computerized list in effect under this subsection and the list assigns unique identifying numbers to registrants, the number assigned under this clause shall be the unique identifying number assigned under the list.			
(a)(5)(A) (iii) The State shall determine whether the information provided by an individual is sufficient to meet the requirements of this subparagraph, in accordance with State law.	X		
(a)(5)(B) Requirements for state officials.— (i) The chief State election official and the official responsible for the State motor vehicle authority of a State shall enter into an agreement to match information in the database of the statewide voter registration system with information in the database of the motor vehicle authority to the extent required to enable each such official to verify the accuracy of the information provided on applications for voter registration.		X	The chief election official is working with appropriate officials at the DMV to reach an agreement on sharing information.
(b) **Requirements for voters who register by mail.**— (b)(1) Notwithstanding section 6(c) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4(c)) and subject to paragraph (3), a State shall, in a uniform and nondiscriminatory manner, require an individual to meet the requirements of paragraph (2) if— (A) the individual registered to vote in a jurisdiction by mail; and (B)(i) the individual has not previously voted in an election for Federal office in the State; or (ii) the individual has not previously voted in such an election in the jurisdiction and the jurisdiction is located in a State that does not have a computerized list that complies with the		X	Legislation and proposed rulemaking to meet this requirement are pending.

Table 3 – Compliance with § 303 Computerized Voter Registration List Requirements and Requirements for Voters Who Register by Mail	Compliant	Not Compliant	Actions Needed for Compliance
requirements of subsection (a).			
(b)(2) Requirements -- (b)(2)(A) An individual meets the requirements of this paragraph if the individual-- (b)(2)(A)(i) in the case of an individual who votes in person-- (I) presents to the appropriate State or local election official a current and valid photo identification; or (II) presents to the appropriate State or local election official a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter; or		X	Legislation and proposed rulemaking to meet this requirement are pending.
(b)(2)(A)(ii) in the case of an individual who votes by mail, submits with the ballot-- (I) a copy of a current and valid photo identification; or (II) a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter.		X	Legislation and proposed rulemaking to meet this requirement are pending.
(b)(2)(B) Fail-Safe Voting (b)(2)(B)(i) An individual who desires to vote in person, but who does not meet the requirements of subparagraph (A)(i), may cast a provisional ballot under section 302(a).		X	Legislation and proposed rulemaking to meet this requirement are pending.
(b)(2)(B)(ii) An individual who desires to vote by mail but who does not meet the requirements of subparagraph (A)(ii) may cast such a ballot by mail and the ballot shall be counted as a provisional ballot in accordance with section 302(a).		X	Legislation and proposed rulemaking to meet this requirement are pending.
(b)(3) Inapplicability Paragraph (1) shall not apply in the case of a person –		X	Legislation and proposed rulemaking to

(b)(4)(A) The mail voter registration form developed under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) shall include the following: (i) The question ``Are you a citizen of the United States of America?'' and boxes for the applicant to check to indicate whether the applicant is or is not a citizen of the United States.			rulemaking to meet this requirement are pending. Mail-in registration form is under revision.
(b)(4)(A)(ii) The question ``Will you be 18 years of age on or before election day?'' and boxes for the applicant to check to indicate whether or not the applicant will be 18 years of age or older on election day.		X	Legislation and proposed rulemaking to meet this requirement are pending. Mail-in registration form is under revision.
(b)(4)(A)(iii) The statement ``If you checked `no' in response to either of these questions, do not complete this form.''.		X	Legislation and proposed rulemaking to meet this requirement are pending. Mail-in registration form is under revision.
(b)(4)(A)(iv) A statement informing the individual that if the form is submitted by mail and the individual is registering for the first time, the appropriate information required under this section must be submitted with the mail-in registration form in order to avoid the additional identification requirements upon voting for the first time.		X	Legislation and proposed rulemaking to meet this requirement are pending. Mail-in registration form is under revision.
(b)(4)(B) Incomplete forms.--If an applicant for voter registration fails to answer the question included on the mail voter registration form pursuant to subparagraph		X	Legislation is pending and administrative procedures are being revised to

Table 3 – Compliance with § 303 Computerized Voter Registration List Requirements and Requirements for Voters Who Register by Mail	Compliant	Not Compliant	Actions Needed for Compliance
(A)(i), the registrar shall notify the applicant of the failure and provide the applicant with an opportunity to complete the form in a timely manner to allow for the completion of the registration form prior to the next election for Federal office (subject to State law).			meet this requirement.

Activities To Enhance Implementation of the District of Columbia Plan

In addition to the steps outlined above, the Board will use funds appropriated under HAVA to do the following:

Expand the Capacity of the District of Columbia Board of Elections and Ethics

In order to ensure smooth implementation of the new requirements, the Board must expand its administrative and physical capacity. The Board will conduct an organizational review and, based on that review, implement changes in staffing and equipment necessary to meeting the legislative requirements and carrying out the Plan within the specified timeframe. As part of the organizational review, the Board will introduce measures to ensure accountability for each component of the Plan.

In addition, to augment the skills of elections staff and promote increased professionalism, the Board will institute a training and certification program for current and future staff. The Board will work cooperatively with The Election Center and other organizations to provide substantive training on federal and District election laws, voting systems, registration systems and administration, among other topics. Beyond the certification program, the Board will also expand professional development opportunities for staff. The Board will also institute a certification program to increase accountability of Board staff and assure full compliance with all Federal and District election laws.

Strengthen pollworker training and recruitment[7]

Pollworkers are critically important to ensure smooth and successful elections. Pollworker outreach is important to ensure a sufficient number of pollworkers to assist in election preparations and to adequately staff each polling place on Election Day. Pollworker training is also important to ensure that each pollworker possesses sufficient

[7] *See* HAVA, Public Law No. 107-252, § 254 (a)(3) (2002), advising that the plan must describe "[h]ow the state will provide for programs for . . . poll worker training which will assist the State in meeting the requirements of title III."

experience and knowledge to reliably carry out the duties of conducting a fair election and safeguard every eligible voter's right to cast a ballot.

As part of its effort to conduct effective pollworker outreach, the Board will seek to match pollworker stipends in the District of Columbia with the national average for urban election districts.

The Board will also hire a professional recruiter in order to expand the number of pollworkers available on Election Day. The recruiter's scope of services will include the following:

- develop and implement a comprehensive recruitment program that reaches civic and service organizations, public and private high schools and colleges, major employers and local businesses operating in the District of Columbia;
- develop and place recruiting announcements in print media and electronic media, including radio and television.

In an election that will feature both new voting systems and new procedures – as will be the case in 2004 – the importance of quality pollworker training cannot be overstated. To ensure pollworkers in the District of Columbia are well prepared for the challenges of implementing HAVA at the polling place, the Board will undertake the following:

- hire a professional trainer to develop and conduct a comprehensive pollworker training program, to include specific education on the District of Columbia Voters' Rights Notice;
- develop and produce updated training materials that will give pollworkers access to training off-site, for example, web-based training, CD-ROMs, and videos; and
- produce training materials specifically covering the operation of the optical scan and DRE voting systems.

To ensure the polling place workforce can meet the demands in 2004 and after, the Board will review the organization of the polling place and research models for effective staffing. At a minimum, the following changes will be made:

- Beginning in 2004, each voting precinct will have 3 additional pollworkers, one of whom will be dedicated to assisting voters using the DRE voting machine.
- Develop and implement a pilot program at one or more voter precincts providing multiple work shifts for certain pollworker positions on Election Day in order to reduce the time commitment necessary to serve as a pollworker.

Expand voter education[8]
The Board is required to expand its voter education program in two ways: (1) it must educate voters in the proper use of optical scan ballots, and (2) it must post the information listed under § 302(b) of HAVA at the polling place. These efforts are described in the relevant sections above. More is needed. Ensuring that every eligible voter is able to cast his or her vote and have that vote counted requires a vigorous voter education campaign beyond the minimum standards outlined in HAVA. To this end, the Board plans to conduct an aggressive public education campaign that will include the steps listed below. All appropriate components of this expanded voter education program will be produced in Spanish as well as English.

- HAVA requires that information regarding voters' rights under federal and state law be posted at each polling place. The Board will develop and adopt "The District of Columbia Voters' Rights Notice," a compilation of all relevant federal and District laws. The Board will disseminate the Notice and post a copy on the Board's website.

- Upgrade the Board website to ensure it matches the quality of the best state and local election websites across the country and that it is timely, attractive, user and maintenance-friendly, and information rich. The website should be accessible to blind voters. All information required to be posted at the polling place will also be posted on the Board's website.

- Produce and send a voter education mailer that includes basic information about elections in the District of Columbia, a copy of the District of Columbia Voter's Rights Notice, and the voter registration card to every registered voter. The design of the mailer and the material it is printed on shall encourage voters to keep the mailer for future reference. This mailer/brochure will include all information required to be posted at the polling place. The Board shall also produce an audio version of this publication for distribution to visually impaired voters.

- Send mailers prior to primary and general elections to qualified voters that include sample ballots and nonpartisan information on candidates and ballot measures. This mailer will be modeled on similar materials produced by states that regularly provide nonpartisan information on candidates and ballot measures to voters prior to elections.

- Produce and secure air time for radio and television public service announcements about participation in the elections process.

- Continue and expand outreach to students through the Board's "Youth at the Booth" program.

[8] *See* HAVA, Public Law No. 107-252, § 254 (a)(3) (2002), advising that the plan must describe "[h]ow the state will provide for programs for voter education . . . which will assist the State in meeting the requirements of title III."

III. The Future of Elections in the District of Columbia[9]

HAVA makes clear that the minimum requirements for voting systems are just that: a minimum. Voters in the District of Columbia deserve an election system that sets the standard for the rest of the country. Accordingly, looking to the long term, the Board will work to achieve the following goals.

Goal: A fully interactive, electronic voter registration system
The Board will use HAVA funds to develop a voter registration system that takes full advantage of contemporary database technology.

- The system will be fully interactive, with electronic links to all other city agencies that provide voter registration opportunities. Under this system, new registrations and changes of address conducted at other agencies will be electronically transmitted to the Board for acceptance and processing. The Board will develop procedures to protect voters from problems arising from out-of-date or erroneous information on other databases.

- The system will allow pollworkers to view the database remotely from the polling place.

- The system will feature an improved mechanism for assigning voters to correct precincts and make the information on precinct and polling place more accessible to the voter.

Other changes contemplated for voter registration include:

- Identifying voters with special needs such as alternative language ballots or accessible equipment as part of the registration process.

- Instituting Election Day registration in the District. This process would allow voters to cast a regular ballot on confirming their eligibility at the polling place. The District of Columbia already allows voters to conduct an Election Day Change of Address.

- Purchasing electronic pollbooks at the polling place. This innovation would reduce the cost and effort involved in printing the precinct register and would

[9] *See* HAVA, Public Law No. 107-252, § 254(a)(1) (2002) advising that the plan describe "[h]ow the State will use the requirements payment ... if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections."

speed up the production of the voter history. With proper training, the electronic pollbooks would also speed up voter intake at the polling place on Election Day.

- Identifying and registering felons who are no longer incarcerated. The Board will request that the Parole Board, Court Services and Offender Supervision Agency, halfway houses, and other agencies who handle outreach to ex-convicts make voter registration part of their de-briefing process. In addition, the Board will work with civic organizations to conduct registration and voter outreach to eligible citizens who are incarcerated.

- Encouraging every business that provides services to the citizens of the District to foster voter registration and voter education and encourage their employees to serve as pollworkers.

Goal: Improved accessibility to in-person voting for voters with disabilities
While HAVA establishes a requirement for voting systems that are accessible to voters with disabilities, the removal of barriers to the polling place is not included in the new requirements. However, the law does require states to affirm their compliance with other federal laws that address this issue directly. Under the provisions of the "Voting Accessibility for the Elderly and Handicapped Act of 1984,"[10] which became effective January 1, 1986, the Board conducted an extensive program to make its polling places accessible. Initially, making polling places accessible involved a major construction program of building ramps, installation of curb ramps, polling place relocations, and use of alternative entrances and voting areas. This effort is not yet complete. Under § 261 of HAVA, Congress authorized new resources through the Department of Health and Human Services for completing this program. The Board submitted an application for funding under this title in July of 2003.

Currently there are 142 voting locations in the District of Columbia, of which 90 are public facilities and 52 are non-District owned properties.

To ensure compliance with the Americans with Disabilities Act (ADA)[11], as required by HAVA, the Board will undertake to do the following:

- Survey all polling places to determine ADA compliance. The survey should cover paths of travel, ramps, doors, elevators, and any other barriers to the voters' access to the polling place. The results of the survey should identify access issues and a cost estimate to make the polling place ADA compliant.

- Secure a contractor, once access issues are identified, to bring the site into compliance with the ADA.

[10] 42 U.S.C. §1973 ee et seq.
[11] 42 U.S.C. § 12101 et seq.

- Determine the feasibility of using certified portable ramps at select polling places. Ramps should be installed and removed by a professional contractor.

- Establish "intra-District support team" that includes intra-agency contacts such as the Office on Aging and others that can assist Board in addressing accessibility issues.

- Develop brochure for the elderly and disabled that informs them of the services available.

- Ensure pollworkers are available to remedy problems that prevent access, such as locked doors and inoperable elevators.

IV. FUNDING ELECTION REFORM

Projected Available Funds for Implementation[12]

Title I funding
Under §101 of HAVA, Congress authorized funding to the states that would be available both for planning purposes and for immediate improvements in election administration. The District of Columbia has received $5 million in early funding under this title. Preliminary calculations by the General Services Administration indicated that the District of Columbia would not be eligible to receive additional funding under §102 of HAVA (the funds available for replacing punch card systems) over the $5 million minimum payment. The Board therefore applied only for funds available under §101 of HAVA. Table 7 details how this early money will be spent.

Title II funding in FY03 and FY04 and FY05
Title II of HAVA authorizes Requirements Payments to the states. These payments comprise the bulk of the money authorized in HAVA and are intended to assist the states in meeting the requirements of title III. Funding for these grants, however, was significantly reduced in the FY03 congressional appropriation. The President's budget estimates for the next two years likewise fail to fund election reform at the level authorized by Congress in HAVA; whereas HAVA authorized $1.6 billion in FY 04 and FY05, the President's budget included only $500 million for each year. The budget set forth below is based on the amount appropriated for FY 03 and the President's estimated amounts for the two subsequent years.

[12] *See* HAVA, Public Law No. 107-252, § 254(a)(6) (2002) (advising that the plan include "[t]he State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on—(A) the costs of activities required to be carried out to meet the requirements of title III; (B) the portion of the requirements payment which will be used to carry out activities to meet such requirements; and (C) the portion of the requirements payment which will be used to carry out other activities").

The actual proportion of title II grant money allocated to the District of Columbia in FY03 can only be estimated at this time. The Election Administration Commission will administer these grants. The final FY03 appropriation included $810 million available for title II grants. According to the formula established in HAVA, the District of Columbia would be eligible to receive a share equal to one half of one percent of the total amount appropriated to the states in § 252, or $4.05 million. Although this money was appropriated in FY03, it is unlikely to be disbursed until FY04. Accordingly, in the table below, this item is listed as FY03 money even though, in effect, it will be available in FY04.

Assuming that funds appropriated in FY04 and FY05 are in line with the President's reduced funding levels, the District of Columbia would receive $2.5 million in each of these two years.

Funds available under § 261 of HAVA
HAVA also authorizes funding for improving the accessibility of polling places. The District of Columbia has applied for $100,000 under § 261 of title II of HAVA in order to carry out plans to make every polling place across the city barrier-free for voters with disabilities.

The District of Columbia's matching fund
HAVA requires that the state appropriate a match totaling five percent of the funding provided under title II and the match itself. The District of Columbia must therefore match funds granted under title II of HAVA at a rate of 5.26 percent (the match is calculated at five percent of the total of both the title II funds and the state's match). The match is $213,000 in FY03 and $131,500 in both FY04 and FY05. The estimates for title II grants outlined above form the basis for this calculation.

Maintenance of Effort by the District of Columbia[13]

In order to ensure that funds authorized by HAVA are not used to supplant funding for elections that would otherwise be appropriated by the state or local election authority, HAVA requires that the District of Columbia provide an amount at least equal to what was spent for the conduct of the 2000 elections. In using any requirements payment, the District of Columbia will maintain expenditures of the Board for activities funded by title I and title II payments at a level equal to or greater than the level of such expenditures in the District of Columbia's FY00 budget. In FY00 the Board's budget totaled $3.5 million.

[13] *See* HAVA, Public Law No. 107-252, §254 (a)(7)(2002) (advising that the plan indicate "[h]ow the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level equal to not less than the level of such expenditures maintained by the State for the fiscal year preceding the fiscal year for which the payment is received").

Use of Title I Funds[14]

As stated above, the District of Columbia applied only for funds under § 101 of title I of HAVA. The disbursement of early payments under title I will allow the Board to develop an implementation plan and lay the groundwork for changes called for in this Plan. In effect, since title II money under HAVA will not be available in time to pay for changes needed by the 2004 Presidential Primary – which, in the District of Columbia, will take place January 13, 2004 – the early money will also be used to pay for all new administrative procedures and technology that must be in place by the 2004 General Election. A detailed accounting of how title I funds will be used can be found in Table 7 below.

[14] *See* HAVA, Public Law No. 107-252, §254(a)(10)(2002) (advising that "[i]f the State received any payment under title I, [the plan should include] a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities").

Table 5 – Funding Assumptions (FY03 – FY05)			
	FY 03	FY 04	FY 05
HAVA Title I (101)	$5,000,000		
HAVA Title II (252)	$4,050,000*	$2,500,000	$2,500,000
HAVA Title II (261)	$100,000		
D.C. matching funds		$344,530*	$131,500
Maintenance of effort	$3,500,000	$3,500,000	$3,500,000

* Congress appropriated funding for title II grants in FY03; however, these funds may not be disbursed until the establishment of the Election Assistance Commission. In effect, states will likely receive that money in FY04. If this funding is combined with the actual FY04 appropriation under title II, the District of Columbia match would have to match the combined title II funds.

Projected Expenditures for Meeting HAVA Title III Requirements

The grant money available under title II will be used both to bring the District of Columbia into full compliance with title III requirements and to enhance the implementation of changes necessary for meeting the new requirements. The activities listed here are more fully described in Section II, "A Plan for Meeting New Requirements of the Help America Vote Act in the District of Columbia." These expenditures cover both one-time costs, such as modifying the computerized voter registration database, and implementation costs associated with each election from 2004 through 2006.

Voting system requirements: Title II funding will be used to pay a little over half the cost of the new DRE voting systems ($355, 470). The Board will pay the remaining cost ($344,530). As noted earlier, following the 2000 election, the District decided to replace its punch card voting systems with the Optech Eagle P III optical scan voting system at an approximate cost of $950,000 (the contract has not yet been finalized).

Provisional voting and voter information requirements: While the District of Columbia has long had a safeguard in place to protect voters whose eligibility is in doubt on Election Day (the special ballot and challenge ballot processes), the Board will institute a toll-free telephone system for voters to access information on the disposition of their ballots to comply with the exact process described in HAVA. The Board will procure a toll-free automated phone system and will also make the information available on the Internet through the Board website (estimated cost for this requirement is $100,000). To meet the new requirement to post voter information in each polling place, the Board intends to purchase special display systems for posting the information in an accessible location ($90,000). In addition, the Board will produce instructional videos (with a bilingual audio feature) to run at the polling place on Election Day ($40,000).

Computerized voter registration system and verification requirements: To enhance and improve the current computerized voter registration system, the Board plans the following modifications: (1) create interactive links with the databases of other government agencies that accept voter registration applications to facilitate the electronic transfer of voter information, and (2) modify the database and the registration forms to accommodate the new identification information and other required voter registration changes ($500,000). In addition, to enhance compliance with the list-cleaning provisions of § 303 of HAVA, the Board will conduct a program to verify the data assignments ($50,000).

Voter education: In order to ensure full compliance with the new voting system requirements, the Board will conduct comprehensive voter education to ensure that voters understand how to operate the voting system properly. This program, which will be conducted in addition to the Board's regular outreach to voters, will include sending sample ballots and non-partisan information about the candidates and ballot measures. All registered voters will receive instructions about the process for recording, casting and replacing a ballot on both optical scan and DRE's, and information about their rights

under both local and federal law. This multi-media education effort will include $1,000,000 for production and distribution of special mailers and $500,000 for voter outreach through television and radio. The Board will also upgrade its website to allow for improved access to voter information, web-casting of voter information, and poll worker training ($200,000).

Poll worker recruitment and training: Recognizing that pollworker recruitment will be central to the success of election reforms, the Board will significantly increase resources for pollworker recruitment and training. To increase the number of poll workers per polling place, as required by the Plan, the Board will hire a recruiter and conduct an intensive recruitment campaign ($500,000). The Board will also enhance the pollworker training program to ensure that all Election Day workers understand both the new administrative procedures and the new voting systems ($1,000,000). The training will include hiring a trainer and producing a poll worker training video ($40,000). The cost for the additional pollworkers will be paid from title I funds ($90,000).

HAVA administration: To guarantee sound and effective implementation of the new rules and to improve all facets of election administration, the Board will institute new training requirements for Board staff. This training will cover voter registration, election administration, as well as the requirements under local and federal election law. In addition, the Board will institute a certification program for Board staff and provide other professional development opportunities ($300,000).

To conduct the programs described in the Plan, many of which are being undertaken for the first time, will require a significant boost in administrative resources. These resources will cover an organizational review, additional education, training, and changes in staffing and equipment. The Board estimates increasing its capacity by 20 percent in order to implement the new law and make changes called for in the Plan within the timeframe specified by law ($700,000).

To ensure accountability to the public, an evaluation committee will conduct an independent review and evaluation of the implementation of HAVA in the District of Columbia. This effort will include the development of a feedback mechanism to gauge voter responses to changes and innovations ($100,000).

Table 6 – Estimated Expenditures on Title III Requirements (FY03 – FY05)

	HAVA 101	HAVA 252	HAVA 261	5% match	total cost
§301 – Voting System Requirements					
Purchase of Sequoia Edge DREs		$355,470		$344,530	$700,000
Purchase of Sequoia Optech Eagle					$950,000*
§302 – Provisional Voting and Voter Information					
Toll-free telephone access system		$100,000			$100,000**
Voter information materials/equipment		$90,000			$90,000
§303 – Computerized voter registration and verification requirements					
Modification of database		$500,000			$500,000
Verification of data assignments		$50,000			$50,000
Voter Education					
Website overhaul	$200,000				$200,000
Mailings (production and mailing costs)***	$1,000,000				$1,000,000
Voter outreach campaign	$500,000				$500,000
Pollworker recruitment and training					
Recruitment campaign	$500,000				$500,000
Pollworker training		$1,000,000			$1,000,000
Pollworker training video		$40,000			$40,000
Additional pollworkers	$90,000				$90,000
HAVA administration					
Staff training and certification		$300,000			$300,000
Program management and capacity building (including staffing, travel, equipment and supplies)		$700,000			$700,000
Evaluation		$100,000			$100,000
Total	**$2,290,000**	**$3,235,470**		**$344,530**	**$5,870,000**

Notes on Table 6:

*Funding for the optical scan voting system was appropriated in FY01; the contract has not yet been finalized so this figure is approximate and included here for informational purposes and not included in the total.

**Creating the toll-free access system will be a modification to the computerized statewide database system; the amount is separated in this chart for informational purposes.

***The amounts for voter education include voter education efforts necessary for compliance with § 301 of HAVA – a targeted education effort to voters voting paper ballots without over-vote protection or ballot review – and discretionary voter education programs.

Estimated Expenditures for Improved Election Administration

Over and above implementing new federal requirements, the Board will use funding available under HAVA to modernize and improve key components of the District's election system by implementing the following changes.

Multi-lingual ballots: The Board intends to offer ballots in Spanish in every polling place beginning in 2004. The DRE systems will also be programmed to offer Spanish speakers the option of a Spanish-language ballot ($40,000).

Improved accessibility for voters with disabilities: The Board will use funds available from the Department of Health and Human Services under §261 of HAVA to (1) improve the accessibility of polling places ($15,000); (2) purchase aids for voters with disabilities ($30,000); (3) produce a training video and manual on the needs of voters with disabilities ($25,000); and (4) produce additional brochures and information for voters with disabilities ($30,000).

Improvements to polling place operations: To improve polling place operations and reduce the need for special ballots, the Board will provide access to the entire voter registration list at each polling place ($142,000). In addition, to facilitate the Election Day Change of Address and speedier voter intake, the Board will move to electronic poll books ($600,000).

Table 7 – Estimated Expenditures for Improved Election Administration (FY03 – FY05)

	HAVA 101	HAVA 252	HAVA 261	5% match	total cost
Multilingual Ballots					
Election materials	$40,000				$40,000
Polling place accessibility					
Improving accessibility of the polling place			$15,000		$15,000
Voting aids for voters with disabilities			$30,000		$30,000
Video & manual on needs of voters w/ disabilities			$25,000		$25,000
Information for voters with disabilities			$30,000		$30,000
Computerized voter registration list					
Electronic access to entire list at polling place	$142,000				$142,000
Electronic poll books		$600,000			$600,000
Total	**$182,000**	**$600,000**	**$100,000**		**$882,000**

Management of HAVA Funds[15]

The District of Columbia Board of Elections and Ethics is an independent agency that, historically, receives its funds from local revenue. Upon receiving the $5 million in title I funding, the District of Columbia's Chief Financial Officer ("CFO") established an interest-bearing treasury account for the management of all funds – both the federal funds and the local match – related to implementation of HAVA. This fund will consist of the following amounts:

- amounts appropriated by the District of Columbia for meeting the requirements of HAVA and other activities described in the Plan;
- amounts appropriated to the District of Columbia under title I and title II of HAVA;
- interest earned on the deposits.

These funds will be monitored for programmatic compliance by the CFO through the Office of Finance and Resource Management, which currently serves, by mutual

[15] *See* HAVA, Public Law No. 107-252, § 254(a)(5)(2002) (advising that the plan indicate "[h]ow the State will establish a fund described in subsection (b) for purposes of administering the State's activities under this part, including information on fund management").

agreement, as the Board's budget entity. The fund will be managed on behalf of the Board by the District of Columbia Treasurer. Consistent with the requirements of §902 of HAVA, the Treasurer will maintain records fully disclosing the amount and disposition of funds, the total cost of the project or undertaking supplied by other sources, and other records to facilitate an effective audit.

All requisitions related to activities for meeting the requirements and other activities defined in the Plan will be recorded as such for audit purposes. By regulation, any purchase above $25,000 by the Board will be transacted by the Office of Procurement and Contracts and will require an open bid process; the same limitation will hold for HAVA-related expenditures.

V. Ensuring Accountability to the Voters

Performance Goals and Measures[16]

While the Board is responsible for ensuring the success of HAVA implementation, the voters of the District of Columbia will be the final arbiters of success or failure in implementing the State Plan. Accordingly, the Board will seek the public involvement in an independent committee to evaluate the Board's implementation effort.

Following final adoption of the Plan, the Board will convene selected stakeholders in the District of Columbia elections process to participate in an evaluation committee charged with evaluating implementation of the Plan. As a part of this public process, the Board will develop a feedback mechanism to gauge public reactions to reforms implemented in the 2004 general election.

The evaluation committee, which will be supported by the Board, will develop criteria to evaluate the success in meeting the performance goals based on the requirements of title III that are described below. The evaluation committee will draft a report that will include recommendations for future elections. The evaluation committee will make the draft report publicly available and solicit public comment at a public hearing. This evaluation process will be conducted biennially until implementation of HAVA is complete.

[16] *See* HAVA, Public Law No. 107-252, § 254(a)(8) (2002) (advising that the plan include a description of "[h]ow the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met."

To evaluate the uniformity of implementation across the District of Columbia, the Board will develop an Election Day review process. Components of the review are described below.

Performance Element #1: Transition to HAVA-Compliant Voting Systems
The District of Columbia initiated the process of modernizing its voting systems prior to the 2002 elections. The 2004 General Presidential Election will inaugurate voting systems that are fully compliant with the voting system requirements in HAVA. Responsible official(s): Election Administration, Data Management.

Performance Goals	(1) Implement voter education program on use of the optical scan and DRE voting systems and, (2) ensure a smooth transition for new accessible voting systems.
Performance Measures	A feedback mechanism will gauge voter responses to the new voting systems (both the optical scan and the DRE systems) and educational information about their use. The evaluation committee will seek to measure the following: ▪ availability and usefulness of voter information on use of the machines; and ▪ quality of information on use of the machines.
Timeline	Implementation date: 2004 Presidential General Election

Performance Element #2: Administration of Special Ballots
While the District of Columbia already administers a provisional ballot process using special ballots, some of the details must be altered to make the process consistent with the requirement as described in HAVA. The provisional ballot application must be modified and a free-access system developed that will allow voters to access information on the disposition of their ballots. In addition, § 302 of HAVA requires that the Board post voter information detailed in the Plan at each polling place. Responsible official(s): Registrar of Voters; Data Management.

Performance Goal	Ensure no qualified voter is turned away without being given the opportunity to cast a ballot.
Performance Measures	(1) Develop reporting procedures to measure: ▪ number of special ballots cast at each polling place; ▪ number of special ballots accepted and rejected; ▪ reasons ballots were rejected;

	▪ number of voters who accessed toll-free information system. (2) An Election Day review will measure consistency and uniformity of administration practice across the jurisdiction.
Timeline	Implementation date: 2004 Presidential Primary

Performance Element #3: Modification of Voter Registration List and Verification Procedures
The District of Columbia currently maintains its voter files using a single, official, computerized database system that is updated in accordance with requirements established under the NVRA. The Board will verify all data assignments and the system will be modified to include the information required under § 303 of HAVA. Voter information will be matched against records maintained by the District of Columbia Department of Motor Vehicles prior to the 2004 Presidential Primary. The official list at the polling place will include the names of both inactive and active voters. Responsible official(s): Chief Technology Officer.

Performance Goals	Verify all data assignments. Modify registration database to include new required information fields. Match voter records against DMV records. Provide list of all registered voters, active and inactive, at polls on Election Day.
Performance Measures	(1) Develop reporting procedures to measure: ▪ accuracy of matches between voter list and DMV records; ▪ number of inactive voters allowed to vote special ballots. (2) An Election Day review will measure consistency of administrative practice across the jurisdiction.
Timetable	Implementation date: 2004 Presidential Primary. (Deadline for implementation of § 303 (a)(5) is January 2003.)

Performance Element #4: Verification of First-time Voters Who Register by Mail
Legislation is pending and administrative procedures are being modified to allow for the verification of the identity of first-time voters who register by mail. Responsible official(s): Registrar of Voters, Chief Technology Officer.

Performance Goal	Ensure smooth implementation of new registration and identification requirements.
Performance Measure	Develop reporting procedures to measure: ▪ the number of first-time, mail-in registrants verified prior to Election Day by matching voter information with other records; ▪ the number of such voters required to present ID at the polls; ▪ the number of such voters without required ID who cast a special ballot.
Timetable	Implementation date: 2004 Presidential Primary

Performance Element #5: Creating an Informed Electorate
Under § 301 of HAVA, the Board is required to educate voters on the use of voting systems. Under § 302 of HAVA, the Board is required to post voter information detailed in the Plan at each polling place. Beyond these minimum requirements for voter education, the Board will undertake multiple discretionary voter education activities outlined in the Plan. Responsible official(s): Election Administration; Public Information; Chief Technology Officer.

Performance Goal	Develop educational activities and materials to create an electorate that is better informed on how to participate in the elections process. Provide required information on administrative procedures and new voting systems in a voter-friendly and accessible format at each polling place.
Performance Measures	(1) Feedback mechanism will gauge voter responses to voter information and evaluate quality and availability of: ▪ pre-election day mailing of voter instructions and non-partisan 'Voter's Guide' on candidates and ballot measures; ▪ overhaul of the Board's website; ▪ the "How to Vote" instructional video. (2) An Election Day review will measure consistency of administration practice and posting of voter information across the jurisdiction.

Timeline	Implementation date: Mailers produced for both 2004 Presidential Primary and 2004 Presidential General Election; website overhaul and instructional video implemented prior to 2004 Presidential Primary.

Performance Element #6: Recruiting and Training Pollworkers
None of the above requirements that affect the conduct of elections can be carried out successfully without pollworkers who understand the new requirements and are prepared for the unique challenges presented by the 2004 election. Under the Plan, pollworkers will have additional duties. At the same time there will be more pollworkers to handle the new tasks. Responsible official: Election Administration.

Performance Goal	Conduct a vigorous campaign to recruit sufficient number of pollworkers. Design and conduct training to educate pollworkers on new voting systems and new administrative procedures.
Performance Measures	(1) Number of pollworkers recruited. (2) Beta testing will be used to evaluate training program and materials prior to full implementation. (3) An Election Day review will measure consistency of administrative practices across the jurisdiction. (4) The evaluation committee will review complaints registered on Election Day.
Timetable	Implementation date: 2004 Presidential Primary

Performance Element #7: Expanding the Capacity of the Board
The Board will institute new training requirements for Board staff and develop a certification program. This training will cover voter registration, election administration, as well as the requirements under local and federal election law. Responsible official(s): Election Administration; Resource Management.

Performance Goal	Develop a certification and training program for Board staff to assure compliance with federal and District law.
Performance Measures	(1) Evaluation of Board's financial record-keeping. (2) Evaluation of Board's adherence to procurement regulations and bid process. (3) Evaluation of Board's disclosure of financial records.

Timetable	Implementation date: 2006 General Election

Performance Element #8: HAVA Fund Management
Under HAVA, the Board will be subject to a federal audit of funds received. In addition, the evaluation committee will review the management of the funds received and expended to ensure their use was consistent with the Plan. Responsible official(s): Resource Management; Election Administration.

Performance Goal	Manage HAVA election reform fund in a manner consistent with accounting standards.
Performance Measures	(1) Evaluation of Board's financial record-keeping. (2) Evaluation of Board's adherence to procurement regulations and bid process. (3) Evaluation of Board's disclosure of financial records.
Timetable	Implementation date: April 2003 and continuing until resources are depleted.

Performance Element #9: Improving Access for Voters with Disabilities
The Board has been working with the Disability Rights Council to eliminate barriers to polling places for voters with disabilities. In addition, in the 2004 Presidential Primary, the Board will provide, for the first time, voting systems that are fully accessible to voters with disabilities. Responsible official: Logistical Support; Election Administration.

Performance Goal	Guaranteeing access to polling places and voting systems across the District of Columbia. Carrying out all activities described in the application for title II grant monies available under § 261 of HAVA.
Performance Measures	(1) Develop feedback mechanism to gauge response of the disability community to the new voting system, accessibility of the polling place, new voter aids, and the availability and quality of information to voters with disabilities. (2) Develop reporting procedures to record complaints from voters with disabilities concerning polling place access.
Timetable	Implementation date: 2004 Presidential Primary

Performance Element #10: Compliance with provisions under title VII for voters covered by the Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA).

In title VII, HAVA established new requirements for registering and corresponding with voters covered under UOCAVA. See Appendix B for a detailed listing of these provisions and how the Board plans to meet the new requirements. Responsible official(s): Registrar; Program Specialist, Voter Services.

Performance Goal	Tracking absentee ballots transmitted and received by voters after the general election (§703). Extending the absentee ballot application period for UOCAVA voters (§704). Informing overseas voters of reasons the registration application was rejected (§707).
Performance Measures	Develop reporting mechanism to track: • Absentee ballots sent to UOCAVA voters; • Mailings to UOCAVA voters.
Timetable	Report on overseas absentee ballots will be issued within 90 days after the 2004 Presidential Election; the requirement to extend the period covered by an absentee ballot request under UOCAVA will go into effect for the 2006 General Election; requirement to notify applicant of rejection and reason will be implemented within 20 days following the 2004 Presidential Election.

***Ongoing Management of the Plan*[17]**

The Plan provides a roadmap for implementation of HAVA in its entirety. The District of Columbia's Chief Election Official (CEO) will have primary responsibility for carrying out the elements of the Plan. This responsibility includes the following:

- meeting the timelines specified in the Plan;
- monitoring all expenditures and ensuring that costs do not exceed available funds;
- adhering to the process for amending the Plan described in § 254(a)(11) of HAVA;
- ensuring a process that is accountable and open to public scrutiny.

In addition, the CEO will implement any recommendations developed in the evaluation process described above.

***Enforcing HAVA*[18]**

In addition to providing an independent public process for evaluating the Board's efforts to implement the Plan, the Board intends to develop procedures for resolving complaints concerning the conduct of elections, the implementation of the new federal law and, in particular, alleged violations of the "Uniform and Non-Discriminatory Requirements" described in title III.

An Election-Day Hotline for Public Complaints
Continuing a practice established in previous elections, the Board will develop and staff special phone lines on Election Day to handle – and record – complaints from voters, candidates, party representatives and others concerning the conduct of the election. Reporting procedures will be developed to record complaints specific to implementation of HAVA. A post-Election Day examination of the complaint record will be included in the report of the evaluation committee.

Public Hearing Process for Alleged Violations of Title III of HAVA
A proposed rulemaking amends the District of Columbia Municipal Regulations to include the following procedure as required by § 402 of HAVA. Complainants alleging a violation of title III of HAVA by the CEO shall file notarized complaints with the Board. The Board may consolidate complaints if they relate to the same actions or events or raise common questions of law or fact.

At a public hearing, the Board will determine if there is a violation of any provision of title III of HAVA. If the Board determines a violation has occurred, it will provide an appropriate remedy. If the Board determines there is no violation, it will dismiss the complaint and publish the results of the hearing.

The Board is required to render final determinations regarding alleged violations prior to the expiration of the 90-day period that begins on the date the complaint is filed, unless the complainant consents to a longer period. If the Board fails to meet the applicable deadline, the complaint shall be resolved within 60 days by means of the alternative dispute resolution process described below.

[17] *See* HAVA, Public Law No. 107-252, § 254(a)(11) (2002) (advising that the plan describe "[h]ow the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change – (A) is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan; (B) is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and (C) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).")

[18] *See* HAVA, Public Law No. 107-252, § 254(a)(9) (2002) (advising that the plan describe "the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402.")

Alternative Dispute Resolution Process

If the Board fails to resolve an alleged violation of HAVA under title III, the Board's proposed rulemaking establishes alternative dispute resolution procedures as required under § 402 of HAVA. The CEO and the complainant will each select an arbiter who shall jointly agree on a third arbiter. Following a review of the record, the panel of arbiters shall determine an appropriate resolution by a majority vote within 60 days. The final decision will be published on the Board's website and mailed to the complainant.

Appendix A

D.C. State Planning Committee

In March of 2003, the Board invited citizens and representatives of organizations with a stake in elections in the District of Columbia to become part of the D.C. State Planning Committee. The Planning Committee was charged with producing a roadmap for implementing HAVA and for the future of elections in the District of Columbia.

Subcommittees developed recommendations on voting systems, voter registration, voter education, pollworker recruitment and training, and accessibility to the electoral process by voters with disabilities. These recommendations can be found on the Board's website at http://www.dcboee.org. The subcommittee recommendations form the core of the Plan.

Following publication of the Preliminary Plan in the *District of Columbia Register*, the Board solicited and received public comments both in writing and at a public hearing held on July 5th. The Preliminary Plan was also posted on the Board's website. Following the one-month comment period, the Board reviewed all comments and incorporated suggested changes. A final version of the Plan will be published in the *Federal Register*, as required in § 256 of HAVA.

Protecting the Voting Rights of Military Members and Overseas Citizens

In addition to the requirements of title III, title VII of HAVA includes new requirements for the administration of absentee ballots for military and overseas citizens. The following table describes the status of compliance in the District of Columbia with title VII requirements.

Table 8 – Compliance with Title VII Requirements	Compliant	Not Compliant	Actions Needed for Compliance
Section 703. Report on Absentee Ballots Transmitted and Received After General Elections (a) Section 102 of the Uniformed and Overseas Citizens Absentee Voting Act (42 U.S.C. 1973ff-1), as amended by section 702, is amended by adding at the end the following new subsection: '(c) Report on number of absentee ballots transmitted and received. Not later than 90 days after the date of each regularly scheduled general election for Federal office, each State and unit of local government which administered the election shall (through the State, in the case of a unit of local government) submit a report to the Election Assistance Commission (established under the Help America Vote Act of 2002) on the combined number of absentee ballots transmitted to absent uniformed services voters and overseas voters for the election and the combined number of such ballots which were returned by such voters and cast in the election, and shall make such report available to the general public.'.		X	Legislation is pending to meet this requirement.

Table 8 – Compliance with Title VII Requirements	Compliant	Not Compliant	Actions Needed for Compliance
Section 704. Extension of Period Covered by Single Absentee Ballot Application The Uniformed and Overseas Citizens Absentee Voting Act (42 U.S.C. 1973ff-1), as amended by section 1606(b) of the National Defense Authorization Act for Fiscal Year 2002 is amended by requiring that such voters remain registered through the next 2 regularly scheduled general elections for Federal office (including any runoff elections which may occur as a result of the outcome of such general elections), and receive ballots for each such subsequent election.		X	Legislation and proposed rulemaking to meet this requirement are pending.
Section 706. Prohibition of Refusal of Voter Registration and Absentee Ballot Applications on Grounds of Early Submission (a) The Uniformed and Overseas Citizens Absentee Voting Act as amended by section 1606(b) of the National Defense Authorization Act for Fiscal Year 2002 is amended by adding at the end the following new subsection: (e) PROHIBITION OF REFUSAL OF APPLICATIONS ON GROUNDS OF EARLY SUBMISSION- A State may not refuse to accept or process, with respect to any election for Federal office, any otherwise valid voter registration application or absentee ballot application (including the postcard form prescribed under section 101) submitted by an absent uniformed services voter during a year on the grounds that the voter submitted the application before the first date on which the State otherwise accepts or processes such applications for that year submitted by absentee voters who are not members of the uniformed services.'.	X		
Section 707. Other Requirements to Promote Participation of Overseas and Absent Uniformed Services Voters The Uniformed and Overseas Citizens Absentee Voting Act, as amended by the preceding provisions of this title, is amended by adding at the end the following new subsection: (d) REGISTRATION NOTIFICATION- With		X	Legislation and proposed rulemaking to meet this requirement are pending.

Table 8 – Compliance with Title VII Requirements	Compliant	Not Compliant	Actions Needed for Compliance
respect to each absent uniformed services voter and each overseas voter who submits a voter registration application or an absentee ballot request, if the State rejects the application or request, the State shall provide the voter with the reasons for the rejection.			

Appendix C

Glossary of Terms

Chief Election Official (CEO): Executive Director of the District of Columbia Board of Elections and Ethics.

District of Columbia Board of Elections and Ethics ("Board"): the independent agency charged with administering elections in the District of Columbia.

District of Columbia State Planning Committee: the District of Columbia State Planning Committee, a body comprised of stakeholders in District elections (see Appendix A). The Planning Committee was charged with making recommendations for implementation of HAVA in the District of Columbia

District of Columbia Voters' Rights Notice: This document, to be produced by the Board, will provide information on voting rights under applicable Federal and District laws (the District of Columbia Voter's Rights Notice), including information on the right of an individual to cast a provisional (special) ballot and instructions on how to contact the appropriate officials if these rights are alleged to have been violated.

Election Assistance Commission (EAC): HAVA establishes a new federal agency to administer the funds authorized and to provide voluntary guidance on the new federal requirements. The bi-partisan Commission is made up of four full-time members appointed by the President.

Federal Election Commission (FEC): Under the National Voter Registration Act, the Federal Election Commission's Office of Election Administration provides guidance on NVRA, administers the voluntary Voting System Standards and the federal mail-in registration form. This office will be transferred to the new Election Assistance Commission once established.

National Voter Registration Act (42 U.S.C. § 1973gg et seq.): The National Voter Registration Act (NVRA), enacted in 1993, sought to expand the opportunity to register by requiring states to allow voters to register at the department of motor vehicles and other social service agencies to accept voter registration applications by mail.

Provisional voting: A form of voting in which a voter whose eligibility is in question casts a ballot that is counted once eligibility has been determined. In the District of Columbia, these voters cast "special ballots."

State Plan: HAVA requires that states develop, in consultation with the Planning Committee (see above), a plan for how it will achieve compliance with the requirements of HAVA using HAVA-authorized funds.

Statewide voter registration list: a single, computerized database for storing and managing the records of all legally registered voters managed and administered at the state level. In the District of Columbia, this list contains the names of all legally registered voters in the District.

Title I Funds: Under title I of HAVA, Congress authorized $650 million in money to be administered through the General Services Administration to pay for replacing punch card and lever machines and to make immediate improvements in election administration. Each state was guaranteed a minimum of $5 million under this title.

Title II Funds: Under Title II of HAVA, Congress authorized $3 billion to be allocated to the states according to a formula based on voter population. These "requirements payments" are administered by the Election Assistance Commission once established. The funds are to be used to bring states into compliance with the new federal requirements.

Uniformed and Overseas Citizens Absentee Voting Act (42 U.S.C. 1973ff-1 et seq.): This law established certain requirements to protect the rights of military and overseas voters by allowing them to register and vote absentee.

State of Florida HAVA State Plan Chart 71

STATE OF FLORIDA
DEPARTMENT OF STATE

JEB BUSH
Governor

GLENDA E. HOOD
Secretary of State

July 21,2003

Dear Election Assistance Commission:

As Chief Election Officer of the State, I am pleased to present the State of Florida HAVA Plan developed pursuant to the Help America Vote Act of 2002. This plan represents Florida's long-range plan for implementing the federal Act, which requires all states to significantly reform the way they conduct elections. As the plan indicates, Florida has already met many of the requirements of HAVA.

Florida's plan was developed through the Help America Vote Act Planning Committee, a group of dedicated individuals representing various constituency groups throughout the State. The plan sets forth the goals of achieving compliance with HAVA and for continuing to improve the elections process in the State of Florida. I commend the Committee for its hard work and diligence in producing the Plan.

As part of the Plan, the Committee was tasked with developing a budget based on the projected federal funds that the State would receive. The Committee considered only those funds projected to be received for the 2003 federal fiscal year. I, along with other election officials throughout the State, encourage Congress to continue the necessary funding to fully implement the requirements of HAVA. Both the State and counties have already spent significant funds to replace outdated voting systems. HAVA allows certain reimbursements for these expenditures and I fully support reimbursement to the State and counties where permissible under the Act. We will continue to examine the possibility of further reimbursement to the state as permitted by HAVA.

This plan recognizes that additional resources are required in order for our Supervisors of Elections to provide continuing voter education to the citizens of the State, to recruit qualified poll workers, and to provide the necessary training for those workers. As Chief Election Officer, I am committed to working closely with and supporting our Supervisors as we continue to ensure Florida voters have every confidence that their vote counts.

Florida will revise and update the plan as necessary to reflect the progress made in implementing HAVA and to chart the future goals and plans for elections. We look forward to continuing our election reform efforts to make this state the model for elections reform throughout the nation.

Glenda E. Hood

Introduction

Since the aftermath of the General Election of 2000, Florida has led the nation in its election reform efforts to ensure that every registered voter should have the opportunity to vote and to ensure that every vote counts.

The goal is perfection. Reaching that goal in an ever changing democracy and within a diverse population is an ongoing task that requires constant experimentation and learning. The people and the leadership of Florida have dedicated themselves to this course of action.

The struggle for improving our election process reveals itself in many ways. Citizens have increased their involvement by serving on local and State election task forces, researching new voting technologies, debating new standards for poll worker training, increasing voter education opportunities, and registering new voters. The people of Florida continue to make election reform a top priority.

The leadership of Florida has also acted decisively. Florida has enacted legislative and local reforms during the last two years that lead the nation. These reforms include cutting-edge voting system standards, millions of dollars for new voting technology, expanded voter education efforts, and thousands of newly trained poll workers. A statewide poll taken the day of the 2002 General Election found that Floridians gave high marks to the election reform changes including a 91% "excellent-good" rating for poll workers and an 88% confidence rating from voters that their votes will count. These results are not "perfect," but Florida is moving in a positive direction to make all facets of the election process better each time an election is held.

With the passage and signing of the Help America Vote Act of 2002 (HAVA) on October 29, 2002, election reform will spread throughout the nation. The new federal law asks States to develop election reform plans that will improve election administration in many areas. Florida embraces the new federal law and hopes that other States will use it as an opportunity to share new election reform ideas and practices with one another.

The people of Florida have learned many things about election reform. Yet, there are enduring principles which are reflected within many recommendations and changes of Florida's election reform efforts. These principles were developed by Florida's first task force in the aftermath of the 2000 General Election:

Enduring Principles of Elections

- **Elections are first and foremost acts of millions of individual people: citizens who register and vote; candidates who offer themselves and their platforms for public**

judgment; poll workers who put in long days at precincts; and election officials who supervise the process. Honest, responsible, intelligent people will make most technology systems work well.

- **Voting should be a simple, convenient and friendly process that encourages each citizen to express his or her choices.**
- **Voting systems should be designed to determine voter intent, to the extent that is humanly possible.**
- **Voting methods for statewide and national elections should meet uniform standards and national standards for fairness, reliability and equal protection of voting opportunity.**
- **Elections must meet two competing objectives: certainty (making every vote count accurately) and finality (ending elections so that governing can begin).**
- **While voting should be individual and private, procedures for counting and challenging votes should be open, transparent, and easily documented to ensure public confidence in the results.**

Fulfilling the promises of these enduring principles will require continued vigilance and action. With this HAVA Plan, Florida continues its journey to mount an increasingly open and fair system of determining the will of the people.

The Help America Vote Act of 2002 requires all States to develop and implement a statewide plan. Listed below are the thirteen primary elements that must be addressed in the plan.

Help America Vote Act of 2002 (HAVA)
Public Law 107-252 – October 29, 2002

SEC. 254. STATE PLAN.
(a) IN GENERAL.—The State plan shall contain a description of each of the following:

Element 1.

How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Element 2.

How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of—

A) The criteria to be used to determine the eligibility of such units or entities for receiving the payment; and
B) The methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8).

Element 3.

How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III.

Element 4.

How the State will adopt voting system guidelines and processes which are consistent with the requirements of section 301.

Element 5.

How the State will establish a fund described in subsection (b) for purposes of administering the State's activities under this part, including information on fund management.

Element 6.

The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on —

A) The costs of the activities required to be carried out to meet the requirements of Title III;
B) The portion of the requirements payment which will be used to carry out activities to meet such requirements; and
C) The portion of the requirements payment which will be used to carry out other activities.

Element 7.

How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.

Element 8.

How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria,

and a description of which official is to be held responsible for ensuring that each performance goal is met.

Element 9.

A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402.

Element 10.

If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

Element 11.

How the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change —

A) Is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;

B) Is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and

C) Takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).

Element 12.

In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year.

Element 13.

A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the committee under such section and section 256.

Element 1. Use Of Title III Requirements Payments:
A. Voting Systems

How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Introduction

Following the 2000 General Election, the people of Florida made a concerted effort to improve all facets of its election procedures, standards and voting systems. The first major changes were the recommendations advanced by the 2001 Governor's Select Task Force on Election Procedures, Standards and Technology followed by the passage of the Florida Election Reform Act of 2001. A central component of Florida's new election law mandated the replacement of punch card voting systems, lever machines, paper ballots and central count optical scanning systems with precinct tabulated Marksense voting systems or the Direct Recording Electronic voting systems. The new voting systems were put into service to reduce voter error, to improve tabulation accuracy, and to restore voter confidence in Florida's elections.

Florida has adopted voting system standards which meet and exceed standards established by the Federal Election Commission. Florida's voting system standards are reviewed every two years to determine whether they are adequate and effective in carrying out fair and impartial elections. The Bureau of Voting Systems Certification within the Department of State has statutory authority to adopt rules which establish minimum standards for voting systems purchased and used in Florida. Florida's 67 counties have authority to purchase and to maintain the appropriate certified voting system for their registered voters. During the last two years, the State of Florida has provided $24 million to assist counties in purchasing new certified voting systems.

Only two types of voting systems are certified for use in Florida's 67 counties— Direct Recording Electronic (DRE or "touchscreen") voting systems and Marksense with precinct-based tabulation.

There are three manufacturers who have certified voting systems for use in Florida: Diebold; Elections Systems and Software, Inc. (ES&S); and Sequoia Voting Systems, Inc. (SP). Members of the HAVA Planning Committee noted that the certified Diebold voting system currently does not allow visually impaired voters to independently or to privately vote and this is addressed later under Section 301(a)(3)(A) and Section 301(a)(3)(B). The following chart details the types of voting systems used in Florida, the respective manufacturer, and the number of counties using the voting systems.

**DRE Voting Systems ("touchscreen")
And Number of Florida Counties in Use
For Precinct Voting**

DRE VOTING SYSTEM MANUFACTURER	COUNTIES (PRECINCT VOTING)

TOTAL	52	67

The Help America Vote Act of 2002 (HAVA) establishes new minimum requirements for administering federal elections. These new voting system requirements are found in Title III of the federal law. The new requirements shape the performance and the administration of voting systems. Florida is in compliance with many of these new federal directives and these are addressed in the HAVA State Plan.

Section 301(a) of HAVA requires that Florida's voting systems meet the following requirements by January 1, 2006. Florida will be in compliance with all of these requirements by the federal deadline of January 1, 2006.

Section 301(a) Voting System Standards and Requirements

Section 301(a)(1)(A)(i): Do Florida's voting systems permit the voter to verify in a private and independent manner the votes selected by the voter before the ballot is cast and counted?

Yes, and no further actions are required.
Section 101.5606(1), *Florida Statutes*, states that no voting system in Florida shall be approved by the Department of State unless it "permits and requires voting in secrecy."

Florida Voting System Standards (April 2002) state that "the voter must be able to review the candidate selections, which he or she has made. Prior to the act of casting a ballot, the voter must be able to change any selection previously made and confirm the new selection." (p. 21)

Florida Voting System Standards (April 2002) state that the voting function standards applicable to all Electronic Voter Interfaces must provide "after the initial instructions, which the system requires election officials to provide to each voter, the voter should be able to independently operate the voter interface through the final step of casting a ballot without assistance." (p. 20)

Section 301(a)(1)(A)(ii): Do Florida's voting systems provide the voter with the opportunity in a private and independent manner to change the ballot or correct any error before the ballot is cast and counted (including the opportunity to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct the error)?

Yes, and no further actions are required.
Florida Voting System Standards (April 2002) state that "the voter must be able to review the candidate selections, which he or she has made. Prior to the act of casting a ballot, the voter must be able to change any selection previously made and confirm the new selection." (p. 21)

Section 101.5606(12), *Florida Statutes*, requires that electronic voting systems should "permit each voter to change his or her vote for any candidate or upon any question appearing on the official ballot up to the time that the voter takes the final step to register his or her vote and to have the vote computed."

Section 101.5608(2)(b), *Florida Statutes*, requires that "Any voter who spoils his or her ballot or makes an error may return the ballot to the election official and secure another ballot, except that in no case shall a voter be furnished more than three ballots. If the vote tabulation device has rejected the ballot, the ballot shall be considered spoiled and a new ballot shall be provided to the voter unless the voter chooses to cast the rejected ballot. The election official, without examining the original ballot, shall state the possible reasons for the rejection and shall provide

instruction to the voter pursuant to s. 101.5611. A spoiled ballot shall be preserved, without examination, in an envelope provided for that purpose. The stub shall be removed from the ballot and placed in the envelope."

Section 101.5611(1), *Florida Statutes*, requires that the "supervisor of elections shall provide instruction on the proper method of casting a ballot for the specific voting system utilized in that jurisdiction. Such instruction shall be provided at a place which voters must pass to reach the official voting booth."

Section 301(a)(1)(A)(iii): If the voter selects votes for more than one candidate for a single office, do Florida's voting systems: (1) notify the voter that the voter has selected more than one candidate for a single office on the ballot; (2) notify the voter before the ballot is cast and counted of the effect of casting the multiple votes for the office; and (3) provide the voter with the opportunity to correct the ballot before the ballot is cast?

Yes, and no further actions are required.
Section 101.5606(3), *Florida Statutes*, requires voting systems to immediately reject "a ballot where the number of votes for an office or measure exceeds the number which the voter is entitled to cast or where the tabulating equipment reads the ballot as a ballot with no votes cast."

Section 101.5606(4), *Florida Statutes*, requires that systems using paper ballots accept a rejected ballot if the voter chooses to cast the ballot after it has been rejected, but the ballot will record no vote for any office that has been overvoted or undervoted.

Section 101.5608(2)(b), *Florida Statutes*, provides that "Any voter who spoils his or her ballot or makes an error may return the ballot to the election official and secure another ballot, except that in no case shall a voter be furnished more than three ballots. If the vote tabulation device has rejected the ballot, a ballot shall be considered spoiled and a new ballot shall be provided to the voter unless the voter chooses to cast the rejected ballot. The election official, without examining the original ballot, shall state the possible reasons for the rejection and shall provide instruction to the voter pursuant to s. 101.5611. A spoiled ballot shall be preserved, without examination, in an envelope provided for that purpose. The stub shall be removed from the ballot and placed in an envelope."

Section 101.5611(1), *Florida Statutes*, requires that the "supervisor of elections shall provide instruction on the proper method of casting a ballot for the specific voting system utilized in that jurisdiction. Such instruction shall be provided at a place which voters must pass to reach the official voting booth."

Florida Voting System Standards (April 2002) state that "the system must prevent the voter from over voting any race." In addition, "there must be a clear, identifiable action, which the voter takes to 'cast' the ballot. The system must make clear to the voter how to take this action, such that the voter has minimal risk of taking the action accidentally, but when the voter intends to cast the ballot, the action can be easily performed." (p. 21)

Florida Voting System Standards (April 2002) state that "Marksense systems shall reject blank ballots and ballots with overvoted races. Electronic voter interfaces shall prevent a voter from overvoting a race, and shall provide a means of indicating, to the voter, any races that may have been undervoted before the last step necessary to cast the ballot." (p. 22)

Section 301(a)(1)(B): Does Florida's mail-in absentee and mail-in ballot process meet the requirements of subparagraph (A)(iii) by: (i) establishing a voter education program specific to that voting system that notifies each voter of the effect of casting multiple ballots for an office; and (ii) providing the voter instructions on how to correct the ballot before it is cast and counted (including instructions on how to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error)?

Partially meets, and further actions are required.

The Florida Legislature has amended Section 101.65, *Florida Statutes*, to require the instructions for absentee voters to include the following language:

Mark only the number of candidates or issue choices for a race as indicated on the ballot. If you are allowed to "Vote for One" candidate and you vote for more than one candidate, your vote in that race will not be counted.

Planned action before January 1, 2006:
In addition, the Division of Elections will update Rule 1S-2.032, *Florida Administrative Code (F.A.C.)*, (Uniform and General Election Ballot Design) which will make it clear to absentee voters how to correct their ballots and how to request a replacement ballot if the voter is unable to change or correct the original ballot.

The HAVA Planning Committee also suggested that absentee voters should be given clear notification that the deadline for submitting absentee ballots is by 7:00 p.m. of election night and that mailing the ballot may not ensure that it will arrive in time to be counted.

Section 301(a)(1)(C): Does Florida's absentee and mail-in ballot process preserve the privacy of the voter and the confidentiality of the ballot?

Yes, and no further actions are required.
Section 101.65, *Florida Statutes*, requires supervisors of elections to enclose with each absentee ballot a separate printed instruction form, a secrecy envelope, a Voter's Certificate and a mailing envelope. The instructions provide the following guidelines:

- Mark your ballot in secret as instructed on the ballot. You must mark your own ballot unless you are unable to do so because of blindness, disability, or inability to read or write.
- Place your ballot in the enclosed secrecy envelope.
- Insert your secrecy envelope into the enclosed mailing envelope which is addressed to the supervisor.

Section 101.68(2)(d), *Florida Statutes,* contains a detailed policy and procedure instructing the local canvassing boards in the manner of handling absentee ballots to ensure that the confidentiality of the ballot is maintained.

Section 301(a)(2)(A): Do Florida voting systems produce a record for audits?

Section 301(a)(2)(B): Do the voting systems produce a permanent paper record with a manual audit capacity?

Section 301(a)(2)(C): Is the paper record produced in subparagraph (A) available as an official record for any recount conducted with respect to any election in which the system is used?

Yes, and no further actions are required.
The HAVA Planning Committee determined through research conducted by staff, through testimony offered by Congressional staff, and through testimony given by staff from the Division of Elections that Florida complies with the HAVA audit requirement. Florida voting system standards require DRE machines to maintain a random sorted file of ballot images for every vote cast, and they also have to maintain detailed logs for each election from the time they are first programmed for an election until the results are copied to archival media. Certified voting systems in Florida are required to print out a paper tape of summary totals in each precinct. The paper record is produced to reconcile the consolidated totals for the county in the event of a recount.

Staff from the Division of Elections testified before the HAVA Planning Committee that Florida's State and local security measures make it highly unlikely any tampering could take place with the voting systems. In addition, staff also testified that Florida's certified voting

systems are tested in public forums for logic and accuracy before the election. There are also thorough procedural and security controls in place at the local level to safeguard against someone tampering with the voting systems. The Division of Elections' staff cited Rule 1S-2.015(5)(m)3.a., *F. A. C.*, relating to minimum election security procedures which requires the "printing of precinct results and results from individual tabulating devices" for every election. In addition, the Florida Legislature has authorized the Department of State to promulgate rules which would require supervisors to check those paper totals against electronic totals during machine recounts. The following statutes and rules lay the groundwork for Florida's ability to comply with the audit requirements of HAVA:

Section 101.015(5)(a), *Florida Statutes*, requires the Department of State to adopt rules which establish standards for voting systems, including audit capabilities.

Section 101.5606(11 & 13), *Florida Statutes*, requires the Department of State to approve only voting systems that are capable of automatically producing precinct totals in printed, marked, or punched form or a combination thereof. The voting systems must be capable of providing records from which the operating system of the voting system may be audited.

Florida Voting System Standards (April 2002) provide general functional requirements of voting systems which "shall include the capability to produce records, generated by the system components, or in some cases, by the system operators from which all operations may be audited. Except for the storage of vote images, which shall be maintained in a random sequence, the records shall be created and maintained in the sequence in which the operations were performed." (pp. 16-17)

Florida Voting System Standards (April 2002) require precinct count systems to provide a means for obtaining a printed report of the votes counted on each voting device, and to provide a means for extracting this information to a transportable memory device or data storage medium. (p. 23)

Florida Voting System Standards (April 2002) require the generation of reports by the system to be performed in a manner which does not erase or destroy any ballot image, parameter, tabulation or audit log data. The system shall provide a means for assuring the maintenance of data integrity and security for a period of at least 22 months after the closing of the polls. (p. 24)

Section 102.166(5)(d), *Florida Statutes*, requires the Department of State to adopt detailed rules prescribing additional manual recount procedures for each certified voting system which shall be uniform to the extent practicable. The rules shall address, at a minimum, the following areas:

- Security of ballots during the recount process
- Time and place of recounts
- Public observance of recounts

- Objections to ballot determinations
- Record of recount proceedings
- Procedures relating to candidate and petitioner representatives

Section 301(a)(3)(A): Does Florida have certified voting systems for individuals with disabilities, including non-visual accessibility for the blind and visually impaired, in a manner that provides the same opportunity for access and participation (including privacy and independence) as for other voters?

Section 301(a)(3)(B): Does Florida meet the requirement in subparagraph (A) through the use of at least one direct recording electronic voting system or other voting system equipped for individuals with disabilities at each polling place?

Partially meets, and further actions are required.
In 2001, the Secretary of State appointed a task force to conduct a comprehensive review of Florida's election laws and procedures. The task force recommended legislation to insure that Florida's voters with disabilities could fully exercise their right to a secret ballot, as guaranteed by Florida's Constitution. Many of the recommendations of the task force were passed by the Legislature and signed into law by Governor Bush in 2002 and are found in Chapter 2002-281, *Laws of Florida*. Several sections of the law, including sections setting forth specific standards that voting systems must meet, did not become effective immediately, however. They were made contingent on further appropriations by the Legislature, in expectation of the receipt of federal funding as now provided in HAVA.

Most of Florida's largest populated counties have voluntarily purchased voting systems that comply with the accessibility requirements of HAVA. However, Florida's uniform standards regarding voting system requirements (Section 101.56062, *Florida Statutes*), including one accessible machine per precinct, will be effective only when the Florida Legislature adopts a mechanism for funding this law. As a result, the current practice leaves it up to each county to determine how and where such accessible systems are deployed. This does not comply with the requirements of HAVA. Further, there is no statutory or regulatory requirement, beyond the constitutional mandate referred to above, that requires the other counties to comply with the accessibility standards.

HAVA requires that all voting systems be accessible to persons with disabilities, but does not specifically define what is required to accomplish this. HAVA's definition of what constitutes a voting system, however, found in Section 301(b), is comprehensive. Florida has already done the difficult and time consuming work of defining what makes a Florida voting system accessible for persons with disabilities and these standards are found in Chapter 2002-281, *Laws of Florida*. However, as noted above, many sections are not currently in effect. Some slight additional changes to Florida law will need to be made to include provisional ballots, which HAVA

requires to be accessible, within Florida's accessibility requirements.

Not only has Florida already enacted much of the required accessibility reforms required by HAVA, but the intent of the Legislature to comply fully with Federal requirements is clearly set out in statute. Section 101.56063, *Florida Statutes*, provides that:

> It is the intent of the Legislature that this state be eligible for any funds that are available from the Federal Government to assist states in providing or improving accessibility of voting systems and polling places for persons having a disability. Accordingly, all state laws, rules, standards, and codes governing voting systems and polling place accessibility must be maintained to ensure the state's eligibility to receive federal funds. It is the intent of the Legislature that all state requirements meet or exceed the minimum federal requirements for voting systems and polling place accessibility.

What is left to do in order to comply with HAVA is to make all sections of Chapter 2002-281, *Laws of Florida*, effective. Without making these sections effective, and thus making Florida's voting systems accessible to people with disabilities, Florida will not comply with this requirement of HAVA and will not be able to certify its compliance in order to draw down all available HAVA funds. Making these sections effective requires legislative action. Failure by the Legislature to take action will result in Florida not being able to qualify for all available HAVA funds.

In addition to the above, Florida must take steps now in the certification and system procurement processes to insure that it is able to meet the HAVA requirements in time. HAVA requires that voting systems themselves, not just Florida law, must meet the accessibility requirements by January 1, 2006. The HAVA Planning Committee heard testimony from Division of Elections' staff who cautioned that Florida cannot compel any voting systems vendor to bring equipment to the State for certification. Staff testimony further noted that the lack of available certifiable equipment has been a significant problem in the past that continues to the present. With the proper incentives for vendors and tools for counties to require compliance with accessibility standards, Florida will be able to comply with HAVA requirements by January 1, 2006.

Accordingly, the HAVA Planning Committee recommends that the Division, beginning July 1, 2003, require that all new certified voting systems comply with the requirements of Section 101.56062, *Florida Statutes*. Further, any purchase of a voting system by a governmental entity after July 1, 2003 should be required to include a contract for future upgrades and sufficient equipment to meet the requirements of Section 101.56062 and Section 101.5606, *Florida Statutes*. Finally, all voting systems in use as of January 1, 2006, should be required to be both certified to meet, and be deployed in a configuration that meets, the requirements of Section 101.56062 and Section 101.5606, *Florida Statutes*.

For Florida to comply with HAVA and to be eligible for federal funds pursuant to HAVA, action by the Legislature should include the following specific recommendations of the HAVA Planning Committee:

1. Trigger the disability accessibility standards found in Chapter 2002-281 by either:

A. Enacting specific language in the budget that meets the requirements of Section 22, Chapter 2002-281 and appropriates funds to the Department of State for distribution to the counties for the specific purpose of funding Chapter 2002-281; or

B. Enacting a HAVA Implementation Bill that provides that Sections 4, 5, 6, 8, 9, 10, 11, 14, and 19 Chapter 2002-281, be effective no later than January 1, 2006, and that Section 12 of Chapter 2002-281 is effective on January 1, 2006.

2. Mandating that provisional ballots for voters with disabilities shall be provided to them by a system that meets the requirements of section 101.56062, *Florida Statutes,* by January 1, 2006.

3. Enact a HAVA Implementation Bill requiring:

A. All electronic and electromechanical voting systems certified by the State after July 1, 2003, must meet the requirements of Section 101.56062, *Florida Statutes,* (except subsection (1)(d), which is exempted in the statute);

B. Any purchase of a voting system by any county, municipality or by the State after July 1, 2003 must include a contract for future upgrades and sufficient equipment to meet the requirements of Section 101.56062 and Section 101.5606, *Florida Statutes*; and

C. All electronic and electromechanical voting systems in use on or after January 1, 2006 must be certified to meet and be deployed in a configuration which meets the requirements of Section 101.56062 and Section 101.5606, *Florida Statutes.*

The recommended budget proposed under Element 6 of this plan recommends using a portion of the requirements payments to become compliant with the disability voting system requirements.

Section 301(a)(3)(C): Will Florida purchase voting systems with funds made available under Title II on or after January 1, 2007, that meet the voting system standards for disability access (as outlined in this paragraph)?

Yes, and no further actions are required.

Section 301(a)(4): Does Florida have certified voting systems that provide alternative language accessibility pursuant to the requirements of Section 203 of the Voting Rights Act of 1965 (42 U.S.C. 1973aa-1a)?

Yes, and no further actions are required.
In order to be certified for use in Florida, DRE voting systems must provide alternative language accessibility for all interfaces in order to meet the requirements of Section 203 of the Voting Rights Act of 1965 (42 U.S.C. 1973aa through 1a). Florida Voting System Standards (April 2002) require that all configurations must support all voter interface functions in at least the following languages: English, Spanish, and Haitian Creole. (p. 22)

Counties using Marksense voting systems must meet the requirements of Section 203 of the Voting Rights Act of 1965 (42 U.S.C. 1973aa through 1a) by printing ballots in the required languages.

Section 301(a)(5): Does Florida have certified voting systems that comply with the error rate standards established under section 3.2.1 of the voting systems standards issued by the Federal Elections Commission which are in effect on the date of the enactment of this Act?

Yes, and no further actions are required.
Florida Voting System Standards (April 2002) contain voting system accuracy standards which exceed the error standards established by the Federal Elections Commission. (pp. 35-36)

Section 301(a)(6): Has Florida adopted uniform and nondiscriminatory standards that define what constitutes a vote and what will be counted as a vote for each category of voting systems used in the State?

Yes, and no further actions are required.
Section 102.166(5)(a), *Florida Statutes*, states that "a vote for a candidate or ballot measure be counted if there is a clear indication on the ballot that the voter has made a definite choice."

Section 102.166(5)(b), *Florida Statutes*, requires the Department of State to "adopt specific rules for each certified voting system prescribing what constitutes a 'clear indication on the ballot that the voter has made a definite choice.' The rules may not:

1. Exclusively provide that the voter must properly mark or designate his or her choice on the ballot; or
2. Contain a catch-all provision that fails to identify specific standards, such as 'any other mark or indication clearly indicating that the voter has made a definite choice.'"

Rule 1S-2.027, *F. A. C.*, entitled "Clear Indication of Voters Choice on a Ballot" provides specific standards for determining votes on optical scan ballots.

Element 1. Use of Title III Requirements Payments: B. Provisional Voting and Voting Information

How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Section 302(a) Provisional Voting Requirements
The Help America Vote Act of 2002 (HAVA) requirements for provisional voting state that if an individual declares that he or she is a registered voter in the jurisdiction in which they are attempting to vote but their name does not appear on the official list of eligible voters, they are to be permitted to cast a provisional ballot.

Section 302(a)(1) Do Florida's election laws require election officials at the polling place to notify individuals that they may cast a provisional ballot?

Yes, and no further actions are required.
Section 101.031(2), *Florida Statutes*, states that the supervisor of elections in each county shall have posted at each polling place in the county the Voter's Bill of Rights and Responsibilities. Included in the Voter's Bill of Rights is the right of each registered voter to cast a provisional ballot, if his or her registration is in question.

The Division of Elections' Polling Place Procedures Manual instructs pollworkers to read informational signs that appear in print on the walls of the polling place and to offer magnifying sheets for visually impaired voters.

In addition, modifications to Section 101.043(3), *Florida Statutes*, were included in Chapter 2003-415, *Laws of Florida*, which is effective January 1, 2004. This change provided that certain first-time voters would be allowed to vote a provisional ballot.

Section 302(a)(2) Do Florida's election laws state that any person attempting to vote whose name does not appear on the official list of eligible voters be permitted to cast a provisional ballot at the polling place upon the execution of a written affirmation by the individual that they are: (A) a registered voter in the jurisdiction in which the individual desires to vote; and (B) eligible to vote in that election.

Yes, and no further actions are required.
Section 101.048(1), *Florida Statutes*, states that any voter claiming to be properly registered and eligible to vote, but whose eligibility cannot be determined, will be given a provisional ballot. A Provisional Ballot Voter's Certificate and Affirmation must be completed by the individual

casting a provisional ballot indicating that they are registered to vote and are a qualified voter of the county in which they are attempting to vote, and that they have not previously voted in the election.

Section 302(a)(3) Do Florida's election laws require a completed provisional ballot be given to an appropriate State or local election official to determine whether the individual is eligible under State law to vote?

Yes, and no further actions are required.
Section 101.048(1), *Florida Statutes*, states that all provisional ballots are placed in a secrecy envelope and then sealed in a provisional ballot envelope. All provisional ballots shall remain sealed in their envelopes for return to the supervisor of elections.

Section 101.048(2)(a), *Florida Statutes*, states the county canvassing board shall examine each provisional ballot envelope to determine if the person voting that ballot was entitled to vote at the precinct where the person cast a vote in the election and that the person had not already cast a ballot in the election.

Section 302(a)(4) Is the provisional ballot counted if the appropriate State or local election official determines the individual is eligible under State law to vote?

Yes, and no further actions are required.
Section 101.048(2)(b)1., *Florida Statutes*, states that if it is determined that the person was registered and entitled to vote at the precinct where the person cast a ballot, the canvassing board will compare the signature on the provisional ballot envelope with the signature on the voter's registration record and, if it matches, will count the ballot.

Section 302(a)(5)(A) Are the individuals who cast a provisional ballot given written information that states that any individual who casts a provisional ballot will be able to ascertain whether the vote was counted and, if not, the reason that the vote was not counted?

Yes, and no further actions are required.

Chapter 2003-415, *Laws of Florida*, amends Section 101.048 to provide that each person casting a provisional ballot shall be given written instructions regarding the free access system. The instructions shall contain information on how to access the system along with the information the voter will need to provide in order to obtain information on his or her particular ballot.

Section 302(a)(5)(B) Has the appropriate State or local election official established a free access system to provide this information to individuals casting provisional ballots?

No, and further actions are required.

Planned action before January 1, 2004:
Chapter 2003-415, *Laws of Florida*, requires each supervisor of elections to establish a free access system that allows each person who casts a provisional ballot to determine whether his or her provisional ballot was counted in the final canvass of votes and, if not, the reasons why.

It is recommended that each county, as a minimum, provide to voters who cast provisional ballots written notification by mail informing them of whether their ballot was counted and, if not, why it was not counted. Supervisors of elections are also strongly encouraged to develop a toll-free number or access to this information via the Internet.

Each supervisor of elections will establish the free access system for their county by January 1, 2004.

Section 302(a)(5)(B) Has the appropriate State or local official established procedures to protect the security, confidentiality and integrity of the personal information collected and stored by the free access system, restricting access to the individual who cast the ballot?

Yes, and no further actions are required.

Chapter 2003-415, *Laws of Florida*, requires the free access system established by the supervisors of elections to restrict access to information regarding an individual ballot to the person who cast the ballot.

Section 302(b) Voting Information Requirements
HAVA requirements for voting information state that the appropriate State or local election official shall cause voting information to be publicly posted at each polling place on the day of each election for Federal office.

Section 302(b)(2)(A) Is a sample version of the ballot that will be used for that election posted?

Yes, and no further actions are required.
Section 101.20, *Florida Statutes*, states that two sample ballots shall be furnished to each polling place by the officer whose duty it is to provide official ballots. The sample ballots shall be in the form of the official ballot as it will appear at the polling place on election day. Sample ballots shall be open to inspection by all electors in any election.

Section 302(b)(2)(B) Is information regarding the date of the election and the hours during which polling places will be open posted on election day?

Yes, and no further actions are required.
Information such as the hours of operation of polling places and the date of the election are provided on instructional cards and sample ballots. Section 101.031, *Florida Statutes*, requires the Department of State, or in case of municipal elections the governing body of the municipality, to print, in large type on cards, instructions for the electors to use in voting. Each supervisor of elections shall send a sufficient number of these cards to the precincts prior to an election. The election inspectors shall display the cards in the polling places as information for electors. The cards shall contain information about how to vote and such other information as the Department of State may deem necessary.

Currently, all cards that are posted in polling places include the hours the polls will be opened.

Section 101.20(1), *Florida Statutes*, states that two sample ballots shall be furnished to each polling place by the officer whose duty it is to provide official ballots. Sample ballots shall be open to inspection by all electors in any election, and a sufficient number of reduced-size ballots may be furnished to election officials so that one may be given to any elector desiring same.

Currently, all sample ballots posted in polling places include the date of the election.

Section 302(b)(2)(C) Are instructions on how to vote, including how to cast a vote and how to cast a provisional ballot posted on election day?

No, and further actions are required.
Section 101.031, *Florida Statutes*, states the Department of State, or in case of municipal elections the governing body of the municipality, shall print, in large type on cards, instructions for the electors to use in voting. It shall provide not less than two cards for each voting precinct for each election and furnish such cards to each supervisor upon requisition. Each supervisor of elections shall send a sufficient number of these cards to the precincts prior to an election. The election inspectors shall display the cards in the polling places as information for electors. The cards shall contain information about how to vote and such other information as the Department of State may deem necessary.

In addition, Section 101.5611, *Florida Statutes*, states the supervisor of elections shall provide instruction at each polling place regarding the manner of voting with the system. The supervisor of elections shall provide instruction on the proper method of casting a ballot for the specific voting system utilized in that jurisdiction.

Many counties have voting instructions in the voting booth and some provide verbal instruction. However, these instructions do not include how to cast a provisional ballot and Florida will have to revise its instructions to meet this requirement.

During the 2002 legislative session, Senate Bill 1350 was passed amending Section 97.026, *Florida Statutes*, and stated that all forms required to be used in chapters 97 through 106 shall be made available upon request, in alternative formats. However, this statute is not in effect during the development of this Plan.

Planned action before January 1, 2004:
The Department of State will revise the instructions to electors, which are posted at the polls on election day, to include information regarding how to cast a vote and how to cast a provisional ballot.

Section 302(b)(2)(D) Are instructions for mail-in registrants and first-time voters under section 303(b) posted on election day?

No, and further actions are required.

Planned action before January 1, 2004:
Under Section 101.031(1), *Florida Statutes*, the Department of State is required to print, in large type on cards, instructions for the electors to use in voting. The election inspectors shall display the cards in the polling places as information for electors. The cards shall contain information about how to vote and such other information as the Department of State may deem necessary. The cards must also include the list of rights and responsibilities afforded to Florida voters.

The cards provided at each polling place, which are posted on election day for inspection by voters, will be modified by the Department of State to include instructions for mail-in registrants and first-time voters.

Section 302(b)(2)(E) Is general information on voting rights, including information on the right of an individual to cast a provisional ballot posted on election day?

Yes, and no further actions are required.
Section 101.031(2), *Florida Statutes*, requires the supervisor of elections in each county to have posted at each polling place the Voter's Bill of Rights and Responsibilities. The Voter's Bill of Rights states that each registered voter in this State has the right to:

1. Vote and have his or her vote accurately counted.
2. Cast a vote if he or she is in line at the official closing of the polls in that county.
3. Ask for and receive assistance in voting.
4. Receive up to two replacement ballots if he or she makes a mistake prior to the ballot being cast.
5. An explanation if his or her registration is in question.
6. If his or her registration is in question, cast a provisional ballot.
7. Prove his or her identity by signing an affidavit if election officials doubt the voter's identity.
8. Written instructions to use when voting, and, upon request, oral instructions in voting from elections officers.
9. Vote free from coercion or intimidation by elections officers or any other person.
10. Vote on a voting system that is in working condition and that will allow votes to be accurately cast.

Section 302(b)(2)(E) Is contact information posted for voters who allege their rights have been violated?

No, and further actions are required.

Planned action before January 1, 2004:
Under Section 101.031(1), *Florida Statutes*, the Department of State is required to print, in large type on cards, instructions for the electors to use in voting. The election inspectors shall display the cards in the polling places as information for electors. The cards shall contain information about how to vote and such other information as the Department of State may deem necessary. The cards must also include the list of rights and responsibilities afforded to Florida voters.

The cards provided at each polling place, which are posted on election day as information for electors, will be modified by the Department of State to include contact information for voters who believe their voting rights have been violated.

Section 302(b)(2)(F) Is information on laws regarding prohibitions on acts of fraud and misrepresentation posted?

Yes, and no further actions are required.
Section 101.5611(2), *Florida Statutes,* requires the supervisor of elections to have posted at each polling place a notice that reads: "A person who commits or attempts to commit any fraud in connection with voting, votes a fraudulent ballot, or votes more than once in an election can be convicted of a felony of the third degree and fined up to $5,000 and/or imprisoned for up to 5 years."

Section 302(c) Are individuals who vote in an election as a result of a court order or any other order extending the time established for closing the polls by a State law required to cast a provisional ballot? This provisional ballot must be separated and held apart from other provisional ballots cast by those not affected by the order.

Yes, and no further actions are required.

Chapter 2003-415, *Laws of Florida*, created s. 101.049, *Florida Statutes*, to require any person voting in an election after the regular poll-closing time pursuant to a court or other order extending the statutory polling hours to vote a provisional ballot. Once voted, the provisional ballot shall be placed in a secrecy envelope and sealed in a provisional ballot envelope. All such provisional ballots will remain sealed and transmitted to the supervisor of elections separate and apart from all other ballots. The supervisor shall ensure that late-voted provisional ballots are not commingled with other ballots.

Section 302(d) The effective date for complying with the Provisional Voting and Voting Information requirements is on and after January 1, 2004.

For each requirement in which Florida does not currently comply, planned action for meeting the requirements will take place by January 1, 2004.

Element 1. Use of Title III Requirements Payments:
C. Voter Registration

How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Introduction

The Help America Vote Act of 2002 (HAVA) establishes minimum requirements for a single, centralized, computerized statewide voter registration list and for mail registration as a part of establishing and maintaining such a list.

The effective and efficient administration of elections depends in a major way on the completeness and accuracy of voter registration lists that can be checked quickly and reliably by election workers. Section 303(a) of HAVA establishes minimum requirements for a "single, uniform, official, centralized, interactive, computerized, statewide voter registration list which shall be the single system for storing and managing the list of registered voters throughout the state for the conduct of all federal elections."

Because many voters register by mail instead of in person, the procedures used for mail registration are an important component of establishing and maintaining a complete and accurate statewide voter registration list. Section 303(b) of HAVA requires that a state's mail voter registration system be administered in a "uniform and nondiscriminatory manner" and establishes minimum requirements for such a system.

Until recently, Florida's voters have relied primarily on voter registration lists established and maintained by independent supervisors of elections in each of Florida's 67 counties.[1] These lists are governed by Florida law that specifies qualifications to register or vote, a registration oath, a uniform statewide voter registration application form, acceptance of applications by supervisors of elections, closing of registration books, late registration, declinations to register, special registration for electors requiring assistance, registration identification card, disposition of applications and procedures for cancellation, notices of changes of address, and operation of registration offices. See Sections 97.032 through 97.055, 97.0585 through 97.105, 98.015 through 98.095, and 98.101 through 98.491, *Florida Statutes*.

Additional requirements for establishing and maintaining voter registration lists were enacted in the Federal Voting Rights Act of 1965 and the National Voter Registration Act of 1993 ("Motor Voter Law"). Sections 97.057 through 97.0583, *Florida Statutes*, and other provisions of Florida law implemented those Federal laws in the State by providing for registration of voters by the Department of Highway Safety and Motor Vehicles, voter registration agencies,[2] and qualifying educational institutions.

[1] A permanent single voter registration system for each Florida county, used for all public elections in that county, improved on practices in early Florida history of requiring separate registrations for municipal elections and new registrations for each new election. See Section 97.105, *Florida Statutes*.

In 1997, the Florida Legislature established a "central voter file" in the Division of Elections that contained voter registration information from all counties. Section 98.097, *Florida Statutes*.

Following the 2000 General Election, the Florida Legislature enacted the Florida Election Reform Act of 2001 that took additional steps to require complete and accurate voter registration lists in the counties and to establish a statewide voter registration database. Sections 98.0977 through 98.0979, *Florida Statutes*, authorized the Department of State to "...analyze, design, develop, operate, and maintain a statewide, on-line voter registration database and associated website, to be fully operational statewide by June 1, 2002. The database shall contain voter registration information from each of the 67 supervisors of elections in this state and shall be accessible through an Internet website. The system shall provide functionality for ensuring that the database is updated on a daily basis to determine if a registered voter is ineligible to vote for any of the following reasons, including, but not limited to:

(a) The voter is deceased;

(b) The voter has been convicted of a felony and has not had his or her civil rights restored; or

(c) The voter has been adjudicated mentally incompetent and his or her mental capacity with respect to voting has not been restored.

The database shall also allow for duplicate voter registrations to be identified."

This statewide database was established in time for use in the 2002 General Elections. Requirements for pre-clearance by the U.S. Department of Justice (DOJ) and negotiations for settlement of a lawsuit by the NAACP delayed use of parts of the database concerning eligibility of voters identified as potentially ineligible because of a felony conviction or adjudication of mental incapacity. With the receipt of DOJ clearance and settlement of the lawsuit now accomplished, the Division of Elections will begin running matches when all issues related to the settlement agreement have been resolved.

[2] A "voter registration agency" is defined by Section 97.012(37), *Florida Statutes* as "...any office that provides public assistance, any office that serves persons with disabilities, any center for independent living, or any public library."

Section 303(a) Computerized Statewide Voter Registration List Requirements

Section 303(a)(1)(A)(i)-(vii) and 303(a)(2): Does Florida's existing statewide database meet requirements for implementing and maintaining a single, uniform, official, centralized, interactive computerized statewide voter registration list defined, maintained, and administered at the State level that contains the name and registration information of every legally registered voter in the State and assigns a unique identifier to each legally registered voter in the State and includes information specified in HAVA?

No, and further actions are required.
Florida has made great strides in recent years in establishing a centralized, computerized statewide voter registration database but that database does not meet the requirements of HAVA Section 303(a)(1)(A) for a single statewide voter registration list "...defined, maintained, and administered at the State level...[with] a unique identifier [assigned] to each legally registered voter in the State..." which serves, under HAVA Section 303(a)1)(A)(vii), as "...the official voter registration list for the conduct of all elections for Federal office in the State." HAVA Section 303(a)(1)(A)(i) further defines this requirement by specifying that "The computerized list shall serve as the single system for storing and managing the official list of registered voters throughout the State." HAVA Section 303(a)(1)(A) also specifies that the chief State election official (in Florida the Secretary of State) shall implement and maintain the single statewide voter registration list.

Florida currently has 67 official voter registration lists, one established and maintained in each county, that are compiled into the statewide voter registration database required by the Florida Election Reform Act of 2001. The 67 county-based lists, not the statewide database, are the official voter registration lists for voters in Florida. The statewide database is intended primarily to assist supervisors of elections to determine if voters are ineligible to vote (deceased, convicted felons who have not had civil rights restored, or adjudicated as mentally incompetent). It also is intended to identify those voters who are listed more than once. It is not intended to serve as "...the single system for storing and managing the official list of registered voters throughout the State..." as required by HAVA. Information in the statewide database is made available to county supervisors of elections who are responsible for making final determinations of a voter's eligibility and for updating voter registration records.

HAVA's requirement for a single computerized statewide voter registration list cannot be fulfilled quickly. In addition to designing and implementing such a single system that is interactive and assigns unique identifiers to each voter, HAVA requires the system to have adequate technological security measures [HAVA Section 303(a)(3)], meet minimum standards of accuracy and currency [HAVA Section 303(a)(4)], provide for verification with other information such as driver's license numbers and Social Security numbers [HAVA Section 303(a)(5)], and meet other standards. Meeting these requirements and standards will take time, expertise and money.

The Legislature has appropriated $1 million and nine staff positions to create a master design, including a business plan and budget, for a single statewide voter registration system by January 2004. This design would permit the 2004 Legislature to take action to authorize the implementation of a new single computerized statewide voter registration list in time for the 2006 elections. This timing assumes that the State of Florida will be granted a waiver under HAVA to have a single statewide voter registration system in place by January 1, 2006, instead of by the existing deadline of January 1, 2004. (The requirement for a waiver is discussed subsequently.)

Chapter 2003-415, *Laws of Florida*, authorizes the State to request the Federal Election Assistance Commission to grant a waiver from the January 1, 2004, HAVA deadline. The 2003 Appropriations bill authorizes the funding and staffing positions requested by the Division of Elections.

In the meantime, the Division of Elections has been meeting with representatives of the Florida State Association of Supervisors of Elections, the Department of Highway Safety and Motor Vehicles, the Department of Law Enforcement, the Board of Executive Clemency, the State Technology Office and health officials to begin to find ways to coordinate databases maintained by those agencies as part of the single centralized statewide voter registration list. Because HAVA Sections 303(a)(5)(A)(i)(I) and (II) require an applicant for voter registration to provide either a current and valid driver's license number or supply the last four digits of the applicant's Social Security number, HAVA Sections 303(a)(5)(B)(i)-(ii) require that the State enter into agreements to share such information with the Department of Highway Safety and Motor Vehicles and with the Social Security Administration.

HAVA's requirements are minimum requirements. Florida may establish technology and administrative requirements that are stricter than the Federal requirements as long as they are not inconsistent with HAVA's requirements and other laws, such as the Motor Voter Act, or in conflict with the privacy provisions of the Florida Constitution. See HAVA Section 304.

Section 303(d) Deadlines for Computerized Statewide Voter Registration List

Section 303(d)(1)(A): Can Florida meet HAVA's requirement to have operational a computerized statewide voter registration list, as defined by HAVA, by January 1, 2004?

No, and further actions are required.
The State practically cannot meet the January 1, 2004, deadline. Substantial professional and technical work must be done to design and establish a computerized statewide voter registration list that meets HAVA's standards. Although design of such a system can be ready by January 2004, implementation of the system will take a year or more beyond that date. Chapter 2003-415, *Laws of Florida*, authorizes the State to seek a waiver from the Federal Election Assistance Commission permitted under HAVA Section 303(d)(1)(B) from January 1, 2004, to January 1,

2006, if the State "...will not meet the deadline...for good cause and includes in the certification the reasons for the failure to meet such deadline...."

Section 303(b) Requirements for Voters Who Register By Mail

Section 303(b)(1) through (4): Does Florida meet HAVA's identification requirements for a voter who registers by mail and has not previously voted in an election for Federal office in the State or registers by mail, has not previously voted in the jurisdiction and is in a State that does not have a computerized statewide voter list that meets HAVA's requirements?

Yes, and no further actions are required.
HAVA requires persons who register by mail and have not voted in an election for federal office to provide identification prior to voting. If the State is able to match the voter's driver's license number or Social Security number against an existing State record bearing the same number, name and date of birth, further identification by the voter is not required.

HAVA Sections 303(b)(2)(i) through (ii) require that a first-time voter who votes in person may be identified by a current and valid photo identification or a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter. A voter who votes by mail may include with the ballot a copy of a current and valid photo identification or a copy of the other documents listed for the voter who appears in person. An exception is made in HAVA Section 303(b)(3) for mail registrants who provide a copy of required identification at the time of registering, mail registrants whose driver's license number or last 4 digits of the Social Security number are matched with an existing State record, and for those who vote under the Uniformed and Overseas Citizens Absentee Voting Act, the Voting Accessibility for the Elderly and Handicapped Act, or under some other provision of Federal law (in which case the specific standards of those acts must be met).

Chapter 2003-415, *Laws of Florida*, amends the following sections of Florida law to conform to HAVA's mail registration and other voter registration requirements:

Section 97.052(3)(g), *Florida Statutes*, to require a statement with the uniform statewide voter registration form that informs the applicant that if the form is submitted by mail and the applicant is registering for the first time, the applicant will be required to provide identification prior to voting for the first time.

Section 97.053(5)(a), *Florida Statutes*, that permits the use of a valid Florida driver's license number or the identification number from a Florida identification card issued under Section 322.051, *Florida Statutes*, for purposes of voter registration.

Section 97.0535, *Florida Statutes*, that specifies at length the requirements for identification that a first-time voter can use and that complies with other HAVA requirements outlined previously.

Section 101.043, *Florida Statutes*, (a transfer and renumbering of Section 98.471, *Florida Statutes*) to permit a voter to submit to a poll worker at the time of voting a current and valid picture identification with a signature.

Section 303(b)(4): Does Florida meet HAVA's requirement for language in the mail voter registration form under Section 6 of the National Voter Registration Act of 1993?

Yes, and no further actions are required.
HAVA requires that mail voter registration forms under Section 6 the National Voter Registration Act shall include the following:

"(i) The question 'Are you a citizen of the United States of America?' and boxes for the applicant to check to indicate whether the applicant is or is not a citizen of the United States.

(ii) The question 'Will you be 18 years of age on or before election day?' and boxes for the applicant to check to indicate whether or not the applicant will be 18 years of age or older on election day.

(iii) The statement 'If you checked 'no' in response to either of these questions, do not complete this form.'

(iv) A statement informing the individual that if the form is submitted by mail and the individual is registering for the first time, the appropriate information required under this section must be submitted with the mail-in registration form in order to avoid the additional identification requirements upon voting for the first time."

Section 97.052(2)(b) and (r), *Florida Statutes*, requires that the uniform statewide voter registration form must be designed to elicit information from the applicant about the applicant's date of birth and whether the applicant is a citizen of the United States. The form itself, available on the Division of Elections' website at http://election.dos.state.fl.us, asks for date of birth and asks "Are you a U.S. citizen?" It does not use the specific language required by HAVA.

Chapter 2003-415, *Laws of Florida*, amends Section 97.052, *Florida Statutes*, by adding subsection (g) that requires language about the need for appropriate identification for first time mail applications. It does not require the specific HAVA language about age and citizenship.

The Division of Elections has reviewed this matter orally with Federal legislative and executive representatives and has concluded that the requirement applies only to Federal applications under Section 6 of the National Voter Registration Act. It believes that putting such language on State application forms will confuse voters and discourage first-time registrants. The age question, for instance, does not specify the exact election day to which it is referring and assumes that young

voters may be applying to register for a specific election rather than pre-registering as 17 year-olds in order to vote in all elections after they reach the age of 18. The Division notes that the forms used by Florida already elicit the information required by asking for date of birth and citizenship. The forms do not discourage voters by telling them to stop with the application if they must answer "No" to either question. The Division is complying with the substance of HAVA if not with the exact form of the question.

Element 2. Local Government Payments and Activities

How the State will distribute and monitor the distribution of the requirements payments to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of—

(A) the criteria to be used to determine the eligibility of such units or entities for receiving the payment; and

(B) the methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8).

Introduction

The Florida Legislature has broad constitutional authority for appropriating federal and State funds annually through the appropriations bill which is eventually signed by the Governor into law. During the annual appropriations process, the Florida Legislature assesses the needs of the State and makes policy and budget decisions which impact every level of government including local government.

The funding of elections in Florida is primarily a local government responsibility since the constitutional authority for running elections rests with the local supervisor of elections. Funding authority for elections resides with the Boards of County Commissioners. Each of Florida's 67 Boards of County Commissioners receives a budget request from the supervisor of elections and then the Board makes policy and budget decisions based upon county priorities.

There has been one major exception to this election funding scenario. Following the controversial 2000 General Election, the Governor and the citizens of Florida asked the Legislature to enact broad election reforms which included providing State financial assistance to local governments. Over a two-year period, the Legislature provided over $32 million in State funds to supplement local election budgets and to quicken the pace of election reform in Florida. Most of the State funds were appropriated to the Boards of County Commissioners using two different formulas for accomplishing distinct policy goals—to replace voting systems designated to be decertified and to enact comprehensive voter education programs in every county.

The funding formula used to upgrade voting systems had two important policy goals—to provide a minimum voting system standard of precinct-based optical scanning systems throughout Florida and to provide funding assistance to small counties with very small tax bases. The resulting formula achieved that policy goal and was as follows:

- Small Counties (population 75,000 or below) received $7,500/precinct
- Large Counties (population 75,001 and above) received $3,750/precinct

The Legislature used a different formula to provide State funds for voter education and poll worker recruitment and training. This formula was based upon taking available State funds and distributing them on a per registered voter basis per county. The resulting formula was determined by taking approximately $6,000,000 in available State funds and dividing it by the number of registered voters during the 2000 General Election and appropriating that money on a pro-rata basis to each county. The resulting appropriation provided $5,949,375 to counties to fund comprehensive voter education programs and poll worker recruitment and training programs. The combined State and local efforts led to greater voter satisfaction during the 2002 General Election.

Pursuant to the appropriation, the Florida Legislature required each county supervisor of elections to submit a detailed description of the plans to be implemented and also a detailed report on the success of the voter education effort. These reports were sent to the Division of Elections and subsequently compiled by the Division into a report sent to the Governor and Florida Legislature.

While the State funds were widely valued, the counties still provided a majority of funding for election reform efforts. According to the 2002 Governor's Select Task Force on Election Procedures, Standards and Technology, a survey of 33 county governments revealed they spent nearly $110 million toward new voting systems before the 2002 primary and general elections.

If the Florida Legislature determines that it will provide funding for units of local governments and other entities, then how will the requirements payments be distributed and monitored, including—

A. **A description of the criteria used to determine the eligibility of such units and entities for receiving payment.**

B. **A description of the methods to be used by Florida to monitor the performance of the units of entities to whom the payments is distributed, consistent with the performance goals and measures adopted under paragraph (8).**

The Help America Vote Act of 2002 (HAVA) Planning Committee clearly recognizes its advisory role in election reform and acknowledges the authority of the Florida Legislature to make funding decisions for Florida. During HAVA Planning Committee discussions, members proposed several recommendations that would provide funding for units of local government. The recommended payments to local government are listed below:

Replacement and Reimbursement For Punch Card And Lever Machines
The HAVA Planning Committee recommends that the estimated $11.74 million received pursuant to Section 102 of HAVA be distributed to the State and to the counties on a pro-rated basis for their respective contributions to replace punch cards and lever machines during the 2001-2002 and 2002-2003 fiscal years.[3]

Accessible Voting Systems for Voters With Disabilities
The HAVA Planning Committee recommends that HAVA funds should be distributed to counties during the 2004-2005 fiscal year to help them meet Section 301 Title III accessibility requirements by the January 1, 2006 deadline. The estimated amount to comply with this requirement is $11.6 million and the funds would be distributed according to the number of machines accessible for persons with disabilities needed for each county to have one per polling place. The Division of Elections would have the responsibility for determining eligibility of counties receiving HAVA funds.

Secondly, if HAVA funds are available, the HAVA Planning Committee recommends that HAVA funds be distributed as a reimbursement on a pro-rated basis to local governments that purchased accessible voting systems and components during the 2001 and 2002 fiscal years.

Statewide Voter Education Program
For the 2003-2004, 2004-2005, and 2005-2006 fiscal years, the HAVA Planning Committee recommends that local governments receive a total of $9 million dollars ($3 million each fiscal year) for comprehensive voter education efforts. HAVA funds for voter education should be distributed using a similar formula as used in 2001. The Division of Elections should be responsible for determining eligibility of any county for the receipt of State or federal funds used in HAVA election reform activities.

The Division of Elections should be responsible for monitoring the use of funds in accordance with established State procedures. Prior to receiving any funds from the Division, each of Florida's 67 supervisors of elections must enter into a contractual agreement with the State. The contract must affirm what the funds are to be used for and it must provide proof that the counties have matching dollars, if required.

The Division of Elections will monitor the performance of the contract agreements entered into between the State and each county. Each county must meet the contractual requirements before payment is approved.

Standard auditing procedures for monitoring the use of federal funds will be used for the receipt and the distribution of HAVA funds. These standard procedures may include random program

[3] The 2003 General Appropriations Act passed by the Legislature required the Department of State to transfer all amounts eligible for reimbursement under Section 102 of HAVA to the State's Working Capital Fund.

audits by the Department of State's Inspector General as well as an annual audit by the Florida Auditor General's office to ensure funds are being expended for the authorized purposes.

To monitor the use of the voter education funds at the local level, the HAVA Planning Committee recommends that the Florida Legislature require each county to establish a fund to be used to deposit funds received from the federal or State governments for election reform activities. If a county match is required, it will also be deposited into this account. The funds will not be commingled with other funds which may be appropriated to the supervisor of elections by the county. Funds in this account will be used for the activities for which the funds were received and, unless otherwise specified in the appropriation, there is no requirement for the funds to be used during a certain time.

Also during the 2003-2004, 2004-2005, and 2005-2006 fiscal years, the Division of Elections recommends that the Department of Highway Safety and Motor Vehicles and the Florida Department of Law Enforcement receive HAVA funding to assist in the development of the new statewide voter registration system. The Division of Elections will enter into a contractual agreement with these other state-level departments and monitor the contracts in accordance with standard auditing procedures for monitoring the use of federal funds.

Element 3. Voter Education, Election Official Education & Training, Poll Worker Training

How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III.

Introduction

A wide array of national and State task force reports have highlighted the need for a more informed electorate. To achieve this goal, voters, election officials, and poll workers must receive better information and training. Florida assigns the primary responsibility for these daunting tasks to the Department of State and the county supervisors of elections. Following election 2000, the Legislature has more clearly delineated the role of each in improving the education of voters, election officials, and poll workers.

The Florida Election Reform Act of 2001 set deadlines, included a wide array of topics to be addressed by State and county election officials, granted rule making authority to the Department of State, and established a procedure for measuring the effectiveness of the programs and making recommendations to the Governor and the State Legislature. Various acts passed during the 2002 legislative session broaden the scope of voter education responsibilities, more definitively spell out voter rights, and ensure that Florida's electoral system conforms to the Americans with Disabilities Act of 1990. Each of these changes has been communicated to election officials at all levels and to the public at-large.

The Election Reform Act of 2001 required all 67 county supervisors of elections to file voter education plans with the Division of Elections in the Department of State in order to qualify for State funds. (The Act appropriated nearly $6 million for voter education in fiscal year 2001-2002 in addition to $24 million for purchase of new voting equipment, fiscal years 2001-2003.) The Department of State, as directed by the Legislature, established minimum standards for nonpartisan voter education to be met by each county.

Voter education plans filed with the Division of Elections in the Secretary of State's office are filled with creative approaches. These outreach mechanisms are designed by the elections supervisors:

(1) to better inform their county's residents about registration and voting; and,
(2) to reduce the levels of voter error and confusion that existed during the 2000 election cycle.

The approaches used by the 67 individual counties vary considerably, reflecting differences in their demographic and socioeconomic composition (e.g., land area, rural-urban location, age, race/ethnicity, education), county funding levels, and media availability.

Significant changes to Florida's election laws and the advent of new voting equipment have made poll worker education a high priority—as recognized in the Florida Election Reform Act of 2001. Florida's counties have restructured their poll worker training programs. State law now requires supervisors of elections to cast their poll worker recruitment nets wider, as the number of poll workers needed escalates in a fast-growing state.

Section 254(a)(3). How will the State of Florida provide for programs for *voter education* which will assist the State in meeting the requirements of Title III?

Florida has adopted extensive voter education requirements and funded county voter education programs ($6 million in 2001). The Help America Vote Act of 2002 (HAVA) Planning Committee recommends an additional $3 million in each of the next three fiscal years for local voter education programs.

Joint Responsibility of Department of State and County Supervisors of Elections
Section 98.255(1), *Florida Statutes,* directed the Department of State to "adopt rules prescribing minimum standards for nonpartisan voter education" by March 1, 2002. The standards were to address (but were not limited to):

(1) voter education;
(2) balloting procedures for absentee and polling place;
(3) voter rights and responsibilities;
(4) distribution of sample ballots; and,
(5) public service announcements.

In developing the rules, the Department was instructed to "review current voter education programs within each county of the state." The Department of State adopted Rule 1S-2.033, *F. A. C.*, Standards for Nonpartisan Voter Education on May 30, 2002.

Section 98.255(2), *Florida Statutes,* requires each supervisor of elections to "implement the minimum voter education standards" and "to conduct additional nonpartisan education efforts as necessary to ensure that voters have a working knowledge of the voting process."

Minimum Nonpartisan Voter Education Standards
The Department of State's "Standards for Nonpartisan Voter Education," Rule 1S-2.033, *F. A. C.*, requires the following voter education practices:

Comprehensive Voter Guide: Contents
Department of State Rule 1S-2.033, *F. A. C.*, Standards for Nonpartisan Voter Education, requires supervisors of elections to create a Voter Guide which shall include: how to register to vote; where voter registration applications are available; how to register by mail; dates for upcoming elections; registration deadlines for the next primary and general election; how voters should update their voter registration information such as changes in name, address or party affiliation; information on how to obtain, vote and return an absentee ballot; voters' rights and responsibilities pursuant to Section 101.031, *Florida Statutes*; polling information including what times the polls are open, what to bring to the polls, list of acceptable IDs, what to expect at the polls; instructions on the county's particular voting system; supervisor contact information; and any other information the supervisor deems important.

Voter Guide: Extensive Distribution
Department of State Rule 1S-2.033(1)(b), *F.A.C.*, requires supervisors of elections to "provide the Voter Guide at as many places as possible within the county including: agencies designated as voter registration sites pursuant to the National Voter Registration Act; the supervisor's office; public libraries; community centers; post offices; centers for independent living; county governmental offices; and at all registration drives conducted by the supervisor of elections."

Voter Guide, Sample Ballot, & Website Consistency Required
Department of State Rule 1S-2.033(2), *F.A.C.*, states that: "If a supervisor has a website, it must take into account all of the information that is required to be included in the Voter Guide. In addition, when a sample ballot is available, the website must provide either information on how to obtain a sample ballot or a direct hyperlink to a sample ballot."

Targeted Voter Education: High School Students
Florida's Department of State Rule 1S-2.033(3), *F.A.C.*, instructs the supervisors of elections to work with county school boards to develop voter education and registration programs for high school students. Specifically, the rule requires that "At least once a year in each public high school in the county, the supervisor shall conduct a high school voter registration/education program. The program must be developed in cooperation with the local school board and be designed for maximum effectiveness in reaching and educating high school students."

Targeted Voter Education: College Students
Florida's Department of State Rule 1S-2.033(4), *F.A.C.*, dictates that "At least once a year on each college campus in the county, the supervisor shall provide a college registration/education program. This program must be designed for maximum effectiveness in reaching and educating college students."

Targeted Voter Education: Senior Citizens and Minority Groups
Department of State Rule 1S-2.033(7), *F.A.C.*, requires supervisors of elections to "conduct demonstrations of the county's voting equipment in community centers, senior citizen residences, and to various community groups, including minority groups." Rule 1S-2.033(8), *F.A.C.*, specifically instructs the supervisors to use minority media outlets to provide more information to voters.

Targeted Voter Education: Individuals and Groups Sponsoring Voter Registration Drives
Department of State Rule 1S-2.033(6), *F.A.C.*, specifically instructs supervisors of elections to "provide, upon reasonable request and notice, voter registration workshops for individuals and organizations sponsoring voter registration drives." Section 98.015(9), *Florida Statutes,* states that "each supervisor must make training in the proper implementation of voter registration procedures available to any individual, group, center for independent living, or public library in the supervisor's county."

Posting of Educational Materials on Voter Rights and Responsibilities
Department of State Rule 1S-2.033(5), *F.A.C.*, requires supervisors of elections to "post the listing of the voters' rights and responsibilities pursuant to Section 101.031, *Florida Statutes*, at the supervisor's office." Section 101.031(2), *Florida Statutes,* spells out the specific format of the Voter's Bill of Rights and Responsibilities to be posted by the supervisor of elections at each polling place. The Department of State, or in case of municipal elections the governing body of the municipality, is required "to print, in large type on cards, instructions for electors to use in voting," including the list of rights and responsibilities and other information about how to vote deemed necessary by the Department of State—Section 101.031(1), *Florida Statutes.* At least two cards shall be provided to each precinct.

Educating Voters About Polling Place and Precinct Changes, Revised Voter Identification Cards
Department of State Rule 1S-2.033, *F.A.C.*, mandates that supervisors of elections "shall provide notice of changes of polling places and precincts to all affected registered voters." "This notice shall include publication in a newspaper of general circulation as well as posting the changes in at least ten conspicuous places in the county. If the supervisor has a website, the supervisor shall post the changes on the website. The supervisors shall also widely distribute a notice that if a voter does not receive a revised voter identification card within 20 days of the election the voter should contact a specific number at the supervisor's office to obtain polling place information."

Voter Education Through the Media
Department of State Rule 1S-2.033(8), *F.A.C.*, requires supervisors of elections to interface with the media to better inform the electorate. Supervisors are to "participate in available radio, television and print programs and interviews, in both general and minority media outlets, to provide voting information."

Voter Education Through the Internet
The Division of Elections' website (http://election.dos.state.fl.us/) offers extensive information regarding registration, elections (dates, district maps, results, Division reports, forms, publications, voter turnout, supervisor of elections' contact information), voter fraud, voting systems, laws/opinions/rules, candidates and committees, the initiative petition process, and other helpful government links.

Voter Education About Fraud
Section 97.012(12), *Florida Statutes,* requires the Secretary of State to "...provide election fraud education to the public."

Procedures for Constant Analysis of Voter Education Effectiveness
Section 98.255(3)(a), *Florida Statutes,* requires supervisors of elections to file a report by December 15 of each general election year with the Department of State. This report is "a detailed description of the voter education programs implemented and any other information that may be useful in evaluating the effectiveness of voter education efforts."

Section 98.255(3)(b), *Florida Statutes*, requires the Department of State to review the information submitted by the supervisors and "prepare a public report on the effectiveness of voter education programs" and to "submit the report to the Governor, the President of the Senate, and the Speaker of the House of Representatives by January 31 of each year following a general election."

Further, Section 98.255(3)(c), *Florida Statutes*, instructs the Department of State to use "the findings in the report as a basis for adopting modified [voter education] rules that incorporate successful voter education programs and techniques as necessary."

This procedure was first used in the 2002 election cycle. The Division of Elections requested each supervisor of elections to list in detail the voter education programs conducted during the 2002 election cycle and the approximate cost of each program. The supervisors were asked to rank the effectiveness of each program on a scale of 1 to 5, with 5 being the highest possible rank. On January 31, 2003, the Florida Department of State, Division of Elections, submitted its "Report on Voter Education Programs During the 2002 Election Cycle Pursuant to Section 98.255(3), Florida Statutes." The report concluded that "most supervisors ranked the county voter education programs as 4 or 5 in effectiveness in reaching the target community." (There were ten broad categories of voter education programs: sample ballots; elementary/middle school/high school/university and community college outreach; websites; miscellaneous promotional materials; public appearances/television and movie theatre advertisements; banners and billboards, radio and public transport advertisements; newspapers and mailers; voting system demonstrations; outreach to minority, disabled and senior communities; and voter registration drives.) The Department of State made three recommendations in its post-election 2002 report:

(1) The Legislature should provide funding, contingent upon appropriations from Congress through the Help America Vote Act, to the counties for voter education efforts;
(2) The Legislature should require sample ballots to be mailed to households or voters prior to each Primary and General Election.
(3) The Division of Elections should provide a list of cost-effective voter education programs used by counties so that all counties can benefit from these ideas.

(The 2002 Governor's Select Task Force on Election Procedures, Standards, and Technology report of December 30, 2002 also recommended improving "voter education by requiring all supervisors of elections to mail generic sample ballots to each household with registered voters.")

Section 101.595, *Florida Statutes,* also requires supervisors of elections to submit a report to the Department of State no later than December 15 of each general election year detailing "[t]he total number of overvotes and undervotes in the first race appearing on the ballot pursuant to Section 101.151(2), along with the likely reasons for such overvotes and undervotes and other information as may be useful in evaluating the performance of the voting system and identifying problems with ballot design and instructions which may have contributed to voter confusion." The Department of State must prepare a report analyzing that information and submit it to the Governor, the President of the Senate, and the Speaker of the House by January 31 of the year following a general election. The report is to include recommendations for correcting any problems with ballot design or instructions to voters.

This procedure was first used in the 2002 election cycle. "Analysis and Report of Overvotes and Undervotes for the 2002 General Election Pursuant to Section 101.595, Florida Statutes" found a substantial reduction in the level of overvotes and undervotes in 2002 (compared to 2000) and concluded that new technology and the counties' voter education efforts were major factors contributing to the reduction in voter error. The report's recommendations were:

(1) The Division of Elections should continue to monitor the overvotes and undervotes from each general election.
(2) The Florida Legislature should provide funding, contingent upon appropriations from Congress through the Help America Vote Act, to the counties for voter education efforts.
(3) The Division of Elections should review the recommendations for ballot instructions for incorporation into the uniform ballot rule.
(4) All voting system vendors should continue to improve the design of their voting systems in order to better meet the needs of Florida's voters.

Florida's system for constant evaluation of the effectiveness of voter education by both the county supervisors of elections and the Department of State is in place and operating.

What needs to be done? Educational materials must be updated to provide absentee voters with better instructions on how to mark a ballot and how to correct their ballots and how to request a replacement ballot if the voter is unable to change the original ballot. (This is necessary to meet Section 301(a)(1)(B) HAVA requirements.) This will be done once the amendment to Section 101.65, *Florida Statutes*, becomes law and Department of State rule changes have been adopted. Both are expected to be in effect by January 1, 2004—before the HAVA deadline of January 2006.

Educational materials must be updated giving a voter written notice at the time of casting a provisional ballot that he or she can find out if the ballot was counted, or if not, why, through a free access system, restricted to the individual voter—Section 302(a)(5)(A)&(B) HAVA requirements.

Educational materials available to voters at the polling place must be updated to conform to HAVA voting information requirements—Section 302(b)(2)(A through F) to post: sample ballots at polls; the election date; identification instructions for mail registrants who are first time voters; and information on who to contact if general voting rights under State and federal laws are violated.

Educational materials should be updated as needed to include information on law and rule changes. The procedures for informing Florida voters, election officials, and poll workers of these changes are in place in statutes and rule making authority.

Section 254(a)(3). How will the State of Florida provide for programs for *election official education and training* which will assist the State in meeting the requirements of Title III?

The State has assigned responsibility for education and training of election officials to the Secretary of State. The Division of Elections prepares and distributes educational materials for, and conducts the training of, supervisors of elections and their staffs.

The Secretary of State is the State's chief election officer whose responsibilities are spelled out in Section 97.012, *Florida Statutes*. Among those responsibilities are explicit requirements to: "provide technical assistance to the supervisors of elections on voter education and election personnel training services;" "provide technical assistance to the supervisors of elections on voting systems;" "provide training to all affected state agencies on the necessary procedures for proper implementation of [Chapter 97 of the Florida Statutes];" and "coordinate with the United States Department of Defense so that armed forces recruitment offices administer voter education in a manner consistent with the procedures set forth in [Florida election] code for voter registration agencies."

The Division of Elections conducts voter education and election personnel training, issues advisory opinions that provide statewide coordination and direction for interpreting and enforcing election law provisions, provides technical advice on voting systems and equipment and State and federal election laws, certifies voting equipment, and provides written election information to candidates (Office of Policy Analysis and Government Responsibility, *Justification Review*, Report No. 02-55, October 2002).

The Division of Elections oversees and approves training courses for continuing education for supervisors of elections. It coordinates, on an annual basis, two statewide workshops for the

supervisors of elections by reviewing and providing updates on the election laws to ensure uniformity statewide in the interpretation of election laws. These are generally held in conjunction with the Florida State Association of Supervisors of Elections' Conferences held in January and June. The division oversees certification for supervisors of elections through which supervisors obtain credits to maintain job proficiency. The Division may also conduct regional workshops for supervisors and staff, universities, and community colleges, and State agencies. When Select Task Forces are created by the Governor, Secretary of State, or other State officials, the Division provides administrative and technical assistance. (Florida Department of State, Division of Elections, 2001 Annual Report).

All Division of Elections' forms, rules, handbooks, opinions, etc. are available on the Internet via the Division's website—an award-winning site (http://election.dos.state.fl.us/). Section 97.026, *Florida Statutes,* states "It is the intent of the Legislature that all forms required to be used in chapters 97-106 [the election code], shall be made available upon request, in alternative formats" including the Internet (with the exception of absentee ballots).

The HAVA Planning Committee recommends that the Division of Elections also conduct training courses for the continuing education of city election officials in conjunction with meetings of the Florida Association of City Clerks.

Section 254(a)(3). How will the State of Florida provide for programs for *poll worker training* which will assist the State in meeting the requirements of Title III?

Florida has adopted extensive poll worker recruitment and training requirements and funded county poll worker training (as part of the $6 million voter education appropriation in 2001). The State has: adopted minimum-hours-of-training requirements; spelled out training content requirements; prepared a uniform polling place procedures manual; and mandated a statewide and uniform program for training poll workers on issues of etiquette and sensitivity with respect to disabled voters.

State law permits inspectors, clerks, and deputy sheriffs attending poll worker training to receive compensation and travel expenses—Section 102.021(2), *Florida Statutes.*

Joint Responsibility of Department of State and County Supervisors of Elections
Section 102.014, *Florida Statutes,* assigns responsibility for poll worker training to county supervisors of elections and the Department of State.

Section 102.014(1), *Florida Statutes,* requires supervisors of elections to conduct training for inspectors, clerks, and deputy sheriffs prior to each primary, general, and special election "for the purpose of instructing such persons in their duties and responsibilities as election officials." Training is mandatory to work at the polls.

Section 102.014(5), *Florida Statutes,* directs the Department of State to "create a uniform polling place procedures manual and adopt the manual by rule" and to revise it "as necessary to address new procedures in law or problems encountered by voters and poll workers at the precincts." Rule 1S-2.034, *F.A.C.,* Polling Place Procedures Manual (Form DS-DE 11; 4/02), was adopted on July 4, 2002. The manual, to be available in either hard copy or electronic form at every precinct on Election Day, must be "indexed by subject, and written in plain, clear, unambiguous language."

Under Section 102.014(7), *Florida Statutes,* the Department is assigned the responsibility for developing "a mandatory, statewide, and uniform program for training poll workers on issues of etiquette and sensitivity with respect to voters having a disability." But county supervisors of elections are responsible for conducting such training. They are required to "contract with a recognized disability-related organization, such as a center for independent living, family network on disabilities, deaf service bureau, or other such organization, to develop and assist with training the trainers in disability sensitivity programs."

Poll Worker Training Content
The content of poll worker training is detailed in State statutes.

Clerks must demonstrate "a working knowledge of the laws and procedures relating to voter registration, voting system operation, balloting and polling place procedures, and problem-solving and conflict-resolution skills"—Section 102.014(1), *Florida Statutes.*

The Uniform Polling Place Procedures Manual must include: regulations governing solicitation by individuals and groups at the polling place; procedures to be followed with respect to voters whose names are not on the precinct register; proper operation of the voting system; ballot handling procedures; procedures governing spoiled ballots; procedures to be followed after the polls close; rights of voters at the polls; procedures for handling emergency situations; procedures for dealing with irate voters; the handling and processing of provisional ballots; and security procedures—Section 102.014(5)(a-k), *Florida Statutes.* The manual "shall provide specific examples of common problems encountered at the polls on election day, and detail specific procedures for resolving those problems."

Poll worker training on issues of etiquette and sensitivity for disabled voters "must include actual demonstrations of obstacles confronted by disabled persons during the voting process, including obtaining access to the polling place, traveling through the polling area, and using the voting system"—Section 102.014(7), *Florida Statutes.*

Poll Worker Minimum Hours of Training
Section 102.014(4), *Florida Statutes,* specifies that clerks must have had a minimum of three hours of training prior to each election to be eligible to work at the polls. For inspectors, there is

a minimum of two hours of training. Section 102.014(7), *Florida Statutes*, requires one hour involving training related to etiquette and sensitivity with regard to voters with disabilities.

Poll Worker Recruitment

Supervisors of elections are required to "work with the business and local community to develop public-private programs to ensure the recruitment of skilled inspectors and clerks"—Section 102.014(6), *Florida Statutes*.

What needs to be done? There is no established procedure for evaluating the effectiveness of poll worker training or recruitment as there is for voter education. The 2002 Governor's Select Task Force on Election Procedures, Standards, and Technology report of December 30, 2002, recommended "establishing minimum standards for poll worker performance" and "improving poll worker recruitment and training by launching a statewide "Be a Poll Worker" campaign.

The HAVA Planning Committee recommends that the Division of Elections establish a procedure to evaluate the effectiveness of poll worker recruitment and training in all 67 counties.

Element 4. Voting System Guidelines and Process

How the State will adopt voting system guidelines and processes which are consistent with the requirements of Section 301.

Introduction

There are several governmental bodies and agencies that participate in the adoption of voting systems in Florida. The Florida Legislature has great authority to set voting system requirements and does so in Chapter 101, *Florida Statutes*. The legislature also delegates rule making and certification authority to the Bureau of Voting Systems Certification in the Division of Elections under the Secretary of State.

After voting systems are independently tested and certified for use in Florida, Section 101.5604, *Florida Statutes*, provides that the Board of County Commissioners "at any regular or special meeting called for the purpose, may, upon consultation with the supervisor of elections, adopt, purchase or otherwise procure, and provide for the use of any electronic or electromechanical voting system approved by the Department of State in all or a portion of the election precincts of that county."

To keep Florida's voting systems standards up-to-date, Section 101.015, *Florida Statutes*, requires the Department of State to review "the rules governing standards and certification of voting systems to determine the adequacy and effectiveness of such rules in assuring that elections are fair and impartial."

Section 254(a)(4) How will the State of Florida adopt voting system requirements and processes which are consistent with the requirements of Section 301?

Florida's laws and regulations for adopting voting systems that are consistent with the requirements of Section 301 are clearly outlined in *Florida Statutes* and the Florida Voting Systems Standards.

Section 101.015, *Florida Statutes*, authorizes the Department of State to adopt rules which establish minimum standards for hardware and software for electronic and electromechanical voting systems.

Section 101.017, *Florida Statutes*, creates the Bureau of Voting Systems Certification which provides technical support to the supervisors of elections and is responsible for voting system standards and certification.

Section 101.5605, *Florida Statutes*, authorizes the Department of State to examine and approve voting systems through a public process to ensure that the voting systems meet the standards

outlined in Section 101.5606, *Florida Statutes,* and similar standards outlined in the Help America Vote Act of 2002 (HAVA) requirements outlined in Section 301 of Title III.

Section 101.5604, *Florida Statutes,* authorizes the Board of County Commissioners to adopt voting systems.

Sections 101.293-101.295, *Florida Statutes,* outline the public bidding process that counties should follow in purchasing voting systems.

Section 101.56062, *Florida Statutes,* exceeds the accessibility standards of HAVA Section 301 "Accessibility for Individuals With Disabilities." The HAVA Planning Committee has recommended that the Florida Legislature take advantage of federal funding and bring Florida into compliance and make Section 101.56062, *Florida Statutes,* effective by January 1, 2006 or one year after general appropriations are made, whichever is earlier.

Section 101.015, *Florida Statutes,* requires the Department of State to review "the rules governing standards and certification of voting systems to determine the adequacy and effectiveness of such rules in assuring that elections are fair and impartial."

Element 5. Florida's Help America Vote Act of 2002 (HAVA) Election Fund

How the State will establish a fund described in subsection (b) for purposes of administering the State's activities under this part, including information on fund management.

To clarify, Section 254(b) states that a fund described in this subsection with respect to a State is a fund which is established in the treasury of the State government, which is used in accordance with paragraph (2), and which consists of the following amounts:

(A) Amounts appropriated or otherwise made available by the State for carrying out the activities for which the requirements payment is made to the State under this part.
(B) The requirements payment made to the State under this part.
(C) Such other amounts as may be appropriated under law.
(D) Interest earned on deposits of the fund.

Section 254(a)(5) How will the State of Florida establish a fund for the purpose of administering the State's activities under this part?

All HAVA funds will be maintained in a trust fund that has already been established by the Department of State. Within this trust fund, monies received for HAVA Sections 101, 102 and Title II will be set up into four accounts: 101-Election Administration, 102-Replace Punch Card and Lever Voting Systems, 251-Requirements Payment, and 261-Access for Individuals with Disabilities.

Section 254(a)(5) How will the State of Florida manage this fund?

Any HAVA funds received by the State will be used exclusively for activities authorized by HAVA. The Division of Elections is responsible for tracking and monitoring the use of funds in accordance with established State procedures.

The Director of the Division of Elections will have final signing authority for HAVA expenditures. Any interest earned on this trust fund will be returned to the principal amount of the trust.

Standard auditing procedures for monitoring the use of federal funds will be used for the receipt and the distribution of HAVA funds. These standard procedures include random program audits by the Department of State Inspector General as well as an annual audit by the Florida Auditor General.

The Governor and Secretary of State will be responsible under HAVA for ensuring compliance with these requirements. The HAVA Planning Committee recommends that the Governor and the Secretary of State maintain contact with the Senate President and the Speaker of the House of Representatives to ensure they remain aware of the strict requirements set in law for the use of HAVA monies placed in this trust fund.

Element 6 – Florida's Budget for Implementing the Help America Vote Act of 2002 (HAVA)

The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on –

(A) the costs of the activities required to be carried out to meet the requirements of Title III;
(B) the portion of the requirements payment which will be used to carry out activities to meet such requirements; and
(C) the portion of the requirements payment which will be used to carry out other activities.

Introduction
The HAVA Planning Committee clearly recognizes its advisory role in election reform and acknowledges the authority of the Florida Legislature to make funding decisions for Florida. This budget reflects the HAVA Planning Committee's best efforts to divide the funds that may be available during the three years identified in HAVA. If Florida receives more funds than are included in this budget, the HAVA Planning Committee will revise the budget to reflect this change.

During the HAVA Planning Committee discussions, members determined the following to be priorities for using HAVA funds in Florida:

Reimbursement for replacement of punch card and lever machines.
Following the 2000 General Election, the State of Florida assisted counties by investing approximately $24 million to replace outdated voting machines. Under Section 102 of HAVA, the State of Florida is eligible to receive as a reimbursement approximately $11.7 million. The HAVA Planning Committee recommends that HAVA funds be distributed to the State and to each county that replaced outdated punch card and lever voting machines following the 2000 General Election on a pro rata basis.

Statewide Voter Registration System.
The HAVA Planning Committee recommends $1 million in HAVA funds be used for Phase One development of the statewide voter registration system required under Title III. These funds will be used for a variety of consulting fees, purchases of hardware and software for system development, expenses incurred by staff in the Division of Elections and travel expenses for advisory board members who assist with design of the project.

For the development and operation of the new statewide voter registration system required under HAVA, the HAVA Planning Committee recommends that the State of Florida create nine new positions.

- Two positions under the Department of Highway Safety and Motor Vehicles
- Two positions under the Department of Law Enforcement
- Five positions under the Department of State

It is anticipated that a significant portion of HAVA funds will be used for the design and implementation of the statewide voter registration database. Research conducted during Phase One of the system development will provide the State of Florida with an estimate of the cost of the new voter registration system. A preliminary estimate of $18.5 million has been included in this budget. However, a more precise figure will be determined during Phase One of the system development process and the HAVA Planning Committee will include this new figure in the next update of the HAVA State Plan, if available.

Section 301 Accessible Voting Systems

The HAVA Planning Committee recommends, in order to meet HAVA accessibility for voters with disabilities requirements, the purchase of Direct Recording Equipment (DRE) accessible to persons with disabilities to ensure that each county has one accessible voting system for each polling place. The estimated cost is $11.6 million during the 2004-2005 fiscal year.

In addition, the HAVA Planning Committee recommends reimbursing counties that have already purchased voting systems that meet the HAVA accessibility for voters with disabilities requirements. The estimated cost for this reimbursement is $17 million.

Voter Education

The HAVA Planning Committee recommends using HAVA funds for the development and implementation of a comprehensive statewide voter education program. The estimated expenditure is a total of $9 million distributed to the counties and spread over the 2003-2004, 2004-2005 and 2005-2006 fiscal years.

Poll Worker Training

The HAVA Planning Committee recommends using HAVA funds in the amount of $250,000 for each fiscal year 2003-2004, 2004-2005 and 2005-2006 for poll worker training. These funds are intended to supplement each county's existing poll worker training budget.

Statewide Pollworker Recruitment Campaign

The HAVA Planning Committee recommends that HAVA funds be used to implement, through the Division of Elections, a statewide campaign to help recruit qualified pollworkers. The increase in the complexity of voting systems and procedures has resulted in a need for more computer literate individuals to staff the polling places and help ensure error-free elections. It is estimated that $500,000 in HAVA funds should be expended by the Department of State in the 2003-2004 fiscal year.

HAVA Oversight and Reporting

The HAVA Planning Committee recommends that the Department of State create three full time positions to manage HAVA implementation. The estimated cost for HAVA oversight and reporting is $206,079 for the 2003-2004 fiscal year, $196,485 for the 2004-2005 fiscal year and $200,719 for the 2005-2006 fiscal year.

- HAVA administrator
- Grants specialist
- Administrative assistant

State Management (HAVA Planning Committee)

The HAVA Planning Committee recommends that the Secretary of State require it to meet twice each year in 2003-2004 and in 2004-2005 to make recommendations and to resubmit the HAVA State Plan to ensure that Florida is meeting the requirements of the Help America Vote Act. This participatory process will convene once in the 2003-2004 fiscal year at an estimated cost of $30,000, twice in the 2004-2005 fiscal year at an estimated cost of $60,000 and once in the 2005-2006 fiscal year at an estimated cost of $30,000.

Performance Goals and Measures Adoptions

The HAVA Planning Committee recommends the Secretary of State utilize the HAVA Planning Committee to determine performance goals and measures. The estimated cost is $160,000 to be expended in the 2003-2004 and 2004-2005 fiscal years.

Election Administration

The HAVA Planning Committee recommends HAVA funds be used for the design and production of new voter registration forms and publications, and translations for all election administration forms and publications. The estimated cost is $250,000 for each fiscal year 2003-2004, 2004-2005 and 2005-2006.

Complaint Procedures

Section 402(a) of HAVA requires each State to establish State-based administrative complaint procedures for any person who believes that there is or will be a violation of any of HAVA's Title III requirements. The HAVA Planning Committee recommends that HAVA funds in the amount of $50,000 per year for the 2004-2005 and 2005-2006 fiscal years be budgeted for the administration of the complaint procedures process.

Requirement 6
(A) Based on the State's best estimates, what are the costs of the activities required to carry out to meet the requirements of Title III?
(B) What portion of the requirements payment will be used to carry out activities to meet such requirements?
(C) What portion of the requirements payment will be used to carry out other activities?

This information is displayed in charts on pages 53 and 54.

HAVA Estimated Budget Funding by Fiscal Year

	2003-2004	2004-2005	2005-2006	Total
Title I Requirements				
Reimbursement for replacement of punch card and lever machines. (Section 102 HAVA)	11,740,000*			11,740,000
Title III Requirements				
Sec. 303 Statewide Voter Registration System				
Phase One Development –research, planning & design (Section 101 HAVA Funds)	1,000,000*			1,000,000
9 full time positions – salaries	520,000*	533,000	546,325	1,599,325
9 full time positions – expenses	125,235*	97,686	97,686	320,607
Operating capital outlay	13,500*	TBD	TBD	13,500
Phase Two - Develop and implement statewide voter registration system (Section 252 Requirements Payment)		9,250,000	9,250,000	18,500,000
Sec. 301 Voting System Standards (Section 252 Requirements Payment)				
Accessibility for voters with disabilities (compliance)		11,600,000		11,600,000
Accessibility for voters with disabilities (reimbursement to counties)			17,000,000	17,000,000
Other Election Reform Activities (Section 101 HAVA funds 2003-2004 activities; Section 101 and Section 252 HAVA fund activities 2004-2005 and beyond)

Total	**17,714,814**	**25,367,171**	**30,674,730**	**73,756,715**

* These items were included in the 2003-2004 General Appropriations Act as passed by the Legislature and signed by the Governor. All expenditures in 2003-2004 will be from Section 101 and Section 102 HAVA funds.

	Election Reform Estimated Revenues 2003-2005 Fiscal Years			
	HAVA 101	HAVA 102	HAVA 252	Total Federal Funds
2003 Estimate	$ 14,720,000	$ 11,740,000	$ 47,528,000	$ 73,988,000
2004 Estimate	0	0	TBD	TBD
2005 Estimate	0	0	TBD	TDB

Element 7. Maintenance of Effort

How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.

Introduction

The funding provided under the Help America Vote Act of 2002 (HAVA) is intended to pay for new or enhanced election efforts and is not intended to supplant existing funding at the State or county level. The projected HAVA budget is based on the assumption that the State of Florida and counties will maintain the foundation of election operating expenditures for the fiscal year ending prior to November 2000.

The Florida Division of Elections provides statewide coordination and direction for the interpretation and enforcement of election laws. The Division's budget supports year-round staff that provides election-related assistance to Florida's 67 county supervisors of elections and their staff, municipalities, special districts, county and city attorneys, candidates, political committees, committees of continuous existence, elected officials, media, the public and other election officials throughout the United States.

Section 254(a)(7) How will the State of Florida maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000?

In determining Florida's maintenance of effort expenditures, the Division of Elections calculated 1999-2000 fiscal year expenditures which included salaries and benefits, operating capital outlay and voter fraud programs for the Division of Elections Director's office and the portion of Bureau of Election Records' expenditures pertaining to election administration. Florida's expenditures for these activities for 1999-2000 fiscal year totaled $3,082,224.

In order to comply with Section 254(a)(7) of HAVA, the Florida Department of State will maintain expenditures on similar activities at a level equal to the 1999-2000 fiscal year budget.

The HAVA Planning Committee recommends that the Secretary of State communicate to the Senate President and the Speaker of the House of Representatives the importance of maintaining this maintenance of effort figure, as a minimum level of expenditures, to ensure the required level of spending is appropriated by the Florida Legislature.

Element 8. Performance Goals and Measures

How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.

Introduction

Florida has a very decentralized election governance and administrative system. The Secretary of State is appointed by the Governor and is the legal Chief Election Official in Florida. However, the Secretary of State does not supervise the day-to-day operations of the 67 local supervisors of elections and only provides guidance through technical assistance, rules, advisory opinions, voting system certification, and producing standardized election forms.

In Florida, it is the local supervisor of elections that has constitutional authority to conduct elections through State law and rule. The supervisors are elected to 4-year terms by the registered voters of their respective counties (except for Miami-Dade's appointed supervisor) and have broad authority to conduct the day-to-day election operations by appointing local election officials, administering voter registration, preparing ballots, administering absentee voting, conducting poll worker training, and developing voter education programs.

Yet, the new Help America Vote Act of 2002 (HAVA) requires the State and not the local supervisors to adopt performance goals and measures for determining statewide and local election reform success.

It should be noted that Florida already requires certain reports on the performance of voting systems and voter education. By December 15 of each general election year, the Florida Legislature requires local supervisors of elections to report on performance measures such as overvotes and undervotes, ballot designs, and voting instructions (Section 101.595, *Florida Statutes*). Similarly, the Florida Legislature requires local supervisors of elections by December 15 of each year following a general election to prepare a public report on the effectiveness of voter education programs (Section 98.255(3)(a), *Florida Statutes*).

However, neither of these statutes follows the specific format that is required under HAVA. Nor do the statutes or rules outline performance measures for the remaining elements of the HAVA State Plan.

Florida must comply with this HAVA requirement. The most effective and egalitarian way for Florida to define election reform success of HAVA is to carry out a collaborative process similar

to the HAVA Planning Committee. The participatory process will ensure that Florida will clearly define the goals, the success measures, the timetables, and accountable officials through a public forum consisting of State election officials, local election officials, and interested citizens.

Section 254(a)(12) How will Florida adopt performance goals and measures that will be used by the State to determine its success and the success of local government in carrying out the plan, including—

- **Timetables for meeting the elements of the plan**
- **Descriptions of the criteria the State will use to measure performance**
- **The process used to develop such criteria**
- **A description of which official is to be held responsible for ensuring that each performance goal is met?**

In the spirit of HAVA and in participatory election reform, the HAVA Planning Committee recommends that the Secretary of State utilize the HAVA Planning Committee for determining its performance measures and goals for successfully carrying out the HAVA State Plan. The composition of the HAVA Planning Committee consists of State and local election officials, along with interested citizens. The overall goals of the HAVA Planning Committee are:

1. To recommend specific success factors, outline timetables, and assign accountability toward meeting the goals of the HAVA State Plan.

2. To continue building public participation and confidence in Florida's election reform process.

The HAVA Planning Committee should begin work as soon as possible and finish its work no later than the end of 2003. It should conduct its business in the same manner as the HAVA State Plan was developed utilizing locations around the State to encourage public participation. The HAVA Planning Committee suggests that the Secretary of State use a qualified facilitator to assist in this process. The funding to develop the performance goals and measures should come from HAVA Section 101 federal funds.

The HAVA Planning Committee should take each element of the HAVA State Plan and provide specific State and local criteria which are measurable and within HAVA deadlines. The HAVA Planning Committee should define the HAVA State Plan elements and prepare specific goals and measurements to determine success. The HAVA Planning Committee should address the following 13 planning elements:

1. Voting Systems—Absentee ballot issues, Accessibility issues (Not in compliance)
2. Provisional Voting and Information (Not in compliance)
3. Voter Registration System (Not in compliance)

4. Voter Education Programs, Election Official Training, and Poll Worker Training (In compliance)
5. Voting System Guidelines and Process (In compliance)
6. State Trust Fund (In compliance)
7. State Budget (In compliance)
8. Maintenance of Effort (In compliance)
9. Administrative Complaint Process (In compliance)
10. Title One Payments and Activities (In compliance)
11. State HAVA Management (In compliance)
12. Changes to HAVA State Plan (In compliance)
13. HAVA Planning Committee and Procedures (In compliance)

The measurable criteria should provide State and local election officials clear information about what stage, how and who is implementing the HAVA State Plan. Listed below is a sample of how the HAVA Planning Committee might outline and define performance goals and measures. Included in this process would be a description of the major elements, the mandated deadline, goals of the planning element, measurable criteria, and the accountable official.

Sample Performance Measure

Planning Element:	Accessible Voting Systems
HAVA Deadline:	January 1, 2006
Goal:	Provide one accessible voting system for every polling place.
Measurement:	• Division of Elections certifies eligible voting systems; • Local Supervisors submit recommendations for purchase of certified voting systems; • Legislature or Board of County Commissioners appropriates funds for certified voting systems; • Division of Elections conducts statewide census of one certified machine for persons with disabilities for every polling place; • Local Supervisors certify that one accessible voting system is functioning for every polling place.
Timetable:	Begin August 1, 2003 End December 1, 2005
Accountable Official:	Chief, Bureau of Voting Systems Certification

Element 9. State-Based Administrative Complaint Procedures to Remedy Grievances

A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402.

Introduction
To receive any requirements payment pursuant to the Help America Vote Act of 2002 (HAVA), the State of Florida must establish and maintain State-based administrative complaint procedures which meet HAVA's requirements to:

(1) be uniform and nondiscriminatory;
(2 provide that any person who believes that there is or will be a violation of any of HAVA's Title III requirements may file a complaint;
(3) require the complaint to be in writing, sworn and notarized;
(4) permit complaints to be consolidated;
(5) hold a hearing on the record at the request of the complainant;
(6) provide an appropriate remedy if the State determines that there is a violation of any Title III provision;
(7) if the State determines there is no violation, dismiss the complaint and publish the results of procedures;
(8) make a final determination on a complaint within 90 days after filing unless the complainant consents to a longer period; and,
(9) use alternative dispute resolution procedures to resolve the complaint if the State fails to resolve it within 90 days.

Section 402(a): Has Florida complied with the requirements of HAVA Section 402(a) to establish State-based administrative complaint procedures to remedy grievances?

Yes, and no further actions are required.
Appropriate administrative complaint procedures were included in Chapter 2003-415, *Laws of Florida*. Language in the legislation tracked HAVA's language closely. These procedures are similar to administrative procedures in Section 97.023, *Florida Statutes*, for resolving complaints generated by alleged violations of the National Voter Registration Act of 1993 or a voter registration or removal procedure under the Florida Election Code.

Florida's legislation established a new Section 97.0535, *Florida Statutes*, that, in addition to tracking HAVA's minimum requirements, included the following additional requirements not specified by HAVA:

(1) the Department of State would have sole jurisdiction for these purposes and the procedures would be the sole avenue of redress for alleged Title III violations;
(2) a complaint would have to state the alleged violation and the person or entity responsible for the violation;
(3) the Department of State would be required to inform a complainant in writing if a complaint was legally insufficient;
(4) proceedings would be exempt from Chapter 120, *Florida Statutes,* (Administrative Procedures Act);
(5) a hearing would be held by a hearing officer whether or not a complainant requested a hearing and specific procedures for a hearing were included in the legislation;
(6) the hearing officer would direct an appropriate remedy that then would be enforced by the Department of State;
(7) mediation would be the alternative dispute resolution method used if a final determination on a complaint was not made within 90 days of filing.

Element 10. Effect of Title I Payments

If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

Introduction
Title I of the Help America Vote Act of 2002 (HAVA) is an "early out" money program for use in two areas—improving election administration and the replacement of punch card and lever voting systems. Each State is guaranteed to receive a minimum of $5 million under this program. The HAVA Planning Committee recommends using Section 101 HAVA funds for 2003-2004 activities and a combination of Section 101 and Section 252 HAVA funds for activities beginning in the 2004-2005 fiscal year and beyond.

Under Title I, Section 101 funds are to be used to improve election administration. Approved use of funds under this section includes:
(A) Complying with the requirements under Title III.
(B) Improving the administration of elections for Federal office.
(C) Educating voters concerning voting procedures, voting rights, and voting technology.
(D) Training election officials, poll workers, and election volunteers.
(E) Developing the HAVA State Plan for requirements payments.
(F) Improving, acquiring, leasing, modifying, or replacing voting systems.
(G) Improving polling place accessibility for voters with disabilities or with limited English.
(H) Establishing toll-free telephone hotlines for voters to access voting information, report voting fraud, or report voting rights violations.

Under Title I, Section 102 funds are to be used to replace punch card and lever voting systems.

The HAVA Planning Committee clearly recognizes its advisory role in election reform and acknowledges the authority of the Florida Legislature to make funding decisions for Florida. The following recommendations are based on the HAVA Planning Committee meetings held to develop the HAVA State Plan.

Section 101. How will Title I payments to Florida be used for activities to improve administration of elections?

The State of Florida will use Title I funds for election reform activities necessary to ensure Florida complies with all HAVA requirements. The following list describes the major areas in which funds may be used.

(A) Complying with the requirements under Title III

The Division of Elections will implement a statewide voter registration system to comply with HAVA Title III. The Division of Elections anticipates using $1 million appropriated from Section 101 funds for Phase One development of the new Statewide Voter Registration system. Expenditures for Phase One will include:

- Consulting fees which will be required for conducting a detailed analysis of connectivity infrastructure available in the 67 supervisor of elections' offices and within all affected offices of the departments of State, Law Enforcement and Highway Safety and Motor Vehicles; working with the counties, the three agencies and the advisory board to create minimum and optimum sets of system requirements; assessing infrastructure needs of all stakeholders to serve the system requirements; conducting "gap" analysis; outlining the physical design of the system; estimating costs and implementation plans for each version for the system to be presented to the 2004 Legislature; and developing and publishing the January 2004 report and recommendations for the 2004 Legislature.
- Purchase hardware and software for project management and system development.
- Expenses incurred by Division of Elections' staff.
- Travel expenses which will involve visiting every supervisor of elections' office and local driver license office.

In addition, Section 101 HAVA funds will be used to create nine full time positions necessary for the design, development and implementation of the Statewide Voter Registration system.

(B) Improving the administration of elections for Federal office.

Upon receipt of Title I monies, it is recommended that the Division of Elections use $250,000 in fiscal year 2003-2004 from Section 101 funds for expenses that include the design and publication of voter registration forms and other election information, translations for all election administration forms and publications, statewide voter education programs and training workshops.

In addition, funds will be required to establish a State-based complaint procedure for anyone who believes that a violation of Title III of the Help America Vote Act has occurred, is occurring or is about to occur. It is estimated that this process will be established at an estimated cost of $100,000. If no Title I funds are remaining, this activity will be funded from Section 252 HAVA funds.

(C) Educating voters concerning voting procedures, voting rights, and voting technology.

Upon receipt of Title I monies, it is recommended that the Florida Division of Elections use approximately $9 million over a three year period for voter education programs.

These funds will be divided among Florida's 67 counties. To determine the amount each county will receive, the Division of Elections shall divide the total amount of funds appropriated by the total number of registered voters in the State of Florida for the 2002 General Election to establish a funding level per individual voter. Each county shall receive an amount equal to the funding level per individual voter multiplied by the number of registered voters in the county, as certified by the Department of State for the 2002 General Election.

(D) Training election officials, poll workers, and election volunteers.

The HAVA Planning Committee recommends using HAVA funds in the amount of $250,000 for each fiscal year 2003-2004, 2004-2005 and 2005-2006 for poll worker training. These funds are intended to supplement each county's existing poll worker training budget.

(E) Developing the HAVA State Plan for requirements payments to be submitted under part 1 of subtitle D of Title II.

There are no plans to use Title I funds for the development of Florida's HAVA State Plan for 2003-2004 fiscal year. As the State of Florida modifies its plans in future years, HAVA funds may be used.

(F) Improving, acquiring, leasing, modifying, or replacing voting systems.

Florida has already replaced its punch card and lever voting systems. It is recommended that Section 102 funds be used to reimburse the State and each eligible county, on a pro rata basis, for punch card and lever machines purchased in 2001-2002 and 2002-2003 fiscal years.

The HAVA Planning Committee also recommends that the State of Florida utilize some HAVA funds to help counties meet the accessibility requirements under Title III by the January 1, 2006 deadline. The estimated amount to comply with this requirement is $11.6 million and the funds would be distributed according to the number of accessible DREs for each county to have one audio ballot per polling

place. The HAVA Planning Committee estimates that these units will be purchased in the 2004-2005 fiscal year and that Section 252 HAVA funds will be used.

In addition, the HAVA Planning Committee recommends reimbursing counties who have already purchased voting systems that meet the HAVA accessibility for voters with disabilities requirements. The estimated cost for this reimbursement is $17 million and it is anticipated that Section 252 HAVA funds will be used.

(G) Improving polling place accessibility for voters with disabilities or with limited English.

Under Section 261, HAVA states the Secretary of Health and Human Services shall make a payment to eligible States to be used for making polling places accessible to individuals with disabilities and providing information on this accessibility. The State of Florida has applied for available funds under this grant program. It is recommended that these funds be distributed to each county to ensure that individuals with disabilities are provided the same opportunity for access and participation as for other voters.

(H)Establishing toll-free telephone hotlines for voters to access voting information, report voting fraud, or report voting rights violations.

Currently, there are no plans to use HAVA funds for establishing a free voting information hotline. If this type of voting information system is desired, it will be the responsibility of each county and monitored by the Division of Elections.

The Division of Elections has already established and plans to expand a voter fraud hotline for individuals who believe they may have witnessed election fraud.

Section 102. How will payments to Florida be used for the replacement of punch card or lever voting machines?

Under Section 102, the State of Florida is eligible for approximately $11.7 million which it will use as reimbursement to the State and eligible counties for funds previously spent to replace punch card and lever voting systems. Currently, 14 counties have replaced punch card and lever machines with machines that are fully compliant with HAVA.

Element 11. Help America Vote Act of 2002 (HAVA) State Plan Management

How the State will conduct ongoing management of the plan, except the State may not make any material change in the administration of the plan unless the change—

(A) is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;

(B) is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and

(C) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).

Introduction
This element of the HAVA State Plan requires Florida to explain how the State of Florida will manage the implementation of the HAVA State Plan and whether it will utilize the same public notice process if any "material change" is made to the administration of the HAVA State Plan.

Section 251(a)(11) How will Florida conduct ongoing management of the HAVA State Plan?

As explained in previous sections of this Plan, the administration of elections in Florida occurs at the State and local levels. The Secretary of State is the Chief Election Officer under Florida law. The Secretary of State as the Chief Election Officer is responsible for the coordination of the State's responsibilities under HAVA Section 253. The Director of the Division of Elections reports to the Secretary of State and will be responsible for the day-to-day monitoring and managing of Florida's HAVA State Plan. Through the approval and implementation of this HAVA State Plan, it is expected that the Director will have three new positions dedicated to HAVA program management. The scope of responsibilities will range from federal reporting and grant compliance to assistance with voter education, election official training and updating the HAVA State Plan.

Also at the State level, the Secretary of State will direct the HAVA Planning Committee to update the HAVA State Plan as required in Section 255. Under Florida's HAVA State Plan, the HAVA Planning Committee will be responsible for conducting its business in an open, public forum and for suggesting revisions and updates to the HAVA State Plan.

At the local level, Florida's 67 supervisors of elections will be encouraged to play an active role in the successful implementation of the HAVA State Plan. The Division of Elections will continue to work on a regular basis with local supervisors of elections to develop performance goals and measures, new voter registration improvements, new voting systems certification upgrades, statewide voter education programs, election official training, and other activities outlined in Florida's HAVA State Plan.

Section 254(a)(11) If Florida makes any material change in the administration of the HAVA State Plan, will the change—

(A) be developed and published in the Federal Register in accordance with Section 255 in the same manner as the HAVA State Plan;

(B) be subject to public notice and comment in accordance with Section 256 in the same manner as the HAVA State Plan; and

(C) take effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A)?

The State of Florida understands and agrees to comply with the HAVA requirements related to ongoing management of the HAVA State Plan. No material changes in the administration of the plan will be made unless:

- the material change is developed and published in the Federal Register in accordance with Section 255 in the same manner as the HAVA State Plan;
- the material change is subject to public notice and comment in accordance with Section 256 in the same manner as the HAVA State Plan; and
- the material change takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).

Element 12. Changes to State Plan for Previous Fiscal Year

In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year.

Introduction
This is the State of Florida's first Help America Vote Act of 2002 (HAVA) State Plan. There are no previous plans to describe changes or successes under the HAVA. The HAVA State Plan will be updated in the next fiscal year and the Secretary of State will utilize the HAVA Planning Committee to fulfill this element of the plan.

Section 254(a)(12) When Florida has a HAVA State Plan for the previous fiscal year, will the State of Florida provide a description of how the plan reflects changes from the HAVA State Plan for the previous fiscal year and how the State succeeded in carrying out the HAVA State Plan for such previous fiscal year?

Yes, and no further actions are required.

Element 13. State Plan Development and HAVA Planning Committee

A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the committee under such section and section 256.

Introduction
To comply with the requirements of the Help America Vote Act of 2002 (HAVA), the HAVA State Plan must be developed by the chief State election official through a committee of appropriate individuals. After a preliminary plan is developed, it must be published for public inspection and comment. State officials must take public comments into account in preparing the HAVA State Plan submitted to the Federal Elections Commission.

Section 255: Has Florida complied with the requirements of section 255(a) to have the chief State election official develop the HAVA State Plan through a committee of appropriate individuals?

Yes, and no further actions are required.
Florida's Chief State Election Official, Secretary of State Glenda Hood, has the responsibility under HAVA to develop the HAVA State Plan with the assistance of the statewide HAVA Planning Committee. Section 255(a) of HAVA requires that "The chief State election official shall develop the HAVA State Plan under this subtitle through a committee of appropriate individuals, including the chief election officials of the two most populous jurisdictions within the State, other local election officials, stakeholders (including representatives of groups of individuals with disabilities), and other citizens, appointed for such purpose by the chief State election official."

Members of the HAVA Planning Committee for the State of Florida, appointed by Secretary of State Hood, are as follows:

Chairman:
Jim Smith of Leon County, former Secretary of State and former Attorney General

Chief Election Officials of the Two Most Populous Jurisdictions Within the State:
Miriam Oliphant, Supervisor of Elections for Broward County
David Leahy, Supervisor of Elections for Miami-Dade County

Other Local Election Officials:
Kurt Browning, Supervisor of Elections for Pasco County
Susan Gill, Supervisor of Elections for Citrus County
Shirley Green Knight, Supervisor of Elections for Gadsden County

Stakeholders/Representatives of Groups of Individuals with Disabilities:
Dave Evans, State Board Member of the National Federation of the Blind
Jim Kracht, Assistant County Attorney for Miami-Dade County and member of the American Blind Lawyers Association, American Council of the Blind and the Florida Council of the Blind
Richard LaBelle, Secretary of the Florida Coalition on Disability Rights

Other Stakeholders and Citizens:
Joe Celestin, Mayor of the City of North Miami
Anna Cowin, State Senator from District 20
Jane Gross, President of the Florida League of Women Voters
Lindsay Harrington, State Representative from District 72
Arthur Hernandez, Vice Chairman of the Jacksonville Mayor's Hispanic American Advisory Board
Percy Luney, Dean and Professor of Law at Florida A&M University
Reggie McGill, Human Relations Director for the City of Orlando
Isis Segarra, private citizen from Hillsborough County
Lori Stelzer, President of the Florida Association of City Clerks and City Clerk for the City of Venice
Raiza Tamayo, Regional Director of the United States Hispanic Chamber of Commerce

This HAVA Planning Committee convened four times in public meetings to accomplish its work – Tallahassee on April 25, West Palm Beach on May 6, Ft. Myers on May 12 and Orlando on May 15. Press releases were sent to members of the press before each meeting and copies of the press releases were available for the audience at each meeting. In addition, all meetings were noticed in the *Florida Administrative Weekly*. Members of the public and press were welcomed at the meetings. The HAVA Planning Committee heard public comment at each meeting. It was assisted by a non-profit, non-partisan organization, the Collins Center for Public Policy, Inc., that was selected in a public bidding process to serve as staff for the HAVA Planning Committee in developing the HAVA State Plan, and by the Division of Elections of the Florida Department of State.

The HAVA Planning Committee operated in an open process with public deliberations, systematic procedures in accordance with *Robert's Rules of Order*, and majority vote of members who were present when votes were taken. Majority quorums were present at all meetings of the HAVA Planning Committee. The Collins Center, as staff, prepared written materials for the meetings, made presentations to focus the HAVA Planning Committee on

decisions that needed to be made, took notes of all meetings and reported them publicly on its website at www.collinscenter.org. A formal transcript of each meeting also was made and published on the website along with all agendas and other published materials for meetings of the HAVA Planning Committee. The website of the State Division of Elections also included much of this material.

All meetings were held in accessible facilities and were compliant with the Americans with Disabilities Act. Closed captioning service and signers were available at all meetings. Agendas were printed in Braille as well as Spanish and Creole.

Section 256: Will Florida comply with the requirement of Section 256 to have the HAVA State Plan meet the public notice and comment requirements of HAVA?

Yes, and no further actions are required.

Section 256 of HAVA requires that the HAVA State Plan meet the following public notice and comment requirements:

(1) not later than 30 days prior to the submission of the plan, the State shall make a preliminary version of the plan available for public inspection and comment;
(2) the State shall publish notice that the preliminary version of the plan is so available; and
(3) the State shall take the public comments made regarding the preliminary version of the plan into account in preparing the plan which will be filed with the Federal Elections Commission.

After the final HAVA State Plan is submitted to the Federal Elections Commission, that Commission shall cause the HAVA State Plan to be published in the Federal Register in accordance with Section 255(b).

These tasks were performed the Division of Elections and not by the HAVA Planning Committee or its consultants. The work of the HAVA Planning Committee and its consultants was completed when a preliminary version of the HAVA State Plan was prepared, approved by the HAVA Planning Committee, and submitted to the Secretary of State.

After notice was given in the *Florida Administrative Weekly*, the preliminary version of the HAVA State Plan was posted on the Department of State's and the Governor's websites. A link was available on the Department's website so that public comment could be made electronically. Public comments were also received by U. S. mail. Public comments were received from June 13 through July 13 and those public comments were considered in preparing the final plan.

FINAL DRAFT

Chapter 1
ELECTION HISTORY IN THE STATE OF GEORGIA
Pre-2000 General Election

In the State of Georgia, much like every state in the nation, the responsibility for conducting elections falls upon county and municipal governments. In each Georgia county, the local governing authority was responsible for the selection and purchase of the county voting system. The local election superintendent was responsible for the maintenance and testing of the voting systems as well as for the printing of election ballots pursuant to state law.

In the November 2000 General Election, 93,991 ballots in the State of Georgia did not register a vote in the Presidential race, because either: (1) the voter accidentally marked more than one vote for the office; (2) the voter attempted to make a choice, but did not mark the ballot correctly; (3) the voting device failed to count the vote cast; or (4) the voter chose not to vote for the President.

In the weeks following the November 2000 General Election, the Secretary of State compiled information from citizen complaints, minutes of public hearings conducted by the NAACP, analyzed concerns submitted by the League of Women Voters, and interviewed dozens of local election superintendents, voter registrars, and political party leaders to evaluate the state of elections in Georgia.

Through this compilation of information, the Secretary of State identified several themes and trends that have historically plagued Georgia's election process as well as election processes throughout the nation. Through this analysis, the Secretary of State identified the following categories that specifically affected Georgia elections:

- Outdated Voting Equipment
- Ballot Problems

- "Lines too long" & other polling place deficiencies
- Shortage of trained poll workers
- Election law violations
- Slow processing of Absentee Ballots
- Growth of "language minorities"
- State mainframe computer system unreliable
- Counties slow to report election results, and
- Voter registration process costly and slow

The Secretary of State also identified that the state was using four different types of voting systems and noted that no uniformity existed among the counties for counting votes. The Secretary of State further noted that each system experienced a significant amount of undervotes.

As noted in the table below, the Secretary of State conducted a statistical analysis on a county-by county basis of the undervotes that occurred on each type of voting system and calculated that in the 2000 General Election, the average percentage of undervotes for each system used in the State for all counties was 3.6%.

Voting System	Year Invented	Introduced in Georgia	Number of Counties using system	Under vote Percentage	Number of Votes not counted
Paper ballot	1889	1900	2	3.3%	113
Punch card	1890	1964	17	4.6%	38,065
Lever machine	1892	1950	73	4.2%	16,926
Opti-scan -Central count -Precinct count	1980	1986	67	 4.2% 4.7%	 21,999 16,196

Based on these findings, the Secretary of State prepared a report to the Governor and the Members of the General Assembly compiling the results of the study and recommending that the State:

(1) Adopt a Statewide Uniform Electronic Voting Initiative - Authorize, fund, and deploy a Statewide Uniform Electronic Voting Initiative (SUEVI) to create a single uniform method of voting consistent in every county in the state;

(2) Implement Early Voting - Enhance polling place convenience and reduce Election Day gridlock;

(3) Overhaul the Voter Registration System - Upgrade the state's voter registration database from the slow, unreliable, inflexible, and expensive mainframe system to a flexible state-of-the-art server-based system;

(4) Pursue Poll Worker & Poll Location Alternatives - Seek new alternatives to assist counties in securing new poll locations and recruiting and training poll workers, both of which are in short supply;

(5) Streamline Polling Place Procedures - Reduce and eliminate burdensome paperwork procedures at the polls and move voters more quickly through the voting process;

(6) Consolidate Authority to Remove Deceased Voters from Voter List - Authorize the Secretary of State to remove deceased voters from the voter rolls to assure a more accurate voter list, (responsibility that previously rested solely with the counties); and

(7) Modernize Voter Information Resources - Utilize new centralized technology solutions to offer citizens quicker, easier means to locate their precinct and verify their voter registration.

The report from the Secretary of State not only recommended that the State adopt a single uniform voting platform, but also initiated a shift in policy – transferring a portion of election responsibilities from the counties and election superintendents to the State for funding and deployment of a new statewide election system.

Chapter II
ELECTION REFORM IN THE STATE OF GEORGIA
Post-2000 General Election

As a result of the report and recommendations submitted by the Secretary of State, the General Assembly enacted bipartisan legislation, Senate Bill 213, (hereinafter "SB 213") which the Governor signed into law on April 18, 2001. *Official Code of Georgia Code Annotated § 21-2-300 (hereinafter O.C.G.A. § 21-2-300).* Provisions of this legislation established the policy and the statutory framework for Georgia to move toward identifying and deploying essential changes to the election system.

Chief among the changes to the election system was the policy directive that the Secretary of State would purchase a uniform voting system for casting and counting votes in county, state and federal elections by the July 2004 General Primary, a system to be used in every election thereafter in every county in the state. Additionally, for the first time ever, the Secretary of State was given authority to deploy to the counties a voting system that met requirements established by the Secretary of State. *O.C.G.A. § 21-2-300 (a).* With adoption of this directive, Georgia became the first state in the nation to set a deadline for the implementation of a modern uniform statewide voting system.

O.C.G.A. § 21-2-300 also authorized the Secretary of State to conduct a pilot project to test and evaluate the use of electronic voting systems during the 2001 municipal elections. It created the 21st Century Voting Commission (hereinafter "Voting Commission") to oversee the pilot project. The statute further authorized the Voting Commission to make recommendations to the General Assembly and the Secretary of State. O.C.G.A. § 21-2-300 earmarked the first step in creating meaningful election reform in the State of Georgia.

THE 21ST CENTURY VOTING COMMISSION

The mission of the Voting Commission was very clear -- oversee the electronic voting pilot project to test direct recording electronic (DRE) voting equipment, advise the Secretary of State on the choice of voting equipment to be used statewide in all counties pursuant to Code Section 21-2-300, and report findings to the Governor and the General Assembly by December 31, 2001. The Voting Commission, comprised of balanced partisan representation, included four Democrats, four Republicans, eight Non-Partisan members, one Independent, and one member of the Libertarian Party of Georgia, six local county election officials, the Director of the State Elections Division, as well as five members of the Georgia General Assembly -- three from the House and two from the Senate. The Voting Commission also accepted input from various public interest groups representing minorities, disabled voters and multi-lingual groups.

As its first priority, the Voting Commission began investigating voting systems and establishing standards that a voting system would have to meet in order to be considered for the pilot project and use in the State of Georgia. The standards included:

(1) A convenient and intuitive voter interface;
(2) Features that prohibit duplicate, or overvotes;
(3) Opportunity to correct undervote or overvotes on ballot;
(4) Strong security components to assure that votes cannot be lost or cast without authorization;
(5) The capability to print, if required, a written record of each ballot cast;
(6) The flexibility to store and present thousands of different ballot variations or "styles";
(7) The capability to be fully accessible to blind voters and those with other disabilities and allow disabled voters to cast their ballot independently and without assistance;
(8) The ability to compute final results and generate a variety of election reports very quickly; and
(9) A turnkey system that would allow each county to conduct any election from start to finish without any assistance from the Vendor.

THE PILOT PROJECT

Upon establishing the system standards of the voting platform, the Voting Commission began preparing for the November 2001 Pilot Project. In response to an RFP commissioned by the Voting Commission, seven DRE system vendors petitioned to participate in the November 2001 Pilot Project. At a June meeting of the Voting Commission in Atlanta, all seven vendors demonstrated their systems and presented their experience and track record in the industry. The Voting Commission recommended that all seven vendors be allowed to participate in the project, provided that each vendor obtained the necessary national and state certifications in time to adequately prepare for the November 2001 Election.

The Secretary of State entered into contracts with six certified vendors to conduct the Pilot Project. Using a lease agreement, the vendors agreed to provide voting systems for the Pilot Project at a special rate of $600 per voting unit. The contracts required that vendors transport the units to and from the cities, provide training for both election superintendents and poll workers, assist with voter education efforts via public demonstrations, and have staff present in precincts to provide Election Day support.

The Voting Commission held five public hearings and additional sub-committee work sessions across the State of Georgia. In these hearings, the Voting Commission reviewed data on voting error rates, heard presentations from manufacturers of electronic voting equipment and testimony from election officials from Georgia and other states, considered comments from interest groups, stakeholders, and the general public on voting issues, and reviewed the election results from the Pilot Project. Several Voting

Commission delegations also traveled to other states to personally observe elections in which DRE voting equipment was used.

Based on information obtained from the extensive analysis and review of data, public testimony, and observations obtained from the Pilot Project, the Voting Commission made the following system recommendations to the Governor and members of the General Assembly:

1) Georgia's uniform election platform should be a DRE voting system used for Election Day in-precinct voting, for in-person absentee voting, and, if authorized by new legislation, for in-person "advance" or "early" voting. The DRE system selected should have the capability to prevent duplicate, or overvotes, provide voters with a "summary screen" to warn voters of potential undervotes or selection errors, and include a process for voters to correct errors or omissions before a final vote is cast. The system should include on-board battery back up in case of power failure, have the capability to produce an independent and paper audit trail of every ballot cast and should permit a visually impaired voter, and others with disabilities, to cast a ballot independently and without assistance.

2) For absentee voting by mail, the uniform system should include an optical scan component. The optical scan component should integrate seamlessly with the DRE components of the system for ballot preparation and tabulation.

3) The uniform election system should be controlled by an Election Management System or software program that will allow election officials to easily design both DRE and optical scan ballot formats simultaneously, that will integrate all results into a single vote tallying report and that will easily interface with existing and future voter registration systems.

4) The state should seek to maximize the benefits of statewide negotiating and purchasing capacity by securing a statewide software license, as well as favorable pricing for technical support, maintenance and additional or replacement equipment that is made available for the benefit of local governments.

The Voting Commission unanimously adopted these recommendations and submitted them to the Governor and members of the General Assembly in December 2001.

SYSTEM SELECTION

Based upon the success of the Pilot Project and the recommendation from the Voting Commission, the Governor authorized and the General Assembly approved a Statewide Uniform Electronic Voting Initiative Fund (SUEVI) and authorized $54 million in bond funds for the purchase of a statewide uniform electronic voting system. The Governor also authorized $3.8 million for the first ever voter education fund and $500,000 for the creation of an Election Center for election official training and support at Kennesaw State University (the Kennesaw State University Center for Election Systems, hereinafter "KSU Center for Election Systems").

Upon establishment of the election fund, the Secretary of State and the Georgia Technology Authority (hereinafter "GTA") initiated a Request for Proposal process ("RFP") in January 2002 and began evaluating proposals from vendors capable of supplying a Direct Recording Electronic Voting System on a statewide basis for 2926 precincts in 159 counties. The RFP required each vendor to submit a proposal that included: voting system specifications, pricing plans, deployment plan and schedule, training plan and schedule for hardware and software training, a service plan -- both short term and long term, and a proposal for voter education efforts.

In response to the RFP, nine vendors submitted bids for the deployment of a statewide voting system and a very intensive proposal and demonstration process began with the assistance of the Georgia Technology Authority. Through multiple evaluations by GTA and the evaluation committee, Diebold Election Systems, Inc. (hereinafter "Diebold") was recommended as the best value for the state.

The State of Georgia entered into a contract with Diebold on May 3, 2002, wherein the State of Georgia and Diebold agreed to deploy a uniform voting system in every county within a 6-month implementation period (186 days prior to the November 5, 2002 election).

SYSTEM DEPLOYMENT

The deployment plan included in Diebold's response to the State's RFP included the following phases:

System Testing

- 19,015 touch screen voting stations, 400 absentee ballot systems and 161 voting system servers to be tested a minimum of 4 times throughout deployment at:
  - Manufacturer's warehouse;
  - Central processing warehouse;
  - Acceptance testing at the county location by KSU; and
  - Logic and Accuracy testing conducted by Diebold and County election staff days before the November election;

System Deployment

- Secretary of State created a formula based on DRE units per number of active registered voters per county to determine the number of DRE units each county would receive;
  - Counties were divided into 12 delivery regions;
  - Dates were established for delivery of components of the voting system to the Counties;
  - Site surveys were conducted of polling places for assurances of adequate electrical supply, structural support of the building and security of the building for protection of the voting system;
  - Intergovernmental Agreements were created between the State and each county, to, among other things, specify the storage, protection and use of the voting system.

Voter Education

- Creation of uniform poll worker training video, voter education video and 30-second public service announcement entitled "Touch the Future";
- State, regional and county level "Voter Education Coordinators" to conduct hands-on DRE demonstrations in every county;
- Printed materials to be distributed through U.S. mail and selected community groups;
- Comprehensive voter education website with interactive equipment demonstration;

- DRE unit demonstrations were conducted in a variety of settings;

System Training

- Election official training on the operation of the voting system officials provided by Diebold;
- On-site county training at the request of the county by the KSU Center for Election Systems;
- Regional "refresher" sessions conducted by the State Elections Division;
- Poll worker training (at least 2 per precinct for all 2,926 precincts) provided in the county by Diebold; and
- Additional training on demand conducted by KSU Center for Election Systems and Diebold.

As a result of the detailed deployment plan, which included equipment deployment, voter education, election official training, voter education coordination at the regional and local level, and voter participation and enthusiasm of state election officials and poll workers, the November 2002 General Election in Georgia was an overwhelming success. The undervote rate for the 2002 U.S. Senate Election was a historically low 0.86% (a dramatic reduction, compared to the 2000 Presidential Election undervote rate of 3.5% and the 1998 U.S. Senate Election undervote rate of 4.8%). The State of Georgia successfully completed its first step in achieving meaningful election reform in the State of Georgia and the entire nation.

CHAPTER III
TITLE III REQUIREMENTS OF THE HELP AMERICA VOTE ACT OF 2002

With the successful completion of the nation's largest ever election using a modern electronic uniform voting system, and a broad based effort by state and local policymakers committed to election reform, Georgia took a giant step toward improving the accuracy and convenience of elections in the State of Georgia.

This success was built upon the proactive steps taken in anticipation of the proposed HAVA legislation by committed Georgia policy makers who embraced election

reform. As reflected in the Status Chart attached as Appendix "A," several requirements under Title III of HAVA were implemented during Georgia's 2002 deployment of its statewide uniform election system. In fact the chart demonstrates that Georgia is approximately 95 to 99% compliant with the mandated requirements of the HAVA.

ACHIEVING COMPLIANCE UNDER THE HAVA

To achieve full compliance with Title III HAVA requirements the Georgia General Assembly in its 2003 Legislative Session considered and passed Senate Bill 258 (hereinafter "SB 258"), which was signed by the Governor on June 2, 2003. SB 258 revises the following six election code areas:

- **Definition of a vote** – The Election Code currently provides for the definition of a vote for each election system used in the State of Georgia for federal, state and local elections; SB 258 authorizes the State Election Board to promulgate rules to consolidate and define a vote as required by HAVA.
- **Registration of first-time voters by mail** – SB 258 amends the Election Code to provide that citizens who register for the first time via U. S. Mail are required to include with that registration form an appropriate form of identification depicting their identity. For those who register by mail and who fail to include such documentation, they will be required to present identification at the polling place, and will not have the option to overcome that requirement by attesting to an oath.
- **Military and Overseas Ballots** – SB 258 amends the Election Code to designate the Secretary of State as the office to handle military ballot voting procedures, and provides that UOCAVA applications for absentee ballots for

military and overseas voters shall be valid for two election cycles. It also authorizes the Secretary of State to adopt a new ballot oath created by the Federal Voting Assistance Program.

- **Provisional Ballots** – SB 258 amends the Election Code to provide that ballots cast during an election with federal candidates on the ballot at a polling place during extended polling hours as a result of a court order be treated as provisional ballots. It also requires county election officials to provide notification to the voter regarding how to obtain information on whether the provisional ballot was counted and also requires the creation of a free access system that allows the voter to determine whether the provisional ballot was counted or not;
- **"Overvote" Instructions** - The Georgia DRE voting system precludes a voter from casting an "overvote" at the polling place. SB 258 amends the Election Code to provide that the absentee ballot instructions for optical scan mail in ballots include information about overvotes and explain how to avoid them.
- **State Administrative Complaint Procedures** - SB 258 amends the Election Code to authorize the Secretary of State as the designated Chief Election Official to establish and administer an administrative complaint procedure for processing Title III HAVA related complaints in an expedited manner.

Upon approval of SB 258 by the United States Department of Justice, the State of Georgia will have the statutory framework in place to implement all necessary procedures to bring Georgia into 100% compliance with the Help America Vote Act.

CHAPTER IV
ADMINISTRATIVE REQUIREMENTS UNDER THE HELP AMERICA VOTE ACT

In addition to implementing the Title III requirements, the State of Georgia has taken steps to meet and implement the administrative requirements of Title I and II of HAVA in the following manner:

Sec 101
Early Money Out
The State has certified and indicated its participation for receipt of Title I payments through the GSA website;

Sec 101
Toll-Free Access System
The State will study and evaluate the implementation of a toll-free telephone hotline that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Sec 101
Accessibility of polling places for disabled voters
The State intends to survey and supervise the improvement of accessibility and quantity of polling places providing physical access for individuals with disabilities.

Sec 102
Certify replacement of punch card and lever voting systems

The State has replaced punch card and lever voting systems and intends to use Section 102 funding to reimburse the State treasury as permitted by HAVA.

Sec 213
Standards Board Representatives
The State has appointed two Representatives to the Standards Board.

Sec 253
Certification of use of Title II Requirements Payments
The State intends to certify that it will use the Requirements Payments as required by HAVA.

Sec 254
HAVA State Plan
The State has prepared its HAVA State Plan.

Sec 402
Administrative Complaint Procedure
The State intends to implement rules to administer the Administrative Complaint Procedure pursuant to SB 258, which authorizes the Secretary of State to implement a HAVA complaint procedure for resolving Title III complaints within the 60-90 day time frame unless extended by agreement of the complainant.

Sec 706
Military and Overseas Voting Information Office
The Secretary of State pursuant to SB 258 shall be the Designated Military and Overseas voting Information Office and shall report information to the Election Assistance Commission.

CHAPTER V
CONTINUED COMPLIANCE WITH THE HELP AMERICA VOTE ACT

THE HAVA STATE PLAN

1. ***How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections (sec. 254, a, 1)***

- A portion of the Requirements Payments will be used to retire bonded indebtedness incurred to purchase Georgia's new statewide uniform electronic voting system.
- A portion of the Requirements Payments will be used to upgrade and eventually replace the ten-year old centralized voter registration database currently being used by the State. The new system will allow an easier interface and more efficient system functions.

- Additional expenditures will be made in the following areas:
  - Voter education activities
  - Election official training activities
  - Components of the voting system
  - Any other activities allowed under HAVA

2. ***How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph (8), including a description of--***
   (a) The criteria to be used to determine the eligibility of such units or entities for receiving the payment; and
   (b) The methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (sec. 254, a, 2)

Distribution of Requirements Payments

As the State's chief election official, the Secretary of State is authorized by O.C.G.A. § 21-2-300 to implement and deploy a statewide uniform voting system for use by local election officials in county, state, and federal elections. As part of that authority the Secretary of State established a formula to determine the number of voting units and training funds to be delivered to each county. The formula considered among other things the following criteria:

- Number of registered voters in each county
- Number of precincts per county
- Number of poll workers per county
- Number of DRE units for every registered voter per county.

The criteria set forth above allowed the Secretary of State to distribute a proportionate number of DRE units along with voter education training funds and poll worker training funds to every county on a fair and equitable basis.

Distribution of the voting system and training funds were facilitated through the following tools:

- Intergovernmental Agreements for use of voting equipment and training funds
- Expense codes for tracking Training funds disbursement
- Allocation Request Forms for Training funds
- Inventory logs for voting equipment
- Reports indicating the status and success of the projects and activities.

Monitoring of Requirements Payments

Under the current statutory structure, the Secretary of State remains charged with facilitating and maintaining the uniform voting system; accordingly, as the State's chief election official, the Secretary of State will be the officer in charge of monitoring and disbursing HAVA funds.

The Secretary of State has designated the Georgia Office of Planning and Budget as the internal accounting office responsible for disbursing and tracking Title I and Title II funds for projects identified by the Secretary of State for implementing enhancements to election administration.

The Office of Planning and Budget using the expense codes created for disbursing the voting system and training funds in 2002 will continue the use of expense codes and allocation request forms to monitor and track HAVA spending. End of year audits conducted by the State of Georgia Department of Audits and Accounts will be used to monitor HAVA expenditures.

Local and county governments that receive disbursements from the State for enhancements to election administration, whether state or federal funds, will be required to submit allocation request forms and agree to the use of the funds for the designated purpose. Each local government will conduct an end-of-year audit and may be required to submit reports to the Secretary of State indicating the status and success of any projects or activities that receive funding through the Secretary of State.

3. ***How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III (sec. 254, a, 3)***

Voter Education

The Secretary of State created a state level Voter Education Coordinator Program that facilitated statewide educational and training projects, which included regional and local voter education activities.

The Voter Education Coordinator activities included the following initiatives:

- Public relations campaign - New voting system was promoted through extensive print and broadcast media outlets. Training videos, public announcements, and general advertisements were created and distributed statewide.
- U.S. Mail campaign - Voting instructions were mailed to every registered voter in the State. The mailings publicized the new voting system and provided step-by-step voting instructions and procedures.
- Pre-Election Day Demonstrations - Voting units were demonstrated at each precinct on Primary Election Day and throughout the State months and weeks prior to the election.
- Regional Level Voter Education Coordinators - The State was divided into 12 regions and 12 regional coordinators traveled each region conducting scheduled and impromptu DRE demonstrations throughout.
- County Level Voter Education Coordinators - Each County received funding from the State to hire a county level coordinator to conduct DRE demonstrations in coordination with the regional coordinators. Grants of $4,000 and $10,000 were made to each county based on voting age population, so that each county could conduct its own voter education programs in addition to what the State was doing.
- Community Voter Education Coordinators - The State contracted with and provided education funds to the following community interest groups who coordinated and conducted grass roots DRE demonstrations of the voting system:
    - The Organization of Chinese Americans, Ga. Chapter
    - The Georgia Hispanic Chamber of Commerce
    - The Georgia State Office of AARP
    - National Federation of the Blind
    - Georgia NAACP Voter Empowerment
    - League of Women Voters of Georgia Education Fund
    - The Georgia Coalition of the Peoples' Agenda

Education and Training

The Secretary of State partnered with the KSU Center for Election Systems (whose primary responsibility was to train and educate state and local election officials and poll workers on how to conduct an election using the voting system. KSU Center for Election Systems also established a mock election lab for training, and assisted State election officials in developing Election Day polling place procedures for the new voting system.

Continued Education and Training Activities

Current Georgia Election laws require local election superintendents, including municipal election superintendents to attend training on an annual basis. The Election code has been revised through SB 258 to require a certification program administered by KSU Center for Election Systems to provide continued educational training to local election officials and voter registrars including municipal election officials.

The Secretary of State and KSU Center for Election Systems will develop the curriculum for the certification program that may include training on the electronic voting system, local, state and federal election laws, polling place procedures, disability access initiatives, voter education initiatives, voter registration initiatives, new legislation that affects local, state, and federal election laws, and any other topics that may enhance the administration of elections.

Voter education will continue to be a priority of the Secretary of State. The state and regional Voter Education Coordinators will continue to implement new educational and voter outreach initiatives and will continue to canvass the state providing public demonstrations of the DRE units and will assist the local election officials with educational and voter registration efforts.

4. ***How the State will adopt voting system guidelines and processes, which are consistent with the requirements of section 301 (sec. 254,a, 4)***

Voting System Guidelines adopted by the 21st Century Voting Commission and used to select the statewide uniform electronic voting system used in the 2002 General Election were established in 2001 and passed into law by the General Assembly in 2001.

5. ***How the State will establish a Fund described in subsection (b) for purposes of administering the State's activities under this part, including information on fund management (sec. 254, a, 5)***

The Secretary of State's Office of Administration created an Election Fund within the State treasury. The Election Fund has been designated as a federal election fund account that shall only be used for the enhancement and continuation of election administration. Additionally, the Election Fund is maintained in a separate bank account and has been assigned an internal identification code for tracking expenditures made from

the Fund. As mentioned above, the Fund also contains individual expenditure codes for tracking -- Section 101, 102, Title II, and matching fund expenditures.

6. ***The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on--***

(a) The costs of the activities required to be carried out to meet the requirements of Title III;
(b) The portion of the requirements payment which will be used to carry out activities to meet such requirements; and
(c) The portion of the requirements payment which will be used to carry out other activities (sec. 254,a, 6)

Based on figures provided by the Congressional Research Service, the State of Georgia's portion of HAVA funding (assuming full appropriations under Title II of the Act) is approximately $92 million dollars -- $12.5 million under Title I and $79.8 million under Title II. Georgia estimates the 5% match required under section 253 of HAVA to be approximately $3.95 million to be appropriated to the Election Fund over a 3-year period.

As reported earlier the Secretary of State conducted a statewide procurement process wherein the State acquired a uniform statewide electronic voting system for all 159 counties. The funds used in this procurement process were generated from the issuance of general obligation bonds in the amount of $54 million. Additionally the legislature appropriated $4.5 million for voter education and training efforts. The Governor allotted an additional $294,000 to the project to make grants available to counties for poll worker training costs. Upon procurement of the voting system each county received its proportionate number of voting units, educational funding, and training funding based on the criteria identified in section 2 above.

These factors proved to be helpful in allowing the Secretary of State to distribute voting equipment and training funds to each county in an equitable and efficient manner. The Secretary of State intends to continue using those criteria to ensure equitable and fair disbursements in the future.

The following budget table reflects both actual expenses related to 1st year election reform efforts and projected future reform activities designed to implement and meet HAVA requirements. Each category of reform requires implementation and maintenance expenses beyond the 1st year of deployment. Several of the HAVA reforms require additional expenses and continued maintenance of effort at a level beyond the State's general maintenance of effort for election administration.*

GEORGIA BUDGET FOR HAVA ACTIVITIES

Total Estimated HAVA Disbursement: $92,000,000 -- Title I $13,293,000 -- Title II $78,707,000.

HAVA Requirements	'02 -'03 Cost of Implementation (State funds expended in FY 02 and FY 03)
Voting System Replacement* (Sec. 301)	$53,949,000
Punch card replacement. These costs were a part of Voting System Replacement	$4,980,690
- DRE Purchase*	See above, Voting System Replacement
Centralized Voter Registration System, other elections administrative and infrastructure improvements	
Provisional Voting Access System (S-302)	
Voter Outreach (Sec 254)	
Election Poll Worker Training (S-254)	
Polling Place Disability Access	
Establish Administrative Complaint Procedure*	
Voter Outreach (Sec 254)	$4,000,000
Election Poll Worker Training (S-254)	$500,000
TOTAL	$58,449,000

A. HAVA Reimbursement & Infrastructure Program Improvement Resources Available	SFY 03-04 Title I Section 101, 102 Funds	SFY 04 Title II Section 251 Funds	SFY 05 Title II Section 251 Funds	SFY 06 Title II Section 251 Funds	TOTAL
		Subject to Federal Funding			
Voting System Replacement* (Sec. 301)		$23,182,000	$27,762,500	$27,762,500	$78,707,000
Punch card replacement. These costs were a part of Voting System Replacement	$4,740,448				$4,740,448
Grant for Prospective expenses. The state must maintain a current or greater level of appropriated funding for election operations/activities to receive these funds.	$7,816,328				$7,816,328
Funds eligible to be received by state if the state is in compliance with HAVA provisions	$12,556,776	$23,182,000	$27,762,500	$27,762,500	$91,263,776
B. Planned use of HAVA funds	**Section 101, 102 Funds**	**Section 251 Funds**	**Section 251 Funds**	**Section 251 Funds**	
Reimbursement of State for purchasing of voting equipment.	$4,740,448	$14,493,662	$17,357,445	$17,357,445	$53,949,000
Reimbursement of State for costs incurred in uniform voting equipment deployment and training in 2002 General election		$1,500,000	$1,500,000	$1,500,000	$4,500,000
	$6,916,328	$6,338,338	$7,655,055	$8,155,055	$29,064,776
	$200,000				$200,000
		$500,000	$500,000	$500,000	$1,500,000
		$250,000	$750,000	$250,000	$1,250,000
	$700,000				$700,000
		$100,000			$100,000
Total HAVA funds expended	$12,556,776	$23,182,000	$27,762,500	$27,762,500	$91,263,776
C. State Maintenance of Effort - Note: These funds must be appropriated for Election purposes for the State to be eligible to receive the funds to reimburse prior expenses for voting equipment. Georgia is required to identify a 5% match equaling approximately $1,388,125 dependent upon federal funding., Georgia's match is included in the funds below.					
Expenses for Elections Division for SFY 2000 as mandated to be the base level of expenses per HAVA Act.	$4,598,813	$4,598,813	$4,598,813	$4,598,813	$18,395,252
State Match - Must be appropriated as condition of HAVA Funding		$659,100	$888,125	$888,125	$2,435,350
State Match - Election Poll Worker Training (S-254)		$500,000	$500,000	$500,000	$1,500,000
Total State maintenance of effort		$5,757,913	$5,986,938	$5,986,938	$17,731,789
TOTAL EXPENDED		$ 28,939,913	$ 33,749,438	$ 33,749,438	$ 108,995,565

- Georgia's portion of HAVA funding is based upon funding assumptions provided by the Congressional Research Services.
- Georgia's projected spending amounts in each category are based upon an assumption of complete funding through HAVA and upon a best estimates spending analysis; these projections are not intended to reflect exact dollar amounts required to meet the actual cost for each category.
- Georgia reserves the right to amend the funding amounts in each category upon obtaining exact implementation costs based upon either a bid analysis or other costs of implementation as they materialize.
- Changes made to the level of spending within an individual category will not be considered a material change to the Plan, unless such changes eliminate all such funding within that category.

A. **Voting System Replacement. Sec 301**

The State of Georgia has budgeted $23,182,000 of HAVA funding under Title II to service the existing State Bonds mentioned above and to reimburse the State Treasury for State expenses related to election reform and HAVA compliance.

B. Punch Card Replacement. Sec 102

The State of Georgia has budgeted and expensed an initial disbursement of HAVA funding under Title I section 102 in the amount of $4,740,448 to service the existing State Bonds mentioned above by reimbursing the State Treasury for the purchase of voting units for replacement of punch card and lever machine voting units in 1485 qualified precincts. The voting units used to replace the punch card and lever machine units meet the Title III system requirements.

C. Direct Recording Voting Equipment (DRE) Purchase. Sec 301

The acquisition of 19,015 DRE voting units was made in view of the pending passage of the Help America Vote Act. The State of Georgia went beyond the minimum requirements of the Act and acquired a sufficient number of voting units to allow every registered voter in the State of Georgia an equal and fair access to the most reliable and accurate voting platform in the world. The funds used in this procurement process were generated from the issuance of State Bonds in the amount of $53,949,000.

See paragraph "A" above.

D. Centralized Voter Registration System. Sec 303

Although the State currently operates a centralized statewide voter registration database system, the system is antiquated and requires heavy maintenance at an exorbitant cost to the state and the counties. To alleviate this burdensome cost, streamline the registration process, and give every county a more reliable and efficient interface with the centralized voter registration system, the State proposes to purchase a new voter registration system. The State has identified several vendors that are capable of replacing the current system with a state -of-the-art system that allows more efficient interface and access at the county level.

The State of Georgia anticipates cost in the range of $4 to $15 million of HAVA funding from both Title I and Title II for the replacement of the current voter registration system, including additional cost for training to prepare county officials to use the new system. Additional election administration enhancements including county election official computer system upgrades, communication infrastructure upgrades, and other administrative enhancement costs are included in this projection.

E. Provisional Balloting. Sec 302

The State of Georgia anticipates a cost of $200,000 for the enhancement of its existing provisional balloting voting system, which will include the implementation of a new provisional ballot access system, costs for the creation, maintenance, and support of the enhanced system for tracking provisional ballots cast in 159 counties. This cost also includes printing costs for the forms. These funds may be expensed from Title I or Title II funding.

F. Voter Education and Outreach

The Counties and the Secretary of State have historically conducted voter education and outreach. However, as reported earlier in this Plan, as part of the implementation of the statewide uniform electronic voting system, the Secretary of State created a new state level Voter Educational Program designed to facilitate a uniform voter outreach effort. The program was managed by a "Voter Education Coordinator" who supervised 12 newly created state regional employee positions. The regional employees conducted grassroots demonstrations at an unprecedented level for educating and preparing voters to use the new voting system. Additionally, the State disbursed funds to each county based on the formula referenced above to enable the counties to hire a local voter education coordinator to collaborate with the state level coordinators.

Based on the overwhelming success of this program, Georgia citizens will expect and demand no less from the Secretary of State in the coming years. Accordingly, the State of Georgia has included in its budget the expenses associated with the ongoing Voter Education Coordinator efforts along with the grassroots efforts to be conducted by a reduced complement of six state regional voter education coordinators and local level coordinators hired by the counties.

Going forward, the Georgia Secretary of State is reducing the number of regional coordinators from 12 to 6, and these individuals will continue the voter educational outreach efforts year-round along with 1 state wide coordinator.

In light of the continued voter outreach efforts to educate Georgia Citizens on the new voting system, the State of Georgia has budgeted $500,000 for continued voter education efforts on the use of the new voting system and the new HAVA voting requirements. These expenses will be expended from Title II of the Help America Vote Act.

G. Poll Worker - Election Official Training

The county election superintendent and the Secretary of State have historically conducted election official training; however poll worker training was solely the responsibility of the county election official. As reported earlier in this Plan, as part of the implementation of the Statewide Uniform Voting System, the Secretary of

State partnered with the KSU Center for Election Systems to provide a state level source of training (in addition to the Vendor training included in the procurement contract) for county election official and poll worker training. The KSU Center for Election Systems operated on a $500,000 annual budget and was charged with conducting state, regional, and county level training for any election official who required additional training. The KSU Center for Election Systems created a training election lab with a mock precinct set-up, conducted regional road shows and traveled to specific counties to provide additional training when necessary.

The State of Georgia plans to continue the partnership with the KSU Center for Election Systems. The KSU Center for Election Systems has created a training curriculum to offer accreditation to election officials and poll workers, which will be required of election officials in coming years.

The KSU Center for Election Systems will also assist the Secretary of State with a new ballot-building program created for the dual purpose of continued training and elections administration. The Office of the Secretary of State and the KSU Center for Election Systems will conduct this program jointly.

In light of the continued training needs for county election officials, poll workers, and ballot building, the Secretary of State has budgeted $750,000 --$500,000 for the operating budget of the KSU Center for Election Systems for 2004-2005 and $250,000 for continual training efforts. These expenditures will be expensed from Title II of the Help America Vote Act.

H. Physical Accessibility

HAVA provides for use of federal funding to improve physical accessibility for disabled voters at polling places in each county. A number of polling places in each county are private locations, with a few exceptions, such as county election offices, city halls, public schools and fire stations. Based on this information, the Secretary of State will conduct a survey of all 159 counties requesting information on each precinct in each county to determine the number of precincts that will be eligible for HAVA funding for improved accessibility.

Upon determining the number of precincts in need of improvements, the Secretary of State (pending availability of funds) will provide funds to each county that demonstrates a need to improve physical accessibility for disabled voters and that qualify to receive the funds provided:

- The precincts are qualified
- The county certifies to the Secretary of State the costs incurred to improve physical accessibility
- The Secretary of State has sufficient funds in the state Election Fund to cover the expenses.

The Secretary of State proposes to disburse $700,000 in HAVA funding in addition to the $335,000 received from the Department of Health and Human resources for improving disability access. These funds will be disbursed pursuant to the above criteria.

I. Administrative Complaint Procedure. Sec 402

The Administrative complaint system will be implemented and maintained using HAVA Title II funding. The Secretary of State proposes to include $100,000 as the initial cost for implementing and maintaining the complaint system on a yearly basis.

J. Administrative Costs

To meet the Title III requirements and other administrative functions required under HAVA, the Secretary of State must coordinate and facilitate the planning, operation, reporting, and maintenance of every program designed to implement and maintain HAVA compliance. The Secretary of State shall develop a formula to calculate indirect costs associated with each activity designed to implement and comply with the Help America Vote Act, and such cost shall be expensed from the Election Fund and will not exceed 5% of the Election Fund.

7. ***How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year prior to November 2000 (sec. 254,a, 7)***

The State of Georgia will continue to maintain that level of election administration expenditures incurred during the Fiscal Year of 1999 while conducting activities that fall under the Title III requirements of the Help America Vote Act.

8. ***How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the Plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met (sec. 254, a, 8)***

The State of Georgia developed milestones and goals through the 21st Century Voting Commission that measured the effectiveness of the implementation and deployment of the statewide uniform electronic voting system. The milestones included performance goals designed to measure the effectiveness of the deployment of the voting system, which included, but was not limited to

- Voting system delivery and installation dates
- DRE training schedules

- Regional and local voter education training schedules
- Poll worker and election official training schedules
- Pre-election day scheduling deadlines
- Election day performance reports including, DRE error rates (undervote and overvote rates), polling place closing rates, and election result reporting rates.

These milestones and measures where applicable, will be continued and carried forward to

- Measure implementation dates for new projects identified by the Secretary of State and county election officials
- Measure the efficiency of existing procedures
- Measure the efficiency of newly created procedures

Additionally, the Secretary of State periodically convenes a State and County Election Official Task Force charged with reviewing and establishing procedures for enhancing election administration within the State. The Task Force focuses on existing election law issues and develops new procedures for streamlining and creating efficiency in the election process.

9. ***A description of the uniform, nondiscriminatory state-based administrative complaint procedures in effect under section 402 (sec. 254, a, 9)***

The Secretary of State has received statutory authority to implement uniform rules and regulations to create an administrative complaint procedure that will meet the requirements of the Help America Vote Act. This procedure will be created and implemented before the first Federal Election in 2004.

10. ***If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities (sec. 254, a, 10)***

The State of Georgia will use Title I funds to assist with the development of the State Plan and any other activities authorized by HAVA.

"Early Money Out" and impact on Plan

Section 102 "Early Money Out" will allow the State to service existing bond indebtedness generated to purchase the new statewide uniform electronic voting system that included replacing all punch card and lever voting systems. The State of Georgia went beyond the one DRE unit per precinct requirement by providing one DRE unit per every two hundred registered voters in each county.

The amount of funds used to replace one punch card and lever machine in each qualified precinct far exceeded the $4,893,000 provided under section 102.

Section 101 "Early Money Out" will allow the State to begin the process of acquiring a new voter registration system for the replacement of the current voter registration system.

The estimated cost for implementing this project will exceed the $8.6 million provided under section 101.

11. ***Description of how the State will conduct ongoing management of the Plan (sec. 254, a, 11)***

The Elections Division of the Secretary of State will manage the Plan. The Election Division will oversee the continuation of existing and newly created election projects including system training, voter education, election official training, poll worker training, election support and any other activities that fall under the administration of elections;

"Material Changes" to the Plan may be developed on a periodic basis based on necessary changes to the Plan as a result of achieving milestones and performance measures used to gauge the effectiveness of the Plan.

12. ***In the case of a State with a State Plan in effect under this subtitle during the previous fiscal year, a description of how the Plan reflects changes from the State Plan for the previous fiscal year and of how the State succeeded in carrying out the State Plan for such previous fiscal*** **year (sec. 254, a, 12)**

The State of Georgia had an implementation plan for the deployment of its statewide uniform voting system in 2002, however that plan was not effective under this subtitle during 2002.

13. ***A description of the committee, which participated in the development of the State Plan in accordance with section 255 and the procedures followed by the committee under such section and section 256 (sec. 254, a, 13)***

The "HAVA State Planning Commission" is comprised of state and local election officials and select community interest groups listed below:

- National Federation of the Blind
- Protection and Advocacy Group of Georgia
- League of Women Voters
- American Association of Retired Persons
- NAACP
- Georgia Hispanic Chamber of Commerce
- Organization of Chinese Americans
- Georgia Coalition of Black Women
- Other community interest groups and leaders.

Additionally, the 21st Century Voting Commission, which assisted with the creation and implementation of the deployment plan for the statewide uniform voting system, consisted of multi-partisan representation from state and local level government, including state legislators from each party, local election officials, state election officials and community and civic groups as mentioned above.

HAVA STATE PLANNING COMMITTEE

Chief Election Officials (From 2 largest counties):

DeKalb County: Ms. Linda Latimore, Election Supervisor
DeKalb County Board of Elections and Voter Registration
4380 Memorial Drive
Decatur, GA 30032

GEORGIA STATUS	PROVISION MANDATED BY HAVA	ACTION REQUIRED
	√ = Mandate Met ~ = minor administrative adjustment required	
	VOTING SYSTEM STANDARDS	
√	• Permit voter to verify votes selected before casting ballot	
√	• Provide voter opportunity to change/correct ballot before casting ballot	
√	• Offer notice if voter selects vote for more than 1 candidate for a single office	
√	• Voting system shall ensure that any notification required preserves voter privacy	
√	• System must produce a record with an audit capacity (satisfied by audit capacity redundant electronic storage)	
	ACCESSIBILITY FOR INDIVIDUALS WITH DISABILITIES	
√	• Voting system must be accessible for individuals with disabilities, including visual impairment and must preserve voter privacy and must offer independence in voting	
√	• At least 1 DRE with accessibility for disabled individuals at each polling place	
	ALTERNATIVE LANGUAGE ACCESSIBILITY	
√	• Voting system shall provide alternative language accessibility (pursuant to Section 203 of Voting Rights Act)	
	ERROR RATES OF SYSTEM	
√	• Error rates of system shall comply with error rate standards of FEC	
	UNIFORM DEFINITION OF WHAT CONSTITUTES A VOTE	
~	• State must adopt uniform and nondiscriminatory standards that define what constitutes a vote and what will be counted as a vote for each voting system used in state	State Election Board Rules required
	PROVISIONAL VOTING AND VOTING INFORMATION REQUIREMENTS	
√	• Must have provisional vote option	
√	• To cast provisional ballot, voter must: (1) affirm in writing that the person is a registered voter in the jurisdiction; (2) is eligible to vote in that election.	
~	• Provisional voter must be given information as to how to determine if vote was counted, and if not the reason vote was not counted	Authorized by SB 258
~	• Provisional voter must be given access to a toll-free number or website that may be used to determine whether vote was counted or not; access may be provided at county level	Authorized by SB 258
	VOTING INFORMATION REQUIREMENTS	
~	• Voting information (sample ballot, date/hours of election, instructions on casting a ballot/provisional ballot, instructions for mail-in registrants who are first time voters, information on federal and state election laws) must be publicly posted at each polling place on each election for federal office	Administrative Action required
~	• Voters casting ballots after normal hours (i.e. court ordered extension) must vote a provisional ballot kept separate from other provisional ballots	Authorized by SB 258

GEORGIA STATUS	PROVISION MANDATED BY HAVA	ACTION REQUIRED
	COMPUTERIZED STATEWIDE VOTER REGISTRATION LIST REQUIREMENT	
√	• Implement a single, uniform, centralized, interactive, computerized statewide voter registration list defined and administered at state level	System Upgrade conducted
√	• Computerized list shall serve as the single system for storing and managing official list of registered voters [1st-time voters must be identified on list]	Authorized by SB 258
√	• List shall have unique identifier for each registered voter of state	
√	• List shall be coordinated with other state agency databases [Considering opportunities with system upgrade]	Administrative [GA - Optional]
√	• Registration information must be promptly entered into database upon receipt of local election officials	
√	• Electronic list shall serve as official list for federal elections	
√	• Names to be removed from list must follow procedures outlined in NVRA	
√	• List is to be maintained to remove ineligible voters, including: - Convicted felons - Death - Duplicate names	
√	• Appropriate technological security measures shall be provided to protect list	
√	• The election system must be set up for minimum maintenance standards consistent with NVRA	
√	• Upon application for voter registration, applicant must provide a unique identifying number as prescribed by HAVA [NOTE: States using SSN are grandfathered into this provision as unique identifier requirement is met.]	
√	• The chief election official and the state motor vehicle authority should enter into an agreement to match data to the extent required to enable each entity to verify the accuracy of data provided for voter registration	Administrative [GA- Optional]
	REQUIREMENTS FOR FIRST TIME VOTERS WHO REGISTER BY MAIL	
√	• For individuals that register by mail and have not previously voted within the state: - IF VOTING IN PERSON: (1) presents current and valid photo ID; or (2) presents a copy of a current utility bill, bank statement, government check, paycheck or other government document showing name and address of voter - IF PERSON VOTES BY MAIL: Absentee ballot must contain (1) Copy of current and valid photo ID; or (2) a copy of a current utility bill, bank statement, government check, paycheck or other government document that shows name and address of voter	Authorized by SB 258
√	• FAIL SAFE VOTING: For first-time voters registering by mail that do not provide required identification may be allowed to cast a provisional ballot	Authorized by SB 258
√	• Registration forms must conform to NVRA and HAVA (including first-time voter information)	Administratively Modify forms

GEORGIA STATUS	PROVISION MANDATED BY HAVA	ACTION REQUIRED
	MILITARY AND OVERSEAS BALLOT SYSTEM	
√	• State shall designate office to provide Military and Overseas information for registration and voting	Authorized by SB 258
√	• State shall compile and report data on combined number of absentee ballots transmitted to uniformed and overseas voters	Authorized by SB 258
√	• Absentee ballot application for military and overseas voters shall be good for 2 General Election cycles	Authorized by SB 258
√	• Georgia will adopt Presidential HAVA Designee standard oath for all documents under Title VII relating to military and overseas ballots	Authorized SB 258
√	• Requirements must be implemented by January 1, 2004	Authorized by SB 258
	VOTER EDUCATION - ELECTION OFFICIAL & POLL WORKER TRAINING	
√	• State must identify in HAVA implementation plan, to conform to requirements of Title III, specific efforts to provide voter education, election official training and poll worker training	Requirements will be met
√	**MAINTENANCE OF EFFORT**	
√	• Pursuant to HAVA, states must identify how the state will maintain the expenditures for activities funded by the payment level of "requirement payments" that is not less than the level of state expenditures in fiscal year ending prior to November 2000	Requirement will be met
	STATE BASED ADMINISTRATIVE COMPLAINT PROCEDURES	
√	• State must develop, prior to certification deadline of January 1, 2004, a state-based administrative complaint procedure as prescribed by HAVA, including: (1) Procedures that are uniform and nondiscriminatory (2) Must allow filing of complaint for believed violations of HAVA Title III (including poll accessibility, handicapped accessible voting units, etc.) (3) Complaints must be in writing and notarized, signed and sworn by complainant (4) Complainant may be afforded a hearing upon request (5) If state determines that a Title III violation occurred, state shall provide a remedy (6) Complaints are to be resolved administratively under prescribed timeframes of HAVA, being 90 days (or longer with consent of complainant) (7) State is to provide an alternative dispute resolution process for Title III complaints not resolved through administrative procedures	Requirements will be met
	MATCHING FUND REQUIREMENTS	
√	• State is required to provide or demonstrate a 5% match in spending of Title II funding provided under Title II of HAVA	Requirements will be met

Territory of Guam
State Plan

August 8, 2003

Election Assistance Commission
c/o Federal Election Commission
999 E Street, NW
Washington, D.C. 20463

Gentlemen,

I am pleased to submit to you the Guam State Plan for the implementation of the Help America Vote Act of 2002 (HAVA), an act to enhance the accessibility and integrity of federal elections in Guam and throughout the country.

HAVA presents the Guam Election Commission (GEC) with an extraordinary opportunity to enhance its federal election process with an unprecedented level of funding. The Guam State Plan outlines Guam's strategy for complying with the federal requirements and refining its federal election process.

Guam has a proud tradition of implementing election laws, procedures and practices to encourage a high level of voter access and participation. Consequently, Guam is well positioned to meet many of the HAVA's requirements, but needs substantial technical and funding assistance from the Election Assistance Commission to comply with all the requirements of HAVA.

I want to take this opportunity to thank the Guam State Plan Development and Coordinating Committee, comprised of a variety of election stakeholders, who worked tirelessly to develop the plan. The successful conduct of elections in Guam is a cooperative effort of all election stakeholders, and the GEC relies completely on the confidence and participation of all Guam voters. The Guam State Plan Development and Coordinating Committee has established a framework for continued cooperation in the election process that is vital in the implementation of HAVA. The Committee worked long hours to create a Guam State Plan that will ensure that every vote counts as intended, and that no voter is excluded from the election process.

The Guam State Plan sets out an extremely ambitious agenda. I am confident, however, that with the continued dedication of the GEC Board of Directors, the Guam State Plan Development and Coordinating Committee, and all other election stakeholders, the Guam Election Commission will meet its goals and improve voter participation and confidence in Guam's election process.

I hope that the Election Assistance Commission will share its thoughts concerning the Guam State Plan, and Guam's election process.

Sincerely,

Gerald A. Taitano
Executive Director

EXECUTIVE ORDER NO. 2003-20 RELATIVE TO ESTALBISHING THE GUAM STATE PLAN DEVELOPMENT AND COORDINATING COMMITTEE PURSUANT TO THE HELP AMERICA VOTE ACT OF 2002, P.L. 107-252 / H.R. 3295 v

GUAM STATE PLAN INTRODUCTION 3

GUAM STATE PLAN APPROACH 6

GUAM STATE PLAN REQUIRED ELEMENTS (HAVA §254) 6

Section 1. Title III Requirements and Other Activities 6

1.a 301(a) – Voting systems Standards Requirements 6

1.b 302 – Provisional Voting and Voting Information Requirements 11

1.c 303 – Computerized Statewide Voter Registration List Requirements and Requirements for Voters Who Register by Mail 16

1.d 304 – Minimum Requirements 28

1.e 305 – Methods of Implementation Left to Discretion of State 28

1.f 311 – Adoption of Voluntary Guidance by Commission 28

1.g 312 – Process for Adoption 28

OFFICE OF THE GOVERNOR
HAGÅTÑA, GUAM 96910
U.S.A.

RECEIVED
JUN 10 2003

EXECUTIVE ORDER NO. 2003- 20

RELATIVE TO ESTABLISHING THE GUAM STATE PLAN DEVELOPMENT AND COORDINATING COMMITTEE PURSUANT TO THE HELP AMERICA VOTE ACT (HAVA) OF 2002, P.L. 107-252 / H.R. 3295

WHEREAS, the Help America Vote Act of 2002 (HAVA) invites the Governor to develop a Guam state plan for Federal election improvements; and

WHEREAS, the Guam State Plan shall be a self-certified plan developed by government election officials, local officials, and private citizens; and

WHEREAS, the Guam State Plan must describe how Guam will improve Federal election administration procedures, provide for voter education, distribute HAVA funds, establish a Guam Federal Election Fund, allocate Federal funds, avoid the supplanting of state funds with Federal funding, adopt performance goals and measures, adopt complaint procedures, manage funds under Title I of HAVA for Federal election administration improvements, manage the state plan, and address state plan changes from prior fiscal years; and

WHEREAS, the Executive Director of the Guam Election Commission, as the Chief Guam State Election Official, is tasked to develop the Guam State Plan through a committee of appropriate individuals, including the chief election officials of the two most populous jurisdictions in Guam, other local election officials, stakeholders (including representatives of groups of individuals with disabilities), and other citizens.

NOW, THEREFORE, I, FELIX P. CAMACHO, *I Maga'Lahen Gudhan,* Governor of Guam, by virtue of the authority vested in me by the Organic Act of Guam and the laws of Guam, hereby order as follows:

Section 1. Guam HAVA State Plan Development and Coordinating Committee; Establishment of.

a. There is established within the Guam Election Commission (GEC), the Guam HAVA State Plan Development and Coordinating Committee, comprised of representatives from the following election stakeholder organizations: Executive Director, Guam Election Commission; Board of Directors, Guam Election Commission; Republican Party of Guam; Democratic Party of Guam; Office of the Guam Delegate to the U.S. House of Representatives; Mayor's Council of Guam; Office of the Mayor of Dededo; Office of the Mayor of Yigo; University of Guam Center for Excellence in Developmental Disabilities Education, Research, and Service (CEDDERS); Department of Integrated Services for Individuals with Disabilities (DISID); Guam Community College; Department of Education; Veteran's Affairs Office; and any such other stakeholder organization or representative that the GEC determines appropriate.

b. The Guam HAVA State Plan Development and Coordinating Committee shall meet at the GEC Executive Director's call. The GEC Executive Director shall prepare the agenda for each meeting, and maintain records of the Committee's proceedings. Membership in the Committee shall be a collateral function without compensation. Accordingly, this Order does not create any right or benefit, substantive or procedural, enforceable at law or equity by a party against the government of Guam, its departments, agencies or instrumentalities, its officers or employees or any other person.

Section 2. Executive Order, Filing of. Upon the execution of this Executive Order, a copy of it shall be filed by the GEC Executive Director with the Speaker and the Legislative Secretary of the Guam Legislature, the Attorney General and the Compiler of Laws, the Chief Justice of the Supreme Court of Guam, the Presiding Judge of the Superior Court of Guam, Guam's Delegate to the U.S. House of Representatives and the Guam Election Commission.

SIGNED AND PROMULGATED at Hagåtña, Guam, this 6th day of June 2003.

FELIX P. CAMACHO
I Maga'Lahen Gudhan
Governor of Guam

COUNTERSIGNED:

KALEO S. MOYLAN
Segundo Maga'Lahen Gudhan
Lieutenant Governor of Guam

GUAM STATE PLAN INTRODUCTION

Section 253(b) of the Help America Vote Act of 2002 (HAVA) provides for Guam to develop a long-range plan to improve the administration of federal elections in Guam; distribute and monitor federal funds provided to improve the administration of federal elections in Guam; provide for voter education, election official education and training, and poll worker training; establish voting system guidelines and processes; establish a Guam Election Fund; develop an appropriate budget; maintain current expenditures; adopt performance goals and measures; establish an administrative procedure; and describe how federal funds will affect the activities set forth in the Guam State Plan.

With the combined support of both the Executive and the Legislative branches of the Government of Guam, and with Federal financial support through HAVA, Guam will have the opportunity to update and improve its current election processes and systems. This Guam State Plan establishes the framework for election reform, and achieves full compliance with the requirements of HAVA.

The Guam State Plan also improves election accessibility for individuals with disabilities, and those with alternative language requirements. Guam has already taken steps to improve polling place accessibility, and is beginning the process of implementing an accessible, uniform voting system. Guam will continue to strive toward full accessibility in all aspects of the elections process.

Guam will update and refine the Guam State Plan as necessary over time, to reflect election reform progress, improvements, and future plans. The Guam Election Commission welcomes the challenges of HAVA, and the financial support from the Federal government to continue its efforts to update and improve Guam's elections.

HAVA increases the election administration responsibilities of the Guam Election Commission (GEC), who is responsible for the conduct of elections. The Executive Director of the Guam Election Commission (GEC) administers the election laws of Guam, and performs and discharges all of the powers, duties, purposes, functions and jurisdiction therein. All actions of the Executive Director are subject to the supervision and approval of a seven-member GEC Board of Directors, who appoints the Executive Director. Six of the board members are appointed by the Governor of Guam from recommendations submitted by the recognized political parties in Guam. The six appointed members appoint the seventh member, and the Board elects a Chairperson and Vice Chairperson. All board members serve two-year terms.

The Executive Director is responsible for implementing, planning, and conducting all island-wide, municipal, and federal elections in Guam, as well as all voter registration activities and maintenance of Guam's voter registration database.

The GEC has five functional sections, i.e., Election Management and Administration, Budget and Personnel, Voter Registration, Public Official Reporting and Disclosure, Campaign Contributions and Expenditures, and the Decolonization Registry. The Executive Director is responsible for voter registration and election management activities for Guam.

The GEC maintains an island-wide electronic voter registration database, referred to as the Voter Registration System (VRS). The VRS is domiciled at the University of Guam Computer Center. The GEC office has real-time access to VRS for viewing and updating voter information. The Voter Registration Supervisor processes all voter registration applications in VRS and assigns each applicant a unique voter registration number. Immediately upon entering information in the system, any member of the public can view the information processed. Although the GEC has an island-wide voter registration database at the UOG Computer Center, the mainframe system is antiquated, costly to maintain, and needs to be replaced. Further, it is consistent with the requirements of HAVA that the database be domiciled at the GEC, and that access to the database be provided to all nineteen municipalities in Guam.

Guam has approximately 53,000 registered voters. The voting age population is approximately 100,000. Voter registration is available in the GEC office, and, 30 days prior to an election, at all nineteen municipal offices throughout the island. The Executive Director appoints as voter registration clerks all qualified applicants from political parties, candidate organizations, municipal clerks, and various advocacy groups that provide services to individuals with disabilities. The GEC is currently developing a web site that will include a voter registration process.

Individuals may register to vote in person, or by mail. Voters must be registered to vote at least 30 days prior to an election. If a voter's registration application is incomplete, the GEC notifies the voter and provides the voter an opportunity to properly complete the application.

Guam has 19 municipal districts, and one Congressional district. Voter turnout for the past several general elections are as follows:

1996 = 76.32%
1998 = 84.98%
2000 = 73.26%
2002 = 73.75%

Guam has 19 rural village communities and 72 precincts. Each precinct average 700 or more registered voters.

In 2000, the GEC upgraded its optical-scan voting system to an Election Systems and Software (ES&S) Tabulator Model 550. The optical-scan voting system is used island-wide. Except as directed by the GEC Board of Directors or the Court, the GEC does not hand-count ballots. Guam uses a uniform paper ballot in each precinct. Currently, there are no precincts in Guam utilizing direct recording electronic (DRE) voting systems.

There are several alternative voting methods available to Guam voters who are unable to vote at their assigned polling place. For many homebound voters in Guam the only voting method available is by absentee ballot.

Absentee By Mail – any qualified voter in Guam may apply to receive an absentee ballot by mail. Guam statute requires a ballot application to be completed each election year.

Absentee Voting In Person – any qualified voter may vote through an absentee ballot beginning 30 days prior to election day at the GEC office.

Home-bound or Special Needs Voting – if a voter is unable to vote at his or her assigned polling place due to age, illness, or disability, the voter may request an Election Official to deliver the ballot and other voting material.

Provisional Voting – is not available at the present time. The GEC is preparing legislation to provide for provisional voting in Guam. The GEC Provisional Voting Program will be available to any voter who does not have identification, or whose name does not appear on the precinct register at the polling place where the voter is attempting to vote. Provisional ballots will be delivered to the GEC Election Central for verification of eligibility before being counted.

Each ballot cast using one of the alternative voting methods, i.e., absentee, off-island, homebound, and in-office, is sealed inside a secret ballot envelope, which in turn is placed inside an affidavit envelope. The affidavit envelope provides for voter information: name, address, identifier, and signature. The voter's affidavit ballot envelope is reviewed, verified, and cross-checked with the voter signature roster to ensure that the voter has not voted more than once. If approved, the secret ballot envelope is returned to the appropriate precinct official for inclusion with all other ballots.

In addition to conducting the federal election for the Guam Delegate to the U.S. House of Representatives, the GEC is responsible for conducting elections for the Office of the Governor of Guam, the Lieutenant Governor of Guam, the Guam Legislature, Nineteen Mayoral Offices, Five Vice-Mayoral Offices, the Guam Public Auditor, the Attorney General of Guam, the Consolidated Commission on Utilities, the Guam Education Policy Board, the judges of the Superior Court of Guam, the justices of the Supreme Court of Guam, and all public initiative measures. Although the GEC is not responsible for conducting elections outside of Guam, it provides election assistance to the Commonwealth of the Northern Mariana Islands, the Republic of Belau, and the Federated States of Micronesia.

Although Guam already has an island-wide voter registration database, and has replaced all punch-card voting systems, there are several improvements needed to meet the specific requirements of HAVA. Guam needs to retrieve its voter registration database from the University of Guam Computer Center. To accomplish this, the GEC must purchase the necessary hardware and upgrade its voter registration software. Further, the GEC must procure the necessary interface software to implement the use of DRE units.

The Guam State Plan is organized as specified in HAVA, section 254, providing a description of current election procedures used in Guam and outlining how Guam will meet the new requirements mandated by HAVA.

GUAM STATE PLAN APPROACH

The Guam Election Commission, comprised of the Executive Director as the chief election official, the seven-member Board as the principal authority, and 5 employees, is responsible for administering and supervising elections in Guam. Collaboration between the GEC and stakeholders is essential to the successful conduct of elections. In addition to fulfilling Federal election responsibilities, the GEC and Guam's election stakeholders work cooperatively to serve Guam's local government, approximately sixty thousand registered voters, and a number of political campaigns.

Before the passage of HAVA the GEC began laying the groundwork for a new voter registration system and the introduction of Direct Recording Electronic (DRE) voting machines.

Considerable effort and resources are necessary for Guam to meet HAVA requirements. GEC will need to upgrade systems, redesign processes, and revamp training. GEC's ability to provide ongoing operations and maintenance of new capabilities is dependent on adequate resources and funding. In addition, GEC must address core infrastructure needs to provide a solid foundation to sustain new technology and processes. Additionally, the success of Guam's election reform efforts requires implementation at an appropriate point in the election cycle, so that the GEC may utilize new processes in a timely manner.

The Guam State Plan is organized as specified in HAVA §254. Each section of this document corresponds to a subsection of §254 and addresses a State Plan requirement specified in HAVA. The Guam State Plan outlines program milestones to address system or procedural changes. Matrices are included to outline the detailed requirements of HAVA, Guam's current status in regard to those requirements, and the actions planned to meet those requirements.

GUAM STATE PLAN REQUIRED ELEMENTS (HAVA §254)

Section 1. Title III Requirements and Other Activities *"How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(b)(2), to carry out other activities to improve the administration of elections". -- HAVA §254 (a)(1)*

1.a §301(a), Voting Systems Standards Requirements. *Deadline for Compliance: January 1, 2006*

Guam currently uses an optical-scan (ES&S Tabulator System 550) paper-ballot system for all 72 precincts. In a typical election, these optical-scan tabulators are located in a central location, and used to scan and tabulate ballots brought in from all Guam precincts after the polls close. The ballots are optically scanned and votes are tabulated for each race. A significant drawback with this method is that ballots with overvotes are rejected, thus denying the voter with immediate notification and an opportunity to make corrections or changes prior to casting the ballot. The Guam State Plan will correct this deficiency.

Guam's pursuit of voting system improvements now mandated by HAVA has placed it on course to rectify the above and fulfill other HAVA requirements within the statutory timeframes. The GEC is preparing legislation to allow voters with disabilities to vote privately and independently by using a Direct Recording Electronic (DRE) voting system. Last year, Election Systems and Software (ES&S) of Omaha, Nebraska, provided a demonstration of its iVoltronic touch screen DRE voting system. To date, however, Guam has not purchased any DRE voting systems. The GEC plans to dedicate a significant portion of its HAVA entitlement to purchasing at least one DRE voting unit for each of Guam's polling location.

The Guam State Plan provides for an initial purchase of 21 DRE voting units in 2004. The GEC will locate a DRE unit at each of its 21 polling locations for Election 2004. This will test the DRE voting system's compatibility with Guam's current optical-scan voting system, and allow for corrective measures prior to implementing the use of DRE units on a island-wide basis.

Once the GEC is confident that the DRE voting system purchased is able to support the needs of the entire Guam voting community, island-wide implementation will be pursued. The GEC will purchase each DRE unit complete with a combination carrying case/booth. The carrying case/booth will provide a stable voting platform and a secure container, which will adequately handle the stress of transporting the DRE units throughout the island. Implementing the use of DRE units at each precinct will require substantial funding.

An extensive training program will be required for the GEC staff. The vendor who is awarded the contract for the purchase of DRE voting system will be required, as part of the contract, to provide training and technical support.

Public outreach / training will be required to familiarize the disabled community with the new voting system. The public will be informed of the availability of these systems at each precinct and polling location. Additionally, the GEC will need to coordinate with agencies that provide services for the disabled community to ensure that clients are knowledgeable in the use of the new voting system.

Funding is necessary to address the non-compliant issues and to transition to a uniform Guam voting system in order to meet HAVA §301(a) requirements over the next three years.

In addition to numerous voting system requirements, §301(a) also requires states / Guam to define what constitutes a legal vote for each type of voting system used in the state. Guam will need to define what constitutes a legal vote in a uniform manner for each voting system as a regulation.

One aspect of the uniform State / Guam voting systems program will be operations and maintenance:

Operations

- 1) Operating & Maintaining a new uniform Guam-wide voting system
- 2) Maintain and improve voting system software
- 3) Maintain technical infrastructure for software

Maintenance

- The GEC will have to provide adequate storage facilities for the DRE units. Storage facilities must be environmentally controlled to prevent corrosion. Funding will be required to accommodate the additional storage requirements.
- The GEC will establish a maintenance program to ensure the DRE units receive required maintenance. This will permit the GEC to conduct periodic maintenance and identify potential problems, make necessary adjustments to the unit, or send the unit to the vendor for more extensive maintenance or repair. The maintenance program may require contractual staffing at some levels to ensure all maintenance requirements are met.

The following matrix outlines the HAVA §301(a) requirements, Guam's "Current Status," and the "Action Planned," where applicable.

Section 301. Voting Systems Standards Requirements

HAVA Section 301 Requirement	Current Status	Action Planned
Section 301. Voting Systems Standards	Partial compliance	Amend 3GCA to implement HAVA
(a) REQUIREMENTS. Each voting system used in an election for Federal office shall meet the following requirements:	Partial compliance	Develop specific GEC board policies to implement HAVA
(1) IN GENERAL		
(A) Except as provided in subparagraph (B), the voting system (including any lever voting system, optical	Not Applicable	No action required

scanning voting system, or direct recording electronic system) shall		
(i) permit the voter to verify (in a private and independent manner) the votes selected by the voter on the ballot before the ballot is cast and counted;	Partial compliance	Convert to DRE system to fully comply w/ HAVA.
(ii) provide the voter with the opportunity (in a private and independent manner) to change the ballot or correct any error before the ballot is cast and counted (including the opportunity to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error); and	Partial compliance	Convert to DRE system to fully comply w/ HAVA.
(iii) if the voter selects votes for more than one candidate for a single office – (i) notify the voter that the voter has selected more than one candidate for a single office on the ballot; (ii) notify the voter before the ballot is cast and counted of the effect of casting multiple votes for the office; and (iii) provide the voter with the opportunity to correct the ballot before the ballot is cast and counted.	Partial compliance	Convert to DRE system to fully comply w/ HAVA.
(B) A state of jurisdiction that uses a paper ballot voting system, a punch card voting system, or a central count voting system (including mail-in absentee ballots and mail-in ballots), may meet the requirements of subparagraph (A)(iii) by	Partial compliance	Revise mail-in absentee application form to fully comply w/ HAVA
(i) establishing a voter education program specific to that voting system that notifies each voter of the effect of casting multiple votes for an office; and	Full compliance	Revise program to include DRE system.
(ii) providing the voter with instructions on how to correct the ballot before it is cast and counted (including instructions on how to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error)	Full compliance	Revise program to include DRE system.

(2) AUDIT CAPACITY	Partial compliance	Coordinate audit requirements with ES&S
(A) IN GENERAL – The voting system shall produce a permanent paper record with a manual audit capacity for such system.	Partial compliance	Convert to DRE system to fully comply w/ HAVA
(B) MANUAL AUDIT CAPACITY -	Partial compliance	Revise GEC board policy to fully meet HAVA requirements.
(i) The voting system shall produce a permanent paper record with a manual audit capacity for such system	Partial compliance	Convert to DRE system to fully comply w/ HAVA.
(ii) The voting system shall provide the voter with an opportunity to change the ballot or correct any error before the permanent paper record is produced.	Partial compliance	Convert to DRE system to fully comply w/ HAVA.
(iii) The paper record produced under subparagraph (A) shall be available as an official record for any recount conducted with respect to any election in which the system is used.	Partial compliance	Convert to DRE system to fully comply w/ HAVA.
(3) ACCESSIBILITY FOR INDIVIDUALS WITH DISABILITIES – The voting system shall -		
(A) be accessible for individuals with disabilities, including nonvisual accessibility for the blind and visually impaired, in a manner that provides the same opportunity for access and participation (including privacy and independence) as for other voters.	Partial compliance	Convert to DRE system to fully comply w/ HAVA.

(B) satisfy the requirement of subparagraph (A) through the use of at least one direct recording electronic voting system or other voting system equipped for individuals with disabilities at each polling place; and	Not in compliance	Convert to DRE system to fully comply w/ HAVA.
(c) if purchased with funds made available under title II on or after January 1, 2007, meet with the voting system standards for disability access (as outlined in this paragraph).	Not in compliance	Convert to DRE system to fully comply w/ HAVA.
(4) ALTERNATIVE LANGUAGE ACCESSIBILITY – The voting system shall provide alternative language accessibility pursuant to the requirements of section 203 of the Voting Rights Act of 1965 (42 U.S.C. 1973aa-1a).	Partial compliance	Convert to DRE system to fully comply w/ HAVA.
(5) ERROR RATES - The error rate of the voting system in counting ballots (determined by taking into account only those errors which are attributable to the voting system and not attributable to an act of the voter) shall comply with the error rate standards established under section 3.2.1 of the voting systems standards issued by the Federal Election Commission which are in effect on the date of the enactment of this Act.	Partial compliance	Convert to DRE system to fully comply w/ HAVA.
(6) UNIFORM DEFINITION OF WHAT CONSTITUTES A VOTE – Each state shall adopt uniform and nondiscriminatory standards that define what constitutes a vote and what will be counted as a vote for each category of voting system used in the state.	Partial compliance	Amend 3GCA to fully comply w/ HAVA

1.b §302, Provisional Voting and Voting Information Requirements *Deadline for Compliance: January 1, 2004.*

HAVA addresses the process of provisional voting to ensure that no individual who goes to the polls intending to cast a ballot is turned away without having the opportunity to do so.

Guam does not have a provisional voting process established. It is a Guam State Plan objective to request the Guam Legislature to enact a law to establish the Guam Provisional Voting Program. Currently, any voter who reports to an assigned polling location, and whose name does

not appear on the precinct register, is required to report to the Guam Election Commission for voter certification. Once certified as an eligible voter, the voter is issued a Certification of Eligibility to Vote and sent back to his assigned polling location to vote.

In conjunction with the proposed Provisional Voting Program, Guam will implement a free-access telephone system to provide voter information. This free-access telephone system will allow the voter to determine if his or her questioned (provisional) ballot was counted and, if not counted, why the vote or a portion of the vote did not count.

The Guam State Plan will provide for one of the following free-access systems:

a. Guam will provide an interactive toll-free telephone system that will allow voters to determine their assigned polling place based on their current voter registration record. Additionally, voters can determine their party affiliation during the Primary Election. The Guam Election Commission will expand its current telephone system to allow voters to verify if their votes were counted and if not, why the votes did not count. This system will interface with the voter registration and election management system to access the data specific to the voter.

b. Guam will utilize its web site on a limited interactive basis that allows voters to check the status of their absentee ballot application. Guam will continue to improve its fledging web site to allow more interaction and enable voters to log-in and verify if their votes were counted and if not, why the votes did not count. This system will interface with the voter registration and election management system to access the data specific to the voter.

c. Guam will develop informational posters and flyers that inform voters at the polling location when voting a provisional ballot is required and the method established to vote a provisional ballot.

Provisional Voting Program Milestones

The GEC is in the process of proposing updates to legislation governing Guam's provisional voting program:

- 1. Conducting an Impact Assessment

  Assess the requirements of HAVA §302 in collaboration with appropriate agencies

  Review and compare existing Guam legislation with HAVA to determine gaps

- 2. Implementing Revisions

  Develop revisions to Guam law with input from key stakeholders

Facilitate passage of law in legislature

Put new law into operation with revised procedures, training, and outreach mechanisms

- 3. Managing

  Track and report on provisional voting

In addition to provisional voting requirements, HAVA §302 mandates that Guam publicly post specific information at the polls on election day. Guam currently displays voting information at each polling place, though the GEC must adjust or add to the content to fully comply with HAVA.

Voting Information Program Milestones

The Guam Election Commission provides an official Voter's Information Pamphlet. This pamphlet is made available to each voter prior to every election. Current Guam law requires full public notice of an election. This public notice is achieved through newspaper advertisements and posting notices in all mayoral offices. Other methods of informing voters include radio advertisements, public service announcements, and direct mailings. Additionally, on Election Day, sample ballots, posters, information flyers and voting instructions posted in all polling locations.

To improve voting information, Guam will create new media formats that address voting rights under applicable federal and Guam laws. These formats will provide information on alleged acts of fraud and misrepresentation, as well as specific instructions on what to do should a voter suspect that his or her right to vote has been violated. This is a HAVA requirement.

Guam will modify its voter registration, institute provisional voting, and amend its absentee voting forms, as well as other election materials to meet the requirements of HAVA. This will involve modifying all of the current forms in use, and reprinting new stock. Funding is needed to meet the HAVA requirements.

GEC will comply with HAVA requirements for voting information through the following program:

- 1. Conducting an Impact Assessment

  Assess the requirements of HAVA §302 in cooperation with the stakeholders

  Review and compare existing voting information posted with HAVA to determine gaps

- 2. Implementing Revisions

  Develop revisions to voter information materials posted on election day with input from other key stakeholders

  Put new voting information into operation with revised procedures, election day materials, training, and outreach mechanisms

- 3. Managing

  Track and report on the success of posted voting information

  (Details on the current status of voting information and actions planned are found in the compliance matrix below.)

HAVA §302 further provides that voters who vote (pursuant to a court or other order) during extended hours after the normal close of a polling place, cast provisional ballots. These ballots must be kept separate from other provisional ballots.

Section 302. Provisional Voting And Voting Information Requirements

HAVA Section 302 Requirement	Current Status	Action Planned
Section 302. Provisional Voting and Voting Information Requirements	Not in compliance	Amend 3GCA and develop GEC board policy to allow for provisional voting & voting information requirements.
(a) PROVISIONAL VOTING REQUIREMENTS – If an individual declares that such individual is a registered voter in the jurisdiction in which the individual desires to vote and that the individual is eligible to vote in an election for federal office, but the name of the individual does not appear on the official list of eligible voters for the polling place or an election official asserts that the individual is not eligible to vote, such individual shall be permitted to cast a provisional ballot as follows:	Not in compliance	Amend 3GCA and develop GEC board policy.

(1) An election official at the polling place shall notify the individual that the individual may cast a provisional ballot in that election.	Not in compliance	Amend Precinct Official's Handbook.
(2) The individual shall be permitted to cast a provisional ballot at that polling place upon the execution of a written affirmation by the individual before an election official at the polling place stating that the individual is --	Not in compliance	Amend election procedures.
(A) a registered voter in the jurisdiction in which the individual desires to vote; and	Not in compliance	Amend election procedures
(B) eligible to vote in that election.	Not in compliance	Amend election procedures
(3) An election official at the polling place shall transmit the ballot cast by the individual or the voter information contained in the written affirmation executed by the individual under paragraph (2) to an appropriate State or local election official for prompt verification under paragraph (4).	Not in compliance	Establish GEC board policy and procedures.
(4) If the appropriate state or local election official to whom the ballot or voter information is transmitted under paragraph (3) determined that the individual is eligible under state law to vote, the individual's provisional ballot shall be counted as a vote in that election in accordance with state law.	Not in compliance	Amend election procedures.
(5) (A) At the time that an individual casts a provisional ballot the appropriate state or local election official shall give the individual written information that states that any individual who casts a provisional ballot will be able to ascertain under the system established under subparagraph (B) whether tie vote was counted and, if the vote was not counted, the reason that the vote was not counted.	Not in compliance	Amend election procedures.

(B) The appropriate state or local election official shall establish a free access system (such as a toll-free telephone number or an internet website) that any individual who casts a provisional ballot may access to discover whether the vote of that individual was counted, and, if the vote was not counted, the reason that the vote was not counted.	Not in compliance	Establish GEC board policy and procedures to provide for toll-free access.

1.c §303, Computerized Statewide Voter Registration List Requirements and Requirements for Voters Who Register by Mail. *Deadline for Compliance: January 1,2004; State can submit a certification stating "good cause" that will move the deadline for §303(a) compliance to January 1, 2006.*

Currently, official Guam voter registration records are created and maintained at the GEC main office. The voter database and reporting system, however, resides on a mainframe computer located at the University of Guam (UOG) Computer Center. For all practical purposes, the Guam Voter Registration System (VRS) is an antiquated system. It is not a fully interactive system. Further, current Guam law does not provide for the GEC to include the voter's driver's license numbers or partial social security numbers in the voter registration file, as required by HAVA. The GEC staff performs routine data-base maintenance which include, among other processes, routine checks for voter registration duplicates.

The mail-in voter registration process in Guam also currently does not meet HAVA requirements. The mail-in voter registration form requires redesign to accommodate information required by HAVA. Also, the voter registration and polling place voter qualification processes must be modified to allow for the verification of identification provided by first-time voters who register by mail.

A new voter registration and election management system must be implemented to effectively serve the voters of Guam. The new system must meet new technology requirements and allow for better management capabilities. The Guam Election Commission is presently looking at several methods to replace the current system:

a. Assess systems that are currently used in the U.S. mainland to determine if there is a system that meets the needs of Guam.

b. Assess systems that are being developed or modified to determine if there is a system that meets the needs of Guam.

c. Research available database programs to determine if developing a voter registration and election management system would meet the needs of Guam.

Guam will have to maintain the VRS at its current program level. In the months to come, the Guam Election Commission will modify or replace the VRS to track those voters who are initial registrants, registrants by mail, as well the additional voter identifying information required by section 303 of HAVA. Specifically, the Guam Election Commission will develop a procedure to match voter-identifying information provided by a first-time registrant, or by a mail registrant, with information maintained by the Guam Division of Motor Vehicles, the Superior Court of Guam, or other reliable databases. Funding is necessary to permit other Government of Guam databases to interact with the VRS, and provide the required information.

Guam Centralized Voter Registration System (CVRS) Program Milestones

GEC's CVRS program will ensure HAVA compliance in both technical and procedural areas of voter registration:

1) Planning HAVA voter registration compliance

- Assess HAVA §303 to determine requirements for system and necessary changes in procedures and regulations/legislation
- Establish a user group of key stakeholders to guide the VRS program through all phases and milestones
- Develop a training plan (refer to Section 3, p 30, Voter Education, Election Official Education and Training, and Poll Worker Training)
- Research and assess CVRS options (upgrade current system, build new system, acquire replacement system, etc.)
- Determine options for development of interfaces and data integration between GEC, DMV, Judicial and other appropriate agencies
- Develop CVRS approach (selection of option, risks, pros and cons, cost benefit analysis, rough order of magnitude, level of effort)

2) Managing the centralized voter registration system effort through a standardized project management framework

- Create a comprehensive resource plan, schedule, and work plan
- Develop reporting structures and performance measures to track progress
- Monitor issues and risks to ensure smooth transition to the new centralized voter registration system

3) Implementing the new centralized voter registration system

- Implement necessary changes to procedures and regulations/legislation
- Select and procure software and services
- Design, build, test, and deploy CVRS
- Develop and deliver appropriate training and outreach to ensure successful CVRS transition

4) Operating and Maintaining the centralized voter registration system

- Maintain and improve the centralized voting system software
- Utilize the user group to assist GEC in maintaining and improving the centralized voting system software
- Maintain technical infrastructure and accessibility for software

Based on review of HAVA §303, the GEC's voter registration system will require technological and procedural upgrades to comply with the Act. The compliance matrices below includes the specific requirements of HAVA §303, as well as the "Current System" related to these requirements. The "Action Required" column includes next steps for GEC.

Section 303. Computerized Statewide Voter Registration List Requirements and Requirements for Voters Who Vote by Mail

HAVA Section 303 Requirement	Current Status	Action Planned
Section 303. Computerized Statewide Voter Registration List Requirements and Requirements Who Vote by Mail.	Partial compliance	Amend 3GCA and develop GEC board policy to allow for CVRS and provide for voter by mail requirements.
(a) COMPUTERIZED STATEWIDE VOTER REGISTRATION LIST REQUIREMENTS –	Partial compliance	Establish GEC board policy and procedures.

(1) IMPLEMENTATION -	Partial compliance	Develop GEC timeline for completion.
(A) IN GENERAL – Except as provided in subparagraph (B), each state, acting through the chief state election official, shall implement, in a uniform and nondiscriminatory manner, a single, uniform, official, centralized, interactive computerized statewide voter registration list defined, maintained, and administered at the state level that contains the name and registration information of every legally registered voter in the state and assigns a unique identifier to each legally registered voter in the state (in this subsection referred to as the computerized list), and includes the following:	Partial compliance	Develop GEC board policy to procure CVRS system to implement all HAVA requirements.
(i) The computerized list shall serve as the single system for storing and managing the official list of registered voters throughout the state.	Partial compliance	Implement CVRS to comply w/ HAVA
(ii) The computerized list contains the name and registration information of every legally registered voter in the state.	Partial compliance	Implement CVRS to comply w/ HAVA
(iii) Under the computerized list, a unique identifier is assigned to each legally registered voter in the state.	In full compliance	Review existing VRS Voter Registration No.
(iv) The computerized list shall be coordinated with other agency databases within the state.	Not in compliance	Link CVRS w/ DMV, DOC, PHSS, SSN#, Sup. Ct., etc.
(v) Any election official in the state, including any local election official, may obtain immediate electronic access to the information contained in the computerized list.	Not in compliance	Develop GEC board policy to allow precinct official access to CVRS.

(vi) All voter registration information obtained by any local election official in the state shall be electronically entered into the computerized list on an expedited basis at the time the information is provided to the local official.	Not in compliance	Develop GEC board policy to allow district registrars administrator access to CVRS.
(vii) The chief state election official shall provide such support as may be required so that local election officials are able to enter information as described in clause (vi).	Not in compliance	GEC Exec Dir to dedicate HAVA funds to support off-site voter registration.
(viii) The computerized list shall serve as the official voter registration list for the conduct of all elections for federal office in the state.	In full compliance	Implement CVRS to fully comply w/ HAVA
(B) EXCEPTION – The requirement under subparagraph (A) shall not apply to a state in which, under a state law in effect continuously on and after the date of the enactment of this Act, there is no voter registration requirement for individuals in the state with respect to elections for federal office	Not applicable	No action required.
(2) COMPUTERIZED LIST MAINTENANCE --	Partial compliance	GEC Exec Dir shall ensure CVRS list maintenance.
(A) IN GENERAL – The appropriate state or local election official shall perform list maintenance with respect to the computerized list on a regular basis as follows:	Partial compliance	GEC Exec Dir shall ensure CVRS list maintenance.
(i) If an individual is to be removed from the computerized list, such individual shall be removed in accordance with the provisions of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg et seq.), including subsections (a) (4), (c) (2), (d), and (e) of section 8 of such Act (42 U.S.C. 1973 gg-6).	Partial compliance	Review 42USC 1973 to determine specific requirements.

(ii) For purposes of removing names of ineligible voters from the official list of eligible voters – (I) under section 8(a) (3) (B) of such Act (42 U.S.C. 1973gg-6(a) (3) (B)), the state shall coordinate the computerized list with state agency records on felony status; and (II) by reason of the death of the registrant under section 8(a) (4) (A) of such Act (42 U.S. C. 1973gg-6(a) (4) (A)), the state shall coordinate the computerized list with state agency records on death.	Partial compliance	Ensure CVRS link with DOC, Sup Ct, and PHSS (Vital Statistics).
(iii) Notwithstanding the preceding provisions of this subparagraph, if a state is described in section 4(b) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-2(b)), that state shall remove the names of ineligible voters from the computerized list in accordance with state law.	Partial compliance	Review 42USC1973 to determine specific requirements.
(B) CONDUCT – The list maintenance performed under subparagraph (A) shall be conducted in a manner that ensures that --	Partial compliance	GEC Exec Dir shall ensure CVRS list maintenance
(i) the name of each registered voter appears in the computerized list;	In full compliance	GEC Exec Dir shall ensure CVRS list shows the name of each registered voter.
(ii) only voters who are not registered or who are not eligible to vote are removed from the computerized list; and	Partial compliance	GEC Exec Dir shall ensure only ineligible voters are removed from the CVRS listing of voters.
(iii) duplicate names are eliminated from the computerized list.	Partial compliance	GEC Exec Dir shall ensure that duplicates are eliminated from the CVRS listing of eligible voters.

(3) TECHNOLOGICAL SECURITY OF COMPUTERIZED LIST – The appropriate state or local official shall provide adequate technological security measures to prevent the unauthorized access to the computerized list established under this section.	Partial compliance	GEC Exec Dir to coordinate security requirements w/ CVRS vendor.
(4) MINIMUM STANDARD FOR ACCURACY OF STATE VOTER REGISTRATION RECORDS – The state election system shall include provisions to ensure that voter registration records in the state are accurate and are updated regularly, including the following:	Partial compliance	GEC Exec Dir shall ensure CVRS list is updated regularly.
(A) A system of file maintenance that makes a reasonable effort to remove registrants who are ineligible to vote from the official list of eligible voters. Under such system, consistent with the National Voter Registration Act of 1993 (42 U.S. C. 1973gg et seq.), registrants who have not responded to a notice and who have not voted in 2 consecutive general elections for federal office shall be removed from the official list of eligible voters, except that no registrant may be removed solely by reason of a failure to vote.	Partial compliance	GEC Exec Dir shall ensure CVRS list is purged of nonvoters for 2 consecutive general elections.
(B) Safeguards to ensure that eligible voters are not removed in error from the official list of eligible voters.	Partial compliance	GEC Exec Dir shall ensure voters are not removed erroneously.
(5) VERIFICATION OF VOTER REGISTRATION INFORMATION --	Partial compliance	GEC Exec Dir shall ensure verification of voter registration information.
(A) REQUIRING PROVISION OF CERTAIN INFORMATION BY APPLICANTS –	Partial compliance	GEC Exec Dir to amend voter registration process to implement HAVA.

(i) IN GENERAL -- Except as provided in clause (ii), notwithstanding any other provision of law, an application for voter registration for an election for federal office may not be accepted or processed by a state unless the application includes – (I) in the case of an applicant who has been issued a current and valid driver's license, the applicant's driver's license number; or (II) in the case of any other applicant (other than an applicant to whom clause (ii) applies), the last 4 digits of the applicant's social security number.	Partial compliance	Develop GEC board policy to amend voter registration procedure to require DLN's, and/or last 4 digits of SSN#.
(ii) SPECIAL RULE FOR APPLICANTS WITHOUT DRIVER'S LICENSE OR SOCIAL SECURITY NUMBER – If an applicant for voter registration for an election for federal office has not been issued a current and valid driver's license or a social security number, the state shall assign the applicant a number which will serve to identify the applicant for voter registration purposes. To the extent that the state has a computerized list in effect under this subsection and the list assigns unique identifying numbers to registrants, the number assigned under this clause shall be the unique identifying number assigned under the list.	Partial compliance	Develop GEC board policy to reference voter registration number as a unique identifier.
(iii) DETERMINATION OF VALIDITY OF NUMBERS PROVIDED -- The state shall determine whether the information provided by an individual is sufficient to meet the requirements of this subparagraph, in accordance with state law.	Partial compliance	Develop GEC board policy to establish identification criteria for voter registration.
(B) REQUIREMENTS FOR STATE OFFICIALS --	Not in compliance	GEC Exec Dir will ensure compliance.
(i) sharing information in databases – The chief state election official and the official responsible for the state motor vehicle authority of a state shall enter into an agreement to match information in the database of the statewide voter registration system with information in the database of the motor vehicle	Not in compliance	GEC Exec Dir will develop agreements with DMV, DOC, Sup Ct, PHSS, and other GovGuam agencies.

authority to the extent required to enable each such official to verify the accuracy of the information provided on applications for voter registration.		
(ii) AGREEMENTS WITH COMMISSIONER OF SOCIAL SECURITY -- The official responsible for the state motor vehicle authority shall enter into an agreement with the Commissioner of Social Security under section 205(r) (8) of the Social Security Act (as added by subparagraph (C)).	Not in compliance	GEC Exec Dir will coordinate DMV agreement with Social Security Administration.
(b) REQUIREMENTS FOR VOTERS WHO REGISTER BY MAIL–	Partial compliance	GEC Exec Dir to revise existing mail-in voter registration procedure to meet HAVA requirements.
(1) IN GENERAL -- Notwithstanding section 6(c) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4(c)) and subject to paragraph (3), a state shall, in a uniform and nondiscriminatory manner, require an individual to meet the requirements of paragraph (2) if --	Partial compliance	GEC to review 42USC1973, and ensure compliance w/ HAVA.
(A). the individual registered to vote in a jurisdiction by mail; and	Partial compliance	GEC Exec Dir to ensure full compliance w/ HAVA.
(B) (i) the individual has not previously voted in an election for federal office in the state; or	Partial compliance.	GEC Exec Dir to amend mail-in registration forms accordingly.
(ii) the individual has not previously voted in such an election in the jurisdiction and the jurisdiction is located in a state that does not have a computerized list that complies with the requirements of subsection (a).	In full compliance	No action required.

(2) REQUIREMENTS –	Partial compliance	Develop GEC board policy to ensure full compliance with HAVA.
(A) IN GENERAL – An individual meets the requirements of this paragraph if the individual:	Partial compliance	Amend election procedures accordingly.
(i) in the case of an individual who votes in person – (I) presents to the appropriate state or local election official a current and valid photo identification; or (II) presents to the appropriate state or local election official a copy of a current utility bill, bank statement, government check, pay check or other government document that shows the name and address of the voter;	Partial compliance	Amend election procedures accordingly.
(ii) in the case of an individual who votes by mail, submits with the ballot – (I) a copy of a current and valid photo identification; or (II) a copy of a current utility bill, bank statement, government check, pay check, or other government document that shows the name and address of the voter.	Partial compliance	Amend election procedures accordingly.
(B) FAIL-SAFE VOTING –	Not in compliance	Amend 3GCA and develop GEC board policy to allow for provisional voting.
(i) IN PERSON – An individual who desires to vote in person, but who does not meet the requirements of subparagraph (A)(i) may cast such a ballot by mail and the ballot shall be counted as a provisional ballot in accordance with section 302(a).	Partial compliance	Amend election procedures accordingly.
(ii) BY MAIL – An individual who desires to vote by mail but who does not meet the requirements of subparagraph (A)(ii) may cast such a ballot by mail	Partial compliance	Amend election procedures accordingly.

and the ballot shall be counted as a provisional ballot in accordance with section 302(a).		
(3) INAPPLICABILITY -- Paragraph (1) shall not apply in the case of a person --	Not in compliance	Amend election procedures accordingly.
(A) who registers to vote by mail under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) and submits as part of such registration either --	Partial compliance	Amend election procedures accordingly.
(i) a copy of a current and valid photo identification; or	Partial compliance	Amend election procedures accordingly.
(ii) a copy of a current utility bill, bank statement, government check, pay check, or government document that shows the name and address of the voter;	Partial compliance	Amend election procedures accordingly.
(B) (i) who registers to vote by mail under section 6 of the National Voter Registration Act of 1993 (42 U.S. C. 1973gg-4) and submits with such registration either – (I) -- a driver's license number; or (II) at least the last 4 digits of the individual's social security number; and	Partial compliance	Review 42USC1973 and amend election procedures accordingly.
(ii) with respect to whom a state or local election official matches the information submitted under clause (i) with an existing state identification record bearing the same number, name and date of birth as provided in such registration; or	Partial compliance	Amend election procedures accordingly.
(C) who is –	Partial compliance	Include in election procedures.

(i) entitled to vote by absentee ballot under the Uniformed and Overseas Citizens Absentee Voting Act (42 U.S.C. 1973ff-1 et seq.);	Partial compliance	Review 42USC1973 and amend election procedures accordingly.
(ii) provided the right to vote otherwise than in person under section 3(b)(2)(B)(ii) of the Voting Accessibility for the elderly and Handicapped Act (42 U.S.C. 1973ee-1(b)(2)(B)(ii); or	Partial compliance	Review 42USC1973 and amend election procedures accordingly.
(iii) entitled to vote otherwise than in person under any other federal law.	Partial compliance	Review federal laws and amend election procedures accordingly.
(4) CONTENTS OF MAIL-IN REGISTRATION FORM --	Partial compliance	Amend mail-in registration form to meet full HAVA compliance.
(A) IN GENERAL -- The mail voter registration form developed under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) shall include the following:	Partial compliance	Review 42USC1973 and amend mail-in registration form accordingly.
(i) The question 'Are you a citizen of the United States of America?' and boxes for the applicant to check to indicate whether the applicant is or is not a citizen of the United States.	Partial compliance	Revise mail-in voter registration form accordingly.
(ii) The statement 'If you checked 'no' in response to either of those questions, do not complete this form.'	Not in compliance	Revise mail-in voter registration form.
(iii) A statement informing the individual that if the form is submitted by mail and the individual is registering for the first time, the appropriate	Partial compliance	Amend mail-in voter registration form accordingly.

information required under this section must be submitted with the mail-in registration form in order to avoid the additional identification requirements upon voting for the first time.		
(B) INCOMPLETE FORMS – If an applicant for voter registration fails to answer the question included on the mail voter registration form pursuant to subparagraph (A)(i), the registrar shall notify the applicant of the failure and provide the applicant with an opportunity to complete the form in a timely manner to allow for the completion of the registration form prior to the next election for federal office (subject to state law).	Partial compliance	Amend mail-in voter registration procedures accordingly.

1.d §304, Minimum Requirements

Guam understands that the requirements laid out in HAVA Title III are minimum requirements, and that Guam may establish election technology and administration requirements that are more stringent. Any more stringent requirement that Guam imposes will comply with all Title III requirements, as well as the laws described in HAVA §906.

1.e §305, Methods of Implementation Left to Discretion of State

Guam will choose the various means to comply with the requirements of HAVA Title III. Specific details on the implementation methodology chosen can be found in Sections 1.a through 1.c of this Guam State Plan.

1.f §311, Adoption of Voluntary Guidance by Commission

Once the federal Election Assistance Commission (EAC) has issued its voluntary recommendations with respect to Title III, Guam will consider that guidance in updating the Guam State Plan. Guam will incorporate those recommendations deemed appropriate into subsequent versions of the Guam State Plan.

1.g §312, Process for Adoption

Guam will stay aware of the progress of the EAC on developing the Title III recommendations. If appropriate, Guam will provide feedback during the public comment period after the recommendations are published in the Federal Register and participate in public hearings regarding the recommendations.

1.b §251(b) (2) – Other Activities

Guam currently does not have the personnel and technical capacity required to fully achieve HAVA compliance. Ongoing operations and maintenance of the new capabilities required by HAVA cannot be supported with the current technical infrastructure and resources. Guam proposes to establish a solid foundation to build and sustain the people, processes, and technology necessary to maintain the new capabilities. The following activities are thus proposed to improve the election system:

- Conduct an assessment of the current technical infrastructure and establish a strategy to standardize technical infrastructure;
- Conduct process review and redesign if necessary;
- Research the possibility of integration of key election management systems;
- Continue expanding polling place accessibility; and
- Document job descriptions and staff positions with resources qualified to conduct election reform activities.

Section 2. Distribution of Requirements Payment. *How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of -- (A) the criteria to be used to determine the eligibility of such units or entities for receiving the payment; and (B) the methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8). -- HAVA §254 (a)(2)*

2.a Eligibility of local units to receive the payment

All elections in Guam are centralized. There are no local units of government for election purposes. Accordingly, the GEC will account for and be accountable for all expenditures, funding levels, program controls, and outcomes. Guam, in conjunction with the GEC Executive Director, will determine the appropriate level of support for special initiatives. Guam will follow applicable local laws regarding the distribution of federal reimbursements.

Guam will provide the necessary support to the GEC should it seek HAVA grants outside the scope of the requirements payments.

2.b Performance measures for local units

Funds will be centrally managed as described in Section 2.a, and GEC will monitor the initiatives for which those funds are authorized.

GEC will monitor the performance of each initiative that is funded by requirements payments in three areas: financial controls, compliance with standards, and program results.

Financial Controls: GEC will develop and use standard financial reporting for all initiatives funded by requirements payments.

Compliance with Standards: GEC will develop and use standard program management reporting for all initiatives that are funded by requirements payments.

Program Results: GEC will develop key performance indicators (KPI) for each initiative funded by requirements payments.

Section 3. Voter Education, Election Official Education and Training, and Poll Worker Training. *How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III. -- HAVA §254 (a) (3)*

Election Official Training

Election officials are critical to an efficient, secure, and reliable election process. In Guam, the Executive Director is responsible for providing a comprehensive training program to election officials in their respective districts prior to an island-wide and/or federal election. Training needs are determined by the Executive Director on a district-level need, and targeted towards the following election officials:

- GEC Board of Directors
- GEC Legal Counsel, Staff, and Management
- State Plan Development and Coordinating Committee Members
- Precinct Officials
- Voter Registration Officials
- Absentee Ballot Officials
- Special Needs Election Officials

Improving and implementing island-wide training resources and procedures is an ongoing process each election year. Working as a team, the Board of Directors, the GEC Executive Director, and the GEC staff develop uniform training materials that are coordinated with Precinct Official Handbooks, and distributed with election day ballots and supplies. All training materials and handbooks are created for a hard copy ballot utilizing an optical scan tabulator. Training sessions are generally presented in a paper-based format. At this time, there is little use of technology in training presentations. However, it is expected that the GEC will begin utilizing higher levels of training technology as it migrates into Direct Recording Electronic (DRE) voting systems for Election 2004, and be primarily paperless by Election 2006.

Election training for candidates, precinct officials, poll watchers, and other election officials is generally conducted between 30 – 45 days prior to the election. A number of handbooks are developed for the various types of officials to facilitate the training. These Handbooks are

developed in such a way that if an election official has not received the training, the election official would be able to clearly understand and implement procedures.

To ensure that all election officials have the training and resources available to allow them to successfully conduct elections, Guam will develop a systematic approach to training that includes:

- Developing an island-wide and community-needs comprehensive training plan. This will include acquiring necessary resources for improving training methods and utilizing training coordinators in an effort to bring all training as close to election day as possible.

- Improving training and election day materials and handbooks so they are flexible to accommodate updates and changes, are effective in the trainee's retention of information, and take into consideration the wide variety of skill levels within the training audience.

- Researching and/or implementing training delivery options such as videos, interactive web-based training, and conference style training.

- Recognizing the differences among the various Native Pacific islanders and coordinating training needs, methods, and approaches with their respective community organizations to obtain input and guidance on delivering training to individuals with diverse cultural backgrounds.

Education and training programs are critical to a successful program of election reform in Guam. The proposed milestones in this document will require change management to ensure that all stakeholders (poll workers, election officials, voters, etc.) are comfortable with the new processes and supporting technologies that HAVA requires.

Currently, training programs are informal. GEC distributes policies and procedures and the GEC Executive Director is responsible for how the messages are delivered to staff members, poll workers, and the public. Often, knowledge is distributed informally, in meetings and at conferences, rather than in formal training sessions. There are no GEC personnel available to take sole responsibility for training. Training conducted is usually organized by each distinct area (voter registration, voting systems, etc.). Formal training is usually presented in a paper-based, person-to-person format; there is little to no use of technology in creating or delivering training.

In general, voter outreach programs are limited. Sample ballots are distributed to each village Mayor's office and a specimen is published in the local paper before each general election. Voters can also obtain voting information through public service announcements such as local news websites. However, when new voting systems or regulations directly affect the voter, outreach will increase exponentially. In the case of implementing a DRE voting system, the outreach associated with this new system will be cost and resource intensive.

A thorough and thoughtful training and outreach program increases the buy-in of all affected stakeholders. It is important to develop the training and outreach program with these stakeholders as they are a critical component to the current and future process and will provide valuable expertise on previous training initiatives. Also the program must account for the changing poll worker and election official workforce, so that training is effective for a group with diverse skills.

Finally, HAVA brings increased accessibility to elections. Training programs must address the needs of the disabled community and individuals with alternative language considerations. In collaboration with the stakeholders, effective training and outreach will help provide for smooth implementation of Guam's Plan.

Training and Outreach Program Milestones

To ensure the success of election reform programs, GEC needs a standard and centralized approach to training and outreach. To this end, GEC will execute a three-step program:

1. Managing Training and Outreach Program

Establish formal training and outreach programs within GEC. Acquire necessary resources for training and outreach. The current resource levels at GEC cannot support this kind of comprehensive training program. GEC will need to bring on the assistance of vendors responsible for new technologies.

2. Planning Training and Outreach Program

Conduct a training needs assessment based on the actions planned to address HAVA requirements. The assessment will include identifying current stakeholders, and documenting current and desired skill levels for each stakeholder group.

HAVA compliance requires that Guam use a training delivery method that is easily accessed and re-used by trainees, is flexible enough to accommodate updates and changes, and is effective in the trainee's retention of information. This research will help address the best means for adult learning, taking into consideration the wide variety of skill levels within Guam's training audience.

Establish a user group of stakeholders to assess training needs, and develop a training document for election officials and poll workers. This document will establish a standard, yet flexible training approach, which outlines a strategic direction for training over time, addressing both training content and delivery methods. The approach will cover a variety of topics: the identification of organization(s) responsible for developing training; a matrix of the stakeholders receiving training, the content to be delivered, and phases for training delivery; a discussion of training objectives; a description of the delivery methods for training; and an outline of the types of feedback mechanisms that GEC will use to evaluate the effectiveness of training.

Develop a Guam island-wide outreach and communication plan. Outreach actively provides the voter, the end recipient of Guam election services, information regarding new election procedures. Increased awareness (and ultimately ownership and sponsorship) on the part of voters will correspondingly increase the success of election reform programs. An outreach and communication plan will describe the strategy for developing and delivering messages to a variety of stakeholder groups. Specifically, the document will outline the proposed audience, the party responsible for delivery, the expected outcome, the key messages, the medium for delivery, and the timing of the communication event.

3. Implementing Training and Outreach Program

Design, build, test, and implement training delivery method, leveraging previous training experience. This method will vary dependent on the approach determined in the planning phase. Regardless of whether training is instructor-led, online, paper-based, etc., the training must still go through the design and build phases, and be subject to testing to ensure its success before it is delivered to trainees. Implement outreach and communication plan. Those responsible for delivering various communication messages must ensure that events occur on a timely basis.

Section 4. Voting System Guidelines and Processes. *How the State will adopt voting system guidelines and processes, which are consistent with the requirements of section 301. -- HAVA §254 (a) (4)*

Guam currently meets most of the voting system requirements required under HAVA. Guam has procedures established for conducting recounts on a district-wide and island-wide level. Guam has a procedure established for system certification. As Guam implements a new voting system, we will maintain the current procedure and create new procedures, guidelines and processes as necessary. New processes and guidelines may take the form of internal procedures, regulations or changes to Guam law.

To attain compliance, Guam must provide DRE units to every polling location and introduce legislation that defines what constitutes a vote.

Guam will adopt legislation mandating uniform voting systems for polling place and absentee voting by 2006. The uniform system mandated by legislation will meet the requirements of HAVA §301. Simultaneously, the GEC will create operational standards for the system. As the implementation of the new voting systems occur, GEC will maintain these and create any new guidelines and processes as necessary. The GEC will determine the appropriate method to publicize any new voting system guidelines and processes.

Section 5. Guam's HAVA Fund Management. *How the State will establish a fund described in subsection (b) for purposes of administering the State's activities under this part, including information on fund management. -- HAVA §254 (a) (5)*

Working with the Office of the Governor, the Treasurer of Guam, the Department of Revenue and Taxation, and the Director of Administration, the GEC will establish an election fund that

shall be kept separate and distinct from all other funds within the GEC. The election fund will contain both federal and general funds. The GEC shall ensure that appropriate accounting structures are in place to ensure federal fund receipts and expenditures are tracked separately from the general funds portion relating to the 5% local match required under HAVA. The election fund will consist of the following amounts:

a. Amounts appropriated or otherwise made available by Guam for carrying out the activities for which the requirements payment is made to the Guam State Plan under HAVA.

b. The requirements payment made to Guam under HAVA.

c. Such other amounts as may be appropriated under law.

d. Interest earned on deposits of the fund.

The Guam Election Commission will work with the Guam Public Auditor, the Department of Administration, and the Director of Revenue and Taxation, to ensure compliance with all mandated fiscal controls and policies.

Section 6. Guam's HAVA Budget. *The States proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on — (A) the costs of the activities required to be carried out to meet the requirements of title III; (B) the portion of the requirements payment which will be used to carry out activities to meet such requirements; and* (C) *the portion of the requirements payment, which will be used to carry out other activities. -- HAVA §254 (a)(6)*

The following table outlines the assumptions regarding Federal funding that Guam used in creating its budget for HAVA activities.

Table 6.1 Federal Funding Assumptions for Guam

Federal Fiscal Year	Total Federal Funds	Guam Share	Estimated Grant Minimum
Early Payments (§101)	$650 Million (appropriated)	$ 650,000	$1,000,000
FY2003 (§252, 257)	$833 Million (appropriated)	$ 833,000	$1,400,000
FY2004 (§252, 257)	$500 Million (President's Budget; authorized at $1000 M)	$ 500,000	$1,000,000
FY2005 (§252, 257)	$600 Million (authorized)	$ 600,000	$ 600,000
Total	$2,583 Million	$ 2,583,000	$4,000,000

Based on these funding levels, the Guam HAVA budget is representative of the activities to implement and conduct operations and maintenance through calendar year 2005 for the HAVA

Title III requirements and "other" activities. The budget will be revised over time based on the most current information available regarding federal funding.

The duration for the Guam's budget is based on HAVA deadlines and funding. The GEC is concerned, however, that beyond the three years of federal funding, the ongoing costs of operating and maintaining the new voting system and statewide voter registration list will be higher than the Guam's maintenance of effort level (see Section 7 of the Guam State Plan). The operation and maintenance of the new systems will be the financial burden of the GEC when HAVA funding is no longer available.

Guam made the following additional assumptions in preparing the budget:

- Guam is planning to implement a uniform Centralized Voter Registration System apart from its current Voter Registration System. The CVRS will generate a computerized island-wide voter registration list to meet specific HAVA requirements (including requirements for voters who register by mail). Both systems will be utilized in Election 2004.
- The cost for the voter registration list (§303(a)) is estimated at $590,000.
- The cost for education, training, and outreach (§254 (3)) is estimated at $450,000. Guam anticipates concurrent initiatives to implement the voting system and voter registration list. This may overextend GEC's current capacity to provide appropriate voter education, training, and outreach programs. Guam and the GEC will need to develop a core curriculum on all training programs, and the capability to deliver the training programs centrally.

Section 7. Maintenance of Effort. *How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000. -- HAVA §254 (a)(7)*

Consistent with HAVA §254(a)(7), in using any requirements payment, Guam will maintain expenditures for activities funded by the payment at a level equal to or greater than the level of such expenditures in Guam's FY 2000 -- a total of $573,588.

As in many states, however, this level of funding represents only a small portion of the island-wide aggregate operating budget expenditures needed to sustain elections. The Guam Election Office's budget typically supports year-round core staff and operating expenses for continuous functions such as voter registration, information services, and IT support. In addition, increases in funding are associated with each specific election -- for poll workers, temporary office staff, ballot production, mass mailings, election day support (including personnel, equipment, and supplies), etc. For FY2004, the GEC's requested budget for local elections is $846,414.

Table 6.2

HAVA Requirements Title III Requirements	Estimated Cost	Funding Source(§101, §103, §252, §257) Early Money $3,980	FY03 $2,408	FY04 $1,003	FY05 $ -0-	Duration Total $4,388	Time Frame
301 Voting System Improvements (Conversion to DRE Voting System Computer Hardware, Conversion Software, Voter Data Verification Process, Military & Overseas Voter Access, and Attendant Equipment)	$1,700,000	$415,300	$581,420	$415,300	$249,180	$1,661,200	FY 03 - 06
§302 Provisional voting and voting information requirements	$41,000	$10,100	$14,140	$10,100	$6,,060	$40,400	FY 03 - 04
§303 Computerized statewide voter registration list requirements and requirements for voters who register by mail.	$590,000	$145,600	$203,840	$145,600	$87,360	$582,400	FY 03 - 04
Other Election Reform Activities							
§254 (3) Voter education, election official education and training and poll worker training which will assist the State in meeting the requirements of title III	$450,000	$110,900	$155,260	$110,900	$66,540	$443,600	FY 03 - 06
§402 Establishment of state based administrative complaint procedures to remedy grievances.	$10,000	$2,400	$3,360	$2,400	$1,440	$9,600	FY 03 - 04
§704 Improvements to military/off-island absentee voting program.	$ -0-	$ -0-	$ -0-	$ -0-	$ -0-	$ -0-	FY 03 - 06
§101 Management of State Plan	$68,000	$16,900	$23,660	$16,900	$10,140	$67,600	FY 03 - 06
§101 (1.H) State Plan Technology planning/improvements	$ -0-	$ -0-	$ -0-	$ -0-	$ -0-	$ -0-	FY 03 - 06
§101 (1.H) Polling Place Accessibility	$1,200,000	$298,800	$418,320	$298,800	$179,280	$1,195,200	FY 03 - 06
Totals	$4,059,000	$1,000,00 0	$1,400,000	$1,000,00 0	$600,000	$4,000,000	

Section 8. HAVA Performance Goals and Measures. *How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met. – HAVA §254 (a)(8)*

The Guam Election Commission (GEC) will establish performance goals and will institute a process to measure progress toward the achievement of these goals. This process will provide structure and continued measurable targets for accomplishment. GEC will oversee continuous management of the Guam State Plan. GEC will be responsible for developing and monitoring a uniform performance evaluation process. In measuring progress, the GEC will continue to revisit original goals and objectives and make adjustments as appropriate.

GEC Principal Performance Goals. GEC's principal goals are to achieve election reform and compliance with HAVA requirements through the successful implementation of the programs outlined in the Guam State Plan. The matrix below details key elements of the Plan and the timeframe for meeting each.

Plan Elements	Time Frame	Responsibility
Voting Systems, Section 301	To be fully implemented by January 1, 2006	GEC/DRE Vendor
Provisional Voting, Section 302	To be implemented by January 1, 2004	GEC
Voter Registration:		
Section 303(a)	To be fully implemented by January 1, 2006	GEC
Section 303(b)	To be fully implemented by January 1, 2004	GEC
Other Activities		
Section 101(b)(1) Election Improvements		GEC
Section 251(b)(2), Other Activities		GEC
Education and Training		
Section 254(a)(3)		GEC
Budget and Fiscal Controls		
Section 254(a)(2)		GEC / Guam Public Auditor
Section 254(a)(6)		GEC / Guam Public Auditor
Section 254(a)(7)		GEC / Guam Public Auditor
Section 254(a)(10)		GEC / Guam Public Auditor
Complaint Procedures		
Title II, Section 254(a)(9)		GEC
Title IV, Section 402		GEC

Guam's performance goals and completion timelines for HAVA Section 301, Voting Systems Standards Requirements, are set forth in Appendix A. Guam's performance goals, completion timelines, and performance measurement criteria for HAVA Section 301, Voting Systems Standards Requirements, are set forth in Appendix B.

Section 9. State-Based Administrative Complaint Procedures *A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402. – HAVA §254 (a)(9).*

Deadline for Compliance: Prior to certification of State Plan, but no later than January 1, 2004

The Guam Election Commission (GEC) will develop and adopt a procedure, consistent with Guam law, for administrative complaints that meet HAVA requirements. Guam election laws provide for the processing of complaints both at the administrative level and in the superior court of Guam. Future election complaints will follow the administrative complaint procedures to be developed and adopted by GEC.

The GEC Administrative Complaint Procedure will be a unified island-wide administrative complaint system for the tracking, management and conduct of hearings to address complaints revolving around election issues. It is GEC's plan to provide secure online access and phone call center access for complaint processing to the GEC Board of Directors, the GEC Executive Director, and other appropriate election officials. The administrative complaint system will also provide secure online review of the complaint by the complainant. The nature of the complaints contained within the system will be treated as alleged violations of the Help America Vote Act of 2002 (HAVA).

All complaints shall be addressed by the GEC within 90 days of receiving the complaint. If the complaint is not resolved within the 90 days after receipt of the complaint, or extension of the expiration as agreed upon with the complainant, the complainant may seek alternative dispute resolution.

Upon request of alternative dispute resolution, the GEC will refer the complaint to a third party reviewer, who is yet to be determined. The complaint system shall contain at each formal complaint, at minimum, the name and address of the complainant, the date and nature of the complaint, the relevant records and minutes, and the disposition of the complaint.

The matrix below outlines HAVA requirements related to complaint procedures and the corresponding current status for Guam.

Section 402. Establishment of State-Based Administrative Complaint Procedures to Remedy Grievances

Requirement	Current Status	Action Planned
Section 402. Establishment of State-Based Administrative Complaint Procedures to Remedy Grievances.	Not in compliance	Amend 3GCA and develop GEC board policy to establish voter administrative grievance procedure.
(a) ESTABLISHMENT OF STATE-BASED ADMINISTRATIVE COMPLAINT PROCEDURES TO REMEDY GRIEVANCES	Not in compliance	Develop GEC board policy for a voter administrative grievance procedure.
(1) ESTABLISHMENT OF PROCEDURES AS CONDITION OF RECEIVING FUNDS –If a state receives any payment under a program under this Act, the state shall be required to establish state-based administrative complaint procedures which meet the requirements of paragraph (2).	Not in compliance	GEC Exec Dir shall establish the required administrative grievance procedure.
(2) REQUIREMENTS FOR PROCEDURES – The requirements of this paragraph are as follows:	Not in compliance	GEC Exec Dir shall ensure HAVA requirements are met.
(A) The procedures shall be uniform and nondiscriminatory.	Not in compliance	GEC Exec Dir shall ensure procedures are uniform and nondiscriminatory.
(B) Under the procedures, any person who believes that there is a violation of any provision of title III (including a violation, which has occurred, is occurring, or is about to occur) may file a complaint.	Not in compliance	GEC Exec Dir shall define grievance criteria pursuant to HAVA.

(C) Any complaint filed under the procedures shall be in writing and notarized, and signed and sworn by the person filing the complaint.	Not in compliance	GEC Exec Dir shall establish grievance form pursuant to HAVA.
(D) The state may consolidate complaints filed under subparagraph (B).	Not in compliance	Develop GEC board criteria for consolidation of complaints.
(E) At the request of the complainant, there shall be a hearing on the record.	Not in compliance	Develop GEC board procedure for hearings, and definition of "record."
(F) If, under the procedures, the state determines that there is a violation of any provision of title III, the state shall provide the appropriate remedy.	Not in compliance	Develop GEC board policy on appropriate remedy.
(G) If, under the state determines that there is no violation, the state shall dismiss the complaint and publish the results of the procedures.	Not in compliance	Develop GEC board policy on dismissal of complaints.
(H) The state shall make a final determination with respect to a complaint prior to the expiration of the 90-day period, which begins on the date the complaint is filed, unless the complainant consents to a longer period for making such a determination.	Not in compliance	Develop GEC board policy on a 90-day resolution process for all complaints.
(I) If the state fails to meet the deadline applicable under subparagraph (H), the complaint shall be resolved within 60 days under alternative dispute resolution procedures established for purposes of this section. The record and other materials from any proceedings conducted under the complaint procedures established under this section shall be made available for use under the alternative dispute resolution procedures.	Not in compliance	Develop GEC board policy on an alternative dispute resolution procedure.

Section 10. Effect of Title I Payments. *If the State received any payment under title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities. -- HAVA §254 (a)(10)*

Guam is presently in receipt of $1,000,000, title I "Early Money."

§101. Payments to States for activities to improve administration of elections.

Guam is eligible for approximately $1,000,000 under §101. These funds will be used for activities to meet the following requirements:

§301 Voting system	$ 415,300
§302 Provisional Voting	$ 10,100
§303 Voter registration system	$ 145,600
§254 Voter Education	$ 110,900
§402 Complaint Procedure	$ 2,400
§101 State Plan Management	$ 16,900
§101 Accessibility	$ 298,800
Total	**$1,000,000**

Section 11. Guam's HAVA State Plan Management. *How the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change— (A) is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan; (B) is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and* (C) *takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A). -- HAVA §254 (a)(11)*

Guam intends to use the Guam State Plan as the foundation for its future strategic direction. Consequently, sound and responsible management of the Guam State Plan will be an essential component of the Guam election community's future success.

Due to the complexity of HAVA and the potential variety of projects it encompasses, GEC will conduct ongoing management of the Guam State Plan, including project planning (for all HAVA-related and other election reform projects) and establishing and implementing program management standards (i.e. performance measures, review and approval processes, issue/risk management, etc.). The GEC will also be responsible for other election functions, including: budget and fiscal, personnel, and office support functions.

Guam understands and agrees to comply with HAVA requirements related to ongoing management of the Guam State Plan. More specifically, Guam agrees that it may not make any material change in the administration of the Guam State Plan unless the change: (A) is developed and published in the Federal Register in accordance with HAVA §255 in the same manner as the Guam State Plan; (B) is subject to public notice and comment in accordance with HAVA §256 in the same manner as the Guam State Plan; and, (C) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).

Section 12. Changes to State Plan from Previous Fiscal Year. *In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year. -- HAVA §254 (a)(12)*

This FY 2003 Plan is Guam's inaugural plan under HAVA. This section will be updated in the FY 2004 Guam State Plan, reflecting changes to the Guam State Plan, as well as a summary of 2003 successes.

Section 13. State Plan Development and Coordinating Committee.

Section 255(a) of HAVA requires the chief State election official to develop the State plan through a committee of appropriate individuals, including the chief election officials of the two most populous jurisdictions within the States, other local election officials, stakeholders (including representatives of groups of individuals with disabilities), and other citizens, appointed for such purpose by the chief State election official. Accordingly, the Governor of Guam, on June 6, 2003, issued Executive Order 2003-20 relative to establishing the Guam State Plan Development and Coordinating Committee pursuant to the Help America Vote Act (HAVA) of 2002, P.L. 107-252 / H.R. 3295, and appoints the following representatives:

Mr. Gerald A. Taitano, Executive Director, Guam Election Commission / Chief State Election Official
Mr. Frederick J. Horecky, Esq., Chairman, Board of Directors, Guam Election Commission
Mrs. Mary C. Torres, Vice Chairperson, Board of Directors, Guam Election Commission
Mr. Ignacio C. Aguigui, Esq., Member, Board of Directors, Guam Election Commission
Mr. Florencio T. Ramirez, Jr., Member, Board of Directors, Guam Election Commission
Dr. Gregorio C. San Nicolas, Member, Board of Directors, Guam Election Commission
Ms. Rossana D. San Miguel, Member, Board of Directors, Guam Election Commission
Mr. John P. Taitano, Member, Board of Directors, Guam Election Commission
Mr. David J. Sablan, Chairman, Republican Party of Guam
Mr. Joe T. San Agustin, Chairman, Democratic Party of Guam
Mr. Joaquin Perez, District Representative, Guam Delegate to the U.S. House of Representatives
Mr. John Blas, Executive Director, Mayor's Council of Guam
Hon. Scott Duenas, Mayor of Dededo
Hon. Bob Lizama, Mayor of Yigo
Mr. James Underwood, Director, Department of Integrated Services for Individuals

with Disabilities
Ms. Brenda Leon Guerrero, Administrator, University of Guam Center for Excellence in Developmental Disabilities Education, Research, and Service
Maj. Benjamin Guerrero, USMC, Ret., Director, Guam Veteran's Office
Mr. Gary Hartz, Student Development Administrator, Guam Community College
Mr. Daniel Camacho, Program Coordinator (Curriculum and Instructions), Department of Education

Other stakeholder representatives are as follows:

Mrs. Pat Botten, Individuals with Disabilities (Mobility)
Mr. Cesar C. Cabot, Esq., Legal Counsel, Guam Election Commission
Ms. Jackie Cabrera, Individuals with Disabilities (Visual Impaired)
Mr. Francisco N. Lizama, Democratic Party of Guam
Ms. Christine Payne, Guam Legal Services Disability Law Center (Guam Protection and Advocacy)
Mrs. Amber Sanchez, Private Citizen
Mr. Michael Terlaje, Director, University of Guam System for Assistive Technology

APPENDIX A

Performance Goals and Completion Timeline For Section 301. Voting Systems Standards Requirements

Performance Goals and Completion Timeline for Section 301. Voting Systems Standards Requirements

Performance Goal	Responsible Official and Est. Date of Completion	Completion Timetable
Goal #1. Amend 3GCA to implement the HAVA Section 301 requirement for acceptable voting systems standards.	GEC Executive Director, Legal Counsel, and Board of Directors / Dec 31, 2003	1-1. ExecDir to draft Bill by 9/30/03. 1-2. Legal Counsel review by 10/15/03. 1-3. Board / Gov review by 10/31/03. 1-4. ExecDir to fwd to Legislature by 11/30/03.
Goal #2. Develop GEC board policy to require the DRE voting system to meet HAVA standards.	GEC Executive Director, Legal Counsel, and Board of Directors / Dec 31, 2003	2-1. ExecDir to draft board policy by 10/31/03. 2-2. Legal Counsel review by 11/15/03. 2-3. Board review by 11/30/03. 2-4. ExecDir to include policy requirements on RFP for DRE voting system by 11/30/03.
Goal #3. Ensure that the DRE voting system permits the voter to verify (in a private and independent manner) the votes selected by the voter on the ballot before the ballot is cast and counted.	GEC Executive Director, Legal Counsel, and Board of Directors / Aug 31, 2004	3-1. ExecDir to develop preliminary voter verification proposal by 9/30/03. 3-2. ExecDir to consult w/ CEDDERS & GSAT by 10/15/03. 3-3. Board approval by 11/30/03. 3-4. ExecDir to include verification requirement in RFP for DRE voting system by 12/31/03. 3-5. GEC/CEDDERS/GSAT review bids by 3/31/04 to validate voter verification process. 3-6. Select DRE provider by 6/30/04.
Goal #4. Ensure that the DRE voting system provides the voter with the opportunity (in a private and independent manner) to change the ballot or correct any error before the ballot is cast and counted (including the opportunity to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error).	GEC Executive Director, Legal Counsel, and Board of Directors / Aug 31, 2004	4-1. ExecDir to develop provisions for the voter to correct errors / replace ballot by 9/30/03. 4-2. ExecDir to consult w/ CEDDERS & GSAT by 10/15/03. 4-3. Board approval by 11/30/03. 4-4. ExecDir to include voter correction / replacement provisions in RFP for DRE voting system by 12/31/03. 4-5. GEC/CEDDERS/GSAT review bids by 3/31/04 to validate voter correction / ballot replacement process. 4-6. Select DRE provider by 6/30/04.
Goal #5. Ensure that if the voter selects votes for more than one candidate for a single office – (i) notify the voter that the voter has selected more than one candidate for a single office on the ballot; (ii) notify the voter before the ballot is cast and counted of the effect of casting multiple votes for the office; and (iii) provide the voter with the opportunity to correct the ballot before the ballot is cast and counted.	GEC Executive Director, Legal Counsel, and Board of Directors / Aug 31, 2004	5-1. ExecDir to develop provisions to preclude the voter from overvoting by 9/30/03. 5-2. ExecDir to consult w/ CEDDERS & GSAT by 10/15/03. 5-3. Board approval by 11/30/03. 5-4. ExecDir to include specific provisions precluding overvotes in the RFP for DRE voting system by 12/31/03. 5-5. GEC/CEDDERS/GSAT review bids by 3/31/04 to validate preclusion of overvotes in responses. 5-6. Select DRE provider by 6/30/04.
Goal #6. For Election 2004, continue to use the current optical-scan ballot tabulation system, in addition to the introductory use of a DRE voting system.	GEC Executive Director, Legal Counsel, and Board of Directors / Aug 31, 2004	6-1. ExecDir to propose revisions to the current election process to include introduction of DRE voting systems by 12/31/03. 6-2. Board approval by 1/31/04.

A-1

A-2

		6-3. ExecDir to introduce the DRE voting system in all election publications by 6/30/03.

A-3

Goal #7. Revise the GEC voter education program specific to that voting system that notifies each voter of the effect of casting multiple votes for an office.	GEC Executive Director, Legal Counsel, and Board of Directors / July 31, 2004	7-1. ExecDir to recommend revisions to the voter education program to notify voter of the effect of overvotes by 12/31/03. 7-2. Board approval by 1/31/04. 7-3. ExecDir to include the effect of overvotes in all voter education programs by 6/30/04.
Goal #8. Provide the voter with instructions on how to correct the ballot before it is cast and counted (including instructions on how to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error)	GEC Executive Director, Legal Counsel, and Board of Directors / Aug 31, 2004	8-1. ExecDir to recommend revisions to the Voter Information Pamphlet and other election publications on how to correct the ballot before it is cast and counted by 12/31/03. 8-2. Board approval by 1/31/04. 8-3. ExecDir to include ballot correction and replacement instructions in all election training programs by 6/30/04
Goal #9. Implement GEC audit capacity for HAVA funds.	GEC Executive Director, Legal Counsel, and Board of Directors / Dec 31, 2003	9-1. ExecDir to consult with Guam Public Auditor on appropriate audit procedures by 8/31/03; Include audit capacity in draft Legis. Bill to implement HAVA by 8/8/03. 9-2. Legal Counsel review of audit procedures and Legis. bill by 8/15/03. 9-3. Board review of audit procedures and Legis. bill by 8/22/03; Gov. review of Legis. bill by 8/31/03. 9-4. ExecDir to fwd Legis. bill to Legislature by 11/30/03.

A-4

Goal #10. Ensure that the DRE voting system produces a permanent paper record with a manual audit capacity.	GEC Executive Director, Legal Counsel, and Board of Directors / July 31, 2003	10-1. ExecDir to review DRE manual audit capacity requirements by 9/30/03. 10-2. ExecDir to consult w/ Legal Counsel on manual audit requirements by 10/15/03. 10-3. Board approval by 11/30/03. 10-4. ExecDir to include manual audit requirements in RFP for DRE voting system by 12/31/03. 10-5. GEC/Legal Counsel review bids by 3/31/04 to validate manual audit capacity. 10-6. Select DRE provider by 6/30/04.
Goal #11. Ensure that the DRE voting system provides the voter with an opportunity to change the ballot or correct any error before the permanent paper record is produced.	GEC Executive Director, Legal Counsel, and Board of Directors / July 31, 2004	11-1. ExecDir to review DRE capacity to correct errors/ replace ballot by 9//30/03. 11-2. ExecDir to consult w/ Legal Counsel on ballot change / replacement requirements by 11/15/03. 11-3. Board approval by 11/30/03. 11-4. ExecDir to include ballot change / replacement requirements in RFP for DRE voting system by 12/31/03. 11-5. GEC/Legal Counsel review bids by 3/31/04 to validate ballot change / replacement capacity. 11-6. Select DRE provider by 6/30/04.
Goal #12. Ensure that the paper record is available as an official record for any recount conducted with respect to any election in which the DRE voting system is used.	GEC Executive Director, Legal Counsel, and Board of Directors / July 31, 2004	12-1. ExecDir to review DRE paper record capacity requirements by 9/30/03. 12-2. ExecDir to consult w/ Legal Counsel on DRE paper record requirements by 10/15/03. 12-3. Board approval by 11/30/03. 12-4. ExecDir to include paper record requirements in RFP by 12/31/03. 12-5. GEC/Legal Counsel review bids by 3/31/04 to validate paper record capacity. 12-6. Select DRE provider by 6/30/04.

A-5

Goal #13. Ensure that the DRE voting system is accessible for individuals with disabilities.	GEC Executive Director, Legal Counsel, and Board of Directors / July 31, 2004	13-1. ExecDir w/ GSAT will determine DRE accessibility requirement for all individuals w/ disabilities and at all prospective poll facilities by 9/5. 13-2. ExecDir to consult w/ Legal Counsel on DRE accessibility requirements by 10/15/03. 13-3. Board approval by 11/30/03. 13-4. ExecDir to include handicap accessibility requirements in RFP for DRE voting system by 12/31/03. 13-5. GEC/Legal Counsel review bids by 3/31/04 to validate handicap accessibility. 13-6. Select DRE provider by 6/30/04.
Goal #14. Ensure voting accessibility for individuals with disabilities, including nonvisual accessibility for the blind and visually impaired, in a manner that provides the same opportunity for access and participation (including privacy and independence) as for other voters.	GEC Executive Director, Legal Counsel, and Board of Directors / Jul 31, 2004	14-1. ExecDir w/ GSAT will determine DRE voter privacy and independence requirements for all individuals w/ disabilities and at all prospective poll facilities by 9/5 14-2. ExecDir to consult w/ Legal Counsel on DRE voter privacy and independence requirements by 10/15/03. 14-3. Board approval by 11/30/03. 14-4. ExecDir to include DRE voter privacy and independence requirements in RFP for DRE voting system by 12/31/03. 14-5. GEC/Legal Counsel review bids by 3/31/04 to validate DRE voter privacy and independence provisions. 14-6. Select DRE provider by 6/30/04.
Goal #15. Satisfy the accessibility requirement by locating at least one direct recording electronic voting system or other voting system equipped for individuals with disabilities at each polling place.	GEC Executive Director, Legal Counsel, and Board of Directors / Jul 31, 2004	15-1. ExecDir will assess HAVA funds availability for purchase of at least one DRE unit for each polling place by 12/31/03. 15-2. 15-3. Board approval by 1/31/04. 15-4. ExecDir to procure DRE's by 7/31/2004.

A-6

		16-4. ExecDir to procure DRE's by 7/31/2004.
Goal #17. Ensure that the DRE voting system provides alternative language accessibility pursuant to HAVA requirements.	GEC Executive Director, Legal Counsel, and Board of Directors / Dec 31, 2003	17-1. ExecDir w/ GSAT will determine DRE alternative language capacity by 9/5 17-2. ExecDir to consult w/ Legal Counsel on DRE alternative language capacity by 10/15/03. 17-3. Board approval by 11/30/03. 17-4. ExecDir to include DRE alternative language requirements in RFP for DRE voting system by 12/31/03. 17-5. GEC/Legal Counsel review bids by 3/31/04 to validate DRE alternative language capacity provisions. 17-6. Select DRE provider by 6/30/04.
Goal #18. Ensure that the DRE voting system error rate in counting ballots (determined by taking into account only those errors which are attributable to the voting system and not attributable to an act of the voter) is in compliance with the error rate standards established by the Federal Election Commission.	GEC Executive Director, Legal Counsel, and Board of Directors / Dec 31, 2003	18-1. ExecDir to determine acceptable FEC error rate by 9/5 18-2. ExecDir to consult w/ Legal Counsel on FEC/DRE error rate by 10/15/03. 18-3. Board approval by 11/30/03. 18-4. ExecDir to include DRE error rate requirements in RFP for DRE voting system by 12/31/03. 18-5. GEC/Legal Counsel review bids by 3/31/04 to validate DRE error rate. 18-6. Select DRE provider by 6/30/04

A-7

Goal #19. Adopt a uniform and nondiscriminatory standard to define what constitutes a vote, and what will be counted as a vote for each category of voting system used.	GEC Executive Director, Legal Counsel, and Board of Directors / Dec 31, 2003	19-1. ExecDir to draft uniform vote definition in Legis. bill form by 9/30/03. 19-2. Legal Counsel review by 10/15/03. 19-3. Board / Gov review by 10/31/03. 19-4. ExecDir to fwd to Legislature by 11/30/03.

A-8

Performance Goals and Completion Timeline for
Section 302. Provisional Voting And Voting Information Requirements

Performance Goal	Responsible Official and Est. Date of Completion	Completion Timetable
Goal #20. Amend 3GCA to implement HAVA Section 302 requirement for provisional voting and voting information requirements.	GEC Executive Director, Legal Counsel, and Board of Directors / May 31, 2004	20-1. ExecDir to draft Bill by 9/30/03. 20-2. Legal Counsel review by 10/15/03. 20-3. Board / Gov review by 10/31/03. 20-4. ExecDir to fwd to Legislature by 11/30/03
Goal #21. Develop GEC board policy and amend current election procedures to allow for an individual who declares that such individual is a registered voter in the jurisdiction in which the individual desires to vote and that the individual is eligible to vote in an election for federal office, but the name of the individual does not appear on the official list of eligible voters for the polling place or an election official asserts that the individual is not eligible to vote, such individual shall be permitted to cast a provisional ballot.	GEC Executive Director, Legal Counsel, and Board of Directors / May 31, 2004	21-1. ExecDir to draft board policy by 10/31/03. 21-2. Legal Counsel review by 11/15/03. 21-3. Board review by 11/30/03. 21-4. ExecDir to implement GEC provisional voting policy and procedures by 11/30/03. 21-5.ExecDir to include provisional voting guidelines in Precinct Official's Handbook and other election guidelines by 5/31/04.
Goal #22. Provide for an election official at the polling place to notify the individual that the individual may cast a provisional ballot in that election.	GEC Executive Director, Legal Counsel, and Board of Directors / May 31, 2004	22-1. ExecDir to revise Precinct Official's Handbook by 5/31/04 to designate Precinct Inspector as provisional ballot official. 22-2. Include provisional ballot voting in precinct official seminar. 22-3. Develop and print provisional ballot information pamphlet by 7/31/04 for Election 2004.

A-9

Goal #23. Ensure that the individual shall be permitted to cast a provisional ballot at that polling place upon the execution of a written affirmation by the individual before an election official at the polling place stating that the individual is – (A) a registered voter in the jurisdiction in which the individual desires to vote; and (B) eligible to vote in that election.	GEC Executive Director, Legal Counsel, and Board of Directors / July 31, 2004.	23-1. ExecDir to revise Precinct Official's Handbook by 5/31/04 to permit an individual to cast a provisional ballot official based on a written affirmation. 23-2. Include written affirmation requirement for provisional ballot voting in precinct official seminar. 23-3. Develop and print appropriate written affirmation form to vote by provisional ballot by 7/31/04 for Election 2004.
Goal #24. Ensure that an election official at the polling place transmits the ballot cast by the individual or the voter information contained in the written affirmation executed by the individual to an appropriate election official for prompt verification.	GEC Executive Director, Legal Counsel, and Board of Directors / July 31, 2004	24-1. ExecDir to revise Precinct Official's Handbook by 5/31/04 to require all provisional ballots to transmit voter information to Election Central for verification. 24-2. Include timely transmittal of voter information requirement in precinct official seminar. 24-3. Ensure that a communications network is established, e.g., telephone, fax, internet, etc., at all polling sites for the transmittal of voter information by 7/31/04 for Election 2004.
Goal #25. Establish procedures so that if the election official to whom the ballot or voter information is transmitted determined that the individual is eligible to vote, the individual's provisional ballot shall be counted as a vote in that election.	GEC Executive Director, Legal Counsel, and Board of Directors / May 31, 2004	25-1. ExecDir to revise Precinct Official's Handbook and GEC election procedures by 5/31/04 to allow GEC board to determine eligibility to vote, and whether or not the provisional ballot shall be counted. 25-2. Include above procedures in precinct official seminar.

A-10

		25-3. Ensure that a communications network is established, e.g., telephone, fax, internet, etc., at all polling sites for the return transmittal of GEC board determination on voter eligibility and whether or not the provisional ballot will be counted by 7/31/04 for Election 2004.
Goal #26. Ensure that at the time that an individual casts a provisional ballot the appropriate election official shall give the individual written information that states that any individual who casts a provisional ballot will be able to ascertain whether the vote was counted and, if the vote was not counted, the reason that the vote was not counted.	GEC Executive Director, Legal Counsel, and Board of Directors / May 31, 2004	26-1. ExecDir to revise Precinct Official's Handbook and GEC election procedures by 5/31/04 to allow for a written determination on the right to vote a provisional ballot, and if the the provisional ballot was counted. 26-2. Include above written determination procedures in precinct official seminar. 26-3. Ensure that a written determination forms are available for Election 2004.
Goal #27. Ensure that the appropriate election official establishes a free access system (such as a toll-free telephone number or an internet website) that any individual who casts a provisional ballot may access to discover whether the vote of that individual was counted, and, if the vote was not counted, the reason that the vote was not counted.	GEC Executive Director, Legal Counsel, and Board of Directors / July 31, 2004	27-1. ExecDir to revise Precinct Official's Handbook and GEC election procedures by 5/31/04 to provide for a free access system. 27-2. Include above procedures in precinct official seminar. 27-3. Ensure that a free access communications system is established, e.g., telephone, fax, internet, etc., at all polling sites for provisional vote verification by 7/31/04 for Election 2004.

A-11

Performance Goals and Completion Timeline for
Section 303. Computerized Statewide Voter Registration List Requirements and Requirements for Voters Who Vote by Mail

Performance Goal	Responsible Official and Est. Date of Completion	Completion Timetable
Goal #28. Ensure that the Guam Election Commission implements, in a uniform and nondiscriminatory manner, a single, uniform, official, centralized, interactive computerized island-wide voter registration list defined, maintained, and administered at the GEC level that contains the name and registration information of every legally registered voter in Guam and assigns a unique identifier to each legally registered voter in Guam (in this subsection referred to as the computerized list), and includes the following: (i) The computerized list shall serve as the single system for storing and managing the official list of registered voters throughout Guam. (ii) The computerized list contains the name and registration information of every legally registered voter in Guam. (iii) Under the computerized list, a unique identifier is assigned to each legally registered voter in Guam. (iv) The computerized list shall be coordinated with other agency databases within Guam. (v) Any election official in Guam, including any precinct official, may obtain immediate electronic access to the information contained in the computerized list.	GEC Executive Director, Legal Counsel, and Board of Directors / Feb 28, 2004	28-1. ExecDir to review HAVA CVRS requirements by 9/30/03. 28-2. Meet w/ UOG VRS database managers and determine CVRS interface requirements by 10/31/03. 28-3. Legal Counsel and GEC board review by 11/30/03. 28-4. ExecDir to include CVRS requirements in RFP by 12/31/03. 28-5. Select CVRS provider by 1/31/04. 28-6. Begin data transfer from VRS to CVRS by 2/28/04. 28-7. Test CVRS database and report generation capabilities. 28-8. Run both VRS and CVRS in Election 2004, compare performance, and consider eliminating VRS for Election 2006. Note: Continue current VRS Voter Registration No. as unique identifier. Note: Coordinate with DMV, DOC, PHSS, SSN#, Sup. Ct., etc. Note: Develop access capacity at all polling places and mayor's offices.

A-12

(vi) All voter registration information obtained by any election official in Guam shall be electronically entered into the computerized list on an expedited basis at the time the information is provided to the official. (vii) The GEC Executive Director shall provide such support as may be required so that local election officials are able to enter information as described above. (viii) The computerized list shall serve as the official voter registration list for the conduct of all elections for federal office in Guam.		Note: Ensure on-line capacity. Note: Ensure election officials are certified in the data entry process, and all data entry equipment are in working order. Note: Ensure designation is made in statute and GEC board policy.
Goal #29. Ensure that the appropriate election official shall perform list maintenance with respect to the computerized list on a regular basis as follows: (i) If an individual is to be removed from the computerized list, such individual shall be removed in accordance with the provisions of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg et seq.), including subsections (a) (4), (c) (2), (d), and (e) of section 8 of such Act (42 U.S.C. 1973 gg-6). (ii) For purposes of removing names of ineligible voters from the official list of eligible voters – (I) under section 8(a) (3) (B) of such Act (42 U.S.C. 1973gg-6(a) (3) (B)), the GEC shall coordinate the computerized list with DOC/SupCt records on felony status; and (II) by reason of the death of the registrant under section 8(a) (4) (A) of such Act (42 U.S. C. 1973gg-6(a) (4) (A)), the GEC shall coordinate the computerized list with DPHSS records on death. (iii) Notwithstanding the preceding provisions of this subparagraph, if a state is described in section 4(b) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-2(b)), that the GEC shall remove the names of ineligible voters from the computerized list in accordance with Guam law.	GEC Executive Director, Legal Counsel, and Board of Directors / Feb 28, 2004	29-1. GEC provides continuing list maintenance on the existing VRS database. A continuing list maintenance program will be developed for the anticipated CVRS database. Note: Review 42USC1973 to determine specific requirements. Note: Review 42USC1973 to determine specific requirements. Ensure CVRS link with DOC, Sup Ct, and PHSS (Vital Statistics). Note: Review 42USC1973 to determine specific requirements. Ensure ineligible voters are removed from the computerized list in accordance with Guam law.

A-13

Goal #30. Ensure that the list maintenance performed is conducted in a manner that ensures that -- (i) the name of each registered voter appears in the computerized list; (ii) only voters who are not registered or who are not eligible to vote are removed from the computerized list; and (iii) duplicate names are eliminated from the computerized list.	GEC Executive Director, Legal Counsel, and Board of Directors / Feb 28, 2004	30-1. GEC provides continuing list maintenance on the existing VRS database. A continuing list maintenance program will be developed for the anticipated CVRS database. Note: GEC ~~Exec Dir~~ shall ensure that the CVRS list maintenance program reflects the name of each registered voter, that only ineligible voters are removed from the CVRS listing of voters, and that duplicates are eliminated from the CVRS listing of eligible voters.
Goal #31. Ensure that the GEC Executive Director provides the adequate technological security measures to prevent the unauthorized access to the computerized list.	GEC Executive Director, Legal Counsel, and Board of Directors / Feb 28, 2004	31-1. ExecDir to determine acceptable security measures to prevent unauthorized access by 9/5 31-2. ExecDir to consult w/ Legal Counsel on security measures by 10/15/03. 31-3. Board approval by 11/30/03. 31-4. ExecDir to include CVRS security requirements in RFP by 12/31/03. 31-5. Select CVRS provider by 1/31/04. 31-6. Test CVRS security measures. 31-8. Run both VRS and CVRS in Election 2004, compare performance, and consider eliminating VRS for Election 2006.

A-14

Goal #32. Establish procedures to ensure that voter registration records in Guam are accurate and are updated regularly, including the following: (A) A system of file maintenance that makes a reasonable effort to remove registrants who are ineligible to vote from the official list of eligible voters. Under such system, consistent with the National Voter Registration Act of 1993 (42 U.S. C. 1973gg et seq.), registrants who have not responded to a notice and who have not voted in 2 consecutive general elections for federal office shall be removed from the official list of eligible voters, except that no registrant may be removed solely by reason of a failure to vote. (B) Safeguards to ensure that eligible voters are not removed in error from the official list of eligible voters.	GEC Executive Director, Legal Counsel, and Board of Directors / Feb 28, 2004	32-1. GEC provides continuing list maintenance on the existing VRS database. A continuing list maintenance program will be developed for the anticipated CVRS database to ensure that the voter registration records in Guam are accurate ~~and are~~ updated regularly. Note: GEC Exec Dir shall ensure CVRS list is purged of nonvoters for 2 consecutive general elections. RFP on CVRS will require "Year Last Voted." Note: GEC Exec Dir shall provide independent review of purged records to ensure voters are not removed erroneously.
Goal #33. Establish procedures to ensure that an application for voter registration for an election for federal office is not accepted or processed by a state unless the application includes – (I) in the case of an applicant who has been issued a current and valid driver's license, the applicant's driver's license number; or (II) in the case of any other applicant (other than an applicant to whom clause (ii) applies), the last 4 digits of the applicant's social security number.	GEC Executive Director, Legal Counsel, and Board of Directors / Feb 28, 2004	33-1. GEC Exec Dir shall provide independent review of new Affidavit of Voter Registrations prior to acceptance or processing. Further, the GEC Exec Dir will ensure verification of voter registration information; amend voter registration process to implement HAVA; and develop GEC board policy to amend voter registration procedure to require DLN's, and/or last 4 digits of SN#.
Goal #34. Establish procedures for an applicant who has not been issued a current and valid driver's license or a social security number, to be assigned a number that will serve to identify the applicant for voter registration purposes. To the extent that Guam has a computerized list in effect and the list assigns unique identifying numbers to registrants, the number assigned shall be the unique identifying number assigned under the list.	GEC Executive Director, Legal Counsel, and Board of Directors / Feb 28, 2004	34-1. GEC currently provides each new voter with a Voter Registration Number, a unique identifier generated by the UOG Computer Center. GEC will seek to utilize the VRN as a unique numerical number to identify all new voter applicants.

A-15

Goal #35. Establish procedures to determine whether the information provided by an individual is sufficient to meet the requirements of HAVA, in accordance with Guam law.	GEC Executive Director, Legal Counsel, and Board of Directors / Feb 28, 2004	35-1. GEC currently reviews all voter information against Guam law. The GEC Exec Dir will include a review process of all new voter information against HAVA and other applicable Federal statutes, in addition to Guam law. Note: GEC Exec Dir will develop a GEC board policy to establish identification criteria for voter registration.
Goal #36. Ensure that the GEC Executive Director and the official responsible for the state motor vehicle authority enter into an agreement to match information in the database of the island-wide voter registration system with information in the database of the motor vehicle authority to the extent required to enable each such official to verify the accuracy of the information provided on applications for voter registration.	GEC Executive Director, Legal Counsel, and Board of Directors / Feb 28, 2004	36-1. ExecDir to review CVRS intra-agency verification requirements by 9/30/03. 36-2. GEC Exec Dir will develop agreements with DMV, DOC, Sup Ct, PHSS, and other GovGuam agencies by 10/31/03. 36-3. Legal Counsel and GEC board review by 11/30/03. 36-4. Sign agency MOU's by 12/31/03. 36-5. Select CVRS provider by 1/31/04. 36-6. Begin intra-agency data verification by 2/28/04.
Goal #37. Ensure that the official responsible for the Guam motor vehicle authority shall enter into an agreement with the Commissioner of Social Security under section 205(r) (8) of the Social Security Act (as added by subparagraph (C)).	GEC Executive Director, Legal Counsel, and Board of Directors / Feb 28, 2004	37-1. GEC Exec Dir will coordinate DMV agreement with Social Security Administration by 12/31/03.
Goal #38. Establish policy and procedures to ensure that, notwithstanding section 6(c) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4(c)) and subject to paragraph (3), Guam shall, in a uniform and nondiscriminatory manner, require an individual to meet the above requirements if –	GEC Executive Director, Legal Counsel, and Board of Directors / Feb 28, 2004	38-1. GEC Exec Dir to revise existing mail-in voter registration procedure to meet HAVA requirements by 12/31/03. Further, to review 42USC1973, and ensure compliance w/ HAVA.

A-16

(A) the individual registered to vote in a jurisdiction by mail; and (B) (i) the individual has not previously voted in an election for federal office in Guam; or (ii) the individual has not previously voted in such an election in the jurisdiction and the jurisdiction is located in a state that does not have a computerized list that complies with the requirements of subsection (a).		Note: GEC Exec Dir to amend mail-in registration forms accordingly.
Goal #39. Establish policy and procedures to reflect that an individual meets the above requirements if the individual: (i) in the case of an individual who votes in person – (I) presents to the appropriate Guam election official a current and valid photo identification; or (II) presents to the appropriate Guam election official a copy of a current utility bill, bank statement, government check, pay check or other government document that shows the name and address of the voter; (ii) in the case of an individual who votes by mail, submits with the ballot – (I) a copy of a current and valid photo identification; or (II) a copy of a current utility bill, bank statement, government check, pay check, or other government document that shows the name and address of the voter.	GEC Executive Director, Legal Counsel, and Board of Directors / Feb 28, 2004	39-1. GEC Exec Dir to revise existing in-person and mail-in voter registration procedures to meet HAVA requirements by 12/31/03.
Goal #40. Ensure Fail-Safe voting should an individual votes as follows: (i) IN PERSON – An individual who desires to vote in person, but who does not meet the requirements of subparagraph (A)(i) may cast such a ballot by mail and the ballot shall be counted as a provisional ballot in accordance with section 302(a).	GEC Executive Director, Legal Counsel, and Board of Directors / Feb 28, 2004	40-1. GEC Exec Dir to establish a HAVA Fail-Safe voting process by 12/31/03. Further, to integrate the Fail-Safe voting process with the Provisional Voting Program for both in-person and mail-in registrants who fail to meet documentary proof of eligibility to vote.

A-17

(ii) BY MAIL – An individual who desires to vote by mail but who does not meet the requirements of subparagraph (A)(ii) may cast such a ballot by mail and the ballot shall be counted as a provisional ballot in accordance with section 302(a).		
Goal #41. Include in the voting procedures provisions that show that the above requirements shall not apply in the case of a person – (A) who registers to vote by mail under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) and submits as part of such registration either -- (i) a copy of a current and valid photo identification; or (ii) a copy of a current utility bill, bank statement, government check, pay check, or government document that shows the name and address of the voter; (B) (i) who registers to vote by mail under section 6 of the National Voter Registration Act of 1993 (42 U.S. C. 1973gg-4) and submits with such registration either – (I) -- a driver's license number; or (II) at least the last 4 digits of the individual's social security number; and (ii) with respect to whom an election official matches the information submitted with an existing Guam or state identification record bearing the same number, name and date of birth as provided in such registration; or (C) who is – (i) entitled to vote by absentee ballot under the Uniformed and Overseas Citizens Absentee Voting Act (42 U.S.C. 1973ff-1 et seq.);	GEC Executive Director, Legal Counsel, and Board of Directors / Feb 28, 2004	41-1. GEC Exec Dir to amend existing voting procedures by 12/31/03 to show that the Fail-Safe voting process does not apply to an in-person or mail-in registrants who meet the documentary requirements of Federal and Guam laws.

A-18

(ii) provided the right to vote otherwise than in person under section 3(b)(2)(B)(ii) of the Voting Accessibility for the elderly and Handicapped Act (42 U.S.C. 1973ee-1(b)(2)(B)(ii): or (iii) entitled to vote otherwise than in person under any other federal law.		(Cont.) 41-1. GEC Exec Dir to amend existing voting procedures by 12/31/03 to show that the Fail-Safe voting process does not apply to an in-person or mail-in registrants who meet the documentary requirements of Federal and Guam laws.
Goal #42. Ensure that the mail voter registration form developed under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) shall include the following: (i) The question 'Are you a citizen of the United States of America?' and boxes for the applicant to check to indicate whether the applicant is or is not a citizen of the United States. (ii) The statement 'If you checked 'no' in response to either of those questions, do not complete this form.' (iii) A statement informing the individual that if the form is submitted by mail and the individual is registering for the first time, the appropriate information required under this section must be submitted with the mail-in registration form in order to avoid the additional identification requirements upon voting for the first time.	GEC Executive Director, Legal Counsel, and Board of Directors / Feb 28, 2004	42-1. GEC Exec Dir to amend existing voting registration form by 12/31/03 to reflect the three questions required by HAVA. Further, to review 42USC1973 and amend the mail-in voter registration form accordingly.
Goal #43. Ensure that if an applicant for voter registration fails to answer the question included on the mail voter registration form pursuant to subparagraph (A)(i), the registrar shall notify the applicant of the failure and provide the applicant with an opportunity to complete the form in a timely manner to allow for the completion of the registration form prior to the next election for federal office (subject to Guam law).	'GEC Executive Director, Legal Counsel, and Board of Directors / Feb 28, 2004	43-1. GEC Exec Dir to amend existing mail-in voting registration form by 12/31/03. Further, to require the GEC to notify the applicant who fails to answer the question included on the mail voter registration form to notify the applicant of the failure and provide the applicant with an opportunity to complete the form in a timely manner. This should allow for the completion of the registration form prior to the next election for federal office (subject to Guam law).

A-19

Performance Goals and Completion Timeline for
Section 402. Establishment of State-Based Administrative Complaint Procedures to Remedy Grievances

Performance Goal	Responsible Official and Est. Date of Completion	Completion Timetable
Goal #44. Establish the GEC island-wide administrative complaint procedure to remedy grievances.	GEC Executive Director, Legal Counsel, and Board of Directors / Dec 31, 2003	44-1. ExecDir to draft Bill to establish an island-wide administrative complaint procedure to remedy election grievances by 9/30/03. 44-2. Legal Counsel review by 10/15/03. 44-3. Board / Gov review by 10/31/03. 44-4. ExecDir to fwd to Legislature by 11/30/03 44-5. ExecDir to draft election grievance procedure for GEC board by 10/31/03. 44-6. Legal Counsel review by 11/15/03. 44-7. Board review by 11/30/03. 44-8. ExecDir to implement GEC Election Grievance Policy and Procedures by 12/31/03. 44-9.ExecDir to include GEC Election Grievance Policy and Procedures in Precinct Official's Handbook and other election guidelines by 5/31/04.

A-20

Goal #45. Ensure that the administrative complaint procedures meet the following requirements: (A) The procedures shall be uniform and nondiscriminatory. (B) Under the procedures, any person who believes that there is a violation of any provision of title III (including a violation, which has occurred, is occurring, or is about to occur) may file a complaint. (C) Any complaint filed under the procedures shall be in writing and notarized, and signed and sworn by the person filing the complaint. (D) The GEC may consolidate complaints. (E) At the request of the complainant, there shall be a hearing on the record. (F) If, under the procedures, the GEC determines that there is a violation of any provision of title III, the GEC shall provide the appropriate remedy. (G) If, the GEC determines that there is no violation, the GEC shall dismiss the complaint and publish the results of the procedures. (H) The GEC shall make a final determination with respect to a complaint prior to the expiration of the 90-day period, which begins on the date the complaint is filed, unless the complainant consents to a longer period for making such a determination. (I) If the GEC fails to meet the deadline, the complaint shall be resolved within 60 days under alternative dispute resolution procedures. The record and other materials from any proceedings conducted under the complaint procedures established under this section shall be made available for use under the alternative dispute resolution procedures.	GEC Executive Director, Legal Counsel, and Board of Directors / Dec 31, 2003	45-1. ExecDir to implement GEC Election Grievance Policy and Procedures by 12/31/03. 45-2. ExecDir to include GEC Election Grievance Policy and Procedures in Precinct Official's Handbook and other election guidelines by 5/31/04. Note: GEC Exec Dir to ensure that the GEC Election Grievance Policy and Procedures are uniform and nondiscriminatory. Note: GEC Exec Dir shall define grievance criteria and filing requirements pursuant to HAVA; ensure that all grievances are in writing, signed and sworn by the person filing the complaint; and provide the GEC board criteria for consolidation of complaints. Note: GEC Exec Dir shall develop the GEC board procedure for hearings, and an appropriate definition of "record." Note: GEC Exec Dir shall develop a GEC board policy on appropriate remedy. Note: GEC Exec Dir shall develop a GEC board policy on dismissal of complaints. Note: GEC Exec Dir shall develop GEC board policy on a 90-day resolution process for all complaints. Note: GEC Exec Dir shall develop a GEC board policy on an alternative dispute resolution procedure.

A-21

APPENDIX B

Performance Goals, Completion Timelines, and Performance Measurement Criteria For Section 301. Voting Systems Standards Requirements

Performance Goals, Completion Timelines, and Performance Measurement Criteria for Section 301. Voting Systems Standards Requirements

Performance Goal	Completion Timetable	Performance Measurement Criteria
Goal #1. Amend 3GCA to implement the HAVA Section 301 requirements for acceptable voting systems standards.	1-1. ExecDir to draft Bill by 9/30/03. 1-2. Legal Counsel review by 10/15/03. 1-3. Board / Gov review by 10/31/03. 1-4. ExecDir to fwd to Legislature by 11/30/03.	By 12/31/03, 3GCA is amended to implement HAVA Section 301 requirements for acceptable voting system standards.
Goal #2. Develop GEC board policy to require the DRE voting system to meet HAVA standards.	2-1. ExecDir to draft board policy by 10/31/03. 2-2. Legal Counsel review by 11/15/03. 2-3. Board review by 11/30/03. 2-4. ExecDir to include policy requirements on RFP for DRE voting system by 11/30/03.	By 12/31/03, a GEC board policy is established to require the DRE voting system to meet HAVA standards.
Goal #3. Ensure that the DRE voting system permits the voter to verify (in a private and independent manner) the votes selected by the voter on the ballot before the ballot is cast and counted.	3-1. ExecDir to develop preliminary voter verification proposal by 9/30/03. 3-2. ExecDir to consult w/ CEDDERS & GSAT by 10/15/03. 3-3. Board approval by 11/30/03. 3-4. ExecDir to include verification requirement in RFP for DRE voting system by 12/31/03. 3-5. GEC/CEDDERS/GSAT review bids by 3/31/04 to validate voter verification process. 3-6. Select DRE provider by 6/30/04.	Starting with Election 2004, the Precinct Inspector will certify that the DRE voting system permitted the voter to verify (in a private and independent manner) the votes selected before the ballot is cast and counted.
Goal #4. Ensure that the DRE voting system provides the voter with the opportunity (in a private and independent manner) to change the ballot or correct any error before the ballot is cast and counted (including the opportunity to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error).	4-1. ExecDir to develop provisions for the voter to correct errors / replace ballot by 9/30/03. 4-2. ExecDir to consult w/ CEDDERS & GSAT by 10/15/03. 4-3. Board approval by 11/30/03. 4-4. ExecDir to include voter correction / replacement provisions in RFP for DRE voting system by 12/31/03. 4-5. GEC/CEDDERS/GSAT review bids by 3/31/04 to validate voter correction / ballot replacement process. 4-6. Select DRE provider by 6/30/04.	Starting with Election 2004, the Precinct Inspector will certify that the DRE voting system provided the voter with the opportunity (in a private and independent manner) to change the ballot or correct any error before the ballot is cast and counted (including the opportunity to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error).
Goal #5. Ensure that if the voter selects votes for more than one candidate for a single office – (i) notify the voter that the voter has selected more than one candidate for a single office on the ballot; (ii) notify the voter before the ballot is cast and counted of the effect of casting multiple votes for the office; and (iii) provide the voter with the opportunity to correct the ballot before the ballot is cast and counted.	5-1. ExecDir to develop provisions to preclude the voter from overvoting by 9/30/03. 5-2. ExecDir to consult w/ CEDDERS & GSAT by 10/15/03. 5-3. Board approval by 11/30/03. 5-4. ExecDir to include specific provisions precluding overvotes in the RFP for DRE voting system by 12/31/03. 5-5. GEC/CEDDERS/GSAT review bids by 3/31/04 to validate preclusion of overvotes in responses. 5-6. Select DRE provider by 6/30/04.	Starting with Election 2004, the Precinct Inspector will certify that if the voter selected votes for more than one candidate for a single office – (i) the voter was notified that the voter has selected more than one candidate for a single office on the ballot; (ii) the voter was notified, before the ballot was cast and counted, of the effect of casting multiple votes for the office; and (iii) the voter was provided with the opportunity to correct the ballot before the ballot was cast and counted.

B-1

B-2

Goal #6. For Election 2004, continue to use the current optical-scan ballot tabulation system, in addition to the introductory use of a DRE voting system.	6-1. ExecDir to propose revisions to the current election process to include introduction of DRE voting systems by 12/31/03. 6-2. Board approval by 1/31/04. 6-3. ExecDir to introduce the DRE voting system in all election publications by 6/30/03.	Starting with Election 2004, the GEC Executive Director will certify the continued use of the current optical-scan ballot tabulation system, in addition to the introductory use of a DRE voting system.
Goal #7. Revise the GEC voter education program specific to that voting system that notifies each voter of the effect of casting multiple votes for an office.	7-1. ExecDir to recommend revisions to the voter education program to notify voter of the effect of overvotes by 12/31/03. 7-2. Board approval by 1/31/04. 7-3. ExecDir to include the effect of overvotes in all voter education programs by 6/30/04.	Starting with Election 2004, the GEC Executive Director will certify the revision of the GEC voter education program specific to that voting system that notifies each voter of the effect of casting multiple votes for an office.
Goal #8. Provide the voter with instructions on how to correct the ballot before it is cast and counted (including instructions on how to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error).	8-1. ExecDir to recommend revisions to the Voter Information Pamphlet and other election publications on how to correct the ballot before it is cast and counted by 12/31/03. 8-2. Board approval by 1/31/04. 8-3. ExecDir to include ballot correction and replacement instructions in all election training programs by 6/30/04	Starting with Election 2004, the Precinct Inspector will certify that voters were provided with instructions on how to correct the ballot before it is cast and counted. This certification will describe the instructions given to voters on how to correct the error through the issuance of a replacement ballot if the voter was unable to change the ballot or correct any error.

B-3

Goal #9. Implement GEC audit capacity for HAVA funds.	9-1. ExecDir to consult with Guam Public Auditor on appropriate audit procedures by 8/31/03; Include audit capacity in draft Legis. Bill to implement HAVA by 8/8/03. 9-2. Legal Counsel review of audit procedures and Legis. bill by 8/15/03. 9-3. Board review of audit procedures and Legis. bill by 8/22/03; Gov. review of Legis. bill by 8/31/03. 9-4. ExecDir to fwd Legis. bill to Legislature by 11/30/03.	By 12/31/03, the GEC will have developed a GEC audit program for HAVA funds, and will have designated an internal auditor. The GEC Executive Director will certify the ~~development~~ and implementation of a GEC audit capacity for HAVA funds.
Goal #10. Ensure that the DRE voting system produces a permanent paper record with a manual audit capacity.	10-1. ExecDir to review DRE manual audit capacity requirements by 9/30/03. 10-2. ExecDir to consult w/ Legal Counsel on manual audit requirements by 10/15/03. 10-3. Board approval by 11/30/03. 10-4. ExecDir to include manual audit requirements in RFP for DRE voting system by 12/31/03. 10-5. GEC/Legal Counsel review bids by 3/31/04 to validate manual audit capacity. 10-6. Select DRE provider by 6/30/04.	Starting with Election 2004, the Precinct Inspector will certify that the DRE voting system produced a permanent paper record with a manual audit capacity.
Goal #11. Ensure that the DRE voting system provides the voter with an opportunity to change the ballot or correct any error before the permanent paper record is produced.	11-1. ExecDir to review DRE capacity to correct errors/ replace ballot by 9//30/03. 11-2. ExecDir to consult w/ Legal Counsel on ballot change / replacement requirements by 11/15/03. 11-3. Board approval by 11/30/03. 11-4. ExecDir to include ballot change / replacement requirements in RFP for DRE voting system by 12/31/03. 11-5. GEC/Legal Counsel review bids by 3/31/04 to validate ballot change / replacement capacity. 11-6. Select DRE provider by 6/30/04.	Starting with Election 2004, the Precinct Inspector will certify that the DRE voting system provided the voter with an opportunity to change the ballot or correct any error before the permanent paper record was produced.

B-4

Goal #12. Ensure that the paper record is available as an official record for any recount conducted with respect to any election in which the DRE voting system is used.	12-1. ExecDir to review DRE paper record capacity requirements by 9/30/03. 12-2. ExecDir to consult w/ Legal Counsel on DRE paper record requirements by 10/15/03. 12-3. Board approval by 11/30/03. 12-4. ExecDir to include paper record requirements in RFP by 12/31/03. 12-5. GEC/Legal Counsel review bids by 3/31/04 to validate paper record capacity. 12-6. Select DRE provider by 6/30/04.	Starting with Election 2004, the GEC Executive Director will certify that the paper record is available as an official record for any recount conducted with respect to any election in which the DRE voting system is used.
Goal #13. Ensure that the DRE voting system is accessible for individuals with disabilities.	13-1. ExecDir w/ GSAT will determine DRE accessibility requirement for all individuals w/ disabilities and at all prospective poll facilities by 9/5. 13-2. ExecDir to consult w/ Legal Counsel on DRE accessibility requirements by 10/15/03. 13-3. Board approval by 11/30/03. 13-4. ExecDir to include handicap accessibility requirements in RFP for DRE voting system by 12/31/03. 13-5. GEC/Legal Counsel review bids by 3/31/04 to validate handicap accessibility. 13-6. Select DRE provider by 6/30/04.	Starting with Election 2004, the Precinct Inspector and/or Homebound Election Official will certify that the DRE voting system was accessible for individuals with disabilities.
Goal #14. Ensure voting accessibility for individuals with disabilities, including nonvisual accessibility for the blind and visually impaired, in a manner that provides the same opportunity for access and participation (including privacy and independence) as for other voters.	14-1. ExecDir w/ GSAT will determine DRE voter privacy and independence requirements for all individuals w/ disabilities and at all prospective poll facilities by 9/5 14-2. ExecDir to consult w/ Legal Counsel on DRE voter privacy and independence requirements by 10/15/03. 14-3. Board approval by 11/30/03.	Starting with Election 2004, the Precinct Official and/or Homebound Election Official will certify voting accessibility for individuals with disabilities. The certification will include nonvisual accessibility for the blind and visually impaired in a manner that provided the same opportunity for access and participation (including privacy and independence) as for other voters.

B-5

	14-4. ExecDir to include DRE voter privacy and independence requirements in RFP for DRE voting system by 12/31/03. 14-5. GEC/Legal Counsel review bids by 3/31/04 to validate DRE voter privacy and independence provisions. 14-6. Select DRE provider by 6/30/04.	
Goal #15. Satisfy the accessibility requirement by locating at least one direct recording electronic voting system or other voting system equipped for individuals with disabilities at each polling place.	15-1. ExecDir will assess HAVA funds availability for purchase of at least one DRE unit for each polling place by 12/31/03. 15-2. 15-3. Board approval by 1/31/04. 15-4. ExecDir to procure DRE's by 7/31/2004.	Starting with Election 2004, the Precinct Inspector will certify that at least one direct recording electronic voting system or other voting system equipped for individuals with disabilities was available at each polling place.
Goal #16. Utilize HAVA title II funds to purchase DRE units for polling places, and meet the HAVA standards for disability access.	16-1. ExecDir will assess HAVA funds availability for purchase of DRE units and ensure HAVA disability access standards are met by 12/31/03. 16-2. 15-3. Board approval by 1/31/04. 16-4. ExecDir to procure DRE's by 7/31/2004.	The GEC Executive Director will certify that HAVA title II funds were used to purchase DRE units for polling places. Additionally, that the DRE units meet the HAVA standards for disability access.
Goal #17. Ensure that the DRE voting system provides alternative language accessibility pursuant to HAVA requirements.	17-1. ExecDir w/ GSAT will determine DRE alternative language capacity by 9/5 17-2. ExecDir to consult w/ Legal Counsel on DRE alternative language capacity by 10/15/03. 17-3. Board approval by 11/30/03. 17-4. ExecDir to include DRE alternative language requirements in RFP for DRE voting system by 12/31/03. 17-5. GEC/Legal Counsel review bids by 3/31/04 to validate DRE alternative language capacity provisions. 17-6. Select DRE provider by 6/30/04.	Starting with Election 2004, the Precinct Inspector will certify that the DRE voting system provided alternative language accessibility pursuant to HAVA requirements.

B-6

Goal #18. Ensure that the DRE voting system error rate in counting ballots (determined by taking into account only those errors which are attributable to the voting system and not attributable to an act of the voter) is in compliance with the error rate standards established by the Federal Election Commission.	18-1. ExecDir to determine acceptable FEC error rate by 9/5 18-2. ExecDir to consult w/ Legal Counsel on FEC/DRE error rate by 10/15/03. 18-3. Board approval by 11/30/03. 18-4. ExecDir to include DRE error rate requirements in RFP for DRE voting system by 12/31/03. 18-5. GEC/Legal Counsel review bids by 3/31/04 to validate DRE error rate. 18-6. Select DRE provider by 6/30/04	By 6/30/04, the successful DRE provider will certify that the DRE voting system error rate in counting ballots (determined by taking into account only those errors which are attributable to the voting system and not attributable to an act of the voter) is in compliance with the error rate standards established by the Federal Election Commission.
Goal #19. Adopt a uniform and nondiscriminatory standard to define what constitutes a vote, and what will be counted as a vote for each category of voting system used.	19-1. ExecDir to draft uniform vote definition in Legis. bill form by 9/30/03. 19-2. Legal Counsel review by 10/15/03. 19-3. Board / Gov review by 10/31/03. 19-4. ExecDir to fwd to Legislature by 11/30/03.	By 12/31/03, 3GCA is amended to define what constitutes a vote, and what will be counted as a vote for each category of voting system used.

B-7

Performance Goals, Completion Timelines, and Performance Measurement Criteria for Section 302. Provisional Voting And Voting Information Requirements

Performance Goal	Completion Timetable	Performance Measurement Criteria
Goal #20. Amend 3GCA to implement HAVA Section 302 requirement for provisional voting and voting information requirements.	20-1. ExecDir to draft Bill by 9/30/03. 20-2. Legal Counsel review by 10/15/03. 20-3. Board / Gov review by 10/31/03. 20-4. ExecDir to fwd to Legislature by 11/30/03	By 12/31/03, 3GCA is amended to implement the HAVA Section 302 requirement for provisional voting and voting information requirements.
Goal #21. Develop GEC board policy and amend current election procedures to allow for an individual who declares that such individual is a registered voter in the jurisdiction in which the individual desires to vote and that the individual is eligible to vote in an election for federal office, but the name of the individual does not appear on the official list of eligible voters for the polling place or an election official asserts that the individual is not eligible to vote, such individual shall be permitted to cast a provisional ballot.	21-1. ExecDir to draft board policy by 10/31/03. 21-2. Legal Counsel review by 11/15/03. 21-3. Board review by 11/30/03. 21-4. ExecDir to implement GEC provisional voting policy and procedures by 11/30/03. 21-5.ExecDir to include provisional voting guidelines in Precinct Official's Handbook and other election guidelines by 5/31/04.	By 12/31/03, a GEC board policy is established and the current election procedures are amended to allow for an individual who declares that such individual is a registered voter in the jurisdiction in which the individual desires to vote and that the individual is eligible to vote in an election for federal office, but the name of the individual does not appear on the official list of eligible voters for the polling place or an election official asserts that the individual is not eligible to vote, such individual shall be permitted to cast a provisional ballot.
Goal #22. Provide for an election official at the polling place to notify the individual that the individual may cast a provisional ballot in that election.	22-1. ExecDir to revise Precinct Official's Handbook by 5/31/04 to designate Precinct Inspector as provisional ballot official. 22-2. Include provisional ballot voting in precinct official seminar. 22-3. Develop and print provisional ballot information pamphlet by 7/31/04 for Election 2004.	Starting with Election 2004, the Precinct Inspector will certify that notification was provided to the individual that the individual may cast a provisional ballot.

B-8

Goal #23. Ensure that the individual shall be permitted to cast a provisional ballot at that polling place upon the execution of a written affirmation by the individual before an election official at the polling place stating that the individual is – (A) a registered voter in the jurisdiction in which the individual desires to vote; and (B) eligible to vote in that election.	23-1. ExecDir to revise Precinct Official's Handbook by 5/31/04 to permit an individual to cast a provisional ballot official based on a written affirmation. 23-2. Include written affirmation requirement for provisional ballot voting in precinct official seminar. 23-3. Develop and print appropriate written affirmation form to vote by provisional ballot by 7/31/04 for Election 2004.	Starting with Election 2004, the Precinct Inspector will certify that the individual was permitted to cast a provisional ballot at that polling place upon the execution of a written affirmation by the individual before an election official at the polling place stating that the individual is: (A) a registered voter in the jurisdiction in which the individual desires to vote; and (B) eligible to vote in that election.
Goal #24. Ensure that an election official at the polling place transmits the ballot cast by the individual or the voter information contained in the written affirmation executed by the individual to an appropriate election official for prompt verification.	24-1. ExecDir to revise Precinct Official's Handbook by 5/31/04 to require all provisional ballots to transmit voter information to Election Central for verification. 24-2. Include timely transmittal of voter information requirement in precinct official seminar. 24-3. Ensure that a communications network is established, e.g., telephone, fax, internet, etc., at all polling sites for the transmittal of voter information by 7/31/04 for Election 2004.	Starting with Election 2004, the Precinct Inspector will certify that an election official at the polling place transmitted the ballot cast by the individual or the voter information contained in the written affirmation executed by the individual, to an appropriate election official (Election Central) for prompt verification.

B-9

Goal #25. Establish procedures so that if the election official to whom the ballot or voter information is transmitted determined that the individual is eligible to vote, the individual's provisional ballot shall be counted as a vote in that election.	25-1. ExecDir to revise Precinct Official's Handbook and GEC election procedures by 5/31/04 to allow GEC board to determine eligibility to vote, and whether or not the provisional ballot shall be counted. 25-2. Include above procedures in precinct official seminar. 25-3. Ensure that a communications network is established, e.g., telephone, fax, internet, etc., at all polling sites for the return transmittal of GEC board determination on voter eligibility and whether or not the provisional ballot will be counted by 7/31/04 for Election 2004.	Starting with Election 2004, the Precinct Inspector will certify that procedures are established so that if the election official (Election Central) to whom the ballot or voter information is transmitted determined that the individual is eligible to vote, the individual's provisional ballot shall be counted as a vote in that election.
Goal #26. Ensure that at the time that an individual casts a provisional ballot the appropriate election official shall give the individual written information that states that any individual who casts a provisional ballot will be able to ascertain whether the vote was counted and, if the vote was not counted, the reason that the vote was not counted.	26-1. ExecDir to revise Precinct Official's Handbook and GEC election procedures by 5/31/04 to allow for a written determination on the right to vote a provisional ballot, and if the the provisional ballot was counted. 26-2. Include above written determination procedures in precinct official seminar. 26-3. Ensure that a written determination forms are available for Election 2004.	Beginning with Election 2004, the Precinct Inspector will certify that at the time that an individual casts a provisional ballot the Precinct Inspector gave the individual written information that states that the individual who casts a provisional ballot was able to ascertain whether the vote was counted and, if the vote was not counted, the reason that the vote was not counted.
Goal #27. Ensure that the appropriate election official establishes a free access system (such as a toll-free telephone number or an internet website) that any individual who casts a provisional ballot may access to discover whether the vote of that individual was counted, and, if the vote was not counted, the reason that the vote was not counted.	27-1. ExecDir to revise Precinct Official's Handbook and GEC election procedures by 5/31/04 to provide for a free access system. 27-2. Include above procedures in precinct official seminar. 27-3. Ensure that a free access communications system is established, e.g., telephone, fax, internet, etc., at all polling sites for provisional vote verification by 7/31/04 for Election 2004.	Starting with Election 2004, the Precinct Inspector will certify that a free access system (such as a toll-free telephone number or an internet website) was established so that any individual who casts a provisional ballot has access to discover whether the vote of that individual was counted, and, if the vote was not counted, the reason that the vote was not counted.

B-10

Performance Goals, Completion Timelines, and Performance Measurement Criteria for Section 303. Computerized Statewide Voter Registration List Requirements and Requirements for Voters Who Vote by Mail

Performance Goal	Completion Timetable	Performance Measurement Criteria
Goal #28. Ensure that the Guam Election Commission implements, in a uniform and nondiscriminatory manner, a single, uniform, official, centralized, interactive computerized island-wide voter registration list defined, maintained, and administered at the GEC level that contains the name and registration information of every legally registered voter in Guam and assigns a unique identifier to each legally registered voter in Guam (in this subsection referred to as the computerized list), and includes the following: (i) The computerized list shall serve as the single system for storing and managing the official list of registered voters throughout Guam. (ii) The computerized list contains the name and registration information of every legally registered voter in Guam. (iii) Under the computerized list, a unique identifier is assigned to each legally registered voter in Guam. (iv) The computerized list shall be coordinated with other agency databases within Guam. (v) Any election official in Guam, including any precinct official, may obtain immediate electronic access to the information contained in the computerized list.	28-1. ExecDir to review HAVA CVRS requirements by 9/30/03. 28-2. Meet w/ UOG VRS database managers and determine CVRS interface requirements by 10/31/03. 28-3. Legal Counsel and GEC board review by 11/30/03. 28-4. ExecDir to include CVRS requirements in RFP by 12/31/03. 28-5. Select CVRS provider by 1/31/04. 28-6. Begin data transfer from VRS to CVRS by 2/28/04. 28-7. Test CVRS database and report generation capabilities. 28-8. Run both VRS and CVRS in Election 2004, compare performance, and consider eliminating VRS for Election 2006. Note: Continue current VRS Voter Registration No. as unique identifier. Note: Coordinate with DMV, DOC, PHSS, SSN#, Sup. Ct., etc. Note: Develop access capacity at all polling places and mayor's offices.	By 12/31/03, the GEC Executive Director will certify that the Guam Election Commission has implemented, in a uniform and nondiscriminatory manner, a single, uniform, official, centralized, interactive computerized island-wide voter registration list defined, maintained, and administered at the GEC level that contains the name and registration information of every legally registered voter in Guam and assigns a unique identifier to each legally registered voter in Guam (in this subsection referred to as the computerized list), and includes the following: (i) The computerized list shall serve as the single system for storing and managing the official list of registered voters throughout Guam; (ii) The computerized list contains the name and registration information of every legally registered voter in Guam; (iii) Under the computerized list, a unique identifier is assigned to each legally registered voter in Guam; (iv) The computerized list shall be coordinated with other agency databases within Guam; (v) Any election official in Guam, including any precinct official, may obtain immediate electronic access to the information contained in the computerized list; (vi) All voter registration information obtained by any election official in Guam shall be electronically entered into the
(vi) All voter registration information obtained by any election official in Guam shall be electronically entered into the computerized list on an expedited basis at the time the information is provided to the official. (vii) The GEC Executive Director shall provide such support as may be required so that local election officials are able to enter information as described above. (viii) The computerized list shall serve as the official voter registration list for the conduct of all elections for federal office in Guam.	Note: Ensure on-line capacity. Note: Ensure election officials are certified in the data entry process, and all data entry equipment are in working order. Note: Ensure designation is made in statute and GEC board policy.	computerized list on an expedited basis at the time the information is provided to the official; (vii) The GEC Executive Director shall provide such support as may be required so that local election officials are able to enter information as described above; and (viii) The computerized list shall serve as the official voter registration list for the conduct of all elections for federal office in Guam.
Goal #29. Ensure that the appropriate election official shall perform list maintenance with respect to the computerized list on a regular basis as follows: (i) If an individual is to be removed from the computerized list, such individual shall be removed in accordance with the provisions of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg et seq.), including subsections (a) (4), (c) (2), (d), and (e) of section 8 of such Act (42 U.S.C. 1973 gg-6). (ii) For purposes of removing names of ineligible voters from the official list of eligible voters – (I) under section 8(a) (3) (B) of such Act (42 U.S.C. 1973gg-6(a) (3) (B)), the GEC shall coordinate the computerized list with DOC/SupCt records on felony status; and (II) by reason of the death of the registrant under section 8(a) (4) (A) of such Act (42 U.S. C. 1973gg-6(a) (4) (A)), the GEC shall coordinate the computerized list with DPHSS records on death. (iii) Notwithstanding the preceding provisions of this subparagraph, if a state is described in section 4(b) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-2(b)), that the GEC shall remove the names of ineligible voters from the computerized list in accordance with Guam law.	29-1. GEC provides continuing list maintenance on the existing VRS database. A continuing list maintenance program will be developed for the anticipated CVRS database. Note: Review 42USC1973 to determine specific requirements. Note: Review 42USC1973 to determine specific requirements. Ensure CVRS link with DOC, Sup Ct, and PHSS (Vital Statistics). Note: Review 42USC1973 to determine specific requirements. Ensure ineligible voters are removed from the computerized list in accordance with Guam law	By 12/31/03, the GEC Executive Director will certify that the Guam Election Commission performs list maintenance with respect to the computerized list on a regular basis as follows: (i) If an individual is to be removed from the computerized list, such individual shall be removed in accordance with the provisions of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg et seq.), including subsections (a) (4), (c) (2), (d), and (e) of section 8 of such Act (42 U.S.C. 1973 gg-6); (ii) For purposes of removing names of ineligible voters from the official list of eligible voters – (I) under section 8(a) (3) (B) of such Act (42 U.S.C. 1973gg-6(a) (3) (B)), the GEC shall coordinate the computerized list with DOC/SupCt records on felony status; and (II) by reason of the death of the registrant under section 8(a) (4) (A) of such Act (42 U.S. C. 1973gg-6(a) (4) (A)), the GEC shall coordinate the computerized list with DPHSS records on death; (iii) Notwithstanding the preceding provisions of this subparagraph, if a state is described in section 4(b) of the National Voter Registration Act of 1993 (42

B-11

B-12

		U.S.C. 1973gg-2(b)), that the GEC shall remove the names of ineligible voters from the computerized list in accordance with Guam law.
Goal #30. Ensure that the list maintenance performed is conducted in a manner that ensures that -- (i) the name of each registered voter appears in the computerized list; (ii) only voters who are not registered or who are not eligible to vote are removed from the computerized list; and (iii) duplicate names are eliminated from the computerized list.	30-1. GEC provides continuing list maintenance on the existing VRS database. A continuing list maintenance program will be developed for the anticipated CVRS database. Note: GEC Exec Dir shall ensure that the CVRS list maintenance program reflects the name of each registered voter, that only ineligible voters are removed from the CVRS listing of voters, and that duplicates are eliminated from the CVRS listing of eligible voters.	By 12/31/03, the GEC Executive Director will certify that the list maintenance performed is conducted in a manner that ensures that – (i) the name of each registered voter appears in the computerized list; (ii) only voters who are not registered or who are not eligible to vote are removed from the computerized list; and (iii) duplicate names are eliminated from the computerized list.
Goal #31. Ensure that the GEC Executive Director provides the adequate technological security measures to prevent the unauthorized access to the computerized list.	31-1. ExecDir to determine acceptable security measures to prevent unauthorized access by 9/5 31-2. ExecDir to consult w/ Legal Counsel on security measures by 10/15/03. 31-3. Board approval by 11/30/03. 31-4. ExecDir to include CVRS security requirements in RFP by 12/31/03. 31-5. Select CVRS provider by 1/31/04. 31-6. Test CVRS security measures. 31-7. Run both VRS and CVRS in Election 2004, compare performance, and consider eliminating VRS for Election 2006.	The GEC Executive Director and the CVRS provider will certify that the CVRS provides the adequate technological security measures to prevent the unauthorized access to the computerized list.

B-13

Goal #32. Establish procedures to ensure that voter registration records in Guam are accurate and are updated regularly, including the following: (A) A system of file maintenance that makes a reasonable effort to remove registrants who are ineligible to vote from the official list of eligible voters. Under such system, consistent with the National Voter Registration Act of 1993 (42 U.S. C. 1973gg et seq.), registrants who have not responded to a notice and who have not voted in 2 consecutive general elections for federal office shall be removed from the official list of eligible voters, except that no registrant may be removed solely by reason of a failure to vote. (B) Safeguards to ensure that eligible voters are not removed in error from the official list of eligible voters.	32-1. GEC provides continuing list maintenance on the existing VRS database. A continuing list maintenance program will be developed for the anticipated CVRS database to ensure that the voter registration records in Guam are accurate and are updated regularly. Note: GEC Exec Dir shall ensure CVRS list is purged of nonvoters for 2 consecutive general elections. RFP on CVRS will require "Year Last Voted." Note: GEC Exec Dir shall provide independent review of purged records to ensure voters are not removed erroneously.	By 12/31/03, the GEC Executive Director will certify the establishment of procedures to ensure that voter registration records in Guam are accurate and are updated regularly, including the following: (A) A system of file maintenance that makes a reasonable effort to remove registrants who are ineligible to vote from the official list of eligible voters. Under such system, consistent with the National Voter Registration Act of 1993 (42 U.S. C. 1973gg et seq.), registrants who have not responded to a notice and who have not voted in 2 consecutive general elections for federal office shall be removed from the official list of eligible voters, except that no registrant may be removed solely by reason of a failure to vote; and (B) Safeguards to ensure that eligible voters are not removed in error from the official list of eligible voters.
Goal #33. Establish procedures to ensure that an application for voter registration for an election for federal office is not accepted or processed by a state unless the application includes – (I) in the case of an applicant who has been issued a current and valid driver's license, the applicant's driver's license number; or (II) in the case of any other applicant (other than an applicant to whom clause (ii) applies), the last 4 digits of the applicant's social security number.	33-1. GEC Exec Dir shall provide independent review of new Affidavit of Voter Registrations prior to acceptance or processing. Further, the GEC Exec Dir will ensure verification of voter registration information; amend voter registration process to implement HAVA; and develop GEC board policy to amend voter registration procedure to require DLN's, and/or last 4 digits of SN#.	By 12/31/03, the GEC Executive Director will certify the establishment of procedures to ensure that an application for voter registration for an election for federal office is not accepted or processed by a state unless the application includes – (I) in the case of an applicant who has been issued a current and valid driver's license, the applicant's driver's license number; or (II) in the case of any other applicant (other than an applicant to whom clause (ii) applies), the last 4 digits of the applicant's social security number.

B-14

Goal #34. Establish procedures for an applicant who has not been issued a current and valid driver's license or a social security number, to be assigned a number that will serve to identify the applicant for voter registration purposes. To the extent that Guam has a computerized list in effect and the list assigns unique identifying numbers to registrants, the number assigned shall be the unique identifying number assigned under the list.	34-1. GEC currently provides each new voter with a Voter Registration Number, a unique identifier generated by the UOG Computer Center. GEC will seek to utilize the VRN as a unique numerical number to identify all new voter applicants.	By 12/31/03, the GEC Executive Director will certify the establishment of procedures for an applicant who has not been issued a current and valid driver's license or a social security number, to be assigned a number that will serve to identify the applicant for voter registration purposes. To the extent that Guam has a computerized list in effect and the list assigns unique identifying numbers to registrants, the number assigned shall be the unique identifying number assigned under the list.
Goal #35. Establish procedures to determine whether the information provided by an individual is sufficient to meet the requirements of HAVA, in accordance with Guam law.	35-1. GEC currently reviews all voter information against Guam law. The GEC Exec Dir will include a review process of all new voter information against HAVA and other applicable Federal statutes, in addition to Guam law. Note: GEC Exec Dir will develop a GEC board policy to establish identification criteria for voter registration.	By 12/31/03, the GEC Executive Director will certify the establishment of procedures to determine whether the information provided by an individual is sufficient to meet the requirements of HAVA, in accordance with Guam law.
Goal #36. Ensure that the GEC Executive Director and the official responsible for the state motor vehicle authority enter into an agreement to match information in the database of the island-wide voter registration system with information in the database of the motor vehicle authority to the extent required to enable each such official to verify the accuracy of the information provided on applications for voter registration.	36-1. ExecDir to review CVRS intra-agency verification requirements by 9/30/03. 36-2. GEC Exec Dir will develop agreements with DMV, DOC, Sup Ct, PHSS, and other GovGuam agencies by 10/31/03. 36-3. Legal Counsel and GEC board review by 11/30/03. 36-4. Sign agency MOU's by 12/31/03. 36-5. Select CVRS provider by 1/31/04. 36-6. Begin intra-agency data verification by 2/28/04.	By 12/31/03, the GEC Executive Director and the Director of the Department of Revenue and Taxation will sign an agreement or memorandum of understanding to match information in the database of the island-wide voter registration system with information in the database of the division of motor vehicles to the extent required to enable the GEC to verify the accuracy of the information provided on applications for voter registration.

B-15

Goal #37. Ensure that the official responsible for the Guam motor vehicle authority shall enter into an agreement with the Commissioner of Social Security under section 205(r) (8) of the Social Security Act (as added by subparagraph (C)).	37-1. GEC Exec Dir will coordinate DMV agreement with Social Security Administration by 12/31/03.	By 12/31/03, the GEC Executive Director will certify that the Director of the Department of Revenue and Taxation has entered into an agreement with the Commissioner of Social Security to allow the verification of the last 4 digits of the voter's social security number provided on applications for voter registration.
Goal #38. Establish policy and procedures to ensure that, notwithstanding section 6(c) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4(c)) and subject to paragraph (3), Guam shall, in a uniform and nondiscriminatory manner, require an individual to meet the above requirements if – (A) the individual registered to vote in a jurisdiction by mail; and (B) (i) the individual has not previously voted in an election for federal office in Guam; or (ii) the individual has not previously voted in such an election in the jurisdiction and the jurisdiction is located in a state that does not have a computerized list that complies with the requirements of subsection (a).	38-1. GEC Exec Dir to revise existing mail-in voter registration procedure to meet HAVA requirements by 12/31/03. Further, to review 42USC1973, and ensure compliance w/ HAVA. Note: GEC Exec Dir to amend mail-in registration forms accordingly.	By 12/31/03, the GEC Executive Director will certify the establishment of appropriate policies and procedures to ensure that an individual is required, in a uniform and nondiscriminatory manner, to meet the above requirements if (A) the individual registered to vote in Guam by mail; and (B) (i) the individual has not previously voted in an election for federal office in Guam.
Goal #39. Establish policy and procedures to reflect that an individual meets the above requirements if the individual: (i) in the case of an individual who votes in person – (I) presents to the appropriate Guam election official a current and valid photo identification; or (II) presents to the appropriate Guam election official a copy of a current utility bill, bank statement, government check, pay check or other government document that shows the name and address of the voter;	39-1. GEC Exec Dir to revise existing in-person and mail-in voter registration procedures to meet HAVA requirements by 12/31/03.	By 12/31/03, the GEC Executive Director will certify the establishment of policies and procedures to reflect that an individual meets the above requirements if the individual (i) in the case of an individual who votes in person – (I) presents to the appropriate Guam election official a current and valid photo identification; or (II) presents to the appropriate Guam election official a copy of a

B-16

(ii) in the case of an individual who votes by mail, submits with the ballot – (I) a copy of a current and valid photo identification; or (II) a copy of a current utility bill, bank statement, government check, pay check, or other government document that shows the name and address of the voter.		current utility bill, bank statement, government check, pay check or other government document that shows the name and address of the voter; (ii) in the case of an individual who votes by mail, submits with the ballot – (I) a copy of a current and valid photo identification; or (II) a copy of a current utility bill, bank statement, government check, pay check, or other government document that shows the name and address of the voter.
Goal #40. Ensure Fail-Safe voting should an individual votes as follows: (i) IN PERSON – An individual who desires to vote in person, but who does not meet the requirements of subparagraph (A)(i) may cast such a ballot by mail and the ballot shall be counted as a provisional ballot in accordance with section 302(a). (ii) BY MAIL – An individual who desires to vote by mail but who does not meet the requirements of subparagraph (A)(ii) may cast such a ballot by mail and the ballot shall be counted as a provisional ballot in accordance with section 302(a).	40-1. GEC Exec Dir to establish a HAVA Fail-Safe voting process by 12/31/03. Further, to integrate the Fail-Safe voting process with the Provisional Voting Program for both in-person and mail-in registrants who fail to meet documentary proof of eligibility to vote.	By 12/31/03, the GEC Executive Director will certify the establishment of a Fail-Safe voting procedure to allow (i) an individual who desires to vote in person, but who does not meet the requirements of subparagraph (A)(i) may cast such a ballot by mail and the ballot shall be counted as a provisional ballot in accordance with section 302(a); or (ii) an individual who desires to vote by mail but who does not meet the requirements of subparagraph (A)(ii) may cast such a ballot by mail and the ballot shall be counted as a provisional ballot in accordance with section 302(a).
Goal #41. Include in the voting procedures provisions that show that the above requirements shall not apply in the case of a person – (A) who registers to vote by mail under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) and submits as part of such registration either – (i) a copy of a current and valid photo identification; or	41-1. GEC Exec Dir to amend existing voting procedures by 12/31/03 to show that the Fail-Safe voting process does not apply to an in-person or mail-in registrants who meet the documentary requirements of Federal and Guam laws.	By 12/31/03, the GEC Executive Director will certify the establishment of voting procedures to include in the voting procedures provisions that show that the above requirements shall not apply in the case of a person who registers to vote by mail under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) and submits as part of such registration either a copy of a current and valid photo identification; or a copy of a

B-17

(ii) a copy of a current utility bill, bank statement, government check, pay check, or government document that shows the name and address of the voter; (B) (i) who registers to vote by mail under section 6 of the National Voter Registration Act of 1993 (42 U.S. C. 1973gg-4) and submits with such registration either – (I) -- a driver's license number; or (II) at least the last 4 digits of the individual's social security number; and (ii) with respect to whom an election official matches the information submitted with an existing Guam or state identification record bearing the same number, name and date of birth as provided in such registration; or (C) who is – (i) entitled to vote by absentee ballot under the Uniformed and Overseas Citizens Absentee Voting Act (42 U.S.C. 1973ff-1 et seq.); (ii) provided the right to vote otherwise than in person under section 3(b)(2)(B)(ii) of the Voting Accessibility for the elderly and Handicapped Act (42 U.S.C. 1973ee-1(b)(2)(B)(ii); or (iii) entitled to vote otherwise than in person under any other federal law.	(Cont.) 41-1. GEC Exec Dir to amend existing voting procedures by 12/31/03 to show that the Fail-Safe voting process does not apply to an in-person or mail-in registrants who meet the documentary requirements of Federal and Guam laws.	current utility bill, bank statement, government check, pay check, or government document that shows the name and address of the voter. Further, that the voting procedures include provisions that show that the same requirements shall not apply to a person who registers to vote by mail under section 6 of the National Voter Registration Act of 1993 (42 U.S. C. 1973gg-4) and submits with such registration either a driver's license number; or (II) at least the last 4 digits of the individual's social security number; and with respect to whom an election official matches the information submitted with an existing Guam or state identification record bearing the same number, name and date of birth as provided in such registration. Still further, that the same requirements shall not apply to a person who is (i) entitled to vote by absentee ballot under the Uniformed and Overseas Citizens Absentee Voting Act (42 U.S.C. 1973ff-1 et seq.); (ii) provided the right to vote otherwise than in person under section 3(b)(2)(B)(ii) of the Voting Accessibility for the elderly and Handicapped Act (42 U.S.C. 1973ee-1(b)(2)(B)(ii); or (iii) entitled to vote otherwise than in person under any other federal law.
Goal #42. Ensure that the mail voter registration form developed under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) shall include the following: (i) The question 'Are you a citizen of the United States of America?' and boxes for the applicant to check to indicate whether the applicant is or is not a citizen of the United States.	42-1. GEC Exec Dir to amend existing voting registration form by 12/31/03 to reflect the three questions required by HAVA. Further, to review 42USC1973 and amend the mail-in voter registration form accordingly.	By 12/31/03, the GEC Executive Director will certify that the mail voter registration form developed under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) includes (i) the question 'Are you a citizen of the United States of America?' and boxes for the applicant to check to indicate

B-18

(ii) The statement 'If you checked 'no' in response to either of those questions, do not complete this form.' (iii) A statement informing the individual that if the form is submitted by mail and the individual is registering for the first time, the appropriate information required under this section must be submitted with the mail-in registration form in order to avoid the additional identification requirements upon voting for the first time.		whether the applicant is or is not a citizen of the United States; (ii) the statement 'If you checked 'no' in response to either of those questions, do not complete this form'; and (iii) a statement informing the individual that if the form is submitted by mail and the individual is registering for the first time, the appropriate information required under this section must be submitted with the mail-in registration form in order to avoid the additional identification requirements upon voting for the first time.
Goal #43. Ensure that if an applicant for voter registration fails to answer the question included on the mail voter registration form pursuant to subparagraph (A)(i), the registrar shall notify the applicant of the failure and provide the applicant with an opportunity to complete the form in a timely manner to allow for the completion of the registration form prior to the next election for federal office (subject to Guam law).	43-1. GEC Exec Dir to amend existing mail-in voting registration form by 12/31/03. Further, to require the GEC to notify the applicant who fails to answer the question included on the mail voter registration form to notify the applicant of the failure and provide the applicant with an opportunity to complete the form in a timely manner. This should allow for the completion of the registration form prior to the next election for federal office (subject to Guam law).	By 12/31/03, the GEC Executive Director will certify that the GEC's voter registration procedures include procedures to ensure that if an applicant for voter registration fails to answer the question included on the mail voter registration form pursuant to subparagraph (A)(i), the GEC registrar shall notify the applicant of the failure and provide the applicant with an opportunity to complete the form in a timely manner to allow for the completion of the registration form prior to the next election for federal office (subject to Guam law).

B-19

Performance Goals, Completion Timelines, and Performance Measurement Criteria for Section 402. Establishment of State-Based Administrative Complaint Procedures to Remedy Grievances

Performance Goal	Completion Timetable	Performance Measurement Criteria
Goal #44. Establish the GEC island-wide administrative complaint procedure to remedy grievances.	44-1. ExecDir to draft Bill to establish an island-wide administrative complaint procedure to remedy election grievances by 9/30/03. 44-2. Legal Counsel review by 10/15/03. 44-3. Board / Gov review by 10/31/03. 44-4. ExecDir to fwd to Legislature by 11/30/03 44-5. ExecDir to draft election grievance procedure for GEC board by 10/31/03. 44-6. Legal Counsel review by 11/15/03. 44-7. Board review by 11/30/03. 44-8. ExecDir to implement GEC Election Grievance Policy and Procedures by 12/31/03. 44-9.ExecDir to include GEC Election Grievance Policy and Procedures in Precinct Official's Handbook and other election guidelines by 5/31/04.	By 12/31/03, the GEC Executive Director will certify the establish of a GEC island-wide administrative complaint procedure to remedy grievances.

B-20

Goal #45. Ensure that the administrative complaint procedures meet the following requirements: (A) The procedures shall be uniform and nondiscriminatory. (B) Under the procedures, any person who believes that there is a violation of any provision of title III (including a violation, which has occurred, is occurring, or is about to occur) may file a complaint. (C) Any complaint filed under the procedures shall be in writing and notarized, and signed and sworn by the person filing the complaint. (D) The GEC may consolidate complaints. (E) At the request of the complainant, there shall be a hearing on the record. (F) If, under the procedures, the GEC determines that there is a violation of any provision of title III, the GEC shall provide the appropriate remedy. (G) If, the GEC determines that there is no violation, the GEC shall dismiss the complaint and publish the results of the procedures. (H) The GEC shall make a final determination with respect to a complaint prior to the expiration of the 90-day period, which begins on the date the complaint is filed, unless the complainant consents to a longer period for making such a determination. (I) If the GEC fails to meet the deadline, the complaint shall be resolved within 60 days under alternative dispute resolution procedures. The record and other materials from any proceedings conducted under the complaint procedures established under this section shall be made available for use under the alternative dispute resolution procedures.	45-1. ExecDir to implement GEC Election Grievance Policy and Procedures by 12/31/03. 45-2. ExecDir to include GEC Election Grievance Policy and Procedures in Precinct Official's Handbook and other election guidelines by 5/31/04. Note: GEC Exec Dir to ensure that the GEC Election Grievance Policy and Procedures are uniform and nondiscriminatory. Note: GEC Exec Dir shall define grievance criteria and filing requirements pursuant to HAVA; ensure that all grievances are in writing, signed and sworn by the person filing the complaint; and provide the GEC board criteria for consolidation of complaints. Note: GEC Exec Dir shall develop the GEC board procedure for hearings, and an appropriate definition of "record." Note: GEC Exec Dir shall develop a GEC board policy on appropriate remedy. Note: GEC Exec Dir shall develop a GEC board policy on dismissal of complaints. Note: GEC Exec Dir shall develop GEC board policy on a 90-day resolution process for all complaints. Note: GEC Exec Dir shall develop a GEC board policy on an alternative dispute resolution procedure.	By 12/31/03, the GEC Executive Director will certify that the GEC administrative complaint procedures meet the following requirements: (A) the procedures are uniform and nondiscriminatory; ~~under the~~ procedures, any person who believes that there is a violation of any provision of title III (including a violation, which has occurred, is occurring, or is about to occur) may file a complaint; (C) any complaint filed under the procedures shall be in writing and notarized, and signed and sworn by the person filing the complaint; (D) the GEC may consolidate complaints; (E) at the request of the complainant, there shall be a hearing on the record; (F) if, under the procedures, the GEC determines that there is a violation of any provision of title III, the GEC shall provide the appropriate remedy; (G) if the GEC determines that there is no violation, the GEC shall dismiss the complaint and publish the results of the procedures; (H) the GEC shall make a final determination with respect to a complaint prior to the expiration of the 90-day period, which begins on the date the complaint is filed, unless the complainant consents to a longer period for making such a determination; (I) if the GEC fails to meet the deadline, the complaint shall be resolved within 60 days under alternative dispute resolution procedures. Further, that the record and other materials from any proceedings conducted under the complaint procedures established under this section shall be made available for use under the alternative dispute resolution procedures.

STATE OF HAWAII

State Plan

As required by Public Law 107-252,
Help America Vote Act 2002, Section 253 (b)

Dwayne D. Yoshina
Chief Election Officer
802 Lehua Avenue
Honolulu, Hawaii 96782

March 2, 2004

INTRODUCTION BY THE CHIEF ELECTION OFFICER

We are pleased to offer the Hawaii Preliminary State Plan. Section 253(b) of the Help America Vote Act of 2002 (HAVA) requires each State to develop a long-range plan for implementing this Act. HAVA also requires the State and the various counties to work together to significantly reform the election process.

On behalf of Hawaii's elections community, we are proud to say that we began election reform before the enactment of HAVA. With the appropriate federal financial funding, the State of Hawaii will have the opportunity to build upon our strong foundation of election reform and accomplishments.

The Preliminary State Plan establishes a framework for continuing progress in election reform, the continuing improvement of our election services, and achieving compliance with HAVA.

Although HAVA increases responsibility for election administrations at the State level in order to establish consistency across jurisdictions, the county clerks in the State of Hawaii (responsible for voter registration and absentee voting) are integrally involved in the administration of all regularly scheduled elections. It is with this in mind, that the Office of Elections continues to work closely with the various county clerks and their communities to assure that our election services are uniform and nondiscriminatory.

We will update and refine the State Plan to reflect election reform progress and needs which may arise from the citizenry. We welcome the challenges of HAVA and the financial support from the federal government in our continuing efforts to provide secure, accessible, and convenient election services to all citizens statewide.

Dwayne D. Yoshina
Chief Election Officer

I. INTRODUCTION

President Bush signed the Help America Vote Act (HAVA) into law on October 29, 2002. HAVA requires each State to develop a comprehensive plan for implementing mandates aimed at improving the conduct of elections.

Each plan must address the following:

- Provide for ADA voters the opportunity to vote independently through the use of at least one (1) Direct Recording Electronic (DRE) voting system in each polling place.
- Implement a system of provisional voting.
- Provide a complaints process where voters are entitled to a public hearing after filing a valid notarized complaint.
- Establish a statewide voter registration system.
- Establish a toll free number for voters to call to receive pertinent voting information.

The following State Plan for the State of Hawaii, was developed in accordance with Section 254 of HAVA and under the direction of the Chief Election Officer. Hawaii's plan establishes a framework for the State to continue progress that has already been made in election reform and to achieve compliance with HAVA.

Because HAVA will have a profound impact on all aspects of the voting process in our State, we anticipate that this plan will require updating and refining over the upcoming years to address changes and developing requirements.

II. BACKDROP FOR HAWAII'S STATE PLAN

The mission of the Office of Elections is to provide secure, accessible, and convenient election services to all citizens statewide through:

- Conducting efficient and honest elections;
- Protecting voter's rights (the franchise);
- Encouraging participation in the electoral process; and
- Promoting elections.

Pursuant to Hawaii Revised Statutes, the Chief Election Officer is responsible for the supervision of all state elections. The State of Hawaii has had and continues to have a statewide, uniform, and standardized election system, something HAVA mandates each State to have. All services are provided in a uniform and nondiscriminatory manner.

The State of Hawaii uses an optical scan voting and vote counting system, statewide. This includes the use of precinct counters in every polling place as well as at the absentee walk sites (early voting sites). The processing and tabulation of the absentee mail ballots are accomplished using central counters in four county counting centers. The consolidation and distribution of election results are carried out at the county counting center for county results and state central counting center for statewide results.

A. Overview

The State of Hawaii consists of an archipelago of islands stretching approximately 2,000 miles. There are four (4) counties within the State: the City & County of Honolulu, the County of Hawaii, the County of Maui, and the County of Kauai. The population within each county (based on the *2001 State of Hawaii Data Book* Table 1.06) is as follows:

County	Population
City & County of Honolulu	881,295
County of Hawaii	152,083
County of Maui	131,797
County of Kauai	59,223

The County of Maui includes the County of Kalawao (Kalaupapa Settlement). The County of Kalawao had 144 inhabitants in 1980, 130 in 1990, and 74 in 2002.

B. Election Contests

The following election contests are concurrently held state (including federal election contests) and county elections. These elections are held in even numbered years.

Federal Contests:

U.S. President (1 seat)
U.S. Vice President (1 seat)
U.S. Senators (2 seats)
U.S. Representatives (2 seats)

State Contests:

Governor (1 seat)
Lieutenant Governor (1 seat)
State Senators (25 seats)
State Representatives (51 seats)
Board of Education members (13 seats)*
Office of Hawaiian Affairs Trustees (9 seats)*

City and County of Honolulu Contests:

Mayor (1 seat)*
Prosecuting Attorney (1 seat)*
Councilmembers (9 seats)*

County of Hawaii Contests:

Mayor (1 seat)*
Prosecuting Attorney (1 seat)*
Councilmembers (9 seats)*

County of Maui Contests:

Mayor (1 seat)*
Councilmembers (9 seats)*

County of Kauai Contests:

Mayor (1 seat)*
Prosecuting Attorney (1 seat)*
Councilmembers (7 seats)*

*** Nonpartisan Contests**

Ballot measures (questions) include amendments to the State Constitution, amendments to the City and County Charters, the City and County initiative questions, and the City and County referendum questions.

C. Voter Registration

Voter Registration by county from 1992 to 2002 were (numbers based on General Elections):

	1992	1994	1996	1998	2000[1]	2002
Honolulu	328,463	349,457	386,546	423,875	444,945	470,327
Hawaii	62,023	63,677	71,270	77,726	84,421	89,478
Maui	47,238	48,036	57,091	66,740	73,331	79,045
Kauai	26,771	27,719	30,009	33,063	34,652	37,392
Statewide	464,495	488,889	544,916	601,404	637,349	676,242

D. Voter Turnout

Voter turnout numbers by county from 1992 to 2002 were (numbers based on General Elections):

TOTAL TURNOUT	1992	1994	1996	1998	2000	2002
Honolulu	272,081	269,121	261,781	291,114	257,795	270,071
Hawaii	52,529	48,907	50,464	53,658	51,368	50,368
Maui	38,408	36,589	36,169	43,382	39,665	41,554
Kauai	19,864	22,394	21,816	24,366	22,205	23,464
Statewide	382,882	377,011	370,230	412,520	371,033	385,457

PRECINCT TURNOUT	1992	1994	1996	1998	2000	2002
Honolulu	245,464	233,995	225,221	246,048	208,195	194,415
Hawaii	45,444	40,188	39,555	41,978	40,241	35,511
Maui	34,456	31,291	31,746	36,557	33,193	29,956
Kauai	16,979	17,694	17,176	17,592	16,334	15,526
Statewide	342,343	323,168	313,698	342,175	297,963	275,408

ABSENTEE TURNOUT	1992	1994	1996	1998	2000	2002
Honolulu	26,617	35,126	36,560	45,066	49,600	75,656
Hawaii	7,085	8,719	10,909	11,680	11,127	14,857
Maui	3,952	5,298	4,423	6,825	6,472	11,598
Kauai	2,885	4,700	4,640	6,774	5,871	7,938
Statewide	40,539	53,843	56,532	70,345	73,070	110,049

[1] Since the 2000 Election the State of Hawaii has included the National Voter Registration Act's (NVRA) section 8(d)(2) voters in its registration counts.

E. Precincts

In 2002, there were 351 precincts statewide. In 2004, there is estimated to be approximately 356 precincts statewide. The breakdown by county is as follows:

County	2002	2004
City & County of Honolulu	219	221
County of Hawaii	67	69
County of Maui	44	45
County of Kauai	21	21

The number of registered voters assigned to a precinct in 2002 ranged from 74 to 4,850.

F. Vote Counting

The State of Hawaii has had and continues to have a uniform, standard, and statewide election system, something HAVA mandates each State to have.

The State of Hawaii uses an optical scan voting and vote counting system, statewide. This includes the use of precinct counters in every polling place and at absentee walk sites (early voting sites) as well as the use of central counters at county counting centers to process absentee mail ballots.

Counting Centers are established in each of the four counties to process, tabulate, and disseminate election results on election nights in an accurate and timely manner, statewide.

G. Absentee Walk-In Voting Sites (Early Voting)

In 2002, there were 12 absentee walk-in voting (early voting) sites statewide.

County	AB Sites
City & County of Honolulu	4
County of Hawaii	5
County of Maui	2
County of Kauai	1

H. Precinct Officials

Statewide training of approximately 3,500 precinct officials begins in July and continues through November of an election year. The State, with the cooperation of county election staff, conducts all training sessions. Currently, approximately 100 separate training sessions are conducted within the five (5) month period.

Hawaii's State Plan as presented herein is limited to the extent state appropriations are made available and based on the assumption that adequate federal funding will be appropriated. The State intends to fully comply with HAVA, however, if adequate federal funding is not made available, the manner in which the funds are disbursed or dedicated may be altered from the information contained in this State Plan.

III. STATE PLAN REQUIRED ELEMENTS (HAVA §254)

From start to finish, Hawaii's election system is built around the standards of accuracy, transparency, professionalism, security, accountability, integrity, and replicability. These standards serve as the bases for the development and implementation of the state plan.

A. Title III Requirements and Other Activities

Section 254(a)(1) requires a description of how the State will use the requirements payment to meet the requirements of Title III, and if applicable under section 251(b)(2), to carry out other activities to improve the administration of elections. Title III requires the establishment of certain voting system standards, provisional voting, public posting of voting information, a computerized statewide voter registration list, and voter registration application modifications.

1. §301(a), Voting System Standards Requirements

Section 301(a) establishes several voting system standards which must be met by January 1, 2006. Under this section, no waiver of the requirements is permitted.

HAVA requires each voting system to:

- Permit voters to verify whom they have voted for and make changes to their vote in a private, secret, and independent manner;

- Notify voters if they have overvoted, what happens in instances of an overvote, and provide the opportunity to correct the ballot;
- Ensure that any notification to the voter maintains the privacy, secrecy, and independence of the voter's ballot;
- Produce a permanent paper record with manual audit capacity;
- Be accessible for people with disabilities through the use of at least one (1) Direct Recording Electronic (DRE) voting system placed at each polling place;
- Provide alternative language accessibility pursuant to Section 203 of the Voting Rights Act of 1965;
- Comply with error rates in effect by the Federal Elections Commission (FEC); and
- Have a definition of what constitutes a vote and what will be counted.

The State currently uses a single, uniform, statewide voting system in each of its counties. Presently, there are Election Systems & Software (ES&S) Model 100 precinct counters in every polling place as well as all early voting sites. In addition, the State uses the ES&S Model 550 central counter to process, count, and tabulate results from its absentee mail ballots.

Since the early 1970's the State has had uniform and standard procedures statewide. Pursuant to the Hawaii Revised Statutes the State is responsible for the operations of the polling places and counting centers. The State, and the various counties, collegially develops and implements these procedures statewide. These procedures address all operational areas of elections.

In 1998 the State migrated from DATAVOTE to an optical scan vote and vote counting system. The present system allows a voter to view and correct errors prior to casting a ballot. The system notifies a voter of overvotes, completely blank ballot, and multiparty votes (Hawaii conducts single party primary elections).

For the 2004 and all subsequent elections, the State plans to place at least one DRE machine in each polling place. The State intends to meet HAVA requirements, "so that any voter may have the

opportunity to vote independently." This DRE will meet the requirements of voting system accessibility, language accessibility, and confirmation of votes by voters, enunciated in HAVA. Each DRE shall be equipped with an audio feature to allow the visually impaired the opportunity to vote independently.

The State has scheduled demonstrations with DRE vendors to receive comments and concerns from people with disabilities. To this date Hart Intercivic and Election Systems & Software has demonstrated and the state has received comments, statewide, from people with disabilities.

Also, the State plans to install modems in each precinct counter to aid in the administration of elections. Installing modems in each precinct counter will allow the results to be electronically transmitted into each counting center, rather than being driven to the counting center by a delivery/collection team. It is anticipated that such actions should aid in the efficiency and security of our administration of elections.

Additionally, the State of Hawaii will conduct voter education to educate individuals on how to vote on the new voting system.

Requirements payment will also be used for maintaining, modifying, and improving the voting and vote counting system in the State of Hawaii to ensure compliance with HAVA Section 301(a) standards.

2. Provisional Voting and Voting Information Requirements

Section 302 requires the establishment of provisional voting and the posting of voting information at polling places by January 1, 2004. Under this section, no waiver is permitted.

HAVA identifies voters who may vote using a provisional ballot. They are as follows: 1) a voter who declares that he or she is a registered voter in the jurisdiction in which that person decided to vote and is eligible to vote in an election for Federal office, but whose name does not appear on the official list of eligible voters at the polling place; and a voter who the election official assert is not eligible to vote; a voter who registered by mail and is a first-time voter in the jurisdiction who appears at the polling place without proper identification; and 2) a voter who votes in an election for federal office pursuant to a federal or state court order or any other order extending the time established for closing the polls.

While, there is no state law that permits provisional voting, the State has, for many years, used Control Centers and Voter Assistance Officials (statewide) to ensure that registered voters who appear at the polling place but are not in the register of voters may resolve their voter registration problems. Voter Assistance Officials are provided telephones and assigned an operator at Control Center who searches the statewide voter registration database and related documents to determine if an individual is registered to vote. Any voter who is not found in the statewide voter registration system may at their discretion cast a "Challenged" ballot. Determination reached in this process may be appealed to a Board of Registration and ultimately the Hawaii Supreme Court.

The State of Hawaii will comply with the requirements of HAVA as outlined in Section 302. Voters will be notified by polling officials that they may vote a provisional ballot. Voters will complete a self-subscribing affidavit in which the individuals affirm under penalty of perjury that they are registered in the jurisdiction in which the individual desires to vote and is eligible to vote in that election.

Voters will be provided "free access", in the form of a toll free telephone number, to learn if their ballots have been counted. In addition, any voter whose ballot is not counted will be provided a reason for that action. All responses to provisional voters will be confidential.

In addition to provisional voting requirements, Section 302 of HAVA mandates that a sample ballot and other voting information be posted at the polling place on Election Day. The State, in consultation with the County Clerks, will design the materials to be posted. Requirements payment will be used to develop, print, and post this information.

3. Computerized Statewide Voter Registration List and Requirements for Voters Who Register by Mail

Section 303 requires the establishment of a computerized statewide voter registration list, first time voters who register by mail to provide identification when they cast their ballots, and changes to be made to the voter registration application by January 1, 2004. A waiver is permitted to extend compliance with Section 303(a) to January 1, 2006.

Presently, the guidelines for voter registration (process, context and parameters) are set forth in Hawaii Revised Statutes (HRS). All counties must comply with the state laws, given there are no county

ordinances governing this activity. Procedures and policies are set cooperatively and collegially between the state and the counties.

The State of Hawaii's existing voter registration system is a "single, uniform, centralized, interactive, and uniform computerized statewide voter register" as required by HAVA. The present system is integrated with the statewide driver license database and the City & County of Honolulu property records. If Hawaii's neighbor island (Maui, Hawaii, Kauai) property databases are reintegrated with the City & County of Honolulu's real property system, the possibility also exists for simultaneous integration with the voter registration system as well.

The existing system features instantaneous real time updates to the master voter registration file with crosschecking against all driver license and property records. The crosscheck feature has been in existence for over eighteen years. In a separate effort, Hawaii's statewide driver license database is also presently being enhanced to allow online checks against the Social Security Administration. The State of Hawaii seeks to improve upon the current voter registration system through either enhancements to the existing system or migrating to another voter registration system while maintaining existing functionality.

Currently, Hawaii's voter registration records (source documents) are maintained at the local jurisdiction level under the custody of the County Clerks. In a unique arrangement, the largest county (City & County of Honolulu) maintains the statewide voter registration system and also maintains the statewide drivers license database on behalf of the four counties and State. The State of Hawaii believes its existing system satisfies the requirements of HAVA and desires to continue this system administration arrangement while retaining the legal oversight of the statewide voter registration database. This arrangement optimizes database integration with these and other statewide systems. However, as a condition of federal funding, the State will continue to require online and electronic access to voter registration data generated by each of the counties for administering its combined Federal, State, and County Elections.

Hawaii's mail-in voter registration form also requires redesign to accommodate new information required by HAVA. The form will also be redesigned in anticipation that imaging and intelligent character recognition technology can be incorporated into the voter registration system to further enhance the administration of elections.

4. Minimum Requirements

The State understands that the requirements in HAVA Title III are minimum requirements and that the State may establish election technology and administration requirements that are more stringent. Any more stringent requirement that the State imposes will comply with all Title III requirements, as well as the laws described in HAVA Section 906.

5. Methods of Implementation Left to the Discretion of the State of Hawaii

The State chose various means to comply with the requirements of HAVA, Title III. Specific details on the implementation methodology chosen can be found in Section 1 through 3 of this State Plan.

6. Adoption of Voluntary Guidance by Commission

Once the federal Election Assistance Commission (EAC) has issued its voluntary recommendations with respect to Title III, the State will consider that guidance in updating the State Plan. The State will incorporate those recommendations deemed appropriate into subsequent versions of the State Plan.

7. Process for Adoption

The State will stay aware of the progress of the EAC on developing the Title III recommendations. If appropriate, the State will provide feedback during the public comment period after the recommendations are published in the Federal Register and participate in public hearings regarding the recommendations.

8. Other Activities to Improve the Administration of Elections (Section 251(b)(2))

a) Development of Staff

Staff at the Office of Elections does not readily have access to continuing professional education and contact with other election administrators on the mainland. The State of Hawaii would be well served by encouraging their professional development through continuing professional education.

Requirements payments will be used to support training and professional certification.

b) Section 261 Payments to States and Units of Local Government to Assure access for individuals with Disabilities

The Office of Elections with assistance from the Disability and Communications Access Board (DCAB), has applied for a grant pursuant to Section 261 of HAVA. The plan calls for the following:

- Ensure that all polling places are accessible.
- Provide statewide training to voters with full range of disabilities, utilizing trainers with disabilities, to embrace privacy and independence in the voting process.
- Develop and implement training curricula and educational materials for election officials, precinct officials, and election volunteers.
- Provide individuals with the full range of disabilities with information about the accessibility of the polling places.

It is proposed that requirements payments will be used to provide a project coordinator for program development, implementation, and statewide coordination of this project.

Requirements payments will also be used for equipment, materials, and supplies to assure accessibility to the polling place for individuals with disabilities.

B. Distribution of Requirements Payments & Eligibility for Distribution

Section 254(a)(2) of the act requires a description of how the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in Section 254(a)(1), including a description of:

(A) the criteria to be used to determine the eligibility of such units or entities for receiving payment; and

(B) the methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent

with the performance goals and measures adopted under Section 254(a)(8).

The Office of Elections will manage activities funded by requirements payments and will monitor the performance of each initiative funded. The Office will be accountable for all expenditures, funding levels, program controls, and outcomes.

The State will follow applicable Hawaii and procurement laws regarding the distribution of the federal requirements payments.

C. Voter Education, Election Official and Poll Worker Training

Section 254(a)(3) of the Act requires a description of how the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III.

The State of Hawaii has always believed that voter education is essential to the development and fostering of a healthy and robust democracy. However, over the past ten years the legislature has reduced the Office's voter education budget. The impacts of these reductions are beginning to manifest themselves in increases of voter registration questions that arise on election day. For example, more and more voters are showing up at the wrong polling place or not keeping their voter registration current. This leads to voter inconveniences, longer lines, and voter frustration at the polling places.

The Office of Elections intends to improve on its existing voter education program. Currently, the voter education program consists of passive information in the form of FACTSHEETS (hard copy and electronically on the website), brochures, public demonstrations/presentations, and public service announcements (PSA) provide to voters. The goal of the voter education program is to provide voters with the information they need to register to vote, vote with confidence, and cast a vote that accurately reflects their intentions. At minimum, a voter education program should include components that inform citizens:

- How to register to vote and confirm their registration status;
- Where and when to vote;
- How to cast a valid ballot; and
- Their rights as voters.

Traditionally, voter education referred to providing voters with substantive information about the candidates and the issues, in the form of flyers and brochures. Voters need this information, but they also need information on the process of registration and voting. Information given at the polls represents the very last step in an education process that begins with civic education in the schools.

First citizens need to know the mechanics of the process, starting with registration. Registration is a prerequisite to voting and voters have the responsibility of keeping their registration current. Voters also need to know that it is their responsibility to confirm their registration and what to do if they discover they are not properly registered. In turn, it is the responsibility of the election administrators to let voters know where and when to vote. This would be accomplished through an outreach program targeted at ethnic groups, political parties, organizations, and other groups identified as need outreach.

Voters must also understand their rights in the polling place. All voters minimally should know the following:

- Not to be intimidated or denied the right to vote, and how to proceed if their rights have been violated.
- How they are able to correct a mistake.
- That special assistance, ranging from translated voting instructions, instructions in alternative formats and a translator or assistant of their choice are available on request.
- An expectation that all votes will be counted in the same manner as other votes across the state.

The Office of Elections will embark on a more active outreach program, but still retain the FACTSHEETS and brochures. The Office of Elections will use the following groups to educate the voters:

- Civic and advocacy groups, community organizations, political parties, candidates, and the media; and
- State and county election officials.

Requirements payment will be used for the purposes of materials development and outreach activities.

D. Voting System Guidelines and Process

Section 254(a)(4) requires a description of how the State will adopt voting system guidelines and processes which are consistent with the requirements of section 301.

Section 301 requires each voting system to:

- Permit voters to verify whom they voted for and make changes to their vote in a private, secret, and independent matter;
- Notify voters if they have overvoted, what happens in instances of an overvote, and provide for the opportunity to correct the ballot;
- Ensure that any notification to the voter maintains the privacy, secrecy and independence of the voter's ballot;
- Produce a permanent paper record with manual audit capacity;
- Be accessible for people with disabilities through the use of at least one (1) DRE voting system placed at each polling place;
- Provide alternative language accessibility pursuant to Section 203 of the Voting Rights Act of 1965;
- Comply with error rates in effect by the FEC; and
- Have a definition of what constitutes a vote and what will be counted.

Although the Hawaii Revised Statutes does not require the State of Hawaii to certify its voting and vote counting systems, the state uses the Federal Elections Commission (FEC) guidelines as its system standards. Any voting and vote counting system must meet these standards as well as the Hawaii specific requirements in order to qualify for selection.

E. Hawaii's HAVA Fund Management

How the State will establish a fund described in subsection (b) for purposes of administering the State's activities under this part, including information on fund management. -- HAVA §254 (a) (5)

Working with the legislature, the State of Hawaii will establish a new program for election reform that is kept separate and distinct from all other programs within the agency. This program will contain both federal and general funds. The federal fund portion will be used to maintain federal fund receipts and to expend federal funds. The general fund portion will be

used to budget and expend general funds representing the 5% match required under HAVA.

The Office of Elections will work with the Department of Accounting and General Services and Department of Budget and Finance to follow and enforce all mandated fiscal controls and policies.

Unspent federal funds will be set aside in the state Election Fund for payment of long-term costs of complying with HAVA.

F. Hawaii's HAVA Budget

The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on— (A) the costs of the activities required to be carried out to meet the requirements of Title III; (B) the portion of the requirements payment which will be used to carry out activities to meet such requirements; and (C) *the portion of the requirements payment, which will be used to carry out other activities. -- HAVA §254 (a)(6)*

At the time of writing this plan, HAVA appropriations were significantly less than amounts authorized. The following table outlines the assumptions regarding federal funding that the State used in creating its budget for HAVA activities.

(See Attachment B)

G. Maintenance of Effort

How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000. -- HAVA §254 (a)(7)

Consistent with HAVA §254(a)(7), in using any requirements payment, Hawaii will maintain expenditures of the State for activities funded by the payment at a level equal to or greater than the level of such expenditures in State FY 2000 -- a total of $2,299,552.

H. HAVA Performance Goals and Measures

How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met. -- HAVA §254 (a)(8)

The State, in collaboration with various counties, will establish performance goals and will institute a process to measure progress toward the achievement of these goals. This process will provide the various counties with the structure and continued measurable targets for accomplishment.

As detailed in Section K of this document, the State will establish an Election Reform Program Management Office (PMO) to oversee continuous management of the State Plan. This PMO, in coordination with the State and various counties personnel, will be responsible for developing and monitoring a uniform performance evaluation process. In measuring progress, the PMO will continue to revisit original goals and objectives and make adjustments as appropriate.

I. State-Based Administrative Complaint Procedures

A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402. -- HAVA §254 (a)(9) Deadline for Compliance: Prior to certification of State Plan, but no later than January 1, 2004; no waiver permitted.

The State will develop and establish a State based administrative complaints program. The program will include provisions for alternative dispute resolution and appropriate remedy. Appropriate remedy must be in conformance with state elections law and will not include financial payments to complainants or civil penalties for election officials, even if it is determined that a violation of Title III has occurred. Remedies may include written findings that a violation of Title III has occurred, strategies for insuring that that the violation does not re-occur, and if it appears that the complaint is systemic, possible actions by the Office of Elections to eliminate or prevent future incidences.

Requirements funding will be used for the hearings requirement of this section.

J. Effect of Title I Payments

If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities. -- HAVA §254 (a)(10)

To date, the State of Hawaii has received $6,339,192.30 In Title I payments.

1. §101. Payments to States for activities to improve administration of elections.

Hawaii is eligible for approximately $5,000,000.00 under section 101. These funds will be used for activities to meet the following requirements:

- The State of Hawaii will establish a fund for the maintenance and repair of the voting and vote counting system.
- The State will also establish a fund to supplement the State's voter education efforts.
- Unspent federal funds will be set aside in the state Election Fund for payment of long-term costs of complying with HAVA.

2. §102. Replacement of punch card or lever voting machines.

Hawaii is eligible for approximately $1,339,192.30 under section 102, as calculated in the following chart. The State understands that there will be a pro rata reduction to the maximum payment

amount based on the total national participation under this section. State legislation makes local jurisdictions eligible to receive 50% of any federal funds "received for improvements in voting systems and equipment" under certain circumstances.

K. Hawaii's HAVA State Plan Management

How the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change—

(A) is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;

(B) is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and

(C) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A). -- HAVA §254 (a)(11)

Sound and responsible management of the State Plan will be an essential component of the State election community's future success.

Due to the complexity of HAVA and the potential variety of projects it encompasses, State of Hawaii will establish an Election Reform Program Management Officer (PMO). The Election Reform PMO will conduct ongoing management of the State Plan, including project planning (for all HAVA-related and other election reform projects) and establishing and implementing program management standards (i.e. performance measures, review and approval processes, issue/risk management, etc.). The PMO will also be responsible for other election functions, including: budget and fiscal, personnel, and office support functions. In addition to a PMO, there will be established a position of an accounts clerk to assist the PMO with HAVA accounting requirements.

L. Changes to State Plan from Previous Fiscal Year

In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year. -- HAVA §254 (a) (12)

This FY 2003 Plan is the State's inaugural plan under HAVA. This section will be updated in the FY 2004 Plan, reflecting changes to the Plan, as well as a summary of 2003 successes.

M. State Plan Development and Committee

A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the committee under such section 255 and section 256. -- HAVA §254 (a)(13)

The Plan development Committee consists of the Official Observers. On Election Day the Official Observers serve as the "eyes and ears" of the public to ensure the sanctity and integrity of the election process. The Official Observers have been an integral part of the election process for over 30 years. They represent the various political parties and various community organizations that have a interest in the integrity and fairness of the election process, i.e. Chamber Commerce of Hawaii, Alu Like, League of Women Voters, Common Cause, Hawaii State Bar Association, Hawaii State Teachers Association (HSTA), etc.

Additionally, this plan was drafted with input from the various County Clerks and their staff.

Phase I of the State Plan includes actions which will bring the state into compliance with Title III of HAVA.

Phase II of the State plan includes distribution of the preliminary state plan to the citizens of the State of Hawaii to receive input and feedback. The statements received will be used to develop program plans to address the following HAVA foci:

- Comply with federal election requirements under Title III of the act;
- Improve elections for federal offices;
- Develop a state plan for election improvements as provided in the act;
- Train election officials and poll workers;
- Improve the voting system;
- Increase voter participation;

Attachment A

Title 1 Matrix

Act Requirements					
SEC. 101. Payments to States for Election Administration improvements and replacement of punch card and lever voting machines					
	(a) IN GENERAL- No later than 45 days after the date of the enactment of this ACT, the Administrator of General Services Administration shall establish a program under the "Administrator" shall make payment to each State election official, notifies the Administrator not later than 6 months after the date of this Act that the State			**Refer to Hawaii Preliminary Plan**	
	(b) USE OF PAYMENT			**Refer to Hawaii Preliminary Plan**	
		(1) IN GENERAL- A State shall use the funds provided under this section to carry out 1 or more of the following activities:		**Refer to Hawaii Preliminary Plan**	
			(A) Complying with the requirements under Title III	**Refer to Hawaii Preliminary Plan**	
			(B) Improving the administration of elections for Federal office	**Refer to Hawaii Preliminary Plan**	
			(C) Educating voters concerning voting procedures, voting rights, and voting technology.	**Refer to Hawaii Preliminary Plan**	
			(D) Training election officials, poll workers and election volunteers.	**Refer to Hawaii Preliminary Plan**	
			(E) Develop the State plan for requirements payments to be submitted under part 1 of subtitle D of title II.	**Refer to Hawaii Preliminary Plan**	
			(F) Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.	**Refer to Hawaii Preliminary Plan**	
			(G) Improving the accessibility and quality of polling places, including providing physical access for individuals with disabilities, provide nonvisual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language	**Refer to Hawaii Preliminary Plan**	
			(H) Establishing toll-free telephone hot-lines that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.	**Refer to Hawaii Preliminary Plan**	

State of Hawaii
Office of Elections
State Plan

- Improve accessibility of polling places, including providing access for peoples with disabilities; and
- Improve voter fraud investigation.

Phase II is purposely left open ended to address changes and oversight in phase I compliance activities. Phase II also provides a mechanism to update the state plan and meet new needs.

The Office of Elections is committed to including all citizens in the voting process. To this end, all programs and services provided by this office will be accessible to individuals with disabilities. All advertisements for toll-free numbers, training and printed materials will include a contact number or statement that auxiliary aids and services will be provided for equal access. In addition, our web site will be designed in compliance with Section 508 of the Rehabilitation Act of 1973, as amended, so that information is available and accessible for everyone.

(2) LIMITATIONS - A State may not use the funds provided under a payment made under this section-			Refer to Hawaii Preliminary Plan	
	(A) to pay costs associated with any litigation, except to the extent that such costs otherwise constitute permitted uses of a payment under this section; or		Refer to Hawaii Preliminary Plan	
	(B) for the payment of any judgment.		Refer to Hawaii Preliminary Plan	
	(C) Use of Funds to be Consistent with Other Laws and Requirements.- In order to receive a payment under this section, the State shall provide the Administrator with certifications that-		Refer to Hawaii Preliminary Plan	
		(i) the State will use the funds provided under the payment in a manner that is consistent with each of the laws described in section 906, as such laws relate to the provisions of this Act; and	Refer to Hawaii Preliminary Plan	
		(ii)the proposed uses of the funds are not inconsistent with the requirements of title III	Refer to Hawaii Preliminary Plan	

Title 1 Matrix

				Act Requirements	
SEC. 102.REPLACEMENT OF PUNCH CARD OR LEVER VOTING MACHINES.					
	(a) ESTABLISHMENT OF PROGRAM				
		(1) IN GENERAL- Not later than 45 days after the date of the enactment of this Act, the Administrator shall establish a program under which the Administrator shall make a payment to each State eligible under subsection (b) in which a precinct within that State used a punch card voting system to administer the regularly scheduled general election for Federal office held in November 2000 (in this section referred to as a "qualifying precinct").		Refer to Hawaii Preliminary Plan	
		(2) USE OF FUNDS- A State shall use the funds provided under a payment under this section(either directly or as an reimbursement , including as reimbursement for costs incurred on or after January1, 2001, under multi-year contracts) to replace punch card voting systems or lever systems (as the case may be) in qualifying precincts within that State with a voting system (by purchase, lease, or such other arrangement as may be appropriate) that-		Refer to Hawaii Preliminary Plan	
			(A) does not use punch cards	Refer to Hawaii Preliminary Plan	
			(B) is not inconsistent with the requirements of the laws described in section 906; and	Refer to Hawaii Preliminary Plan	
			(C) meets the requirements of section 301.	Refer to Hawaii Preliminary Plan	

		(3) DEADLINE-			
			(A) In General – Except as provided in subparagraph (B), a State receiving a payment under the program under this section shall ensure that all of the punch card voting system or lever voting system in the qualifying precincts within that State have been replaced in time for the regularly scheduled general election of Federal office were to be held in November 2004.	**Refer to Hawaii Preliminary Plan**	
			(B) WAIVER-If a State certifies to the Administrator not later than January 1, 2004, that the State will not meet the deadline described in subparagraph (A) for good cause and includes in the certification the reasons for the failure to meet such deadline, the State shall ensure that all of the punch card voting systems or lever voting systems in the qualifying precincts within that State will be replaced in time for the first election for Federal office held after January 1, 2006.	**Refer to Hawaii Preliminary Plan**	
	(b) ELIGIBILITY-				
		(1) In General- A State is eligible to receive a payment under the program under this section if it submits to the Administrator a notice not later than the date that is 6 months after the date of the enactment of this Act (in such form as the Administrator may require) that contains-		**Refer to Hawaii Preliminary Plan**	
			(A) certifications that the State will use the payment (ether directly or as reimbursement, including as reimbursement for costs incurred on or after January 1, 2001, under multiyear contracts) to replace punch card voting systems (as the case may be) in the qualifying precincts within the State by the deadline described in subsection (a) (3);	**Refer to Hawaii Preliminary Plan**	
			(B) certifications that the State will continue to comply with the laws described in subsection906	**Refer to Hawaii Preliminary Plan**	
			(C) certifications that the replacement voting systems will meet the requirements of section 301; and	**Refer to Hawaii Preliminary Plan**	
			(D) such other information and certifications as the Administrator may require which are necessary for the administration of the program	**Refer to Hawaii Preliminary Plan**	

Voting Systems Matrix Section 301

** SEC. 301. VOTING SYSTEMS STANDARDS ** Depart of Justice Enforcement Authority					**Act Requirements**	**Plan Action**
	(a) REQUIREMENTS- Each voting system used in an election for Federal office shall meet the following requirements					
		(1) IN GENERAL-			**Act Requirements**	**Plan Action**
			(A) Except as provided in subparagraph (B), the voting system (including any lever voting system, optical scanning voting system, or direct recording electronic system) shall			
				(i) permit the voter to verify (in a private and independent manner) the votes selected by the voter on the ballot before the ballot is cast and counted;	Meets.	No action needed.
				(ii) provide the voter with the opportunity (in a private and independent manner) to change the ballot or correct any error before the ballot is cast and counted (including the opportunity to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error); and	Meets.	No action needed.
				(iii) if the voter selects votes for more than one candidate for a single office-- (I) notify the voter that the voter has selected more than one candidate for a single office on the ballot; (II) notify the voter before the ballot is cast and counted of the effect of casting multiple votes for the office; and (III) provide the voter with the opportunity to correct the ballot before the ballot is cast and counted.	Meets.	No actions needed.
			(B) A State or jurisdiction that uses a paper ballot voting system, a punch card voting system, or a central count voting system (including mail-in absentee ballots and mail-in ballots), may meet the requirements of subparagraph (A)(iii) by			

		(I) establishing a voter education program specific to that voting system that notifies each voter of the effect of casting multiple votes for an office; and	Meets.	No action needed.
		(II) providing the voter with instructions on how to correct the ballot before it is cast and counted (*including instructions* on how to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error)	Meets.	No action needed.
	(C) The voting system shall ensure that any notification required under this paragraph preserves the privacy of the voter and the confidentiality of the ballot.		Meets.	No action needed.
(2) AUDIT CAPACITY-			**Act Requirements**	**Plan Action**
	(A) IN GENERAL- The voting system shall produce a record with *an* audit capacity for such system.		Meets.	No action needed.
	(B) MANUAL AUDIT CAPACITY-		**Act Requirements**	**Plan Action**
		(I) The voting system shall produce a permanent paper record with a manual audit capacity for such system.	Meets.	No action needed.
		(II) The voting system shall provide the voter with *an opportunity* to change the ballot or correct any error before the permanent paper record is produced.	Meets.	No action needed.
		(III) The paper record produced under subparagraph (A) shall be available as an official *record for* any recount conducted with respect to any election in which the system is used.	Meets.	No action needed.

(3) ACCESSIBILITY FOR INDIVIDUALS WITH DISABILITIES- The voting system shall-		**Act Requirements**	**Plan Action**
	(A) be accessible for individuals with disabilities, including nonvisual accessibility for the blind and visually impaired, in a manner that provides the same opportunity for access and participation (including privacy and independence) as for other voters;	Partially meets.	The State will meet this *requirement* by providing for an ADA compliant Direct Recording Electronic (DRE) *in* each polling place.
	(B) satisfy the requirement of subparagraph (A) through the use of at least *one direct recording* electronic voting system or other voting system equipped for individuals with disabilities at each polling place; and	Does not meet.	*The State will meet this* requirement by providing for an ADA compliant Direct Recording Electronic (DRE) in each polling place.
	(C) if purchased with funds made available under title II on or after January 1, 2007, meet the voting system standards for disability access (as outlined *in this paragraph).*	N/A	
(4) ALTERNATIVE LANGUAGE ACCESSIBILITY-The voting system shall provide alternative language accessibility pursuant to the requirements of *section 203 of* the Voting Rights Act of 1965 (42 U.S.C. 1973aa-1a).		Meets.	No action needed.
(5) ERROR RATES- The error rate of the voting system in counting ballots (determined by taking into account only those errors which are attributable to the voting system and not attributable to an act of the voter) shall comply with the error rate standards established under section 3.2.1 of the voting systems standards issued by the Federal Election Commission which are in effect on the date of the enactment of this Act.		Meets.	No action needed.
(6) UNIFORM DEFINITION OF WHAT CONSTITUTES A VOTE- Each State shall adopt uniform and nondiscriminatory standards that define what constitutes a vote and what will be counted as a vote for each category of voting system used in the State.		Meets.	No action needed.

**SEC. 302. PROVISIONAL VOTING AND VOTING INFORMATION REQUIREMENTS. **Department of Justice Enforcement Authority	Act Requirements	Plan Action
(a) PROVISIONAL VOTING REQUIREMENTS- If an individual declares that such individual is a registered voter in the jurisdiction in which the individual desires to vote and that the individual is eligible to vote in an election for Federal office, but the name of the individual does not appear on the official list of eligible voters for the polling place or an election official asserts that the individual is not eligible to vote, such individual shall be permitted to cast a provisional ballot as follows:		
(1) An election official at the polling place shall notify the individual that the individual may cast a provisional ballot in that election.	Partially Meets. __Individual may cast challenged ballot	The State will meet this requirement upon implementation of the provisional voting program described above.
(2) The individual shall be permitted to cast a provisional ballot at that polling place upon the execution of a written affirmation by the individual before an election official at the polling place stating that the individual is--		
(A) a registered voter in the jurisdiction in which the individual desires to vote; and	Partially Meets. __On Election day voter may appeal to Board of Registration. __Voter may appeal decision of the Board of Registration. __Voter votes a challenged ballot and appeals Board of Registration decision to the Hawaii State Supreme Court.	The State will meet this requirement upon implementation of the provisional voting program described above.
(B) eligible to vote in that election.	Partially Meets. __Written proceedings from Board of Registration submitted to Hawaii State Supreme Court.	The State will meet this requirement upon implementation of the provisional voting program described above.
(3) An election official at the polling place shall transmit the ballot cast by the individual or the voter information contained in the written affirmation executed by the individual under paragraph (2) to an appropriate State or local election official for prompt verification under paragraph (4).	Meets.	No action needed.
(4) If the appropriate State or local election official to whom the ballot or voter information is transmitted under paragraph (3) determines that the individual is eligible under State law to vote, the individual's provisional ballot shall be counted as a vote in that election in accordance with State law.	Meets.	No action needed.

(5)(A) At the time that an individual casts a provisional ballot, the appropriate State or local election official shall give the individual written information that states that any individual who casts a provisional ballot will be able to ascertain under the system established under subparagraph (B) whether the vote was counted, and, if the vote was not counted, the reason that the vote was not counted.	Meets.	No action needed.
(B) The appropriate State or local election official shall establish a free access system (such as a toll-free telephone number or an Internet website) that any individual who casts a provisional ballot may access to discover whether the vote of that individual was counted, and, if the vote was not counted, the reason that the vote was not counted.	Partially Meets. __Hawaii State Supreme Court determines whether a challenged ballot is counted or not counted. __Voter is provided the Court's decision	The State will meet this requirement upon implementation of the provisional voting program described above.

States described in section 4(b) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-2(b)) may meet the requirements of this subsection using voter registration procedures established under applicable State law. The appropriate State or local official shall establish and maintain reasonable procedures necessary to protect the security, confidentiality, and integrity of personal information collected, stored, or otherwise used by the free access system established under paragraph (5)(B). Access to information about an individual provisional ballot shall be restricted to the individual who cast the ballot.	N/A	Hawaii is not a state described in §4(b) of the NVRA.
(b) VOTING INFORMATION REQUIREMENTS-	**Act Requirements**	**Plan Action**
(1) PUBLIC POSTING ON ELECTION DAY- The appropriate State or local election official shall cause voting information to be publicly posted at each polling place on the day of each election for Federal office.	Meets.	The State complies in terms of posting information, but actual details posted will be adjusted. See below for further detail.
(2) VOTING INFORMATION DEFINED- In this section, the term 'voting information' means--		
(A) a sample version of the ballot that will be used for that election;	Meets.	No action needed
(B) information regarding the date of the election and the hours during which polling places will be open;	Meets.	No action needed
(C) instructions on how to vote, including how to cast a vote and how to cast a provisional ballot;	Partially Meets. __Needs update to reach full compliance	The State will meet this requirement upon implementation of the voting information program described above.
(D) instructions for mail-in registrants and first-time voters under section 303(b);	N/A	The State collects social security numbers for voter registrations.
(E) general information on voting rights under applicable Federal and State laws, including information on the right of an individual to cast a provisional ballot and instructions on how to contact the appropriate officials if these rights are alleged to have been violated; and	Partially Meets. __Need more detail for full compliance	The State will meet this requirement upon implementation of the voting information program described above.
(F) general information on Federal and State laws regarding prohibitions on acts of fraud and misrepresentation.	Does Not Meet. __Information not included in current posting	The State will meet this requirement upon implementation of the voting information program described above.
(c) VOTERS WHO VOTE AFTER THE POLLS CLOSE- Any individual who votes in an election for Federal office as a result of a Federal or State court order or any other order extending the time established for closing the polls by a State law in effect 10 days before the date of that election may only vote in that election by casting a provisional ballot under subsection (a). Any such ballot cast under the preceding sentence shall be separated and held apart from other provisional ballots cast by those not affected by the order.	Does Not Meet. __ No procedures exist currently for this requirement	The State will meet this requirement upon implementation of the provisional voting program described above.

SEC. 303. COMPUTERIZED STATEWIDE VOTER REGISTRATION LIST REQUIREMENTS AND REQUIREMENTS FOR VOTERS WHO REGISTER BY MAIL.					**Act Requirements**	**Plan Action**
(a) COMPUTERIZED STATEWIDE VOTER REGISTRATION LIST REQUIREMENTS-						
(1) IMPLEMENTATION-						
			(A) IN GENERAL- Except as provided in subparagraph (B), each State, acting through the chief State election official, shall implement, in a uniform and nondiscriminatory manner, a single, uniform, official, centralized, interactive computerized statewide voter registration list defined, maintained, and administered at the State level that contains the name and registration information of every legally registered voter in the State and assigns a unique identifier to each legally registered voter in the State (in this subsection referred to as the computerized list), and includes the following:		Hawaii's Statewide Voter Registration meets all of HAVA's technological requirements, but not the legal requirement that it be administered at the State level. Official voter registration records are maintained at the local level and the statewide system is administered by the largest county on behalf of other counties and the State of Hawaii. A similar situation exists for Hawaii's motor vehicle system that is also administered by the largest county and is networked with the voter registration system.	The State will meet this requirement either via memorandum of understanding with the City and County of Honolulu or development of a parallel system or both.
				(I) The computerized list shall serve as the single system for storing and managing the official list of registered voters throughout the State.	See 1A. Meets.	
				(II) The computerized list contains the name and registration information of every legally registered voter in the State.	Meets.	No action needed.
				(III) Under the computerized list, a unique identifier is assigned to each legally registered voter in the State.	Meets. Hawaii is allowed an exemption under the Privacy Act and collects social security numbers that serves as a unique record identifier. Hawaii also encrypts this SSN for voter privacy concerns when using the number in more public forums.	No action needed.

	(iv) The computerized list shall be coordinated with other agency databases within the State.	Meets. The SVRS is connected online to the DMV. Each record is cross-checked with DMV records upon data entry and against the Building Department's parcel numbering file in C&C Honolulu.	Will work to the extent possible with other State agencies to meet this requirement.
	(v) Any election official in the State, including any local election official, may obtain immediate electronic access to the information contained in the computerized list.	Local election officials have read/write access to the SVRS. All records are maintained in real time fashion.	No action needed.
	(vi) All voter registration information obtained by any local election official in the State shall be electronically entered into the computerized list on an expedited basis at the time the information is provided to the local official.	Meets.	No action needed.
	(vii) The chief State election official shall provide such support as may be required so that local election officials are able to enter information as described in clause (vi).	Meets. Note: Technical support is provided by the City and County of Honolulu to all local users.	No action needed.
	(viii) The computerized list shall serve as the official voter registration list for the conduct of all elections for Federal office in the State.	Meets. The SVRS serves as the official list for all federal, state, and local elections that are administered together.	No action need.
(B) EXCEPTION- The requirement under subparagraph (A) shall not apply to a State in which, under a State law in effect continuously on and after the date of the enactment of this Act, there is no voter registration requirement for individuals in the State with respect to elections for Federal office.		Does not apply.	Does not apply.

(2) COMPUTERIZED LIST MAINTENANCE-			Act Requirements	Plan Action
	(A) IN GENERAL- The appropriate State or local election official shall perform list maintenance with respect to the computerized list on a regular basis as follows:			
		(i) If an individual is to be removed from the computerized list, such individual shall be removed in accordance with the provisions of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg et seq.), including subsections (a)(4), (c)(2), (d), and (e) of section 8 of such Act (42 U.S.C. 1973gg-6).	Meets.	No action needed.
		(ii) For purposes of removing names of ineligible voters from the official list of eligible voters– (I) under section 8(a)(3)(B) of such Act (42 U.S.C. 1973gg-6(a)(3)(B)), the State shall coordinate the computerized list with State agency records on felony status; and (II) by reason of the death of the registrant under section 8(a)(4)(A) of such Act (42 U.S.C. 1973gg-6(a)(4)(A)), the State shall coordinate the computerized list with State agency records on death	Meets. Convictions information is sent via hard copy and is processed against voter registration rolls Death information records are handled similarly.	No action needed. Computerized transfer is not practicable in light of numerous errors contained in outside agency records (i.e. records not maintained by election offices).
		(iii) Notwithstanding the preceding provisions of this subparagraph, if a State is described in section 4(b) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-2(b)), that State shall remove the names of ineligible voters from the computerized list in accordance with State law.	N/A	Hawaii is not a state described in 4(b) of the NVRA.
	(B) CONDUCT- The list maintenance performed under subparagraph (A) shall be conducted in a manner that ensures that–			
		(i) the name of each registered voter appears in the computerized list;	Meets.	No action needed.
		(ii) only voters who are not registered or who are not eligible to vote are removed from the computerized list; and	Meets.	No action needed.
		(iii) duplicate names are eliminated from the computerized list.	Meets. Due to use of SSN, possible duplicate records are identified immediately upon data entry. Duplicates are removed immediately on case by case basis as identified.	No action needed.

(3) TECHNOLOGICAL SECURITY OF COMPUTERIZED LIST- The appropriate State or local official shall provide adequate technological security measures to prevent the unauthorized access to the computerized list established under this section.	Meets. The City and County of Honolulu has security protocols and procedures. Each county establishes further protocols for its own security administration	No action needed

(4) MINIMUM STANDARD FOR ACCURACY OF STATE VOTER REGISTRATION RECORDS- The State election system shall include provisions to ensure that voter registration records in the State are accurate and are updated regularly, including the following:	Act Requirements	Plan Action
(A) A system of file maintenance that makes a reasonable effort to remove registrants who are ineligible to vote from the official list of eligible voters. Under such system, consistent with the National Voter Registration Act of 1993 (42 U.S.C. 1973gg et seq.), registrants who have not responded to a notice and who have not voted in 2 consecutive general elections for Federal office shall be removed from the official list of eligible voters, except that no registrant may be removed solely by reason of a failure to vote.	Meets.	No action needed.
(B) Safeguards to ensure that eligible voters are not removed in error from the official list of eligible voters.	Meets. Paper and electronic backups of deleted voters are maintained indefinitely on microfilm.	No action needed.
(5) VERIFICATION OF VOTER REGISTRATION INFORMATION-	Act Requirements	Plan Action
(A) REQUIRING PROVISION OF CERTAIN INFORMATION BY APPLICANTS-		
(i) IN GENERAL- Except as provided in clause (ii), notwithstanding any other provision of law, an application for voter registration for an election for Federal office may not be accepted or processed by a State unless the application includes- - (I) in the case of an applicant who has been issued a current and valid driver's license, the applicant's driver's license number; or (II) in the case of any other applicant (other than an applicant to whom clause (ii) applies), the last 4 digits of the applicant's social security number.	Meets. Hawaii statutorily requires the applicant's entire social security number.	No action needed.
(ii) SPECIAL RULE FOR APPLICANTS WITHOUT DRIVER'S LICENSE OR SOCIAL SECURITY NUMBER- If an applicant for voter registration for an election for Federal office has not been issued a current and valid driver's license or a social security number, the State shall assign the applicant a number which will serve to identify the applicant for voter registration purposes. To the extent that the State has a computerized list in effect under this subsection and the list assigns unique identifying numbers to registrants, the number assigned under this clause shall be the unique identifying number assigned under the list.	Meets. Applicants that do not possess a social security number are issued a voter number.	No action needed.
(iii) DETERMINATION OF VALIDITY OF NUMBERS PROVIDED- The State shall determine whether the information provided by an individual is sufficient to meet the requirements of this subparagraph, in accordance with State law.	N/A	No action needed.

(B) REQUIREMENTS FOR STATE OFFICIALS-	Act Requirements	Plan Action
(i) SHARING INFORMATION IN DATABASES- The chief State election official and the official responsible for the State motor vehicle authority of a State shall enter into an agreement to match information in the database of the statewide voter registration system with information in the database of the motor vehicle authority to the extent required to enable each such official to verify the accuracy of the information provided on applications for voter registration.	Meets. Hawaii's statewide voter registration system was connected to the statewide DMV. Each record is immediately crosschecked against DMV records upon entry.	No action needed. NOTE: Since Hawaii requires an SSN for voter registration, it is exempt from this requirement pursuant to 303(a)(5)(D)
(ii) AGREEMENTS WITH COMMISSIONER OF SOCIAL SECURITY- The official responsible for the State motor vehicle authority shall enter into an agreement with the Commissioner of Social Security under section 205(r)(8) of the Social Security Act (as added by subparagraph (C)).	Partially meets.	No action needed. See NOTE above. However, Hawaii's DMV administrator has informed election offices of their intent to verify DMV records online with the SSA records.
(b) REQUIREMENTS FOR VOTERS WHO REGISTER BY MAIL-	Act Requirements	Plan Action
(1) IN GENERAL- Notwithstanding section 6(c) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4(c)) and subject to paragraph (3), a State shall, in a uniform and nondiscriminatory manner, require an individual to meet the requirements of paragraph (2) if--	N/A	
(A) the individual registered to vote in a jurisdiction by mail; and	Act Requirements	Plan Action

(B)(i) the individual has not previously voted in an election for Federal office in the State; or		
(ii) the individual has not previously voted in such an election in the jurisdiction and the jurisdiction is located in a State that does not have a computerized list that complies with the requirements of subsection (a).	N/A. Hawaii has a computerized list and is exempt because it requires an SSN from all registrants.	
(2) REQUIREMENTS-	Act Requirements	Plan Action
(A) IN GENERAL- An individual meets the requirements of this paragraph if the individual--	N/A	
(i) in the case of an individual who votes in person--(I) presents to the appropriate State or local election official a current and valid photo identification; or (II) presents to the appropriate State or local election official a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter;	Meets.	Further training of precinct officials and voters is needed to inform of additional forms of ID that are not acceptable.
(ii) in the case of an individual who votes by mail, submits with the ballot-- (I) a copy of a current and valid photo identification; or (II) a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter	N/A.	Applicability to vote by mail states only.
(B) FAIL-SAFE VOTING-		

		(i) IN PERSON- An individual who desires to vote in person, but who does not meet the requirements of subparagraph (A)(i), may cast a provisional ballot under section 302(a).	Partially meets. Hawaii has a challenged ballot process that can be adapted to conform to the provisional ballot requirement.	Further training of precinct officials and voters is needed to inform of additional forms of ID that are not acceptable.
		(ii) BY MAIL- An individual who desires to vote by mail but who does not meet the requirements of subparagraph (A)(ii) may cast such a ballot by mail and the ballot shall be counted as a provisional ballot in accordance with section 302(a).	N/A	Applicability to vote by mail states only.
(3) INAPPLICABILITY- Paragraph (1) shall not apply in the case of a person–			Hawaii claims inapplicability of Paragraph 1 under section (B)(2) below because it requires the entire SSN from all registrants.	
	(A) who registers to vote by mail under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) and submits as part of such registration either–			
		(i) a copy of a current and valid photo identification; or	N/A	No action needed
		(ii) a copy of a current utility bill, bank statement, government check, paycheck, or government document that shows the name and address of the voter;	N/A	No action needed
	(B)(i) who registers to vote by mail under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) and submits with such registration either– (I) a driver's license number; or (II) at least the last 4 digits of the individual's social security number; and		Meets	No action needed
		(ii) with respect to whom a State or local election official matches the information submitted under clause (i) with an existing State identification record bearing the same number, name and date of birth as provided in such registration; or	Meets	No action needed

(C) who is–				**Plan Action**
		(i) entitled to vote by absentee ballot under the Uniformed and Overseas Citizens Absentee Voting Act (42 U.S.C. 1973ff-1 et seq.);	N/A	Hawaii's procedures will recognize this exemption.
		(ii) provided the right to vote otherwise than in person under section 3(b)(2)(B)(ii) of the Voting Accessibility for the Elderly and Handicapped Act (42 U.S.C. 1973ee-1(b)(2)(B)(ii)); or	N/A	Hawaii's procedures will recognize this exemption.
		(iii) entitled to vote otherwise than in person under any other Federal law.	N/A	Hawaii's procedures will recognize this exemption.
(4) CONTENTS OF MAIL-IN REGISTRATION FORM-			**Act Requirements**	**Plan Action**
	(A) IN GENERAL- The mail voter registration form developed under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) shall include the following:			Hawaii will recognize any amendments made to the National form.
		(i) The question 'Are you a citizen of the United States of America?' and boxes for the applicant to check to indicate whether the applicant is or is not a citizen of the United States.	Meets.	NOTE: Exact verbatim language is not present on form. However, Hawaii's form requires a yes no affirmation of a statement (i.e. I am a citizen of the U.S., I am at least...).
		(ii) The question 'Will you be 18 years of age on or before Election Day?' and boxes for the applicant to check to indicate whether or not the applicant will be 18 years of age or older on Election Day.	Meets	See NOTE above.
		(iii) The statement 'If you checked 'no' in response to either of these questions, do not complete this form.'	Exceeds.	Hawaii would collect forms from persons that do not meet the requirements and inform them of rejection via letter.
		(iv) A statement informing the individual that if the form is submitted by mail and the individual is registering for the first time, the appropriate information required under this section must be submitted with the mail-in registration form in order to avoid the additional identification requirements upon voting for the first time.	Meets.	Hawaii is exempt under previous.

	(B) INCOMPLETE FORMS- If an applicant for voter registration fails to answer the question included on the mail voter registration form pursuant to subparagraph (A)(i), the registrar shall notify the applicant of the failure and provide the applicant with an opportunity to complete the form in a timely manner to allow for the completion of the registration form prior to the next election for Federal office (subject to State law).	Meets.	No action needed.

Section 402

				Act Requirements	Plan Action
SEC. 402. ESTABLISHMENT OF STATE-BASED ADMINISTRATIVE COMPLAINT PROCEDURES TO REMEDY GRIEVANCES				Does Not Meet.	Hawaii will institute a grievance process to reflect the federal requirements.
	(a) ESTABLISHMENT OF STATE-BASED ADMINISTRATIVE COMPLAINT PROCEDURES TO REMEDY GRIEVANCES				
		(1) ESTABLISHMENT OF PROCEDURES AS CONDITION OF RECEIVING FUNDS- If a State receives any payment under a program under this Act, the State shall be required to establish and maintain State-based administrative complaint procedures which meet the requirements of paragraph (2)		Does Not Meet.	Hawaii will institute a grievance process to reflect the federal requirements.
		(2) REQUIREMENTS FOR PROCEDURES- The requirements of this paragraph are as follows:			
			(A) The procedures shall be uniform and nondiscriminatory.	Does Not Meet.	Hawaii will institute a grievance process to reflect the federal requirements.
			(B) Under the procedures, any person who believes that there is a violation of any provision of title III (including a violation, which has occurred, is occurring, or is about to occur) may file a complaint.	Does Not Meet.	Hawaii will institute a grievance process to reflect the federal requirements.
			(C) Any complaint filed under the procedures shall be in writing and notarized, and signed and sworn by the person filing the complaint.	Does Not Meet.	Hawaii will institute a grievance process to reflect the federal requirements.
			(D) The State may consolidate complaints filed under subparagraph (B).	Does Not Meet.	Hawaii will institute a grievance process to reflect the federal requirements.
			(E) At the request of the complainant, there shall be a hearing on the record.	Does Not Meet.	Hawaii will institute a grievance process to reflect the federal requirements.

July 24, 2003

State of Idaho – State Plan
July 24, 2003

As required by Public Law 107-252;
Help America Vote Act 2002, Section 253 (b)

Introduction

The Help America Vote Act (HAVA) was enacted into law on October 29, 2002. Congress passed HAVA to make sweeping reforms in the federal voting process. The Act addresses improvements to voting systems and voter access that were identified following the 2000 Presidential election. HAVA includes requirements for a centralized voter registration database, privacy and independence in the voting process, access for people with disabilities, and voter outreach and education. As a condition of receiving federal funding, each state is required to submit a plan that meets the requirements of the Act.

Background

Before the Help American Vote Act became the law of the land for election reform, several of the mandates were already addressed by Idaho Statutes.

In 1994 an Election Day Registration bill proposed by the Secretary of State in conjunction with the Governor's office was passed by Idaho's legislature with only one dissenting vote. Election Day Registration was in effect for the 1994 general election and exempted Idaho from the National Voter Registration Act. Exemption from the NVRA allowed Idaho to continue to remove electors who had not voted in an election over a four-year period from registration rolls. Idaho has been able to maintain cleaner registration lists and at the same time provide an individual with the ability to register at the polls on election day or at their absentee polling place. Although exempt from the NVRA, Idaho also adopted mail registration procedures and accepts the NVRA registration application. Idaho's accessible registration through Election Day Registration has eliminated the need for provisional ballots under HAVA. Every properly cast ballot on election day will be counted on election day.

Idaho formed an Election Task Force after the 2000 November election. Some of the initiatives were as follows:

- H.B. 206 authorized the use of direct electronic voting devices and provided that voting machine or vote tally system to be certified in Idaho must meet the federal election commission standards and be approved for use by an independent testing authority sanctioned by the national association of state election directors. (Ch. 272, 2001 S.L.)
- H.B. 212 was passed changing absentee voting deadline for mail requests (Ch. 236, 2002 S.L.)
- Anticipating federal election reform legislation, H.B. 213 was passed in 2002 to establish a Democracy Fund to receive federal moneys that may become available for improving Idaho's election system. (Ch. 237, 2002 S.L.) In 2003 H.B. 162 was passed specifically designating the Democracy Fund for funding and carrying out the activities mandated under the federal Help America Vote Act.

The Secretary of State requested and was given carry-over money in the 2001 Legislative Session for the purpose of voter education and election official training. To date the Secretary of State has used the money to fund the following:

- In cooperation with the county clerks, implemented a statewide integrity check of the voter registration files. (Less than 1% duplications were found statewide.)
- Produced election worker training videos for the various types of voting systems used in Idaho.
- Updated election worker procedure manuals and introduced new instructional flip charts for each pollworker position. Manuals and flip charts reflect the procedures to be followed for each type of voting system.
- Held a two-day election workshop for county clerks, election deputies and voting equipment vendors.
- Revised absentee voting instructions with diagrams to accompany absentee ballots.
- Revised voting instructions with diagrams to be placed in each voting booth at the polls. (12x18 on card stock)
- Certified four types of direct electronic voting equipment systems.

- Printed general election Voters' Guide with registration, voting and elections information for the Idaho citizen. This Guide was also available in Spanish.

The "Manual for Judges and Clerks" instructs sample ballots be posted at the polling place. Instructions on how to vote, including how to obtain a replacement ballot, and a "Card of Instructions – Crimes Against Elective Franchise" are statutorily required to be posted at the polling place. New placards with instructions for mail-in registrants and first-time voters, information regarding the date of the election and the hours during which polling places will be open, voter's rights, and an expanded "Card of Instructions – Crimes Against Elective Franchise" have been sent to the printers.

Statutory audit trails of absentee ballots are required for both F.P.C.A. applicants and the general population. The issuing officer shall keep as part of the records of his office a list of names and precinct numbers of electors making applications, the manner and time of delivery or mailing to and receipt of returned ballot, if the ballot was delivered in person, the name and address of the person delivering the same. If an absent elector's ballot is not returned or if it be rejected and not counted, such fact shall be noted on the record. These requirements already statutorily required will merely require the County Clerk to submit a report to Secretary of State on absentee voters as required by HAVA.

Idaho utilizes four types of voting systems; paper, punch card, oval ballot optical scan and arrow ballot optical scan. (See Appendix A) These voting systems meet the private and independent provision for verifying votes, enables voters to change their ballot or correct any errors, providing a paper audit trail and, through voter education, meeting HAVA requirements. Statutory requirements of assistance to voters includes curbside voting, assistance from the person of the elector's choice, no fault absentee voting, absentee ballots mailed within the county, polling place accessibility standards and physical arrangements of the polling place shall be sufficient to guarantee all voters the right to cast a secret ballot. Except for the visually impaired, the privacy of the voter and confidentiality of the ballot is preserved. Each polling place will be equipped with one voting system that shall be accessible for individuals with disabilities, including nonvisual accessibility for the blind and visually impaired by 2006.

In 2003 H.B. 162 (See Appendix B) was enacted requiring a driver's license number or last four digits of social security number and providing for a statewide voter registration list. Voter registration forms with identification and warning requirements of HAVA have been in use since March of 2003. Mail-registrants are notified of identification documentation requirements.

Idaho's biggest challenge will be converting Idaho's 44 separate voter registration files into a uniform statewide registration file. A demanding RFP has been issued for the development, installation, operation, management and maintenance of a system meeting state and HAVA requirements.

The State of Idaho, with limited funding, statutory authorization, state and local cooperation, has been aggressive in providing voters access to registration and voting. The Help America Vote Act affords Idaho the opportunity to improve all facets of the election process.

The Planning Process

HAVA and companion federal funding provides the opportunity to make enhancements to Idaho's election system that will support improved voter access and strengthen the overall integrity of the elections process.

Under the direction of Secretary of State Ben Ysursa the HAVA State Planning Committee was organized and held its first meeting on February 13, 2003. After several subsequent meetings and subcommittee meetings, the Committee has completed its initial state planning process recommendations.

Secretary Ysursa stated that it was his office's goal, in a partnership with the counties, to provide long term funding to improve the election process. Although the money is for federal elections the changes would obviously improve the election process for all elections. Secretary Ysursa emphasized that HAVA did not require an immediate change of any voting system currently being used. Any purchase of a new system must meet the standards specified in the act but the

option to purchase new systems is still the subject of ongoing discussion between the Secretary of State's Office and the Idaho Association of County Recorders and Clerks (IACRC).

Idaho is in a good position to implement the HAVA requirements. Many of the election reforms required by the Act are already addressed in Idaho state laws. Idaho has a positive track record of election reform and moved quickly to prepare for the much anticipated changes in the federal election laws. It established the Democracy Fund with legislation passed by the 2002 legislature to accept HAVA funds and passed legislation in 2003 to implement HAVA in the form of House Bill 162. The bill, which was signed into law on March 13, 2003, more clearly defined the role of the Secretary of State in administering federal elections, provided for a statewide registered voter list or database, directed the Secretary of State to adopt rules or directives outlining an election grievance procedure and the definition of what constitutes a valid vote for each type of voting system being used in the state, and more clearly defined the operations of the Democracy Fund to handle funds authorized by the Help America Vote Act of 2002.

This state plan produced by the HAVA State Planning Committee identifies the priorities and specific steps that the state and counties will take to meet the mandates of HAVA. It also discusses what additional improvements may be undertaken if there is remaining or additional federal funding after all requirements have been met. It is the Committee's goal to have greater uniformity in our state and to ensure that all individuals have access to the election process. Idaho is working to ensure that our statewide voter registration database is a single, centralized, real-time database. Voter outreach and education have been top priorities and will continue to be. The Secretary of State's office conducts workshops for county clerks and voter education programs that include election worker training videos, revised voting instructions, new instructional flip-charts and updated manuals for each poll worker position. Idaho recognizes that voter participation is disproportionately low in some demographic groups, including young people and citizens with limited English language proficiency. Idaho is committed to ensure that these and all other qualified voters are afforded the opportunity to participate in the election process.

It is anticipated that this document will be revised several times to reflect the state's progress in implementing HAVA. Effective implementation of many of the items included in the plan is based on the assumption that the Help America Vote Act will be fully funded by Congress over the next 3 years. If this does not happen, parts of the state plan may not be implemented.

As Idaho moves forward in carrying out this plan, the Secretary of State will continue to encourage coordination, cooperation, and collaboration between local and state officials on the innovations and technology that will be developed in response to HAVA. The Secretary of State will also involve the political parties and civic groups working on voter participation issues.

STATE PLAN REQUIRED ELEMENTS (HAVA Section 254)

1. Title III Requirements and Other Activities

How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251 (a) (2), to carry out other activities to improve the administration of elections.

The first five million dollars of "early out" or Title I money will be used to: (1) develop and administer a statewide voter registration system; (2) provide every polling place with a voting device accessible to those with disabilities (which would take approximately 2.5 million dollars); and (3) use any remaining money for education and training of voters, election officials and poll workers.

If fully funded, the fifteen million dollar requirement payments would be deposited into the Democracy Fund and made available for: (1) counties who want to upgrade their voting systems through a grant program and (2) ongoing maintenance of the statewide voter registration system.

The funding is over a three-year period of time. There is no fiscal limitation on spending any of these funds as long as the State Plan is in place, reviewed regularly, and updated as needed.

Idaho will not mandate a punch card buyout. HAVA does not require replacing any voting system that was used in the year 2000 but the system has to be able to be modified by 2006 to meet the requirements of HAVA. The Committee will give input on how current systems can be modified to meet those requirements. The Committee does, however, recommend that the Idaho Association of County Recorders and Clerks (IACRC) and the Idaho Association of Commissioners and Clerks discuss the feasibility of a single direct electronic recording (DRE) voting system from a single vendor by all of the counties in the State. If a single statewide

system is to be used, the state would determine the type of DRE to be purchased when a county makes the decision to change from their current system.

HAVA requires the Secretary of State to define what constitutes a vote and what will be counted for each of the voting systems currently in use in the state. The definitions along with instructions to local election officials will be put in the form of directives and will instruct officials on what should and should not be counted in the vote tabulation process.

All materials that are required by federal law to be displayed in the polling places will be reviewed by the Secretary of State and IACRC and will be used beginning with the primary election in 2004. These materials include: a notice of the date and time the polls will be open, instructions on how to cast a vote, instructions for mail-in registrants and first-time voters, general information on voting rights, instructions on how to contact the appropriate individual to report a violation and information about the prohibition on acts of fraud and misrepresentations. Preparation of the required sample ballot to be posted will be the responsibility of the local election officials.

Section 303 of HAVA requires states to implement a "single, uniform, official, centralized, interactive, computerized statewide voter registration list" that is defined, maintained and administered at the state level. Idaho's registration system will be changed from its current county based voter registration system to a single, centralized state-wide database. It will be developed by the Secretary of State's office in coordination with county clerks. Because of the time needed to develop the computer software and the data conversion from the various counties, it is the recommendation of this Committee that the State seek an extension to January 1, 2006, for implementation of the state-wide system.

Idaho has redesigned and provided each county with forms that meet the federal requirements for the voter registration and identification. These changes were required by passage of HB 162 during the 2003 legislative session.

2. Idaho's Distribution of Requirements Payment

How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of –

(A) the criteria to be used to determine the eligibility of such units or entities for receiving the payments; and

(B) the methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8). – HAVA Section 254 (a) (2)

The HAVA State Planning Committee will meet twice each calendar year to review the payments from the fund and the general administration of the Democracy Fund. A grant program will be established to allocate funds from in the Democracy Fund to assist the counties in implementing the requirements of HAVA at the local level. The actual details and complexity of the administration of the grant program will depend upon whether or not the state purchases a statewide system or opts to allow each county to make that determination. As to the criteria for the distribution of these moneys, the Committee is considering several formula elements including: (1) ballot style; (2) number of registered voters; and (3) demonstrated need.

There is concern about funding, should there be a requirement that all counties utilize a statewide uniform voting system when there is no guarantee of federal funding. Regardless of the level of funding provided by the federal government, there will not be sufficient money available to replace all machines. Counties will have to participate and a formula will need to be developed to determine the local matching amount.

The State Planning Committee will monitor payments to local governments. Subject to federal funding of the program and in consultation with IACRC, the State will adopt a matching grant program based upon a county by county determination to participate in a statewide voting system. The voting system priorities will be established through the Secretary of State's interpretation of HAVA.

Current law leaves the purchasing decision for voting equipment to the county commissioners of the individual counties. If, through discussions with counties, a single voting system is to be established, legislation will be required authorizing the purchase of a single statewide system.

3. Voter Education, Election Official Education and Training and Poll Worker Training

How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title Title III. – HAVA Section 254 (a) (3)

Education and training programs are critical to a successful implementation of election reform in Idaho. The following proposed activities will help insure that all stakeholders are comfortable with the new processes and supporting technologies that HAVA requires. The proposed activities are:

A. Design public service announcements on how to register and cast a vote and what to bring to the polls as a first time voter in Idaho.

B. Work with public schools (Jr. High through High School) to improve election education with possible mock elections. Encourage high school students to serve as poll workers.

C. IACRC to review and analyze current poll worker training tools.

D. Conduct voter seminars.

E. Form outreach partnerships with public and private organizations.

F. Develop uniform Voter information card.

G. Design a Voter Guide – possibly web-based

H. Provide bilingual voter information and recruit bilingual poll workers

I. Explore the use of a single uniform voting system statewide.

J. Develop a comprehensive schedule, planning the training and education through election day.

K. Provide voter information programs for those persons with disabilities.

L. Develop a "best practices" training program for election officials.

4. Voting System Guidelines and Processes

How the State will adopt voting system guidelines and processes, which are consistent with the requirement of section 301. – HAVA Section 254 (a) (4)

Voting system standards and processes consistent with the Voting Systems Standards identified in Section 301 will be adopted. Many voting system guidelines are in place. Some of the recommended steps include the following:

A. HAVA requires voting systems to be accessible to voters with disabilities who need special assistance in a manner that provides the same opportunity for access, participation, privacy, and independence as other voters. This requirement may be met by providing at least one DRE voting system at each polling place. A DRE voting system records votes by means of a ballot display with mechanical or electro-optional components that can be activated by the voter, such as a touch screen and audio prompts.

B. Allow for the creation of all-absentee or mail-in ballot precincts. This option would require legislation before it could be utilized. To accommodate election day registration in all-absentee ballot precincts, residents could register and vote the day of election at the office of the county clerk.

C. The Secretary of State's office and the county clerks will work with groups representing people with disabilities to attain accessibility of polling places and to assist in informing voters with disabilities about the resources available.

D. The Secretary of State will conduct a survey asking counties, with the assistance of those knowledgeable in the requirements for disability access, to review their facilities to ensure access to polling places for people with disabilities.

E. The Secretary of State will apply for a polling place accessibility grant from the U.S. Secretary of Health and Human Services (HHS) under section 261 of HAVA. These funds will be utilized to develop disability access training and education materials and to assist the counties in making their polling places more accessible.

F. Seek a more detailed definition of what is accessible for the blind and the visually impaired.

G. All voting systems currently used in Idaho have a verifiable audit trail and all newly certified voting systems must provide a verifiable audit trail as required by HAVA.

Provisional Voting (Section 302). The State is not required to implement a provisional voting system because Idaho, like 5 other states, enacted election day registration several years ago and is exempt National Voter Registration Act.

Voting Information Requirements.(Section 302) Idaho currently publishes and posts voting information in many places throughout the state – county election offices, in the statewide voters' pamphlet, on state and county elections websites. Detailed voting instructions for each separate type of voting system, including absentee, were updated in 2002. Regarding future voting information activities: (1) The Secretary of State will work with Caxton Printers to incorporate required posted information into materals supplied to the precinct i.e., date of the election and the hours during which polling places will be open, voters' rights, instructions for mail-in registrants and first-time voters, general information on Federal and state laws and how to contact the appropriate officials if these rights are alleged to have been violated. (2) The Counties would be responsible for their respective sample ballot(s). Sample ballots posted in the polling place should reflect only the candidates appearing on the ballot(s) for that particular polling place.

Computerized Statewide Voter Registration List
Section 303 of HAVA requires states to implement "a single, uniform, official, centralized, interactive, computerized statewide voter registration list" that is defined, maintained and administered at the state level. The State Planning Committee has created a technical committee to address statewide voter registration. The technical committee and the Secretary of State are

working to determine the various levels of automation currently in place in the counties, the types of systems being used, utilization of registration lists, etc., and how these local needs can be accommodated as the statewide voter registration system is developed and implemented. Currently there is no system utilized by any of the counties, which would meet all of the HAVA requirements.

Requirements for Voters Who Register By Mail.
HAVA Section 303 includes new identification requirements for voters who register by mail and who have not previously voted in an election for federal office. These requirements took effect January 1, 2003.

The Planning Committee and the office of the Secretary of State have developed and will continue to develop mechanisms (press releases, county election officials' communications, etc.) to inform the mail-in registrants and first-time voters of this new requirement prior to their going to the polls or voting absentee.

5. Idaho's HAVA Fund Management

How the State will establish a fund described in subsection(B) for purposes of administering the State's activities under this part, including information on fund management. – HAVA Section 254 (a) (5)

The State of Idaho created the "Democracy Fund" in 2002 separate and distinct from the State General Fund. The Committee recommends continued use of this fund to comply with HAVA. The Fund will contain federal, state and local money. State and local funds will be used to meet the requirements of the 5 percent match under HAVA.

The Secretary of State will work with the Controllers Office to follow and enforce all mandated fiscal controls and policies.

6. Idaho's HAVA Budget

The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on -

(A) the costs of the activities required to be carried out to meet the requirements of title III;

(B) the portion of the requirements payment which will be used to carry out activities to meet such requirements; and

(C) the portion of the requirements payment, which will be used to carry out other activities. – HAVA Section 254 (a) (6)

Section 101 money deposited into the Democracy Fund should be used in the following order of priority:

1. Statewide voter registration list
2. Accessibility – DRE in every precinct
3. Voter Information and Education
4. Poll Worker Training
5. Voting System Replacement

Grants available from U.S. Health and Human Services for polling place accessibility will be applied for by the Secretary of State to develop training materials and to assist counties in meeting their accessibility needs.

Title II money received will be used to purchase equipment that meets the requirements of Title III and will be deposited in the Democracy Fund to be made available to the various counties to upgrade or replace their voting systems. Funds will also be maintained in the Democracy Fund to provide ongoing support for the statewide voter registration system.

7. Maintenance of Effort

How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000. – HAVA Section 254 (a) (7)

The intent of funding provided under HAVA is to pay for new and enhanced efforts, not to supplant existing funding at the state and county level. In compliance with HAVA, Idaho will maintain expenditures of the State for election administration activities at or above $144,000, which is the amount expended in the fiscal year ended June 30, 2000.

8. How the State will adopt performance goals and measures.

How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met. – HAVA Section 254 (a) (8)

The Committee along with the Secretary of State's Office will develop measurable outcomes in its performance goals and monitor the success in meeting each of the following performance

goals. Each county will also have a substantial responsibility in meeting performance goals. The counties will monitor performance measures and will report to the state on a biennial basis. The Committee's goal is to achieve election reform and compliance with HAVA requirements through the successful implementation of the programs outlined in this Plan. The following is a partial listing of areas that will be examined and for which measurable outcomes will be developed to determine the level of success the State is experiencing in the implementation of the Plan.

A. Conduct and maintain over a period of years, an exit survey of voters on the voting process.
B. Conduct surveys on non-voter participation
C. Measure the efficiency of polling places and new voting systems, i.e., wait time.
D. Utilize suggestion boxes at each precinct.
E. Gather and analyze comments from the public and political parties on use of statewide voter registration lists.
F. In the statewide grievance system – number of complaints received, resolved and unresolved.
G. Conduct a comparative analysis of voter turnout data.
H. Track the number of voter education and outreach initiatives, including: description, estimated costs, and participation.
I. The number of poll workers and election officials who are trained.

9. State-Based Administrative Complaint Procedures

A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402. – HAVA Section 254 (a) (9) – Deadline for Compliance: Prior to certification of State Plan, but no later than January 1, 2004; no waiver permitted.

Section 402 of HAVA requires the State to create a state-based administrative complaint procedure to assure compliance with Title III of HAVA. The offices of the Secretary of State and Attorney General will develop administrative rules that will allow any person who believes there is, has been, or is about to be a violation of HAVA Title III to file a complaint. The complaint must be in writing, sworn and notarized. At the complainant's request, there will be a hearing on the record. If the State finds a violation, it will provide an appropriate remedy. If there is no violation, the complaint will be dismissed and the results will be published. The State will make a final determination on a complaint within 90 days, or if the State cannot meet this 90-day deadline, will provide under an alternative dispute resolution procedure. All procedures will be administered in a uniform and nondiscriminatory manner. (Appendix C contains a draft of the rules dealing with the complaint process.)

10. Effect of Title I Payments

If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities. – HAVA Section 254 (a) (10)

Section 101. Payments to States for activities to improve administration of elections.

Idaho is eligible for approximately $5 million under Section 101. These funds will be used for activities to meet the following requirements:

1. Statewide voter registration list	$1,500,000
2. Accessibility – DRE in every precinct	$2,800,000
3. Voter Education	$ 300,000
4. Poll Worker Training	$ 300,000
5. Plan development and administration	$ 100,000
TOTAL	$5,000,000

11. Idaho HAVA State Plan Management

How the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change –

(A) is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;

(B) is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and

(C) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A). – HAVA Section 254 (a) (11)

Continuous responsible management of the plan is essential to successful implementation and accomplishment of its purposes. Due to the complexity of HAVA and the statutory charge given to the Secretary of State to be the "chief election officer" with the "responsibility to obtain and maintain uniformity in the application, operation and interpretation of the election laws," the Office of the Secretary of State will be responsible for the ongoing management and implementation of the plan. The involvement of the counties in accomplishing various projects is essential and the Secretary of State will coordinate many activities outlined in the plan with them.

The State Planning Committee is charged with monitoring HAVA activities and making recommendations on needed changes to the state plan. Initially, the Secretary of State will call the committee together at least semi-annually to report on the various activities undertaken and receive input on any change in direction the plan should take.

The state understands and agrees to comply with HAVA requirements relating to ongoing management of the State Plan. More specifically, the state agrees that it may not make any material changes in the administration of the State Plan unless the change:

- is developed and published in the Federal Register in accordance with HAVA section 255 in the same manner as the original state plan,
- is subject to public notice and comment in accordance with HAVA section 256 ; and
- takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register.

12. State Plan Development and Committee

A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the Committee under such section 255 and section 256. – HAVA Section 254 (a) (13)

The HAVA State Planning Committee consists of individuals representing a cross-section of election stakeholders. The Committee was selected by Secretary of State Ben Ysursa.

Members of the State Planning Committee are as follows:

Dr. James Weatherby
Dept. of Public Policy and Administration
Boise State University
1910 University Drive
Boise, Idaho 83725-1935

Kelly Buckland
Idaho State Independent Living Council
350 N. 9th Street, Ste. 102

APPENDIX B – House Bill 162

IN THE HOUSE OF REPRESENTATIVES HOUSE BILL NO. 162
BY STATE AFFAIRS COMMITTEE
AN ACT

RELATING TO ELECTIONS; AMENDING SECTION 34-201, IDAHO CODE, TO PROVIDE FURTHER DUTIES OF THE SECRETARY OF STATE REGARDING ELECTIONS; AMENDING CHAPTER 2, TITLE 34, IDAHO CODE, BY THE ADDITION OF A NEW SECTION 34-216, IDAHO CODE, TO PROVIDE FOR GRIEVANCE PROCEDURES; AMENDING SECTION 34-303, IDAHO CODE, TO DELETE LANGUAGE STATING THAT NO ELECTION BOARD FOR A PRECINCT SHALL EXCEED TEN MEMBERS; AMENDING SECTION 34-410, IDAHO CODE, TO PROVIDE ADDITIONAL REQUIREMENTS FOR MAIL REGISTRATION; AMENDING SECTION 34-411, IDAHO CODE, TO REVISE THE CONTENTS OF AN APPLICATION FOR REGISTRATION; AMENDING SECTION 34-416, IDAHO CODE, TO DELETE LANGUAGE REQUIRING THE OFFICIAL WHO PERSONALLY REGISTERS THE ELECTOR TO SIGN HIS NAME AND TITLE IN ATTESTATION ON THE COMPLETED CARD; AMENDING SECTION 34-437, IDAHO CODE, TO REVISE REQUIREMENTS AND RESTRICTIONS FOR FURNISHING LISTS OF REGISTERED ELECTORS; AMENDING SECTION 34-437A, IDAHO CODE, TO REQUIRE THE SECRETARY OF STATE IN CONJUNCTION WITH COUNTY CLERKS TO DEVELOP AND IMPLEMENT A SINGLE, UNIFORM OFFICIAL LIST OF REGISTERED ELECTORS AND TO PROVIDE REQUIREMENTS; REPEALING SECTION 34-438, IDAHO CODE; AMENDING SECTION 34-704, IDAHO CODE, TO REVISE DECLARATION OF CANDIDACY REQUIREMENTS; AMENDING SECTION 34-1002, IDAHO CODE, TO REVISE APPLICATION FOR ABSENTEE BALLOT REQUIREMENTS; AMENDING SECTION 34-1203, IDAHO CODE, TO PROVIDE THAT THE SECRETARY OF STATE SHALL ISSUE DIRECTIVES OR PROMULGATE ADMINISTRATIVE RULES ADOPTING STANDARDS THAT DEFINE WHAT CONSTITUTES A VOTE AND WHAT WILL BE COUNTED AS A VOTE FOR EACH CATEGORY OF VOTING SYSTEM USED IN THIS STATE; AMENDING SECTION 34-1402, IDAHO CODE, TO REVISE REQUIREMENTS FOR REGISTRATION; AMENDING SECTION 34-2401, IDAHO CODE, TO REVISE THE DEFINITION OF "BALLOT"; AMENDING SECTION 67-916, IDAHO CODE, TO REVISE THE PROCEDURES, PURPOSES AND SPENDING AUTHORITY OF THE DEMOCRACY FUND; AND DECLARING AN EMERGENCY.

Be It Enacted by the Legislature of the State of Idaho:

SECTION 1. That Section 34-201, Idaho Code, be, and the same is hereby amended to read as follows:

34-201. SECRETARY OF STATE CHIEF ELECTION OFFICER. The secretary of state is the chief election officer of this state, and it is his responsibility to obtain and maintain uniformity in the application, operation and interpretation of the election laws.

The secretary of state is responsible for providing information regarding voter registration procedures and absentee ballot procedures to be used by absent uniformed service voters and overseas voters with respect to elections for federal office as required by section 102 of the uniformed and overseas citizens absentee voting act (42 U.S.C. section 1973 et seq.). If a national or local emergency or other situation arises which makes substantial compliance with the provisions of the uniformed and overseas citizens absentee voting act impossible or unreasonable, such as a natural disaster or an armed conflict involving United States armed forces, mobilization of those forces, including state national guard and reserve components of this state, the secretary of state may prescribe, by directive, such special procedures or requirements as may be necessary to facilitate absentee voting by those citizens directly affected who otherwise are eligible to vote in this state.

SECTION 2. That Chapter 2, Title 34, Idaho Code, be, and the same is hereby amended by the addition thereto of a **NEW SECTION**, to be known and designated as Section 34-216, Idaho Code, and to read as follows

34-216. GRIEVANCE PROCEDURES. The secretary of state shall promulgate rules in compliance with chapter 52, title 67, Idaho Code, establishing a state-based administrative complaint procedure as required by the Help America Vote Act (P.L. 107-252).

SECTION 3. That Section 34-303, Idaho Code, be, and the same is hereby amended to read as follows:

34-303. APPOINTMENT OF ELECTION JUDGES BY COUNTY CLERK. The county clerk shall appoint two (2) or more election judges, one (1) of whom shall be designated chief judge, and the number of clerks deemed necessary by him for each polling place. In the event a single polling place is designated for two (2) or more precincts, an individual may serve simultaneously on the election board for two (2) or more precincts thus served by a single polling place. ~~*No election board for a precinct shall exceed ten (10) members.*~~ The precinct committeemen shall recommend persons for the position in their respective precincts to the county clerk in writing at least ten (10) days prior to the date on which any appointment shall be made and the county clerk shall appoint the judges from such lists if the persons recommended are qualified.

The chief election judge shall be responsible for the conduct of the proceedings in the polling place. Compensation for all election personnel shall be determined by the board of county commissioners, and not less than the minimum wage as prescribed by the laws of the state of Idaho.

Each election board shall contain personnel representing all existing political parties if a list of applicants has been provided to the county clerk by the precinct committeemen of the precincts at least sixty (60) days prior to the primary election.

SECTION 4. That Section 34-410, Idaho Code, be, and the same is hereby amended to read as follows:

34-410. MAIL REGISTRATION. Any elector may register by mail for any election. Any mail registration application must be received by the county clerk prior to the close of registration as provided in section 34-408, Idaho Code, provided that any mail registration application postmarked not later than twenty-five (25) days prior to an election shall be deemed timely.

The secretary of state shall prescribe the form for the mail registration application. This mail application form shall be available for distribution through governmental and private entities, with particular emphasis on making them available for organized voter registration programs.

Any federal mail registration form adopted pursuant to the provisions of the national voter registration act of 1993 (P.L. 103-31) shall also be accepted as a valid registration, if such form is postmarked not later than twenty-five (25) days prior to an election. The county clerk shall prepare and issue by first class nonforwardable mail to each elector registering by mail a verification of registration containing the name and residence of the elector and the name or number of the precinct in which the elector resides.

A verification returned undeliverable shall cause the county clerk to remove the elector's card from the register of electors.

As required by the help America vote act of 2002 (P.L. 107-252), a copy of proper identification will be required prior to issuance of a ballot to anyone who has registered by mail and has not previously voted in an election for federal office in the state. Proper identification consists of:

(1) A current and valid photo identification; or

(2) A copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter.

SECTION 5. That Section 34-411, Idaho Code, be, and the same is hereby amended to read as follows:

34-411. APPLICATION FOR REGISTRATION -- CONTENTS. (1) Each elector who requests registration shall supply the following information under oath or affirmation:

(a) His full name and sex.

(b) His mailing address, his residence address or any other necessary information definitely locating his residence.

(c) The period of time preceding the date of registration during which he has resided in the state.

(d) Whether or not he is a citizen.

(e) That he is under no legal disqualifications to vote

(f) The county and state where he was previously registered, if any.

(g) Date of birth.

(h) Current driver's license number or, in the absence of an Idaho driver's license, the last four (4) digits of the elector's social security number.

(2) Any elector who shall supply any information under subsection (1) of this section, knowing it to be false, is guilty of perjury.

(3) Each elector who requests registration may, at the elector's option, supply the ~~*following information:*~~

~~*(a) Social security number; and*~~

~~*(b) Home*~~ **the elector's** telephone number. If the ~~*home*~~ telephone number is supplied by the elector, the ~~*home*~~ telephone number shall be available to the public.

SECTION 6. That Section 34-416, Idaho Code, be, and the same is hereby amended to read as follows:

34-416. REGISTRATION CARDS. (1) The registration card shall contain the following warning:

WARNING: Any elector who supplies any information, knowing it to be false, is guilty of perjury.

(2) The elector shall read the warning set forth in subsection (1) of this section and shall sign his name in an appropriate place on the completed card. ~~*The official who personally registers the elector shall sign his name and title in attestation in an appropriate place on the completed card.*~~

(3) The registration card completed and signed as provided in this section constitutes the official registration card of the elector. The county clerk shall keep and file all such cards in a convenient manner in his office. Such cards constitute the register of electors.

SECTION 7. That Section 34-437, Idaho Code, be, and the same is hereby amended to read as follows:

34-437. FURNISHING LISTS OF REGISTERED ELECTORS -- RESTRICTIONS. (1) Each of the county clerks, upon receiving a request ~~*therefor not later than the thirtieth day before a general, special or primary election,*~~ shall supply to any individual, a current list of the registered electors of the county and their addresses, arranged in groups according to election precincts. The county clerks shall prepare an original of the above list **from the state voter registration system** at county expense. Any person desiring a copy of the original list shall be furnished the same, and the county clerk shall assess the individual an amount which will compensate the county for the cost of reproducing such copy.

(2) ~~*The county clerk may, in his sole discretion, waive the deadline provided in subsection (1) of this section; provided that the clerk shall not discriminate against any political party, candidate or individual in waiving said deadline.*~~

~~*(3)*~~ No person to whom a list of registered electors is made available or supplied under subsection (1) of this section and no person who acquires a list of registered electors prepared from such list shall use any information contained therein for ~~*commercial purposes*~~ **the purpose of mailing or delivering any advertisement or offer for any property, establishment, organization, product, or service or for the purpose of mailing or delivering any solicitation for money, services, or anything of value. Provided however, that any such list and label may be used for any political purpose**.

SECTION 8. That Section 34-437A, Idaho Code, be, and the same is hereby amended to read as follows:

34-437A. ~~*SECRETARY OF STATE REQUIRING*~~ **STATEWIDE** LISTS OF REGISTERED ELECTORS. **(1)** The secretary of state, ~~*may require each county clerk to submit to him, for use in compiling a statewide list of registered electors, the current list of registered electors as described in section 34-437, Idaho Code*~~ **in conjunction with county clerks, shall develop and implement a single, uniform official, centralized, interactive, computerized statewide voter registration system as required by the help America vote act of 2002 (P.L. 107-252).**

(2) The statewide system shall contain the name and registration information of every legally registered voter in the state and assign a unique identifier to each legally registered voter in the state, and include the following:

(a) The computerized list shall serve as the single system for storing and managing the official list of registered voters throughout the state.

(b) The computerized list shall contain the name and registration information of every legally registered voter in the state.

(c) Under the computerized list, a unique identifier shall be assigned to each legally registered voter in the state.

(d) The computerized list shall be coordinated with other agency databases within the state.

(e) Any election official in the state, including any local election official, may obtain immediate electronic access to the information contained in the computerized list.

(f) All voter registration information obtained by any local election official in the state shall be electronically entered into the computerized list on an expedited basis at the time the information is provided to the local official.

(g) The secretary of state shall provide such support as may be required so that local election officials are able to enter information as described in subsection (2)(f) of this section.

(h) The computerized list shall serve as the official voter registration list for the conduct of all elections for federal office in the state.

(3) Any person desiring a copy of the statewide list of registered electors shall be furnished the same, and the secretary of state shall assess the individual an amount which will compensate the state for the cost of reproducing such copy.

No person to whom a list of statewide electors is furnished and no person who acquires a list of statewide electors prepared from such list shall use any information contained therein for ~~*commercial purposes*~~ **the purpose of mailing or delivering any advertisement or offer for any property, establishment, organization, product, or service or for the purpose of mailing or delivering any solicitation for money, services, or anything of value. Provided however, that any such list and label may be used for any political purpose**.

SECTION 9. That Section 34-438, Idaho Code, be, and the same is hereby repealed.

SECTION 10. That Section 34-704, Idaho Code, be, and the same is hereby amended to read as follows:

34-704. DECLARATION OF CANDIDACY. Any person legally qualified to hold such office is entitled to become a candidate and file his declaration of candidacy. Each political party

candidate for precinct, state, district or county office shall file his declaration of candidacy in the proper office between 8 a.m., on the ~~*tenth*~~ **twelfth** Monday preceding the primary election and 5 p.m., on the ~~*eighth*~~ **tenth** Friday preceding the primary election. All political party candidates shall declare their party affiliation in their declaration of candidacy, except candidates for nonpartisan office

Candidates who file a declaration of candidacy under a party name and are not nominated at the primary election shall not be allowed to appear on the general election ballot under any other political party name, nor as an independent candidate.

Independent candidates shall file their declaration of candidacy in the manner provided in section 34-708, Idaho Code.

SECTION 11. That Section 34-1002, Idaho Code, be, and the same is hereby amended to read as follows:

34-1002. APPLICATION FOR ABSENTEE BALLOT. Any registered elector may make written application to the county clerk, or other proper officer charged by law with the duty of issuing official ballots for such election, for an official ballot or ballots of the kind or kinds to be voted at the election. The application shall contain the name of the elector, his home address, county, and address to which such ballot shall be forwarded.

The application for an absent elector's ballot shall be signed personally by the applicant. The application for a mail-in absentee ballot shall be received by the county clerk not later than 5:00 p.m. on the sixth day before the election. An application for in person absentee voting at the absent elector's polling place described in section 34-1006, Idaho Code, shall be received by the county clerk not later than 5:00 p.m. on the day before the election. Application for an absentee ballot may be made by using a facsimile machine. In the event a registered elector is unable to vote in person at his designated polling place on the day of election because of an emergency situation which rendered him physically unable, he may nevertheless apply for an absent elector's ballot on the day of election by notifying the county clerk. No person, may, however, be entitled to vote under an emergency situation unless the situation claimed rendered him physically unable to vote at his designated polling place within forty-eight (48) hours prior to the closing of the polls.

A person may make application for an absent elector's ballot by use of a properly executed federal postcard application as provided for in the laws of the United States known as Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA, 42 U.S.C. 1973 ff, et seq.). A properly executed federal postcard application (F.P.C.A.) ~~*, if received prior to the primary election*~~, shall be considered as a request for an absent elector's ballot ~~*for both the primary and general election*~~ **through the next two (2) regularly scheduled general elections for federal office following receipt of the application**. The issuing officer shall keep as a part of the records of his office a list of all applications so received and of the manner and time of delivery or mailing to and receipt of returned ballot.

The county clerk shall, not later than seventy-five (75) days after the date of each general election, submit a report to the secretary of state containing information concerning absentee voters as required by federal law.

SECTION 12. That Section 34-1203, Idaho Code, be, and the same is hereby amended to read as follows:

34-1203. COUNTING OF BALLOTS -- CERTIFICATES OF JUDGES. The ballots and polls lists agreeing, the election personnel shall then proceed to tally the votes cast. Under each office title the number of votes for each candidate and such other information required by the secretary of state shall be entered in the tally books together with the total of the above figures in the manner prescribed by the secretary of state. Any ballot or part of a ballot from which it is impossible to determine the elector's choice, shall be void and shall not be counted. When a ballot is sufficiently plain to determine therefrom a part of the voter's intention, it shall be the duty of the judges to count such part.

Following the counting, the judges must post a correct copy of such results at the polling place and a copy transmitted to the county clerk.

In no event shall the results of any count be released to the public until all voting places in the state have closed on election day.

The secretary of state shall issue directives or promulgate administrative rules adopting standards that define what constitutes a vote and what will be counted as a vote for each category of voting system used in this state.

SECTION 13. That Section 34-1402, Idaho Code, be, and the same is hereby amended to read as follows:

34-1402. REGISTRATION. All electors must register with the county clerk before being able to vote in any primary, general, special or any other election conducted in this state. The county clerk shall determine, for each registered elector, the elections for which he is eligible to vote by a determination of the applicable code areas. ~~*The register of electors shall be maintained by the clerk in a manner which will make this information readily available to the electors and to the election officials of the various political subdivisions.*~~ The determination of tax code area shall be made for all political subdivisions including those otherwise exempt from the provisions of this chapter.

The county clerk shall conform to the provisions of chapter 4, title 34, Idaho Code, in the administration of registration for all political subdivisions within the county. The county clerk shall appoint each city clerk for any city within the county and each election official designated by a political subdivision, as an at-large registrar as provided in section 34-406, Idaho Code, except that no compensation shall be paid by the county clerk for electors registered by these special registrars.

SECTION 14. That Section 34-2401, Idaho Code, be, and the same is hereby amended to read as follows:

34-2401. DEFINITIONS. As used in this chapter:

(1) "Ballot" means any material used **or the voting surface of a direct recording electronic system** on which votes are cast for offices, ~~*and*~~ candidates and measures, ~~*which do not appear on ballot labels or a ballot which is used to record votes which are cast for offices and candidates and measures in a voting system which does not use ballot cards.*~~

(2) "Ballot card" means the tabulating card or cards of any size upon which the voter records his vote.

(3) "Ballot label" means the cards, papers, booklet or other material containing the names of offices and candidates and measures to be voted on.

(4) "Election" means all state, county, city, district and other political subdivision elections including bond issue elections.

(5) "Governing body" means the board of county commissioners of any county or the governing body of any city, district or other political subdivision elections including bond issue elections.

(6) "Measure" means a proposed law, act or part of an act of the legislative assembly or amendment to the constitution of the state of Idaho to be submitted to the people for their approval or rejection at an election. "Measure" also means other propositions which can be submitted to the voters at any election by counties, cities, districts or other political subdivisions.

(7) "Model" means a mechanically operated model of a portion of the face of the machine illustrating the means of voting.

(8) "Precinct" includes all election districts.

(9) "Voting machine" means:

(a) Any mechanical or electronic device which will record every vote cast by any voter on candidates and measures and which will either internally or externally total all votes cast on that device;

(b) Any device into which a ballot card may be inserted and which is so designed and constructed that the vote for any candidate or measure may be indicated by punching or marking the ballot card.

(10) "Vote tally system" means one (1) or more pieces of machinery or equipment necessary to examine and tally automatically paper ballots having marks placed thereon by a written mark or by a marking stamp. The examination shall be accomplished by either mark sensing or optical scanning.

SECTION 15. That Section 67-916, Idaho Code, be, and the same is hereby amended to read as follows:

67-916. DEMOCRACY FUND. (1) There is hereby created in the state treasury in the office of the secretary of state the "Democracy Fund." The purpose of the democracy fund is to provide funding for ~~*improving the election systems for the benefit of Idaho's voters*~~ **carrying out the activities for which payments are made to the state under the federal Help America Vote Act of 2002 (P.L. 107-252)** including, but not limited to:

(a) Establishing and maintaining accurate lists of eligible voters;

(b) Encouraging eligible voters to vote;

(c) Improving verification and identification of voters at the polling 8 place;

(d) Improving equipment and methods for casting and counting votes;

(e) Recruiting and training election officials and poll workers;

(f) Improving the quantity and quality of available polling places;

(g) Educating voters about their rights and responsibilities;

(h) Assuring access for voters with physical disabilities;

(i) Carrying out other activities to improve the administration of elections in the state.

(2) The democracy fund shall consist of all moneys appropriated by the legislature, federal moneys that may be available for the purpose of improving Idaho's election system, **county matching funds** and funds from any other source.

(3) ~~*Moneys in the democracy fund may be expended pursuant to appropriation and a*~~All interest earned on the investment of idle moneys in the fund by the state treasurer shall be returned to the fund.

(4) Moneys deposited in, or remitted to, the democracy fund are continuously appropriated to the secretary of state for the purpose of paying the expenses of carrying out the activities for which payments are made to this state under the federal help America vote act of 2002 (P.L. 107-252).

SECTION 16. An emergency existing therefor, which emergency is hereby declared to exist, this act shall be in full force and effect on and after its passage and approval.

APPENDIX C – Rules Governing Complaint Process

IDAPA 34

TITLE 02

CHAPTER 02

34.02.02- RULES GOVERNING COMPLAINT PROCESS UNDER THE HELP AMERICA VOTE ACT

000. Legal Authority. This chapter is promulgated pursuant to Idaho Code § 34-216 and 42 U.S.C. § 15512. Federal law requires the Secretary of State to establish an administrative complaint procedure to remedy grievances under the Help America Vote Act, 42 U.S.C. § 15481, et seq.

001. Title and Scope. The rules in this Chapter shall be known as the Complaint Process Under the Help America Vote Act, and may be cited as IDAPA 34.02.02. This chapter provides a uniform, nondiscriminatory procedure for the resolution of any complaint alleging a violation of any provision of Title III of the Help America Vote Act of 2002, 42 United States Code §§ 15481, et seq., including a violation that has occurred, is occurring, or is about to occur. The procedure set out in this chapter does not apply to an election recount under Idaho Code §§ 34-2301 et seq., or to an election contest under Idaho Code §§ 34-2001 et seq., and 34-2101 et seq. A Complainant who wishes to challenge the validity of any primary, general or special election, or to determine the validity of any ballot or vote must seek relief as otherwise provided by law.

002. Written Interpretations.

Written Interpretations of this Chapter are available by mail from the Idaho Secretary of State.

003. Contact Information.

Office of Secretary of State, 8:00 a.m.–5:00 p.m. Monday through Friday, 700 W. Jefferson, Rm. 203, Boise, Idaho. The mailing address is P.O. Box 83720, Boise, ID 83720-0080. The Election Division telephone number is (208) 334-2852 and the facsimile machine is (208) 334-2282.

004. Public Records Act Compliance.

This Chapter and its contents are subject to the Idaho Public Records Law.

005. Administrative Appeals.

Administrative appeals are not available within the Secretary of State's Office.

006. Incorporation by Reference.

No documents have been incorporated by reference into this Chapter.

007.-009. RESERVED.

010. Definitions.

In this chapter, the following terms have the meanings indicated.

(1) "Complainant" means the person who files a complaint with the Secretary of State under this subtitle;

(2) "Respondent" means any State or County election official whose actions are asserted, in a complaint under this subtitle, to be in violation of Title III;

(3) "Title III" means Title III of the Help America Vote Act of 2002, Public Law 107-252, 116 Stat. 1666 (2002), codified at 42 United States Code §§ 15481-15485.

011. Who May File. Any person who believes that there is a violation of any provision of Title III may file a complaint.

012. Form of Complaint.

(a) Writing and Notarization. A complaint shall be in writing and notarized, signed and sworn under oath by the Complainant. The complaint must identify the Complainant by name and mailing address. The complaint must identify the section of Title III for which a violation is alleged. The complaint must set out a clear and concise description of the claimed violation that is sufficiently detailed to apprise both the Respondent and the hearing officer or arbitrator of the claimed violation. The complaint procedure is limited to allegations of violations of Title III in a federal election.

(b) Prescribed or Other Form. The Complainant may use:

(1) the form prescribed by the Idaho Secretary of State, which is available from the Idaho Secretary of State Election Division, or which may be downloaded from the Idaho Secretary of State Election Division's website found at www.idsos.state.id.us/elect/eleindex.htm; or

(2) any other form satisfying the requirements of subsection (a) of this regulation.

013. Place and Time for Filing; Copy for Respondent.

(a) Place for Filing. A complaint shall be filed with the Election Division, along with adequate proof of mailing or delivery of a copy of the complaint to each Respondent.

(b) Time for Filing. A complaint shall be filed within 30 days after the occurrence of the actions or events that form the basis for the complaint, including the actions or events that form the basis for the Complainant's belief that a violation is about to occur, or, if later, within 30 days after the Complainant knew, or with the exercise of reasonable diligence, should have known of those actions or events.

(c) Copy for Respondent. The Complainant shall mail or deliver a copy of the complaint to each Respondent.

(d) The Election Division shall examine each complaint, and may reject it for filing if:

(1) it is not signed and notarized under oath;

(2) it does not identify the Complainant or include an adequate mailing address;

(3) does not, on its face, allege a violation of Title III with regard to a federal election; or

(4) more than 90 days have elapsed since the final certification of the federal election at issue.

014. Processing of Complaint.

(a) Consolidation. The Secretary of State may consolidate complaints if they relate to the same actions or events, or if they raise common questions of law or fact.

(b) The Secretary of State shall take all necessary steps to prepare the complaint for determination under these regulations. In the course of preparing the complaint for determination, the Secretary of State shall allow a party to proceed with the assistance of an English language interpreter if the Complainant is unable to proceed without assistance of an interpreter. It is the responsibility of the party who needs an interpreter to secure the services of the interpreter. The Secretary of State, in coordination with the parties, shall establish a schedule under which the Complainant and Respondent may file written submissions concerning the complaint, and under which the complaint shall be finally determined.

(c) Record.

(1) the Secretary of State shall compile and maintain an official record in connection with each complaint under this subtitle;

(2) the official record shall contain:

(A) a copy of the complaint including any amendments made with the permission of the Secretary of State;

(B) a copy of any written submission by the Complainant;

(C) a copy of any written response by any Respondent or other interested person;

(D) a written report of any investigation conducted by employees of the Secretary of State or Office of Attorney General who may not be directly involved in the actions or events complained of, and may not directly supervise or be directly supervised by any Respondent;

(E) copies of all notices and correspondence to or from the Secretary of State in connection with the complaint;

(F) originals or copies of any tangible evidence produced at any hearing conducted under IDAPA 34.02.02.015;

(G) the original tape recording produced at any hearing conducted under IDAPA 34.02.02.015(g) of this regulation, and a copy of any transcript obtained by any board or other party; and

(H) a copy of any final determination made under IDAPA 34.02.02.016 or 34.02.02.017.

015. Hearing.

(a) At the request of the Complainant, the Secretary of State shall conduct a hearing on the record.

(b) The hearing shall be conducted no sooner than 10 days and no later than 30 days after the Secretary of State receives the complaint. The Secretary of State shall give at least 10 business days' advance notice of the date, time, and place of the hearing:

(1) by mail, to the Complainant, each named Respondent, and any other interested person who has asked in writing to be advised of the hearing;

(2) on the Election Division web site; and

(3) by posting in a prominent place, available to the general public, at the offices of the Election Division;

(c) the Secretary of State or his designee shall act as hearing officer.

(d) the Complainant, any Respondent, or any other interested member of the public may appear at the hearing and testify or present tangible evidence in connection with the complaint. Each witness shall be sworn. The hearing officer may limit the testimony, if necessary, to ensure that all interested participants are able to present their views. The hearing officer may recess the hearing and reconvene at a later date, time, and place announced publicly at the hearing.

(e) A Complainant, Respondent, or other person who testifies or presents evidence at the hearing may, but need not, be represented by an attorney.

(f) If a person has already testified or presented evidence at the hearing and wishes to contradict testimony or evidence subsequently presented, that person is not entitled to be heard again, but may make a written presentation to the hearing officer.

(g) The proceedings shall be tape-recorded by and at the expense of the Election Division. The recording shall not be transcribed as a matter of course, but the Election Division, or any party may obtain a transcript at its own expense. If a board or party obtains a transcript, the board or party shall file a copy as part of the record, and any other interested person may examine the record copy.

(h) Any party to the proceedings may file a written brief or memorandum within 5 business days after the conclusion of the hearing. No responsive or reply memoranda will be accepted except with the specific authorization of the hearing officer.

016. Final Determination.

(a) If there has been no hearing under IDAPA 34.02.02.015, the Secretary of State or his designee shall review the record and determine whether, under a preponderance of the evidence standard, a violation of Title III has been established.

(b) At the conclusion of any hearing under IDAPA 34.02.02.015, the hearing officer shall determine, under a preponderance of the evidence standard, whether a violation of Title III has been established.

(c) Form of Determination.

(1) If the Secretary of State or his designee, whether acting as hearing officer or otherwise, determines that a violation has occurred, the Secretary of State shall provide the appropriate remedy. The remedy shall be directed to the improvement of processes or procedures governed by Title III. The remedy so provided may include an order to any Respondent, commanding the Respondent to take specified action, or prohibiting the Respondent from taking specified action, with respect to a past or future election; however, the remedy may not include an award of money damages or attorney's fees. The remedy may not include the denial of certification or the invalidation of any primary, general or special election, or a determination of the validity of any ballot or vote. Remedies addressing the certification of an election, the validity of an election, or of any ballot or vote may be obtained only as otherwise provided by law;

(2) If the complaint is not timely or not in proper form, or if the Secretary of State or his designee, whether acting as hearing officer or otherwise, determines that a violation has not occurred, or that there is not sufficient evidence to establish a violation, the Secretary of State shall dismiss the complaint;

(d) The Secretary of State or his designee shall explain in a written decision the reasons for the determination and for any remedy selected.

(e) Except as specified in IDAPA 34.02.02.017, the final determination of the Secretary of State shall be issued within 90 days after the complaint was filed, unless the Complainant consents in writing to an extension. The final determination shall be mailed to the Complainant, each Respondent, and any other interested person who has asked in writing to be advised of the final determination. It shall also be published on the Division's website and made available on request to any interested person.

(f) If the Secretary of State cannot make a final determination within 90 days after the complaint was filed, or within any extension to which the Complainant consents, the complaint shall be referred for final resolution under IDAPA 34.02.02.017. The record complied under IDAPA 34.02.02.014 of this regulation shall be made available for use under IDAPA 34.02.02.017.

017. Alternate Dispute Resolution.

(a) If, for any reason, the Secretary of State or his designee does not render a final determination within 90 days after the complaint was filed, or within any extension to which the Complainant consents, the complaint shall be resolved under this section.

(b) On or before the 5th business day after a final determination by the Secretary of State was due, the Secretary of State shall designate in writing to the Complainant a list of names of arbitrators who may resolve the complaint. Within 3 business days after the Complainant receives this designation, the Complainant and the Secretary of State shall arrange to choose an arbitrator from this list by striking names from the list until an arbitrator acceptable to both parties is chosen. Within 3 business days after the parties strike names, the Secretary of State shall contact the arbitrator chosen and arrange for the hearing by the arbitrator.

(c) The arbitrator may review the record compiled in connection with the complaint, including the tape recording or any transcript of a hearing and any briefs or memoranda, but shall not receive additional testimony or evidence. In exceptional cases, the arbitrator may request that the parties present additional briefs or memoranda.

(d) The arbitrator shall determine the appropriate resolution of the complaint as set out in these regulations.

(e) The arbitrator must issue a written resolution within 60 days after the final determination of the Secretary of State was due under IDAPA 34.02.02.016. This 60-day period may not be extended. The final resolution of the arbitrator shall be transmitted to the Secretary of State and shall be the final resolution of the complaint. The final resolution shall be mailed to the Complainant, each Respondent,

and any other interested person who has asked in writing to be advised of the final resolution. It shall be published on the Election Division website and made available on request to any interested person.

August 18, 2003

Daniel W. White
Executive Director
Illinois State Board of Elections

Ronald D. Michaelson
Chair, State Planning Committee

The State Board of Elections is an independent constitutional agency responsible for general supervision over the administration of the registration and election laws throughout the State of Illinois. The Board consists of eight members – four Democrat and four Republican. The Board appoints an Executive Director and Assistant Executive Director to oversee the day-to-day activities of the State Board of Elections. The Executive Director serves as the Chief Election Officer for the state.

During its thirty year existence, the legislature has expanded the duties of the State Board of Elections to include many other aspects of the election process. The Board oversees and provides services to 110 election jurisdictions throughout the state. With the passage of The Help America Vote Act of 2002 (HAVA), the Board will be responsible for ensuring the provisions of HAVA are implemented in a proper and timely fashion.

Illinois has three bills pending which pertain to HAVA. These bills address provisional voting, voting systems, voter registration, and the "Help America Vote Act of 2002" fund which will allow Illinois to receive federal monies.

Work was already in progress in Illinois on a statewide voter registration system (and VISTA) when HAVA was merely a thought in Congress. HAVA requires each state to have a computerized statewide voter registration system which shall be interactive between the state and the election jurisdictions. The State Board of Elections is approximately eight months away from finishing the system, provided ample funding is received.

INTRODUCTION

The Illinois State Plan, developed by our State Planning Committee, outlines how the state will distribute and monitor the monies received and how the state will meet the requirements of the Act. It is designed to be a flexible document and subject to alteration as conditions might warrant. The majority of the items included in this plan are based on the assumption that HAVA is fully funded by Congress over the next three federal fiscal years.

Even before passage of HAVA, work was already in progress in Illinois in a number of areas which are now required under the Act. For example, construction of a statewide interactive voter registration file is well underway, with completion scheduled for 2004. In addition, legislation was recently passed and is awaiting gubernatorial action to allow for provisional voting, to authorize the use of new accessible voting systems and provide for greater voter education. These and other ongoing initiatives have been melded into our State Plan as a demonstration of the Agency's commitment to fully comply with HAVA.

The preliminary plan which follows is divided into the thirteen sections which are enumerated in Section 254 of the Act.

Section 1. Title III Requirements Payment

How the State will use the requirements payment to meet the requirements of Title III, and if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Section 301 Voting Systems Standards

(a) REQUIREMENTS: Each voting system used in an election for Federal office shall meet the following requirements:

(1) IN GENERAL

(A) Except as provided in subparagraph (B), the voting system (including any lever voting system, optical scanning voting system, or direct recording electronic system) shall

Requirement	Illinois Current Status	Actions Planned
(i) permit the voter to verify (in a private and independent manner) the votes selected by the voter on the ballot before the ballot is cast and counted;	Partially meets	Illinois will comply with HAVA requirements.
(ii) provide the voter with the opportunity (in a private manner) to change the ballot or correct any error before the ballot is cast and counted (including the opportunity to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error); and	Meets	No action needed
(iii) if the voter selects votes for more than one candidate for a single office – (I) notify the voter that the voter has selected more than one candidate for a single office on the ballot; (II)notify the voter before the ballot is cast and counted of the effect of casting multiple votes for the office; and (III) provide the voter with	Partially meets. Approximately 60% precincts in Illinois have systems that utilize voter error notification.	Illinois will comply with this requirement. (with the punch card buyout new systems will have this capability)
the opportunity to correct the ballot before the ballot is cast and counted.		

(B) A State or jurisdiction that uses a paper ballot voting system, a punch card voting system, or a central count voting system (including mail-in absentee ballots and mail-in ballot), may meet the requirements of subparagraph (A)(iii) by—

(i) establishing voter education program specific to that voting system that notifies each voter of the effect of casting multiple votes for an office; and	Meets Website education program. Information included with absentee ballot.	No action needed
(ii) providing the voter with instructions on how to correct the ballot before it is cast and counted (including instructions on how to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error)	Meets Instructions included with absentee ballot. Required demonstration at polling place for each in-person voter.	No action needed

(C) The voting system shall ensure that any notification required under this paragraph preserves the privacy of the voter and the confidentiality of the ballot.

(2) AUDIT CAPACITY—

(A) IN GENERAL the voting system shall produce a record with an audit capacity for such system.

(B) MANUAL AUDIT CAPACITY--

(i) The voting system shall produce a permanent paper record with a manual audit capacity for such system.	Meets. Those systems currently allowed by law in Illinois produce a permanent paper audit trail.	No action needed
(ii) The voting system shall provide the voter with an opportunity to change the	Meets.	No action needed

ballot or correct any error before the permanent paper record is produced.		
(iii) The paper record produced under subparagraph (A) shall be available as an official record for any recount conducted with respect to any election in which the system is used.	Meets.	No action needed

(3) ACCESSIBILITY FOR INDIVIDUALS WITH DISABILITIES – The voting system shall

(A) be accessible for individuals with disabilities, including nonvisual accessibility for the blind and visually impaired, in a manner that provides the same opportunity for access and participation (including privacy and independence) as for other voters;	Does not meet.	With the passage of SB 428 Illinois will comply with the requirements
(B) satisfy the requirement of subparagraph (A) through the use of at least one direct recording electronic voting system or other voting system equipped for individuals with disabilities at each polling place; and	Does not meet.	Illinois will comply with this requirement under the deadlines provided by HAVA.
(C) if purchased with funds made available under title II on or after January 1, 2007, meet the voting system standards for disability access as outlined in this paragraph.		Illinois will comply with this requirement.

Language was included in SB 428 that allows for the voting system to be fully accessible to permit blind or visually impaired voters as well as physically disabled voters to exercise their right to vote in private and without assistance.

Illinois will also work with election authorities to provide sensitivity and awareness training to judges of election. The State Board of Elections shall produce a manual for judges that includes the rights of voters with disabilities that will be made available to election authorities for their use. Prior to each election, election authorities shall audit

polling places on a regular basis to ascertain if they meet accessibility standards and also publish the polling places that are accessible. Illinois will strive to have all polling places 100% accessible.

Illinois has applied for the Election Assistance for Individuals with Disabilities grant and the State Board of Elections will adhere to its standards.

(4) ALTERNATIVE LANGUAGE ACCESSIBILITY

The voting system shall provide alternative language accessibility pursuant to the requirements of section 203 of the Voting Rights Act of 1965 (42 U.S.C. 1973aa – 1a.	Meets.	No action needed. Under SB 428 language was included for all new voting systems.

(5) ERROR RATES

The error rate of the voting system in counting ballots (determined by taking into account only those errors which are attributable to the voting system and not attributable to an act of the voter) shall comply with the error rate standards established under section 3.2.1 of the voting systems standards issued by the Federal Election Commission which are in effect on the date of the enactment of this Act.	Meets. FEC Voting Systems Standards were adopted in Illinois.	No action needed

(6) UNIFORM DEFINITION OF WHAT CONSTITUTES A VOTE

Each State shall adopt uniform and nondiscriminatory standards that define what constitutes a vote and what will be counted as a vote for each category of voting system used in the State,	Partially meets. Current statutes include definition of a vote for paper ballot and central count optical scan only.	Illinois will comply with this requirement.

Language in SB 428 (10 ILCS 5/24A-22) provides for the definition of a vote using the following three systems: 1) punch cards, 2) for electronic precinct tabulation optical scan system (10 ILCS 5/24B-9.1), and 3) direct recording electronic voting system (10 ILCS 5/24C-10).

Section 302 Provisional Voting and Voting Information Requirements

(A) PROVISIONAL VOTING REQUIREMENTS – If an individual declares that such individual is registered voter in the jurisdiction in which the individual desires to vote and that the individual is eligible to vote in an election for Federal office, but the name of the individual does not appear on the official list of eligible voters for the polling place or an election official asserts that the individual is not eligible to vote, such individual shall be permitted to cast a provisional ballot as follows

(1) An election official at the polling place shall notify the individual that the individual may cast a provisional ballot in that election.	Does not meet.	Illinois will comply with this requirement (10 ILCS 5/18A-5(b)(1) new).
(2) The individual shall be permitted to cast a provisional ballot at that polling place upon the execution of a affirmation by the individual before an election official at the polling place stating that the individual is –	Does not meet.	Illinois will comply with this requirement (10 ILCS 5/18A-5(b)(1) new).
(A a registered voter in the jurisdiction in which the individual desires to vote; and		
(B) eligible to vote in that election.		
(3) An election official at the polling place shall transmit the ballot cast by the individual or the voter information contained in the written affirmation executed by the individual under paragraph (2) to an appropriate State or local election official for prompt verification under paragraph (4).	Does not meet	Illinois will comply with this requirement (10 ILCS 5/18A-10 new).
(4) If the appropriate State or local election official to whom the ballot or voter information is transmitted under paragraph (3)	Does not meet	Illinois will comply with this requirement (10 ILCS 5/18A-15 new).

determines that the individual is eligible under State law to vote, the individual's provisional ballot shall be counted as a vote in that election in accordance with State law.		
(5)(A) At the time that an individual casts a provisional ballot, the appropriate State or local election official shall give the individual written information that states that any individual who casts a provisional ballot will be able to ascertain under the system established under subparagraph (b) whether the vote was counted, and, if the vote was not counted, the reason that the vote was not counted.	Does not meet	Illinois will comply with this requirement (10 ILCS 5/18A-5(b)(5) new).
(B) The appropriate State or local election official shall establish a free access system (such as a toll-free telephone number or an Internet website) that any individual who casts a provisional ballot may access to discover whether the vote of that individual was counted, and, if the vote was not counted, the reason that the vote was not counted.	Does not meet	Illinois will comply with this requirement (10 ILCS 5/18A-20 new).

(b) VOTING INFORMATION REQUIREMENTS -

(1) PUBLIC POSTING ON ELECTION DAY - The appropriate State or local election official shall cause voting information to be publicly posted at each polling place on the day of each election for Federal office.

(2) VOTING INFORMATION DEFINED - In this section, the term "voting information" means-

(A) a sample version of the ballot that will be used for that election;	Meets.	No action needed
(B) information regarding the date of the election and the	Meets.	No action needed

hours during which polling places will be open;		
(C) instructions on how to vote, including how to cast a vote and how to cast a provisional ballot;	Partially meets. Currently no provisional balloting allowed.	Illinois will comply with this requirement (10 ILCS 5/18A-2 new).
(D) instructions for mail-in registrants and first-time voters under section 303(b);	Does not meet	Illinois will comply with this requirement (10 ILCS 5/1A-16 new).
(E) general information on voting rights under applicable Federal and State laws, including information on the right of an individual to cast a provisional ballot and instructions on how to contact the appropriate officials if these rights are alleged to have been violated; and	Does not meet	Administrative complaint procedure will be adopted.
(F) general information on Federal and State laws regarding prohibitions on acts of fraud and misrepresentation.	Meets	Illinois has brochure available on Vote Fraud.
(c) VOTERS WHO VOTE AFTER THE POLLS CLOSE.- Any individual who votes in an election for Federal office as a result of a Federal or State court order or any other order extending the time established for closing the polls by a State law in effect 10 days before the date of that election may only vote in that election by casting a provisional ballot under subsection (a). Any such ballot cast under the preceding sentence shall be separated and held apart from other provisional ballots cast by those not affected by the order.	Does not meet.	Illinois will comply with this requirement (10 ILCS 5/18A-5(a)(3) new).

Section 303 Computerized Statewide Voter Registration List Requirements and Requirements for Voters Who Register By Mail.

(a) COMPUTERIZED STATEWIDE VOTER REGISTRATION LIST REQUIREMENTS -

(1) IMPLEMENTATION

(A) IN GENERAL – Except as provided in subparagraph (B), each State, acting through the chief State election official, shall implement, in a uniform and nondiscriminatory manner, a single, uniform, official centralized, interactive computerized statewide voter registration list defined, maintained, and administered at the State level that contains the name and registration information of every legally registered voter in the State (in this subsection referred to as the computerized list), and includes the following:	Partially meets.	Illinois will fully meet this requirement of this section with implementation of up-dated voter registration system. Work is scheduled to be completed in spring of 2004.
(i) The computerized list shall serve as the single system for storing and managing the official list of registered voters throughout the State.	Does not meet.	
(ii) The computerized list contains the name and registration information of every legally registered voter in the State.	Does not meet	
(iii) Under the computerized list, a unique identifier is assigned to each legally registered voter in the State.	Does not meet	
(iv) The computerized list shall be coordinated with other agency databases within the State.	Does not meet	
(v) Any election official in the State, may obtain immediate electronic access to the information contained in the computerized list.	Does not meet	
(vi) All voter registration information obtained by any local election official in the State shall be electronically entered into the computerized list on an	Does not meet	

expedited basis at the time the information is provided to the local official.		
(vii) The chief State election official shall provide such support as may be required so that local election officials are able to enter information as described in clause (vi).		
(viii) The computerized list shall serve as the official voter registration list for the conduct of all elections for Federal office in the State.	Does not meet	
(B) EXCEPTION-- The requirement under subparagraph (A) shall not apply to a State in which, under a State enactment of this Act, there is no voter registration requirement for individuals in the State with respect to elections for Federal office.	N/A	

(2) COMPUTERIZED LIST MAINTENANCE

(A) IN GENERAL--The appropriate State or local election official shall perform list maintenance with respect to the computerized list on a regular basis as follows:

(i) If an individual is to be removed from the computerized list, such individual shall be removed in accordance with the provisions of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg et seq.),including subsections (a)(4), (c)(2), (d), and (e) of section 8 of such Act (42 S.S.C. 1973gg-6).	Meets. Illinois implemented NVRA in 1995.	No action needed
(ii) For purposes of removing names of ineligible voters from the official list of eligible voters-- (I) under section 8(a)(3)(B) of such Act (42 U.S.C. 1973gg-6(a)(3)(B),	Partially meets. Courts are required to inform election authority	Illinois will take appropriate action to fully comply.

the State shall coordinate the computerized list with State agency records on felony status; and	on felony status. We do not receive anything from the State courts.	
(II) by reason of the death of the registrant under section 8(a)(4)(A) of such Act (42 U.S.C. 1973gg--6(a)(4)(A)), the State shall coordinate the computerized list with State agency records on death.	Does not meet. Currently there is no coordination with Vital Records to receive this information.	Illinois will take appropriate action to fully comply.
(iii) Notwithstanding the preceding provisions of this subparagraph, if a State is described in section 4(b) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-2(b)), that State shall remove the names of ineligible voters from the computerized list in accordance with State law.	N/A	

(B)CONDUCT.-- The list maintenance performed under subparagraph (A) shall be conducted in a manner that ensures that--

(i) the name of each registered voter appears in the computerized list;	Meets.	
(ii) only voters who are not registered or who are not eligible to vote are removed from the computerized list;	Meets.	

and (iii) duplicate names are eliminated from the computerized list.	Does not meet. Less than 5% of 6,000,000 registered voters are possible duplicates.	The new system will meet this requirement when implemented in 2004.

(3) TECHNOLOGICAL SECURITY OF COMPUTERIZED LIST

The appropriate State or local official shall provide adequate technological security measures to prevent the unauthorized access to the computerized list established under this section.	Meets.	No action needed

(4) MINIMUM STANDARD FOR ACCURACY OF STATE VOTER REGISTRATION RECORDS --The State election system shall include provisions to ensure that voter registration records in the State are accurate and are updated regularly, including the following:

(A) A system of file maintenance that makes a reasonable effort to remove registrants who are ineligible to vote from the official list of eligible voters. Under such system, consistent with the National Voter Registration Act of 1993 (42 U.S.C. 1973gg et seq.), registrants who have not responded to a notice and who have not voted in 2 consecutive general elections for Federal office shall be removed from the official list of eligible voters, except that no registrant may be removed solely by reason of a failure to vote	Meets.	No action necessary
(B) Safeguards to ensure that eligible voters are not removed in error from the official list of eligible voters.	Meets.	No action needed

(5) VERIFICATION OF VOTER REGISTRATION INFORMATION

(A) REQUIRING PROVISION OF CERTAIN INFORMATION BY APPLICANTS -

(i) IN GENERAL.--Except as provided in clause (ii), notwithstanding any other provision of law, an application for voter registration for an election for Federal office may not be accepted or processed by a State unless the application includes-- (I) in the case of an applicant who has been issued a current and valid driver's license, the applicant's driver's license number; or (II) in the case of any other applicant (other than an applicant to whom clause (ii) applies), the last 4 digits of the applicant's social security number.	Partially meets. Currently last four digits of social security number is required.	Illinois will comply with this requirement (10 ILCS 5/1A-16 new).
(ii) SPECIAL RULE FOR APPLICANTS WITHOUT DRIVER'S LICENSE OR SOCIAL SECURITY NUMBER.-- If an applicant for voter registration for an election for Federal office has not been issued a current and valid driver's license or a social security number, the State shall assign the applicant a number which will serve to identify the applicant for voter registration purposes. To the extent that the State has a computerized list in effect under this subsection and the list assigns unique identifying numbers to registrant,	Partially meets. Illinois provides free of charge a photo identification through the Secretary of State's office for anyone not qualifying for a driver's license.	The new voter registration system will provide a unique identifier.

the number assigned under this clause shall be the unique identifying number assigned under the list.		
(iii) DETERMINATION OF VALIDITY OF NUMBERS PROVIDED.--The State shall determine whether the information provided by an individual is sufficient to meet the requirements of this subparagraph, in accordance with State law.	Partially meets. Currently Illinois law requires 2 forms of identification for voter registration, not currently applicable to mail registrants.	The State Board of Elections will adopt necessary measures to assure validity.

(B) REQUIREMENTS FOR STATE OFFICIALS --

(i) SHARING INFORMATION IN DATABASES.--The chief State election official and the official responsible for the State motor vehicle authority of a State shall enter into an agreement to match information in the database of the statewide voter registration system with information in the database of the motor vehicle authority to the extent required to enable each such official to verify the accuracy of the information provided on applications for voter registration.	Partially meets	Chief state election official will make contact as necessary
(ii) AGREEMENTS WITH COMMISSIONER OF SOCIAL SECURITY.--The official responsible for the State motor vehicle authority shall enter into an agreement with the Commissioner of Social Security under section 205(r)(8) of the Social Security Act (as added by subparagraph C)).	Does not meet	As required, the Secretary of State will be responsible for this mandate in conjunction with the Office of Social Security under the Social Security Act.

(b) REQUIREMENTS FOR VOTERS WHO REGISTER BY MAIL -

(1) IN GENERAL.--Notwithstanding section 6(c) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4(c) and subject to paragraph (3), a

State shall, in a uniform and nondiscriminatory manner, require an individual to meet the requirements of paragraph (2) if—

(A) the individual registered to vote in a jurisdiction by mail; and		
(B) (i) the individual has not previously voted in an election for Federal office in the State; or (ii) the individual has not previously voted in such an election in the jurisdiction and the jurisdiction is located in a State that does not have a computerized list that complies with the requirements of subsection (a).	Does not meet.	Illinois will comply with this requirement (10 ILCS 5/1A-16) new).

(2) REQUIREMENTS

(A) IN GENERAL --An individual meets the requirements of this paragraph if the individual--

(i) in the case of an individual who votes in person- (I) presents to the appropriate State or local election official a current and valid photo identification; or (II) presents to the appropriate State or local election official a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter; or	Does not meet. Current Illinois law requires only that a first-time voter who registers by mail must vote in person.	Illinois will comply with this requirement (10 ILCS 5/1A-16 new). (SB 428 provides that a voter only has to submit ID if he/she doesn't have a driver's license number or social security number.)
(ii) in the case of an	Does not meet.	Illinois will comply with this

	individual who votes by mail, submits with the ballot- (I) a copy of a current and valid photo identification; or (II) a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter.		requirement.

(B) FAIL-SAFE VOTING -

(i)	IN PERSON.- An individual who desires to vote in person, but who does not meet the requirements of subparagraph (A)(I), may cast a provisional ballot under section 302(a).	Does not meet. Under the provisions of NVRA, Illinois does not permit first-time mail registrants to vote absentee by mail.	This provision is partially met with new provisional voting language (10 ILCS 5/18A-5), and will be more fully addressed in the fall legislative session.
(ii)	BY MAIL.- An individual who desires to vote by mail but who does not meet the requirements of subparagraph (A)(ii) may cast such a ballot by mail in accordance with section 302(a).		

(3) INAPPLICABILITY - Paragraph (1) shall not apply in the case of a person-

(A)	who registers to vote by mail under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) and submits as part of such registration either-- (i) a copy of a current and valid photo	Does not meet.	Illinois will comply with this requirement (10 ILCS 5/1A-16 new).

	identification; or (ii) a copy of a current utility bill, bank statement, government check, paycheck, or government document that shows the name and address of the voter;		
(B)	(i) who registers to vote by mail under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) and submits with such registration either- (I) a driver's license number; or (II) at least the last 4 digits of the individual's social security number; and	Partially meets. Last 4 digits of social security number is a requirement.	
	(ii) with respect to whom a State or local election official matches the information submitted under clause (I) with an existing State identification record bearing the same number, name and date of birth as provided in such registration; or	No means in place to obtain this information.	Illinois will meet this requirement with the implementation of the new voter registration system.
(B)	who is- (i) entitled to vote by absentee ballot under the Uniformed and Overseas Citizens Absentee Voting Act (42 U.S.C. 1973ff-et seq.); (ii) provided the right to vote otherwise than in person under section 3(b)(2)(B)(ii); or (iii) entitled to vote otherwise than in person under any other Federal law.	Meets.	

(4) CONTENTS OF MAIL-IN REGISTRATION FORM

(A) IN GENERAL.- The mail voter registration form developed under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) shall include the following:

(i)	The question "Are you a citizen of the United States of America?" and boxes for the applicant to check to indicate whether the applicant is or is not a citizen of the United States.	Does not meet.	Illinois will comply with this requirement (10 ILCS 5/1A-16 new). Registration forms will be updated and sent through the Joint Committee on Rules for approval after enactment of SB 428 which adds additional information to registration form.
(ii)	The question "Will you be 18 years of age on or before election day?" and boxes for the applicant to check to indicate whether or not the applicant will be 18 years of age or older on election day.		
(iii)	The statement "If you checked 'no' in response to either of these questions, do not complete this form"		
(iv)	A statement informing the individual that if the form is submitted by mail and the individual is registering for the first time, the appropriate information required under this section must be submitted with the mail-in registration form in order to avoid the additional identification requirements upon voting for the first time.		

(B) INCOMPLETE FORMS.- If an applicant for voter registration fails to answer the question included on the mail voter registration form pursuant to subparagraph (A)(I), the registrar shall notify the applicant of the failure and provide the applicant with an opportunity to complete the form in a timely manner

to allow for the completion of the registration form prior to the next election for Federal office (subject to State law).

Deadline for Compliance of Section 303 Computerized Statewide Voter Registration List Requirements and Requirements for Voters Who Register by Mail: January 1, 2004. Deadline may be extended with good cause.

Illinois has maintained a limited statewide voter registration database since 1988. An update and modernization of that system began in 1999 and was in process before the Help America Vote Act was passed.

Currently each election authority maintains a separate database and submits an updated electronic copy of the file five times each year. There is no means of checking for duplicates. A system is in place to notify a previous election authority when a voter registers in a different jurisdiction. Data entry and conversion to current state requirements is not uniform. Two of the 110 jurisdictions do not maintain voter information on electronic media.

The Illinois Data Export Application (IDEA) and the State Board of Elections in-house Voter Information System Technical Application (VISTA) will work together to provide the tools needed by both the state and local jurisdictions to create a current, uniform and accurate voter registration list which will comply with HAVA.

The new system, as originally envisioned, is not fully HAVA compliant. However, it was anticipated when the programs were written that updates would be required and IDEA was designed so that such changes and updates can be implemented with a minimum disruption to the system. The completed voter registration system will be "single, uniform, official, centralized and interactive" as required by HAVA.

Additionally, the SBE is in the process of updating the Illinois mail-in registration form. First-time voters who register by mail, under HAVA, must provide a copy of proof of identity along with the application for registration or be prepared to provide that information at the polling place on election day. The process for identifying first-time voters who register by mail is in current Illinois rules and regulations that require such voters to vote only in person. The mail-in registration application form must be updated as well to include the additional information required by HAVA. The rules will be reviewed and updated as necessary to comply with HAVA.

Section 402. Establishment of State-based Administrative Complaint Procedures to Remedy Grievances.

(a) establishment of state-based administrative complaint procedures to remedy grievances --

(1) ESTABLISHMENT OF PROCEDURES AS	Does not meet	Such a procedure will be adopted by rule.

CONDITION OF RECEIVING FUNDS.-- If a State receives any payment under a program under this Act, the State shall be required to establish and maintain State-based administrative complaint procedures which meet the requirements of paragraph (2)		
(2) REQUIREMENTS FOR PROCEDURES.-The requirements of this paragraph are as follows: (A) The procedures shall be uniform and nondiscriminatory. (B) Under the procedures, any person who believes that there is a violation of any provision of title III (including a violation which has occurred, is occurring, or is about to occur) may file a complaint. (C) Any complaint filed under the procedures shall be in writing and notarized, and signed and sworn by the person filing the complaint. (D) The State may consolidate complaints filed under subparagraph (B). (E) At the request of the complainant, there shall be a hearing on the record. (F) If, under the procedures, the State determines that there is a violation of any provision of title III, the State shall provide the		

appropriate remedy. (G) If, under the procedures, the State determines that there is no violation, the State shall dismiss the complaint and publish the results of the procedures. (H) The State shall make a final determination with respect to a complaint prior to the expiration of the 90-day period which begins on the date the complaint is filed, unless the complainant consents to a longer period for making such a determination. (I) If the State fails to meet the deadline applicable under subparagraph (H), the complaint shall be resolved within 60 days under alternative dispute resolution procedures established for purposes of this section. The record and other materials from any proceedings conducted under the complaint procedures established under this section shall be made available for use under the alternative dispute resolution procedures.		

Section 2. Illinois' Distribution of Requirements Payment

How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of

(A) the criteria to be used to determine the eligibility of such units or entities for receiving the payment; and

(B) the methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8).

The State Board of Elections will retain all responsibility for the requirements payments. It will receive, expend and account for all HAVA monies. The SBE will work with the election authorities to determine needs and spending priorities. Funds will be distributed based on availability and set to the priorities established in this plan.

The State Board of Elections will manage the requirements payments and will account for all receipts and expenditures. Election authorities will either be reimbursed for qualifying expenditures or will be awarded grants depending on individual circumstances. However, election authorities will be responsible for financial needs that exceed the specified requirements.

The State Board of Elections will ensure all payments are accounted for in accordance with the performance goals and measures adopted under Section 8.

Section 3. Voter Education Programs

How the state will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of title III.

I. Voter Education

Voter education is essential to any plan for election reform. The purpose of the voter education program must be to increase voter familiarity with the requirements to register to vote, the type of voting equipment utilized and to inform voters of their rights and responsibilities at the polling place. Voter education should also help to increase voter interest in the election, help attract poll workers, and decrease the voter error rate.

The voter education program will address all aspects of the voting public with specific emphasis in reaching senior citizens, young adults, minority voters, and voters with disabilities. It will include both pre-election and election day strategies including how to register to vote, how to locate polling places, how to cast a ballot, and voters rights in the polling place.

Pre-election strategies will include public service announcements in all media formats, electronic forms of voter education, community partnerships with outreach organizations, demonstrations of the voting equipment at venues throughout the election jurisdiction, and programs geared toward use in the classroom. The State Board of Elections will seek participation from other state agencies (mainly the Secretary of State) in pursuing public service announcements. The State Board of Elections will seek assistance from the Department of Rehabilitation Services, Department of Aging and Department of Human Services in providing educational materials to clients of those departments.

Pre-election day strategies will include demonstrations of the voting equipment. Election day strategies will include having informational posters available in polling places, and printed information regarding voting equipment usage provided in the polling place. We encourage election authorities to request vendors to provide to each registered household in that jurisdiction a guide explaining operation of their particular voting equipment. The State Board of Elections will continue to enhance its voter education material already on its website and we encourage election authorities to do the same.

The State Board of Elections will develop voter education programs in partnership with all stakeholders, including local election authorities, community representatives, and advocacy organizations. As the Secretary of State, Division of Motor Vehicles, registers many voters, information should be provided at these sites educating voters as they register.

II. Election Administrator Training

The State Board of Elections will establish a program to ensure that there is adequate knowledge of the state election laws and the implementation of these laws at the local level. This may include developing a training and certification program for election administrators throughout the state.

In developing this program, the State Board of Elections will work in conjunction with both the County Clerks Association and the Association of Election Commission Officials who can facilitate this type of education and training program for their members. This program should include a framework for providing practical learning experiences in the administration of elections. It must also include requirements of HAVA to ensure uniform implementation throughout the state.

III. Poll Worker Training

The State Board of Elections will establish uniform requirements for poll worker training throughout the state and will oversee the implementation of this training. The local election authority should be responsible for conducting most of the training programs to ensure the unique aspects of the election in each jurisdiction are clearly explained to the poll worker. The compensation for attending election day training should be increased to encourage poll workers to attend this important learning program.

Audio-visual aids will be used for the training program. As part of the training, the program will include a portion on sensitivity for voters with disabilities. In establishing a uniform training program for poll workers, the State Board of Elections will serve as the liaison among all election authorities within the state to ensure participation in the training development and coordination of the information. In implementing this training program, the State Board of Elections will provide a training plan to the local election authority and will assist, where necessary, in the execution of the training. Training manuals will include, but not be limited to, information about the nature of various disabilities, the rights of voters, access to and maneuverability within polling places and the use of machines and ballots.

Section 4. Voting Systems Guidelines and Processes

How the state will adopt voting system guidelines and processes which are consistent with the requirements of section 301.

Illinois adopted procedures in 1978 that allows no voting system to be used in the state unless approved for use by the State Board of Elections in accordance with rules set forth. The requirements for approval are found in the Illinois Election Code, 10 ILCS 5/24A-16 and 24B-16 as well as in State Board of Elections Rules and Regulations, 26 Illinois Administrative Code, Chapter 1, Section 204.10 - 204.180.

Below is a summary of voting systems currently in use in Illinois.

System	# of Election Jurisdictions	Current # of Precincts	In-Precinct Counting
Punch Card	90	4,355	None
PBC 2100 (punch card)	2	5,170	2
Accu-vote Optical Scan	10	1,225	10
Optical Scan M100	3	717	3
Marksense Optech IV-C	3	155	None
Marksense Optech III-PE	2	146	2

Many of the above systems are non-compliant with respect to HAVA. However, with the punch card buyout Illinois will become compliant as well as pursue a voter education program which would permit jurisdictions to maintain central count systems if desirable.

As required in SB428 the State Board of Elections, in evaluating the feasibility of any new voting system, will accept public comment from persons in the disabled community.

Section 5. Illinois HAVA Fund

How the state will establish a fund described in subsection (b) for purposes of administering the State's activities under this part, including information on fund management.

With the passage of SB 428 in the spring 2003 legislative session, the Help Illinois Vote Fund to implement HAVA was established. (The bill is awaiting gubernatorial approval at this writing.) This provides for a special fund within the State Treasury to receive federal funds under the Help America Vote Act of 2002. It authorizes appropriation from the Fund solely to the State Board of Elections for use in accordance with the federal Act. Illinois plans to use interest generated from the Fund to help fund future needs in implementing HAVA.

As part of the SBE's FY04 appropriation, language is included which gives the State Board of Elections spending authority to use the funds in accordance with the Help America Vote Act of 2002.

The SBE Executive Director and Chief Fiscal Officer will work with the State Comptroller and State Treasurer to follow and enforce all mandated fiscal controls and policies.

Section 6. Illinois Proposed HAVA Budget

The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on

(A) the costs of the activities required to be carried out to meet the requirements of title III;

(B) the portion of the requirements payment which will be used to carry out activities to meet such requirements; and

(C) the portion of the requirements payment which will be used to carry out other activities.

It is apparent that the costs of implementing the "Help America Vote Act" will not be fully covered by the monies authorized in the Act. Priorities must be set and basic requirements of the Act must be met. The following chart reflects an assumption of full funding of the monies authorized.

The State Board of Elections and election authorities encourage Congress to fully fund this mandate.

Illinois Budget for HAVA

	Federal Authorization To All States	Federal Appropriation To Illinois	Federal Unfunded	State Match (nothing appropriated to date)
Section 101	$349,182,262	$11,129,030		
Provisional Voting				
Computerized voter registration				
Education & training				
Administrative Complaint Procedure				
Accessible systems and Polling places				
Technology grants				
Section 102	$300,317,738	$33,805,617		
Punch card buyout - $3,192.22 per precinct				

Other	Federal Authorization	Federal Appropriation	Federal Unfunded	
Election Assistance Commission	$10,000,000	$2,000,000	$8,000,000	
Requirements Payments	$1.4 billion	$830,000,000	$1,391,700,000	
Access disability grants	$50,000,000	$13,000,000	$37,000,000	
Technology grants	$20,000,000	$0	$20,000,000	
Pilot Program test grants	$10,000,000	$0	$10,000,000	

Protection & advocacy payments (re: disabled)	$10,000,000	$2,000,000	$8,000,000	
Student & Parent Mock Election	$200,000	$0	$200,000	
Help America Vote College program	$5,000,000	$1,500,000	$3,500,000	
Help America Vote foundation	$5,000,000	$1,500,000	$3,500,000	

Section 7. Maintenance of Effort

How the State, in using the requirements payment, will maintain the expenditures of the state for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.

In FY00, Illinois had an appropriation of $550,000 for the uniform registration formatting project (now called the statewide voter registration system project). This amount has been appropriated in the FY04 budget.

The only other qualifying expenditure was for training manuals. The FY00 appropriation for this was $7,800. Monies in the amount of $9,100 have been requested for the FY 04 budget to maintain this level of expenditure.

Section 8. Performance Goals and Measures

How the state will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.

A review of applicable State Laws and Administrative Codes will be undertaken to determine any changes necessary to accomplish the goals of the Help America Vote Act and to ensure compliance through reporting by Election Authorities. The State Board of Elections will revise any existing reporting procedures to include measures of performance for requirements under the Act.

Requirement	Time frame	Goal	Measures
Punch Card Buyout	Jan 1, 2006 (plan on requesting waiver)	Replace systems in 10,590 eligible precincts	SBE maintains a database of voting systems used by each county, which will be expanded to include critical elements.
Accessible voting machine	Jan 1, 2006	Equipment which allows a blind voter to vote unassisted in each polling place	Criteria for accessibility certification will be developed to track compliance.
Polling place accessibility	Nov 2006	Provide accessible polling places for each precinct	Election Authorities report polling place accessibility to SBE through surveys. Survey will be revised to insure compliance.
Provisional ballot	Jan 2004	Develop procedures for voting and processing ballots Develop system to inform voter of outcome	Provisional ballots must be tracked for the purposes of adding to final canvass and reporting to provisional voter.

Requirement	Time frame	Goal	Measures
Definition of vote	Jan 2004	Provide standards for recount procedures	A means of reporting election contests will be developed.
State-wide voter registration system	Jan 1, 2006 (plan on requesting waiver)	Provide means for uploading voter information from counties to state-wide database	Ratio of counties with equipment and procedures in place to upload information
Grievance procedure	Jan 2006	Provide a means of receiving, reporting and resolving complaints from voters	Track complaints and resolutions through an annual report.
Education and Training	Jan 2004	Provide voter education and enhanced election judges training.	Report voter education through election authority surveys. Election Authorities currently report the # of Election Judges who have tested for each election.

The State Board of Elections will assist election authorities to develop standard reports and procedures to measure critical areas of each requirement: scope, schedule, and resources. Reporting requirements will assist SBE in collecting data to report on performance.

- SCOPE: Measure size of project (# of precincts, registered voters, polling places, etc)
- SCHEDULE: Target start and stop dates, actual start stop dates, periodic review of progress (% completed)
- RESOURCES: Measure personnel and existing resources committed to each project as well as financial resources needed to complete the project.

Section 9. State-Based Administrative Complaint Procedures

A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402.

Section 402 of HAVA requires the State to create a state-based administrative complaint procedure to assure compliance with Title III of HAVA. The offices of the Illinois State Board of Elections through consultation with the Office of the Illinois Attorney General will develop administrative rules that will allow any person who believes there is, has been, or is about to be a violation of Title III of HAVA to file a complaint.

The complaint must be in writing, sworn and notarized. At the complainant's request, there will be a hearing on the record. If the State finds a violation, it will provide an appropriate remedy. If the State determines a violation has not occurred, the complaint will be dismissed and the results will be published. The State will make a final determination on a complaint within 90 days, unless the complainant consents to a longer period for making such a determination.

The 90-day period begins on the date the complaint is filed. If the State cannot meet this 90-day deadline, the complaint will be resolved within 60 days under an alternative dispute resolution procedure. This 60-day period for resolving a complaint under an alternative dispute resolution process begins after the 90-day period expires. The record and other materials from any proceedings conducted under the complaint procedures shall be made available for use under the alternative dispute resolution procedures. All procedures will be administered in a uniform and nondiscriminatory manner.

Section 10. Effect of Title I Payments

If the State received any payment under title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

As of this writing, Illinois has received approximately $44 million, although none is in the special HAVA fund as it has not yet been signed into law.

Title I money (Section 101 – payments to states to improve administration of elections) received will be used will be used to comply with the requirements under Title III including:

1) the completion of a statewide voter registration system as provided in section 303 of the Act;
2) educating voters concerning voting procedures, voting rights, voting technology
3) training of election officials, poll workers and election volunteers
4) preparation of the state plan
5) providing toll free number for election jurisdictions to provide access for provisional voters to determine if their votes were counted or SBE website access for provisional voter to access for determination
6) establishing an administrative complaint procedure to remedy grievances as well as provide for a toll free number for voters to use to report possible voting fraud and voting rights violations
7) improving the accessibility of polling places as well as purchase of accessible voting equipment.

Title I money (Section 102) will be used to replace punch card machines in 10,590 precincts. The punch card buyout task force was assigned to survey the election officials in jurisdictions that used punch card systems for the November 2000 general election. Based on the results the task force found all of these jurisdictions agreed Illinois should participate in the program as established by HAVA. The task force recommends that punch card buyout funds be distributed to each eligible local election jurisdiction based upon the number of precincts in that jurisdiction that used punch cards for the November 2000 election.

It is quite obvious the amount of funding which will be received will not cover the full costs of changing voting systems in each jurisdiction.

Section 11. Illinois State Plan Management

How the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change –

(A) is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;
(B) is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and
(C) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).

Illinois will manage the ongoing plan in the manner described in the State Plan. No material changes will be made to the Plan unless the change is adopted in conformance with language found in Section 254 (a) (11) of the Help America Vote Act 2002.

The Chief Election Official will conduct meetings with the HAVA State Planning Committee and its task forces as necessary to discuss the progress and objectives of the State Plan.

The Chief Election Official will comply with the HAVA deadlines for submitting HAVA state plans in future years.

The Chief Election Official will comply with all state planning requirements for implementing new information technology.

Section 12. Changes to Plan from Previous Fiscal Year

In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year.

This FY 2003 State plan is Illinois' first plan under HAVA. This will be updated in the FY 2004 plan, reflecting changes to the plan as well as a summary of 2003 progress.

Section 13. State Planning Committee

A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the committee under such section and section 256.

Section 255 of HAVA instructs the chief state election official to develop the state plan through a committee of appropriate individuals, including the chief election officials of the two most populous jurisdictions, other election officials, stakeholders (such as representatives of groups of individuals with disabilities) and other citizens.

Pursuant to section 255, the Executive Director of the State Board of Elections selected the committee members based upon a broad spectrum. The Committee held its first meeting March 3, 2003 in Springfield, Illinois. The committee broke into eight task force groups as follows: 1) education and training programs, 2) performance goals and measures, 3) requirements money, 4) administrative complaint procedure, 5) punch card buyout, 6) access for voters with disabilities, 7) what constitutes a vote, and 8) federal funding. At the first meeting, a chairman was assigned to each committee, along with a SBE staff contact person. The task force groups met either in person or by conference call and corresponded amongst themselves. All materials distributed at the first meeting were placed on the SBE website in accessible text files. Draft reports were due May 15 which were then distributed to the full committee for review and response. After receiving comments from the committee by June 6, a full draft report was prepared and presented to the eight member Board for approval on July 1. The draft State plan was available on the Board's website and published for public comment for 30 days. The amended state plan will be submitted to the Board on August 18 for final approval and then eventual submission to the Election Assistance Commission for posting in the Federal Register. The full committee may meet again as necessary.

Daniel W. White, Executive Director, Illinois State Board of Elections,
Ronald D. Michaelson, Chairman of the State Planning Committee

Members of the State Planning Committee are:

Matt Abrahamson, Dept. of Rehabilitation Services
Paul Anderson, Kendall County Clerk
Steve Bean, Macon County Clerk
Tom Benzinger, Access Living
Derek Blaida, City of Chicago
Bill Blessman, Mason County Clerk
Bernice Bloom, Citizen
Tonia Bogener, Office of the Attorney General
Hollister Bundy & Pat Hughes, Inclusion Solutions, Inc.
Alison Burnett, Office of Republican House Leader
Ray Campbell, Illinois Council of the Blind

Cynthia Canary, Illinois Campaign for Political Reform
David Carlin, Illinois Republican Party
Rance Carpenter, Department of Aging
Bruce Clark, Kankakee County Clerk
Linda Crotchett, Jersey County Clerk
Dan Curry, Office of U.S. Senator Peter Fitzgerald
Lisa Danna, Office of the Attorney General
Honorable Vince Demuzio, State Senator
Gwen Gillenwater, Coalition of Citizens with Disabilities in Illinois
Laurie Dittman, Chicago Mayor's Office for People with Disabilities
Bill Dunn, Citizen
Dave Eldridge, Office of the House Speaker Michael Madigan
Krista Erickson, Lake County Center for Independent Living
Veronica Ford, Citizen
Alan Gitelson, Professor of Political Science, Loyola University - Chicago
Lance Gough, Chicago Board of Election Commissioners
Debbie Grant, Springfield Branch NAACP
Barb Gross, Morgan County Clerk
Harvey Grossman, ACLU
Steve Handschu, National Federation of the Blind of Illinois
Tom Hanson, Mercer County Clerk
Carol Anne Harwell, NAACP
Jan Holcomb, Mental Health Assoc. IL
Sharon Holmes, DeKalb County Clerk
Jo Holzer, Council for Disability Rights
Bill Houlihan, Office of Senator Richard Durbin
Roger Huebner, General Counsel, IL Municipal League
Becky Huntley, Ogle County Clerk
John Jackson, Public Policy Institute, Southern Illinois University - Carbondale
Robin Jones, Great Lakes DPTAC
Connie Kaplan, Chicago Board of Election Commissioners
Jan Kralovec, Office of Cook County Clerk
James Lewis, East St. Louis Board of Election Commissioners
Barb Lippai, League of Women Voters
Bill Looby, AFL/CIO
Bill Luking, Attorney
Rene Luna, Access Living
Todd Maisch, IL Chamber of Commerce
Peggy Ann Milton, McLean County Clerk
Saul Morse, Illinois State Medical Society
Peg Mosgers, Office of Senate Republican Leader Frank Watson
Zena Naiditch, Equip for Equality, Inc.
Doreen Nelson, DuPage County Election Commission
Sara Nelson, Office of U.S. Senator Richard Durbin
David Orr, Cook County Clerk
Pat Plotner, former employee of the State Board of Elections
Gail Poundstone, Illinois Coalition on Aging

Kent Redfield, Department of Political Science, University of Illinois - Springfield
Larry Reinhardt, Jackson County Clerk
Randy Reitz, Bond County Clerk
Hugo Rojas, Illinois Executive Director & Midwest Program Rep., Common Cause
Cynthia Rossman, Office of Republican House Leader Representative Tom Cross
Steve Rotello, Office of the Attorney General
Bob Saar, Executive Director, DuPage County Election Commission
Mary Ann Scanlan, Office of the Secretary of State
Kathie Schultz, McHenry County Clerk
Yvonne Smith, former employee of the State Board of Elections
Nancy Strain, Executive Director, Rockford Board of Election Commissioners
Jim Tobin, National Taxpayers United of IL
Jeff Trigg, Executive Director - Libertarian Party of Illinois
Rob Uhe, Illinois Democrat Party
Maria Valdez, MALDEF
Mark Von Nida, Madison County Clerk
Karen Ward, Equip for Equality
Ralph Yaniz, American Association of Retired Persons
Karen Zaiz, IL Network of Centers for Independent Living
Al Zimmer, former State Board of Elections employee
Jill Zwick, Office of Secretary of State

Conclusion

We want to thank all parties for their input and comments regarding the Illinois State Plan. All comments were reviewed and the plan was revised accordingly.

There were many comments received regarding cumulative voting and instant runoff capability for voting systems. At this time, Illinois has no current statutory language to require this in our certification process. We have indicated that staff will include on the application for certification a yes/no question for the vendor to indicate if the system has the capability for cumulative voting and instant runoff. Should legislation be passed that would require either, the vendors will be required to revise their equipment.

Many comments were received regarding the education of poll workers as well as the voting public. The State Board of Elections will include language in its training manuals on the education of both. Once SB 428 is signed, the SBE and all election authorities will be required to include a downloadable voter registration form on their websites. The State Board of Elections will continue to enhance its mock election program which is also a requirement in HB 30, the voting by minors act. Illinois will also encourage college students to participate in the election process.

At this time legislation has already been presented to Congress to amend the HAVA language. Obviously this state plan is a work in progress and is not inflexible. It will be ever-changing and updated at least yearly or as often as necessary.

The Indiana State Plan to Implement th Help America Vote Act of 2002

A Blueprint for Indiana Elections

Todd Rokita
Indiana Secretary of State

"With this blueprint for Indiana's elections we have set in motion the most comprehensive voting reforms in our state since the Voting Rights Act of 1965. With state of the art voting systems, a statewide voter registration system, and creative solutions like provisional balloting, Indiana will be well positioned to administer all elections as fairly and efficiently as possible to preserve the rights of all Hoosiers and help ensure that every legitimate vote is counted accurately."

Dear Indiana citizens:

The Help America Vote Act of 2002 (HAVA) is the most significant federal voting reform measure since the Voting Rights Act of 1965. In Indiana, we have already been working over the last year and a half on many of the reforms now required by HAVA.

In February of 2003, I convened the Vote Indiana Team, a diverse group of 28 Hoosiers, to help create the blueprint for our elections for the next five years and beyond. The Vote Indiana Team members come from across the state and represent three political parties, the state legislature, minority groups, military voters, people with disabilities, county election and voter registration officials, and the media.

The Vote Indiana Team met over a six-month period as a full group and in smaller working groups to address specific issues and draft a comprehensive election reform plan for Indiana that implements the requirements of HAVA. After five meetings of the Vote Indiana Team as a whole and twenty-four singularly focused sub-group meetings, the Indiana State Plan is now available to you and all Hoosiers.

As voters, the changes you'll see at the polls over the next few years will be significant. Indiana will be replacing punch card and lever machine voting systems still in use in 32 counties. An accessible voting machine will be placed in every voting location in Indiana. The creation of a statewide voter registration database will allow election officials in every county to communicate with each other, as well as with officials from the Indiana Bureau of Motor Vehicles and the Departments of Health and Correction. The statewide voter registration system will ensure that every voter is registered at the proper location and only the proper location.

These improvements, along with advances in technology, will help ensure the voting rights of all Hoosiers are protected and will position Indiana as a nationwide model for election success and reliability.

None of these changes would be possible without the cooperation, coordination and continued hard work of Indiana's county clerks, election board members, and voter registration officials. I also want to thank the Vote Indiana Team for their generous time and effort in putting forth these recommendations.

I look forward to continuing to serve you as Indiana's chief election official and as Secretary of State. I am committed to making sure that Indiana's elections are efficient, accurate and fair.

Yours truly,

Todd Rokita
Indiana Secretary of State

Executive Summary

Indiana has a population of 6,100,000 (2002 estimate), with a voting age population of 4,448,000 (2000 estimate used for purposes of HAVA). Of this population, 4,008,636 were registered to vote as of the November 2002 general election.

Election Administration in Indiana

The Secretary of State serves as Indiana's chief election official. The Indiana Election Division (IED) is established within the Office of the Secretary of State. The Governor appoints the IED's two co-directors from lists of two or more persons submitted by the state's Democratic and Republican parties. The IED assists the Secretary of State and the Indiana Election Commission (IEC) with the administration of elections. Indiana's local government includes election administration and voter registration offices in each of the state's 92 counties. Each county is divided into election precincts, with a total of 5,602 precincts in Indiana. All 92 counties have a circuit court clerk elected by the voters and a county election board, which includes the circuit court clerk, to administer local elections.

In 2000, the Bipartisan Task Force on Election Integrity was convened by Secretary of State Sue Anne Gilroy and Governor Frank O'Bannon. The Task Force was charged with examining the election process in Indiana to ensure that elections were accurate, accessible and secure. After months of study, this bipartisan group reached consensus on several improvements to the election process; much of the work of the task force took the form of recommendations to the Indiana General Assembly. Many of these recommendations were adopted, including provisional balloting, the establishment of a statewide voter registration system, and the phase out of punch card voting systems. Some of these initiatives were sidelined when appropriations were cut.

With the enactment of the Help America Vote Act of 2002 (HAVA) and the promise of federal funding to implement its requirements, Indiana's election reform efforts were revitalized. Secretary of State Todd Rokita convened the Vote Indiana Team in February 2003 to move forward with Indiana's election reforms. The Vote Indiana Team consists of 28 Hoosier voters representing a wide variety of ethnic, geographic and tri-partisan political backgrounds. Members met as a whole and in subgroups to address particular subject areas. At all times, meetings were open to the public and time was set aside for public comment. Furthermore, a 30-day public comment period began June 3, 2003, and ran through July 3, 2003, in accordance with HAVA requirements. The State Plan, all meeting notes, and other Team information can be found at www.sos.IN.gov, under "Vote Indiana Team Information." Please see Section 13 (page 52) of the State Plan to review simple procedures used for registering public comment.

HAVA requires the submission of a state plan detailing how HAVA requirements will be met and how HAVA monies will be utilized. This Executive Summary outlines the major initiatives of the Team and the plan for distributing the associated funding.

Voting Systems

A new Quantity Purchase Agreement (QPA) will be issued. All Indiana certified voting system vendors will be eligible to enter into the QPA. HAVA requires each county to acquire one voting system with accessible equipment per polling place. Punch card and lever machines will be replaced. Funding will be distributed as a reimbursement to counties for the costs incurred in purchasing a voting system. Eligibility for reimbursement will be determined after review of an application to the Indiana Election Division, certification of polling place accessibility, and cooperation with a local advisory council to choose accessible polling places. The current funding formula described in the Plan is based on estimates of funding outlined in HAVA. The formula could change as the result of actual funding appropriated by Congress over the next several years. Please refer to Sections 1 (A) and 6 (A) of the State Plan for further information.

Statewide Voter Registration System

A consultant and statewide steering committee will assist the Secretary of State and Indiana Election Division in the development and implementation of a statewide voter registration system. A Request For Proposal (RFP) will be issued for the selection of a vendor to create the system. The steering committee will help guide the creation and implementation of the system. The committee will be comprised of Team members and representatives from the clerks' and voter registration officials' associations. The system will also interact with computer systems of the Bureau of Motor Vehicles, Indiana State Department of Health and Department of Correction. Please refer to Sections 1 (B), Section 6 (B), and Section 8 (1) of the State Plan for further information.

Training and Education

Training will be geared toward election officials and pollworkers. Voter educational opportunities will also be created. Please see Section 1 (F), Section 3, Section 6 (C), Section 8 (2 a,b,c), and Section 10 of the State Plan for further information.

Statewide Grievance Procedure

A statewide grievance procedure will be established to handle complaints that may involve voting system and polling place accessibility, allegations of fraud, and other voting or registration processes. Please see Section 1 (E), Section 6 (E), Section 8 (3), and Section 9 of the State Plan for further information.

Provisional Balloting

Provisional balloting will be available as a safety net for the voter who may have erroneously been removed from the voter list and to guard against fraudulent voting practices. A free access system will be available for a provisional voter to check the status of the provisional ballot (e.g. find out whether the ballot was counted). Please see Section 1 (D), Section 6 (D), and Section 8 (4) of the State Plan for further information.

Accessibility

A comprehensive polling place accessibility study will be undertaken to guide local jurisdictions in making improvements. The Secretary of State will apply for funding to help counties improve the accessibility of particular polling places. A voter will be able to cast a ballot privately and independently. Please see Section 4, Section 6 (HHS grants and F), Section 8 (5), and Section 10 of the State Plan for further information.

In summary, the efforts of the Vote Indiana Team and the dedication of Indiana's election officials will produce positive changes and set the course for Indiana's election reform efforts for years to come.

Indiana State Plan Introduction

What is HAVA?

In 2002 Congress passed the Help America Vote of 2002 which President George W. Bush signed into law on October 29, 2002. The Help America Vote Act embraces the goals of election reform by expecting all levels of government to provide a democratic process that does the following:

- maintains an accurate list of citizens who are qualified to vote;
- encourages every eligible voter to participate effectively;
- uses equipment that reliably clarifies and registers the voter's choice;
- conducts elections in a foreseeable and fair way;
- operates with equal effectiveness for every citizen and every community; and
- reflects limited but responsible federal participation.

What are the State's responsibilities under HAVA and purpose of a state plan?

States who want to receive HAVA requirements funding must submit a self certified state plan outlining specific provisions set forth in the following section. The Secretary of State as Indiana's chief election official shall develop the plan through a committee (Vote Indiana Team) consisting of chief election officials from Indiana's two most populous counties, other local election officials, key stakeholders (including members of the community with disabilities), and other citizens. The preliminary state plan must be available for public inspection and comment for thirty (30) days before submission to the Election Assistance Commission. The Vote Indiana Team shall take into account the public comments before submitting the final plan. The Vote Indiana Team met July 18, 2003 to take into account public comment received to date and to recommend the final plan for submission.

How is this document organized?

The State Plan's overview is contained in the Executive Summary. The Executive Summary briefly describes major initiatives contained in the State Plan and refers to the appropriate section in the plan document for further information. HAVA requires the state plan to address the thirteen (13) provisions listed below. A Glossary of Terms and Acronyms is included to define or reference frequently used terminology or acronyms. Appendix 1, Indiana Election Reform History, describes Indiana's election reform efforts beginning prior to statehood through today. Appendix 2 explains the Hoosier Equipment Lease Purchase (HELP) Program. A Table of Contents is also attached to guide the reader through this document.

- How Indiana will use these federal funds to comply with HAVA's requirements concerning voting systems, the statewide voter registration system, and provisional voting.

- How Indiana will distribute (and monitor the distribution of) federal finds to local governments and other fund recipients, including the criteria to determine eligibility and to monitor performance.
- How Indiana will provide voter education, election official, and poll worker training programs.
- How Indiana will adopt voting system standards consistent with HAVA.
- How Indiana will establish a fund for administering these federal payments and how the Indiana fund will be managed.
- Indiana's proposed budget to carry out the activities required to receive these federal funds.
- How Indiana, in using these federal funds, will maintain a level of state expenditures at least equal to Indiana's expenditures for these activities during the July 1, 1999 – June 30, 2000 fiscal year.
- How Indiana will adopt performance measures to determine the success of state and local government in carrying out the plan, including timetables, a description of the criteria to measure performance, and which official is responsible for meeting the requirements.
- A description of the required "uniform nondiscriminatory State grievance procedure" for HAVA-related complaints.
- If Indiana received additional federal money from another source, how this money will be used to carry out activities under the State Plan.
- How Indiana will conduct ongoing management of the HAVA State Plan.
- How the State Plan reflects changes from the State Plan for previous fiscal years.
- A description of the State Plan Committee and the procedures used by the Committee to develop the Plan.

How did we receive Public Comment?

Section 13 of the State Plan describes in detail the make up of the Vote Indiana Team and its work to date. Further information about the work of the Team may be found at www.sos.IN.gov. Public comment was submitted to the chair of the Vote Indiana Team in writing to the following address: Todd Rokita, Indiana Secretary of State, 200 West Washington Street, Room 201, Indianapolis, Indiana 46204, and was emailed to VoteIndianaTeam@sos.state.in.us. Public comment on the preliminary state plan was also left at 317-234-VOTE or at the Indiana Election Division toll free in Indiana at 800-622-4941(TDD). Comments were also faxed to 317-233-3283. The Team also received public comment at the annual Clerks' Conference and the Indiana Voter Registration Association meeting.

This Plan is available in accessible formats upon request. Please call 234-VOTE or email havaadministrator@sos.state.in.us for further information.

GLOSSARY OF TERMS AND ACRONYMS

"Certification of accessibility of polling place" Part of the application process by a county to receive state money to reimburse the county for purchasing voting equipment. The certification will state that the polling places selected by the county permit voters with disabilities to cast their ballots in the polling place with the same access and privacy provided to other voters.

"Free access system" A toll-free telephone number, an Internet web site, or other method that permits a voter who casts a provisional ballot to learn whether or not the voter's ballot was counted, and if not, the reasons why the provisional ballot was not counted.

"HAVA" The Help America Vote Act of 2002 (Public Law 107-252). A federal law passed by Congress and signed by President Bush on October 29, 2002. Each state will be passing its own laws as needed to implement HAVA in that state.

"Maintenance of Effort" A requirement under the HAVA law that when a state uses "Title III requirement monies," the state pledges to keep spending in the future the same amount of money that the state had spent during 1999 and 2000 for the programs for which the state is using the "Title III requirement monies."

"National Voter Registration Act of 1993" A federal law which enacts requirements concerning voter registration for federal elections.

"Poll worker" Paid position at polling place on Election Day to assist in operating the election.

"Provisional Ballot" A ballot cast by an individual when it is not clear whether the individual is entitled to vote in a precinct. The provisional ballot is kept separate from the other ballots cast by voters in the precinct. After election day, the county election board decides whether the individual is entitled to vote and whether the individual's provisional ballot should be counted or rejected.

"Provisional Ballot Status" The decision made by the county election board whether to count a provisional ballot, and if not, the reasons for rejecting the ballot.

"Purchase" When discussed in the context of voting system, includes lease and lease-purchase agreements, as specified by Indiana Code 3-11-6.5."

"Off election year" The year in each four year election cycle in Indiana in which no regularly scheduled elections are held at either the state or local level. The off-election year occurred in 1997 and 2001 and will occur in 2005.

"Qualifying precinct" Defined in HAVA as a precinct where a punch card or lever machine voting system was used in the November 2000 election.

"Section 101 monies" Money made available from the federal government to state governments under HAVA to improve the manner in which elections are administered in the state.

"Section 102 monies" Money made available from the federal government to state governments under HAVA specifically to replace lever voting machines or punch card voting systems with newer types of voting systems. This money can also be used to reimburse local governments who have already purchased replacement voting systems since November 2000.

"Title III requirement monies" Money made available from the federal government to state governments under HAVA to help state and local governments comply with some of the requirements imposed under the HAVA law. These requirements include a statewide voter registration system, making voting equipment upgrades, and voting by provisional ballot.

"The Team" (Vote Indiana Team) The committee established under HAVA to develop the State Plan.

"Video streaming" Video available on the internet.

"SVF"- Statewide Voter Registration System

"VIT" – Vote Indiana Team

Indiana State Plan

This Plan is available in accessible formats upon request. Please call 234-VOTE or email havaadministrator@sos.state.in.us for further information.

Section 1

Sec. 254 (a) IN GENERAL – The State plan shall contain a description of each of the following:

(1) How the state will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251 (a)(2), to carry out other activities to improve the administration of elections.

Congress passed the Help America Vote Act of 2002 (HAVA) to provide election reform across the nation and bring uniformity to state elections. Title III of HAVA requires Indiana to do the following:

- Provide accessible machines in every polling place.
- Adopt uniform and nondiscriminatory standards that define what constitutes a vote.
- Provide voting systems that meet enhanced standards, including allowing the voter to verify the vote before the ballot is cast, permitting the voter to change or correct the ballot before it is cast, and notifying a voter of an overvote or establishing a voter education program specific to that voting system that notifies voters of the effects of overvoting.
- Allow individuals to cast provisional ballots and provide a free access system to inform a provisional voter whether the vote was counted, and if not counted, the reason why.
- Implement in a uniform and nondiscriminatory manner a single, interactive, computerized statewide voter registration system that contains the name and registration information of every legally registered voter in the State and assigns a unique identifier to each.
- Require certain first time "mail in" registrants to provide identification.
- Implement a uniform and nondiscriminatory HAVA grievance procedure.

Prior to the passage of HAVA, Indiana had already laid the groundwork for election reform in the state. Public Law 209-2003 (SEA 268), Public Law 116-2003 (SEA 477) and Public Law 224-2003 (HEA 1001) provide for the implementation of HAVA in Indiana. With the state's initial framework and the passage of recent legislation, Indiana is on track to comply with all of the provisions of HAVA.

One example of Indiana's work to lead the nation in election reform is the Indiana Voter's Bill of Rights. Working from language prepared by the Secretary of State's Election Division, the Indiana Election Commission unanimously approved the text of the Voter's Bill of Rights in March 2003. It is a plain language document about accessibility and accountability; accessibility for legally registered voters and accountability for those who would act to defraud election administrators and in turn other voters. Posters of the Voter's Bill of Rights were printed in both English and Spanish. The Secretary of State's office provided Voter's Bill of Rights posters to every county for display in polling places on Primary Election Day, May 6, 2003 and intends to

keep the Voter's Bill of Rights as a permanent fixture in Indiana polling places and posted to the Secretary of State's website www.sos.IN.gov.

Currently, it is estimated that Indiana will receive $40.4 million in Title III funds (Budget estimates set forth in section 6), and the Secretary of State and the Indiana Election Division intend to use the requirements funding for the following endeavors:

A. Voting Systems

History of Voting Systems Upgrade Programs before HAVA

In 2001, the Indiana General Assembly enacted legislation to provide for the gradual elimination of punch card voting systems over several years. The legislature also appropriated $4 million dollars to fund the replacement of the punch card systems.

However, this 2001 Indiana legislation had some significant limits:

First, this state money was never available to reimburse counties who had purchased voting systems between January 1, 1998 and July 1, 2001. Instead, state law specified that only money received from the federal government could be used for this purpose.

Second, the $4 million in state money was not appropriated to the new "voting system improvement fund". Instead, this appropriation was made from the Build Indiana Fund. The effect of this distinction became clear in 2002, when the state through an executive order diverted all Build Indiana Fund monies to deal with the state's growing budget deficit.

As of mid-2002, there was no state or federal money available for counties to receive any reimbursement at all for their voting system purchases. Then, in October 2002, the Help America Vote Act was finally passed and sent to the President.

HAVA, and the Indiana legislation enacted in 2003 to implement it, expanded the scope of the voting system upgrades required in Indiana: both lever and punch card must be phased out by December 31, 2005; all counties must also acquire voting systems to enable blind voters and voters with other disabilities to vote without assistance in each polling place.

HAVA (and the 2003 federal budget bill) also provide for limited voting system reimbursement to be passed on to counties. Under these federal laws, a total of more than $9 million will be available to reimburse Indiana counties for voting system upgrades if these counties were using lever or punch card systems at the November 2000 election.

In addition, once the State Plan becomes final, Indiana will qualify to receive an estimated $30 million in additional federal funds over the next two federal fiscal years that can be used to assist with county voting system reimbursements.

In Indiana, even before HAVA passed, the Election Division acted to encourage all counties to submit applications for voting system reimbursement under the 2001 Indiana law. The Election Division advised clerks that while Congress and the state legislature were considering new laws that could change the amount and eligibility requirements for reimbursement, the county should act now to indicate its interest and to protect its eligibility. Some 72 of 92 counties followed that advice, and filed applications by the January 2003 deadline under state law.

In its 2003 session, the General Assembly passed a comprehensive bill to begin implementing HAVA in Indiana (Senate Enrolled Act 268). This new legislation actually gave an option to expand the availability of voting system reimbursement to counties that purchased a new voting system or upgrade between January 1998 and July 2001. However, Indiana law is still subject to the limits placed on its use of the federal money by HAVA.

In 2002, Indiana issued a Quantity Purchase Agreement (QPA) with four voting systems vendors whose optical scan or direct record electronic (DRE) voting systems were previously certified by the Indiana Election Commission. Replacement of punch card and lever machines used in November 2000 by more than half of Indiana's voters (in a total of 2983 precincts) is already under way. To help reduce the costs of any particular system, the Indiana Department of Administration (IDOA) will issue another QPA to facilitate the replacement of the remaining punch card and lever machines and the implementation of one accessible DRE per polling place. All certified voting system vendors will be eligible to enter into the QPA with IDOA. The Team recommends each QPA contain provisions permitting volume discounts for voting system purchases and multi-county purchasing arrangements through intergovernmental agreements or other methods permitted by state law. The team also recommends that the two following specifications be added to the QPA: (1) A vendor can only enter into the QPA if the vendor agrees not to charge a county interest during the period in which the county is waiting for reimbursement from the state, and (2) the vendor shall share the system's training video with the state. The team urges that the procurement process for voting systems adhere to minority business enterprises and women owned business enterprises requirements.

No later than January 1, 2006, assuming a waiver is granted, (Under HAVA, each state shall replace all punch card voting systems or lever voting systems by January 1, 2004 unless a waiver is granted and the State ensures that all punch card voting systems and lever voting systems will be replaced in time for the first election for Federal office held after January 1, 2006. Public Law 209-2003 prohibits the use of lever machines and punch card systems in Indiana elections after December 31, 2005. Like most states, Indiana will seek a waiver see section 6, page 25.) all punch card and lever voting systems will be replaced.

Under the system set up by P.L. 209-2003, funds would be released in the following manner: each county seeking reimbursement applies to the Indiana Election Division, an agency of the executive branch. The Secretary of State and Indiana Election Division personnel review the applications and certifications regarding polling place accessibility. The Secretary of State and Indiana Election Division recommend disbursement of funds to the Budget Committee, a bipartisan body consisting of state legislators and the state budget director. The Budget Committee is statutorily required to review these recommendations. Disbursements will be

made to the counties on the approval of the State Budget Agency, an executive branch agency, after review by the Budget Committee and subject to fund availability.

The elimination of punch card and lever machines, along with the implementation of accessible machines, will require the use of Sections 101, 102, Title III, and state matching funds.

B. Statewide Voter Registration System

No later than January 1, 2006, assuming a waiver is granted, (under HAVA, each state shall be required to comply with the statewide voter file requirement by January 1, 2004 unless a State certifies to the Commission that the State will not meet the deadline for good cause; the HAVA reference then becomes January 1, 2006. Like most states, Indiana will seek a waiver see section 6, page 36.) the Indiana statewide voter registration system will be online in all 92 Indiana counties; this will allow the creation and maintenance of a more accurate list of persons legally authorized to vote in Indiana. In addition to using the system for voter registration, Indiana plans to use this single, centrally administered system to assist the Secretary of State in providing all Indiana voters access to a free web-based or phone-based information system that indicates where a voter's polling place is located and confirms a voter's registration record.

A consultant and steering committee, consisting of members of the Team and representatives from the clerks' and voter registration officials' association, will assist in the implementation of the statewide voter registration system. An RFP will be issued for the consultant and the vendor. The team urges that the procurement process for the consultant and the statewide voting registration system adhere to minority business enterprises and women owned business enterprises requirements.

The continuous maintenance of the statewide voter registration system will require a well coordinated interaction between county officials and state officials. Each county voter registration office, the Indiana Election Division, and the Secretary of State will have immediate electronic access to the information contained in the computerized list. The county voter registration office may change only data related to the voters registered in that respective county. Furthermore, the county voter registration office must electronically enter all voter registration information obtained by the county voter registration office into the computerized list on an expedited basis. The county voter registration office shall perform list maintenance with respect to the computerized list on a regular basis. The Indiana Election Division shall coordinate the computerized list with the Indiana Department of Correction records so the county voter registration office can cancel the registration records of disfranchised individuals on an expedited basis. The Indiana Election Division shall also coordinate the computerized list with the Indiana State Department of Health so the county voter registration office can cancel the registration records of deceased individuals on an expedited basis.

The Secretary of State, the Co-Directors of the Indiana Election Division, and the Bureau of Motor Vehicles Commission shall enter into an agreement to match information in the computerized list database with information in the database of the Bureau of Motor Vehicles Commission to enable the Indiana Election Division and the commission to verify the accuracy of the information provided on voter registration applications. This link will also serve as the access point for the Indiana Election Division to obtain and verify certain information from the

Social Security Administration in accordance with HAVA. Indiana statute defines a unique identifier which will be assigned to each individual by the Indiana Election Division; this will assist in maintaining the accuracy of the statewide voter registration system.

C. First-time Mail-in Registrant Requirements

HAVA requires certain first-time mail-in registrants to provide identification. The type of identification that shall be provided includes the following: (1) a current and valid photo identification, or (2) a current utility bill, bank statement, government check, paycheck, or government document that shows the name and address of the voter.

Exceptions: Voters exempt from these requirements include those entitled to vote by absentee ballot or other than in person under the Uniformed and Overseas Citizens Absentee Voting Act and the Voting Accessibility for the Elderly and Handicapped Act.

County voter registration offices are required by Public Law 209-2003 to identify the first-time mail-in registrants required to provide this additional documentation, and to mail a notice to these voters no later than March 1, 2004 requesting a copy of these documents. As a result, the county voter registration offices hope to secure the required documentation from as many of these voters as possible before the May 2004 primary.

D. Provisional Balloting

A free access system will be established upon the completion of the statewide voter registration system to provide a voter information as to whether a provisional ballot was counted; if the ballot was not counted, information as to the reason will be available. In the meantime, county election boards will make this information available to any voter upon inquiry by the voter. The county election boards shall maintain reasonable procedures to protect the security, confidentiality and personal information relating to a provisional voter.

E. Statewide Grievance Procedure

Indiana recently passed legislation to establish a statewide grievance procedure to comply with the HAVA requirement that a state based administrative complaint procedure be in place. Title III funds will be used to establish this process which is explained in detail in section 9 (page 49) of this plan.

F. Training and Education

The Secretary of State, through the Indiana Election Division, intends to expand upon the current training and educational opportunities for poll workers and voters, which are explained in detail in Section 3 (page 17) of this plan.

An election official and poll worker certification process will be developed and administered by the IED of the Secretary of State's office to more effectively train local election officials and poll workers; special focus will be on HAVA's requirements of accessible voting systems and polling places, provisional ballots and documentation for first-time mail-in registrants.

Section 2

Sec. 254 (a) IN GENERAL – The State plan shall contain a description of each of the following:

(2) How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of –

(a) The criteria to be used to determine the eligibility of such units or entities for receiving the payment; and

(b) The methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measure adopted under paragraph (8)

The performance measures outlined in Section 8 (page 41) of this document will be used to gauge participation and effectiveness of distributions. Performance measures will be monitored semi-annually by the Indiana Election Division upon the completion and submission of election reports by the county as required by the law. The Indiana Election Division will provide a report to each Vote Indiana Team member summarizing progress under the performance measures.

A. Voting Systems

The Indiana Department of Administration will issue a new Quantity Purchase Agreement (QPA) for voting system purchases in order to provide counties with the greatest number of options for voting system purchases and greatest amount of information to use in evaluating voting systems. HAVA funds will be placed in the Election Administration Assistance Fund. Funds will be distributed based on availability and by the priorities set by the Vote Indiana Team and any pertinent statutory requirements. All distributions are subject to federal and state audit standards.

Under the system set up by P.L. 209-2003, funds would be released in the following manner: each county seeking reimbursement applies to the Indiana Election Division, an agency of the executive branch. The Secretary of State and Indiana Election Division personnel review the applications and certifications regarding polling place accessibility. The Secretary of State and Indiana Election Division recommend disbursement of funds to the Budget Committee, a bipartisan body consisting of state legislators and the state budget director. The Budget Committee is statutorily required to review these recommendations. Disbursements will be made to the counties on the approval of the State Budget Agency, an executive branch agency, after review by the Budget Committee and subject to fund availability.

Under a memorandum of understanding or grant provision, failure to comply with any portion of Title III may result in the county being liable for all previously disbursed funds to that county from the state fund.

B. Statewide Voter Registration System

The development, conversion, and ongoing maintenance of each county's data in the statewide voter registration system will be defined in a memorandum of understanding. Data will be collected through specialized reports containing information developed by the Indiana Election Division to ensure the county's participation in the overall success of the statewide voter registration system. The continuous maintenance of the statewide voter registration system will require a well coordinated interaction between county officials and state officials.

Section 3

Sec. 254 (a) IN GENERAL – The State plan shall contain a description of each of the following:

(3) How the state will provide programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III.

The Indiana Election Division will provide traditional and alternative training tools to local election officials for topics such as poll worker training and voter training regarding voting equipment. The Indiana Election Division will enlist active input from and work with disability advocacy groups in designing poll worker training. The Indiana Election Division will provide continuing education annually for local county election boards, clerks of the circuit court, and voter registration officials; sessions will include information about HAVA's requirements.

Frequently scheduled and regionally located training sites will be used for local registration officials so they will be able to use the statewide voter registration system to its fullest potential. The system will also contain an online help query.

The training efforts proposed by this plan are designed to meet three goals.

1. There will be various methods of training available in order to effectively train poll workers so they are aware of voters' rights, sensitive to voters' needs, and proficient in their jobs; special emphasis will be placed on provisional ballots, voters with disabilities and voter identification needs. This training will include the following:

- video streaming of poll worker training (internet access to training videos)
- agreements with local government television stations to air poll worker training
- a master video on poll worker training for use by county election officials
- training for provisional ballot counters
- written materials and web information on Voter's Bill of Rights, provisional ballots and overvoting
- a "teach the teacher" certification program for individuals who provide instruction on voting machine usage
- products that include interaction with voters with disabilities (physical, sensory and cognitive impairments)

2. There will be on going training of full service voter registration agency employees and county election administrators so each understands the needs of voters with disabilities, voters who do not speak English, media, political party officials and campaign workers. This training will include the following:

- production of written materials and online information
- coordination with local advocacy groups to develop and target delivery of materials
- development of videos (and internet access to these videos)
- production of a video for county commissioners and others charged with selecting polling places

3. There will be efforts to increase voter participation by providing information about the voting process to better educate voters. Included will be information about voting systems, voter rights, accessibility and military/overseas voting. This will include the following:

- development of agreements with local government and public television stations to air voter instructions on use of voting equipment and information about voter rights
- production of a master video on voter education
- arrangement for display of voting equipment in malls and local library systems
- Development/Production of Public Service Announcements and NCAS
- Production of written materials and web information on Voter's Bill of Rights, provisional ballots and overvoting
- Publication of Military/Overseas voter guide with a focus on absentee balloting process including additional information on military/overseas voting on Indiana Election Division website

In the spirit of fully informing local government officials who must carry out activities required under HAVA, the Team fully supports the idea of conducting HAVA workshops targeted to Indiana's local government officials. It is expected that these opportunities may occur during the annual meetings of the Association of Indiana Counties and Indiana Association of Cities and Towns.

The proposed budget set forth in section 6, sets aside $3.9 million to pay for voter education, election official education and training, and poll worker training. The plan calls for $1.4 million of the $3.9 million to be set aside for voter education. The Secretary of State and Indiana Election Division will prepare a training and voter education budget to provide the Vote Indiana Team. However, the Team recognizes that significant training and voter education efforts must occur to prepare for the 2004 election and must proceed before the completion of a final budget under this section.

Section 4

Section 254 (a) IN GENERAL – The state plan shall contain a description of each of the following:

***(4)* How the state will adopt voting system guidelines and processes which are consistent with the requirements of Title III.**

Indiana Code 3-11-15-13.3 sets forth voting systems guidelines and processes consistent with the Voting Systems Standards set forth in HAVA. A voting system certification expires five years after the date of approval of the system by the Commission.

- Under Indiana law, the Indiana Election Commission must approve any model of voting system before it may be used in an election. Indiana law now requires that a voting system shall meet the Voting Standards adopted by the Federal Election Commission on April 30, 2002 in order to be approved by the Commission for use in Indiana.
- Under Indiana law, the Commission may not approve a voting system for use in Indiana unless the system meets the specifications in the Indiana Code. The specifications include ensuring secrecy and, in the case of a direct recording electronic voting system, preventing a voter from voting for the same candidate or for or against the same public question more than once. In cases where an optical scan ballot card system is used with a precinct tabulator, voters are alerted by the system to any overvote and provided with an opportunity to correct any overvote error. Where paper ballots or optical scan ballot card voting systems without precinct tabulators are used or absentee ballots are mailed out, Indiana law now requires a voter education program to inform voters using these systems of the effect of overvoting.
- Current Indiana law establishes uniform and nondiscriminatory standards to define what constitutes a vote on a paper ballot, optical scan voting system and electronic voting system. As referenced in the landmark United States Supreme Court decision in *Bush v. Gore*, 531 U.S. 98 (2000), Indiana statutes set forth very specific standards for determining what constitutes a vote in each type of voting system that may be used.
- The Indiana Code and election manuals produced by the Indiana Election Division are both very specific on how to accurately count each vote.

New Indiana law also requires that voting systems be accessible for individuals with disabilities, including nonvisual accessibility for the blind and visually impaired, in a manner that provides the same opportunity for access and participation (including privacy and independence) as for other voters. A county satisfies these requirements if the election board provides at least one electronic voting system or other voting system equipped for individuals with disabilities at each polling place. Indiana also passed legislation in 2003 which requires that each voting system (1) produce a permanent paper record with a manual audit capacity for the system and (2) provide the voter with an opportunity to change the ballot or correct any error before the permanent paper record is produced. The paper record produced must be made available as an official record for a recount or contest conducted with respect to any election in which the voting system was used.

The Team recommends the creation of a committee comprised of voters with disabilities to assist in the certification process of voting systems and to evaluate voting systems' accessibility.

Section 5

Section 254 (a) IN GENERAL – The state plan shall contain a description of each of the following:

(5) How the state will establish a fund described in subsection (b) for purposes of administering the State's activities under this part, including information on fund management.

The Indiana Voting Systems Improvements Fund, established by legislation in 2001, has been renamed the Election Administration Assistance Fund (hereinafter "the fund") under Public Law 209-2003.

The fund consists of all money allocated to the state by the federal government
(1) under Section 101 of HAVA (improvements to election administration generally),
(2) under Section 102 of HAVA (funds used exclusively for replacement of punch card and lever machines),
(3) under Title II, Subtitle D, Part I of HAVA (funds to meet Title III requirements including funds to bring all voting systems into compliance with HAVA accessibility requirements, statewide voter registration list, provisional balloting, grievance procedure and administration, etc.), and
(4) under any other program for the improvement of election administration.

The fund will also contain money appropriated to the fund by the Indiana General Assembly.

Within the fund, a total of five accounts have been established: an account has been established for each of the first three sources of allocations described above, and two accounts have been established within the fund for state matching funds allocated towards voting system reimbursements and the statewide voter registration system. There are restrictions, based on HAVA requirements, placed on distribution of money from each account.

Under the system set up by P.L. 209-2003, funds would be released in the following manner: each county seeking reimbursement applies to the Indiana Election Division, an agency of the executive branch. The Secretary of State and Indiana Election Division personnel review the applications and certifications regarding polling place accessibility. The Secretary of State and Indiana Election Division recommend disbursement of funds to the Budget Committee, a bipartisan body consisting of state legislators and the state budget director. The Budget Committee is statutorily required to review these recommendations. Disbursements will be made to the counties on the approval of the State Budget Agency, an executive branch agency, after review by the Budget Committee and subject to fund availability.

Indiana's Budget Committee is a unique entity. The State Budget Committee has five members, with four alternate members who each may have voting privileges in the absence of a member. This liaison committee is comprised of the state budget director, two members of the Senate, one Republican and one Democrat, and two members of the House of Representatives, one Republican and one Democrat. The Committee continues to meet even when the General Assembly is not in session.

Section 6

Sec. 254 (a) IN GENERAL – The State plan shall contain a description of each of the following:

(6) The state's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on-

- **(a) the costs of the activities required to be carried out to meet the requirements of Title III;**
- **(b) The portion of the requirements payment which will be used to carry out activities to meet such requirements; and**
- **(c) The portion of the requirements payment which will be used to carry out other activities.**

Budget:

At the time this plan was drafted, federal appropriations for HAVA were less than the amounts authorized by the legislation. The following table outlines the assumptions regarding federal funding that the State used in creating its budget for HAVA activities. These numbers reflect the following: (1) $15,752,875 in early payments received by Indiana as of June 17, 2003 (consisting of $9,522,394 in Section 102 payments and $6,230,481 in Section 101 payments); and (2) estimates from the Federal Funds Information for States Issue Brief, March 5, 2003.
The total appropriation for Indiana will not be known until Congress passes the FY 05 budget. Unless full funding is received, Indiana may not be able to initiate HAVA mandates described in this State Plan in the time prescribed. Indiana legislation was passed to allow for the required state match (Public Law 224-2003, SECTION 98).

Federal Fiscal Year	Total Federal funds	Indiana federal funds	5% match
Early Payments	$325,000,000 (Sec. 101) $325,000,000 (Sec. 102) (appropriated)	$15.8 million	N/A
FY 2003	$810,000,000 (appropriated)	$17.3 million	$865,000
FY 2004	$500,000,000 (President's budget) ($1 billion authorized)	$10.5 million	$525,000
FY 2005	$600,000,000 (authorized)	$12.6 million	$630,000
Total	**$2,560,000,000**	**$56.2 million**	**$2,020,000**

Additional Funding: Health and Human Services grant

HAVA also authorizes the United States Secretary of Health and Human Services (HHS) to administer a grant program to do the following: (1) make polling places, including the path of travel, entrances, exits, and voting areas of each polling place more accessible to individuals with disabilities, including the blind and visually impaired, in a manner that provides the same opportunity for access and participation (including privacy and independence as other voters); and (2) provide individuals with disabilities and other individuals described in (1) with information about the accessibility of polling places, including outreach programs to inform the individuals about the availability of accessible polling places and training election officials, poll workers, and election volunteers on how best to promote the access and participation of individuals with disabilities in elections.

The federal omnibus budget bill of 2003 and Indiana's Public Law 209-2003 authorize the state (through the Secretary of State, with the consent of the Indiana Election Division Co-Directors) to apply for grant funds. The funds are to be distributed based on each state's voting age population as a percentage of the national voting age population. HHS estimates that Indiana's share of these funds for 2003 will be $251,048.

On July 7, 2003, the Secretary of State applied for these grant funds to be used in accordance with the requirements set forth in the HHS *Federal Register* notice of May 21, 2003, as amended and corrected May 29, 2003. To provide individuals with disabilities with information regarding the accessibility of polling places, the Secretary of State's office plans to conduct a statewide survey utilizing people with disabilities as the survey takers. The Governor's Planning Council for People with Disabilities (GPCPD) will coordinate the survey project and will tabulate the results and provide the information to the counties. GPCPD will also assist local election officials with the formation of local advisory councils consisting of elderly voters, voters with disabilities, and local election officials. The local councils will review the accessibility survey results and make recommendations to the county executive about making accessibility accommodations and/or moving polling places to accessible locations.

The Secretary of State and Indiana Election Division will prepare a budget for use of grant funds received from HHS. The Team estimates up to $60,000 will be necessary to conduct the survey described above.

In 2003, Indiana passed the following standards for polling place accessibility under Public Law 116-2003:

"For purposes of this chapter, a facility is an accessible facility for elderly voters and voters with disabilities only if the following apply:

(1) The facility meets the standards for accessibility for elderly voters and voters with disabilities established under 42 U.S.C. 1973ee-1 through 42 U.S.C. 1973ee-6

(2) All the following are accessible to elderly voters and voters with disabilities in a manner that provides the same opportunity for access and participation (including privacy and independence) as for other voters:

(A) Parking spaces marked and available to conform with IC 5-16-9

(B) The path to the facility that an individual must travel on the property where

the facility is located
(C) The entrance of the facility to be used by voters
(D) The paths of travel within the facility to the rooms or areas where the voting system is located
(E) The rooms or areas in the facility where the voting systems are located."

Distribution of Indiana's HAVA funds (This chart is based on the $58.2 million budget.)

Total money: $58.2 million

12 to 19 % on Voter File
which equals **$7-11 million**
from Sec. 101, Title III requirements monies and state matching funds

6.7 % on Training and Education
which equals **$3.9 million** from Sec. 101 and Title III requirement monies.
$1.4 million will be taken from the Sec. 101 funds for Voter Education.

3.4 to 10.3% on Strategic Reserve (to meet any HAVA requirements)
which equals **$2–6 million** (this range is based on the range for the voter file; if less than $11 million is used for the voter file, the remaining amount will be transferred to the Strategic Reserve) from Section 101 and Title III requirement monies

.9% on Administration of Grievance Procedure
which equals **$500,000** from Title III requirement monies

.9% on Administration of HAVA
which equals **$500,000** from Sec. 101 funds
- This will include administrative costs associated with the development and oversight of Title III programs and other administrative costs.

69% on Voting Equipment
which equals **$40.1 million** from Sec. 101, 102, Title III requirement monies and state matching funds
- Tier A = precincts (2983) that used punch card or lever in 2000
- Tier B = all other remaining precincts (2619)

Account	Amount	Distribution	
Section 101	$6,230,481 (received)	Training & Education $1,730,481 Administration $500,000 Voting Equipment $2,000,000 Strategic Reserve $2,000,000	Not Allocated $ 0
Section 102	$9,522,394 (received)	Voting Equipment $9,522,394	Not Allocated $0
Title III Requirement Monies	$40,400,000 (estimated)	Voting Equipment $26,730,481 Voter File $10,900,000 Grievance $500,000 Training and Education 2,169,519	Not Allocated $100,000
State Match	$2,020,000 (estimated)	Voting Equipment $1,886,408 Statewide Voter File $100,000	Not Allocated $33,592
Total	**$58,172,875**	**$58,039,283**	**Not Allocated $133,592**

A. Voting Systems

It will be necessary to use Section 101, Section 102, Title III and state matching fund monies for voting systems reimbursements. Indiana had more than half of its voters using punch card or lever machines in November 2000.

Waiver Recommendation for Punch Card and Lever Voting Systems

The Team recommends that the Secretary of State and the Co-Directors of the Election Division certify in accordance with HAVA and Public Law 209-2003 that good cause exists to extend the deadline for replacement of lever voting machines and punch card voting systems until December 31, 2005. The grave risk of voter confusion, the lack of sufficient time for poll worker training, and the inefficient use of limited federal funds that would result from hasty acquisition of replacement voting system to comply with the January 1, 2004 deadline, makes this extension not only desirable, but essential.

Voting System Certification

The Team recommends that the Indiana General Assembly enact legislation in its 2004 session to address the issue of voting system certification. Under current Indiana law, a voting system is certified for marketing and use in Indiana elections for a term of five years after the Indiana Election Commission determines that the voting system complies with the Indiana law in effect at the time of certification. Indiana law formerly incorporated the 1990 Federal Election Commission (FEC) standards, and now incorporates the revised 2002 FEC standards.

Former Indiana law also provided that existing punch card voting system certifications would expire in July 2003 if the Indiana Election Commission determined that the voting system improvement fund established under 2001 law had a balance of at least $5 million dollars. However, as noted earlier in this Plan, no monies were allocated by the state to this fund at any time before the fund ceased to exist in May 2003.

Although Public Law 209-2003 provides that lever voting machines and punch card voting systems may continue to be used in Indiana elections until December 31, 2005, the existing certifications for these systems should be revoked before that date so that no additional marketing of the systems can occur. To provide for more detailed scrutiny of applications for voting system certification, the General Assembly may wish to consider providing an up-to-four year term for certification, with all existing applications coming up for renewal during the off election year.

Tier Structure for Voting System Reimbursement

Counties will be divided according to the following levels and definitions:

- Tier A = Qualifying Precincts under HAVA (precincts that used punch card or lever machines in the 2000 general election)
- Tier B = all remaining Indiana precincts

The state will set aside $40.1 million to reimburse counties in the following manner:

- All counties will be eligible for reimbursement for up to $50,000 for voting system software to operate the voting systems within the county. This reimbursement will be available in any fiscal year.
- Tier A will be reimbursed up to $8,000 per precinct.
- Tier B will be reimbursed up to $4,000 per precinct.
- Tier A will be reimbursed on a first come, first served basis of federal FY 03 funds.
- Remaining precincts (those in Tier A who have not been reimbursed and Tier B) will be reimbursed on a first come, first served basis of federal FY 2004 and 2005 funds.

The Team recognizes that this Plan proposes a reimbursement level for Tier A counties (up to $8,000) that exceeds HAVA's reimbursement amount for qualifying precincts using Section 102 monies ($3,192). It is the Team's intent to prioritize federal funding to alleviate as much as possible the possibility of an unfunded federal mandate while still being mindful of all of Indiana's reform obligations under HAVA.

Quantity Purchase Agreement (QPA)

The Election Division will work with the Indiana Department of Administration to enter into quantity purchase agreements with each vendor of a voting system currently certified for marketing and use in Indiana, with the expectation that the agreement will be entered into by the vendor and the state no later than September 1, 2003.

Lease or Lease-Purchase of Voting System

State law (Indiana Code 3-11-6.5-0.7) specifically provides that an agreement to lease or lease-purchase voting system permits a county to qualify for reimbursement. The Team recognizes that this may be a practical option for some counties to pursue due to the lack of suitable year-round climate-controlled storage space for voting systems.

Application Process for Voting System Reimbursement

The voting system reimbursement application process will be administered in accordance with the "first come, first served" process described in this subdivision.

Indiana Code 3-11-6.5-4, as amended by Public Law 209-2003, SECTION 123, states that "To receive reimbursement for the purchase of voting systems... a county must file an application with the election division...If a county filed an application under section 3 of this chapter (repealed) not later than January 31, 2003, the application may be amended to comply with this chapter or the county may file a new application..."

Indiana Code 3-11-6.5-6.1, as added by Public Law 209-2003, SECTION 124, states "When approving applications for reimbursement for voting systems... the budget agency shall give priority to approving applications to replace a punch card voting system or lever voting machine system." The Team understands this statute to require that priority be given to Tier A county applications before Tier B county applications.

"First come, first served" will be determined strictly on the basis of the date and time that an amended application, or first time application from a county, is filed with the Election Division.

Application for Section 102 funds

The Election Division will, by August 1, 2003, notify the circuit court clerks of counties with qualifying precincts which submitted an application for voting system reimbursement under Indiana Code 3-11-6.5 before January 31, 2003, that the county must file an *amended* application with the Election Division no later than October 31, 2003 to receive the initial disbursement of Section 102 money under this Plan.

Unless the original application already contains this information, the amended application must:

(1) list the names of the precincts in the county which were qualifying precincts as of November 2000;

(2) list the physical location (and mailing address if available) of the polling places designated in November 2002 to serve the residents of that precinct;

(3) state that the county election board will cooperate with the polling place accessibility survey scheduled for May 2004, subject to any amendments required to state law to permit access to polling places by survey personnel;

(4) subject to the availability of Title III requirement monies to the county before October 1, 2004, certify that the county will make all permanent or temporary improvements to the polling place no later than October 1, 2004 to comply with the accessibility standards set forth in state law (Indiana Code 3-11-8), and to the extent possible, make any additional improvements identified in the May 2004 survey that are not specifically required by state or federal law;

(5) certify that, as of December 31, 2005, the polling place used for the precinct will contain at least one voting system to permit a voter who is blind or visually impaired to vote privately and independently in accordance with Public Law 209-2003;

(6) certify that no later than December 31, 2003, the county will adopt an ordinance to establish a local advisory council comprised of representatives of the disabilities community and elderly voters to provide assistance to the county in choosing accessible polling places;

(7) list the date the county entered into a contract for the purchase, lease, or lease-purchase of voting system. (An executed and attested copy of the contract or adequate evidence of a contract must be attached);

(8) state whether this purchase or lease was entered into under a state quantity purchase agreement with a vendor certified to market voting systems in Indiana;

(9) include a written guarantee signed by the vendor that the voting systems obtained by the county comply with all requirements of Indiana and federal law in effect as of the date of the amended application for Section 102 monies;

(10) include a certification by the county fiscal body that the Section 102 monies received by the county will be used to pay any outstanding obligation incurred by the county for the voting system purchase subject to the reimbursement;

(11) include a certification by the county fiscal body that if these obligations have already been paid in full or in part by the county, that any remaining Section 102 reimbursement funds will be used to improve the administration of elections for federal office in the county.

The Election Division may prescribe that other information be included in the amended application, and shall assist each county in amending the previously filed application.

The Secretary of State with the consent of the Co-Directors of the Election Division will, to the extent possible, review the amended applications as expeditiously as possible upon receipt and no later than November 2003. No later than December 1, 2003, the Secretary of State plans to

submit recommendations to the State Budget Committee regarding these applications. After completion of Budget Committee review and authorization by the Budget Agency, the Secretary of State will work with the Auditor of State and Treasurer of State to ensure the prompt disbursement of the Section 102 funds to these counties.

If a county which contains qualifying precincts did not file an application for voting system reimbursement before January 31, 2003, the Election Division shall promptly notify the county circuit court clerk that the county must file an application no later than October 31, 2003 to receive the initial disbursement of Section 102 money under this Plan. The Election Division shall prescribe the form of the application to be used by the county to request reimbursement. However, the application must contain at least the information contained in the version of the application filed by counties before January 31, 2003, and the information required for amended applications.

The deadline for a county to ensure that a polling place complies with the accessibility requirements set forth in Indiana Code 3-11-8-6 may be extended to March 31, 2006 if it is impossible or impractical for the county to ensure compliance by October 1, 2004.

Application for Title III Requirement Monies and State Matching Funds

After the State receives the Title III requirement monies and state matching funds to be disbursed during 2003, the Election Division shall notify all counties that an application may be submitted for reimbursement of voting system purchases. This notice must specify the first and final dates for filing the application and the information required to be submitted as part of the application.

Unless the original application already contains this information, the application for Title III requirement monies and state matching funds must:

(1) list the name of each precinct in the county as of the date of the application;

(2) list the physical location (and mailing address if available) of the polling place designated in November 2002 (or that will be designated in the May 2004 election) to serve the residents of that precinct;

(3) state that the county election board will cooperate with the polling place accessibility survey scheduled for May 2004, subject to any amendments required to state law to permit access to polling places by survey personnel;

(4) certify that the county will make all permanent or temporary improvements to the polling place for the precinct no later than October 1, 2004 to comply with the accessibility standards set forth in state law (Indiana Code 3-11-8), and to the extent possible, make any additional improvements identified in the May 2004 survey that are not specifically required by state or federal law;

(5) certify that, as of December 31, 2005, the polling place used for the precinct will contain at least one voting system to permit a voter who is blind or visually impaired to vote privately and independently in accordance with Public Law 209-2003;

(6) certify that no later than December 31, 2003, the county will adopt an ordinance establishing a local advisory council comprised of representatives of the disabilities community and elderly voters to provide assistance in choosing accessible polling places;

(7) the date the county entered into a contract for the purchase, lease, or lease-purchase of voting system. (An executed and attested copy of the contract or adequate evidence of a contract must be attached);

(8) whether this purchase or lease was entered into under a state quantity purchase agreement with a vendor certified to market voting systems in Indiana;

(9) a written guarantee signed by the vendor that the voting systems obtained by the county comply with all requirements of Indiana and federal law in effect as of the date of the amended application for Title III requirement monies;

(10) include a certification by the county fiscal body that the monies received by the county will be used to pay any outstanding obligation incurred by the county for the voting system purchase subject to the reimbursement;

(11) include a certification by the county fiscal body that if these obligations have already been paid in full or in part by the county, that any remaining funds will be used to improve the administration of elections for federal office in the county.

The Election Division may prescribe that other information be included in the application, and shall assist each county in amending any previously filed application.

In the review of applications for disbursement of Title III requirement monies and state matching funds, the State shall follow the same procedures described in this Plan for the disbursement of Section 102 monies.

Upon receipt of Title III requirement monies and state matching funds after 2003, the same application review process will be used. However, the deadline for a county to ensure that a polling place complies with the accessibility requirements set forth in Indiana Code 3-11-8-6 may be extended to March 31, 2006 if it is impossible or impractical for the county to ensure compliance by October 1, 2004.

Application for Section 101 funds

The Team recommends that the Section 101 funds budgeted for voting system reimbursement be expended for reimbursement for the purchase of voting system after January 1, 1998 and before July 1, 2001 if the voting system meets the standards permitting reimbursement under Indiana Code 3-11-6.5. HAVA permits Section 101 funds to be expended for improving the administration of elections for federal office, including replacing voting systems, but does not specify any time limits during which the replacement must be made to qualify for reimbursement from these funds.

Unless the original application already contains this information, the application for Section 101 monies must:

(1) list the name of each precinct in the county as of the date of the application;

(2) list the physical location (and mailing address if available) of the polling place designated in November 2002 (or that will be designated in the May 2004 election) to serve the residents of that precinct;

(3) state that the county election board will cooperate with the polling place accessibility survey scheduled for May 2004, subject to any amendments required to state law to permit access to polling places by survey personnel;

(4) certify that the county will make all permanent or temporary improvements to the polling place for the precinct no later than October 1, 2004 to comply with the accessibility standards set forth in state law (Indiana Code 3-11-8), and to the extent possible, make any additional improvements identified in the May 2004 survey that are not specifically required by state or federal law;

(5) certify that, as of December 31, 2005, the polling place used for the precinct will contain at least one voting system to permit a voter who is blind or visually impaired to vote privately and independently in accordance with Public Law 209-2003;

(6) certify that no later than December 31, 2003, the county will adopt an ordinance establishing a local advisory council comprised of representatives of the disabilities community and elderly voters to provide assistance in choosing accessible polling places;

(7) list the date the county entered into a contract for the purchase, lease, or lease-purchase of voting system. (An executed and attested copy of the contract or adequate evidence of a contract must be attached);

(8) state whether or not this purchase or lease was entered into under a state quantity purchase agreement with a vendor certified to market voting systems in Indiana;

(9) include a written guarantee signed by the vendor that the voting systems obtained by the county comply with all requirements of Indiana law in effect as of the date of the amended application for these monies;

(10) include a certification by the county fiscal body that the monies received by the county will be used to pay any outstanding obligation incurred by the county for the voting system purchase subject to the reimbursement;

(11) include a certification by the county fiscal body that if these obligations have already been paid in full or in part by the county, that any remaining funds will be used to improve the administration of elections for federal office in the county.

The Election Division may prescribe that other information be included in the application, and shall assist each county in amending any previously filed application.

In the review of applications for disbursement of Section 101 monies, the State shall follow the same procedures described in this Plan for the disbursement of Section 102 monies. However, the deadline for a county to ensure that a polling place complies with the accessibility requirements set forth in Indiana Code 3-11-8-6 may be extended to March 31, 2006 if it is impossible or impractical for the county to ensure compliance by October 1, 2004.

New Precincts

The Team recognizes that in certain counties, new precincts may be established before December 31, 2005 to accommodate population growth. Although a new precinct would not be a qualifying precinct for which Section 102 monies would be available, the county will be required after that date to provide a fully accessible voting system for voters with disabilities at the polling place designated for the precinct. As a result, the Team recommends that this Plan be reviewed during early 2005 to determine the number of new precincts created or expected to be created before 2006; availability of Title III requirement monies and other HAVA funds to reimburse counties for voting system purchases for these precincts; and whether further legislation is necessary to permit more precincts to use the same polling place, and thereby reduce the number of voting systems that a county must acquire.

General Procedures for Voting System Application Review

The Secretary of State and Election Division shall prescribe: (1) the periods during which reimbursement applications may be submitted; and (2) the content of the applications. The Secretary of State and Election Division will strive to provide counties with all available information regarding the schedule for administration of the voting system reimbursement program to enable counties to take the impact of the program into account as part of the county's process for adoption of its annual budget.

The Secretary of State and Election Division may recommend that any application be approved in whole, or in part. The recommendation may provide that action on part of an application be deferred pending further information or availability of funds, or rejected.

All recommendations regarding applications submitted during a specific application cycle may be forwarded to the State Budget Committee at one time. However, it is more likely that each application will be forwarded as soon as the recommendation for that application is complete. Likewise, the Secretary of State will strive to secure the disbursement of funds to a county as soon as possible following approval of the county's application, rather than waiting for all applications in a specific application cycle to be approved or rejected by the State Budget Committee and Budget Agency.

In determining the recommendation regarding an application, the Secretary of State and Election Division must consider whether a precinct currently contains any voters (or contained any voters in 2000). If the precinct does not (or did not), the recommendation must not provide for

reimbursement for that precinct as a qualifying precinct, or for reimbursement from any other HAVA funds.

Absentee Voting Systems in Central Location

If an application requests reimbursement for voting equipment used for casting or counting absentee ballots at a central location, or casting ballots at a polling place located at the office of the circuit court clerk or county election board, the Secretary of State and Election Division shall determine whether the equipment or software is used primarily for the casting or counting of votes. If the equipment or software is used primarily for voter registration purposes or other election administration purposes, the recommendation must not provide for reimbursement for the equipment or software.

Determination of Reasonable Costs

In reviewing applications for voting system reimbursement, the Secretary of State and Election Division shall determine whether the contract provides for products and services to be provided to the county by a vendor at a cost that is reasonable and in accordance with standard business practices in Indiana. The recommendation may not provide for reimbursement of clearly excessive or unreasonable costs. In making this determination regarding the cost of products, a product which costs no more than the cost provided for in a quantity purchase agreement entered into by the vendor with the State is considered a reasonable cost for the product.

State and Federal Auditing

Before the Secretary of State and Election Division recommend the approval of any application for voting system reimbursement, the county fiscal body and county executive must enter into an agreement with the State obligating the county to refund to the State an amount equal to the amount of the grant received by the application if the Secretary of State and Election Division determine on March 1, 2006 that: (1) in the case of Section 102 monies, the county has not replaced lever voting machines or punch card voting systems in each precinct of the county no later than December 31, 2005; (2) in the case of other HAVA funds, the county has not provided a voting system in each polling place that complies with the accessibility requirements for voters described above; and (3) in any case, that the county has not honored one or more of the certifications the county made regarding the polling place accessibility or permitted uses of fund. The agreement must provide that the county will refund the amount no later than May 1, 2006.

The agreement must also require the county to submit a report to the Election Division not later than December 31, 2004, (or if the reimbursement was approved after 2003, not later than December 31, 2005). The report must list the accessibility problems identified in the May 2004 survey of polling places, and whether these problems have been resolved by temporary or permanent improvements, or whether the polling place has been relocated to an accessible facility. If the report indicated that the problems have not yet been resolved, the report must indicate how the county will resolve the problem no later than March 31, 2006. The Election Division may require additional reports from a county until the county reports that the polling place accessibility problems identified in the May 2004 survey have been resolved. A report from a county under this paragraph must be certified as accurate by majority vote of the county

election board, following review and the opportunity by the local advisory council to add written comments to the report.

Local Advisory Council

A county's local advisory council may consist of any number of members, but must include at least two (2) representatives of the disability communities or elderly voters. The membership of the council shall be appointed by the county executive, who shall encourage county residents with a variety of backgrounds, partisan affiliations, and perspectives to participate. If county residents are not available to serve on the council, the county executive may partner with the Governor's Planning Council for People with Disabilities to carry out the functions of the council.

Indiana Bond Bank Services and Multi-County Purchase Agreements

The Team recommends that the Secretary of State and Election Division encourage reimbursement policies that will result in the most efficient use and widespread impact of the funds available for voting system reimbursement. For example, counties should be encouraged to explore borrowing funds at low rates from the Indiana Bond Bank to reduce financing costs prior to reimbursement and entering into multi-county purchase agreements with other counties to reduce procurement costs though quantity purchasing. *See Appendix 2*

Cost Savings

Likewise, subject to the limitations set forth in HAVA, P.L. 209-2003, and federal auditing standards, counties should be encouraged to negotiate purchases for voting system hardware and software at prices below the amount set by the state quantity purchase agreements or the reimbursement schedule set forth in this Plan.

The Team notes that Indiana law specifically provides that applications must be for voting system *reimbursement*, which implies a previous outlay of funds or a contractual obligation to do so in the future. The reimbursement schedule for hardware and software set forth in this Plan is not a "draw down" account with funds available to a county for subsequent purchases outside of the application process.

Supplemental Application

However, the Team recommends that if a county purchases software or hardware for an amount less than the amount available for allocation to the county under the reimbursement schedule set forth in this Plan, that the county be permitted to submit a supplemental application for reimbursement in an amount that does not exceed the amount saved by the county in its purchase of software or hardware at a cost below the amount in the Plan's reimbursement schedule. This supplemental application could be submitted at the same time as the county's initial voting system reimbursement application or at any later date.

A supplemental application for reimbursement should only be recommended for approval if the reimbursement would be for an expenditure permitted by HAVA or state law to be made from

the applicable HAVA account and if the SOS and IED determine that the county submitting the supplemental application has complied with all Title III requirements under HAVA or is requesting reimbursement to do so.

Expenses eligible for reimbursement

If an application is made for reimbursement of voting system expenses from Title III requirement monies, a supplemental application could request reimbursement for expenditures made by the county to comply with any HAVA Title III requirements. These expenditures would include the purchase of additional voting systems that provides full access to voters with disabilities; training and other materials related to provisional ballots (not the ballots themselves); costs related to the identification of the mail-in registrants required to produce additional documents and mailings to those voters. However, reimbursements for purchasing voting systems before November 2000 would not qualify since these purchases are not covered under the Title III requirement payments.

Operational expenses, legal expenses, paper expenses, and interest expenses may be eligible for reimbursement.

The same restriction would apply to a supplemental application requesting voting system reimbursement from state matching funds, since HAVA Section 253(b)(5) requires that the State appropriate these funds for "carrying out the activities for which the requirements payment is made." As a result, these state matching funds would presumably be subject to the same use restrictions as the federal Title III requirement monies received by the State.

Likewise, if an application is made for reimbursement of voting system expenses from Section 102 monies, a supplemental application could request reimbursement only for purchasing additional voting systems to replace lever machines or punch card voting systems after November 2000.

However, if an application is made for reimbursement of voting system expenses from Section 101 monies, a supplemental application could request reimbursement for purchasing voting systems after January 1, 1998 and before July 1, 2001 if the voting systems meets the standards permitting reimbursement under Indiana Code 3-11-6.5, as amended in 2003. HAVA permits Section 101 funds to be expended for voting system replacement that improves election administration in a state, but does not specify any time period during which the purchase must have been made to qualify for disbursement.

To ensure that the disbursement of these funds comply with HAVA and P.L. 209-2003, the Secretary of State and Election Division must specify the accounts that are the source of each disbursement made for voting system reimbursement. For accounting purposes, this Plan assumes that disbursements will be made from available funds in the following order: Section 102 funds; Title III requirement monies; state matching funds. Disbursements from Section 101 funds for voting system reimbursement will not be made in any year until the Section 102 funds, Title III requirement monies, and state matching funds available in that fiscal year have been disbursed.

Use of Traditional Paper Ballots

It is possible that a county may choose not to apply for reimbursements for voting system upgrades or may not qualify for the reimbursement sought by the county's application. In that case, Public Law 209-2003 will require that county to cease using any lever voting machine or punch card voting system currently used by the county no later than December 31, 2005.

If the county has not acquired a voting system by that date which complies with HAVA, the only remaining option for the county under Indiana law is to use traditional paper ballots to conduct the election. In any event, the county must acquire at least one fully accessible voting system for each polling place for use by blind voters or voters with other disabilities. The Team recommends that the Secretary of State and Election Division monitor the situation in counties which currently use lever machines or punch card voting systems to determine whether additional legislation will be necessary in 2004 or 2005 to complete the phase-out of these obsolete voting systems.

B. Statewide Voter Registration System

The Secretary of State with consent of the Co-Directors will implement a statewide voter registration system that complies with Title III HAVA requirements. A team of circuit court clerks, voter registration officials from different sized counties, and Statewide Voter File subgroup members will serve in an important advisory role in the selection of a vendor, development of the system, and the conversion of data for the system. The use of an independent consultant disqualified from submitting a response to the Request for Proposal for the statewide voter registration system will assist in providing necessary guidance from an entity with no financial interest in the final product.

Waiver Recommendation for the Statewide Voter Registration System

The Team recommends that the Secretary of State and the Co-Directors of the Election Division request the waiver authorized under HAVA and Public Law 209-2003 to extend the deadline for implementation of the statewide voter registration system until January 1, 2006.

Statewide Voter Registration System Costs

The development costs of the statewide voter registration system will be assumed by the State, using Title III requirement monies, and to the extent necessary, supplemented by Section 101 funds and State matching funds. The consultant hired to develop the systems requirement document will seek to identify any opportunities for efficiency and savings that may be available from using existing or planned statewide networks to share pipeline space and to conduct coordinated training events with the administrators of those systems. However, any such coordination would be subject to the deadlines set by HAVA and Public Law 209-2003 for the statewide system to become operational and to ensure that the responsibility for system administration remains vested in the Secretary of State and the Election Division, as provided by P.L. 209-2003.

Replacement and upgrade of voter registration system software

The "development costs" to be assumed by the State include the hardware and software necessary for the system to perform its functions.

Voter Registration System Training

Likewise, training both State and county voter registration administrators will be a significant development cost to the State. The systems requirement document will request potential vendors to propose a comprehensive training program to ensure that county voter registration personnel become familiar with the features of the system before it becomes fully operational.

There will be some incidental or indirect costs associated with the development of the statewide voter registration system which this Plan anticipates will be borne by the county. These costs include county employee compensation and overtime and travel and lodging expenses for attendance at some training and conference events. Nonetheless, the state will seek to cover all necessary and reasonable costs associated with the development of the voter registration system to the extent that funding is available. In addition, if a county chooses to lease or purchase additional hardware or to provide training beyond what the State provides to ensure the maintenance and proper operation of the system, the county would be responsible for those costs.

Voter Registration Software Upgrades before 2006

The Team recommends that any county considering the replacement or upgrading of its voter registration software between now and the implementation of the statewide voter registration system during 2005 carefully consider the costs and benefits of that software purchase. If a county voter registration office determines that replacing or upgrading its software is necessary to ensure success in administering the 2004 general elections, then this purchase may be advisable. However, if the replacement or upgrade would result in only marginal improvement at most to the county's voter registration system, then the county may wish to consider deferring the purchase until the statewide voter registration system begins operation. If the county determines that a feature of the proposed software program is very desirable, then the county should communicate its views to the members of the Steering Committee, who can suggest that this feature be included in the systems requirement document for the statewide voter registration system.

The following will be necessary:

- The Secretary of State, with the consent of the Indiana Election Division, shall develop, maintain and support the system.
- The Indiana Election Division shall develop interaction between the voter registration system and the provisional ballot status application.
- The Indiana Election Division will be responsible for continuous training opportunities on the new system.
- The Request for Proposal (RFP) for statewide voter registration system shall offer poll list printing as an option for counties.

- The county clerks and voter registration officials will continue to be responsible for voter list maintenance, creation and production of poll lists, street file management and jurisdictional boundaries, jury lists, petition verification and specialized reports.

The unique identifier for an individual who has not provided a driver's license number will be the birth date (MMDDYYYY), a hyphen, and then the last four digits of the social security number (MMDDYYYY-XXXX). If the social security number is unavailable, the voter will be assigned another unique identifier by the Indiana Election Division (after December 31, 2005). This unique identifier must be the individual's Bureau of Motor Vehicles identification number, or if the individual does not have a BMV ID card, another unique number assigned by the Indiana Election Division.

The monies that will be set aside for the statewide voter registration system is within the range of $7 to 11 million. The state will use a portion of the early payments money (Section 101 funds) to pay a consultant who will work with the Information Technology Oversight Commission to begin developing the Request For Proposal for the statewide voter registration system project because this process will begin before the state receives any Title III funding. However, the Section 101 money will be reimbursed from Title III money once it is received.

C. Training and Education

The Indiana Election Division is currently responsible for annually providing election official training to county circuit court clerks, incoming county circuit court clerks and county election board members.

Each county's maintenance of effort includes training for the poll inspector and in some instances the poll judges and clerks. Indiana law requires that inspectors and judges be trained. The law also requires that training must include information related to making polling places and voting system accessible to elderly and disabled voters. Therefore, HAVA monies will be utilized to expand this training to include training opportunities for the poll clerks and judges. There will be additional costs associated with training voters and poll workers on new voting equipment and provisional balloting as well as the printing and posting of the Voter's Bill of Rights. It is expected that many first time poll workers including those from secondary schools and colleges, recruited under a new program authorized by HAVA, will need to be trained.

Opportunities will be sought for coordinating training with other interested parties and advocacy groups. During the annual meetings of the Association of Indiana Counties, Indiana Association of Cities and Towns, and Association of Circuit Court Clerks, sessions will be available regarding local election administration. The Indiana Election Division will develop training aimed at attorneys so they may qualify for continuing legal education credits (CLEs) required by the Indiana Supreme Court. A poll worker certification program will be developed as an incentive and positive reinforcement of the poll workers' efforts.

The state will develop an application process for distribution of training and education funds.

Starting in 2003 and continuing over the next 2 years, IED will conduct additional seminars for clerks and county voter registration officials solely dedicated to new election administration issues and procedures.

Neither the state nor a county has voter education included in their maintenance of effort.

The proposed budget sets aside $3.9 million for Training and Education.

D. Provisional Ballots

In the 2001 legislative session, authorization for provisional balloting beginning with the 2004 primary election was provided. However, additional requirements to build a free access system, provide written documentation to provisional voters and protect provisional ballot voters' confidentiality are new under HAVA; these were addressed by additional Indiana legislation enacted in 2003. At the time the document was written, the Secretary of State's office envisions interaction between the systems used for the statewide voter registration system application and a provisional ballot status application. Once the statewide grievance toll-free line is available, the state anticipates using that line for the provisional ballot status notification process.

E. Grievance Procedure

HAVA requires the establishment of a state based administrative complaint procedure that will remedy grievances concerning Title III which include but is not limited to (1) voting system accessibility, (2) polling place accessibility, (3) any part of the voting process itself, (4) registration process, or (5) allegation of fraud. The details of this grievance procedure are explained under Section 9 (page 49) of this plan.

The proposed budget sets aside $500,000 for administration of the grievance procedure. A county may apply for grants to assist in the development of the optional county grievance procedure. The Indiana Election Division in consultation with the Secretary of State will establish guidelines to evaluate applications submitted for this purpose.

F. Accessibility of Polling Place and Materials

The Secretary of State's office will form a partnership with the Governor's Planning Council for People with Disabilities (GPCPD) to conduct a statewide polling place accessibility study that will establish a baseline of Indiana's current environment as it relates to polling place accessibility. Each county will also form a local advisory council composed in part of voters with disabilities and elderly voters. The GPCPD will supply suggested members for the local advisory councils upon request. This council will advise the local officials on polling place accessibility and site selection. The survey and the establishment of the local council will be a required criteria for counties applying for reimbursement for voting systems.

Information will be provided by the Indiana Election Division to local election officials with suggestions about making their written materials and websites more accessible to voters with disabilities. The information will be created and organized by the GPCPD. Additional outreach will be directed toward military and overseas voters.

Currently, neither the state nor local officials have a maintenance of effort requirement for polling place accessibility or for the updating of materials and websites into accessible formats.

HAVA requires that voting systems provide alternative language accessibility as described in the Voting Rights Act of 1965. Using data from the 2000 United States Census, Indiana's population of non-English speaking residents does not meet the level that requires provision of voting information and materials in other languages. However, as the population of non-English speaking Hoosiers continues to increase, Indiana is taking steps to offer materials related to direct voter communication in the languages that are most prevalent. Currently, the Voter's Bill of Rights and the Application for Voter Registration Form are available in Spanish. As federal funds are available, the Indiana Election Division will translate more documents.

G. Administration

The proposed budget sets aside $500,000 for the administration of HAVA requirements.

H. Strategic Reserve

The proposed budget sets aside at least $2 million from Section 101 funds as a strategic reserve to be used to meet any HAVA requirement if the initial amount budgeted for meeting that requirement is not sufficient. The amount in this reserve will be increased to a total of $6 million to the extent that the statewide voter registration system costs less than the maximum $11 million budgeted for that project. The Team also recommends that any savings achieved in other projects be reallocated to the strategic reserve to ensure that all HAVA requirements are met and to avoid any required refunding of federal HAVA dollars by the State. If these savings are derived from projects funded with monies other than Section 101 monies, strategic reserve funds may actually be present in more than one account to recognize the use restrictions imposed on each HAVA account.

The Team's future review of Indiana's HAVA compliance may then lead to the reallocation of some funds held in strategic reserve to address requirements that have not been fully met at that time. In addition, the Team recommends that any of the $2 million in Section 101 funds remaining in strategic reserve after the expenses for fulfilling HAVA requirements have been fulfilled be available for voting system reimbursement for counties which are eligible for reimbursement from the Election Administration Assistance Fund (Indiana Code 3-11-6.5), but which are not eligible for reimbursement using Title III requirement monies.

The Team recognizes that in addition to the statewide voter registration file, the HAVA requirement that each polling place be provided with a voting system that is fully accessible to a voter with disabilities may result in significant expenditures by counties to comply with this requirement. The Team views the expenditure of any necessary funds from the strategic reserve to accomplish this purpose and to prevent required refunding of federal HAVA dollars as an appropriate use of funds in the strategic reserve.

Section 7

Sec. 254 (a) IN GENERAL – The State plan shall contain a description of each of the following:

(7) How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.

The Secretary of State will not use the requirements money to maintain the level of expenditures previously incurred by the state for election administration. For fiscal year ending June 30, 2000, the State of Indiana was not expending funds for any tasks required under Title III, including provisional ballots, documentation for first-time mail-in registrants or DREs for the disabled, except as provided below.

In 2000, counties were spending local monies on voter registration maintenance and voting system equipment.

The current duplicate voter registration elimination program will no longer be utilized after 2005 under Public Law 209-2003. However, approximately $225,000 was expended to conduct this program in 1999 - 2000 to compile a statewide voter registration system and will require a maintenance of effort.

Section 8

Sec. 254 (a) IN GENERAL – The State plan shall contain a description of each of the following:

(8) How the State will adopt performance goals and measures that will be used by the State to determine its success of units of local government in the state in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the state will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met

Performance Goal 1: Statewide Voter Registration System.
For compliance with HAVA and in order to receive and use requirements money, Indiana will build a "state of the art" system that will be centrally administered. It will provide the best election tools to the state's local election and registration officials and will incorporate the best features from Indiana county voter registration systems. This system will expand the current relationship between the county and state on operating the duplicate elimination program for list maintenance. It will be necessary to have an interface allowing the system to receive updates from the Bureau of Motor Vehicles, Department of Correction and the Indiana State Department of Health. A steering committee and an independent consultant will be used to guide the process. (see chart on following page)

Performance measure 1	Number of counties online Number of voters per county Percent of data conversion to standard format completed automatically Number of digitized signatures captured Number of voting histories captured Number of ID numbers captured Number of ID numbers matched Number of hits concerning provisional ballot status Number of hits for polling place locator
Timetable	Now through January 1, 2006
Description of the criteria used to measure performance	Conversion of county registration records is vital to the base file. Reports should be generated from partner agencies to help evaluate the success of file maintenance.
Process used to develop criteria	Success of the system will be dependent upon the capture, migration, and standardization of voter registration information into the central voter registration database.
Description of official to be held responsible for ensuring each performance goal is met	The Secretary of State and the Indiana Election Division are responsible for implementing the statewide voter registration system. The Indiana Election Division is also responsible for training, support, and ongoing maintenance of the system. The Indiana Election Division will coordinate with all 92 county voter registration officials, BMV, DOC, and Indiana State Dept. of Health.

Performance Goal 2: Training and Education

All Indiana state and local election and voter registration officials realize the success of HAVA implementation relies heavily on communication among or between the participants in the process. Opportunities for training are present at all levels from year round election officials to poll workers and voters that may only interact with the process one or two times a year.

Performance Goal 2.a	The following information will be collected to measure election official training performance: Number of people trained in county election office Total number of employees in county election office Number of people trained in voter registration office Total number of employees in voter registration office Number of people in each county certified for the first time Number of people in each county re-certified Number of training classes/opportunities offered
Timetable	December 31, 2003 and annually thereafter with possible exception in off election year (no municipal or federal election)
Description of criteria used to measure performance	The Secretary of State will prepare and submit a local election and voter registration official training report containing HAVA related information to be filed on the Secretary of State's web site annually.
Process used to develop the criteria	The state already provides training for county election officials. Further steps will be taken to ensure all employees of agencies responsible for "full service" voter registration duties are trained on changes related to HAVA. In addition, election/voter registration certification program will be developed.
Description of official to be held responsible for ensuring each performance goal is met.	The Secretary of State through the Indiana Election Division is responsible for election official training.

Performance Goal 2.b	Number of poll worker positions available Number of poll clerks trained by instructors in classroom Number of poll clerks trained by video Number of poll clerks trained on the web Repeat statistics for poll judges and sheriffs Number of high school and college students contacted by county election officials Number of ID documentation information pieces collected Number of provisional ballots cast Number of CLEs earned by attorneys Number of new persons recruited to work polls Number of complaints or grievances filed Whether exit poll questionnaire was executed Percentage of poll workers who attended training
Timetable	January 1, 2004 and every election thereafter
Description of the criteria used to measure performance	Local election officials will submit this information semi-annually to the Indiana Election Division following an election.
Process used to develop criteria	Election officials already conduct some poll worker training. The Indiana Election Division will rely on input from local election officials (and perhaps professional trainers) to develop both the content and evaluation criteria for the program.
Description of official to be held responsible for ensuring each performance goal is met	The Indiana Election Division shall establish training guidelines, tools, CLEs and the certification program. Each county will continue to oversee poll worker training.

Performance Goal 2.c	Number of public display sites for voter education Number of NCAS or PSAs (public service announcements) Number of ads, news releases or news stories Number of web hits on video streaming Number of teachers certified to instruct on voting systems Number of videos or power point slide shows distributed Number of speeches given by county election or voter registration officials Number of high schools and colleges contacted Increase in percentage of voter turnout
Timetable	January 1, 2004 and every election thereafter
Description of the criteria used to measure performance	Local election officials will submit this information semi-annually to the Indiana Election Division following an election.
Process used to develop criteria	These steps are being taken to ensure voters receive information on HAVA and related election processes
Description of official to be held responsible for ensuring each performance goal is met.	The Indiana Election Division is responsible for developing these training tools. Each county will be responsible for implementation and reporting.

Performance Goal 3: Grievance

HAVA requires the establishment of a state-based grievance procedure.

Performance Goal 3	The following information will be collected to measure the effectiveness of the grievance process: The number of calls received The number and nature of complaints filed The number of complaints dismissed The number of complaints resolved by the Indiana Election Division The number of complaints resolved by the Indiana Election Commission The number of complaints resolved by an Arbitrator The average time for a complaint to be investigated and resolved
Timetable	January 1, 2004 and every election thereafter.
Description of the criteria used to measure performance	The Secretary of State will review the reports from the Indiana Election Division and the counties.
Process used to develop criteria	The Indiana Election Division will also submit a report containing number of complaints received, number of complaints resolved and time required/ used for resolution.
Description of official to be held responsible for ensuring each performance goal is met	The Indiana Election Division and Indiana Election Commission are responsible for administering the Statewide grievance procedure. The Protection and Advocacy Commission will assist with administering the grievance procedure as it relates to persons with disabilities.

Performance Goal 4: Provisional Ballots

The following shall be measured regarding provisional ballots: uniform processing, verification and status availability. In the beginning, provisional ballot status reporting will be done by each county until the implementation of the statewide voter registration system. The goal is to have uniform procedures in place in each county for processing and verification of provisional ballots.

Performance Goal 4	Number of provisional ballots cast in each precinct Number of voters casting a ballot in each precinct at that election Number of provisional ballots verified and counted for each precinct Number of provisional ballots not counted in each precinct and reason Number of voters who checked their provisional ballot status Whether uniform procedures were followed
Timetable	January 1, 2004 and every election report thereafter
Description of the criteria used to measure performance	The election report from each county (until implementation of statewide voter file) will provide the Secretary of State with an indication of what additional tools may be needed for uniformity. The statewide voter registration system will be used to report and track the above figures when the system becomes operational.
Process used to develop criteria	The Indiana Election Division will enhance the county election administration manual regarding provisional ballot procedures and information.
Description of official to be held responsible for ensuring each performance goal is met	The Indiana Election Division, through its election official training and county administrative manual, will be responsible for uniform guidelines for processing and verifying provisional ballots. County election officials will be responsible for provisional ballot verification, counting and reporting. Status of provisional ballots will become a joint effort between the state and county once the statewide voter registration system becomes operational.

Performance Goal 5: Accessibility

One of HAVA's greatest initiatives is to make the election process more accessible. Indiana will address voting equipment first, with a link to polling place accessibility. Indiana would also like to utilize part of Title III requirement monies remaining after voting system reimbursement to address accessibility issues through training and provide materials and web information in accessible formats.

Performance Goal 5	Number of military/overseas absentee applications Number of military/overseas ballots cast Number of military ballots rejected and reason(s) therefore Number of polling places Number of polling places accessible Number of DREs w/accessible devices Number of DREs w/out accessible devices Number of IED accessibility brochures distributed Number of accessibility complaints received and resolved Whether Indiana Election Division website and materials are available in accessible formats Whether county met with local advisory council
Timetable	January 1, 2006 for voting system with accessible equipment and January 1, 2004 and beyond for other goals.
Description of the criteria used to measure performance	Local election officials will submit this information semiannually to the Indiana Election Division following an election.
Process used to develop criteria	The application for reimbursement of voting systems monies will include certification of polling place accessibility.
Description of official to be held responsible for ensuring each performance goal is met	The county will be responsible for certifying polling place accessibility on the application for reimbursement to the Indiana Election Division. The Indiana Election Division will make sure the Election Division website is in an accessible format. Governor's Planning Council for People with Disabilities will help coordinate statewide polling place survey.

Section 9

Sec. 254 (a) IN GENERAL – The state plan shall contain a description of each of the following:

(9) A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402.

Under HAVA, an individual who believes there is (or has been) a violation of any provision of Title III may file a complaint. Such complaint may include, but is not necessarily limited to the following: (1) voting system accessibility, (2) polling place accessibility, (3) any part of the voting process, (4) registration process, or (5) allegation of fraud. The Secretary of State and local election officials will establish a free access system to begin the grievance process.

Indiana Code 3-6-4.5 establishes the state based administrative complaint procedures to remedy grievances concerning uniform and nondiscriminatory election technology and administrative requirements under Title III. The procedures must be uniform and nondiscriminatory.

An individual who believes there is a violation of any provision of Title III, including a violation that has occurred, is occurring, or is about to occur, may file a complaint with the Indiana Election Division. The complaint must be written, signed, and notarized. The complaint must state the following: (1) name and mailing address of the individual alleged to be committing the violation of Title III described in the complaint, (2) whether the individual filing the complaint has filed a complaint concerning the violation with a county election board, and (3) the nature of the injury suffered (or about to be suffered) by the individual filing the complaint. The complaint form and instructions will be available on the Secretary of State's web site www.sos.IN.gov.

An individual may also file a complaint with the county election board where the violation allegedly occurred. The Indiana Election Division shall not begin enforcement procedures regarding the complaint until the individual files a complaint with the Indiana Election Division. If the complaint alleges that either Co-Director of the Indiana Election Division has committed the violation, the aggrieved person shall file the complaint with the chair of the Indiana Election Commission. The chair shall perform the duties otherwise performed by the Indiana Election Division concerning a complaint. The Indiana Election Division (or commission) may consolidate complaints filed under this chapter.

The Indiana Election Division shall determine whether a complaint filed under this chapter describes a violation of Title III using the assumption that the facts set forth in the complaint are true. If the Indiana Election Division determines that there is no violation of Title III or the individual did not comply with the written requirements stated above, the Indiana Election Division shall dismiss the complaint and publish the order dismissing the matter in the ***Indiana Register***. If the complaint is dismissed, a copy shall be provided to the following: (1) the

individual who filed the notice; (2) the individual alleged to have committed the violation; (3) the members of the Indiana Election Commission, and (4) the Indiana Attorney General.

If the Indiana Election Division determines that the complaint alleges a violation of Title III using the assumption that facts alleged in the complaint are true and that the individual complied with the written requirements, the Indiana Election Division shall conduct an investigation. Upon completion of the investigation, the Indiana Election Division shall submit the results to the Indiana Election Commission which shall then issue a written report. A copy of the report shall be provided to the following: (1) the individual who filed the complaint, (2) the individual alleged to have committed the violation; (3) the members of the Indiana Election Commission; and (4) the Indiana Attorney General. The report must indicate the date that the complaint was received by the Indiana Election Division, recite the findings of facts, and state whether a violation of Title III has occurred or is likely to occur. If a violation has occurred the report must also indicate steps taken to correct the violation or prevent a reoccurrence of the violation, any measures that could be taken to correct a violation, the date when a violation was corrected or is expected to be corrected and any additional information or recommendations useful in resolving the complaint.

At the request of the individual filing a complaint or the request of a member of the commission, the commission shall conduct a hearing on the complaint and prepare a record of the hearing. A request for a hearing must be filed with the Indiana Election Division not later than noon seven days after the report is mailed by the Indiana Election Division. After concluding the hearing, the Indiana Election Commission shall do the following: (1) affirm the report; (2) amend the report; or (3) refer the matter to the Indiana Election Division for further investigation and submission of a subsequent report to the Indiana Election Commission. If the Indiana Election Commission finds that there is no violation, the commission shall dismiss the complaint and publish the order of dismissal in the ***Indiana Register***. If the Indiana Election Commission determines that there is a violation of any provision of Title III, the Indiana Election Commission shall determine and provide the appropriate remedy if authorized by law to do so.

The Indiana Election Commission shall forward a written summary of any action taken by the commission by certified mail to the following: (1) the individual who filed the notice; (2) the individual alleged to have committed the violation; (3) the members of the Indiana Election Commission, and (4) the Indiana Attorney General.

The Indiana Election Commission shall make the final determination regarding the complaint not later than ninety days after the date the complaint is filed. If the Indiana Election Commission fails to make a final determination (or the Indiana Election Commission ties 2-2) within ninety days, the complaint shall be resolved by referral to an arbitrator selected jointly by the commission and the individual who filed the complaint. The record and other materials from any proceeding conducted by the Indiana Election Commission shall be made available for use by the arbitrator. The arbitrator shall file a report with the Indiana Election Division setting forth the resolution of the complaint.

The procedures set forth in Indiana Code 3-6-4.5 are subject to the Indiana Administrative Rules and Procedures Act (IC 4-21.5), which permits judicial review of determinations under the grievance procedure.

Indiana Code 3-6-5.1 establishes a county based administrative complaint procedure to supplement the state based administrative complaint procedure. An individual who files a complaint with the county retains the right to file a complaint with the Indiana Election Division. If the county election board is notified at any time that a complaint has been filed with the Indiana Election Division regarding this matter, the county election board shall dismiss the proceeding.

Section 10

Sec. 254 (a) IN GENERAL – The state plan shall contain a description of each of the following:

(10) If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

Section 101 money will be used, in at least part, to do all of the following:

- Reimburse counties for voting equipment ($2 million). See section 6 for further explanation.
- Create a strategic reserve (at least $2 million). See Section 6 (page 21) for further explanation.
- Statewide voter registration system (to hire consultant), with Section 101 funds used for this purpose being reimbursed from Title III requirement monies. See Section 6 for further explanation.
- Begin to administer HAVA ($500,000)
- Train and educate poll workers and election officials ($1.7 million), with an additional $2.2 million from Title III requirement monies being budgeted to training workers and officials regarding Title III requirements, for an overall training budget of $3.9 million. ($1.4 million will be taken from the Sec. 101 funds for Voter Education)

Section 11

Sec. 254 (a) IN GENERAL – The state plan shall contain a description of each of the following:

(11) How the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change –

(a) Is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;

(b) Is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and

(c) Takes effect only after the expiration of the 30-day period which begins on the date the change is published in the federal Register in accordance with subparagraph (A)

The Secretary of State through the Indiana Election Division will conduct annual training sessions with county circuit court clerks, election boards and voter registration officials to review standards and procedures and to assess the goals and objectives of the HAVA state plan.

If the Secretary of State determines the State Plan requires material change, the Secretary of State shall do the following:

1. propose changes to the Vote Indiana Team,
2. allow for public comment for a period of time not less than 30 days and
3. publish the changes in the ***Federal Register*** upon submitting the revised plan to the Election Assistance Commission.

Section 12

Sec. 254 (a) IN GENERAL – The state plan shall contain a description of each of the following:

(12) In the case of a State with a State Plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State Plan for the previous fiscal year and of how the State succeeded in carrying out the State Plan for such previous fiscal year.

This version of the State Plan is the initial State Plan required under the Help America Vote Act of 2002. This section will be updated in the next fiscal year, reflecting changes to the State Plan as well as a summary of the 2003 successes.

Section 13

Sec. 254 (a) IN GENERAL – The state plan shall contain a description of each of the following:

(13) A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the committee under such section and section 256.

Process

The Vote Indiana Team is comprised of 28 diverse Hoosiers who are all stakeholders in the election process and who bring ethnic, geographic and tri-partisan political diversity to the planning process.

Tasks were assigned to one of our five subgroups: Accessibility, Election Administration, Statewide Voter File, Training and Education, and Voting Equipment. Members served on two subgroups. Members were assigned to two subgroups, one per member's choice and one per chair's discretion to ensure balanced discussions. Members met over a six-month period including twenty-four subgroup meetings, which each lasted 1.5 hours, and five full team meetings. Meetings were held in accordance with Indiana's Open Door Law (I.C 5-14-1.5). Procedures on setting meeting agendas and handling deadlock were established at the first meeting. **Testimony and public comment were specifically sought at each meeting.** Meeting notes were kept of each meeting and made immediately available on the Indiana Secretary of State's website: www.sos.IN.gov. Materials were also available to the public by mail and electronic distribution. On the Secretary of State's website, a listserv permitted any individual with access to the internet to register as a member of the listserv and register any comments regarding the plan.

Letters were sent to each of the Clerks of Circuit Court and to county voter registration officials as local stakeholders advising them of the work of the Team and process involved for developing the state plan. In April, a draft state plan was developed in accordance with discussions from the subgroups, current legislation and ideas where gaps existed. The draft plan was distributed to the full Team for review at their April 11, 2003 meeting. Areas of concern were returned to the respective subgroup in order to reach a consensus. The subgroup's decisions were incorporated into the second draft that was also reviewed by the full Team prior to release for public comment.

The Vote Indiana Team met on May 30, 2003 to review subgroup suggestions and to discuss additional suggestions and comments from the entire group and from members of the public. At the conclusion of that meeting, the Team endorsed the submission of the Preliminary State Plan for public comment.

After revision of the document to reflect the Team's actions at its May 30 meeting, the Preliminary State Plan was made available for public comment beginning June 3, 2003 (See "Public Comment Period and Procedure" under this Section for additional information.).

The Team convened on July 18, 2003 to conduct a meeting to consider all public comment received to date. At the conclusion of the meeting, the Team recommended the State Plan for submission to the Election Assistance Commission. The Plan will also be published in the ***Federal Register*** and the ***Indiana Register***.

The final version of the State Plan is available on the Secretary of State's website: www.sos.IN.gov.

Public Comment Period and Procedure (June 3, 2003 – July 3, 2003)

Copies of the Preliminary State Plan were available at the Secretary of State's Office, the Indiana Election Division's office and via the website at www.sos.IN.gov. In addition, the Preliminary State Plan was specifically distributed to other interested parties during the public comment period of June 3, 2003 through July 3, 2003. The Vote Indiana Team members' diverse backgrounds directly and indirectly provided the accumulation of the following list.

- AARP Indiana
- Area Agencies on Aging (Family and Social Services Agency)
- Association of Indiana Counties newsletter *Indiana News 92*
- Clerks of Circuit Court, county voter registration officials and county election board members
- County commissioners, county council members, and county auditors
- Freedom's Answer
- Governor's Planning Council for People with Disabilities *On Target* newsletter
- Interested parties associated with the Governor's Planning Council for People with Disabilities
- Indiana Association of Cities and Towns
- Indiana Black Legislative Caucus
- Indiana Broadcasters Association
- Indiana Congressional Delegation
- League of Women Voters
- Libertarian Party of Indiana Central Committee
- Military Officers Association of America – Indiana Chapter
- NAACP chapter presidents in Indiana including the State NAACP president
- National Association of Latino Elected and Appointed Officials
- News Releases to Indiana media, Editorial Board interviews, and letters to editors
- Partners in Policy Making Academy coordinated by the Governor's Planning Council for People with Disabilities
- Urban League chapter presidents in Indiana
- Youth Vote Coalition

Comments were sent to the chair of the Vote Indiana Team in writing at the following address: Todd Rokita, Indiana Secretary of State, 200 West Washington Street, Room 201, Indianapolis, Indiana 46204, or were emailed to VoteIndianaTeam@sos.state.in.us. Public comment on the Preliminary State Plan was also left at 317-234-VOTE or by contacting the Indiana Election Division toll free in Indiana at 800-622-4941(TDD). Comments were also faxed to 317-233-3283.

All comments were distributed to all team members upon receipt. The team considered all public comment at the final VIT meeting.

Composition of the Vote Indiana Team

Todd Rokita, Chair
Indiana Secretary of State

Christa Adkins
Indiana Libertarian Party representative

Tami Barreto
League of Women Voters

Sen. Billie Breaux
Indiana Senate

Amos Brown
African-American community and media representative

Dick Dodge
Steuben County Commissioner and Association of Indiana Counties representative

Pam Finlayson
Allen County Election Administrator

Linda Grass
Hancock County Clerk

Dee Ann Hart
Disability community representative

Laura Herzog
Indiana Voter Registration Association

Suellen Jackson-Boner
Governor's Planning Council for People with Disabilities

Gen. Michael Kiefer
Military representative

J. Bradley King
Co-director, Indiana Election Division

Jon Laramore
Office of the Governor

Sally LaSota
Lake County Election Board Administrator

Rep. Ed Mahern
Indiana House of Representatives

Zach Main
Indiana Republican Party representative

Regina Moore
Indiana Voter Registration Association

Martha Padish
Vermillion County Clerk

Nick Rhoad
Disability community representative

Rep. Kathy Richardson
Indiana House of Representatives

Kristi Robertson
Co-director, Indiana Election Division

Col. Joe Ryan (Ret.)
Military representative

Doris Anne Sadler
Marion County Clerk

Sen. Becky Skillman
Indiana Senate

Joe Slash
Indianapolis Urban League

Patricia Wilson
Hispanic community representative

Robin Winston
Indiana Democratic Party representative

Facilitators: Sarah M. Taylor, former Marion County Clerk; Holly M. Davis; Anita L. Kolkmeier, General Counsel, Indiana Secretary of State's Office

This plan is respectfully submitted to the Election Assistance Commission, in accordance with Public Law 107-252, this 26th day of August, 2003.

Todd Rokita
Indiana Secretary of State

Items for Future Consideration

The Team put forth some additional ideas for future consideration following their charge for developing a blueprint for elections over the next five years.

(1) Department of Defense – "2nd generation voting"

This would require an amendment to the Constitution of Indiana to permit the children of overseas voters from Indiana, but who have never resided in Indiana themselves, to be eligible to register to vote upon meeting the requirements other than 30 days residence in Indiana.

(2) I.C. 3-11-8-3 flexibility of polling place relocation in rural counties.

(3) I.C. 3-6-6-13 majority vote of county election board to fill vacancies on precinct election boards.

(4) Although Public Law 209-2003 provides that lever voting machines and punch card voting systems may continue to be used in Indiana elections until December 31, 2005, the existing certifications for these systems should be revoked before that date so that no additional marketing of the systems can occur. To provide for more detailed scrutiny of applications for voting system certification, the General Assembly may wish to consider providing an up-to-four year term for certification, with all existing applications coming up for renewal during the off election year.

(5) Indiana Election Division explore future participation in Department of Defense project to permit military voters to cast ballots electronically through secured web based sites.

Appendix 1

INDIANA ELECTION REFORM HISTORY

The development and issuance of Indiana's plan to implement the Help America Vote Act of 2002 marks a significant moment in our state's history of election administration.

While the formation of the State Plan required the members of the Vote Indiana Team to look ahead to determine the wisest way to use our state's resources to bring about election reform in the years ahead, it also provides an opportunity to look back at Indiana's past efforts to ensure fair, honest, and accurate elections.

This look at our past tells us that many issues addressed in the HAVA Plan have been the focus of efforts to improve elections in Indiana since the earliest days of our state. In fact, the first elections were held in what is now Indiana in December 1798, well before statehood.

The voters in the Northwest Territory created by the Continental Congress in 1787, only won the right to elect legislative representatives after a dozen years of effort, and not without obstacles and opposition. When the election was finally permitted, the franchise was limited to free males who were at least 21 years of age. The polling places were literally few and far between in the vast expanse of the territory. Voters in what is now Indiana could choose between traveling by river or wilderness trail to Vincennes, Detroit, and a couple of locations near Cincinnati to cast their ballot. Voting was *viva voce* ("by voice"), meaning that the voter recited the names of the candidates he wished to vote for before an election board, which wrote them down.

When Indiana attained statehood in 1816, election reform was a topic at the first Constitutional Convention. In a compromise, *viva voce* voting was eliminated, but the General Assembly retained the option to return to that method if it chose to do so. Instead, the emerging political parties began to provide the voters with "tickets" that listed their candidates. These tickets varied in size and color, so the ballot was still not secret.

When Indiana adopted its present Constitution on November 1, 1851, many of the current features of our election system began to take shape. Voting was now organized by counties within precincts. However, in almost all cases, the "precinct" consisted of an entire township, and there was no voter registration system. Elections were held on uniform dates (the second Tuesday in October for general elections, other than the November presidential elections), but there was no opportunity to cast an absentee ballot. A circuit court clerk was elected with responsibilities for county election administration.

During the Civil War era and the remainder of the 19th Century, the increasing growth of cities and other changes in society brought attention to the inadequacies in Indiana's election system. The absentee ballot process began as an opportunity to permit military voters to fully participate in elections, without being called away from their post of duty. The growing presence of a non-English speaking group of immigrants in Indiana led to the official publication of laws and other

documents in their native language to educate the new German-speaking Hoosiers about the voting process.

Multiple voting by "repeaters" or "floaters" led to the adoption of a constitutional amendment requiring voter registration in Indiana in 1881. The franchise was expanded following the Civil War to include all adult males, regardless of race or color, repealing a ban on voting by African-Americans that had been enacted in Indiana in 1816.

However, the catalyst for sweeping election reform in Indiana was the controversial and disputed presidential election of 1888. Following charges of widespread election fraud in Indiana, Governor Isaac Gray initiated a bipartisan effort to restore public confidence in the integrity of the election process.

In 1889, the Indiana General Assembly enacted sweeping election reform legislation that became a model for other states. Indiana was the second state in the nation to require that voters be provided with government-issued, standardized secret ballots to replace the political party tickets. To safeguard the election process, bipartisan representation was required on all election boards, from the precinct level, to the county level, and in the newly created State Board of Election Commissioners. Counties were required to divide larger townships into multiple precincts to provide more accessibility to voters.

During the early years of the 20th Century, Indiana continued to refine and expand its election reform efforts. The franchise was expanded by constitutional amendment throughout the nation to include adult women. However, Indiana continued to be noted for its willingness to try innovative methods to improve the election process. Indiana embraced the new technology of lever machines after President McKinley signed a law in 1899 permitting their use in federal elections. In 1917, before the 19th Amendment to the U.S. Constitution was ratified, Indiana became one of the first eight states in the nation to pass legislation permitting women to vote in presidential elections. From 1915 until 1917, Indiana was (and so far remains) the only state to provide an "instant runoff" or preferential voting procedure in federal and state elections.

Despite this tradition of innovative reform, Indiana's election laws failed to keep pace with the sweeping changes of the 1930's and early 1940's. However, in 1945, at the urging of State Representative Edwin Steers, the Indiana General Assembly recognized the need to ensure the consistent and fair application of election statutes throughout the state, and adopted a comprehensive recodification of state election laws.

During the post-World War II period, Indiana election procedures continued to adapt to changes coming from the national level, including the expansion of the franchise to 18-year-old citizens and the elimination of lengthy residence requirements for voter registration. Likewise, Indiana continued to embrace new technology for voting, such as the punch card voting systems introduced in the 1970's. However, Indiana's very decentralized election administration system led to both a new national controversy and the incentive for renewed election reform.

Following the disputed 8th Congressional District election in 1984, national attention was focused on the lack of a uniform process for conducting multi-county recounts in Indiana. Under

the law of that time, each county conducted its own recount for the congressional election. After congressional hearings documented that the counties within the 8th District lacked consistent standards for counting votes, the Indiana General Assembly acted.

In 1986, the legislature began by enacting a new codification of Indiana election laws to better organize these statutes after forty years of amendments, and to repeal obsolete procedures. The State Recount Commission was created, and after conducting its first congressional recount in December 1986, recommended the adoption of legislation that established detailed and precise standards for counting punch cards and other types of ballots.

In 1987, the General Assembly continued its election reform efforts by enacting the recommendations of the Recount Commission as a part of one of the most comprehensive revisions in Indiana election law (Senate Enrolled Act 587). This 530-section statute authorized and expanded the use of new technologies such as direct recording electronic voting systems and optical scan ballot cards in Indiana elections, along with expanding county flexibility in locating polling places for access by voters with disabilities.

During the next dozen years, Indiana enacted several laws (and in 1998, a state constitutional amendment) to respond to new challenges in election administration. These measures included the protection of the voting rights of military voters and voters who moved during the final 30 days before an election, and the repeal of obsolete constitutional provisions, such as permitting township elections to be held in October. In response to the National Voter Registration Act of 1993, Indiana's voter registration statutes were comprehensively revised in 1995. The Census Data Advisory Committee was created as a permanent, standing body of the legislature to review and recommend changes to Indiana election laws. As a result of this Committee's work, significant election reform legislation was enacted in 1995, 1997, 1999, and 2003.

The 2003 legislative session also witnessed the enactment of Senate Enrolled Act 268, another comprehensive effort at election reform focused on the implementation of the Help America Vote Act in Indiana.

As a result of this rich heritage, Indiana stood in an enviable position to continue election reform in response to the 2000 general election and the enactment of the Help America Vote Act of 2002. It is hoped that the work of the members of the Bipartisan Task Force in 2001, and the Vote Indiana Team in 2003, the hundreds of county election administrators, and thousands of poll workers throughout the state will contribute to the success of the ongoing effort for election reform in Indiana.

Compiled and written by
J. Bradley King,
Co-Director, Indiana Election Division

Appendix 2

Indiana Bond Bank

Hoosier Equipment Lease Purchase (HELP) Program

Letter from the Chairman

To all potential participants:

The Primary mission of the Indiana Bond Bank is to assist local government in obtaining low-cost financing for their operations. To achieve our mission, the Bond Bank has developed several programs tailored to specific financing needs. The HELP program is one of these programs. Through the Hoosier Equipment Lease Purchase Program, local communities can acquire equipment at cash prices and utilize tax-exempt interest rates. Since its beginning in 1989, the program has assisted more than 135 communities in obtaining over $82 million in equipment. Interest rates for the program are based on the current U.S. Treasury Yield. According to a recent Internal Revenue Service Private Letter Ruling, small entities can also benefit from participation and still maintain their "small issuer" status. I encourage you to find out more about this standardized and streamlined lease-purchase program offered by the Indiana Bond Bank.

Sincerely,

Tim Berry
Chairman, Indiana Bond Bank
Treasurer, State of Indiana

Description of Program

- Assists communities in acquiring essential equipment through a standardized and streamlined lease-purchase process
- Standard lease term
- Minimum lease amount is $100,000
- Repayment flexibility; monthly, quarterly, semi-annually, or annually
- Eliminates the need to bid financing
- Rates are updated daily
- Over 135 communities assisted

Application Procedures

1. Complete one page application
2. Submit certain financial information
   Most recent audit report
   Current Budget
3. Approval process usually within seven business days

Applications can be submitted at any time. Upon credit approval from the Bond Bank lender, only lease documentation is required to complete the transaction.

Lease Equipment

Computers	Voting Machines	Buses
Phone Systems	Cafeteria Equipment	Ambulances
911 Emergency Equipment/System	Maintenance Equipment	Garbage Trucks
Safety, Security and	Police Cars	Tandem Trucks
Surveillance Equipment	Fire Trucks	Sewer Vacs

For questions about eligible equipment, contact the Indiana Bond Bank at 317.233.0888 or 800.535.6974.
Information can also be found at www.in.gov/bond.

State of IOWA Help America Vote Act State Plan

As required by Public Law 107-25, Help America Vote Act 2002, section 253 (b).

As adopted on July 17, 2003 with Public Comments

Chester J. Culver
Iowa Secretary of State
and Chief State Election Official

CHESTER J. CULVER
IOWA SECRETARY OF STATE

STATEHOUSE
DES MOINES, IOWA 50319

June 5, 2003

Dear Fellow Iowans:

As a result of the 2000 presidential election and the chaotic 36 day recount in Florida, in 2002 the United States Congress passed an election reform law to improve election administration in the United States. The legislation, called the Help America Vote Act (HAVA), had bipartisan and overwhelming support as demonstrated by United States Senate's 99 to 1 approval of the law. HAVA provides nearly $4 billion of federal assistance available to the states with Iowa's share being up to $35 million.

To receive federal funds, HAVA requires each state to write a Preliminary State Plan to be developed by the State HAVA Advisory Committee. The law requires the advisory committee to be appointed by the state's chief state election official. Required members of the advisory committee are the chief election officials from the state's two most populous jurisdictions. In addition, Congress recommends the inclusion of other stake holders on the committee including groups of individuals with disabilities, local election officials, and other concerned citizens. (Pub. Law 107-252, Sec. 255).

In February 2003, as the chief state election official, I was honored to appoint 17 distinguished Iowans from across the state to serve on the HAVA Advisory Committee. I also invited a number of technical advisors with special expertise to assist the committee. A complete list of advisory committee members and technical advisors is following. Each advisory committee member has worked hard during the last three months meeting, researching, and coming to consensus on the best election reform plan for Iowa. These committee members should be commended for their outstanding commitment to this important cause.

The advisory committee members are divided into five subcommittees to prepare each section of the *Iowa HAVA State Preliminary Plan (Plan)*. The subgroups are: voting equipment, voter registration system, education and training, budget and finance, and public policy. Each subcommittee made recommendations to the full advisory committee. The advisory committee held five public meetings from February through May and each subcommittee met three or more times.

HAVA requires public notice of the plan be published and a minimum of a 30-day public comment period be provided on the Plan. (Pub. Law 107-252 Sec. 256). On June 11, 2003 notice of the State Plan will be published in the Iowa Administrative Bulletin. In an effort to seek additional public comment, the Plan will be presented at 13 public hearings across the state. During these hearings, Iowans will be asked to comment publicly and share ideas to improve election administration in our state. Following the public comment period that ends July 15, 2003, the HAVA advisory committee will review public comments and make revisions to the Plan prior to its submission to the federal Election Assistance Commission.

As we move into the exciting implementation phase of election reform, interested Iowans and elected officials will continue to play an integral role in the process. Now that the Plan has been drafted, we must work together to better define specific implementation strategies for each major section of the Plan. The Advisory Committee with the assistance of technical advisors will work during the next three years to ensure successful implementation of the Plan. Additionally, HAVA requires an annual review of the planning and implementation process. The HAVA Advisory Committee members will be asked to assist with this annual review.

This *Iowa HAVA State Plan* is a blueprint for making Iowa's good election administration even better. The advisory committee and I share a common goal; Iowans should have the best election system in the nation. This goal will only be achieved by upgrading Iowa's election technology, providing better training for election officials, and increasing voter education opportunities for all Iowans.

Working together, I am confident we will not only successfully implement the election reform plan for Iowa, but I believe we will accomplish our goal of becoming a national leader in election administration.

Sincerely,

Chester J. Culver,
Iowa Secretary of State and
Chief State Election Official

Introduction and Background on Election Reform

By Secretary of State Culver

Election 2000 and the chaotic 36-day recount in Florida presented our nation with one of the closest presidential races in history – one we will not soon forget. As Iowa's Secretary of State and chief state election official, I came away with three primary lessons from Election 2000.

The first lesson is not new, and it is a lesson we can never be reminded of too often. Every vote must count for each Iowan who has a right to vote. Every Iowa voter should have "equal protection" when it comes to voting--all of our citizens deserve the same guarantee that their vote will be recorded correctly regardless of what county they live in and what type of voting equipment they use. Additionally, in an effort to keep our democracy strong, Iowans must have a high level of confidence in the voting process. There is no crisis. Iowa has a well-earned and deserved reputation for conducting clear, open, and honest elections. In fact, Iowans consider their elections to have high integrity as noted by a statewide *Des Moines Register Iowa Poll* released on Election Day, November 5th, 2002. It revealed that nearly 80% of Iowans polled ranked the quality of Iowa's election administration as very good.

The second lesson learned is that Iowans deserve a thorough review of our election practices and procedures and improvements must be made where necessary. After conducting public hearings in each of Iowa's five congressional districts to seek public input, in March of 2001 my office issued a report, ***Iowa's Election 2000: Facts, Findings and Our Future***. The report and hearings emphasized election administration strengths and challenges. In addition, the 2001 report provided us with a vision for the future of Iowa's elections.

The third and final lesson learned is that the federal government needs to take a more active role in providing the states with uniform and consistent standards and funding to prevent another Florida fiasco from occurring. The Presidential Election of 2000 was a very embarrassing and traumatic event for our country and our democracy. We should never again have to wait 36 days after Election Day to determine the next President and 4 to 6 million Americans should never again be denied the right to have their vote counted.

I am pleased that the federal government decided to assist states and counties with election administration when the U.S. Congress passed the Help America Vote Act (HAVA) of 2002. This national election reform law was designed to make the necessary changes to level the playing field in all 50 states by giving our citizens "equal protection" when they vote. HAVA received overwhelming bipartisan support as demonstrated by United States Senate's 99 to 1 approval of the law. In the U.S. House 363 members, including the entire Iowa delegation, voted for its passage. As an active participant in developing the federal election reform legislation, I was honored be invited to join the President and members of Congress at the HAVA bill signing ceremony in October 2002.

The problems with the presidential race of 2000 taught us all some very important lessons about our need to continually make investments in our democratic process. The Help America Vote Act provides Iowa with a tremendous opportunity to improve election administration and bring our voting process into the 21st century.

Help America Vote Act

Public Meeting Summary

Over a period 40 days, the Iowa HAVA State Plan Advisory Committee, in cooperation with the State's Chief Election Official conducted 13 public meetings and discussion sessions across the state of Iowa. The primary goals of these public meetings were to inform Iowans regarding the federal HAVA legislation; listen to Iowans' concerns and suggestions regarding voting in the state; and provide a forum for discussion, information, and ideas relating to the Iowa HAVA Preliminary State Plan.

The public meetings were held in Iowa's large and small communities throughout the state. Care was especially taken to ensure accessibility to the meeting place for all, that appropriate accommodations were made prior and during the public meeting, and the public meeting was fair and open to the public. The format at each public meeting required all participants to sign in for the record. At that time, each was given an opportunity to speak to his or her particular issue. Following a presentation by panelists representing the State Plan Advisory Committee and the Secretary of State's Office, participants commented for the record. In an effort to engage others attending the meetings, the meeting facilitator opened up the meeting for questions and comments. All aspects of the meeting and discussions were audio recorded for public purposes. Each comment or question was a part of the record, as was the response and discussion.

The 13 meetings were held in the following locations from the period of June 5 to July 15. Also indicated is the number of registered participants. It is estimated that nearly 1,000 individuals attended these meetings.

Creston	**48**	**Neola**	**16**
West Des Moines	**76**	**Cedar Rapids**	**114**
Burlington	**51**	**Waterloo**	**82**
Knoxville	**47**	**Mason City**	**139**
Dubuque	**73**	**Spencer**	**46**
Sioux City	**71**	**Fort Dodge**	**54**
Davenport	**45**		

The contributions from the meeting participants primarily focused on ideas or suggestions for the implementation of the HAVA State Plan, rather than specifics for amending the preliminary draft of the plan. These suggestions focused on a range of issues including: disabilities; voting; polls and poll workers; absentee ballots; training and education; voter fraud; trust of technology; funding; costs for HAVA implementation; voter registration; and others, which took into account a variety of comments.

While there were efforts by the facilitators to diminish the political focus of the discussion and concerns about the pending lack of commitment from the state to provide the matching funds, there were considerable comments regarding this issue. There were also some participants who weighed in on broader voter issues not encompassed in the federal HAVA law, such as creating a voter holiday, same day registrations, and broad Internet voting.

Three significant issues need to be mentioned. Across all of the meetings, there were many questions and suggestions relating to the implementation of the education and training component of HAVA. A number of participants also have a concern about the process for absentee voting in Iowa. This concern ranges from the mail-in ballot procedures, to counting these ballots, to soliciting them in long-term care facilities. A third issue that surfaced was a concern about the trust or fear of technology. Some participants were concerned about simply trusting the machines to record the votes, while others felt a great deal of uncertainty regarding the ethics of machine voting.

There was a great appreciation by participants and state and local elected officials who attended the public meetings. Consistently, there were comments that reflected the need for these meetings, and an appreciation of the effort for traveling throughout the state to meet with Iowans to present the HAVA Preliminary State Plan.

State of Iowa
Help America Vote Act State Plan

Help America Vote Act
Public Meeting Summary of Comments

As a part of the Secretary of State's effort and in cooperation with the HAVA Plan Advisory Committee, 13 public meetings were held throughout the state to listen to Iowans thoughts and discuss the Help America Vote Act (HAVA) Iowa State Preliminary Plan. These meetings did more than meet the requirements of "public input" as outlined in the HAVA federal legislation. It gave the State's Chief Election Official, the Advisory Committee, County Auditors, and local and state elected officials an opportunity to know more about this important legislation and participate in the planning process for implementation. The following comments were gleaned from the discussion and represent issues and concerns that were posed during the public testimony and public discussion at the 13 meetings. The comments were arranged by theme or category, and there is no attribution. Please note that only the comments and questions from the participants have been provided, not the responses from the panel or facilitator

Disability

- Make voting easier
- Concern about what will be required
- What about non-readers
- Will these machines be available for all people to use
- Will you still be able to vote from the car if you are disabled
- Need considerable education and training
- Make materials available and useful to everyone
- Need to make it easier for persons with disabilities to vote
- Accessibility to many polling places is a major problem
- Need to have these DREs for persons with disabilities and the state legislators should realize this
- Privacy is so very important to everyone in voting
- What will this do to help low-sighted people
- Will there be large print ballots
- HAVA allows voting by audio instruction
- How will the DRE machines be chosen for the state
- Is it true that the rural areas do not need a DRE for every precinct
- Who decides which one of the machines or the brand of machine to be purchased

Education and Training

- There is a need to learn how to interact with persons with disabilities
- Need disability training especially on the special machines
- Need a lot of voter and voting education
- Concern about election turn out being so low
- Concern about how uneducated voters are
- Need more training on the use of absentee ballots

- Involve High School students in training development efforts
- Use students to help with the elderly
- Conduct public sessions to teach the public how to use new machines
- Use the Iowa Communication Network (ICN) to train
- Train and educate at malls
- There is a tremendous need for voter education
- There is a need for Hispanic voter education
- Be creative in how you approach training and education using all kinds of groups
- Develop a means to ensure less of a fear of technology
- Familiarize Latinos with machines
- We need more thorough and complete training at all levels
- Need to integrate voter education in the schools
- Need to make it as easy as possible to ensure that the elderly maintain their dignity
- Train in our schools
- Need to help elderly with machines
- Need to clarify procedures and adopt universally for all counties
- Important to educate persons with disabilities
- Help educate those in the military about their voting
- Educate young people
- There is a lack of consistency across counties in policies of elections
- As difficult as it is, educate citizens at all levels
- Educate voters regarding these new procedures
- Teaching persons with disabilities should be a priority
- Concern about the machines intimidating people
- Be sure there is sufficient communication at the grass roots level
- Work to educate our seniors

Voter Registration

- There is a need to track voters better
- Need a statewide system
- Need for privacy
- The state system will help with many problems
- The state registration system will be fairer
- Are we going to replace the entire voter registration system
- Want to be able to continue to register to vote in the county
- Changes will help some of the absentee balloting concerns
- People need to prove at the polls they are registered
- Recruit persons with disabilities for training
- New technology will be difficult to learn for poll workers
- Duplicate registration systems is a concern

- Will there be a nationwide check on registration
- Concern about the DOT Driver's Station transition in the past with Secretary of State

Absentee Balloting

- There is a need to clarify the process
- Concern about the existing legislative proposal regarding who delivers the absentee ballots is restrictive
- Need to determine a better way to do absentees for those hospitalized
- There are issues regarding reform that need to be addressed, need to be addressed in a separate way
- Concern about absentee ballot lateness
- Political parties should not control the absentee ballots
- Absentee ballots should be mailed back in pre-stamped envelopes
- Need to work to eliminate any chance of fraud
- What has been the percentage and error rates for absentee ballots in Iowa
- Concerned about absentee ballots
- Confused voters at times who forget they wanted absentee ballots
- Need to be more clear in our policies

Trust of Technology

- Have no trust
- Concern about an answer to issues of technology concerns
- Need to track computerize votes to make sure they are not manipulated – paper trail
- Concern about trusting technology
- Concerned about the loss of electricity and the computers going down
- What about power outages and what can we expect
- Who is eligible to use the DRE machines
- I want to see my vote
- Concern about a computer program that can wipe out votes
- How do we recount with no paper
- DRE machines could be rigged
- Need to see the vote I put down

Voting Fraud

- General concern about fraud in the system
- Not concerned about fraud
- Concerned about people who die and are still registered to vote
- Need to ensure the continuation of provisional voting
- Use the machines at the courthouse to count absentee ballots
- More checks in absentee balloting for certain people

- Concern about the increased use of absentee ballots
- Voter fraud is a serious misdemeanor
- Concern about someone opening the outside envelope prior to counting
- Concern about not using Ids at the polls
- In Wisconsin, students voted many times and there was no punishment
- Need a machine certifications to make sure machines work properly
- Is there really any voter fraud in absentee balloting
- There is required federal and state certification of machines

Voting

- Will we get rid of paper all together
- Iowans want a choice in how they vote
- Want to continue the use of the absentee ballot system
- Need to speed up voting in some precincts while others have no one
- Make it easier, not harder
- DREs will help to eliminate spoiled ballots
- Most spoiled ballots are absentee ballots where there is no second chance
- Are ballots and information in other languages than English
- Concerned about voting process at long-term care facilities
- Concern we are one of the 13 states that does not allow certain felons to vote
- Only half the people vote, but it is higher here in Iowa
- Is there a back-up system to the machines
- Do you have a paper trail with DRE machines
- Who signs off on Iowa's election reform
- Will each or all state be doing the same as it relates to voting
- Is Iowa's voting system any better than the other states

Costs Associated with HAVA

- Concern that some counties may be penalized for buying new machines that already comply
- Unfairly being penalized in some counties because of recent investments
- Concerned about the costs for small counties if funds are not available
- The costs of these computers will be very expensive
- Concern about getting stuck at the local level with paying for these improvements
- This is a cost to the taxpayer if the legislature does not help match these funds
- The additional costs in money and time is very high
- Many counties need new software for DREs to make them compatible with their current system
- Under the plan, there is no budget for administrative complaints

Poll Workers and the Polls

- Difficult and very long days
- Close the polls an hour earlier to help poll workers
- Consider persons with disabilities to work at polls
- Would like to see the number of hours the polls are open reduced
- Recruitment is difficult
- It is not the pay, but a lack of party affiliates in some precincts
- Will the poll time change under HAVA
- Shorten poll hours to help the workers
- Recruit 16 and 17 year olds to work at polls

Funding Concerns for HAVA

- Concern that the state is not going to provide the match
- Will the federal government fund us
- I am angry with the state and federal government for not supporting voting
- Concerned about the lack of state match funding
- Is the money that is available on a first come, first serve basis
- Need to fund this at the state level
- Is the federal funding available if the state does not provide the match
- If the plan is in place and there is no match, the counties will have to fund the HAVA compliance issues
- We need to have the state fund this when we are trying to get more people to vote and fewer people disenfranchised
- Will the majority party decide to match funds
- When is the state going to provide the match to counties
- Looking forward to working with the SOS office and the Governor in support of the state match
- The lack of state match has put a burden on counties and this is very difficult
- This should be non partisan because it will help both parties
- Concerned about the lack of funding at the state level
- If the state does not fund the match, we lose at all levels
- Hope the deadlines can be extended by the federal government to allow us to comply
- Concern about the federal government not appropriating the full amount of the funding
- Federal funding is needed
- Concerned about the legislature not providing matching funds
- Taxpayers need to understand that if the state does not contribute, it could cost the county $100,000
- Because of funding cuts to local governments, we may have to cut down on the number of precincts which actually would cut down the number of voters
- The loss of any federal funds would be detrimental
- Need the federal funding to fully fund what they promised
- Disgusted with the legislature
- Hope the Legislature funds this

- What do these machines cost
- What will be available at the state level to help counties
- Concerned about what happens if the legislature does not fund the matching funds
- The state legislature should not have made this a partisan issue, but should have passed a clean HAVA bill

Other Issues

- Need to make election day a National Holiday
- Establish a Voter Holiday
- Implement election day registration
- Consider using the Internet for voting
- Thank the auditors for their work
- Concern about forcing controversial policies into HAVA legislation
- Have election day registration
- Should the control of the voting system be given to a nonpartisan office
- Do not want election officials to be partisan
- There is too much emphasis in this office on voter education
- Fantastic job done by the SOS office
- Minnesota has same day registration and we should too
- Appreciate meetings and efforts
- How will overseas internet votes be counted with our own here
- Can those voting overseas vote for state officials
- What part of the HAVA bill that the Governor vetoed was not in compliance with the federal act
- Am not sure if the Legislative Council has the authority to appropriate funds for the match

SECTION 1: STATE PLAN REQUIRED ELEMENTS

ELEMENT 1. How the state will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(b)(2) to carry out other activities to improve the administration of elections. HAVA section 254 (a)(1)

301. VOTING SYSTEMS STANDARDS.

Iowa currently has 5 types of voting systems in place in its 99 counties. The following table, Iowa's Current Voting Systems, summarizes the types of system and the prevalence of use.

Iowa's Current Voting Systems

Lever	6	95
Paper Ballot	1	9
Central Count Optical Scan	59	909
Precinct Count Optical Scan	18	715
DRE	15	269
Total	**99**	**1,997**

Evaluate Voting Systems

Iowa will conduct a comprehensive study of the voting systems in place to determine: (1) which systems are in compliance with section 301; (2) which systems not in compliance can be brought into compliance, and (3) which systems cannot be brought into compliance.

Replace Lever County Machines with HAVA Title I Funds

Iowa's first voting equipment priority is lever machines. Lever counties will be provided partial reimbursement to replace their election systems. Only replacement equipment meeting the 2002 Federal Election Commission (FEC) voting system standards is eligible for at least partial reimbursement.

Meeting Accessibility Requirements

The State Plan Advisory Committee recommends that the State of Iowa meet the requirement that each precinct contain accessible voting equipment by the placement of a minimum of one DRE per polling place. At least partial reimbursements will be provided for the DRE, the supporting software, and tabulation packages from HAVA requirements payments.

Voting Equipment Technical Support Services

To assist with the conversion process to DRE based systems in the lever counties and in each precinct to meet accessibility requirements, it is recommended that a technical support staff with extensive training on the prevalent voting equipment be established. The technical support services shall initially be funded entirely with HAVA funds. After the establishment of the program the funding will be re-evaluated and funding this position through a county and state partnership will be considered.

302. Provisional Voting and Voting Information Requirements.[1]

HAVA addresses the process of provisional voting to ensure that no individual who goes to the polls intending to cast a ballot is turned away without having the opportunity to do so. In 1975, Iowa enacted provisional voting legislation. In developing the State Plan, the Chief State Election Official assessed the state's recent provisional voting legislation to determine those elements needing modification in order to fully comply with HAVA.

HAVA requires that the precinct election officials inform voters who may cast provisional ballots of this right. Iowa law does not currently require this, but a change to Iowa Code section 49.81 was included in the 2003 legislative proposal by the Chief State Election Official.

- **Provisional Voting Program Milestones**
  The Chief State Election Official is in the process of proposing updates to legislation governing the State's provisional voting program.

- **Voting Information Program**
  Current Iowa law requires the Chief State Election Official to furnish instructions regarding voting procedures for posting at each polling place on Election Day. HAVA imposes new content requirements for the instructions. Alternative methods of disseminating information will be developed for Iowans of diverse cultures, skills, and abilities. The proposed HAVA implementation bill in the Iowa General Assembly includes the necessary adjustments to the required content of these instructions.

HAVA section 302 further provides that voters who vote (pursuant to a court or other order) during extended hours after the normal close of a polling place, cast provisional ballots. These ballots must be kept separate from other provisional ballots. The state did not previously include this requirement as part of its provisional voting law and procedures, and consequently, the Chief State Election Official will update administrative rules to comply with procedures as described above.

[1] **Provisional voting** is a way for a person to cast a ballot if the voter's qualifications have been questioned either because the person's name does not appear on the election register, or because someone has challenged the person's right to cast a ballot. The ballot is sealed in an envelope and kept separate from other ballots. The absentee and special voters precinct board reviews written evidence submitted by the provisional voter, the challenger and the voter registration records to determine whether the ballot will be counted. If the ballot is rejected the voter is notified of the reason.

303. Computerized Statewide Voter Registration List Requirements and Requirements for Voters Who Register by Mail.

Currently, the official State voter registration records are created and maintained at the local jurisdiction level. Each county auditor updates and separately maintains voter registration records for its jurisdiction, with 52 of the state's 99 jurisdictions using a uniform mainframe system. The Chief State Election Official does, however, maintain an aggregate list, referred to as the centralized voter registration database. On a bi-weekly basis, county auditors send data files to the Chief State Election Official, and these are merged into the centralized voter registration database. The database is accessible to the county auditors and to the voter Registration Division of the Chief State Election Official. The Chief State Election Official performs multiple checks for voter registration duplicates and distributes reports to the county auditors, who then manually update their databases by removing the duplicates.

As explained above, the Chief State Election Official's database is not the "single, uniform, official, centralized, interactive, computerized statewide voter registration list" required by HAVA because Iowa's voter registration system is entirely county-based. A complete replacement of voter registration software is required. Moreover, information gathered and maintained on State voters does not uniformly include driver's license numbers or partial social security numbers, as required by HAVA.

The mail-in voter registration process in Iowa currently meets HAVA requirements. The mail-in voter registration form was redesigned to accommodate information required by HAVA. However, the voter registration and polling place voter qualification processes must be modified to allow for the verification of identification provided by first-time voters who register by mail.

In order to comply with the voting system requirements of section 303, the State of Iowa has developed the following Plan for the acquisition of the necessary voting equipment and support services.

Study Iowa's Current Voter Registration System

- Review HAVA section 303 to determine requirements for system and necessary changes in procedures and regulations/legislation

- Find system capability of each county.
  1. Find out how much infrastructure is available (computers, operating systems, and software).

  2. Every county should begin at the same infrastructure point - some counties need computers, internet connections, etc.

- Choose one auditor that represents each type of voter registration vendor/system in use and inquire about the different functionality these systems have (soliciting specifics for RFP).

- Involve all users in developing a shopping list of functions (has already begun and is on-going).

Federal Register / Vol. 69, No. 57 / Wednesday, March 24, 2004 / Notices 14411

- Define a list of the roles and responsibilities of implementing the functions of voter registration to enhance the operations of each county auditor's office.
- Establish a users group.
- Develop a training plan for new voter registration system.
- Develop an RFP, and determine which vendors can meet the specific functional requirements determined by the users group.

Administering and Implementing Plan

- Work with county auditors to create a comprehensive resource plan, schedule and work plan.
- Examine vendors: general review of the industry
    1. See what systems are available.
    2. See which vendors will be viable in future years to service the product.
- Seek input from other states and counties about their previous purchases.
- Meet with vendors.
- Meet with others who have bought vendor products.
- Complete a hardware and software evaluation of each county.
- Develop an implementation schedule.

Estimated Project Duration

Meet with county auditors and users group	45 days
Compile list of required functionalities	15 days
Write and submit RFP	30 days
RFP bids due to CSEO	30 days
Award contract to vendor and begin software development and conversion	30 days

Voter Registration by Mail

HAVA section 303 includes new identification requirements for voters who register by mail and who have not previously voted in an election for federal office in the county. These requirements took effect January 1, 2003. As part of this mandate, the State of Iowa developed new voter registration forms that include:

- The question, "Are you a citizen of the United States of America?"
- The question, "Will you be 18 years of age on or before election day?"
- The statement, "If you check 'no' in response to either of these questions, do not complete this form."
- A statement informing the individual that if the form is submitted by mail and the individual is registering for the first time, the appropriate information required under this section must be submitted with the mail-in registration form in order to avoid additional identification requirements when voting for the first time in a federal election. Sufficient identification can include valid photo identification or a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter.

Iowa has created a new voter registration application to reflect the needed changes and a process ensuring that registration and voting are handled properly under the new law. For voters who do not submit identification with their registration, county auditors will take the appropriate steps.

304. Minimum Requirements.

The State understands that the requirements of HAVA Title III are minimum requirements, and that the State may establish election technology and administrative requirements that are more stringent. Any additional requirements that the State imposes will comply with all Title III requirements as well as the laws described in HAVA section 906.

305. Methods of Implementation Left to Discretion of State.

Implementation of Title III is left to the State. The previous portions of section 1 of this plan describe the methods for implementation of each section of Title III.

312. Adoption of Voluntary Guidance by Commission.

The State will consider any guidance issued by the federal Election Assistance Commission (EAC) in its periodic updating of the State Plan.

251(b)(2). Other Activities.

The State of Iowa will not participate in activities authorized under 251(b)(2) this year.

SECTION 2: DISTRIBUTION OF REQUIREMENTS PAYMENTS

ELEMENT 2. How the State will distribute and monitor the distribution of requirements payments to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of —

(a) the criteria to be used to determine the eligibility of such units or entities for receiving the payment; and

(b) the methods to be used by the State to monitor performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adapted under paragraph (8). HAVA section 254 (a)(2)

Eligibility of Local Units to Receive the Payment

Funds will be distributed based on availability and the priorities established in this state plan. Counties may be eligible to receive at least partial reimbursement for election equipment purchases. To receive reimbursement, the county will first submit to the Chief State Election Official an equipment purchase proposal. The proposal will include the equipment to be purchased, the total amount of purchase, and anticipated delivery and implementation dates. The proposal should be submitted by the county auditor and the county board of supervisors and signed by both the county auditor and the board of supervisors chair on behalf of the board. Reimbursement will be based on group purchase prices and funds available. The Chief State Election Official will verify that the equipment meets HAVA requirements and notify the county of the proportion of HAVA funding available for the equipment purchases. Funds will be distributed based on availability and applying criteria developed by the HAVA Advisory Committee.

Upon receipt of the notification, the county may then make the purchase, submit a copy of the contract and/or invoice for the equipment to the Chief State Election Official for prompt distribution of the HAVA portion to the county. Annually, each county auditor and board of supervisors receiving HAVA funds will be required to certify the equipment purchased with the funds.

Performance Measures

The performance measures detailed in section 8 of the state plan will be used to evaluate participation and effectiveness of disbursements. The Chief State Election Official will submit a quarterly report of expenditures and disbursements from the Election Fund to the Legislative Oversight Committee, the Governor, Executive Council and the State Plan Advisory Committee. The plan will also be posted on the Chief State Election Official's website.

SECTION 3: VOTER EDUCATION, ELECTION OFFICIAL EDUCATION AND TRAINING, AND POLL WORKER TRAINING

ELEMENT 3: How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III. HAVA section 254 (a)(3)

Education and training programs are critical to a successful program of election reform in Iowa. The programs described in this document will be planned to ensure that all participants, including eligible voters, poll workers, and election officials are comfortable with the new processes and supporting technologies that HAVA requires, as well as the existing election procedures.

A thorough and thoughtful training and outreach program can increase the sense of ownership of all affected groups and individuals in the election process. It is important to develop the training and outreach program with the participation of the county auditors, as they are a critical component to the current and future process and will provide valuable expertise. The program must also account for the changing poll worker and election official workforce, so that training is effective for a group with varying levels of skill. Finally, HAVA brings increased accessibility to elections. Training programs must address the needs of all diverse communities. In collaboration with the county auditors, effective training and outreach will help provide for smooth implementation of the State Plan, and for improved administration of federal, state and local elections in Iowa.

Training Program

The Chief State Election Official shall establish a central training and outreach program within the Chief State Election Official's office. This program will serve as the liaison among all county auditors regarding training: ensuring county auditor participation in training development, statewide standardization, coordination among county auditors and vendors responsible for new technologies, and general consistency of message and delivery across the State of Iowa. This entity will also track progress and report on effectiveness of training and outreach efforts.

Voter Outreach Education

Clear, consistent, user-friendly outreach materials are important tools to increase accurate voter registration, increase voter turnout in all elections, reduce the number of voting errors, inform voters of the means to obtain replacement and provisional ballots, and assure access to the electoral process to all voters. These materials must include the voter education programs required by HAVA for:

- Users of mail-in absentee ballots, paper ballot voting systems, and central count voting systems by HAVA section 301(a)(1)(b) and
- Voting Information for Election Day display at polling places pursuant to HAVA section 302(b).
- Voter registration application and identification requirements of HAVA section 303.

- Voter outreach education will be designed to inform the public about HAVA and its new requirements and previously existing election procedures.

The Chief State Election Official will seek participation of representatives of Iowa's diverse culture groups to develop educational materials through an outreach program. These materials will provide a consistent message, including benefits of voter registration, equipment changes, and guidance in how to participate in elections.

The State will develop an outreach and communication plan describing the strategy for developing and delivering uniform messages to a variety of diverse groups. This plan will emphasize the use of presentation formats designed for the range of diverse needs of Iowa's voters.

Voter education materials will be enhanced for accuracy, readability, and ease of use through improved, professional designs. These materials may include, but are not limited to:

- Non-visual presentations using braille and audio tapes and other media
- Voter Bill of Rights
- Voter registration cards and instructions
- Absentee ballots and voting instructions
- Voters' pamphlets – Voter Guide, Candidate Guide
- Training focused on first-time voters
- Iowa Voter Registration Day
- Posters at polling place to advise voters on new voting equipment and procedural changes
- Voter education display at county courthouses
- Voter education kiosks
- Internet website maintained by the Chief State Election Official
- Instructions for provisional voting
- PSA (through television, radio, newspaper and cable systems)
- State and county fair booths to distribute information
- Languages other than English used in Iowa
- Telecommunications devices for the deaf in state and county election offices
- Toll-free election information line in the office of the Chief State Election Official

Milestone	Date
Prepare educational materials	Current – January 2004
Begin educational program for voters	January 2004
Distribute educational materials and continue to enhance as necessary	March 2004

Poll Worker Training

The goal of poll worker training is to increase consistency in the election-day management of Iowa's polling places, and to ensure that all voters receive uniform and appropriate messages from their poll workers. The training will include and emphasize the HAVA-mandated requirements (see section 301) to inform voters of the means to obtain replacement and provisional ballots. Training programs will be developed for each type of election, as well as for each type of voting system in use in Iowa. This training program will assure equal access to the electoral process for all voters and guide the poll workers to be able to administer the election efficiently, effectively and fairly to all voters in consideration to Iowans of diverse cultures, skills and abilities.

The Chief State Election Official, along with county election officials, poll workers and a diverse group of Iowans, will develop educational materials for county auditors to use for their poll worker training sessions. The program will also include training programs for the county officials who will be providing instruction to the poll workers. The plan content will include a consistent message, including positive benefits of voter registration, equipment changes, and participation in general. Special consideration and training will be provided for assisting voters of diverse cultures and skills to improve the voting experience.

State and county election materials will be enhanced where necessary for accuracy, accessibility, and ease of use through improved, professional designs. These materials may include, but are not limited to:

- Video
- PowerPoint presentations
- Role playing
- Handouts
- Internet and/or computer-based
- Training manuals in print, large type, braille and audiotape
- ICN – Iowa Communications Network
- Job-specific instructions

In addition, the Chief State Election Official will assist the county auditors by designing programs intended to increase the size and diversity of the poll worker pool, such as exploring voluntary participation by businesses to allow workers to work at the polls for the day without loss of pay or benefits.

Milestone	Date
Prepare training materials for county auditors	March 2004
Deliver training materials to county auditors	May 2004
Train Auditors to use materials	May 2004
County auditors train poll workers	End of May 2004
Continue to enhance materials as necessary	Ongoing

Election Official Training

All participants in the election process can benefit from instruction in election law and procedure. The creation of training materials and programs is a shared responsibility of both state and local election officials. Some responsibilities fall to the Chief State Election Official, who is charged with the duty to ensure uniformity in the application, operation and interpretation of the election laws. County auditors in Iowa, through the State Election Administrator's Training (SEAT), have assumed responsibility for developing and maintaining a training and certification program for election administration, by addressing:

- New requirements by Federal/state law, or administrative rule changes
- Interpretation of the laws
- New voter registration software; forms, fields, requirements
- Motor voter registration
- SEAT curriculum content needs to be made universal
- Absentee balloting
- Early voting, satellite voting, voting by mail
- New accessibility requirements
- Cultural and alternative language accessibility
- Disability and other populations – diverse cultures -- etiquette in relation to voting
- First time voters – how to help people vote when they are unfamiliar with the system
- Benefits of new system
- Selection of poll workers; payment system/method (fiscal impact of poll worker training)

The State Election Administrator's Training (SEAT) is a training and certification program for Iowa election officials. SEAT has initial certifications of proficiency and continuing education components. The SEAT certification is designed to ensure that all election officials are familiar with the current election laws, procedures and practices. This program will continue to operate with funding from HAVA.

Currently, the Iowa State Association of County Auditors (ISACA) and the Chief State Election Official maintain regular educational programs on current election topics at statewide meetings held in March, July and November. These programs will continue to be offered.

[illegible]	[illegible]
Prepare training materials for election officials	Current
Train Election officials	January 2004
Continue to enhance training materials as necessary	Ongoing

County Supervisors Training

This training program will be separate from the election official training, allowing the county board of supervisors to keep updated on the law with regard to their role in the election process. This program will be developed by the Chief State Election Official, and will begin before the next federal election. The county boards of supervisors have statutory responsibilities for canvassing elections and in selecting voting equipment for the county. Supervisors are also responsible for approval of county budgets, including funding for elections and election equipment.

SECTION 4: VOTING SYSTEM GUIDELINES AND PROCESSES

ELEMENT 4. How the state will adopt voting systems guidelines and processes which are consistent with the requirements of section 301. HAVA section 254 (a)(4)

Elements of Voting System Standards Currently in Iowa Law

Required Performance Features
HAVA section 301(a)(1)(A) requirements are also mandated in the 2002 FEC Voting Systems Standards. Current Iowa law and administrative rules require all voting equipment used in Iowa to be NASED-qualified under the 2002 Federal Election Commission Voting Systems Standards before being examined and tested by the Iowa Board of Examiners for Voting Machines and Electronic Voting Systems. All new voting equipment approved in Iowa after April 9, 2003, and subsequently purchased for use will meet the requirements of section 301(a)(1)(A).

Voter Education Program
The Instructions for Voters required by *Iowa Code* section 49.68 currently include notice to voters required by HAVA section 301(a)(1)(B) to substitute for the automatic notice and correction features of section 301(a)(1)(A)(iii).

Privacy Requirement
HAVA section 301(a)(1)(C) requirements are also mandated in the 2002 FEC Voting Systems Standards, which must be complied with by any voting system certified for use in Iowa after April 9, 2003.

Audit Capacity
HAVA section 301(a)(2) requirements are also mandated in the 2002 FEC Voting Systems Standards, which must be complied with by any voting system certified for use in Iowa after April 9, 2003.

Accessibility for People with Disabilities
HAVA section 301(a)(3)(A) requirements are also mandated in the 2002 FEC Voting Systems Standards, which must be complied with by any voting system certified for use in Iowa after April 9, 2003.

Alternative Language Requirements
No Iowa jurisdictions are covered by the requirements of section 203 of the Voting Rights Act of 1965. Therefore, the requirements of HAVA section 301(a)(4) do not apply to Iowa. However, it is recommended that the Chief State Election Official propose the inclusion of alternate language capacity for all voting systems in the department's legislative proposal for the 2004 General Assembly.

Error Rate
All new voting equipment approved in Iowa after April 9, 2003, and subsequently purchased for use will meet the error rate requirements of section 301(a)(5).

State of Iowa
Help America Vote Act State Plan

Elements of Voting System Standards Not Addressed in Iowa Law

The Chief State Election Official will recommend the following changes to the *Code of Iowa* to meet the following requirements of section 301. The proposal will be presented to the 2004 Session of the Iowa General Assembly.

Uniform Definition of What Constitutes a Vote - HAVA section 301(a)(6).
The Chief State Election Official will convene a committee to discuss the details of a legal definition of a vote to be recommended for inclusion in the Code of Iowa. The committee will be convened in June 2003 and their final report will be due November 1, 2003.

Voting System Defined - HAVA section 301(b).
The Chief State Election Official will recommend for inclusion in the *Code of Iowa* the definition found in HAVA section 301(b).

Effective Date - HAVA section 301(d).
Amend *Iowa Code* section 52.1. All voting equipment not in compliance with HAVA and the FEC 2002 Voting Systems Standards shall be removed from use in the State effective January 1, 2006.

Elements of Voting Systems Requiring Changes to the Administrative Code

The Chief State Election Official will propose the adoption of the following changes in the *Iowa Administrative Code* to meet the following requirements of section 301.

- Amend the definitions in 721Iowa Administrative Code 22.1, to conform to the definition of voting system found at section 301 (b).
- Amend 721 Iowa Administrative Code 22.18 to include the automatic decertification of all voting equipment that does not conform to the requirements of HAVA.

SECTION 5: HAVA FUND MANAGEMENT

ELEMENT 5. How the State will establish a fund described in subsection (b) for purposes of administering the State's activities under this part, including information on fund management. HAVA section 254 (a)(5)

The Chief State Election Official, acting in conjunction with the Office of Treasurer of State, has created an "Election Fund" meeting the requirements of HAVA section 254(b). All amounts appropriated or designated by the officers of the State for carrying out HAVA requirements and all federal requirements payments will be deposited into the Election Fund. Notwithstanding Iowa Code section 12C.7, all interest earned on deposits in the fund shall be retained by the fund as required by HAVA section 254(b)(1)(D).

Monies in the Election Fund shall be used by the State exclusively to carry out activities for which the federal requirements payment is made to the State. The Chief State Election Official will submit a quarterly report of expenditures and disbursements from the Election Fund to the Legislative Oversight Committee, the Governor, Executive Council and the State Plan Advisory Committee.

Pursuant to Iowa Code section 11.2(1), the Auditor of State shall annually make a complete audit of the Election Fund. As required by Iowa Code section 11.4, the Auditor shall make a full report of each audit, detailing among other items: the actual condition of the fund, whether the fund has been expended efficiently for the purposes for which it was appropriated, and if legal and businesslike practices were followed.

SECTION 6: BUDGET

ELEMENT 6. The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on--
(a) the costs of the activities required to be carried out to meet the requirements of Title III;
(b) the portion of the requirements payment which will be used to carry out activities to meet such requirements; and
(c) the portion of the requirements payment, which will be used to carry out other activities. HAVA section 254 (a)(6)

The plan assumes full federal funding of the Help America Vote. If the Help America Vote is not fully funded, the plan will be revised to meet the new budget estimates.

Estimated Funding Available for HAVA Requirements

Title I -- FY 2003	$650 million	$5 million	$0
Title II -- FY 2003	$1.4 billion	$14 million	$700,000
Title II -- FY 2004	$1 billion	$10 million	$500,000
Title II -- FY 2005	$600 million	$6 million	$300,000
Total	**$3.65 billion**	**$35 million**	**$1.5 million**

Budget for HAVA Activities
The table on the following page presents Iowa's budget for HAVA activities.

SECTION 7: MAINTENANCE OF EFFORT

ELEMENT 7. How the State, in using the requirements payments, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000. HAVA section 254 (a)(7)

In compliance with HAVA section 254 (a)(7), in using any requirements payment, Iowa will maintain expenditures of the State for activities funded by the payment at a level equal to or greater than the level of Title III expenditures in State FY 2000.

The intent of funding provided under HAVA is to pay for new or enhanced efforts, not to supplant existing funding at the state and county level. The projected HAVA budget is based on a critical assumption that the state and counties will maintain this foundation of election operating expenditures at existing levels. Without this found, the short-term infusion of HAVA funds would not be sufficient to maintain a new state election and voter registration system in the long-term.

Budget for HAVA Activities

Title III Requirements						
§301 Voting System	42	1.2	23.9	1.5	15.4	2003-2005
§302 Provisional Voting	.25	.25	0	0	0	2004

Other Election Reform Activities						
§254(3) Voter education, election official education, and training, and poll working training	3	0	3	0	0	2004-2006
§402 Establishment of State-based administrative complaint procedures to remedy grievances	0	0	0	0	0	2003
State Plan, Budget, Fiscal Controls, and Program Management	.65	.15	.5	0	0	2003-2006
Totals ($ Millions)	**51.9**	**5**	**30**	**1.5**	**15.4**	

SECTION 8: PERFORMANCE GOALS AND MEASURES

ELEMENT 8. How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met. HAVA section 254 (a)(8)

The Chief State Election Official, in collaboration with the county auditors and other key stakeholders, will establish performance goals and will institute a process to measure progress toward the achievement of these goals. This process will provide the county auditors with structure and continued measurable targets for accomplishment.

The Chief State Election Official is responsible for ensuring the success in meeting each performance goal. Each county auditor's office also has a substantial responsibility in meeting performance goals in that the counties will monitor performance measures and will report to the state.

Performance goals provide a high-level view of a project's direction. The State's goal is to achieve election reform and compliance with HAVA requirements through the successful implementation of the programs outlined in the State Plan. Below is a matrix that details each element of the Plan, the title of the official who is responsible for ensuring that each plan element is met, and the timeframe for meeting each of the elements of the Plan.

Voting Systems: – §301	Chief State Election Official or Designee	To be implemented by January 1, 2006
Provisional Voting: -- §302	Chief State Election Official or Designee	To be implemented by January 1, 2004
Voter Registration: – §303(a) – §303(b)	Chief State Election Official or Designee	§303(a) to be implemented by January 1, 2006* §303(b) was implemented by January 1, 2003
Other Activities – §101 (b)(1), §251(b)(2)	Chief State Election Official or Designee	No Current Participation
Education and Training: – §254 (a)(3)	Chief State Election Official or Designee	On-going
Budget and Fiscal Controls: – §254 (a)(6) – §254 (a)(2) – §254 (a)(7) – §254 (a)(10)	Chief State Election Official or Designee	On-going
Complaint Procedures: --Title II, §254 (a)(9) --Title IV, §402	Chief State Election Official or Designee	On-going
		*The State may certify good cause for a waiver.

Performance Goal 1: Elimination of lever voting machines
The state and counties will eliminate the use of lever voting machines. Key steps in completing this once the appropriate funds are available are: 1) development by the Chief State Election Official of a statewide Request for Proposal (RFP) to contract for replacement voting systems and successful award of contracts, and 2) requisition and use by counties of HAVA- compliant voting systems under the contracts. The measure of success for both elements is the successful replacement of all lever voting machines by the 2004 general election, or if a waiver is sought, by January 1, 2006.

Performance Goal 2: HAVA-required DRE in Each Polling Place
The state and counties will place a minimum of at least one HAVA-required DRE in each polling place in Iowa by January 1, 2006. The priority is to maintain the independence of the voter and the secrecy of the ballot.

Performance Goal 3: Accessibility for all Voters
The state will ensure that all voters have improved accessibility as required by HAVA, with consideration to diverse cultures and skills.

Performance Goal 4: Centralized Statewide Voter Registration System
The state will have a single, uniform, official, centralized, interactive, computerized statewide voter registration database operational by January 1, 2004, or if a waiver is sought, January 1, 2006.

Performance Goal 5: Administrative Complaint Procedure
The state will implement an administrative complaint procedure. Working with the county auditors, state election officials, and state attorney general, the Chief State Election Official will define functional requirements, roles and responsibilities of grievance procedures.

Performance Goal 6: Provisional Ballots
The state will make changes to the Iowa Administrative Code to meet HAVA requirements and will train the election officials.

Performance Goal 7: Voter Education
The state will establish a statewide uniform voter education system. Additionally, the Chief State Election Official will develop uniform materials that can be used when implementing new voting equipment in a county. The Chief State Election Official will follow the timeline as presented in section 3.

Performance Goal 8: Poll Worker Training
The state will develop a uniform system of poll worker training. Additionally, a program will be developed to increase the pool of poll workers. The Chief State Election Official will follow the timeline as presented in section 3.

Performance Goal 9: Election Official Training
The state will continue to enhance and conduct SEAT training of the election officials. Additionally, Iowa will pursue other election official training. The Chief State Election Official will follow the timeline as presented in section 3.

Performance Goal 10: County Board of Supervisor Training
The state will develop and conduct training for county boards of supervisors with regard to their role in the election process.

SECTION 9: STATE-BASED ADMINISTRATIVE COMPLAINT PROCEDURES

ELEMENT 9. A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402. HAVA section 254 (a)(9)

The Chief State Election Official, acting in the capacity of state commissioner of elections, has enacted administrative rules establishing a statewide complaint system to receive and process complaints regarding alleged violations of the requirements contained in Title III of the Help America Vote Act, HAVA sections 301 through 305. The complaint procedure complies with all requirements of HAVA section 402, and is in the form of a contested case proceeding governed by the minimum procedural requirements of the Iowa Administrative Procedures Act, Iowa Code chapter 17A.

Scope of procedure

Any person who believes that there is a violation of any provision of Title III, including a violation which has occurred, is occurring, or is about to occur, by any state or local election official, may file a complaint with the state commissioner. All complaints shall be in writing, signed and notarized, and be sworn under oath. Each complaint must identify the complainant by name and mailing address, and include a clear and concise description of the alleged violation that is sufficiently detailed – including the name and address of each respondent, if known – to inform both the respondent and the presiding officer of the nature of the alleged violation.

Initial screening of complaints

Complaints will be screened by staff within the state commissioner's office to determine whether the jurisdictional prerequisites of a complaint proceeding are met. If a complaint is found to be deficient, the complaint will be rejected and a written explanation of the basis for the rejection will be provided to the complainant and respondent. If a complaint contains all required information and sets forth allegations of a Title III violation, the complaint will be accepted and assigned to a presiding officer for resolution.

Presiding officer

The state commissioner of elections is statutorily directed to supervise the activities of local election officials, prescribe uniform election practices and procedures, and provide letters of instruction upon becoming aware of an apparent violation of Iowa election law. Iowa Code sections 39A.6 and 47.1. All complaints shall be initially filed with the office of the state commissioner and the state commissioner shall act as presiding officer for all proceedings related to complaints alleging a violation of Title III by a county commissioner of elections or other local election official.

Given the inherent conflict of interest, the state commissioner cannot act as presiding officer in proceedings related to complaints alleging a violation of Title III in which allegations of a violation by the state commissioner or a person or persons employed or appointed by the state commissioner. In those cases, the

presiding officer shall be the state voter registration commission, formed pursuant to Iowa Code section 47.8, acting without a representative of the state commissioner. This bi-partisan commission is composed of the state chairpersons of the two political parties whose candidates for president of the United States or governor, as the case may be, received the greatest and next greatest number of votes in the most recent general election, or their representative designees, and a county commissioner of elections appointed by the president of the Iowa State Association of County Auditors, or an employee of the commissioner.

An administrative law judge may be appointed by the state commissioner or voter registration commission to aid the presiding officer in conducting the proceeding.

Nature of the proceeding

In order to expedite resolution of complaint proceedings, complaints shall be evaluated and a decision rendered based upon written submissions, unless the Complainant or Respondent requests an evidentiary hearing on the record or the presiding officer determines that an evidentiary hearing will assist in resolution of outstanding factual disputes. The administrative rules detail the procedures governing complaint proceeding hearings.

Remedies and form of decisions

All final determinations resolving complaint proceedings shall be in writing and shall include findings of fact and conclusions of law as required by Iowa Code section 17A.16(1).

If, based upon a preponderance of evidence provided through written submissions or at hearing, the presiding officer determines that a violation of Title III has been established, the presiding officer shall issue an order providing for an appropriate remedy. The remedy so provided shall be designed to ensure compliance with the requirements of Title III and may include an order to any respondent directing the respondent to take specified action, or prohibiting the respondent from taking specified action, with respect to a past, immediately pending, or future election. The remedy shall not include an award of money damages or attorney's fees.

If, based upon a preponderance of evidence provided through written submissions or at hearing, the presiding officer determines that no violation of Title III has been established, the presiding officer shall issue an order dismissing the complaint.

Record of proceedings

The state commissioner will maintain the official record of all complaint proceedings as required by Iowa Code section 17A.12(6). At a minimum, the records will include: the complaint, answer, and all pleadings, motions, and rulings; all evidence received or considered and all other submissions; a statement of all matters officially noticed; all questions and offers of proof, objections, and rulings thereon, all proposed findings and final orders, and a tape recording of all oral proceedings. Final orders resolving complaints will be made available for public inspection and published on the Chief State Election Official's internet website.

Federal Register / Vol. 69, No. 57 / Wednesday, March 24, 2004 / Notices 14421

Right to review

Complaint proceedings constitute contested cases pursuant to the Iowa Administrative Procedures Act, Iowa Code chapter 17A. A person or party who has exhausted all adequate administrative remedies and is aggrieved or adversely affected by the final decision in a complaint proceeding, may seek judicial review of the decision pursuant to Iowa Code section 17A.19.

SECTION 10: EFFECT OF TITLE I PAYMENTS

ELEMENT 10. If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities. HAVA section 254 (a)(10)

The State of Iowa has received $5 million in Title I payments. The payments will be used to help develop the HAVA State Plan, replace lever voting equipment, implement provisional voting, and assist in the development of the computerized statewide voter registration system.

Allocation of Title I Payments

Replacing Lever Machines	$1.2 Million
Provisional Voting System	$0.25 Million
Computerize Statewide Voter Registration System	$3.4 Million
State Plan Development, Budget, Fiscal Controls, etc.	$.15 Million
Total Title I Payments	**$5 Million**

SECTION 11: HAVA STATE PLAN MANAGEMENT

ELEMENT 11. How the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change—

(a) is developed and published in the Federal Register in accordance with section 255 in the same manner as the state plan;

(b) is subject to public notice and comment in accordance with section 256 in the same manner as the state plan; and

(c) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (a). HAVA section 254 (a)(11)

The State will maintain the state plan advisory committee to recommend future changes in the HAVA State Plan. The advisory committee will meet a minimum of annually to review the progress of HAVA implementation and to make recommendations for changes in the state plan. The State understands the publication requirements and public comment requirements included in HAVA for changes to the state plan.

SECTION 12: CHANGES TO STATE PLAN FROM PREVIOUS FISCAL YEAR

ELEMENT 12. In the case of a state plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the state plan for the previous fiscal year and of how the state succeeded in carrying out the state plan for such previous year. HAVA section 254 (a)(12)

The FY 2003 state plan is the preliminary state plan required under the Help America Vote Act of 2002. This section will be updated in the next fiscal year, reflecting changes to the state plan, as well as a summary of the 2003 successes.

SECTION 13: STATE PLAN DEVELOPMENT AND COMMITTEE

ELEMENT 13. A description of the committee which participated in the development of the state plan in accordance with section 255 and the procedures followed by the committee under such section 255 and section 256. HAVA section 254 (a)(13)

HAVA section 255 requires the chief election officials from the two most populous jurisdictions within the state to be included on the advisory committee. The section also requires representation from other stakeholders including: representatives of groups of individuals with disabilities, local election officials, groups within the state, and other citizens on the committee. The state plan committee was selected by the Chief State Election Official and includes representation from several non-partisan statewide organizations representing stakeholders and is a group with diverse cultural backgrounds. The Chief State Election Official sought additional recommendations from leaders of the Iowa General Assembly.

Chief Election Officials from the Two Most Populous Jurisdictions
Linda Langenberg - Linn County Auditor
Michael Mauro -Polk County Auditor

Representatives of Groups of Individuals with Disabilities
Jill Avery – Director of the Division of Persons with Disabilities, Iowa Department of Human Rights
Mike Hoenig – IDEAS Program Center for Disabilities and Development
Sylvia Piper – Iowa Protection and Advocacy Services
Rik Shannon - Governor's Developmental Disabilities Council

Other Election Officials
Jane Burleson – City Councilwoman, City of Fort Dodge

Representatives of State-wide Non-Partisan Organizations
Barbara Huey – President of the Iowa State Association of County Auditors
Mike King – President of the Iowa State Association of Supervisors
Jan McNelly – President of the Iowa League of Women Voters

Other Citizens
Elaine Baxter – Democrat, former Iowa Secretary of State
Joy Corning – Republican, former Lt. Governor of Iowa
Michael Fitzgerald – Democrat, Treasurer, State of Iowa
Elizabeth "Libby" Jacobs – State Representative, District 60, Polk County
Andrew Nielsen – Republican, Deputy Auditor, State of Iowa (auditing advice)
Mary Jane Odell – Republican, former Iowa Secretary of State
Rita Vargas – Democrat, County Recorder, Scott County

Technical Advisors
Dave Beary – Iowa Department of Transportation
Dennis Cowen – Iowa Information Technology Department
Holmes Foster – former Banking Superintendent, State of Iowa
Shashi Goel – Iowa Department of Management
Ken Paulson – Senior Purchasing Agent, Iowa Department of General Services
Surasee Radari – Bankers Trust
Dawn Williams – Elections Director, Marshall County Auditor's Office

The State Public Policy Group facilitated the open and public meetings in compliance with Iowa's open meetings laws. Meetings were held on February 28, March 21, April 17, May 8, and May 16, 2003. SPPG also facilitated the following work groups: Public Policy, Finance and Budget, Training and Education, Technology (Voting Equipment) and Technology (Voter Registration System).

2003 Kansas State Plan

HELP AMERICA VOTE ACT OF 2002

Kansas Secretary of State Ron Thornburgh
First Floor, Memorial Hall, 120 S.W. 10th Avenue
Topeka, Kansas 66612
785.296.4564

Public Hearing and Comment Period
A public hearing regarding this plan was conducted June 27, 2003, at 9:30 a.m., Second Floor, Memorial Hall, Room 210, 120 S.W. 10th Avenue, Topeka, Kansas. Written comments regarding the proposed draft of the 2003 Kansas State Plan were accepted from June 12 to July 14, 2003.

A MESSAGE FROM THE SECRETARY

The Help America Vote Act of 2002 (HAVA) is the United States Congress' response to the problems which occurred during the 2000 presidential election. HAVA is a broad federal law that requires change in almost every area of the voting process. As Kansas' chief election official, I am responsible for ensuring the new requirements are carried out and correctly implemented in our state.

By 2006, Kansas elections will look significantly different than they do today. Over the next few years, there will be numerous changes behind-the-scenes, as well as at polling places. Significant changes will include new training and education programs for election officials and a statewide computerized voter registration system. In addition, accessible voting equipment will be implemented in every polling place, allowing individuals with disabilities to cast an independent vote. We are working to ensure that our state has the most technologically advanced systems and highly trained workers at every polling place. The new mandates will make Kansas' electoral system more uniform and secure.

This document is our roadmap for implementation of the HAVA requirements in Kansas. The plan has been developed with assistance from the Kansas Election Reform Advisory Council, a group of Kansans from across the state who are committed to making our electoral process a model of excellence. It is a living document that will be reviewed, updated and published annually with assistance from the advisory council and all interested Kansans.

A public hearing on the state plan was held Friday, June 27 in Topeka. We also accepted written comments from June 12 to July 14, 2003. Your comments regarding implementation of HAVA mandates are valued and welcome at any time. As the least complicated, most accessible agency in state government, we are always interested in your questions and concerns.

Sincerely,
RON THORNBURGH
Secretary of State

TABLE OF CONTENTS

Overview of Kansas Elections 6

Section 1: How will Kansas use the requirements payments to meet the requirements of title III, and if applicable, to carry out other activities to improve the administration of elections? 7

1.1: Voting System Standards Requirements – Section 301 7
Second Chance Voting (Section 301(a)(1)) 7
Audit Capacity (Section 301(a)(2)) 8
Accessibility for Individuals with Disabilities (Section 301(a)(3)) 8
Alternative Language Accessibility (Section 301(a)(4)) 8
Error Rates (Section 301(a)(5)) 8
Uniform Definition of What Constitutes a Vote (Section 301(a)(6)) 8

1.2: Provisional Voting Requirements – Section 302 8
Notification of the right to cast a provisional ballot (Section 302(a)(1)) 8
Affidavit for all provisional voters attesting to registration, eligibility (Section 302(a)(2)) 9
Written information regarding how to determine the outcome of a provisional ballot 9
(Section 302(a)(5)(A)) 9
Free access system for publication of provisional vote results (Section 302(a)(5)(B)) 9

1.3: Voting Information Requirements – Section 302 9
Public posting at polling places (Section 302(b)(2)) 9
Provisional ballots for individuals who vote pursuant to a court or other order extending polling place hours; ballots must be separated from other provisional ballots (Section 302(c)) 10

1.4: Computerized Statewide Voter Registration List Requirements – Section 303(a) 10

1.5: Requirements for Voters Who Register by Mail – Section 303(b) 11
Identification Requirements 11
Fail-Safe Voting 11
Contents of Mail-In Registration Form 11

Section 2: How will Kansas distribute and monitor the distribution of the requirements payment to units of local government or other entities in Kansas for carrying out activities to improve the administration of elections? 12

2.1: Criteria to be used to determine the eligibility of units or entities for receiving the payment (Section 254(a)(2)(A)) 12

2.2 : Methods to be used to monitor the performance of the units or entities to whom the payment is distributed (Section 254(a)(2)(B)) 12

Section 3: How will Kansas provide programs for voter education, election official education/training, and poll worker training which will assist the state in meeting the requirements of title III? 13

3.1: Voter Education 13
Voter Outreach 13
Voting Instruction 13

3.2: Election Official Education and Training 14

3.3: Poll Worker Training 15

Section 4: How will the state adopt voting system guidelines consistent with the requirements of section 301? 16

Section 5: How will Kansas establish a fund for purposes of administering the state's activities, including information on fund management? 17
5.1: Fund establishment 17
5.2: Fund management 17

Section 6: Kansas' proposed budget for HAVA activities based on the state's best estimates of the costs of such activities and the amount of funds to be made available. 18

Section 7: How will Kansas, in using the requirements payment, maintain the expenditures of the state for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the state for the fiscal year ending prior to November 2000? 19

Section 8: How will Kansas adopt performance goals and measures to determine its success and the success of units of local government in carrying out the plan? 20

Section 9: A description of the uniform, nondiscriminatory state-based administrative complaint procedure in effect under section 402. 24

Section 10: A description of how Kansas will use the title I payment to carry out proposed activities in this plan. 27

Section 11: How will Kansas conduct ongoing management of the plan? 28

Section 12: A description of the committee which participated in development of the state plan. 29

- ***Overview of Kansas Elections***

Statutory and Administrative Framework
Kansas election laws are shaped by the Kansas Legislature and new laws are enacted July 1 each year. State election laws are contained in Chapter 25 of the Kansas Statutes Annotated (hereinafter "KSA"). Administrative rules are promulgated by the secretary of state when authority to do so is granted by the legislature. The secretary of state does not have general administrative rule making authority.

State and Local Roles and Responsibilities
Day-to-day administration of elections is handled by 105 county election officers – 101 county clerks and four election commissioners. State and federal elections in Kansas are overseen by the state's chief election officer, the secretary of state. Local elections fall within each county election officer's jurisdiction.

Voting Statistics
- According to April 1, 2000, United States Census Bureau data, Kansas' voting age population is 1,975,425.
- In the 2002 general election, 851.968 votes were cast while 1,615,698 Kansans were registered to vote in that election.
- In the 2002 general election, 16.4 percent (139,343) of votes cast were cast before Election Day through the state's early voting program called advance voting.

Voting Systems
In Kansas, voting equipment is subject to a statutory certification process and must be certified before it may be purchased or used in any county. The following procedure is derived from KSA 25-1309, 25-4405, and 25-4604.

1. Manufacturers and vendors submit a written request for certification to the secretary of state, accompanied by a $500 examination fee.
2. The equipment must be tested by an independent testing authority and a report from such must be filed with the secretary of state.
3. The secretary of state reviews the equipment to ensure that it meets the standards established by the Federal Election Commission and the requirements of Kansas law.
4. An open meeting is conducted by the secretary of state at which the manufacturer or vendor displays the equipment and the equipment is tested.
5. The secretary of state contacts other jurisdictions in the United States that have certified and used the equipment to inquire about their experiences.
6. The secretary of state may grant temporary, conditional approval for the equipment to be used in a Kansas jurisdiction before granting final certification.
7. If the above conditions are met, the secretary of state makes the final decision whether to grant certification and informs the manufacturer and vendor of the decision in writing.

Each county selects and purchases its own system from the systems certified by the secretary of state. There are currently three types of voting systems used in Kansas: (1) direct recording electronic (DRE); (2) optical scan; and (3) hand counted ballots. The majority of counties, 81, use an optical scan system. Twenty-one counties use hand-counted ballots and three counties use direct recording electronic systems. Punch-card and lever voting systems are not used in Kansas.

Voter Registration Systems
Kansas law requires the secretary of state to maintain a statewide, centralized voter registration database. The database is only a repository file; each county election officer is required to submit the county's complete database on a quarterly basis (January, April, July and October). An administrative regulation, KAR 7-23-13, prescribes the formats, data fields and frequency of submission. The secretary of state never alters a record in a voter file. The county election officer has sole authority and responsibility for adding, deleting and altering voters' registration records.

- ***Section 1: How will Kansas use the requirements payments to meet the requirements of title III, and if applicable, to carry out other activities to improve the administration of elections?***

1.1: Voting System Standards Requirements – Section 301
Deadline for compliance: January 1, 2006

Second Chance Voting (Section 301(a)(1))
The voting systems currently used in Kansas counties include paper ballots, optiscan (central and precinct count) and DRE. The following matrix illustrates each voting system's current level of compliance with HAVA's "second chance" voting requirements. Due to the fact that the deadline for compliance with these requirements is January 1, 2006, the plans noted in the matrix are tentative.

	Paper Ballot	Optiscan Central Count	Optiscan Precinct Count	DRE
	Yes	Yes	Yes	Yes
	No To be fulfilled through a voter education program.*	No To be fulfilled through a voter education program.*	Yes	Yes
	No To be fulfilled through a voter education program.*	No To be fulfilled through a voter education program.*	Yes	Yes
	No To be fulfilled through a voter education program.*	No To be fulfilled through a voter education program.*	Yes	Yes
	No A Kansas voter may receive a new ballot upon request. Notification of this opportunity to be fulfilled through a voter education program.*	No A Kansas voter may receive a new ballot upon request. Notification of this opportunity to be fulfilled through a voter education program.*	Yes	Yes

*The secretary of state plans to develop a voter education program by January 1, 2006, to fulfill the aforementioned requirements.

Audit Capacity (Section 301(a)(2))
The following matrix illustrates each voting system's current level of compliance with the 2006 audit capacity requirements. A plan to remedy the noncompliant voting systems will be devised by the secretary of state.

[redacted]	Paper Ballot	Optiscan Central Count	Optiscan Precinct Count	DRE
[redacted]	Yes	Yes	Yes	Yes
[redacted]	Yes	Yes	Yes	Yes
[redacted]	Yes	Yes	Yes	Yes

Accessibility for Individuals with Disabilities (Section 301(a)(3))
HAVA requires every voting place in Kansas to have at least one direct recording electronic (DRE) voting system or other voting system equipped for individuals with disabilities by January 1, 2006. Kansas currently does not meet this requirement. The secretary of state plans to purchase one DRE for every polling place using requirement payments. Vendor(s) will be selected through a bid process. It has not yet been determined whether the secretary of state will contract with one vendor or multiple vendors for the statewide DRE purchase. It is anticipated that counties will have the opportunity to purchase additional DRE machines under the state contract.

Alternative Language Accessibility (Section 301(a)(4))
HAVA requires each voting system to provide alternative language accessibility pursuant to the Voting Rights Act of 1965. The current voting systems used in Kansas are capable of accommodating ballots in alternative languages.

Error Rates (Section 301(a)(5))
Error rates on voting systems approved for use in Kansas have been verified by an independent testing authority and meet FEC requirements.

Uniform Definition of What Constitutes a Vote (Section 301(a)(6))
In January 2004, the secretary of state will propose legislation to define what constitutes a vote for paper ballot, optical scan, and DRE voting systems. The proposal will be developed with assistance from the Kansas Election Standards Task Force. No expenditures of requirements payments are anticipated.

1.2: Provisional Voting Requirements – Section 302
Deadline for compliance: January 1, 2004
Provisional voting has been part of Kansas election law since 1996. Therefore, in order to comply with the provisional voting requirements of HAVA, only modification of existing law will be required.

Notification of the right to cast a provisional ballot (Section 302(a)(1))
Under current Kansas law (KSA 25-409), a poll worker is required to notify a potential voter of the right to vote a provisional ballot, if applicable. Voters are also notified of such right on the "Voter's Rights and Responsibilities" poster posted in each polling place pursuant to KSA 25-2706.

Affidavit for all provisional voters attesting to registration, eligibility (Section 302(a)(2))
Legislation to implement this requirement was proposed during the 2003 session of the Kansas Legislature. The legislation, House Bill 2288, was approved by both houses of the legislature, but ultimately vetoed. An attempt to override the veto failed and this requirement is not yet codified in Kansas law. New legislation to implement this requirement will be proposed in January 2004 at the beginning of the next legislative session. Requirements payments will not be used; counties will be responsible for costs associated with producing the affidavit.

Written information regarding how to determine the outcome of a provisional ballot (Section 302(a)(5)(A))
The secretary of state will prescribe and develop a publication describing use of the free access system. One copy of the publication will be distributed to each county election official. The county election official will be responsible for replication costs and training poll workers to distribute the information. In addition, instructional information about provisional ballots will be added to the secretary of state's website. It is not anticipated that requirements payments will be used.

Free access system for publication of provisional vote results (Section 302(a)(5)(B))
A web-based free access system will be developed by the secretary of state for use in 2004. County election officials will be responsible for submitting provisional vote information to the secretary of state's office via electronic transfer no later than seven days following certification of the election results. The information will then be posted on the secretary of state's web site and made available to the public in a timely manner. No expenditures of requirements payments are anticipated.

1.3: Voting Information Requirements – Section 302
Deadline for compliance: January 1, 2004

Public posting at polling places (Section 302(b)(2))

- **Sample Ballot:** While it has been common practice to post sample ballots at polling places in Kansas, it is not a statutory requirement. Legislation to implement this requirement was vetoed during the 2003 session. New legislation will be proposed in January 2004. No expenditure of requirements payments will be made to produce sample ballots. County election officials will be responsible for the cost of producing and posting sample ballots in polling places.
- **Date of the election and hours the polling place is open:** Legislation to implement these requirements was vetoed during the 2003 session. New legislation will be proposed in January 2004. No expenditures of requirements payment are anticipated. County election officials will be responsible for posting this information at each county's expense.
- **Instructions on how to vote, including a provisional ballot:** This information will be included in a publication prescribed and designed by the secretary of state and posted at the polling place by county election officials. Counties will be responsible for the costs associated with reproduction of the publication. No expenditures of requirements payments are anticipated.
- **Instructions for mail-in registrants who are first time voters in the jurisdiction:** This information will be included in a publication prescribed and designed by the secretary of state and posted at the polling place by county election officials. Counties will be responsible for the costs associated with reproduction of the publication. No expenditures of requirements payments are anticipated.
- **General information on voting rights:** This information will be included on a poster entitled "Voters Rights and Responsibilities". All polling places must display this poster in accordance with K.S.A. 25-2706. Title I funding will be used to produce an updated version of the poster. No expenditures of requirements payments are anticipated.

- **General information on federal and state fraud laws:** This information will be included on a poster entitled "Voters Rights and Responsibilities". All polling places must display this poster in accordance with K.S.A. 25-2706. Title I funding will be used to produce an updated version of the poster. No expenditures of requirements payments are anticipated.

Provisional ballots for individuals who vote pursuant to a court or other order extending polling place hours; ballots must be separated from other provisional ballots (Section 302(c))
Provisional voting has been part of Kansas election law since 1996. Legislation to amend current provisional voting statutes to include this requirement was vetoed during the 2003 session. New legislation will be proposed in January 2004. No expenditures of requirement payments are anticipated.

1.4: Computerized Statewide Voter Registration List Requirements – Section 303(a)
Deadline for compliance: January 1, 2004 / January 1, 2006 (with waiver)
Kansas law (KSA 25-2304(b) requires the secretary of state to maintain a statewide centralized voter registration database. The current database is only a repository for county voter registration data and does not appear to meet the HAVA requirements. Due to the time needed to implement the new system, the secretary of state will seek a waiver of the January 1, 2004, deadline as permitted by HAVA and extend the deadline to January 1, 2006.

The central voter registration subcommittee of the Kansas Election Reform Advisory Council has provided preliminary recommendations for database design. Preparations are now being made to issue a Request for Proposal and seek a vendor for the central voter registration database project. The secretary of state has contracted with a consultant, Jim Minihan of Imerge Consulting, and convened a central voter registration work group to assist with RFP development. The work group includes state and local election officials as well as individuals with information technology expertise. One vendor will be selected through the RFP process.

Once a vendor is selected and a contract has been executed, it is anticipated that implementation of the new database system will begin in summer or early fall 2004. Each county will maintain its current database in 2005 while the new system is tested. Beginning January 1, 2006, the new database will be the sole system used statewide. This project will be funded primarily with Title I funds. Depending on the cost, requirements payments may be used to partially fund this project.

A tentative timeline for this project is included below:

May – October 2003	RFP development
November 2003	Publish RFP
February 2004	Select vendor
March-April 2004	Contract negotiations
May 2004	Contract execution
Fall 2004	Implementation of system begins
2005	Current system and new system to run simultaneously
January 1, 2006	New system becomes the sole system used in Kansas

1.5: Requirements for Voters Who Register by Mail – Section 303(b)
Deadline for compliance: January 1, 2004

Identification Requirements: Currently Kansas law does not require any individual to present identification when voting. During the 2003 session of the Kansas Legislature, an effort to amend Kansas law to require identification from all voters and comply with the HAVA requirements for voters who register by mail was not successful. Legislation will be proposed in January 2004 to ensure Kansas' compliance with the requirements for first-time voters, in each jurisdiction, who register by mail.

Fail-Safe Voting: Under HAVA, voters who register by mail and cannot meet the identification requirement must be afforded the opportunity to vote a provisional ballot. Current Kansas law allows such individuals to cast provisional ballots; therefore, Kansas is in compliance with the fail-safe voting requirement.

Contents of Mail-In Registration Form: In 2003, the secretary of state proposed legislation to amend KSA 25-2309, the statute which enumerates the contents of Kansas' mail-in registration form. The proposal was ultimately vetoed. Legislation will be proposed in January 2004 to implement the questions and statements which must now be included on the mail-in registration form. However, due to the need to comply with this requirement by January 1, 2004, the secretary of state will modify the mail-in voter registration form in 2003 pursuant to KSA 25-2309. The secretary of state's office will print and provide counties with a short-term supply of new voter registration cards. Only title I money is planned to be used.

- ***Section 2: How will Kansas distribute and monitor the distribution of the requirements payment to units of local government or other entities in Kansas for carrying out activities to improve the administration of elections?***

2.1: Criteria to be used to determine the eligibility of units or entities for receiving the payment (Section 254(a)(2)(A))

The secretary of state will manage all requirements payments and make expenditures to implement title III requirements. Expenditures will be made for counties (eligible units) by the state to fulfill the requirements specified by the secretary of state. Counties will be responsible for financial needs that exceed the specified requirements.

Planned expenditures of requirements payments may include the following projects: (1) a new centralized voter registration system; (2) accessible voting equipment; and (3) education and outreach programs. These projects are priorities and all other financial requests will be assessed after completion of the projects.

Eligible entities are organizations or persons with goals and objectives related to HAVA. If grants are made to eligible entities, the following criteria will be used:

(1) The entity must submit a written proposal to the secretary of state.
(2) The proposal must include specific performance goals for the proposed project.
(3) The proposal must include information on how the goals will address and accomplish title III objectives.
(4) Grants will be awarded at the discretion of the secretary of state after review of the proposal.

2.2 : Methods to be used to monitor the performance of the units or entities to whom the payment is distributed (Section 254(a)(2)(B))

The secretary of state will develop appropriate auditing procedures. All units or entities receiving title I or title II funds will be subject to reporting requirements established by the secretary of state. The following reports will be required of units or entities that receive grants or materials purchased with federal funds.

Units of local government:

(1) Reporting requirements incorporated into existing reports submitted by county election officials
(2) Annual report

Eligible entities:

(1) Quarterly financial reports
(2) Annual financial report
(3) Annual performance report

- ***Section 3: How will Kansas provide programs for voter education, election official education and training, and poll worker training which will assist the state in meeting the requirements of title III?***

3.1: Voter Education

Education is an essential element of HAVA implementation in Kansas. In order for the state to maximize the benefits of HAVA, we must reach out and educate Kansans. The secretary of state plans to educate the voting age population and guarantee that all Kansans comprehend new requirements and procedures through a two-fold voter education program consisting of (1) voter outreach and (2) instruction on how to vote so the vote will count. These programs will be developed by the secretary of state's staff.

(1) Voter Outreach

A statewide media campaign will be developed to encourage registration and voting before primary and general elections. The campaign may use the following media: radio, internet, television, newspaper, and direct mail. County election officials, youth voting programs, and other interested groups may play a role in this program.

Outreach material describing the voter registration process in Kansas will be developed by the secretary of state and provided to local election officials. Groups interested in voter outreach may contact the secretary of state's office and materials may be provided upon request.

Emphasis will be placed on development of an outreach initiative for citizens with disabilities. The secretary of state's office will work with advocacy groups to develop accessible resources.

Another component of this program may be expansion of Kansas' student poll worker program. The program was developed in 2000 pursuant to KSA 25-2804(b).

(2) Voting Instruction

A statewide media campaign will be developed and conducted by the secretary of state. Assistance may be provided to local interest groups. The campaign will encompass the following topics: (1) voting procedure in Kansas; (2) instructions regarding how to use each voting system; (3) reasons for provisional voting and how to cast a provisional ballot; (4) reasons for ballot invalidation; (5) accessibility of polling places and voting equipment.

The campaign will be developed with assistance from county election officials and other relevant groups. Campaign content will be designed to meet HAVA requirements and may be modeled after previous media campaigns conducted by the secretary of state's office. Media used to conduct the campaign may include the following: radio, internet, television, newspaper, and direct mail. County election officials, youth voting programs, and other interested groups may play a role in this program.

The following ideas may be incorporated in this campaign:

- Brochures and electronic advertising explaining new voting procedures and rights
- Information (printed, audio, etc.) on the DRE voting system for all Kansans, including individuals with disabilities
- A website providing one-stop information on voting procedures and rights
- A revised version of the Voter's Rights and Responsibilities poster required by KSA 25-2706
- Partnerships with public and private organizations

3.2: Election Official Education and Training

In order to ensure that county election officials receive the necessary education and training on election issues, the secretary of state's office will develop a uniform, statewide training program. The program will be provided at no cost to participants. A description of the program is included below.

Curriculum: The annual program will be developed by the secretary of state's office with assistance from Kansas County Clerks and Election Officials Association members and adult education specialists. The secretary of state's office will seek partnerships with the Wichita State University Hugo Wall School and Emporia State University. Eight hours of required instruction will be provided each year and will consist of the following courses:

COURSE	HOURS
HAVA overview / NVRA refresher	1
Preparing for an election	1
Voter registration	1
Voting procedure / provisional ballots	1
Advance voting / federal services voting	1
Canvassing / write-ins / voter intent	1
Voting equipment	1
Special situations including, but not limited to, alternative languages, accessibility, awareness and sensitivity	1

Location: The aforementioned courses will be provided in coordination with established meetings of the Kansas County Clerks and Election Officials Association (KCCEOA) and the Kansas Association of Counties (KAC). The schedule is as follows:

MONTH	EVENT	HOURS REQUIRED
March	KCCEOA Regional Meetings	2
May	KCCEOA Convention	2
September	KCCEOA Regional Meetings	2
November	KAC Convention	2

Make-up sessions may be held at the following times and events:

MONTH	EVENT
May	KCCEOA Convention
November	KAC Convention
As scheduled	Sanborn Institute for County Clerk Certification (annual)
As necessary	Videoconference
Once very four years	Midwest Election Officials Conference

Resources: Participants will receive a printed training manual, an updated version of the Kansas Election Standards, and tools for training poll workers.

Instructors: The training program will be conducted by the secretary of state and staff, subject matter experts, and Sanborn Institute instructors.

Attendance: At least one individual from each county election office must attend the program consisting of eight one-hour sessions. Attendance is a condition of receiving the benefits of federal funding, and the secretary of state shall have the option of withholding county benefits related to HAVA due to nonparticipation in the training program.

3.3: Poll Worker Training

The secretary of state will design a poll worker training program for county election officials in order to facilitate the crucial link between election administrators and voters. County election officials will receive instruction on this program during the election official training program and will be responsible for conducting training sessions at the local level. Participation in this program will be a condition for receipt of county benefits related to HAVA.

Curriculum: The following topics will be incorporated into training resources developed by the secretary of state's office in conjunction with adult education specialists.

- Opening, closing and managing the polling place
- Voting procedure
- Provisional ballots
- Special situations including, but not limited to, accessibility, electioneering, authorized poll agents, angry voters, and long lines
- Dealing with natural disasters and emergency situations

Resources: The secretary of state will provide each county election officer with the following tools to be used in a local poll worker training session.

- A curriculum for training poll workers
- A reference guide for supervising judges to use at the polling place
- A presentation (Power Point, video, etc.) to be used during training sessions

Instructors: Training sessions will be conducted by each county election official and deputy election officials. Voting equipment vendors or technicians may also be involved in the training sessions. County election officials may include supplemental instructors in the training sessions at their discretion.

Attendance: County election officials must conduct a minimum of two (2) hours of training prior to each primary and general election for supervising judges and election clerks. The training is currently optional, but due to the complexity and multitude of election administration changes in 2004 and 2006, the secretary of state's office will propose legislation to require training as follows:

- Required training for supervising judges in 2004 and 2006
- Required training for all election clerks in 2006
- Required training for all first time poll workers after 2006

▫ ***Section 4: How will the state adopt voting system guidelines consistent with the requirements of section 301?***

The secretary of state will adopt voting system guidelines consistent with the requirements of section 301 by the January 1, 2006, deadline. An overall method of compliance is yet to be determined.

As illustrated on pages four and five of this document, some voting systems currently used in Kansas do not meet the requirements of section 301. Specifically, paper ballot and central count optical scan systems are noncompliant. At the present time, the secretary of state plans to resolve these compliance issues through use of a voter education program as permitted by Section 301(a)(1)(B). Use of a voter education program will permit counties to maintain paper ballot and central count optical scan systems.

▫ ***Section 5: How will Kansas establish a fund for purposes of administering the state's activities, including information on fund management?***

5.1: Fund establishment
During the 2002 legislative session, the secretary of state established a Democracy Fund in anticipation of receiving federal funding for HAVA implementation. Title I funds were received in April 2003 and deposited in the Democracy Fund. In early 2003 it came to the attention of the secretary of state that state accounting and reporting guidelines had been changed and as a result, the Democracy Fund had been improperly coded for receipt of federal funds. A new fund, therefore, was established for title I and title II funds and the funds previously received were transferred to the new fund.

The following funds were changed or established in 2003:
(1) Democracy Fund: The fund was maintained for receipt of matching funds from Kansas counties beginning July 1, 2003.
(2) HAVA Fund: This fund was created for title I and title II funds. Title I funds originally placed in the Democracy Fund have been transferred. Any additional federal funds (i.e. grants) will be deposited in this fund.
(3) New state general fund account: Established for receipt of matching funds from the state.

5.2: Fund management
The secretary of state will be responsible for fund management. State and federal fund management guidelines will be followed. Appropriate records of expenditures will be maintained by the secretary of state's office. A monthly review of funds will be made.

▫ ***Section 6: Kansas' proposed budget for HAVA activities based on the state's best estimates of the costs of such activities and the amount of funds to be made available.***

The following chart is Kansas' proposed budget for Fiscal Year 2004. All amounts listed are estimates and subject to change.

HAVA Requirements	Estimated Total Cost	Funding Source			
		Title I $5 million[1]	Title II $7.5 million[2]	State Match $225,000[3]	County Match $150,000[4]
Central Voter Registration System	No estimate is included here to ensure that the secretary of state may negotiate a truly competitive price for this system. We do not want vendors to assume we are prepared to pay a predetermined amount for the system.[5]				
Accessible voting equipment	No estimate is included here to ensure that the secretary of state may negotiate a truly competitive price for this system. We do not want vendors to assume we are prepared to pay a predetermined amount for the equipment.[6]				
Administrative costs	$215,000	$215,000			
Voter education	$100,000	$100,000			
CEO training	$35,000	$35,000			
Poll worker training	$36,000	$36,000			
Free access system	$2000	$2000			
Polling place postings	$2000	$2000			
Kansas voter registration forms	$20,000	$20,000			
Federal voter registration forms	$5000	$5000			

[1] Kansas has received a title I payment of $5 million.
[2] Kansas is eligible to receive a title II requirements payment of approximately $7.5 million in Fiscal Year 2004. Receipt of the payment is contingent upon filing the state plan.
[3] In order to qualify for title II requirements payments, Kansas must provide five percent (5%) of the payment in matching funds. During the 2003 Kansas Legislative Session, the legislature approved a match of three percent (3%) from the state general fund. This amount is an estimate of three percent of the state match.
[4] As explained in note three, receipt of title II requirements payments is contingent upon providing state matching funds. During the 2003 Kansas legislative session, the legislature specified that the remaining two percent (2%) match is to be provided by Kansas counties. Each county pays a proportionate share of the match based on a formula comparing county voting age population to state voting age population. This amount is an estimate of two percent of the state match.
[5] The actual cost will be negotiated through a Request for Proposal process.
[6] The actual cost will be negotiated through a Request for Proposal process.

▫ ***Section 7: How will Kansas, in using the requirements payment, maintain the expenditures of the state for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the state for the fiscal year ending prior to November 2000?***

Even though federal funding has been appropriated for state implementation of HAVA, this does not mean that the state may decrease election funding as a result. HAVA requires each state to provide at least the same level of funding for elections in 2004 and beyond, as it did in fiscal year 2000.

In compliance with HAVA Section 254(a)(7), in using requirements payments, Kansas will maintain expenditures of the State for activities funded by the payment at a level equal to or greater than the level of Title III expenditures in State FY 2000.

Elections & Legislative Matters	Fiscal Year 2000	Fiscal Year 2004
	$ 27,920	$ 58,408

- ***Section 8: How will Kansas adopt performance goals and measures to determine its success and the success of units of local government in carrying out the plan?***

Performance goals and measures will be developed by the secretary of state's office for each applicable element of the state plan. Each element will have a tentative timeline for completion which will serve as a tool for assessing performance. The following charts outline tentative performance goals for implementation of HAVA requirements.

Performance Goal	Develop and implement a statewide central voter registration system
Process to develop criteria	The secretary of state's staff will plan with a Central Voter Registration Work Group and consultant to develop a Request for Proposal (RFP) and establish goals for project management
Criteria to measure performance	A set of time-oriented goals for the following events: (1) development and issuance of an RFP (2) selection of a vendor (3) contract negotiations / execution of contract (4) implementation of CVR system
Tentative Timeline	May – October 2003: RFP development November 2003: Publish RFP February 2004: Select vendor March – April 2004: Contract negotiations May 2004: Contract execution
Deadline for compliance	January 1, 2006 (with waiver)

Performance Goal	Implement one voting machine, accessible to individuals with disabilities, in every Kansas polling place
Process to develop criteria	The secretary of state's staff will plan with a work group and consultant to develop a Request for Proposal (RFP) and establish goals for project management
Criteria to measure performance	A set of time-oriented goals for the following events: (1) development and issuance of an RFP (2) selection of a vendor(s) (3) contract negotiations / execution of contract (4) implementation of voting equipment
Tentative Timeline	2004 – 2005: RFP development/issuance and selection of vendor(s) Summer – Fall 2005: Delivery and implementation of accessible voting equipment
Deadline for compliance	January 1, 2006

Performance Goal	Implement second chance voting requirements
Process to develop criteria	The secretary of state's office will work with the Kansas Election Reform Advisory council and county election officials to develop a plan for implementation
Criteria to measure performance	A set of time-oriented goals for development of a voter education program to meet section 301(a)(1) requirements
Tentative timeline	Unknown at this time
Deadline for compliance	January 1, 2006

Performance Goal	Meet audit capacity requirements
Process to develop criteria	The secretary of state's office will work with county election officials to determine how counties with optiscan voting systems will meet the requirements
Criteria to measure performance	A set of time-oriented goals
Tentative timeline	Unknown at this time
Deadline for compliance	January 1, 2006

Performance Goal	Implement uniform definitions of what constitutes a vote for each type of voting system used in Kansas
Process to develop criteria	The secretary of state's office will work with the election standards task force to develop a proposal
Criteria to measure performance	Implementation of uniform definitions in Kansas statute or regulations in 2004 or 2005
Tentative timeline	Propose legislation in January 2004
Deadline for compliance	January 1, 2006

Performance Goal	Implement affidavit requirement for provisional voters
Process to develop criteria	Development of a plan for implementation by the secretary of state's office in 2003
Criteria to measure performance	To codify the requirement in state election law and implement the requirement on the local level
Tentative timeline	Legislation proposed in 2003, passed and ultimately vetoed. New legislation to be proposed in January 2004.
Deadline for compliance	January 1, 2004

Performance Goal	Develop and provide written information regarding how to determine the outcome of a provisional ballot
Process to develop criteria	Development of a plan for implementation by the secretary of state's office in 2003
Criteria to measure performance	A time-oriented set of goals for the following events: (1) prescribing a document with the appropriate information (2) sending the document to county election officials and providing instructions for use (3) verifying that county election officials have reproduced and distributed the documents
Tentative timeline	Document to be prescribed and distributed prior to August 2004. Information to be distributed to provisional voters beginning with the August 2004 primary election.
Deadline for compliance	January 1, 2004

Performance Goal	Develop a free access system for publication of provisional vote results
Process to develop criteria	The secretary of state's office will work with county election officials to develop a plan for implementation
Criteria to measure performance	A time-oriented set of goals for the following events: (1) developing a web-based free-access system (2) working with county election officials to test the system (3) implementation of the system
Tentative timeline	Plan to implement the system during the August 2004 primary election
Deadline for compliance	January 1, 2004

Performance Goal	Implement required public posting at polling places
Process to develop criteria	The secretary of state's office developed a plan for implementation in 2003
Criteria to measure performance	To codify the requirement in state election law and implement the requirement on the local level
Tentative timeline	Legislation proposed, passed, and vetoed in 2003. New legislation will be proposed in January 2004. County election officials will implement the requirements in 2004.
Deadline for compliance	January 1, 2004

Performance Goal	Require provisional ballots for individuals who vote pursuant to a court or other order extending polling place hours
Process to develop criteria	The secretary of state's office developed a plan for implementation in 2003
Criteria to measure performance	To codify the requirement in state election law and implement the requirement on the local level
Tentative timeline	Legislation proposed, passed, and vetoed in 2003. New legislation will be proposed in January 2004. County election officials will implement the requirements in 2004.
Deadline for compliance	January 1, 2004

Performance Goal	Meet the requirements for voters who register by mail
Process to develop criteria	The secretary of state's office developed a plan for implementation in 2003
Criteria to measure performance	To codify the requirement in state election law and implement the requirement on the local level
Tentative timeline	Legislation proposed, passed, and vetoed in 2003. New legislation will be proposed in January 2004. County election officials will implement the requirements in 2004.
Deadline for compliance	January 1, 2004

Performance Goal	Implement voter education, election official education/training, and poll worker training programs
Process to develop criteria	The secretary of state's office developed a plan for implementation with assistance from the Kansas Election Reform Advisory Council in 2003
Criteria to measure performance	A time-oriented set of goals for the following events: (1) convene a work group (2) development of the program (3) conducting the program
Tentative timeline	Implementation of the program will occur in 2004.

- ***Section 9: A description of the uniform, nondiscriminatory state-based administrative complaint procedure in effect under section 402.***

A proposed administrative complaint procedure is included below and remains subject to change. The proposal will be submitted to the Kansas Legislature in January 2004. In addition, the following guidelines have been developed for use by the secretary of state in conjunction with the administrative complaint procedure:

1. All complaints should be addressed at county level first as the county election official is best suited to solve the problem, and will likely solve the problem faster than a state-based complaint process.
2. A brochure/booklet will be created outlining the administrative grievance process for the public. The Secretary of State will work with various groups to construct the content and look of the brochure. (brochure will include point given above in #1.)
3. Notices, hearings, and any other procedures of the grievance process shall include any required accommodation(s).

KANSAS SECRETARY OF STATE
Proposed Administrative Complaint Procedure

Section 1. Scope.
This act provides a uniform, nondiscriminatory administrative procedure for the resolution of any complaint alleging a violation of any provision of Title III of the "Help America Vote Act of 2002," including a violation that has occurred, is occurring, or is about to occur.

Section 2. Definitions.
(a) In this act, the following terms have the meanings indicated.
(1) "Complainant" means the person who files a complaint with the Kansas secretary of state under this act.
(2) "Respondent" means any state or local election official whose actions are asserted to be in violation of Title III in a complaint filed under this act.
(3) "Title III" means Title III of the Help America Vote Act of 2002, Public Law 107-252, 116 Stat. 1666 (2002), codified at 42 United States Code §§15481-15485.
(4) "Arbitrator" means a neutral third party selected by the secretary of state who resolves the dispute between the complainant and respondent, and whose decision is final.

Section 3. Who May File.
Any person who believes that a violation of any provision of Title III is occurring, has occurred, or is about to occur, may file a complaint.

Section 4. Form of Complaint.
(a) A complaint shall be in writing and signed by the complainant under oath before a notary public.
(b) The complaint shall be submitted on a form prescribed by the secretary of state, which shall be available from the secretary of state or from any county election office.

Section 5. Place and Time for Filing; Copy for Respondent.
(a) A complaint shall be filed with the secretary of state within 30 days after the occurrence of the actions or events that form the basis for the complaint. For violations that are occurring or about to occur that may need immediate remedy, the complaint shall be timely filed to allow for resolution.
(b) The secretary of state shall deliver a copy of the complaint to each respondent.
(c) If the secretary of state is the respondent in the complaint, the complaint shall be filed and reviewed by the Kansas Department of Administration and all references to the secretary of state as the determinative body contained in this act shall be construed to refer to the Kansas Department of Administration.

Section 6. Consolidation of Complaints.
(a) The secretary of state may consolidate complaints if they relate to the same actions or events, or if they raise common questions of law or fact.

Section 7. Official Record of Proceedings.
(a) The secretary of state shall compile and maintain an official record in connection with each complaint filed under this act.
(b) The official record shall contain:
(1) A copy of the complaint, including any amendments made with the permission of the secretary of state;
(2) A copy of any written submission by the complainant;
(3) A copy of any written response by any respondent or other interested person;
(4) Any written report or review conducted by the secretary of state or county election officials;
(5) Copies of all notices and correspondence to or from secretary of state in connection with the complaint;
(6) Originals or copies of any tangible evidence received or considered;
(7) The original recording produced at any hearing conducted on the complaint, and a copy of any transcript produced on the complaint; and
(8) A copy of any final determination made on the complaint.

Section 8. Hearing, Notice of Hearing.
(a) If requested by the complainant, the secretary of state shall conduct a hearing on the record to review the complaint. The secretary of state or other person designated by the secretary of state shall serve as the hearing officer.
(b) The hearing shall be conducted no later than 30 days after the secretary of state receives the complaint. The secretary of state shall give at least 5 days advance notice of the date, time, and place of the hearing to the complainant and each named respondent.

Section 9. Conduct of Hearing.
(a) To the extent necessary for full disclosure of all relevant facts and issues, the hearing officer shall afford all parties the opportunity to respond, present evidence and argument, and shall not be bound by the technical rules of evidence; provided, the hearing officer may place reasonable limits on the length of the hearing.
(b) The hearing officer may at his discretion give nonparties an opportunity to present oral or written statements.
(c) All testimony of parties and witnesses shall be made under oath or affirmation and the hearing officer shall have the power to administer an oath or affirmation for that purpose.
(d) Any part of the evidence may be received in written form if doing so will expedite the hearing without substantial prejudice to the interests of any party.
(e) Official notice may be taken of (1) any matter that could be judicially noticed in the courts of this state, (2) the record of other proceedings before the secretary of state, (3) technical matters within the secretary of state's specialized knowledge, and (4) codes of standards that have been adopted by an agency of the United States, of this state or of another state or by a nationally recognized organization or association.
(f) The hearing officer may conduct all or part of the hearing by telephone or other electronic means, if each participant in the hearing has an opportunity to participate in the entire proceeding.
(g) The hearing shall be recorded at the secretary of state's expense. The secretary of state is not required to prepare a transcript at its expense. Any party, at the party's expense, may request that the secretary of state prepare a transcript from the record, or cause additional recordings to be made during the hearing. If a transcript is produced, the secretary of state shall include a copy in the official record.
(h) The hearing shall be open to the public, except for parts that the hearing officer rules to be closed pursuant to a provision of law expressly authorizing closure.

Section 10. Informal Conference, Pre-hearing Conference.
(a) The secretary of state may conduct an informal conference to resolve the filed complaint, if both the complainant and respondent have an opportunity to participate in the proceeding.
(b) The secretary of state may conduct a pre-hearing conference to organize issues and procedures to promote an orderly and prompt hearing.
(c) The secretary of state shall give advance notice of the date, time, and place of any conference to the complainant and respondent.

Section 11. Subpoenas.
The Secretary of State may issue subpoenas for a witness or any material that is relevant to the administration of this act.

Section 12. Final Determination.
(a) If there has been no hearing, the secretary of state shall review the record and determine whether a violation of Title III has been established by a preponderance of evidence. The determination of the secretary of state shall be final and shall not be subject to appeal pursuant to the Kansas Act for Judicial Review.
(b) At the conclusion of any hearing, the secretary of state shall determine whether a violation of Title III has been established by a preponderance of evidence. The determination of the secretary of state shall be final and shall not be subject to the Kansas Act for Judicial Review.
(c) If the complaint is not timely filed or if the secretary of state determines that a violation has not occurred or that there is insufficient evidence to establish a violation, the secretary of state shall dismiss the complaint.
(d) The secretary of state shall explain in a written decision the reasons for the determination and for any remedy selected.
(e) Except as specified in section 14, the final determination of the secretary of state shall be issued within 90 days after the complaint is filed, unless the complainant consents in writing to an extension. The final determination shall be mailed to the complainant and each respondent, and published on the secretary of state website.
(f) If the secretary of state cannot make a final determination within 90 days after the complaint was filed, or within any extension to which the complainant consents, the complaint shall be referred for final resolution under section 14. The record compiled pursuant to section 7 shall be made available for use under section 14.

Section 13. Remedies.
(a) Upon the finding of a violation, the secretary of state shall provide an appropriate remedy to resolve the grievance, which remedies may include the following:
(1) An order to any respondent commanding the respondent to take specified action, or prohibiting the respondent from taking specified action;
(2) An order directing the respondent or any employees or agents of the respondent to obtain additional training or education to prevent future violations;
(3) Any other remedy as deemed appropriate by the secretary of state to prevent or remedy the violation or future violations.
(b) The secretary of state may order either party to pay the costs of the hearing, based upon a finding by the secretary of state that the party's actions were egregious, frivolous, harassing, or were for an improper purpose.

Section 14. Alternate Dispute Resolution.
(a) If the secretary of state does not render a final determination within 90 days after the complaint is filed, or within any extension to which the complainant consents, the complaint shall be resolved under this section.
(b) Within five (5) days after a final determination was due, the secretary of state shall designate in writing to the complainant and the respondent the name of an arbitrator to resolve the complaint.
(c) The arbitrator may review the record compiled in connection with the complaint, including the tape recording or any transcript of a hearing and any briefs or memoranda, but shall not receive additional testimony or evidence.
(d) The arbitrator shall issue a written resolution within ten (10) days after the secretary of state's determination was due. The final resolution of the arbitrator shall be mailed to the secretary of state, the complainant, and each respondent, and published on the secretary of state website.

Section 15. The Secretary of State may adopt rules and regulations to administer this act.

- ***Section 10: A description of how Kansas will use the title I payment to carry out proposed activities in this plan.***

Kansas has received $5 million in title I payments for improvement of election administration. This funding may be used for the following approved purposes:
(1) Complying with requirements of title III
(2) Improving the administration of elections for federal office
(3) Educating voters concerning voting procedures, voting rights, and voting technology
(4) Training election officials, poll workers, and election volunteers
(5) Developing the state plan
(6) Improving, acquiring, leasing, modifying, or replacing voting systems and technology
(7) Improving the accessibility and quantity of polling places
(8) Establishing a toll-free hotline for use by voters to obtain voting information

It is expected that Kansas' title I funds will be used for the following, prioritized purposes:
(1) Implementation of a new statewide central voter registration system
(2) Administrative expenses for development of the state plan and the central voter registration system RFP
(3) Education programs
(4) Section 301 requirements (i.e. free access system, polling place postings, voter registration forms)

HAVA Requirements	Funding Source			
	Title I $5 million	Title II $7.5 million	State Match $225,000	Local Match $150,000
Central Voter Registration System	X			
Accessible voting equipment		X		
Administrative expenses	X			
Voter education	X			
CEO training	X			
Poll worker training	X			
Free access system	X			
Polling place postings	X			
Voter registration forms	X			

▫ ***Section 11: How will Kansas conduct ongoing management of the plan?***

The 2003 Kansas state plan will be submitted to the Federal Election Commission in September and with the Election Administration Commission when it is established. The secretary of state's office will then work to implement and develop the proposals made in the state plan. Work groups provide assistance with development of proposals. The Kansas Election Reform Advisory Council will meet to reevaluate the state plan in spring 2004. Changes may be proposed to the advisory council by the secretary of state's office at that time.

▫ ***Section 12: A description of the committee which participated in development of the state plan.***

In January 2003, the secretary of state formed the Kansas Election Advisory Council to comply with Section 255. The advisory council is a committee of appropriate individuals who met on a monthly basis (February through May) to assist with development of the state plan. Secretary Thornburgh is chairman of the group and each member of the advisory council serves on one of four subcommittees.

Accessibility Subcommittee	Melissa Wangemann, Chair	Legal Counsel, Kansas Secretary of State's Office
	Mark Braun	Director, Kansas Office of Administrative Hearings
	Robert Bugg	Commissioner, Kansas Advisory Council on African-American Affairs
	Michael Byington	Director, Kansas Relay Service and Kansas Telecommunications Access Program
	Tina DeLaRosa	Executive Director, Kansas Advisory Committee on Hispanic Affairs
	Anthony Fadale	Coordinator, Kansas ADA Compliance
	Martha Gabehart	Executive Director, Kansas Commission on Disability Concerns
	Brad Hamilton	Former Director, Kansas Office of Native American Affairs
	Scott Letts	Kansas Advocacy & Protective Services
	Betty Musick	Cloud County Clerk
	Pat Rahija	Wyandotte County Election Commissioner
	Patrick Terick	Director of Governmental Affairs, Cerebral Palsy Research Foundation
	Mary Tritsch	Associate State Director, AARP Kansas
Finance Subcommittee	Mindy Miller, Chair	Legal Associate, Kansas Secretary of State's Office, Elections & Legislative Matters Division
	Randall Allen	Executive Director, Kansas Association of Counties
	Marilyn Chapman	Sedgwick County Election Commissioner
	Rebecca Floyd	Executive Vice President & General Counsel, Kansas Development Finance Authority
	Randy Mettner	Special Assistant to the Governor
	Don Proffitt	Linn County Clerk
	Neil Woerman	Director of Information Technology, Office of the Insurance Commissioner
	Ryan Wright	Director of Public Affairs, Kansas Treasurer's Office

Central Voter Registration Subcommittee	Bryan Caskey, Chair	Administrative Assistant, Kansas Secretary of State's Office, Elections & Legislative Matters Division
	Cheryl Adelhardt	Harper County Clerk
	Tim Blevins	Chief Information Officer, Kansas Department of Revenue
	Rebecca Bossemeyer	Geary County Clerk
	Elizabeth Ensley	Shawnee County Election Commissioner
	Don Merriman	Saline County Clerk
	Denise Moore	Director, DISC
	Kathy Peckman	Miami County Clerk
	Mike Stewart	Chief Information Officer, Kansas Secretary of State's Office
	Sheila Walker	Director of Vehicles, Kansas Department of Revenue
Voting Standards & Education Subcommittee	Brad Bryant, Chair	Deputy Assistant Secretary of State, Elections and Legislative Matters Division
	Emily Bradbury	Executive Director, Kids Voting Kansas
	Jeff Burkhead	Executive Director, Kansas Press Association
	Gail DuPuis	Director, Kansas Office of Native American Affairs
	Keith Lawing	Wichita State University
	Patrick Murray	Executive Director, Kansas Democratic Party
	Ann Havenhill	President, Kansas League of Women Voters
	Scott Poor	Executive Director, Kansas Republican Party
	Connie Schmidt	Johnson County Election Commissioner
	Dr. Harvey Foyle	Emporia State University
	Rich Smith	Assistant Attorney General
	Rich Vargo	Riley County Clerk

Commonwealth of Kentucky

State Plan

As required by Public Law 107-252
Help America Vote Act 2002, Section 253(b)

John Y Brown, III
Secretary of State
State Capitol, Suite 152
700 Capital Avenue
Frankfort, KY 40601

Introduction

On October 29, 2002, President George W. Bush signed the Help America Vote Act (HAVA) into law. HAVA is a federal response to the irregularities in voting systems and processes seen in certain states during the 2000 Presidential election. HAVA requires each state to develop a comprehensive state plan for implementing mandatory changes in the administration of elections. The impact of HAVA on the Commonwealth includes these areas: replacing lever voting machines in 147 precincts, improving voter education and poll worker training, requiring provisional ballots, and mandating that at least one voting machine be available per polling place which is accessible to voters with disabilities.

The state plan for the Commonwealth of Kentucky, developed in accordance with Section 254 of the Act, through Kentucky's HAVA Advisory Committee, establishes a framework for meeting requirements, yet remaining a national leader in the conduct of elections.

We anticipate revising this document several times as the Commonwealth works toward improving elections and complying with HAVA. Most of the items included in this plan are based on the assumption that HAVA is fully funded by Congress over the next three federal fiscal years.

Overview of Conduct of Elections in Kentucky

The Secretary of State, an elected constitutional officer, serves as the Chief Election Official and Chairman of the State Board of Elections. Certain candidates for public office must file candidacy declaration papers with the Secretary of State. Candidates' names, party affiliation, and ballot order are certified by the Secretary to county clerks for ballot placement and printing. Election returns must be certified to the Secretary, as custodian of the official election results.

The State Board of Elections, an independent agency, administers the Commonwealth's election laws, promulgates administrative regulations necessary to properly carry out its duties, supervises the registration and purgation of voters, appoints the political party representatives to the 120 county boards of elections, and certifies the official election results. The State Board of Elections is comprised of seven members: Secretary of State (Chairman), three Democratic members and three Republican members. The State Board of Elections appoints an Executive Director and an Assistant to the Director, which shall be of opposite political party affiliations, to conduct the day-to-day operations.

The bulk of election administration is conducted at the county level by the county clerks and the county boards of elections. The county clerk is the candidate-filing officer for

county level offices. The county board of elections, which works at the direction of and under the supervision of the State Board of Elections, administers the election laws and the registration and purgation of voters within the county. The county board of elections is comprised of four members: county clerk (chairman), county sheriff, and one Democratic member and one Republican member appointed by the State Board of Elections.

State Plan Required Elements

1. **How the State will use the requirements payment to meet the requirements of title III and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.**

Voting System Standards

Voting System Standards	Sec. 301 (pages 36-102 of the PL)	
HAVA Requirement	State of Kentucky's Current Status	Action Planned
All voting systems shall permit a voter to verify/review selections before casting the vote.	Meets the requirement.	No action needed.
Allow voter to change or correct any error on the ballot before casting the vote.	Partially meets the requirement. Some paper ballots, which are used with an optical scan system or placed in a ballot box, are not scanned or counted while voter is still present in the polling site. Current process on mail-in paper absentee ballots would not meet the requirement.	A voter education campaign will need to be implemented in these precincts. A voter education campaign will need to be implemented.

Voting System Standards	Sec. 301 (pages 36-102 of the PL)	
HAVA Requirement	State of Kentucky's Current Status	Action Planned
Prevent or alert voter if he/she over votes on the ballot.	Partially meets the requirement. Some paper ballots, which are used with an optical scan system or placed in a ballot box, are not scanned or counted while voter is still present in the polling site. Current process on mail-in paper absentee ballots would not meet the requirement.	A voter education campaign will need to be implemented in these precincts. A voter education campaign will need to be implemented.
All voting systems must be able to produce a paper audit trail of all votes cast.	Partially meets the requirement. Optical scan tabulation systems and the MicroVote MV-464 DRE electronic voting system meet this requirement. Electronic 1242 DRE voting system, as currently programmed, does not meet this requirement.	Update existing voting systems or purchase new systems.
Voting systems must be accessible for individuals with disabilities, including nonvisual accessibility for the blind and visually impaired, in a manner that provides the same opportunity for privacy and independence as other voters. This requirement may be met by having at least one DRE or other system equipped for individuals with disabilities at each polling site.	Do not meet the requirement; all voting systems require human assistance. Jefferson County was a test county in the 2002 general election for a new DRE voting system, which contained audio plug-in for visually impaired voters.	Update existing voting systems or purchase new systems. Kentucky Disabilities Coalition will make a recommendation on an accessible voting system.

Voting System Standards	Sec. 301 (pages 20- 102 line 9-)	
HAVA Requirement	State of Kentucky's Current Status	Action Planned
Voting systems shall provide alternative language accessibility pursuant to the requirements of section 203 of the Voting Rights Act of 1965.	Kentucky is not currently covered under the alternative language section of the Voting Rights Act.	No action needed.
All voting systems shall have error rates (machine errors only) that do not exceed the Federal Election Commission standards.	Meets the requirement.	
A uniform definition of what constitutes a vote for each voting system in use in the state.	Does not meet the requirement. We have no uniform definition in place.	Implement a uniform definition for all voting systems in use in the state.

****

Provisional Voting and Voting Information Requirements

Provisional Voting and Voting Information Requirements	Sec. 302 (pages 102 line 10- 105 line 19-)	
HAVA Requirement	State of Kentucky's Current Status	Action Planned
A provisional voter is to be allowed to vote a paper ballot or an electronic ballot upon the completion of an affidavit. The ballot will be sealed in an envelope or electronically stored separately from the regular votes. The provisional ballot is to be transported to the county board of elections for determination of eligibility and possible counting if voter deemed eligible.	Does not meet the requirement. KRS 117.245 allows a provisional voter to fill out an Oath of Voter affidavit and then vote on the voting machine. The vote is counted. The Oath of Voter form is turned over to the commonwealth's attorney after the election. The commonwealth's attorney and county attorney shall investigate these forms and report to the grand jury.	The State Board of Elections will promulgate an administrative regulation to implement this provision.

Provisional Voting and Voting Information Requirements	Sec. 302 (pages 102 line 10- 105 line 19-)	
HAVA Requirement	State of Kentucky's Current Status	Action Planned
Each voter who casts a provisional vote shall be given written information on how they can ascertain whether their vote was counted, and if not why.	Does not meet the requirement.	Develop written instructions.
Establish a free access system, such as toll-free phone number or internet website, allowing provisional voters to ascertain whether their vote was counted, and if not why.	Does not meet the requirement.	Develop a free access system.
Post in each polling place a sample version of the ballot that will be used on election day.	Meets the requirement. KRS 424.290 requires each county clerk to publish in the newspaper of largest circulation, at least three days before each primary and regular election, a copy of face of the ballot. KRS 117.175 requires each precinct to post a copy of the ballot in the precinct. Most county boards of elections print an adequate supply of sample ballots to give to voters as they wait in line.	No action need.
Post information regarding the day of the election and polling hours.	Does not meet the requirement.	Post information.
Post instructions on how to vote on the voting system including how to cast a provisional vote.	Partially meets the requirement. KRS 117.175 requires the posting of instructions on how to operate the voting machine. Kentucky does not have provisional voting instructions.	No action needed. Post information on how to cast a provisional vote.

Provisional Voting and Voting Information Requirements	Sec. 302(pages 482<line 10> - 485<line15>)	
HAVA Requirement	State of Kentucky's Current Status	Action Planned
Post general information on state and federal voting rights and the right to a provisional vote if they meet the requirements to vote.	Does not meet the requirement.	Post information.
Post general information on federal and state laws prohibiting acts of fraud and misrepresentation.	Partially meets the requirement. KRS 117.030(2) requires conspicuous placement of signs in each precinct stating that vote buying and selling are illegal and the penalties for such acts. KRS 117.030(3) requires conspicuous placement of signs in each precinct informing voters of their right to report any administrative or clerical error they witness to the county board of elections (includes county board contact information). No information on federal laws.	No action needed. No action needed. Post information on federal laws.
Any voter who casts a vote as the result of a federal or state court order extending polling hours, shall do so on a provisional ballot, and it shall be kept separate from other provisional ballots.	Does not meet the requirement.	Provide for this occurrence.

****

Computerized Statewide Voter Registration List

One of the most important aspects of HAVA is the requirement that states create and maintain a statewide voter registration system. The Commonwealth of Kentucky established such a system in 1973, and it was used as a model by Congress for HAVA. The Kentucky system provides a consistent and standardized means of establishing and maintaining voter registration records, preparing voter lists and providing registration and election statistics. It is one of the key reasons the State Board of Elections and the individual county clerks maintain accurate, current, and relatively trouble free voter registration records. We currently have 2,682,997 persons registered to vote and a voting age population (2000 census data) of 3,046,951.

Because of the features and simplicity of our mainframe-based voter registration system, all of Kentucky's 120 counties benefit equally regardless of size. The voter registration records for each county reflect the actual number of registrants because the system does not allow more than one voter registration record to exist per social security number. Kentucky has utilized the full social security number since the early 1970's. In order to ensure privacy, we do not release or print the social security number on any public documents. In addition, registrants who move to a new county within the state and reregister to vote in that new county are automatically purged from the voter registration rolls of the county they left. We provide each county clerk with daily reports detailing changes to registrants' records, voter registration statistics by precinct prior to each election, and, finally, voter turnout statistics by precinct following each election. The State Board of Elections utilizes the information contained on the database to produce election day precinct rosters for our 3,464 precincts. Finally, our statewide voter registration database allows us to manage efficiently our list maintenance activities on the state level versus a county level.

In 1973, Kentucky became the fourth state (South Carolina in 1967, Delaware in 1968, and Alaska in 1970) to implement a centralized statewide voter registration system. The enabling legislation passed in 1972 with an implementation deadline of September 1973. The legislation required everyone to re-register to vote in order to assure we started with a clean voter registration database. The county clerks (local election officials) would register voters, mail copies of the cards to the State Board of Elections for data entry, and then receive an activity report back from the State Board of Elections on these entries. The system cost $1,102,498 to implement.[1]

In 1985, the State Board of Elections realized Kentucky needed a quicker more efficient process for registering voters. Utilizing existing hardware and communications infrastructure provided by another state agency, We developed a "real time" "on-line" mainframe-based system that enabled each county clerk to take over all data entry for his or her own county. This system enhancement required no any enabling legislation.

[1] The 1973 cost adjusted for inflation to 2001 dollars using the Consumer Price Urban Consumer Factor Index.

In the summer of 1985, the statewide database enhancement process began and was implemented in August, 1986. The system cost $796,899 to implement.[2]

Passage of the National Voter Registration Act of 1993 ("Motor-Voter") and our desire to add other features to greatly enhance the system, led to the complete overhaul of the database in 1995 . The enabling state legislation passed in April, 1994 with full implementation on January 1, 1995. The current mainframe database includes the following information for each registrant: social security number, name, residential address, mailing address, telephone number, voting precinct, voting precinct location, voting district information, party affiliation, date of birth, date of registration, last update date, inactive date (if needed), and a five year voting history that shows if the person voted in the primary and general elections of those years, and other information.

A direct "real-time" link with the Kentucky Transportation Cabinet's Division of Driver's License database and a "nightly batch" link with the social services agencies' database now interface with the statewide voter registration database. The State Board of Elections prints an acknowledgement card for the counties to mail to each voter who registers to vote or changes their residential address that affects their voting precinct location. An on-line declination screen allows any county clerk to access a listing of all those who decline the right to register to vote at the driver's license or agency offices. A voter registration purge inquiry screen provides a listing of the date, reason and "userid" of the person who purged the registrant. A master street screen function lists all registered voters on a given street in house number order, to aid in assigning the correct voting precinct. A precinct notification function, which allows a county to request the State Board of Elections produce a post card that the county mails, alerts voters in a given precinct of their new voting location. The system cost $1,160,926 to implement.[3]

The Election Night Tally (ENT) System for counties to enter their election results was implemented in 1986, placed on our website for public access in 1995 and overhauled in 2002. The ENT system provides an efficient compilation of statewide election results, which aids both our office and the public.

[2] The 1985 cost adjusted for inflation to 2001 dollars using the Consumer Price Urban Consumer Factor Index.

[3] The 1995 cost adjusted for inflation to 2001 dollars using the Consumer Price Urban Consumer Factor Index.

Comprehensive Statewide Voter Registration List Requirements and Implementation Issues	Sec. 303(a)(1)(A) <line15> (42 U.S.C.)	
NVRA Requirement	State of Kentucky's Current Status	Action Planned
Establish a uniform, statewide voter registration database including a unique identifier for each registrant.	Meets the requirement. KY has had a voter registration database since 1973, which was used as a model for this law. Our unique identifier on the voter registration database is the full Social Security number.	No action needed. The current database is a mainframe system. We would like to upgrade to personal computers and election management systems in each county clerk office.
All list maintenance activities shall conform to the National Voter Registration Act of 1993 (NVRA).	Meets the requirement. Refer to KRS 116.112.	No action needed.
State shall coordinate the voter registration database with appropriate state agencies concerning felony convictions and deaths.	Meets the requirement. KRS 116.113 sets forth requirements to work with Cabinet for Health Services on deaths; circuit clerks for persons declared mentally incompetent; and the Administrative Office of the Courts for convicted felons. NVRA also stipulates that the U.S. Attorneys notify states on federal felony convictions.	No action needed.
Implement special identification requirements for first time registrants who register by mail. (This does not apply to military, dependents of military or overseas voters.)	Not applicable. KRS 117.227 and 31 KAR 4:010, require all voters to present identification before being allowed to vote on election day.	

[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]
Mail-in voter registration form shall contain two questions concerning U.S. citizenship and will the voter be 18 by election day.	Meets the requirement. The Kentucky mail-in voter registration card now conforms to this new requirement.	No action needed. No action needed.

****

We include the following chart on voting rights for military and overseas citizens for informational purposes, as it is addressed in Title VII of HAVA and not Title III.

Voting Rights of Military and Overseas Citizens

[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]
Each state must designate a single office to provide information on registration and absentee ballot procedures for all military, dependents of military, and overseas voters.	Does not meet. County clerk is the contact person for this information.	Designate the State Board of Elections as the information site per HAVA requirement.

[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]
All states must report to the Election Assistance Commission, not later than 90 days after each federal general election, the number of military and overseas absentee ballots mailed and received back.	Partially meets the requirement. KRS 117.355(2) requires each county board of elections to submit a post-election report listing the type and number of absentee voters after each primary and general election. The form was modified in 2002 to provide information on military and overseas voters.	Send the information to Election Assistance Commission after each federal general election.
Absentee ballot applications for military, dependents of military, and overseas U.S. citizens are valid for all elections held within two-federal general election cycle.	Does not meet the requirement. A 2002 federal Department of Defense Authorization bill set forth a requirement that all applications were valid for a one-year federal general election cycle. KY currently follows this guideline.	Comply with the HAVA requirement.
All states must notify military, dependents of military, and overseas voters if their voter registration application and/or absentee ballot application has been rejected and the reason why.	Does not meet the requirement. If a voter registration application and/or absentee ballot application is missing some information, county clerks do try to notify the voter in order to receive the necessary information.	Comply with the HAVA requirement.
A state can not refuse to accept or process any otherwise valid voter registration application or absentee ballot application submitted by military, dependent of military, and overseas citizen on the grounds of early submission.	Meets the requirement. County clerk's process the voter registration when it is received and then hold the absentee application until the absentee ballots are printed 50 days prior to the primary and general elections per state law.	No action needed.

2. **How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entitles in the State for carrying out the activities described in paragraph (1), including a description of –**

(A) the criteria to be used to determine the eligibility of such units or entities for receiving the payment; and (B) the methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8).

The State Board of Elections will manage all Title II funds and account for all expenditures, funding levels, program controls, and outcomes. Kentucky will follow all applicable laws and regulations regarding the distribution of Title II funds.

A memorandum of understanding will be signed between the Chief Election Official and all counties detailing work required and the amounts of money. The counties will be required to submit semi-annual reports on their performance.

The Chief Election Official and the state Auditor will develop an agreement to provide the monitoring of all activities of HAVA funding.

Accessible voting systems will be placed in all voting locations. Equipment that will aid in the administration of elections will be placed in each of the county clerk's offices. Monies that are distributed for education and training will be based on voting age population with the Chief Election Official reserving the right to set minimum amounts for small counties.

3. **How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of title III.**

Voter education: As in the past, the State Board of Elections plans to develop television and radio public service announcements informing citizens how to register to vote and encouraging them to vote, as well as providing information regarding provisional voting and other election laws. The current *Voter Information Guide* (a pamphlet containing information on registering to vote, and voting) will continue to be produced and updated as warranted. The State Board continues providing voter education information on our website in addition to providing a list of candidate filings and will work with other for-profit and non-profit, governmental, and non-governmental groups to educate the public. The Board will encourage local county clerks/boards of election to demonstrate the operation of new voting equipment in malls and other public places.

Election official education and training: Pursuant to KRS 117.187, the State Board of Elections must provide special training regarding election laws and methods of enforcement to all members of county boards of elections, county attorneys, Commonwealth's attorneys, and certain members of the KY State Police on a regular basis. The Board participates in training sessions at the Kentucky County Clerks Association summer and fall conferences, monthly legislative meetings, and at any other time as issues arise or as requested. The State Board will continue to provide the *Precinct Election Officers Quick Reference Guide*. We will pursue the possibility of producing training videos, training modules and/or printed materials to aid in the training process. We will require each county board of elections to designate a county training/education coordinator who will work directly with the training officer at the State Board of Elections. The county training/ education coordinator will meet at least semi-annually with the State Board of Election's training officer.

Poll worker training: The county boards of elections provide special training before each primary and regular election to all poll workers, alternates, and certified challengers regarding their duties and the penalties for failure to perform. Any person failing to attend a training session without being excused for illness or other emergency is prohibited from serving as an election officer or challenger for five (5) years.

Per KRS 117.187, the training provided by the county boards of elections shall include:

a. Operation of the voting machine or ballot cards
b. Posting of necessary signs and notices at the polling place
c. Voter assistance
d. Maintaining precinct rosters
e. Confirmation of a voter's identity
f. Challenge of a voter
g. Completing changes of address or name at the polling place
h. Qualifications for voting in a primary election
i. Electioneering and exit polling
j. Write-in voting procedures
k. Persons who may be in voting room
l. Election violations and penalties
m. Assistance which may be provided by law enforcement officers
n. Election reports required to be completed

We will seek legislation to add sections to KRS 117.187 requiring sensitivity training for poll workers regarding persons with disabilities and training on the provisional voting process.

4. **How the State will adopt voting system guidelines and processes which are consistent with the requirements of section 301.**

Summary of Kentucky Voting Systems In Use
(2003 figures)

Election day voting systems	96 counties use Electronic 1242 DRE equipment 17 counties use MicroVote MV-464 DRE equipment 1 county uses ACCU-VOTE ES Optical Scan Tabulation 1 county uses mechanical lever machines 5 counties use mechanical lever machines and MicroVote MV-464
Mail-in absentee voting systems	114 counties hand count paper ballots. 6 counties utilize an optical scan system.
Walk-in absentee voting systems	113 counties utilize an electronic voting machine. 1 county utilizes a mechanical lever machine. 6 counties utilize an optical scan system.

Any person or corporation owning, manufacturing or selling any electronic voting system may request the State Board of Elections to examine the system for a $500 fee and the submission of a test report from an independent testing authority approved by the State Board of Elections. The report must demonstrate that the system meets all Federal Election Commission voting system standards.

The entity selling the electronic voting system must demonstrate the system to three examiners appointed by the State Board of Elections: one examiner who is an expert in computer science or electronic voting systems; one examiner who is knowledgeable in election procedures and law in Kentucky; and one examiner who is a present or former

county clerk. The three examiners shall submit one written report on each system examined. The members of the State Board of Elections shall also examine the system and approve the system if the examiners' report states that the system meets all the requirements of KRS 117.381, and if the State Board of Elections also finds that it meets the requirements. Although the State Board of Elections approves a system for use in Kentucky, the county's fiscal court in consultation with the county clerk purchases a voting system from the State Board of Elections' approved list of voting systems.

Per KRS 117.381, the following requirements shall be met before the electronic voting system is approved:

a. Provides for voting in secrecy
b. Permits each voter to vote at any election for all candidates and questions for which he is lawfully entitled to vote, and no others
c. Permits each voter, at the general election, to vote a straight political party ticket by one or more marks or acts
d. Provides a method for write-in voting
e. Provides for a nonpartisan ballot
f. Precludes each voter from voting for more persons for any office than he is entitled to vote for or upon any question more than once
g. Permits each voter at a primary election to vote only for the candidates seeking nomination by a political party in which such voter is registered, and for any candidate for nonpartisan nomination, and for any question upon which he is entitled to vote
h. Permits a voter to change his vote for any candidate or upon any question appearing on the official ballot up to the time that he takes the final step to register his vote and to have his vote computed. If the system uses paper ballots or ballot cards to register the vote and automatic tabulating equipment to compute such votes, the system shall provide that a voter who spoils his ballot may obtain another.
i. Provides for tabulating votes at the precinct by candidate and precinct
j. Meets or exceeds the standards for electronic voting equipment established by the Federal Election Commission.

The newly created Federal Election Assistance Commission will develop new voting system standards as stipulated in HAVA. Once these new standards are in place, we will amend our statutes to reflect the change.

5. **How the State will establish a fund described in subsection (b) for purposes of administering the State's activities under this part, including information on fund management.**

The State Comptroller of the Commonwealth of Kentucky established an "Election Fund" within the Commonwealth's Federal Fund to meet the reporting requirements of title I

of P.L. 107-252, the Help America Vote Act (the "Act"). The Election Fund will be maintained as part of the Commonwealth's Board of Elections.

The Election Fund consists of three programs, which will be interest-bearing accounts as described in Section 254(b)(1):

- A program titled "Election Fund – State Match" has been established to deposit funding received under title I as described in Section 254(b)(1). This account will ensure proper tracking of funds provided to the Commonwealth.
- A program titled "Election Fund – Section 101 and 102" has been established to track spending and verification of actual purchases in order to report to the Election Assistance Commission.
- A program titled "Election Fund – Title 3 Requirements" has been established to meet the requirements for uniform and nondiscriminatory technology and improve the administration of elections.

6. **The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on (A) the costs of the activities required to be carried out to meet the requirements of title III; (B) the portion of the requirements payment which will be used to carry out activities to meet such requirements; and (C) the portion of the requirements payment which will be used to carry out other activities.**

Activity	Cost Allocation
Voting equipment for all polling locations accessible to individuals with disabilities	$17,000,000
Other Title III requirements	$1,750,000
Voting system audit trail	$1,200,000
Provisional voting	$350,000
Voter education	$3,000,000
Poll worker training	$3,000,000
New absentee voting systems	$1,200,000
Enhancement of statewide voter registration system	$1,000,000
Election administration technology for counties	$14,500,000
Miscellaneous	$1,000,000
TOTAL if fully funded	$44,000,000

The Kentucky General Assembly appropriated up to $2.1 million in matching funds as required by the Act, to match Title II funds for implementation of the State Plan in Kentucky totaling approximately $44 million.

Submission of this plan presumes full and timely federal funding. In order for Kentucky to meet the schedule outlined in the State Plan, it is imperative that federal monies be made available to the state on a schedule that is consistent with implementation of the base components of the plan.

Kentucky reserves the right to seek waivers stipulated in the Help America Vote Act that allow us to delay implementation of this plan if federal funding is not forthcoming in a timely manner.

Proceeding without a guarantee of federal funds would create a financial burden for the state of Kentucky and its 120 counties. While Kentucky is anxious to meet and exceed the standards of the Help America Vote Act, implementation is not possible without the federal guarantees that accompany the Act.

7. **How the State, in using the requirements payment, will maintain expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.**

The Governor's office of Policy and Management evaluated the budget of the Kentucky State Board of Elections to ensure that the Maintenance of Effort requirement has been met. In addition, there will be a Maintenance of Effort requirement for each county receiving direct HAVA funds.

8. **How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is held responsible for ensuring that each performance goal is met.**

The Secretary of State, as Chief Election Official and Chairman of the State Board of Elections, is ultimately responsible for compliance with HAVA. The State Board of Elections administers elections in the commonwealth. Each county clerk and county boards of elections have substantial responsibilities in conducting elections. Therefore, the Chief Election Official/Chairman of the State Board of Elections, in collaboration with local election officials, will establish performance goals and will institute a process to measure performance toward the achievement of these goals.

Performance Goals

The State's primary goal is to achieve compliance with HAVA through the successful implementation of the programs outlined in the State Plan. Following is a description of the timetable for meeting each element of the Plan and the title of the official responsible for ensuring such element is met:

Element	*Official Responsible*	*Timetable*
Voting Systems	State Board of Elections County Clerk	By January 1, 2006
Voter Registration	State Board of Elections	meets Requirement; no HAVA changes necessary
Provisional Voting	State Board of Elections County Board of Elections	By January 1, 2004
Polling Place Accessibility	County Board of Elections	Ongoing
Voter Education/Outreach	State Board of Elections County Board of Elections	Ongoing
Poll Worker Training	County Board of Elections	Ongoing
Administrative Complaint Procedure	State Board of Elections	By January 1, 2004

Performance Measures

Please refer to our answer to question 2 for additional information.

9. **A description of the uniform, non-discriminatory State-based administrative complaint procedures in effect under section 402.**

The State Board of Elections will promulgate an emergency regulation to place these procedures into the State Administrative Code. In summary, the procedure provides a uniform, nondiscriminatory process for the resolution of any complaint alleging a violation of any provision of Title III of HAVA, including a violation that has occurred, is occurring, or is about to occur during a federal election. Any person who believes a violation of any provision of Title III has occurred may file a complaint with the State Board of Elections. The complaint must be on a form prescribed by the Board, signed, sworn to and notarized. At the request of the complainant the State Board of Elections will conduct a hearing on the record that will be conducted in accordance with HAVA requirements. The State Board of Elections will provide the appropriate remedy, and a final determination within the timeframes specified in HAVA. The procedure provides for alternative dispute resolution if the State Board of Elections does not make a timely final determination.

10. **If the State received any payment under title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.**

The Title I money will be used to replace lever machines for 147 precincts. The remaining money, excluding expenses in preparing and implementing the state plan, will remain in the interest-bearing election fund until a final appropriation has been made by Congress to determine if the legislation has been fully funded to the authorization level.

11. **How the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change (A) is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan; (B) is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and (C) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).**

The State HAVA Committee will continue to meet at least twice each year to review the budget and progress of the plan, making changes where necessary. The Chairman of the State Board of Elections will include individuals with disabilities in the implementation of HAVA. The Chairman of the State Board of Elections shall report annually to the Kentucky General Assembly's Task Force on Elections, Constitutional Amendments and Intergovernmental Affairs Committee, which is a sub-committee of the Interim Joint Committee on State Government, concerning the implementation of HAVA and expending of HAVA funds.

12. **In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year.**

This State Plan represents Kentucky's initial submission to the Election Assistance Commission.

13. **A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the committee under such section and section 256.**

Kentucky's HAVA Advisory Committee consists of twenty-four (24) members including the Secretary of State, local election officials from the two largest counties in the state, representatives from the Kentucky House and Senate, representatives of the disabled community, chairman of the political parties, and a variety of other election stakeholders.[4] The Secretary of State selected the committee membership and appointed a facilitator to chair each meeting.

To develop the state plan, the HAVA Advisory Committee met four times: March 20, April 17, May 8 and June 12.[5] Initially, the Advisory Committee discussed the requirements of HAVA and its effect on Kentucky election law. The next two meetings addressed accessible voting, provisional voting, training and education and the voting process and information technology. Committee meetings were publicly held and noticed in accordance with the state's Open Meetings Law.

The State Plan will be made available for public inspection and comment for a 30-day period prior to submission of the plan. A public hearing on the plan is scheduled for June 12, 2003. The State Board of Elections will publish notice in the state's two newspapers with the largest circulation.[6] The Secretary of State will have copies of the plan available for inspection in his office, and the plan will be published on both the Secretary of State's and the State Board of Elections' web pages. Copies of the plan will also be provided to all 120 county clerks. All comments are to be made in writing and filed with the Secretary of State.

[4] See Appendix A for list of Advisory Committee Members.
[5] See Appendix B for Advisory Committee Meeting Agendas.
[6] See Appendix C for Notice of Public Hearing for Comment on State Plan.

Notice of Public Hearing for Comment on State Plan

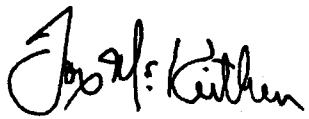
NOTICE OF PUBLIC HEARING
KY CHIEF ELECTION OFFICIAL, JOHN Y BROWN III
FOR COMMENT ON STATE PLAN
AS REQUIRED BY SECTION 254
OF THE HELP AMERICA VOTE ACT OF 2002

The Secretary of State as Chief Election Official for Kentucky, John Y. Brown III, will conduct a hearing on June 12, 2003 at 2:30 PM (ET) in Room 131, Capital Annex, Frankfort Kentucky, to receive comments on a state plan developed in accordance with Section 254 of the Help America Vote Act of 2002.

The hearing is open to the public and all interested persons will be given the opportunity to present testimony. Testimony will be limited to ten (10) minutes per person. To assure that all comments are accurately recorded, oral comments presented at the hearing must be provided in written form. Written comments on the state plan must be received within 30 days of this published notice to be considered part of the hearing record and can be mailed to the contact person listed below.

The hearing facility is accessible to people with disabilities. An interpreter or other auxiliary aid or service will be provided upon request. Please direct these requests as soon as possible to the contact person listed below.

The full text of the proposed State Plan is available on the Secretary of State's website (www.kysos.com) or is available for public inspection and copying during regular business hours (8:00 AM to 4:30 PM, ET) at the location listed below. Any individual requiring copies may submit a request to the contact person listed below in writing, by telephone, by FAX, or by e-mail.



CONTACT PERSON: Lisa Cleveland, Secretary of State Office, Suite 152 State Capitol, 700 Capital Ave., Frankfort KY 40601. The phone number is (502) 564-3490. The FAX number is (502) 564-5687. E-mail at lcleveland@mail.sos.state.ky.us.

Overview of the Louisiana Election System

Since 1962 the State of Louisiana has administered all elections in its state and local jurisdictions through a bifurcated system of elections management. The Secretary of State serves as the Chief Election Officer for the State of Louisiana and oversees the preparation and certification of ballots for all elections, the promulgation of all election returns, and the administration of the elections laws, except those relating to voter registration and the custody of voting machines. The Louisiana Department of Elections and Registration (Department of Elections and Registration) and the Commissioner of Elections are constitutionally and statutorily charged with administering laws with regard to registration of voters and voting machines. With regard to the registration of voters, the Commissioner of Elections is instructed to direct and assist the Registrars of Voters on the issue of registration, promulgate rules and regulations relative to registration, maintain a statewide database of voter registration data and to coordinate the state's compliance with the National Voters Registration Act of 1992 (NVRA). These two statewide officials are assisted by the local election officials, Clerks of Court and Registrars of Voters, in the conduct of all elections occurring in the State of Louisiana.

Louisiana has a commitment to providing accurate, efficient and technologically advanced elections systems to its constituents. Since the mid-1950s, Louisiana has conducted all of its elections on voting machines. The first voting machines to be introduced were the Shoup 2.5 lever voting machines. Since that time, Louisiana has upgraded its voting equipment to include lever and electronic systems each of which provides a printed copy of the election results. In 2001-2002, the State of Louisiana became one of the first states in the country to install touch screen electronic voting machines in its statewide absentee voting process and in election day voting in two of its parishes. These machines are equipped to accommodate disabled voters including those with visual impairments or disabilities.

The extent of Louisiana's cutting-edge election system is not limited to its voting machinery. Nearly eighteen years ago, the Department of Elections and Registration developed its elections and registration information network (ERIN), a statewide, centralized election management system. ERIN was designed to maintain voter registration records for every voter in the State of Louisiana in a central location, provide access to those voter records to authorized users in the Department of Elections and Registration and local Registrars of Voters offices, generate forms and reports required by the Registrars of Voters including printing precinct registers, and coordinate with computerized accounting programs and procedures to generate invoices for responsible parties and checks for personnel working in an election.

By the time that the Help America Vote Act of 2002 (HAVA) became law, Louisiana had implemented a significant number of the reforms and efficiencies that are required by HAVA. Louisiana had begun the move to more technologically advanced and accessible voting apparatus and had developed and refined its centralized election registration information system.

In January of 2004, Louisiana will end its bifurcation of elections management at the state level by merging the Department of Elections and Registration with the Louisiana Department of State (Department of State). All elections will be administered by the Secretary of State as the Chief Election Officer for the state and as the repository for all voter registration records.[1]

The following plan has been developed jointly by the Commissioner of Elections and Secretary of State in conjunction with the Louisiana Help America Vote Advisory Committee and the Governor. It details the plans, budget and ideals that Louisiana seeks to attain in its election process using funds authorized by HAVA.

Meeting the Requirements of HAVA

SECTION 1: How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under Section 251(a)(2), to carry out other activities to improve the administration of elections. (Section 254(a)(1))

Section 1.1 Voting Systems Standards (Section 301(a))

HAVA requires that each voting system used in an election for Federal office on and after January 1, 2006 shall meet the following requirements:

- Permit the voter to verify the votes selected by the voter on the ballot before the ballot is cast and counted.
- Provide the voter with the opportunity to change the ballot or correct any error before the ballot is cast and counted.

[1] References in this plan may be made to the Secretary of State and/or Commissioner of Elections. After January 12, 2004, the responsibility for all functions of both constitutional officers will lie with the Secretary of State.

- If the voter selects votes for more than one candidate for single office, notify the voter that the voter has selected more than one candidate for a single office on the ballot; notify the voter before the ballot is cast and counted of the effect of casting multiple votes for the office; and provide the voter with the opportunity to correct the ballot before the ballot is cast and counted.

HAVA further requires that all paper ballot systems meet the following requirements:

- Establish a voter education program specific to that voting system that notifies each voter of the effect of casting multiple votes for an office and provide the voter with instructions on how to correct the ballot before it is cast and counted including instructions on how to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error.
- Voting system shall ensure that any notification required under Section 301 preserves the privacy of the voter and the confidentiality of the ballot.

Louisiana's HAVA Compliance

Louisiana currently has four types of voting systems in place for casting election day and absentee ballots. For election day voting, Louisiana conducts elections only on lever and electronic voting machines. Fifty of Louisiana's sixty-four parishes are equipped with the AVM-POM, lever-type voting machines. Fourteen parishes are outfitted with electronic voting machines. Those machines are provided by two different vendors: AVC Advantage, manufactured by Sequoia Voting Systems, and iVotronic, manufactured by Election Systems & Software (ES&S). As for absentee voting, in-person ballots are cast on electronic, touch screen voting machines (iVotronic). All mail-in absentee ballots are cast on mark-sense paper and read by NCS Optiscan 5 scanners.

The voting system standards and voting apparatus currently in place in Louisiana allow the voter to review his selections and alter any selection prior to activating the cast vote mechanism. All three machines prevent an overvote by refusing to allow the voter to make more selections than are permitted in a particular candidate or proposition election. The iVotronic gives the user a message stating that he has attempted to select more selections than are allowed in that election and to change one of his previous selections. However, the AVM-POM and AVC Advantage simply will not allow the voter to depress an additional lever or electronic selection key. In order to alter one of these selections, the voter must de-select one of his/her previous choices.

Paper ballots are accompanied by instructions that tell the voter how to cast a vote on the paper ballot, including the proper technique in marking the selection and correcting a selection. These instructions have been attached as Appendix "1". Legislation was adopted by the Louisiana Legislature, which requires the Secretary of State to amend

those instructions to include information relative to using pencil to mark the paper ballot, allowing for corrections, and instructions on what effect selecting more than the allowed number of selections in a single election will have on the counting of the voter's ballot. See Act No. 1220 of the 2003 Regular Legislative Session.

The Louisiana voting system standards further require that each election device be contained within a booth that provides privacy to the voter. A copy of the voting system standards has been attached as Appendix "2". All voting apparatus used in Louisiana are shielded either by a curtain or booth such that the selections of the voter cannot be seen.

In addition, the voting system standards require that the system "provide secrecy in the act of voting such that the selection of a voter cannot be determined after that vote has been cast." See Appendix "2". Lever machines tally votes using mechanical counters. The appropriate counter advances each time that position is voted. The counters are locked inside the machine such that persons cannot ascertain the number of votes on the counters during voting on election day. A final result is printed upon the close of polls, when all counters have been locked against further voting. As for the electronic systems in use in Louisiana, each computer assigns the votes cast to random positions within the computer's memory so as to avoid the ability to determine an individual's vote.

Section 1.1.a. Audit capacity

- Voting system shall produce a record with an audit capacity for such system.
- Manual audit capacity: Voting system shall produce a permanent paper record with a manual audit capacity for such system; shall provide the voter with an opportunity to change the ballot or correct any error before the permanent paper record is produced; and the paper record produced shall be available as an official record for any recount conducted with respect to any election in which the system is used.

Louisiana's HAVA Compliance

Each voting system currently in place in the State of Louisiana produces a permanent paper record of the results tallied by that apparatus. All lever machines produce a paper record by sliding a platen over the raised numbers on the counters, similar to an old-style credit card imprinting device. All electronic voting machines produce a printed result generated by the computer. Last, all scanners used to calculate results of paper mail-in absentee ballots are attached to a computer that provides a printed result of the tally.

Upon the replacement of lever voting machines with a direct record electronic voting system, all machines used in Louisiana will be capable of printing not only a paper record of the final results but also a paper record of each vote cast in the election.

Section 1.1.b. Accessibility for individuals with disabilities

- Voting system shall be accessible for individuals with disabilities, including nonvisual accessibility for the blind and visually impaired, in a manner that provides the same opportunity for access and participation as for other voters; use at least one direct recording electronic voting system or other voting system equipped for individuals with disabilities at each polling place; and if used Title II money to purchase machines, meet the voting system standards for disability access by January 1, 2007.

Louisiana's HAVA Compliance

Two parishes for election day voting and all sixty-four parishes for absentee in-person voting are equipped with voting machines that meet the disability requirements of HAVA. Those parishes and the Registrars of Voters Offices are equipped with iVotronics manufactured by ES&S. These laptop-style, touch screen voting machines accommodate individuals restricted to wheelchairs, by allowing the individual to hold the machine in his lap and vote the ballot. In addition, at least one unit in each precinct and each Registrar of Voter's office is equipped with an audio ballot to accommodate blind and visually impaired voters by reading the ballot to the voter.

In addition, the AVC Advantage voting machines will accommodate physically disabled persons, by lowering the ballot screen to a level that an individual confined to a wheelchair would be able to reach. Those machines are not currently equipped with audio ballots. However, a retrofit is available to provide an audio ballot on those machines. At least one voting machine in each precinct in the twelve parishes using AVC Advantage voting machines will be retrofitted to provide an audio ballot for visually impaired and blind voters.

The AVM-POM lever voting machines can be lowered to a level accessible for a handicapped individual, but cannot be upgraded to permit an audio ballot. The state will have to acquire alternative voting systems in order to comply with HAVA in the precincts in the fifty parishes currently using AVM-POM lever voting machines.

Section 1.1.c. Alternative language accessibility

- System shall provide alternative language accessibility pursuant to Section 203 of the Voting Rights Act of 1965.

Louisiana's HAVA Compliance

Two voting systems currently comply or would allow accommodation for a foreign language ballot. Louisiana does not currently have a mandate to provide a foreign language ballot. However, should that need arise in the future, both the iVotronic and

AVC Advantage ballots can be developed to accommodate multiple languages. The ballot layout for the AVM-POM machines does not allow room to print more than one language on the same ballot. As such, some other voting system would have to be available for those fifty parishes using AVM-POM voting machines in order to accommodate foreign language ballots.

Section 1.1.d. Error rates

- Error rate of the voting system in counting ballots shall comply with the error rate standards established under Section 3.2.1 of the voting systems standards issued by the Federal Election Commission (FEC) in effect on October 29, 2002.

Louisiana's HAVA Compliance

Assuming that the error rate adopted by the FEC in its 2002 voting system standards is made applicable to all voting systems as required by Section 301(a)(5), then every system currently in use in Louisiana that was previously certified under the 1990 standards would have to be resubmitted by its vendor to the National Association of State Election Directors (NASED) for testing under the 2002 FEC standards. At this time, it is uncertain whether any of the independent testing authorities approved by NASED are testing voting systems according to the 2002 FEC voting system standards.

It is believed that the iVotronic and AVC Advantage will meet the error rate provided in Section 3.2.1 of the 2002 FEC voting system standards. However, that remains to be seen, as those machines will both have to be resubmitted for testing in the near future. As for the AVM-POM, it is highly uncertain as to whether this system will meet the error rate requirement as this system was implemented for use in elections long before the FEC had developed any type of standards for voting.

Assuming that one or more of these systems do not meet the error rate set forth in Section 3.2.1 of the 2002 FEC voting system standards, the system(s) will have to be replaced with a voting apparatus that meets the FEC standards for errors.

Section 1.1.e. Uniform definition of what constitutes a vote

- State shall adopt uniform and nondiscriminatory standards that define what constitutes a vote and what will be counted as a vote for each category of voting system used in the State.

Louisiana's HAVA Compliance

Act 1220 of the 2003 Regular Session of the Louisiana Legislature complies with the HAVA requirement for a uniform definition of what constitutes a vote and what will be counted as a vote:

a) Provides that in order to cast a vote on a voting machine, a voter shall make at least one selection in a candidate or proposition election and that voting is completed by activating the cast vote mechanism.

b) Provides that in order to cast a vote on a paper ballot, a voter must make a selection for a candidate or for or against a proposition by completely filling in the oval to the right of a selection and returning the ballot to the appropriate election official within the applicable deadline set forth by law. Also provides that if a voter makes selections for more than the number of candidates to be elected for an office or makes selections for and against the same proposition, the selections for that office or proposition will be void.

See Act 1220 attached as Appendix "3".

SECTION 1.1 VOTING SYSTEM STANDARDS

VOTING SYSTEM STANDARDS	VOTING MACHINE COMPLIANCE IN LOUISIANA		
	AVM-PO M	AVC	iVotronic
Permit the voter to verify the votes selected by the voter on the ballot before the ballot is cast and counted.	Yes	Yes	Yes
Provide the voter with the opportunity to change the ballot or correct any error before the ballot is cast and counted.	Yes	Yes	Yes
If the voter selects for more than one candidate for a single office, notify the voter that the voter has selected more than one candidate for a single office on the ballot; notify the voter before the ballot is cast and counted of the effect of casting multiple votes for the office; and provide the voter with the opportunity to correct the ballot before the ballot is cast and counted.	The AVM -POMdoes not allow the voter to cast more than the maximum number of votes in a particular race. It will not allow the voter to depress another lever to cast an overvote. It thereby meets this requirement and the notification part of this requirement is self-evident.	The AVC does not allow the voter to cast more than the maximum number of votes in a particular race. It will not allow the voter to illuminate another button to cast an overvote. It thereby meets this requirement and the notification part of this requirement is self-evident.	The iVotronic will not allow more than the appropriate number of votes in a single race and provides an error message to the user. The voter is instructed to change his selection by deselecting his previous choice and then selecting the candidate or position that he chooses.
Voting system shall produce a record with audit capacity for such system, including manual audit capacity.	AVM – POM will provide a printed version of final result, but does not provide a printed log of each vote cast on the machine.	AVC will provide a printed version of final result and a printed log of each vote cast on the machine.	iVotronic will provide a printed version of final result and a printed log of each vote cast on the machine.
Voting system shall be accessible for individuals with disabilities, including nonvisual accessibility for the blind and visually impaired.	AVM –POM can provide access to physically handicapped indivduals but not to visually impaired voters.	AVC can provide access to physically handicapped indivduals and to visually impaired voters via retrofit.	iVotronic can provide access to physically handicapped indivduals and visually impaired voters.

SECTION 1.1 VOTING SYSTEM STANDARDS (CONTINUED)

VOTING SYSTEM STANDARDS	VOTING MACHINE COMPLIANCE IN LOUISIANA		
	AVM-POM	AVC	iVotronic
System shall provide alternative language accessibility pursuant to Section 203 of the Voting Rights Act.	Due to the limited space and ballot layout, AVM cannot provide alternate languages.	AVC ballot style will allow alternate languages to be printed beside English text.	iVotronic's electronic ballot will allow for alternate languages.
Error rate of system shall comply with the error rate standard established under Section 3.2.1 of the voting system standard issued by the FEC in effect on October 29, 2002.	It is uncertain as to whether the AVM-POM will meet the error rate standard. AVM-POM's were introduced prior to the FEC's error rate standard.	AVC is believed to meet the error rate standard of the FEC; machine will have to undergo recertification under that standard.	iVotronic is believed to meet the error rate standard of the FEC; machine will have to undergo recertification under that standard.
State shall adopt uniform and non-discriminatory standards that define what constitutes a vote and what will be counted as a vote for each category of voting system used in the state.	Act 1220 defines what constitutes a vote and what shall be counted as a vote on a lever voting machine.	Act 1220 defines what constitutes a vote and what shall be counted as a vote on an electronic voting machine.	Act 1220 defines what constitutes a vote and what shall be counted as a vote on an electronic voting machine.

SECTION 1.1 VOTING SYSTEM STANDARDS (CONTINUED)	
VOTING SYSTEM STANDARDS	PAPER BALLOT COMPLIANCE IN LOUISIANA
	Mark Sensor Paper Ballots used in Absentee by Mail and Provisional Voting
Establish education program that notifies each voter of the effect of casting multiple votes for an office and provide instuctions on how to correct the ballot before it is cast and counted.	Louisiana already has in place an instruction sheet that is distributed with absentee mail-in ballots. That pamphlet must be revised pursuant toAct 1220 to include instructions on filling out the ballot in pencil to allow for corrections and specific information about how to properly alter a selection.
Uniform and non-discriminatory standard that defines what constitutes a vote and what will be counted as a vote.	Act 1220 defines what constitutes a vote and what shall be counted as a vote on a paper ballot distributed during absentee by mail or provisional voting.

Section 1.2 Provisional Voting (Section 302)

HAVA requires that provisional voting be permitted in federal elections on and after January 1, 2004 as follows:

- If an individual declares that he is a registered voter in the jurisdiction in which he desires to vote and that he is eligible to vote in an election for Federal office, but his name is not on the official list of eligible voters at a polling place or an election official asserts that the individual is not eligible to vote, the individual may cast a provisional ballot.
- The election official must notify the voter that he is eligible to cast a provisional ballot.
- The voter may cast a provisional ballot or absentee provisional ballot at the polling place or Registrar of Voter's office after signing an affirmation that states that he is a registered voter in the jurisdiction and that he is eligible to vote in the federal election.
- The election official shall transmit the provisional ballot or the voter information contained in the written affirmation to the appropriate state or local election official to verify if the individual is eligible to vote.
- If the appropriate state or local election official determines that the individual is eligible to vote under state law, the individual's provisional ballot shall be counted as a vote in the federal election in accordance with state law.
- At the time the individual casts a provisional ballot, the appropriate state or local election official shall give the voter written information that explains how to ascertain whether his vote was counted, and, if his vote was not counted, the reason that his vote was not counted.
- The appropriate state or local election official shall establish a free access system for an individual who casts a provisional ballot to determine whether his vote was counted, and if his vote was not counted, the reason that his vote was not counted.
- The state or local official must maintain reasonable procedures to protect the security, confidentiality, and integrity of personal information used for the free access system. Access to the information concerning the provisional ballot will be restricted to the individual voter who cast the provisional ballot.
- A provisional ballot shall also be cast by any individual who votes for a federal office after the polls close pursuant to a court order or any other order extending the poll hours. Those provisional ballots cast shall be held separate from other provisional ballots cast by voters who cast provisional ballots during regular poll hours.

Louisiana's HAVA Compliance

Louisiana will comply with the provisional voting requirements of HAVA and legislation was passed in the 2003 Regular Session of the Louisiana Legislature to provide for provisional voting. Act 423 of 2003 Regular Legislative Session implements provisional voting in Louisiana only in elections for federal office as follows:

1) Authorizes an individual to cast a provisional paper ballot for candidates for federal office if his name does not appear on the precinct register and he has not been authorized by the Registrar of Voters to vote by affidavit or his eligibility to vote has been challenged by the commissioners or registrar/deputy registrar.

2) Procedure for provisional voting for federal office at a polling place or the Registrar of Voter's office:

- Applicant fills in the provisional ballot envelope flap and signs the certificate on the flap attesting that he is a registered voter in the parish and is eligible to vote in the election for federal office.
- Applicant marks the provisional ballot, places the provisional ballot in the provisional ballot envelope, seals the envelope, and returns the provisional ballot envelope to the commissioner or registrar/deputy registrar.
- Applicant who casts a provisional ballot shall be provided written instructions by the commissioner or registrar/deputy registrar that explains how the applicant may determine whether his provisional vote was counted, and, if his provisional vote was not counted, the reason his vote was not counted.

3) Counting of provisional ballots:

- The parish Registrar of Voters compiles a list of the names of individuals who voted a provisional ballot.
- The Registrar of Voters, Secretary of State, and other state and local agencies shall compile and provide available registration documentation for the Parish Board of Election Supervisors (Parish Board) to determine if an individual casting a provisional ballot is a registered voter and eligible to vote in the federal election.
- The Parish Board shall be responsible for counting and tabulation of provisional ballots for federal office.
- Provisional ballots shall be counted by the Parish Board on the third day following the election.
- Candidates, their representatives, and qualified electors may be present during the counting and tabulation of provisional ballots.
- The Parish Board shall determine if a provisional ballot shall be counted.
- All provisional ballots that are rejected by the Parish Board shall be sealed in the special provisional ballot envelope. No rejected provisional ballot shall be counted.
- A member of the Parish Board shall remove the flaps from the valid provisional ballots. The valid provisional ballot flaps and supporting registration documentation shall then be placed in the designated envelope and transmitted to the Registrar of Voters.
- The members of the Parish Board shall count the valid provisional ballots by hand and the total number of provisional votes cast for a candidate shall be entered on the final provisional ballot vote report and the results shall be certified.
- A copy of the signed list of provisional voters indicating which ballots were counted and which ballots were rejected shall be transmitted to the Secretary of State.

4) Provisional voting for federal office during extension of poll hours:

- An applicant who votes during the extension of poll hours pursuant to a court order or any other order extending the poll hours shall vote by provisional ballot for federal offices.
- The provisional ballots cast during the extension of poll hours shall be kept separate and placed in a separate envelope.
- The provisional ballots cast during the extension of poll hours shall be counted according to the same procedure set forth for provisional ballots cast during absentee voting in person or during regular poll hours.
- An emergency as defined by Louisiana law, La. R.S. 18:401.1, does not constitute a circumstance in which polling hours are delayed necessitating the use of provisional ballots.

5) Results of federal election:

- The results of the federal election prepared by the Parish Board shall also include the total provisional votes for each candidate for federal office.

See Act 423 attached as Appendix "4".

The Secretary of State in conjunction with the Clerks of Court and Registrars of Voters will ensure that the State complies fully with the requirements of HAVA for provisional voting as follows:

1) The Secretary of State will be responsible for preparing the forms that are required for implementing provisional voting in Louisiana.

2) The Secretary of State will be responsible for establishing a free access system that allows an individual who casts a provisional ballot to determine whether his vote was counted, and, if his vote was not counted, the reason that his vote was not counted. The system will include a toll-free telephone number where access to the information about an individual's provisional ballot will be restricted to the individual who casts the ballot.

3) The Secretary of State will provide an updated informational pamphlet that will provide instructions for provisional voting, counting and tabulation of provisional ballots, and posting of additional information for provisional voting required by HAVA.

4) The Clerks of Court and Registrars of Voters will be responsible for implementing provisional voting for federal offices at the polling places on election day and during absentee voting in person, respectively.

Section 1.3 Voting Information Requirements (Section 302(b))

Section 302(b) of HAVA requires, with respect to federal elections held on and after January 1, 2004, the following voting information to be publicly posted at each polling place on the day of each election for federal office:

- A sample version of the ballot that will be used for that election;
- Information regarding the date of the election and the hours during which polling places will be open;
- Instructions on how to vote, including how to cast a vote and how to cast a provisional ballot;
- Instructions for mail-in registrants and first-time voters under Section 303(b);
- General information on voting rights under applicable federal and state laws, including information on the right of an individual to cast a provisional ballot and instructions on how to contact the appropriate officials if these rights are alleged to have been violated; and
- General information on federal and state laws regarding prohibitions on acts of fraud and misrepresentation.

Louisiana's HAVA Compliance

Louisiana law requires the following election day and absentee voting information:

1) La. R.S. 18:421B. requires the Secretary of State to develop and print cards of instruction to voters and commissioners which shall not be inconsistent with the constitution and laws of the United States or of this state and which shall be approved by the Attorney General.

2) La. R.S. 18:552A.(2) requires the Secretary of State to furnish the parish custodian of voting machines for each parish two sample ballots for each voting precinct at which voting shall be conducted in an election.

3) La. R.S. 18:562 provides the requirements for the identification of voters. The Secretary of State prepares an informational poster that sets forth the requirements of R.S. 18:562, and informs the voter that he may sign an affidavit and vote if he does not have a Louisiana driver's license, a Louisiana special identification card,. or other generally recognized picture identification.

4) La. R.S. 18:1306B.(2) requires the Secretary of State to prepare an informational pamphlet, approved by the Commissioner of Elections and the Attorney General, generally describing the particular absentee counting equipment utilized in the election to

count absentee ballots or voting machines used to cast absentee ballots. The pamphlet shall also include instructions that inform the voter how to cast his vote, which shall include instructions for marking the absentee ballot and examples of the correct and incorrect methods of marking the ballot, if applicable.

Legislation was passed during the 2003 Regular Session of the Louisiana Legislature to comply with the HAVA voting information requirements.

Act 1220:

a) Requires the Secretary of State, in the case of a federal election, to supply informational posters as required by the Help America Vote Act of 2002.

b) Requires the commissioners to post informational posters, if required, in addition to instructions, the statement of proposed constitutional amendments on the ballot, and a sample ballot in a conspicuous place at the principal entrance to the polling place.

See Appendix "3".

Act 423:

a) Requires the commissioner or registrar/deputy registrar to provide an applicant who casts a provisional ballot with written instructions for how the applicant may ascertain whether the provisional vote was counted, and if the provisional vote was not counted the reason the vote was not counted.

See Appendix "4".

The Secretary of State will update the following publications to meet the requirements of HAVA: 1) the card of instructions on how to vote, including how to cast a vote and how to cast a provisional ballot, and 2) the informational pamphlet required by R.S. 18:1306 for absentee voting to provide the voter who votes on a paper ballot with instructions on how to correct the ballot before it is cast and counted.

The Secretary of State will also prepare new informational posters to provide the following: information regarding the date of the election and the hours during which polling places will be open; instructions for mail-in registrants and first time voters under Section 303(b); general information on voting rights under applicable federal and state laws, including information on the right of an individual to cast a provisional ballot and instructions on how to contact the appropriate officials if these rights are alleged to have been violated; and general information on federal and state laws regarding prohibitions on acts of fraud and misrepresentation.

Section 1.4 Computerized Statewide Voter Registration List

Title III, Section 303(a) sets forth the computerized statewide voter registration list requirements:

- Requires a single, uniform, official, centralized, interactive computerized list of all legally registered voters in the state and each voter assigned a unique identifier.
- Any election official may obtain immediate access to the list or database.
- Requires computerized list maintenance.
- Requires removal of individuals in accordance with the NVRA.
- Requires coordination of felony status and death records with state agencies.
- Requires security preventing unauthorized access.
- Requires verification of certain voter registration information provided by applicants. (Should individual provide last four digits of his social security number, verification must be obtained from the Social Security Administration via link through the Office of Motor Vehicles (OMV) that the number provided is an accurate and valid number. State Elections Official and Motor Vehicle Authority shall enter into an agreement to match information in the statewide registration database and the OMV database to verify accuracy of information provided on voter registration application.)
- Requires applicant to provide driver's license number, if issued, or last four digits of social security number, if issued. If applicant has neither, a unique number will be generated to identify the individual.
- Requires sharing of information in databases.

Compliance with Section 303(a) of HAVA must be completed on or before January 1, 2004.

Louisiana's HAVA Compliance

Louisiana already has in place a single, centralized computerized list of voters registered to vote in the State of Louisiana. ERIN has been in place for nearly eighteen years. By and large, ERIN already accomplishes exactly what HAVA envisions. The system maintains all records of registered voters throughout the state and assigns each voter a unique identification number. However, there are a few, minor alterations that must be made to conform to the HAVA requirements.

Modifications that will be required to ERIN, include allowing Clerks of Court access. ERIN already provides access to the Registrar of Voters in each jurisdiction. However, HAVA requires access to all local election officials. Thus, the Clerks of Court, chief local election officials, will be given inquiry access to ERIN. In order to accomplish this

link, Clerks of Court in all parishes must be linked to the system via a series of routers, switches and lines. This project was already underway in light of the upcoming merger between the Department of State and Department of Elections and Registration. This project is expected to be completed on or before December 31, 2003.

ERIN meets the requirements of removal of individuals in accordance with the NVRA. Duplicate names are eliminated from the list. In addition, regular list maintenance is performed, placing individuals who do not respond to mailings on the inactive list and purging them from the list of voters if they are inactive for the course of two federal general elections. ERIN data is also compared to felony lists provided by the Louisiana Department of Public Safety and Corrections (DPS) and federal and state clerks or court and death notices from the Louisiana Department of Health and Hospitals. Persons who have been convicted of a felony and are serving a sentence of imprisonment, as defined by Louisiana law, are suspended during the period of incarceration and probation. Similarly, death notices are matched against ERIN data to allow for the removal of deceased voters. No modifications are necessary to meet HAVA's removal of voters requirement in keeping with the provisions of the NVRA.

ERIN provides customized software security disallowing unauthorized access. No modifications are necessary to meet the security requirements of HAVA.

In order to meet the registration information verification requirements of HAVA, certain modifications will be required. ERIN will be modified as follows:

- Add field for driver's license number on application entry screen and forms.
- Add driver's license number and OMV data to add/update screen.
- Develop applications to process verification and exchange information with OMV.
- Develop programs to update/add/load information provided by OMV.
- Develop reports for Registrars of Voters.
- Update ERIN manual.

In addition to the in-house changes that must be made to ERIN, certain changes must be made by the OMV to both their software and procedures to ensure compliance with the HAVA information verification requirements:

- The voter's driver's license number will be preprinted on in-person and mail-in voter registration applications.
- Develop exchange information processes with the Department of Elections and Registration.
- Create an interface with the Social Security Administration on social security number verification method.

The Department of Elections and Registration and DPS will exchange information electronically via a secure encrypted protocol (VPN). An exchange data format has been developed between the agencies. In order to accomplish this information sharing, the following alterations must be made to ERIN.

- Develop encription software scripts.
- Develop program to capture data.

No changes are anticipated to be necessary to the DPS system to accommodate an encrypted data transfer.

Section 1.5 Requirements For Voters Who Register By Mail

Section 303(b) of HAVA sets forth the requirements for persons who register to vote by mail. The changes affect the information that is contained on the mail-in registration form and the information or proof of identity provided by the mail-in registrant.

Any mail-in registration form must contain the following information:

- Whether the registrant is a citizen of the United States.
- Whether the registrant will be 18 years of age or older by the next election date.
- Instructions on discontinuing the application process if the answer to one of these two questions is "no".
- Instructions that certain verification information must be provided with the mail-in registration form in order to avoid the necessity for the provision of additional verification information upon voting for the first time.

If the registrant has a driver's license number, that number must appear on the voter registration form. If the registrant does not have a driver's license number but has a social security number, at least the last four digits of the registrant's social security number must be provided on the voter registration form. If these numbers are issued and are not provided, the registration application cannot be processed. Certain alternative information may be provided by a mail-in registrant in order to avoid additional identification requirements upon voting for the first time. This information includes:

- A copy of a current and valid photo identification; or
- A copy of a current utility bill, bank statement, government check, paycheck, or government document that shows the name and address of the voter.

Persons who fall into one of the following categories are exempted from the additional identification requirements:

- A registrant authorized to receive an absentee ballot under the Uniform and Overseas Citizens Absentee Voting Act (UOCAVA); or
- A registrant authorized to vote otherwise than in person by Section 3(b)(2)(B)(ii) of the Voting Accessibility for the Elderly and Handicapped Act (VAEHA); or
- A registrant entitled to vote other than in-person under any other Federal law.

If this identifying information is not provided or the registrant does not fall into one of the categories of authorized persons under UOCAVA, VAEHA, or any other Federal law, the new registrant must provide the following information upon voting for the first time in-person or by mail:

- Current and valid photo identification; or
- A copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter.

If this information is not provided, the voter will be allowed to cast a provisional ballot.

Louisiana's HAVA Compliance

The Louisiana Legislature in Act 1220 made changes that require all registrants to provide either a valid and current photo identification, driver's license number, social security number, or copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the registrant as a part of the registration process. This seeks to assure that Louisiana will have the information necessary to apply Section 303(b)(3) and be exempted from Sections 303(b)(1) and 303(b)(2). See Appendix "3".

Louisiana has revised its mail-in registration form to comply with HAVA. It has obtained initial preclearance from the U. S. Department of Justice, Voting Rights Division. A copy of that form has been attached as Appendix "5". However, additional changes are required and the changed form will be resubmitted to the Department of Justice for further review.

Managing Disbursement of HAVA funds

SECTION 2. How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of – (A) the criteria to be used to determine the eligibility of such units or entities for receiving the payment; and (B) the methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8). (Section 254(a)(2))

The State of Louisiana funds the conduct of federal elections, including the costs of ballot preparation, election packets, election materials for use at the polls and for absentee voting, personnel charges for time spent on election functions outside the regular office hours of the Clerks of Court, conducting schools for commissioners, per diems for the members of the Parish Board of Election Supervisors, pay for the commissioners and commissioners-in-charge, and fees for drayage contractors to haul voting machines. As a result, there will be no distribution of requirements payments to units of local government or other entities.

Educational Programs

Section 3. How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III. (Section 254(a)(3))

Section 3.1 Election Official Education and Training

The Clerk of Court for each parish is the Chief Election Officer of the parish and is responsible for qualifying local and municipal candidates, conducting general courses of instruction for commissioners, serving as a member of the Parish Board of Election Supervisors, and choosing deputy custodians, key custodians and janitors.

The Registrar of Voters for each parish is responsible for conducting voter registration, maintaining accurate voter registration records, conducting the annual canvas of registered voters, making changes to voter registration rolls relative to reapportionment and changes in district lines, conducting absentee voting, and serving as a member of the Parish Board of Election Supervisors.

The Parish Board of Election Supervisors consists of the Clerk of Court, Registrar of Voters, one representative of each of the two recognized political parties and a representative appointed by the Governor. This body is responsible for certifying the official results of any election in their jurisdiction.

The Secretary of State will keep the Clerks of Court and Registrars of Voters updated on changes in the law, including changes required by HAVA. In addition, the informational pamphlet required by La. R.S. 18:421 will be amended to provide instructions for provisional voting, counting and tabulation of provisional ballots, and posting of additional information required by HAVA.

Section 3.2 Poll Worker Training

The Clerk of Court for each parish is required to conduct courses of instruction for the commissioners. La. R.S. 18:431A requires each Clerk of Court to semiannually conduct a general course of instruction for the commissioners and provide the following: a copy of the informational pamphlet provided by the Secretary of State, instructions in the use of the voting machines, instructions in conducting a primary and general election, and instructions on the commissioner's duty to offer a voter the opportunity to sign an affidavit and vote if the voter does not have a picture identification.

La. R.S. 18:431B authorizes the Clerk of Court to conduct a course of instruction for commissioners-in-charge, commissioners, and alternate commissioners who are selected to serve in each election. The course primarily covers the procedures to be used in the election for which the officials were selected. Poll worker training will include information about persons with disabilities and the best way to assist them with participating in the voting process.

The Secretary of State, in addition to amending the informational pamphlet to address the requirements of HAVA, will prepare and supply the following new informational posters for use at the courses of instruction: information regarding the date of the election and the hours during which polling places will be open; instructions for mail-in registrants and first time voters under Section 303(b) of HAVA; general information on voting rights under applicable federal and state law, including information on the right of an individual to cast a provisional ballot and instructions on how to contact the appropriate officials if these rights are alleged to have been violated; and general information on federal and

state laws regarding prohibitions on acts of fraud and misrepresentation. The Secretary of State will make the information described in these publications accessible to individuals with disabilities and will work with the disability community on how to more efficiently and effectively provide this information.

Section 3.3 Voter Education

Voter education is of vital importance to the election process. Voter education includes educating voters as to what is contained on the ballot, use of the voting systems, polling place locations, election dates, dates of absentee voting, casting an absentee ballot, and registering to vote. The goal of voter education is to provide educational programs and information to all voters to facilitate a firm understanding of the election process and applicable laws that govern the conduct of elections in Louisiana. To that end, the Secretary of State will make it a priority to coordinate with governmental agencies and non-governmental organizations to ensure that all strata of the Louisiana population are reached through voter education programs.

Act 286 of the 2003 Regular Session of the Louisiana Legislature requires the Secretary of State, as of January 12, 2004, in administering the laws relating to the custody of voting machines and voter registration to do the following:

- Prescribe uniform rules, regulations, forms, and instructions as to standards for effective nonpartisan voter education. Standards shall address but shall not be limited to voter education concerning voter registration, balloting procedures, distribution of sample ballots, and effective voter education methods.
- Review current voter education programs within Louisiana.
- Prepare an annual report on the effectiveness of voter education programs.
- Develop activities, events, informational posters and pamphlets, and public service announcements for the implementation of an annual voter registration week, and generally be responsible for implementation of such voter registration week.

The Secretary of State will implement a more comprehensive voter education program that meets the requirements of Act 286, and the following additional activities may be included in the program:

- Expansion of website information and toll-free telephone access to provide additional information to citizens on how to participate fully in the election process.
- Coordination with parish election officials to establish community-based programs for voter outreach and education programs.
- Continuation of student mock elections.
- Continuation of school-aged and college voter outreach and registration programs.

- Preparation of public service announcements for voter education and registration information.
- Conduct of seminars throughout Louisiana for voter education and registration.
- Coordinate with NVRA officials and other civic groups to assist with voter registration drives.
- Coordinate with other state officials to provide voter education on the use and operation of new voting equipment.

See Act 286 attached as Appendix "6".

Voting System Standards

SECTION 4. How the State will adopt voting system guidelines and processes which are consistent with the requirements of Section 301. (Section 254(a)(4))

The State of Louisiana has both statutory provisions and administrative rules relative to the types and forms of voting systems that can be certified for use in the state. Currently, the Commissioner of Elections is required by statute to adopt voting system standards that meet with her requirements for durability, accuracy, efficiency and capacity. All voting systems must be certified by the Commissioner or a committee of experts appointed by her prior to use in state elections. La. R.S. 18:1361. State law requires that all voting systems comply with applicable standards and regulations adopted by the FEC and tested through independent testing authorities appointed by NASED. La. R.S. 18:1361(A). A copy of the existing standards has been attached as Appendix "2".

Modifications will be required to these standards to assure that all machines in use meet the error rate standards established by Section 3.2.1 of the 2002 FEC standards for electronic voting machines. In addition, there are a number of other changes that will be adopted in the next several months to assure that the ever-changing and improving technology is reflected as a part of the certification and testing process in Louisiana.

HAVA Fund

SECTION 5. How the State will establish a fund described in subsection (b) for the purposes of administering the State's activities under this part, including information on fund management. (Section 254(a)(5))

Act 142 of the 2003 Regular Session of the Louisiana Legislature establishes the Help Louisiana Vote Fund as a special fund in the state treasury for the deposit of all funds received pursuant to HAVA. See Act 142 attached as Appendix "7". Act 142 provides that federal monies shall be deposited into the fund and allocated by the State Treasurer to one of the following five accounts: Election Administration Account; Voting Systems Account; HAVA Requirements Account; Voting Access Account; and College Program Account. The Help Louisiana Vote Fund is a separate fund from the state general fund and all interest earned on the investment of the monies in the fund shall be credited to the fund.

The Secretary of State will provide written instructions to the State Treasurer as to the appropriate account into which the HAVA funds shall be deposited. Appropriations will be made by the Louisiana Legislature from the fund, and the Secretary of State will direct the expenditure of the monies from the fund in compliance with HAVA.

State Budget

SECTION 6. The State's proposed budget for activities under this part, based on the State's best estimates of the costs for such activities and the amount of funds to be made available, including specific information on – A) the costs of the activities required to be carried out to meet the requirements of Title III; B) the portion of the requirements payment which will be used to carry out activities to meet such requirements; and C) the portion of the requirements payment which will be used to carry out other activities. (Section 254 (a)(6))

Louisiana received $4,911,421 of Section 101 funds for the purpose of improving the administration of elections for Federal office, and $7,351,684 of Section 102 funds as reimbursement for the purchase of punch card or lever voting systems and for the replacement of punch card or lever voting systems.

It is estimated that Louisiana will be eligible to receive a maximum of $37,234,037 of Title II funds for requirements payments during federal fiscal years 2003-2005. HAVA authorized appropriations of $1,400,000,000 for federal fiscal year 2002-2003, $1,000,000,000 for federal fiscal year 2003-2004, and $600,000,000 for federal fiscal year 2004-2005. However, federal fiscal year 2002-2003 was not fully funded, as $830,000,000 was appropriated for Title II. The estimate of the maximum Title II payment for Louisiana of $37,234,037 is based on the current appropriation and the assumption that federal fiscal years 2003-2004 and 2004-2005 will be fully funded. In addition, the maximum payments to Louisiana of Title II funds are subject to pro rata reductions to ensure that all states and territories receive the minimum payments required by Title II of HAVA.

The Title II funds require a state match of 5% and the State of Louisiana has appropriated $654,360 in the appropriations bill for Louisiana's fiscal year 2003-2004. The Secretary of State will make budget requests for the 5% state match in the appropriations bills for fiscal years 2004 and 2005.

The proposed budget for HAVA funds is based on the following priorities: federal funding will be used first to address the mandates placed on the State of Louisiana by HAVA, specifically voting systems, accessibility for individuals with disabilities, computerized statewide voter registration list, computerized list maintenance, and verification of registration information; and second for discretionary improvements to the election process.

The following budget is based on an estimate of costs for implementation of the requirements of HAVA. The estimated budget percentages assume that the amounts set forth in HAVA will be fully funded and that Louisiana's share will be the maximum amount that Louisiana is eligible to receive under the provisions of HAVA. The budget percentages are subject to modification based on the uncertainty in funding and the amount that Louisiana will receive due to pro rata reductions. The proposed budget percentages will be adjusted accordingly upon receipt of actual federal funds.

Preliminary Estimated Budget: (percentage of funds received)

Budget Item	Percentage of Federal Funds
Replacement of non-compliant lever voting systems and upgrade of existing electronic voting systems to meet disability access requirements	91.8
Statewide voter registration database, including software and hardware, and upgrade/replacement of software and hardware for Clerks of Court, Registrars of Voters and Secretary of State to provide access to ERIN and improve ballot preparation and voting system programming	4.0
Voter education, election official education and training, and poll worker training for meeting the requirements of Title III of HAVA	2.7
Update voting system standards	0.1
Development of state plan(s), production of reports, monitoring of performance goals, fiscal management and management of the state plan	1.3
Telecommunications	0.1
Voting information requirements	0 – State funds[2]
Provisional voting	0 – State funds
State-based administrative complaint procedure	0 – State funds
Requirements for first time voters who register by mail	0 – State funds

Louisiana's Maintenance of Effort

SECTION 7. How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000. (Section 254(a)(7))

[2] "State funds" denotes that money for this program or project will be provided out of funding allocated to the Department of State and/or Department of Elections and Registration as a part of their annual state funded budgets.

Louisiana has a state-driven election system and Louisiana will maintain the expenditures of the state for activities funded by the payment at a level equal to or greater than the level of such expenditures in Louisiana for fiscal year 2000.

Performance Goals and Measures

SECTION 8. How the state will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met. (Section 254(a)(8))

Section 8.1 Replacement of lever voting systems

1) Deadline: First federal election on and after January 1, 2006.[3]

2) Criteria: Replacement of lever voting systems that comply with Title III of HAVA in the fifty-two parishes that used lever voting machines in the 2000 federal election.

3) How Criteria is Judged: Success of meeting the performance goal will be based on the number of the lever voting systems still in use in Louisiana after the 2006 deadline.

4) Responsible Official: Secretary of State.

Section 8.2 Voting accessibility for individuals with disabilities

1) Deadline: First federal election on and after January 1, 2006.

2) Criteria: Providing at least one direct recording electronic voting system for individuals with disabilities in each precinct in Louisiana.

3) How Criteria is Judged: Success of meeting the performance goal will be based on the placement of at least one direct recording electronic voting system for individuals with disabilities in each precinct in Louisiana.

[3] Louisiana will request a waiver of the January 2, 2004 deadline.

4) Responsible Official: Secretary of State in cooperation with the Clerks of Court and Registrars of Voters.

Section 8.3 Statewide voter registration system

1) Deadline: January 1, 2006.[4]

2) Criteria: Implementation "in a uniform and nondiscriminatory manner, a single, uniform, official, centralized, interactive, computerized statewide voter registration list that is defined, maintained, and administered at the State level that contains the name and registration information of every legally registered voter in the State and assigns a unique identifier to each legally registered voter in the State".

3) How Criteria is Judged: Success of meeting this performance goal will be based on implementation of minor changes to ERIN to meet the requirements of HAVA.

4) Responsible Official: Secretary of State in conjunction with the Registrars of Voters.

Section 8.4 Provisional voting

1) Deadline: January 1, 2004.

2) Criteria: Implementation of provisional voting for federal elections and establishment of a free access system so that provisional voters can determine if their provisional ballots were counted.

3) How Criteria is Judged: Success of meeting this performance goal will be based on the implementation of provisional voting in each parish at the polling places on election day and during absentee voting in person and establishment of the free access system required for provisional voters.

4) Responsible Official: Secretary of State in conjunction with the Clerks of Court and Registrars of Voters.

Section 8.5 Posting of voting information

1) Deadline: January 1, 2004.

2) Criteria: Posting of the required information at each polling place required by Section 302(b) of HAVA.

[4] Louisiana is not anticipating need for waiver, but will request a waiver if needed.

3) How Criteria is Judged: Success of meeting this performance goal will be based on the preparation of the required information and the posting of the information at each polling place and each Registrar of Voter's office.

4) Responsible Official: Secretary of State in conjunction with the Clerks of Court and Registrars of Voters.

Section 8.6 Voter education on how to correctly cast a ballot for a paper ballot voting system

1) Deadline: January 1, 2006.[5]

2) Criteria: Establishment of a voter education program for a paper ballot voting system that notifies the voter of the effect of casting multiple votes for an office and how to correct the ballot before it is cast and counted.

3) How Criteria is Judged: Success of meeting this performance goal is based on the establishment and implementation of the voter education program for the paper ballot voting system used in Louisiana.

4) Responsible Official: Secretary of State in conjunction with the Clerks of Court and Registrars of Voters.

Administrative Complaint Procedure

SECTION 9. A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under Section 402.

Act 423 of the 2003 Regular Session of the Louisiana Legislature establishes a uniform, nondiscriminatory procedure for the resolution of a complaint alleging a violation of any provision of Title III of HAVA for an election for federal office.

See Appendix "4".

[5] Louisiana is not anticipating need for a waiver, but will request waiver if needed.

Elements of the Louisiana's Administrative Complaint Procedure include:

- The complaint must be in writing, signed by the complainant, executed before a notary public, and sworn under oath.
- The complaint shall be filed with the Secretary of State within ninety days after the final certification of the federal election.
- The complainant may request that the State Board of Election Supervisors (State Board) conduct a hearing on the record.
- The complainant, any respondent, or any other interested person may appear at the hearing and testify or present tangible evidence in connection with the complaint.
- The State Board shall determine whether a violation of Title III has occurred and shall issue a written decision.
- The final decision of the State Board shall be issued within ninety days from the date the complaint was filed, and the decision shall be posted on the Secretary of State's website.
- If the State Board fails to issue a final decision within ninety days from the date the complaint was filed or within any extension to which the complainant consents, the complaint shall be referred for final resolution to the Division of Administrative Law.
- An administrative law judge shall issue a written resolution of the complaint within sixty days after the final board decision was due.
- The final decision of the State Board or the final resolution of the administrative law judge may be judicially reviewed by filing a petition in the Nineteenth Judicial District Court, Parish of East Baton Rouge, within thirty days after the mailing of the notice of the final decision.

Use of Title I Payment

SECTION 10. If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities. (Section 254(a)(10))

Louisiana received $4,911,421 in Title 1, Section 101 funds for the purpose of improving the administration of elections for Federal office.

These funds will be used for the following activities: (percentage of funds to be used)

Budget Item	Percentage of Title I Funds
Replacement of lever voting systems and upgrade of existing electronic voting systems to meet disability access requirements	75.3
Voter registration system, equipment and information technology	2.8
Toll-free telephone system	0.9
Remaining Section 101 funds to be used for purposes outlined in Section 101	21

Louisiana received $7,351,684 in Title I, Section 102 funds as reimbursement for the purchase of punch card or lever voting systems and for the replacement of punch card or lever voting systems.

These funds will be used as follows:

- $654,360 of the reimbursement funds for Louisiana's 5% state match required by Section 253(b)(5) of HAVA.
- The balance of Section 102 funds will be used for replacement of non-compliant lever voting systems and upgrade of existing voting systems for disability access.

State Plan Management

Section 11. How the state will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change – A) is developed and published in the Federal Register in accordance with Section 255 in the same manner as the State plan; B) is subject to public notice and comment in accordance with Section 256 in the same manner as the State plan; and C) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A). (Section 254(a)(11))

The Secretary of State as the "chief election officer of the state" will be responsible for the ongoing management and implementation of the plan. The State Plan is a critical component in Louisiana's effort to improve accessibility and accountability in the election process. Louisiana presently has met many of the requirements of HAVA, including but not limited to, the presence of the statewide voter registration system, and the implementation and maintenance of the State Plan will be a continuation of Louisiana's commitment to a progressive and efficient election process.

Input from the Clerks of Court and Registrars of Voters in accomplishing the requirements of HAVA is essential and the Secretary of State will coordinate with the Clerks of Court and Registrar of Voters to review the performance goals and assess compliance with the objectives of Louisiana's State Plan.

The State agrees that it may not make any material change in the administration of the State Plan unless the change:

1) Is developed and published in the Federal Register in accordance with Section 255 of HAVA in the same manner as the State Plan;

2) Is subject to public notice and comment in accordance with Section 256 of HAVA in the same manner as the State Plan; and

3) Takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register.

Help America Vote Advisory Committee

SECTION 12. A description of the committee which participated in the development of the State plan in accordance with Section 255 and the procedures followed by the committee under such Section and Section 256. (Section 254 (a)(13))

The members of the Louisiana Help America Vote Advisory Committee were the following:

Mr. Al Ater, First Assistant Secretary of State (Chairman)
P. O. Box 44276
Baton Rouge, LA 70804-4172
Representative of the Secretary of State

Mr. Michael Stephenson Bell, Director of Registration
4737 Sweetbriar Street
Baton Rouge, LA 70808
Representative of the Department of Elections and Registration

Honorable Larry Cager
Clerk of the Criminal Court, Orleans Parish
2700 Tulane Ave., Room 115
New Orleans, LA 70119
Chief Local Election Official in the largest state jurisdiction

Honorable Carolyn Caldwell
Clerk of Court, Madison Parish
P.O. Box 1710
Tallulah, LA 71284-1710
Representative of Clerk of Court Association

Honorable Jon A. Gegenheimer
Clerk of Court, Jefferson Parish
P.O. Box 10
Gretna, LA 70054
Chief Local Election Official in the second largest state jurisdiction

Mr. Cedric Grant (Vice Chair)
3523 Piedmont Drive
New Orleans, LA 70122-4746
At Large Member

Honorable Charles D. Jones
State Senator
141 Desiard Street, Suite 315
Monroe, LA 71202
Representative of Senate & Governmental Affairs Committee of the Louisiana Legislature

Mr. Ernest Ladd
106 Jackson Street
Franklin, LA 70538
Representative of Louisiana NAACP

Ms. Tina Mosca
4417 Prien Terre Drive
Lake Charles, LA 70605
At Large Member

Honorable Charles Lancaster
State Representative
2201 Veterans Memorial Blvd., #200
Metairie, LA 70002
Chairman of House & Governmental Affairs Committee of the Louisiana Legislature

Honorable Kristi McCormick
Registrar of Voters, Sabine Parish
400 Capitol Street
Many, LA 71449
Representative of Registrars of Voters Association

Honorable Ed Murray
State Representative
1540 North Broad Street
New Orleans, LA 70119
Representative of House & Governmental Affairs Committee of the Louisiana Legislature

Honorable Angela M. Quienalty
Registrar of Voters, Calcasieu Parish
1000 Ryan Street, Room 7
Lake Charles, LA 70601
Representative of Registrars of Voters Association

Ms. Kimberly W. Rosenberg
1139 Bourbon Street
New Orleans, LA 70116-2709
Representative of the Governor's Office

Ms. Lois V. Simpson, Executive Director
Advocacy Center
225 Baronne Street
New Orleans, LA 70112
Representative of the disabilities community

Honorable Chris Ullo
State Senator
2150 Westbank Expressway, Suite 705
Harvey, LA 70058
Chairman Senate & Governmental Affairs Committee of the Louisiana Legislature

Honorable M. Dwayne Wall
Registrar of Voters, St. Tammany Parish
P.O. Box 1815
Covington, LA 70434
Representative of Registrars of Voters Association

The Louisiana Help America Vote Advisory Committee met five times. The dates of its meetings were as follows:

March 27, 2003 (Introduction to HAVA)
April 14, 2003 (Voter Registration System and Provisional Voting)
April 28, 2003 (Publication Requirements and Educational Programs)
May 12, 2003 (Voting Systems and Educational Programs – Continued)
June 5, 2003 (Complaint Procedure, Funding, Draft HAVA Plan)

Copies of the agendas of those meetings have been attached as Appendix "8".

The Louisiana Help America Vote Advisory Committee adopted this plan by unanimous vote on June 5, 2003. In addition, the Committee issued one resolution recommending other state-related voting considerations that will be submitted to the Secretary of State.

Public meetings were held to present the State Plan and obtain comments thereon in Alexandria and Shreveport on June 26, 2003, Monroe on June 27, 2003, Lafayette and Baton Rouge on June 30, 2003, Lake Charles on July 1, 2003 and New Orleans on July 9, 2003. A copy of the agenda for these meetings are attached as Appendix "9".

APPENDIX 1

INSTRUCTIONS FOR ABSENTEE VOTING — BY MAIL

State of Louisiana

DEADLINES FOR REGISTRAR OF VOTERS TO RECEIVE ABSENTEE BALLOTS BY MAIL:

For military personnel.....election day
For U. S. citizens residing outside the United States.....election day
For sequestered jurors.....before polls close on election day
For all others.....the day before election day

REGULAR ABSENTEE BALLOT
Instructions for voting white regular absentee ballot

1. Fill in all the information required in the certificate on the white ballot envelope flap. DO NOT SIGN CERTIFICATE AT THIS TIME.
2. Follow instructions on the ballot to vote your ballot.
3. Place ballot in white ballot envelope and seal. DO NOT DETACH FLAP.
4. **Sign the certificate on the flap in the presence of an officer authorized to administer oaths OR in the presence of two witnesses, who must also sign the certificate.**
5. Place the sealed ballot envelope in the return envelope addressed to the Registrar of Voters. Add postage, if necessary, and deposit it in the mail.
6. Your vote will be counted either by op-scan reader or manually.

SPECIAL ABSENTEE BALLOT (Green)
Instructions for voting green special absentee ballot for general election

(This ballot is provided for use by military personnel or U. S. Citizens residing overseas ONLY. This is the only ballot you will receive for the general election.)

1. Fill in all the information required in the certificate on the green ballot envelope flap. DO NOT SIGN CERTIFICATE AT THIS TIME.
2. Vote your ballot as follows:

   In order to be certain that you will cast a vote that will be counted for a candidate who advances to the general election (runoff election) for a particular office, you must indicate your order of preference for each candidate by placing number one (1) in the box next to the name of the candidate who is your first choice, the number two (2) next to the name of the candidate who is your second choice, and so on until you have placed a number next to the name of each candidate. By numbering the candidates according to your order of preference, if your first choice candidate is eliminated in the primary and your second choice candidate advances to the general election, your second choice candidate will receive your vote and so on until your order of preference is exhausted.

   You may, but are not required to, number all of the candidates for an office on the ballot. However, if you choose to number only one candidate, for instance, and if that candidate does not advance to the general election, you will NOT have cast a vote for a candidate for that office in the general election.
3. Place ballot in green ballot envelope marked "SPECIAL ABSENTEE BALLOT - GENERAL ELECTION" and seal. DO NOT DETACH FLAP.

   PROPOSED CONSTITUTIONAL AMENDMENT BALLOT: If you have been provided with a ballot containing a proposed constitutional amendment, you must be careful to return it in the proper envelope for tabulation. This ballot will reflect either the primary election date or the general election date. If it reflects the same date as the green special absentee ballot for the general election, place it in the green envelope. If it reflects the same date as the white regular absentee ballot for the primary election, place it in the white envelope.
4. **Sign the certificate in the presence of an officer authorized to administer oaths OR in the presence of two witnesses, who must also sign the certificate.**
5. Place the sealed ballot envelope in the return envelope addressed to the Registrar of Voters. Add postage, if necessary, and deposit it in the mail.
6. Your vote will be counted either by op-scan reader or manually.

ASSISTANCE TO VOTERS

A voter is entitled to receive assistance in voting if he is (1) unable to read, or (2) unable to vote without assistance because of a physical handicap, including blindness. Persons prohibited from assisting voters:

1. No candidate can assist a voter.
2. No employer or employer's agent can assist an employee.
3. No union agent can assist a union member.

Except as provided above, voters entitled to assistance in voting may receive the assistance of any person of his choice.

The person assisting the voter shall explain to the voter that a signature or mark made by the voter constitutes certification that all statements in the certificate are true and correct and that any person who knowingly provides false or incorrect statements is subject to a fine or imprisonment, or both. *(L.R.S. 18:1310 and 16:1461)*

V-AB-M (Rev. 1/03)

Prepared and Furnished by Secretary of State
Approved by Attorney General and Comm. of Elections

DEPARTMENT OF ELECTIONS AND REGISTRATION
VOTING SYSTEM CERTIFICATION STANDARDS

Pursuant to La. R.S. 18:1351, any voting system proposed or bid for use in the State of Louisiana must meet or exceed the following standards. These standards include statutory standards found in La. R.S. 18:1355. These standards further include requirements established by the Commissioner of Elections pursuant to her authority under La. R.S. 18:1353.

The voting system must:

GENERAL REQUIREMENTS:

- Allow person to vote for or against, yes or no to, each question that is submitted;
- Permit the voter to vote for as many persons for an office as he is lawfully entitled to vote, but no more. However, where the voter may vote for more than one person for an office, it shall count each vote cast, even though the voter has voted for fewer that the total number of votes he is entitled to cast for a particular election;
- Permit the voter to vote for or against any question or race for which he has a right to vote, but no other;
- When used in a primary election at which members of a political party committee are to be voted on, it shall be so equipped that the election officials can lock out all candidate counters except those of the party with which the voter is affiliated;
- Correctly register and record and accurately count all votes cast for each candidate and for or against each question;
- Meet or exceed standards established by NASED and tested through Independent Testing Authorities;
- Have at least 250 voting positions with ability to expand to at least 500 positions;
- Have an internal real time clock that works in conjunction with all printouts and voting machine diagnostics performed for maintenance or operation purposes;
- Maintain all vote totals, public counter totals, audit trail records, protective counter totals and the internal clock time in both the main memory and the removable programmable memory devices in the event the main power and battery backup power fail;
- Be able to withstand a maximum temperature of 130 degrees Fahrenheit, while in storage, and 105 degrees Fahrenheit while in operation, and a minimum temperature of – 15 degrees Fahrenheit, while in storage, and 40 degrees Fahrenheit, while in operation, without any permanent damage, degraded reliability or performance deterioration;

- Be able to survive exposure to uncontrolled temperature and non-condensing humidity environments, while in storage, and shall operate without damage to the component parts when operated at non-condensing relative humidity of up to 98%;

- Be designed so that no failure, short of destruction of the voting machine and programmable memory device, can result in the loss of vote counts or inaccurate vote counts;

- Provide printed records regarding the opening and closing of the polls, including:

    - Identification of election;
    - Identification of each unit;
    - Identification of ballot format;
    - Identification of candidate and/or issue, verifying zero start;
    - Identification of all ballot fields and all special voting options;
    - Summary report of votes cast for each device, or ability to extract same;

- Prevent printing of summary reports before the sequence of events required for closing of the polls are completed;

- Opening the polls reports should have all system audit information required;

- No data should be lost during generation of reports;

- Integrity and security of data maintained according to time frame for federal, state and local elections;

- Prevent unauthorized functions in an improper sequence;

- Include security provisions compatible with administrative set up and operational use;

- Allow for extraction of data from memory devices via land lines;

- Prevent loss of results, images and inaccurate vote count;

- Provide security procedures system-wide, from turn on to turn off;

- Prevent tampering or destruction of information through the introduction of a magnetic device;

- Provide for safeguards against tampering, theft or damage;

- Ensure that test data has been purged from the system;

SECURITY:

- Provide secrecy in the act of voting such that the selection of a voter cannot be determined after that vote has been cast;

- Prevent the voter from voting more than once on the same candidate race or on the same question;

- Permit all unused vote indicators or devices to be locked out against use;

- Provide a protective counter or tabulator;

- Provide a public counter or tabulator that at all times during the election shall show the number of persons who have voted;

- Contain one or more automatic locks that upon exposure of the vote count at any time after the polls are opened on election day will automatically lock the machine against further operation;

- Provide a screen, hood, or curtain that is so made and can be so adjusted as to conceal the voter while voting;

- Be incapable of being reset, altered, or used except by operating the machine;

- Provide for protective counter that advances each time the system reset is performed;

PROGRAMMING:

Contain for election for president and vice president, those devices needed in order to comply with R.S. 18:1259 (A copy of R.S. 18:1259 is attached as Appendix "1");

- Provide screen size, display and programming that shall be capable of producing a ballot of font sizes no less than 14 to 18 points in the following denominations:

    - **Heading for races and propositions (18 points)**
    - **Names of candidates (16 points)**
    - **All other text, including text of propositions (14 points);**

- Accommodate up to twelve (12) different parties or districts or combination of both within a precinct;

- Print an alphanumeric printout of the contest, candidates, position numbers, and vote totals when the polls are open to assure that all vote totals are at zero (0). At the close of polls, the voting machine must be able to print out in the same format the results of the election. These printouts should contain the voting machine serial number, the public

counter total and the protective counter number. The poll worker must be able to request as many copies as necessary according to state law;

- Have the option of consolidating the vote totals for each candidate and question for an entire precinct onto one programmable memory device and the results of the precinct printed out at the precinct. This consolidating programmable memory device must be able to be brought into a central computer system and the results for that precinct read off of the programmable memory device so that a jurisdictional vote total report can be obtained;

- Have a mandatory pre-election testing of the ballot control logic and accuracy. The voting system also must have a post-election ballot control logic and accuracy test available after the election. These logic and accuracy test results must be stored into memory of the main processor and into the same programmable memory device that is used on election day for future reference. This should be stored by vote total summaries and by each individual ballot image randomly. The voting system must printout prior to these tests and a results printout after the test;

- Provide redundant storage of both the vote totals and the randomized individual ballot images. There must be polling of these multiple locations of totals and ballot images between voters to detect any errors or discrepancies. In the event of a data discrepancy, an appropriate error message must be displayed in order to either correct the data error or prohibit voting from continuing;

- Have a programmable memory device that plugs into the voting machine. This programmable memory device must contain the ballot control information, store the summary vote totals, maintenance log, operator log and the randomized ballot images which is each individual voter's choices. This programmable memory device must have the ability to be sealed in the voting machine prior to the election so that it is assured of not being tampered with without detection. This programmable memory device must be able to be removed after the polls are closed so that it may be brought to a central site where the vote totals can be read into a computer to obtain the jurisdiction totals;

- Be programmed with the ballot control information from the voting machine itself so that the results printout contains the candidate name next to the vote totals for the candidate;

- Be able to be programmed with the ballot control information by a separate computer which loads the information for that particular election into the programmable memory device. This same computer must be able to read the programmable memory device after the election to obtain the voting results and be able to accumulate the vote totals for the entire voting jurisdiction by precinct;

- Have a mandatory testing system to verify that the voting machine is in an operable condition within a reasonable period of time prior to an election. This testing must appear in the operator log of the system to verify that the tests were performed;

- Be able to test all major subsystems and assemblies in the software of the system;

- Have a mandatory verification of the ballot by the technician when setting up the voting machine for an election. This verification must check the ballot control information to see that the information on the ballot face is correct;

- Have an automatic means of voting the voting machine (voter simulation) in the warehouse to test the voting machine while the voting machine is only in the pre-election or post-election state;

- Maintain an operator log that begins with the resetting of the voting machine and continue throughout the complete election process. Next to each event should be printed the time and date;

- Allow voters from any voting precinct to vote at any location within the Parish;

- Allow units used during early voting to be de-programmed and re-programmed for use on election day, if necessary;

- Provide a means of electronically integrating absentee voting by mail results with voting system;

POWER SUPPLY:

- Have a self-contained, internal battery backup that is rechargeable by the main power supply when the voting machine is plugged into AC power. This battery must be commercially available. The battery supply must be capable of operating the voting machine without AC power for four (4) to twelve (12) hours;

- Have a main power system and battery charger that operate from a standard 115-volt, 60hz, single phase, alternating electrical current;

- Have a backup battery that powers all necessary components of the voting machine;

- Have backup battery power that in the event of a power outage in the precinct will be engaged with no disruption of operation or loss of data;

- Have a visible indicator that shows if the voting machine is receiving AC power. The voting machine must be able to test the battery and show the battery charge level. The voting machine must automatically shut itself down in the event the backup battery has only enough power to print out the results and go to an inactive state so to conserve enough power to close the polls at the end of the day;

- Remain operable in the event of abnormal line voltage conditions of power surges up to 132.25 volts rms over periods of up to two (2) seconds with a maximum of two (2) such surges per 60 second period;

SPECIAL FEATURES:

- ✓ Contain a gong or other sound creating device which will audibly indicate that a voter has left the machine after casting his vote;
- ✓ Provide visual and audible signals to the poll workers that the voting machine is in a voter active position and that the voter has cast their vote. The audible sound should be able to be heard from 20 feet. The visual display shall be well illuminated and easily readable;
- ✓ Have an adjustable volume control such that the bell, gong or noise making device signaling the casting of a vote is audible to the voter;
- ✓ Have all circuit boards conformal coated or provided with some other treatment which purpose is to significant improve the reliability of circuit boards over a large period of time when used in an ambient air environment that is normal in the State of Louisiana (i.e. salt, dust, high humidity, rapid temperature changes);
- ✓ Must have components made of non-corrosive material or painted metal where required for strength;

EASE OF USE:

- ❖ Display clearly to the voter the mechanism by which his vote is cast;
- ❖ Have maximum weight to be handled by the poll worker while moving the voting machine or setting up the voting machine of not more than twenty-five (25) pounds;
- ❖ Have a display in full view of the voter that confirms the voter's choice;
- ❖ Be able to change his selections of candidates and questions on the ballot prior to casting his ballot. When deselecting the voting machines must verify to the voter on a display in full view of the voter that the de-selection was made;
- ❖ Allow poll workers to display the public and protective counters during an election;
- ❖ Be able to display such that poll workers can see any error messages associated with machine malfunction;
- ❖ Accommodate physically handicapped voters, particularly voters confined to wheel chairs, with little or no intervention by the poll worker;
- ❖ Permit voters to cast ballots as quickly as possible without any loss of degree of accuracy;

- ❖ Provide on-screen instructions to provide for voter awareness of the voting machine operation;
- ❖ Provide for an accurate and immediate transfer of data, if requested, to permit the dissemination of election results to the media and candidates in an expeditious manner;
- ❖ Present a ballot that is easy to read, follow legal requirements, be appealing to the voter's eye and include easy to follow instructions for use;
- ❖ Prompt voter when he is not using the device correctly;
- ❖ Make voter aware by clear means of ballot choice (i.e. a clear visual indicator that the voter has selected a particular candidate or proposition choice);
- ❖ Allow voter to review all ballot choices before casting the ballot;
- ❖ Provide sealed cases for transport to minimize damage to internal workings of the voting unit;
- ❖ Able to withstand frequent loading and unloading, stacking, assembling, disassembling, reassembling, and heavy use;
- ❖ Be stackable;
- ❖ Allow poll workers and Registrars' employees easy access to all activity taking place in the voting units, being able to monitor the movement of voters into and out of the voting booth;
- ❖ Have programmable memory device that is easy for poll workers and Registrars' employees to operate after the closing of the polls;
- ❖ Be "tamper-proof" while in a storage configuration either in the storage facility or the polling precinct;

REPORTING REQUIREMENTS

- ❑ Provide a cumulative, canvass and precinct report of absentee voting by mail, absentee voting by personal appearance and election day as one total;
- ❑ Provide a cumulative, canvass and precinct report of absentee voting by mail and early voting by personal appearance as one total;
- ❑ Provide a cumulative, canvass and precinct report of election day as one total;

- Provide for unofficial and official reports in any variety including absentee voting, election day and total vote;

- Provide the ability to custom design an election report to include the following information in total or in part;

  - Name of election;
  - Political subdivisions involved – separate reports should be available for each subdivision in the format enumerated above;
  - Date of election;
  - Type of report;
  - Total number of registered voters in each political subdivision and total number of registered voters in each variable race;
  - Total number of registered voters in each voting precinct, including a sub-listing when the precinct is split;
  - Formatting of election results by capturing election data embedded in the database and producing specialized reports, i.e. a report of Presidential vote by legislative district or commissioner precinct;

- Provide, for election night reporting, a listing of precincts reporting and a listing of precincts not reporting;

- Provide for the operator of the reporting system to change the appearance of the report by reformatting the data;

- Provide for the removal of an already counted precinct and a re-counting of that same precinct in the event of errors in transmission;

- Provide individualized sample ballot information for storage on the Parish Clerk of Court's website and for reproduction and distribution;

- Provide for the automatic transmission of election results through electronic data, while adhering to the transmission rules set out in the Louisiana Election Code;

- Provide for the storage of election results in any version of software required, including, but not limited to, Access, Excel, Adobe, and ASCII;

- Provide for election results to be produced in such a manner as to allow for easy copying for paper distribution upon request; and

- Provide for the combining of election day, absentee in person, and mail-in absentee vote totals into the new counting system to achieve total votes.

I hereby adopt the above requirements as the voting machine certification standards for the State of Louisiana and Department of Elections and Registration, pursuant to La. R.S. 18:1351 and 1353. This 18th day of August, 2001.

S/ Suzanne Haik Terrell
SUZANNE HAIK TERRELL
COMMISSIONER OF ELECTIONS

APPENDIX 3

Regular Session, 2003

HOUSE BILL NO. 1211

BY REPRESENTATIVES BRUNEAU, DOWNER, AND MURRAY

AN ACT

To amend and reenact R.S. 18:31(B)(as enacted by Acts 2001, No. 451) and (C), 103(A), 104(A)(15) and (16), 110(B)(1), 111(B), 154(C), 401.1(C) and (D)(1), 423(H), 425(A)(1)(b) and (2), 435(A)(1), 463(A)(2), 552(B), 553(B)(4), 563, 564(C), 574(A)(2), 576(B) and (C), 1259(B)(1) and (4), 1284(F)(1), 1286(A), 1299.1(A), 1300.2(C)(2), 1300.3(B), 1306(A)(3), 1307(C), 1354(C), and 1400.3(D)(1), to enact R.S. 18:18.1, 110(B)(3), 401.1(G), 401.2, 425(B)(4), 552(C), and 1309(E)(4) and (5), and to repeal R.S. 18:425(A)(3) and R.S. 36:742.1, relative to the Election Code; to make technical changes to the Election Code; to prohibit the commissioner of elections and certain unclassified civil service employees from engaging in political activities; to provide relative to the name a woman may use to register to vote; to provide relative to charges for preparation of lists of voter registration information; to provide relative to form and signature requirements on applications to register to vote; to provide for procedures in circumstances of election emergency; to provide for transmission of certain voter registration data where necessary for verification purposes; to provide relative to a designee

attending a board of election supervisors meeting; to provide for filing a list of watchers to be present at the precinct; to provide relative to the certification of a candidate in the notice of candidacy; to provide for the secretary of state to issue information as necessary under the Help America Vote Act; to provide for the definition of casting a vote; to provide for procedures for assisted voting; to provide relative to the transmission of election results to the secretary of state by the clerks of court; to provide relative to the format of ballots and statements of propositions and the manner of marking on a ballot; to provide relative to recall petitions and written requests to delete or add from such petitions; to provide relative to mail applications to vote absentee by mail; to provide for procedures for when a voter fails to activate the cast ballot mechanism; to prohibit a parish custodian from appointing a candidate or his family member from serving at certain polling places; to provide relative to compensation of certain employees of registrars of voters; to allow students age seventeen who are seniors in high school to serve as commissioners on election day; and to provide for related matters.

Be it enacted by the Legislature of Louisiana:

Section 1. R.S. 18:103(A), 110(B)(1), 111(B), 401.1(C) and (D)(1), 423(H), 425(A)(1)(b) and (2), 435(A)(1), 463(A)(2), 574(A)(2), 576(B) and (C), 1259(B)(1) and (4), 1284(F)(1), 1286(A), 1299.1(A), 1300.2(C)(2), 1300.3(B), 1354(C), and 1400.3(D)(1) are hereby amended and reenacted and R.S. 18:18.1, 110(B)(3), 401.1(G), and 401.2 are hereby enacted to read as follows:

§18.1. Political activities prohibited

A. Neither the commissioner of elections nor any employee of the elections division or of the Department of Elections and Registration within the Department of State who is in the unclassified state service shall participate or engage in political activity, including his own or any other candidacy for election to public office; membership on any national, state, or local committee of a political party or faction; making or soliciting contributions for any political party, faction, or candidate; taking active part in the management of the affairs of a political party, faction, candidate, or any political campaign, except to exercise his right as a citizen to express his opinion privately and to cast his vote as he desires.

B. As used in this Section, the term "political activity" shall have the meaning ascribed to it in Article X, Section 9(C) of the Constitution of Louisiana.

* * *

§103. Personal appearance of applicant required; exceptions

A. Except as otherwise specifically provided by law, any person who meets the qualifications for voter registration and desires to register as an elector shall apply to do so by making application in person to a registrar or deputy registrar of the parish in which he seeks to register, by submission of the federal postcard application form as authorized in this Code, by application through the Department of Public Safety and Corrections, by application through designated voter registration agencies, or by mail using the national voter registration form as promulgated by the Federal Election Commission, the state mail voter registration form, or a computer-generated form thereof containing the same requests for

information as prescribed by R.S. 18:104 or as contained on the Federal Election Commission voter registration form.

* * *

§110. Removal from precinct; removal from parish

* * *

B.(1) A change of registration based upon a change of residence within a parish received after the closing of registration for a primary election shall become effective the day after the general election or special general election when a special primary election is held in conjunction with a general election except as follows:

(a) A person whose registration has been canceled pursuant to R.S. 18:193(G),

(b) A person whose registration has been canceled or whose address has been corrected pursuant to R.S. 18:196(C).

* * *

(3) However, in a primary election where the only candidate's election appearing on any ballot in the parish is a special primary election, then in such instance, the change shall become effective prior to the special primary election. In a special general election, where the ballot is the same throughout the parish, the change shall become effective prior to the special general election.

* * *

§111. Change of name

* * *

B. A ~~female~~ married woman, at her option, may be registered in her maiden name, ~~or~~ her present husband's name, or in a hyphenated combination thereof. ~~or if~~ If divorced, ~~or~~ widowed, or remarried, she may be registered in her maiden name, ~~or~~ in the surname of her ~~last~~ deceased or former or present husband, or in a hyphenated combination thereof. ~~However, a woman registered in her last husband's name may not remain a legal registrant in his name or in a hyphenated combination of her maiden surname and his surname if she remarries. In such case, in order to remain a legal registrant she shall apply for a change of name.~~ A change of name allowed ~~or required~~ by this Subsection shall be made by producing in the presence of ~~or, if required, filing with~~ the registrar or other person authorized to accept voter registration applications her affidavit ~~setting forth the pertinent facts concerning the change of name and~~ stating the name under which she desires to be registered as allowed by this Section.

* * *

§401.1. Election emergency; purpose; elections emergency contingency plan

* * *

C. If any delays or suspensions are authorized by the governor, the delayed qualifying, absentee voting in person or election day voting shall resume or be rescheduled as soon thereafter as is practicable. In the event the voting on election day is delayed or suspended and absentee voting in person has been completed prior to the issuance of the executive order delaying or suspending election day

voting, absentee voting in person for the rescheduled election day may be reopened upon authorization of the governor for a reasonable time prior to the new election date. Notice of the delay or suspension and rescheduling of the election day or absentee voting shall be published at least once in a newspaper of general circulation in the affected area if time permits and, where practicable, broadcast as a public service announcement on radio and television stations, or by any other means of communication available at that time.

D.(1) As soon as possible following an emergency, the clerk of court shall identify the number of polling places that are functional and the number of polling places that have been destroyed. If a polling place is destroyed, inaccessible, or unsafe, efforts should be made to work with federal, state, and local emergency management agencies to permit the orderly establishment of a new polling place. An alternate emergency location shall be designated by the parish clerk of court in conjunction with the local parish governing authority, represented by its presiding officer, and advertised by any means available.

* * *

G. Nothing in this Section shall be interpreted as extending or as an extension of the time period for an election.

§401.2. Relocation of polling places; state of emergency

A. Notwithstanding the provisions of R.S. 18:534, 535, 536, and 537, if any polling place is determined by the clerk of court in conjunction with the secretary of state and commissioner of elections to be destroyed, inaccessible, or

unsafe due to an emergency or common disaster occurring before or during a regularly scheduled or special election, the secretary of state in conjunction with the commissioner of elections may issue a certification of a state of emergency allowing the relocation of any such polling place when such action would allow voting to continue without the necessity of the issuance of an executive order by the governor for a suspension or delay pursuant to R.S. 18:401.1(B). Upon issuance of such a certification, the clerk of court and the presiding officer of the parish governing authority shall relocate any such polling place. The polling place shall be relocated to the nearest feasible and accessible location as determined by the secretary of state in conjunction with the commissioner of elections, upon the recommendation of the clerk of court in conjunction with the presiding officer of the parish governing authority.

B. When a polling place is relocated pursuant to Subsection A, the clerk of court in conjunction with the secretary of state and commissioner of elections shall give adequate notice of the change of the location to each voter registered to vote at that polling place and to each candidate to be voted on at that polling place, if practicable, in the following manner:

(1) Each candidate shall be given immediate notice by telephone or by electronic means, and by certified mail where reasonable time exists, of the new location of any polling places that have been relocated.

(2) A sign shall be posted at any former polling place directing voters to the new location of the polling place, if practicable.

(3) An employee of the parish governing authority shall be stationed at any former polling place, if practicable, for the purpose of directing potential voters to the new location of the polling place. Such employee shall be required to take the constitutional oath or affirmation. The clerk of court shall administer the oath.

(4) If reasonable time exists, the notice of the change in location shall be published by the clerk of court in the official journal of the parish and in any other newspaper of general circulation in the precinct or precincts affected. Publication of the notice shall appear under the heading, NOTICE OF CHANGE OF POLLING PLACE.

C. The clerk of court may take any other reasonable steps as it deems necessary or desirable to inform the voters and the candidates of the change in location, including but not limited to posting notices on utility poles and advertisements in the electronic media.

* * *

§423. Parish boards of election supervisors

* * *

H. Designees. The clerk of court and the registrar of voters may each appoint a designee to serve in his place on the parish board of election supervisors when he is absent from any meetings of the board. Any designee of the registrar of voters shall be a sworn deputy registrar. For each day of such service the designee of the clerk of court or the registrar of voters shall be paid the same compensation as a member, and the designating member shall not be compensated

for that day. Any compensation paid to the designee shall be counted against the designating member's compensation, which shall not exceed six days as provided in R.S. 18:423(E).

* * *

§425. Commissioners

A. Number. (1) In addition to the commissioner-in-charge, at the following elections there shall be the following number of additional commissioners at each precinct:

* * *

(b) For all elections not specifically provided for in Subparagraph (A)(1)(a) or in Part III of Chapter 6~~, or in Chapter 6-A or Chapter 6-B~~ of this Code:

(i) Three commissioners for precincts with more than three hundred registered voters.

(ii) Two commissioners for precincts with three hundred registered voters or less.

(2) The governing authority of a municipality, the governing authority of a parish, or the governing authority of a district having a governing authority, with the approval of the parish board of election supervisors, may adopt a resolution to reduce the number of such additional commissioners to not less than two for each precinct in the municipality, in the parish outside of a municipality, or in the district outside of a municipality in a district election, respectively, whenever in

the opinion of the governing authority such reduction is not detrimental to the conduct of an election. In no event shall there be less than one commissioner-in-charge and two additional commissioners per precinct.

* * *

§435. Watchers; appointment and commission

A. Right to have watchers. (1) Each candidate is entitled to have one watcher at every precinct where the office he seeks is voted on in a primary or general election. The candidate or his authorized representative shall file one list of watchers on a form provided by the secretary of state or on a form which contains the same information as required by the form provided by the secretary of state. When a candidate's list of watchers is filed by the candidate's authorized representative, a letter of authorization from the candidate shall accompany the list of watchers. However, in the case of a presidential election, each slate of candidates for presidential elector is entitled to have one watcher at every precinct. The state central committee of each recognized political party shall be responsible for filing the list of watchers for its slate of candidates for presidential elector. The list of watchers for an independent or other party slate of candidates for presidential elector shall be filed by any person so authorized by the presidential candidate supported by the slate of electors. A letter of authorization from the presidential candidate, or an authorized agent of his campaign, shall accompany the list of watchers.

* * *

§463. Notice of candidacy; financial statements; political advertising; penalties

A.

* * *

(2) The notice of candidacy also shall include a certificate, signed by the candidate, certifying that he has read the notice of his candidacy, that he meets the qualifications of the office for which he is qualifying, that he is not currently under an order of imprisonment for conviction of a felony, that he is not prohibited from qualifying as a candidate for conviction of a felony pursuant to Article I, Section 10 of the Constitution of Louisiana, that he has attached to the notice of his candidacy the financial statement required by Subsection B of this Section, if applicable, that he acknowledges that he is subject to the provisions of the Campaign Finance Disclosure Act (R.S. 18:1481 et seq.) if he is a candidate for any office other than United States senator, representative in congress, or member of a committee of a political party, and that all of the statements contained in it are true and correct. The certificate shall be executed before a notary public or shall be witnessed by two persons who are registered to vote on the office the candidate seeks. If the candidate is serving outside the state with the armed forces of the United States, his notice of candidacy shall be witnessed by a commissioned officer in the armed forces of the United States.

* * *

§574. Compilation and promulgation of returns

A.

* * *

(2) Immediately after the completion of the verification by the clerk of court, the board shall publicly prepare two compiled statements of the election returns as shown by the record of the votes made by the clerk of court. The compiled statements shall separately show the machine votes for each candidate and for and against each proposition in each precinct, the total absentee votes for each candidate and for and against each proposition in the parish, and the total of all votes for each candidate and for and against each proposition in the parish.

* * *

§576. Election night returns

* * *

B. Each clerk of court shall transmit the results of the elections ~~involving state candidates, as defined in R.S. 18:452,~~ to the secretary of state ~~immediately~~ expeditiously ~~upon the completion of the tabulation~~ and in accordance with rules and regulations which shall be adopted by the secretary of state.

C. The secretary of state shall compile the results of the elections ~~involving state candidates~~ immediately upon receipt of the results from the clerks of court and shall make the compiled results available to the press and public.

* * *

§1259. Arrangement of ballot; designation of party candidates

* * *

B.(1) The ballot shall be so arranged that the names of the candidate for president and the candidate for vice president nominated by each recognized political party, by nominating petition, or by filing of notices of candidacy accompanied by a qualifying fee shall appear~~,in fourteen point type print,~~ prominently together with the name of the presidential candidate on top and the name of the vice presidential candidate directly underneath on the vertical type voting machine and with the name of the presidential candidate on the left and the name of the vice presidential candidate directly to the right on the horizontal type voting machine.

* * *

(4) Immediately below the word "Electors" the names of the presidential electors nominated in support of the nominees for president and vice president of that party or political principal shall appear ~~in six point type print~~.

* * *

§1284. Resolution calling election; proposition

* * *

F.(1) The preparation of the statement of the proposition to be submitted to the voters at an election shall be the responsibility of the governing authority of the political subdivision ordering the election. The statement of the proposition shall also include a simple and unbiased concise summary in easily understood

language which sets forth the substance of the proposition. The statement of the proposition, including the summary, shall not exceed four hundred words in length. Such summary shall be set in all capital letters and shall be placed at the beginning of the statement of the proposition.

* * *

§1286. Polling places; election officers

A. When an election called under the provisions of this Chapter is not held at the same time as the election of any public official, the governing authority of the political subdivision ordering the election shall use the established polling places and provide the voting machines and a compiled statement of qualified voters~~, and fix the compensation of the election officers~~. On or before the twenty-first day prior to such election, the parish board of election supervisors shall appoint ~~not less than two~~ the number of commissioners for each precinct as provided in R.S. 18:425(A)(1)(b) and not less than ~~two~~ the same number of alternate commissioners for each precinct, all of whom shall meet the qualifications set forth in Part II of Chapter 5 of this Title. The commissioner-in-charge for each precinct at which an election called under the provisions of this Chapter is held shall be the commissioner-in-charge selected or appointed for such precinct under the provisions of Part II of Chapter 5 of this Title.

* * *

§1299.1. Statement of question or proposition to be voted on; statement length

A. The preparation of the statement of any question or proposition to be submitted to the voters at an election shall be the responsibility of the governing authority or other entity calling the election or submitting the question or proposition. The statement of the proposition shall also include a simple and unbiased concise summary in easily understood language which sets forth the substance of the proposition ~~and~~. The statement of the proposition, including the summary, shall not exceed four hundred words in length. Such summary shall be set in all capital letters and shall be placed at the beginning of the statement of the proposition.

* * *

§1300.2. Petition for recall election; campaign finance disclosure

* * *

C.

* * *

(2) The signed and dated petition shall be submitted to the registrar of voters for each parish within the voting area not later than one hundred eighty days after the day on which the copy of the petition was filed with the secretary of state; however, where fewer than one thousand qualified electors reside within the voting area, the petition shall be submitted to the registrar of voters not later than ninety days after the day on which the copy of the petition is filed with the secretary of state. If the final day for submitting the signed and dated petition falls

on a Saturday, Sunday, or legal holiday, the deadline for filing such petition shall be on the next day which is not a Saturday, Sunday, or legal holiday.

* * *

§1300.3. Certification of registrar of voters; addition or withdrawal of signatures; form of names

* * *

B.(1) The registrar of voters shall honor the written request of any voter who either desires to have his handwritten signature stricken from the petition or desires to have his handwritten signature added to the petition at any time after receipt of the signed petition as provided in R.S. 18:1300.2(C) but prior to certification of the petition or within five days after receipt of such signed petition, whichever is earlier. The written request of the voter shall include the name and address of the voter, the signature of the voter, and the date.

(2) Upon the signature of the voter, the written request of the voter to have his signature stricken or added to the recall petition shall be a public record. Any person in possession of such a written request shall be the custodian thereof. The voter or any other person who is the custodian of the written request shall transmit the written request to the registrar of voters for each parish within the voting area by mail or directly by hand, immediately upon signature of the voter or upon receipt of the signed, written request.

* * *

§1354. Parish custodian of voting machines; powers and duties; appointment of deputy custodians

* * *

C. The parish custodian of voting machines may employ persons on a temporary basis, as needed, to assist him in the performance of his duties. He may appoint a deputy parish custodian of voting machines for any polling place he deems necessary. The parish custodian shall not appoint a person who is a candidate or a member of a candidate's immediate family to serve in any polling location where the candidate's name appears on the ballot. The compensation of a deputy parish custodian shall be seventy-five dollars for each election at which he serves. The deputy parish custodian shall deliver the key envelope and the supplemental list to the commissioner-in-charge at least one-half hour before the fixed time for the opening of the polls.

* * *

§1400.3. Election expenses incurred by clerks of court and registrars of voters; payment by commissioner of elections; payment by governing authorities

* * *

D. For the purposes of this Section, "election expenses incurred by registrars of voters" is defined and limited to the following:

(1) Expenses incurred by a registrar of voters to pay for one or more temporary part-time clerical employees to perform election duties and responsibilities associated with his office as provided in this Title. Such employees shall be paid at an hourly rate established by the registrar at not to exceed that of a ~~Voter Registration Specialist~~ Clerk Chief II in the General Schedule at the entry level as specified in the classification and pay plan of the Louisiana Department of Civil Service.

* * *

Section 2. R.S. 18:31(C), 104(A)(15) and (16), 154(C), 552(B), 553(B)(4), 563, 564(C), 1306(A)(3), and 1307(C) are hereby amended and reenacted and R.S.18:425(B)(4), 552(C), and 1309(E)(4) and (5) are hereby enacted to read as follows:

§31. State voter registration computer system; parish computer system

* * *

C. The commissioner of elections shall adopt rules and regulations with respect to all records, data, and information required for registration of voters and the transfer of copies thereof to the department. The commissioner shall establish, by rule, a uniform cost for the preparation of lists of registered voters. However, no charges for preparation or transmission of voter registration data shall apply to the office of motor vehicles of the Department of Public Safety and Corrections, when the transmitted data is used to verify voter registration information against driver's license and social security information. All rules and regulations shall be adopted pursuant to the Administrative Procedure Act.

* * *

§104. Application for registration; form

A.

* * *

(15) The application form also shall inform the applicant of the penalty for violation of applicable laws relating to registration of voters and shall contain an affidavit to be subscribed, through a handwritten signature, before the registrar, deputy, or any person authorized to accept voter registration applications attesting that the applicant is a United States citizen and that the facts given by him on this application are true to the best of his knowledge and belief. When the registration application is completed at the office of motor vehicles of the Department of Public Safety and Corrections, an electronically captured signature of the applicant may suffice as a handwritten signature of the applicant.

(16) ~~Social security number.~~ Louisiana driver's license number, if issued, or if no driver's license has been issued, the last four digits of the social security number, if issued. The full social security number of the applicant may be provided on a voluntary basis by the applicant. If the applicant has neither a Louisiana driver's license number nor a social security number, the applicant shall attach one of the following items to his application:

(a) A copy of a current and valid photo identification.

(b) A copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the applicant.

* * *

§154. Records open to inspection; copying; exception

* * *

C. Notwithstanding the provisions of this Section, neither the registrar nor the Department of Elections and Registration shall disclose the social security number of a registered voter or circulate the social security numbers of registered voters on commercial lists, except when voter registration data is transmitted to the office of motor vehicles of the Department of Public Safety and Corrections, for the purposes of verifying the accuracy and authenticity of the social security number provided by the voter.

* * *

§425. Commissioners

* * *

B. Qualifications and classifications.

* * *

(4) A person who is at least seventeen years of age, under the age of eighteen, and is not a qualified voter but is otherwise qualified to serve as a commissioner pursuant to this Subsection may be selected to serve as a commissioner in any precinct of the ward where he may register to vote pursuant

to R.S. 18:101(A), provided that the person is enrolled in the twelfth grade of any Louisiana public high school or state-approved nonpublic high school or is participating at the twelfth grade level in a home study program approved by the State Board of Elementary and Secondary Education.

* * *

§552. Election materials

* * *

B. In the case of a federal election, in addition to the materials provided in Subsection A of this Section, the secretary of state shall supply informational posters as required by the Help America Vote Act of 2002.

C. Delivery of materials. The contractor who delivers the voting machines also shall deliver the election materials to each polling place under the direction and supervision of the parish custodian of voting machines.

* * *

§553. Inspection and preparation of voting machines at polling places; precinct registers and supplemental list

* * *

B. Inspection of the voting machines. After the commissioners take their oath and before the time for opening the polls, the commissioners, in the presence of the watchers, shall prepare the polling place for voting as follows:

* * *

(4) Post the ~~card of~~ instructions, informational posters, if required, the statement of proposed constitutional amendments on the ballot, and a sample ballot in a conspicuous place at the principal entrance to the polling place.

* * *

§563. Procedure for voting

A. The commissioners shall not allow more voters to approach the voting machines than there are vacant machines available for voting. Except as otherwise provided by law, the commissioners shall not allow more than one person to enter a voting machine at a time.

B. A pre-teen child may accompany his parent or legal guardian into the voting machine.

C. A voter shall not remain in a voting machine longer than three minutes. If a voter fails to leave a voting machine promptly after a commissioner has notified him that three minutes have elapsed, the commissioners shall have the voter removed from the voting machine.

D.(1) In order to cast a vote on a voting machine, a voter shall make at least one selection in a candidate or proposition election. Voting is completed by activating the cast vote mechanism. If the voter has made any selection in a candidate or proposition election but has failed to activate the cast vote mechanism, a commissioner observed by at least one other commissioner shall activate the cast vote mechanism for the fled voter without altering any selections made by the voter.

(2) In order to cast a vote on a paper ballot, a voter must make a selection for a candidate or for or against a proposition by completely filling in the oval to the right of a selection and returning the ballot to the appropriate election official within the applicable deadline set forth by law. If a voter makes selections for more than the number of candidates to be elected for an office or makes selections for and against the same proposition, the selections for that office or proposition will be void.

E. A voter shall promptly leave the polling place after voting and shall not reenter a voting machine.

§564. Assistance in voting

* * *

C. Procedure when voter receives assistance. The person or commissioners assisting the voter shall enter the voting machine with the voter and assist him in voting. No other person shall enter the voting machine or assist the voter in voting. No person selected by the voter to assist him shall reveal the name of any person for whom the voter has voted, any proposition upon which he voted, or anything that took place while the voter was being assisted. When a precinct is equipped with a voting machine which provides an audio ballot, the commissioner shall offer the option of voting using the audio ballot to a visually impaired voter or a voter who is unable to read. If the voter elects to vote using such method, the commissioner shall assist the visually impaired voter or the voter

who is unable to read with the headset and instruct the voter and the person selected to assist the voter on the use of the audio ballot.

* * *

§1306. Preparation and distribution of absentee ballots

A.

* * *

(3) Depending on the type of ballot used in an election, a ballot shall be marked by the voter with a pencil containing black lead ~~or a pen or ball-point pen containing black, blue-black, or blue ink,~~ or with an instrument or device to punch out the appropriate space or box on the ballot. The instructions printed on the face of the ballot shall inform the voter of the type of instruments that he shall use to mark his ballot.

* * *

§1307. Application by mail

* * *

C. If the applicant is a member of the United States Service or resides outside the United States, he may use the federal postcard application. ~~, and the period during which applications may be received shall extend from twelve month to seven days before election day.~~ Such application shall be valid for a period extending from the date the application is received in the office of the registrar of voters through two subsequent federal general elections. If the registrar rejects the application of an applicant who is a member of the United States Service or

resides outside the United States, the registrar shall provide the applicant with written reasons for the rejection.

* * *

§1309. Absentee application and voting in person

* * *

E.

APPENDIX 4

Regular Session, 2003

HOUSE BILL NO. 1358

BY REPRESENTATIVES BRUNEAU AND LANCASTER (BY FEDERAL MANDATE)

AN ACT

To amend and reenact R.S. 18:24 and 574(A)(2) and to enact Subparts F and G of Part V of Chapter 5 of Title 18 of the Louisiana Revised Statutes of 1950, to be comprised of R.S. 18:566 through 567.6, relative to provisional voting and Title III complaint procedures as mandated by the Help America Vote Act of 2002; to provide for the powers and duties of the state board of election supervisors to extend to Title III complaint procedures; to provide for the compilation and promulgation of election results to include any counted provisional votes; to provide for provisional voting on election day and in person absentee; to provide for provisional voting in the event that the poll hours of an election for federal office are extended; to provide for the registrar of voters to record who uses a provisional ballot; to provide for agencies to provide and compile information as necessary to determine whether a provisional ballot shall be counted; to provide for the tabulation of provisional votes; to provide for the voter to determine whether his provisional vote was counted; to provide for a complaint procedure for alleged violations of Title III of the Help America Vote Act; to provide for a procedure for filing a complaint; to provide for procedures for processing the complaint; to provide for the board to conduct a hearing and provide a final decision and the reasons therefor; to provide for remedies; to provide for the Division of Administrative Law to assign the complaint to an administrative law judge if the complaint is not heard or decided timely by the board of election supervisors; to provide for the computation of time intervals; to provide for the complaint procedure to be exempt from the administrative hearing process of Chapter 13-B of Title 49; to provide for judicial review of a final decision of the board or resolution of the administrative law judge; and to provide for related matters.

Be it enacted by the Legislature of Louisiana:

Section 1. R.S. 18:24 and 574(A)(2) are hereby amended and reenacted and Subpart F and Subpart G of Part V of Chapter 5 of Title 18 of the Louisiana Revised

Statutes of 1950, comprised of R.S. 18:566 through 567.6, are hereby enacted to read as follows:

§24. Powers and duties; authority to intervene in actions

A. To accomplish the purposes of this Part and Subpart G of Part V of Chapter 5 of this Title, the board shall have the following powers, duties, and functions:

(1) To adopt, amend, and repeal such rules and regulations as are necessary for the transaction of its business and to implement the provisions of this Part and Subpart G of Part V of Chapter 5 of this Title.

(2) To conduct hearings as provided in this Part and Subpart G of Part V of Chapter 5 of this Title.

(3) To review election laws and procedures and to report to the legislature as required by this Part.

(4) To employ an executive director, legal counsel, and such other personnel as the board deems necessary and appropriate.

(5) To exercise such other powers and duties as are necessary to effectuate the purposes of the board as set forth in this Part and not inconsistent with such provisions.

B. To accomplish the purposes of Subpart G of Part V of Chapter 5 of this Title, the board shall also have the power and authority to hold hearings, subpoena witnesses, administer oaths, require the production of books and records, and do all other things necessary to discharge its duties and responsibilities.

* * *

SUBPART F. PROVISIONAL VOTING

§566. Provisional voting for federal office; polling place and in person absentee

A. In an election for federal office, when an applicant's name does not appear on the precinct register and the registrar of voters has not authorized the applicant to vote by affidavit, or the commissioners assert that the applicant is not eligible to vote, and the applicant declares himself to be a registered voter and eligible to vote in the election for federal office, the applicant may cast a provisional ballot for candidates for federal office.

B. Procedure for provisional voting for federal office at a polling place:

(1) The applicant shall first fill in the blanks on the provisional ballot envelope flap and sign the certificate on the envelope flap in the presence of a commissioner attesting that he is a registered voter in the parish and is eligible to vote in the election for federal office. The applicant shall then sign the precinct register on the page marked "Provisional Voters". The commissioner shall record the provisional ballot number on the provisional ballot envelope and then shall provide the applicant the provisional ballot envelope and the provisional ballot listing the federal offices. The applicant shall then mark the provisional ballot according to the printed instructions on its face, place the ballot in the provisional ballot envelope, seal the envelope, and return the provisional ballot envelope to the commissioner. The applicant shall be allowed to mark the provisional ballot in an area and in a manner that protects the secrecy of his vote. The commissioner shall place the provisional ballot envelope inside the envelope marked "Provisional Ballot". The "Provisional Ballot" envelope shall be returned to the registrar of voters on election night.

(2) The commissioner shall provide an applicant who casts a provisional ballot with written instructions for how the applicant may ascertain whether the provisional vote was counted, and, if the provisional vote was not counted, the reason the vote was not counted.

C. In an election for federal office during the period of absentee voting in person, when an applicant's name does not appear on the precinct register and the registrar of voters has not authorized the applicant to vote by affidavit, or the

registrar or deputy registrar asserts that the applicant is not eligible to vote, and the applicant declares himself to be a registered voter and eligible to vote in the election for federal office, the applicant shall be permitted to cast an in-person absentee provisional ballot for candidates for federal office.

D. Procedure for provisional voting for federal office during the period of absentee voting in person:

(1) The applicant shall first fill in the blanks on the provisional ballot envelope flap and sign the certificate on the envelope flap in the presence of the registrar or deputy registrar attesting that he is a registered voter in the parish and is eligible to vote in the election for federal office. The applicant shall then sign the precinct register on the page marked "Provisional Voters". If the applicant is voting at a branch office of the registrar, the applicant shall be required to sign and date a register for absentee provisional voters kept by the registrar prior to voting by provisional ballot. The registrar or deputy registrar shall record the provisional ballot number on the provisional ballot envelope flap and then shall provide the applicant the provisional ballot envelope and the provisional ballot listing the federal offices. The applicant shall then mark the provisional ballot according to the printed instructions on its face, place the ballot in the provisional ballot envelope, seal the envelope, and return the provisional ballot envelope to the registrar or deputy registrar. The applicant shall be allowed to mark the provisional ballot in an area and in a manner that protects the secrecy of his vote.

The registrar or deputy registrar shall place the provisional ballot envelope inside the envelope marked "Absentee Provisional Ballot".

(2) The registrar or deputy registrar shall provide an applicant who casts an in-person absentee provisional ballot with written instructions for how the applicant may ascertain whether the provisional vote was counted, and, if the provisional vote was not counted, the reason the vote was not counted.

§566.1. Provisional voting for federal office; order for extension of poll hours during an election for federal office

A. If the poll hours in an election for federal office are extended as a result of a federal or state court order or any other order extending the time established for closing the polls, an individual who votes during the extension shall vote by provisional ballot for federal offices as set forth in R.S. 18:566(B).

B. Any provisional ballot cast pursuant to Subsection A of this Section shall be kept separate and placed by the appropriate election official in the envelope marked "Provisional Ballot – Extended Poll Hours", and shall be counted and tabulated as provided in R.S. 18:566.2.

§566.2. Tabulation and counting of provisional ballots for federal office

A. Upon receipt of the "Provisional Ballot" envelope, the registrar of voters shall compile a list of the names of individuals who voted a provisional ballot, including the names of individuals who voted a provisional absentee ballot. On or before the date prescribed for the date of tabulation and counting of provisional ballots set forth in Subsection C of this Section, the registrar of voters, secretary of state, and other state and local agencies shall compile and provide available registration documentation to the parish board of election supervisors for the purposes of determining whether the individual casting a provisional ballot is a registered voter and eligible to vote in the election.

B. The parish board of election supervisors in each parish shall be responsible for the counting and tabulation of all provisional ballots for federal office.

C. Provisional ballots shall be counted on the third day following the election and prior to the compilation of returns pursuant to R.S. 18:574 at the office of the registrar of voters or at a public facility within the parish designated by the parish board of election supervisors.

D. Candidates, their representatives, and qualified electors may be present during the counting and tabulation of provisional ballots.

E. The board shall count and announce the results of the provisional ballots as the total number of provisional votes cast in the election for each candidate for federal office.

F. The procedure for counting provisional ballots shall be as follows:

(1) A member of the board shall remove the envelopes containing the provisional ballots from the envelopes marked "Provisional Ballot" and "Absentee Provisional Ballot".

(2) The board shall announce the name of each provisional voter and shall compare the name on the flap of the provisional ballot envelope with the name on the list of provisional voters.

(3) If the board has determined that a provisional ballot shall be counted, a member of the board shall write the provisional ballot number and the word "counted" adjacent to the provisional voter's name on the list of provisional voters. A member of the board shall tear the flap from the envelope containing the provisional ballot, attach the provisional voter's registration documentation to the envelope flap, and leave the envelope sealed.

(4) If the board has determined that a provisional ballot shall not be counted, the members of the board shall leave the flap on the envelope containing the provisional ballot, leave the envelope sealed, and shall write the word "rejected", together with the reason for rejecting the provisional ballot across the envelope containing the ballot. A member of the board shall write the provisional ballot number and the word "rejected" adjacent to the provisional voter's name, together with the reason for rejecting the provisional ballot, on the list of provisional voters. The rejected provisional ballots shall be placed in the special provisional ballot envelope. No rejected provisional ballot shall be counted.

(5) After the validity of all provisional ballots has been determined, the members of the board shall place the original signed list of provisional voters, the flaps removed from the valid provisional ballots and the attached registration documentation in the envelope provided for that purpose, and seal the envelope.

Two of the members of the board shall execute the certificate on the envelope and transmit the envelope to the registrar of voters.

(6) The members of the board shall open the envelopes containing the valid provisional ballots and remove the ballots.

(7) The provisional votes cast for a candidate for federal office shall be counted by hand, and the total number of provisional votes cast for a candidate shall be announced in the order the offices and candidates are listed on the provisional ballot. The members of the board shall enter the total number of votes on the final provisional ballot vote report and certify the results.

(8) The original of the final provisional ballot vote report prepared by the parish board of election supervisors shall be transmitted to the clerk of court upon completion of the tabulation of the provisional ballots.

(9) A copy of the signed list of provisional voters and a copy of the final provisional ballot vote report shall be transmitted immediately to the secretary of state.

G. When the flaps of the provisional ballots that were counted and the attached registration documentation have been returned to the registrar of voters, the registrar shall add the name of each provisional voter whose ballot was counted to the list of registered voters.

H. Upon completion of the tabulation and counting of the provisional ballots, the parish board of election supervisors shall return the provisional ballots and a copy of the final provisional ballot vote report to the special provisional

ballot envelope, shall seal the envelope, and shall deliver the envelope to the registrar of voters. The registrar shall preserve the envelope and its contents inviolate and, except upon order of a court of competent jurisdiction, shall not allow the provisional ballot documents to be inspected by anyone until the delay for filing an action contesting the election has lapsed. If an action contesting the election is commenced timely, the registrar shall continue to preserve the envelope and its contents inviolate, subject to the orders of the court, until the final judgment in the action has become definitive.

SUBPART G. ADMINISTRATIVE COMPLAINT PROCEDURE

§567. Administrative complaint procedure; scope

This Subpart provides a uniform, nondiscriminatory procedure for the resolution of any complaint alleging a violation of any provision of Title III of the Help America Vote Act of 2002 for an election for federal office, including a violation that has occurred, is occurring, or is about to occur.

§567.1. Definitions

As used in this Subpart, the following words and terms shall have the meanings hereinafter ascribed to each, unless the context clearly indicates another meaning:

(1) "Complainant" means the person who files a complaint with the board under this Subpart.

(2) "Respondent" means any state or local election official whose actions relating to a federal election are asserted, in a complaint under this Subpart, to be in violation of Title III of the Help America Vote Act of 2002.

(3) "Title III" means Title III of the Help America Vote Act of 2002, Public Law 107-252, 116 Stat. 1666 (2002), 42 U.S.C. §15481- 15485.

(4) "Federal election" means a general, special, primary, or runoff election for federal office; and a primary election held for the expression of a preference for the nomination of individuals for election to the office of president.

(5) "Board" means the State Board of Election Supervisors.

§567.2. Filing a complaint

A. Any person who believes that there is a violation by any state or local election official of any provision of Title III may file a complaint, including a violation which has occurred, is occurring, or is about to occur. The complaint procedures set forth in this Subpart are limited to allegations of violations of Title III in a federal election.

B. The complaint shall be in writing, signed by the complainant, executed before a notary public, and sworn under oath. The complaint shall provide the name and mailing address of the complainant and shall include a description of the alleged violation that is sufficiently detailed to put the board and the respondent on notice of the nature of the alleged violation.

C. The complainant may use any of the following forms to file a complaint:

(1) The form provided by the secretary of state, subject to approval of the attorney general as to content.

(2) Any other form which contains the same information as required by the approved form prepared by the secretary of state.

D. A complaint shall be filed with the secretary of state and shall be filed within ninety days after the final certification of the federal election.

E. The complainant shall mail or deliver a copy of the complaint to each respondent.

§567.3. Processing of complaint

A. The secretary of state or his designee shall examine each complaint and may reject the complaint for filing if any of the following apply:

(1) The complaint does not clearly identify the name of the complainant and include an adequate means of contacting the complainant.

(2) The complaint is not signed by the complainant and notarized.

(3) The complaint does not, on its face, allege a violation of Title III with regard to a federal election.

(4) The complaint is not in proper form.

B. The chairman of the board shall establish a schedule under which the complainant and respondent, as well as any other interested person, may file written submissions concerning the complaint and under which the complaint shall be finally determined.

C. The board may consolidate complaints if they relate to common issues or to the same actions or events.

D.(1) The board shall compile and maintain an official record in connection with each complaint under this Subpart.

(2) The official record shall contain all of the following:

(a) A copy of the complaint, including any amendments requested by the board.

(b) A copy of any written submissions by the complainant, respondent(s), or other interested persons, including any responses authorized by the board.

(c) A written report of any investigation conducted or commissioned by the board.

(d) Copies of all notices and correspondence to or from the board in connection with the complaint.

(e) Originals or copies of any tangible evidence produced at any hearing conducted pursuant to Subsection F of this Section.

(f) The original tape recording produced at any hearing conducted pursuant to Subsection F of this Section and a copy of any hearing transcript.

(g) A copy of any final decision issued pursuant to Subsection G of this Section.

E. If the board has determined that the complaint does not include a clear and concise description of the alleged violation that is sufficiently detailed to put the board and the respondent on notice of the nature of the alleged violation, the

board may require the complainant to file an amended complaint. If the complainant fails to file the amended complaint, the chairman of the board shall dismiss the complaint.

F.(1) At the request of the complainant, the board shall conduct a hearing on the record. The request shall be made in writing to the secretary of state no later than ten days after the filing of the complaint or the amended complaint. A request for a hearing made after the deadline set forth in this Subsection shall be denied by the chairman of the board.

(2) The chairman of the board shall establish the date, time, and place for the hearing. He shall give at least five business days' notice of the date, time, and place of the hearing by all of the following means:

(a) By mail to the complainant, each named respondent, and any other person who has made a written request to be advised of the hearing.

(b) On the secretary of state's website.

(c) By posting in a prominent place, available to the general public, at the offices of the secretary of state.

(3) Four members of the board shall constitute a quorum and a quorum is required to conduct any hearing under this Subpart.

(4) The complainant, any respondent, or any other interested person may appear at the hearing and testify or present tangible evidence in connection with the complaint. Each witness shall be sworn. The Louisiana and federal rules of evidence shall not apply to this hearing. The chairman of the board may limit the

testimony, if necessary, to ensure that all interested participants are able to present their views. The chairman of the board may recess the hearing and reconvene at a later date, time, and place announced publicly at the hearing.

(5) A complainant, respondent, or other person who testifies or presents evidence at the hearing may, but need not, be represented by an attorney.

(6) The proceedings shall be tape recorded by and at the expense of the board. The recording shall not be transcribed as a matter of course, but the board, a parish board of election supervisors, or any party may obtain a transcript at its own expense. A copy of the transcript shall be filed as part of the record, and any other interested person may examine the record copy.

(7) Any party to the proceedings may file a written brief or memorandum within five business days after the conclusion of the hearing upon authorization of the board. No responsive or reply memoranda will be accepted, except with the specific authorization of the chairman of the board.

G.(1) If there has been no hearing conducted pursuant to Subsection F of this Section, the members of the board shall review the record and determine whether a preponderance of the evidence establishes a violation of Title III. The decision of the board shall require the concurrence of a majority of the members of the board.

(2) At the conclusion of a hearing conducted pursuant to Subsection F of this Section, the board shall determine whether a preponderance of the evidence

establishes a violation of Title III. The decision of the board shall require the concurrence of a majority of the members of the board present at the hearing.

(3)(a) If the board determines that a violation of Title III has occurred, the board shall provide an appropriate remedy. The remedy so provided may include an order to any respondent, commanding the respondent to take specified action, or prohibiting the respondent from taking specified action, with respect to past or future elections; however, the remedy shall not include an award of monetary damages, costs, or attorney fees, and shall not invalidate the results of any election or invalidate any ballot or vote cast.

(b) The board shall dismiss the complaint if any of the following apply:

(i) The complaint is not filed within the time set forth in R.S. 18:567.2.

(ii) The board determines that a violation of Title III has not occurred.

(iii) The board determines that there is insufficient evidence to establish a violation of Title III.

(4) The board shall provide reasons for the decision and for any remedy ordered. A written decision shall be issued by the board.

H. Except as specified in Subsection J of this Section, the final decision of the board shall be issued within ninety days from the date the complaint was filed, unless the complainant consents in writing to an extension. The final decision shall be mailed to the complainant, each respondent, and any other person who has made a written request to be advised of the final decision. It shall also be posted on the secretary of state's website.

I. If the board fails to make a final decision within ninety days from the date the complaint was filed, or within any extension to which the complainant consents, the complaint shall be referred for final resolution as provided in Subsection J of this Section. The record compiled pursuant to Subsection D of this Section shall be made available for use pursuant to Subsection J of this Section.

J.(1) If the board fails to render a final decision within the time set forth in Subsection H of this Section, the board shall transmit the record to the Division of Administrative Law on or before the fifth business day after the board's decision was due. The Division of Administrative Law shall assign the complaint to an administrative law judge.

(2) The administrative law judge shall review the record compiled in connection with the complaint, including the tape recording or any transcript of a hearing and any submissions, briefs, or memoranda. The administrative law judge shall not receive additional testimony or evidence, unless the complainant requested a hearing within the deadline set forth in Subsection F of this Section and the hearing was not conducted within the time set forth in Subsection H of this Section. In exceptional cases, the administrative law judge may request that the parties present additional briefs or memoranda.

3) The administrative law judge shall determine the appropriate resolution of the complaint.

(4) The administrative law judge shall issue a written resolution of the complaint within sixty days after the final board decision was due pursuant to Subsection H of this Section. The sixty-day period shall not be extended. The final resolution of the administrative law judge shall be transmitted to the board. The final resolution shall be mailed by the board to the complainant, each respondent, and any other person who has made a written request to be advised of the final resolution. It shall also be posted on the secretary of state's website. The resolution so provided may include an order to any respondent, commanding the respondent to take specified action, or prohibiting the respondent from taking specified action, with respect to past or future elections; however, the resolution shall not include an award of monetary damages, costs, or attorney fees, and shall not invalidate the results of any election or invalidate any ballot or vote cast.

K. A complaint filed pursuant to this Subpart shall not constitute an election contest pursuant to R.S. 18:1401 et seq.

§567.4. Computation of time

Except as otherwise provided in this Subpart, computation of all time intervals in this Subpart shall include Sundays and other legal holidays. However, if the time interval ends on a Sunday or other legal holiday, then noon of the next legal day shall be deemed to be the end of the time interval.

§567.5. Exemption

The provisions of Chapter 13-B of Title 49 relating to the Division of Administrative Law shall not apply to the administrative hearing process

established under this Subpart. The board is exempt from the hearing requirements set forth in Chapter 13-B of Title 49 and shall conduct hearings pursuant to this Subpart. However, the board is authorized to contract with the Division of Administrative Law for the alternative dispute resolution services required by R.S. 18:567.3.

§567.6. Judicial review

The final decision of the board or the final resolution of the administrative law judge may be judicially reviewed by filing a petition in the Nineteenth Judicial District Court, Parish of East Baton Rouge. The petition shall be filed within thirty days after the mailing of the notice of the final decision of the board or the final resolution of the administrative law judge.

* * *

§574. Compilation and promulgation of returns

A.

* * *

(2) Immediately after the completion of the verification by the clerk of court, the board shall publicly prepare two compiled statements of the election returns as shown by the record of the votes made by the clerk of court. The compiled statements shall separately show the machine votes for each candidate and for and against each proposition in each precinct, the total absentee votes for each candidate and for and against each proposition in the parish, the total

provisional votes for each candidate for federal office, and the total of all votes for each candidate and for and against each proposition in the parish.

* * *

Section 2. This Act shall become effective on January 1, 2004.

SPEAKER OF THE HOUSE OF REPRESENTATIVES

PRESIDENT OF THE SENATE

GOVERNOR OF THE STATE OF LOUISIANA

APPROVED:

June 19, 2003

Ms. Suzanne Haik Terrell
Commissioner of Elections
P.O. Box 4729
Baton Rouge, Louisiana 70821-4729

Dear Ms. Terrell:

This refers to the revisions to the Louisiana Mail Voter Registration Application Form (LR-1M) (REV.03/03) R.S. 18:104 Form # 01253)) adopted in part to comply with the Help America Vote Act of 2002, 42 U.S.C. 15301-15545, submitted to the Attorney General pursuant to Section 5 of the Voting Rights Act, 42 U.S.C. 1973c. We received your submission on May 1, 2003; supplemental information was received on June 3, 2003.

The Attorney General does not interpose any objection to the specified changes. However, we note that Section 5 expressly provides that the failure of the Attorney General to object does not bar subsequent litigation to enjoin the enforcement of the changes. In addition, as authorized by Section 5, we reserve the right to reexamine this submission if additional information that would otherwise require an objection comes to our attention during the remainder of the sixty-day review period. See the Procedures for the Administration of Section 5 (28 C.F.R. 51.41 and 51.43).

Sincerely,

Joseph D. Rich
Chief, Voting Section

LOUISIANA MAIL VOTER REGISTRATION APPLICATION FORM

YOU CAN USE THIS FORM TO:

1) Register to vote 2) Change your address 3) Request a name change 4) Change party affiliation

TO REGISTER YOU MUST:

- be a United States citizen
- be at least 17 years old but must be 18 years old prior to next election to vote
- not be under an order of imprisonment for conviction of a felony
- not be under a judgment of interdiction for mental incompetence
- reside in the state and parish in which you seek to register.

INSTRUCTIONS FOR COMPLETING THIS FORM:

All information except your signature should be printed clearly in ink, preferably black, or typed. Fill in all boxes that apply to you.

Box 1: Indicate whether you are a citizen of the United States of America.

Box 2: Provide full name. Do not use initials for middle or maiden name.

Box 3: 'Residence Address' means the address where you live and are registering to vote. If you claim a homestead exemption, you must list the address of that residence. Do not use a post office box for your 'Residence Address'. If you use a rural route and box number, draw a map in the space labeled 'Give Location.' Write in the names of the crossroads (streets) nearest to where you live. Draw an X to show where you live. Use a dot to show any schools, churches, stores or landmarks near where you live and write the name of the landmark. Complete 'Mailing Address' only if it is different from the 'Residence Address'.

Boxes 6 & 15: You must provide your Louisiana driver's license number, if issued. If not issued, you must provide at least the last four digits of your social security number, if issued. The full social security number may be provided on a voluntary basis. If neither a social security number nor a driver's license has been issued, you must attach either a) a copy of a current and valid photo identification or b) a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows your name and address.

Boxes 5,11 & 12: The items 'race/ethnic origin', 'daytime phone' and 'home phone' are not required but are helpful.

Box 8: If you do not complete this item, your party affiliation will be listed as 'none'.

Box 16: If you are using this form to request a change of name, you must print the name to be changed here.

Box 18: The signatures of two witnesses to your mark if you are unable to sign your name must be included here.

Box 19: Date and sign the card with your signature or mark.

If returned by mail, either complete the 'Mail to:' box found on the reverse side or place in an envelope, using the address of the appropriate registrar of voters found on the reverse side. If you have not been issued a social security number or Louisiana driver's license number, you must mail it in an envelope so that you can include the required documentation with your application. Your application or envelope must be postmarked 30 days prior to the first election in which you seek to vote based on the residence listed on this application.

NOTE: 1. If you received this application from a designated agency, should you decline to register to vote, this fact will remain confidential. If you register to vote, the office where your application was submitted will remain confidential and may be used only for voter registration purposes. 2. Your social security number is intended to be used for voter registration purposes only. (L.A. R.S.18:104A(16) and 154)

QUESTIONS? Call your Parish Registrar of Voters. Check your local directory for the number. You may also call the Department of Elections and Registration at 1-800-825-3805.

COMPLETE AND CHECK ALL APPLICABLE BOXES AND TEAR ALONG PERFORATED LINE BEFORE MAILING.

HOUSE BILL NO. 1594

BY REPRESENTATIVES K. CARTER, BAYLOR, BROOME, CURTIS, GALLOT, GLOVER, GREEN, GUILLORY, HONEY, HUDSON, HUNTER, L. JACKSON, M. JACKSON, LUCAS, MORRELL, MURRAY, PEYCHAUD, PIERRE, QUEZAIRE, RICHMOND, SWILLING, AND WELCH

AN ACT

To enact R.S. 18:18(A)(8), relative to the duties and powers of the secretary of state; to provide for the secretary of state to be responsible for the implementation of voter registration week; and to provide for related matters.

Be it enacted by the Legislature of Louisiana:

Section 1. R.S. 18:18(A)(8) is hereby enacted to read as follows:

§18. Secretary of state; commissioner of elections; powers and duties

A. The secretary of state shall administer the laws relating to custody of voting machines and voter registration, and for the purpose he shall:

* * *

(8)(a) Prescribe uniform rules, regulations, forms, and instructions as to standards for effective nonpartisan voter education, which shall be approved by the attorney general and thereafter shall be implemented uniformly by each registrar of voters in the state. In developing the standards, the secretary of state shall review current voter education programs within the state. The standards shall address but shall not be limited to voter education concerning voter registration, balloting procedures, both absentee and at the polling places, distribution of sample ballots, and effective voter education methods, including the use of public service announcements and other public awareness methods. By December fifteenth of each general election year, each registrar of voters shall report to the secretary of state a detailed description of the voter education programs implemented in his parish. The secretary of state, upon receipt of such information, shall prepare a report on the effectiveness of voter education programs and shall submit the report to the governor, the president of the Senate, and the speaker of the House of Representatives by January thirty-first of each year following a general election.

(b) Develop activities, events, informational posters and pamphlets, and public service announcements for the implementation of an annual voter registration week and generally be responsible for implementation of such week. It is the policy of the state of Louisiana to encourage full participation in voting by all citizens of this state. To this end, the official state voter registration week shall be the last full week which occurs two weeks prior to the close of registration records for the regular fall primary election.

* * *

Section 2. The provisions of this Act shall become effective at noon on January 12, 2004.

SPEAKER OF THE HOUSE OF REPRESENTATIVES

PRESIDENT OF THE SENATE

GOVERNOR OF THE STATE OF LOUISIANA
APPROVED:

APPENDIX 7

Regular Session, 2003

HOUSE BILL NO. 1623

BY REPRESENTATIVES LEBLANC, LANCASTER, MURRAY, FAUCHEUX, THOMPSON, AND RICHMOND

AN ACT

To enact Chapter 8-B of Title 18 of the Louisiana Revised Statutes of 1950, to be comprised of R.S. 18:1400.21, relative to special treasury funds; to establish the Help Louisiana Vote Fund as a special fund in the state treasury; to establish accounts within the fund for certain purposes; to provide for deposit and use of monies in the fund; to provide for an effective date; and to provide for related matters.

Be it enacted by the Legislature of Louisiana:

Section 1. Chapter 8-B of Title 18 of the Louisiana Revised Statutes of 1950, comprised of R.S. 18:1400.21, is hereby enacted to read as follows:

CHAPTER 8-B. HELP LOUISIANA VOTE FUND

§1400.21. Help Louisiana Vote Fund

A. The Help Louisiana Vote Fund is established as a special fund in the state treasury, hereinafter referred to as the "fund", for purposes of improving Louisiana's elections in accordance with the Help America Vote Act of 2002, hereinafter referred to as "HAVA".

B. The sources of money deposited into the fund shall be any federal monies received by the state pursuant to HAVA and any monies appropriated to the fund. State monies appropriated to the fund may be deposited in any account designated in the appropriation. After compliance with the requirements of the Bond Security and Redemption Fund, federal monies shall be deposited into the fund and allocated by the state treasurer to one of the following five accounts. Within ten days of receipt of any federal monies by the state treasurer, the secretary of state shall provide written instructions to the state treasurer with respect to the specific account into which such monies shall be deposited.

(1) The Election Administration Account is established within the fund, into which the state treasurer shall deposit monies received pursuant to Section 101 of Title I of HAVA with respect to improving administration of elections. Monies in this account shall be appropriated only for improving the administration of elections, acquisition of equipment and voting system technologies, and other requirements of Title III of HAVA with respect to uniform and nondiscriminatory election technology and administration.

(2) The Voting Systems Account is established within the fund, into which the state treasurer shall deposit monies received pursuant to Section 102 of Title I of HAVA with respect to replacement of punch card and lever voting systems or to reimburse the state for expenditures made after January 1, 2001, for replacement of such systems. Reimbursement monies received under Section 102 of Title I of HAVA which are deposited into this account shall be appropriated

only for the replacement of lever voting systems or to satisfy the state's responsibilities under Title II of HAVA. All other monies in this account shall be appropriated only for the replacement of lever voting systems.

(3) The HAVA Requirements Account is established within the fund, into which the state treasurer shall deposit monies received pursuant to Title II of HAVA designated as requirements payments. Monies in this account shall be appropriated only to meet the requirements of Title III of HAVA with respect to uniform and nondiscriminatory election technology and administration requirements, after which any residual amounts available may be used for improving administration of federal elections.

(4) The Voting Access Account is established within the fund, into which the state treasurer shall deposit monies received pursuant to Title II of HAVA with respect to assuring voting access for individuals with disabilities. Monies in this account shall be appropriated only for (a) improvement of polling places to ensure accessibility to individuals with disabilities in a manner that provides the same opportunity for participation, privacy, and independence as for other voters; and (b) providing disabled individuals with information about accessible polling places, including outreach programs and training for election officials.

(5) The College Program Account is established within the fund, into which the state treasurer shall deposit monies received pursuant to Title V of HAVA with respect to the Help America Vote College Program. Monies in this account shall be appropriated only for activities and programs to encourage

students enrolled at institutions of higher education to assist state and local governments in the administration of elections by serving as nonpartisan poll workers or assistants and to encourage state and local governments to use the services of such students.

C. All unexpended and unencumbered monies in the fund at the end of the fiscal year shall remain in the fund. Such monies shall be invested by the state treasurer in the same manner as monies in the state general fund, and interest earned on the investment of these monies shall be credited to the fund after compliance with the requirements of the Bond Security and Redemption Fund. The state treasurer shall annually allocate investment earnings among the five accounts proportionally based on the fund balance of each account at the time of the allocation.

Section 2. This Act shall become effective upon signature by the governor or, if not signed by the governor, upon expiration of the time for bills to become law without signature by the governor, as provided in Article III, Section 18 of the Constitution of Louisiana. If vetoed by the governor and subsequently approved by the legislature, this Act shall become effective on the day following such approval.

State of Maine

Preliminary State Plan

for the Implementation of the Help America Vote Act of 2002

(Public Law 107-252)

Dear Election Assistance Commission and Citizens of Maine,

I am pleased to submit to you the State of Maine Preliminary State Plan for the Implementation of the Help America Vote Act of 2002. The Help America Vote Act of 2002 (HAVA), enacted by Congress on October 29, 2002, is the most significant piece of federal election reform legislation in the past 30 years. The federal law seeks to enhance the accessibility and integrity of elections across the country and authorizes federal funding to assist states in meeting the law's requirements. HAVA presents Maine with an exciting opportunity to enhance our elections with an unprecedented level of resources. This Preliminary State Plan outlines Maine's strategy for complying with the federal requirements and refining our elections process.

Maine has a long and proud tradition of implementing election laws, procedures and practices to encourage a high level of voter access and participation and to instill confidence in the integrity and accuracy of election results. As a result, Maine is well positioned to meet many of the HAVA's requirements. However, the State's compliance with all requirements will necessitate substantial efforts at the State and municipal level and full funding by Congress.

I want to take this opportunity to thank the State Plan Advisory Committee, comprised of a variety of stakeholders, who worked with me to craft our plan. In Maine, the successful conduct of elections is a cooperative effort of State and municipal election officials. The success of our elections process also relies on the confidence and participation of all Maine citizens. The State Plan Advisory Committee has set out a framework for continued cooperation as we implement HAVA. They have worked to create a plan that will help ensure that every vote counts as intended and that no voter is excluded from the process.

This plan sets out an ambitious agenda for implementing HAVA and enhancing Maine's elections process. With the continued dedication of election officials, civic organizations and Maine's citizens, I am confident we will meet our goals and continue to lead the nation with citizen participation and voter confidence in our elections. I hope you will share your thoughts with us about this Preliminary State Plan, and Maine's election process.

Sincerely,

Dan A. Gwadosky
Maine Secretary of State

BACKGROUND AND OVERVIEW

The Help America Vote Act of 2002 (HAVA) is a landmark piece of election reform legislation that seeks to enhance the integrity of our elections process by establishing certain minimum standards for the conduct of federal elections. HAVA also authorizes the federal government to make funds available to states for the purposes of implementing the requirements of the law and making other election improvements.

In Maine, our election laws and practices are strong and we are already in compliance with several of the federal requirements contained in the Help America Vote Act, including the provisional voting requirements, most voting information requirements, and all voting system requirements except for the disability access provisions.

We will, however, need to obtain all possible funds to execute the requirements of HAVA that we do not meet. The single biggest challenge Maine faces in complying with HAVA is the development and implementation of a statewide computerized central voter registration list. Due to the current decentralized process of maintaining the voter registration lists in each municipality, implementation of the central voter registration list will require the greatest use of HAVA resources. Another significant challenge will be compliance with the disability accessibility requirements for voting systems. The planning, technology, and training necessary to implement these provisions require most of the resources available through HAVA. Without full funding, Maine will not achieve full compliance.

Maine's Current Election Process

State and Federal elections in Maine are conducted in a manner used mostly in the New England States, which dates back to our country's earliest traditions of government. Maine's election process is a partnership between the State and the municipalities.

The Secretary of State is the chief state election official, and has central authority to oversee the application of the State's election laws and procedures; approve voting machines for use by municipalities; train and advise municipal election officials in the proper conduct of statewide elections; design, prepare and distribute ballots and other election forms in a consistent format for all municipalities; collect and compile statewide reports of election results and voter registration figures; and conduct recounts centrally following uniform procedures. The staff of the Division of Elections carries out these election activities on behalf of the Secretary of State.

The conduct of elections and voter registration is decentralized, occurring in 503 separate voting jurisdictions. These jurisdictions include municipalities, plantations and a small number of unorganized townships that administer their own elections, and range in the number of registered voters from 2 to 50,799. Each jurisdiction has a Clerk, who is responsible for conducting elections, and a Registrar of Voters, who is responsible for voter registration activities. In many jurisdictions, one person holds both of these positions.

The local jurisdictions are responsible for determining the location of voting places; securing accessible buildings and arranging the voting area for each election; obtaining voting booths and other equipment necessary for the election; and electing or appointing election officials and ensuring their training. In addition, municipalities that do not wish to use hand-counted paper ballots must purchase State-approved voting machines.

There are a total of 627 precincts statewide. The majority of jurisdictions have a single voting precinct, while the larger municipalities have up to 20 precincts. As of the November 2002 General Election there were 950,059 registered voters in Maine. About 92% of the voting jurisdictions have fewer than 5,000 registered voters, and over 50% of the jurisdictions have fewer than 900 registered voters.

Maine is a leader in adopting laws and procedures that remove barriers to registration and voting, encourage full citizen participation in the electoral process, and provide uniform and consistent voting procedures for all voters across the State. Since 1973, Maine has permitted new residents to register to vote in person up to and during Election Day, and has eliminated the length of residency requirement. Voters have also been allowed to register to vote by mail since 1973, and signature notarization requirements were eliminated in the late 1980's. Maine provided voter registration at motor vehicle branches five years before it was required under the National Voter Registration Act (NVRA), and added opportunities for voter registration at a variety of social service and public agencies when NVRA was adopted.

For decades, Maine has allowed absentee voting under certain circumstances both by mail and in the presence of the municipal clerk. In 1999, the election law was amended to allow any voter to cast an absentee ballot for any reason. In recent years, Maine has also expanded access to absentee voting by allowing voters to obtain a ballot via a telephone request, an immediate family member, a designated third person, or voting in the presence of the municipal clerk in certain licensed residential facilities.

Maine law also includes a fail-safe voting system, in the form of the challenged ballot. Qualified voters whose names do not appear on the voting list, or who are unable to show satisfactory proof of identity and residency upon registering to vote on Election Day, must be allowed to vote a challenged ballot. The challenge process protects the voter's right to vote. It also protects the integrity of the system by marking challenged ballots for later retrieval and a determination of validity if the results of the election could be affected by those ballots.

In the 1980's and 1990's, the Maine municipalities that used older voting technologies (e.g. mechanical lever machines and punch card voting systems) replaced those systems with newer optical scan precinct tabulators. Although only 22% of Maine's voting jurisdictions use optical scan systems, over 65% of the voters in Maine vote using one of these systems. All others vote using paper ballots that are counted by hand.

The Office of the Secretary of State has pioneered the use of its website to provide a wealth of election information to the public. From information on upcoming elections, including the Citizen's Guide to the Referendum Election and candidate listings, to information on registering to vote and absentee voting, to the results of prior elections over the past decade, Maine has used the web to create a vital link between the citizens of Maine and their democracy.

In an effort to ensure that municipal election officials have the tools they need to conduct election and voter registration duties according to current laws and procedures, the Secretary of State has created educational and instructional materials and has conducted voluntary training sessions for municipal clerks and registrars in partnership with the Maine Town and City

Clerk's Association over the past decade. The Secretary of State also hosts a 2-day annual elections conference to combine specific training on election duties with other professional development sessions. In addition, Maine now requires that all municipal clerks and registrars attend at least one of these training programs during each two-year election cycle.

All of Maine's efforts to improve the accessibility and consistency of the State's voter registration and election processes have increased voter confidence in Maine's electoral process and likewise have increased voter participation dramatically in the last 30 years. In the Presidential Election of 1972, Maine's turnout was twenty-first in the nation. In the Presidential Elections of 1992 and 1996, Maine led the nation in voter turnout, and in 2000, Maine's turnout was second in the nation.

The Future of Maine's Elections

Maine, through the efforts of the Secretary of State, the Legislature, advocacy groups and other concerned citizens, has consistently updated its laws and procedures to enhance the integrity of the election process and increase citizen participation in democracy, and will continue to do so. HAVA bolsters those efforts by providing Maine with an unprecedented level of federal resources to make substantial election infrastructure improvements and technological advances. HAVA also mandates Maine to meet certain requirements. Full funding of HAVA will ensure that Maine meets these requirements.

This State Plan outlines Maine's approach to implementing HAVA. It does not attempt to address every detail of implementation, but provides a basic framework and budget for achieving compliance. Importantly, Maine recognizes that the requirements contained in HAVA are minimum requirements. This plan is not intended to prevent Maine from exceeding these minimum requirements.

State Plan Required Elements (HAVA §254)

1. Title III Requirements and Other Activities

How the State will use the requirements payment to meet the requirements of title III, and, if applicable under section 251(b)(2), to carry out other activities to improve the administration of elections. -- HAVA §254 (a)(1)

1.A §301(a), Voting Systems Standards Requirements

Deadline for Compliance: January 1, 2006; no waiver permitted.

Maine has 503 municipal jurisdictions and 627 precincts where voting is conducted for federal and state elections. The State approves the voting systems that may be purchased by municipalities and prepares all ballots in a consistent format for these voting systems. Two categories of voting systems are currently used in Maine. Hand counted paper ballots are used by 394 municipalities, and optical scan ballots are used by 109 municipalities. (Optical scan ballots are also paper based, but are machine counted using precinct tabulators.)

Hand Counted Paper Ballots

Paper Ballot	394 municipalities*	401 voting precincts

**includes unorganized townships that conduct their own voting*

Optical Scan Ballot

Accu-Vote ES-2000	36 municipalities	72 voting precincts
Optech IIIP	47 municipalities	69 voting precincts
Optech IIIP Eagle	24 municipalities	83 voting precincts
ES&S Model 100	2 municipalities	2 voting precincts

Verification and Correction of Ballots before Casting
Since all voting systems in Maine currently use a paper ballot, voters can verify their vote selections in a private and independent manner before their ballots are cast and counted. Voters are permitted to change a selection or otherwise correct any error on their ballots by returning their spoiled ballot to the election clerk and requesting a replacement ballot. (Voters may obtain up to 2 replacement ballots, or a total of 3 ballots.)

All optical scan voting systems in use in Maine are capable of being programmed to notify voters of overvotes (multiple votes cast for a candidate or question) and return those ballots to the voter for an opportunity to correct the error using a replacement ballot. The Secretary of State (in conjunction with municipal election officials and the vendors charged with programming or maintaining these systems) will implement this programming change by January 1, 2006.

The Secretary of State already has an extensive voter education program for each voting system currently in use. The Secretary of State provides instructions on how a voter can correct an error through the use of a replacement ballot and will enhance these instructions to describe the effect of an overvote.

Audit
The paper ballots and paper based optical scan ballots used in Maine elections serve as the paper record required for manual audits. Maine already utilizes a manual recount system for all types of ballots, satisfying the manual audit capacity requirement.

Disability Access
Maine will not have enough resources, even with the federal funding, to replace all the existing voting systems with accessible units. However, Maine will improve its accessibility and satisfy this requirement by purchasing at least one direct recording electronic voting system (DRE), or other system equipped for individuals with disabilities, per voting precinct. Although past practice by the State of Maine has been for the Secretary of State to approve voting systems that may be purchased by municipalities, the Secretary of State will go through a process to select the DRE's, or other compliant systems, and undertake a statewide purchase of those systems by January 1, 2006. The Secretary of State will explore joint purchasing agreements with other states. The purchase may include ongoing programming and maintenance costs associated with the selected systems.

The process for selecting any systems will include input from municipal election officials, members of various disability communities, senior citizen representatives, and other interested parties. The Secretary of State will consider, among other functionalities, the requirements of Maine's challenged ballot procedure, alternative language capabilities, and flexibility in programming for various election formats. The Secretary of State will ensure that the systems to be purchased meet all federal requirements.

The Secretary of State will incorporate extensive voter education and poll worker training for the new systems into its existing education and outreach programs prior to the first election in which they are used.

Alternative Language Accessibility
Although no jurisdiction in Maine is subject to the alternative language accessibility requirements of Section 203 of the Voting Rights Act of 1965, voting systems approved in the future will be required to be capable of providing alternative language accessibility should it become necessary. In addition, the Secretary of State will monitor language trends throughout its various voting jurisdictions and will consider voluntary and targeted measures to increase citizen participation and access in those jurisdictions with significant populations of citizens who use languages other than English as their primary language.

Error Rates
Current voting systems used in Maine comply with the error rate standards established under section 3.2.1 of the voting system standards issued by the Federal Election Commission and in effect at the time that HAVA was enacted.

The following standard will apply to any new voting systems purchased by the State or approved by the Secretary of State for municipal purchase, including DRE's: For each processing function, the voting system shall achieve a target error rate of no more than 1 in 10 million ballot positions, with a maximum acceptable error rate in the test process of 1 in 500,000 ballot positions.

Requirement	State of Maine's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
SEC. 301. VOTING SYSTEMS STANDARDS		
(a) REQUIREMENTS- Each voting system used in an election for Federal office shall meet the following requirements		
(1) IN GENERAL-		
(A) Except as provided in subparagraph (B), the voting system (including any lever voting system, optical scanning voting system, or direct recording electronic system) shall		
(i) permit the voter to verify (in a private and independent manner) the votes selected by the voter on the ballot before the ballot is cast and counted;	Meets. *Maine uses paper ballots and optical scan ballots. Optical scan ballots are paper based and can be verified before casting.*	
(ii) provide the voter with the opportunity (in a private and independent manner) to change the ballot or correct any error before the ballot is cast and counted (including the opportunity to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error); and	Meets. *Maine utilizes a replacement ballot process. Voters may obtain up to 3 ballots.*	
(iii) if the voter selects votes for more than one candidate for a single office-- (I) notify the voter that the voter has selected more than one candidate for a single office on the ballot; (II) notify the voter before the ballot is cast and counted of the effect of casting multiple votes for the office; and (III) provide the voter with the opportunity to correct the ballot before the ballot is cast and counted.	Does not meet.	The State will ensure that machines are programmed to return any overvoted ballots to the voters; will instruct municipal election officials on how to handle these ballots; and, will prepare instructions for voters about overvotes and how to correct them.
(B) A State or jurisdiction that uses a paper ballot voting system, a punch card voting system, or a central count voting system (including mail-in absentee ballots and mail-in ballots), may meet the requirements of subparagraph (A)(iii) by		

All systems submitted for certification in Maine will be required to provide documentation by the Independent Testing Authority, indicating that their systems comply with these error rates.

Uniform Definition of what Constitutes a Vote

Maine has a uniform state law requiring a determination of voter intent and has a uniform central recount procedure.

Maine statute requires that election officials must count each vote based on voter intent, even when the ballot is marked in a way that differs from the instructions. Before every election, the Secretary of State provides each municipality with uniform instructions for counting ballots, including instructions on counting specific types of ballots such as challenged ballots, invalid vote ballots, defective ballots and void ballots. In addition, the Secretary of State provides municipal election officials with training on how to determine voter intent. This training is based on case law and includes examples of common ballot mis-markings that still show voter intent.

Further enhancing the uniform application of voter intent at the municipal level is the Secretary of State's exclusive, central authority to conduct recounts. All recounts follow a well-established, uniform recount procedure, which includes instructions on counting certain types of ballots and determining voter intent.

Although the framework for determining voter intent is uniform, the Secretary of State will work in consultation with municipal election officials and other stakeholders to further clarify and define voter intent for each category of voting system used in Maine. The Secretary of State will work to incorporate these definitions into either statute or rule by January 1, 2006.

Requirement	State of Maine's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(i) establishing a voter education program specific to that voting system that notifies each voter of the effect of casting multiple votes for an office; and	Partially meets. *Maine has a voter education program specific to each voting system, but must add information about casting multiple votes for an office.*	Maine will incorporate information on the mechanics of voting (such as the effect of overvoting) into our voter education program (voting brochures and posters) and the ballot instructions.
(ii) providing the voter with instructions on how to correct the ballot before it is cast and counted (including instructions on how to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error)	Partially Meets. *Maine posts one instruction poster in each voting booth and two are posted outside the guardrails at each polling precinct.*	Maine will add the specifics about an overvote to the instruction posters or create a separate poster.
(C) The voting system shall ensure that any notification required under this paragraph preserves the privacy of the voter and the confidentiality of the ballot.	Meets. *Voting systems notification is done either by verbal instruction or by tape diagnostics.*	
(2) AUDIT CAPACITY-		
(A) IN GENERAL- The voting system shall produce a record with an audit capacity for such system.	Meets. *All systems currently have a paper ballot.*	
(B) MANUAL AUDIT CAPACITY-		
(i) The voting system shall produce a permanent paper record with a manual audit capacity for such system.	Meets. *All systems currently have a paper ballot.*	
(ii) The voting system shall provide the voter with an opportunity to change the ballot or correct any error before the permanent paper record is produced.	Meets. *Maine utilizes a replacement ballot process. Voters may obtain up to 3 ballots.*	
(iii) The paper record produced under subparagraph (A) shall be available as an official record for any recount conducted with respect to any election in which the system is used.	Meets. *By policy, all recounts, even of optical scan ballots, are manually hand-counted.*	
(3) ACCESSIBILITY FOR INDIVIDUALS WITH DISABILITIES- The voting system shall-		

Requirement	State of Maine's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(A) be accessible for individuals with disabilities, including nonvisual accessibility for the blind and visually impaired, in a manner that provides the same opportunity for access and participation (including privacy and independence) as for other voters;	Does not meet.	Maine will satisfy this requirement through the use of at least one DRE, or other voting system equipped for individuals with disabilities, per polling place as provided in paragraph (3)(B).
(B) satisfy the requirement of subparagraph (A) through the use of at least one direct recording electronic voting system or other voting system equipped for individuals with disabilities at each polling place; and	Does not meet.	Maine will use Title II funds to purchase one DRE, or other voting system equipped for individuals with disabilities, for each polling place by January 1, 2006.
(C) if purchased with funds made available under title II on or after January 1, 2007, meet the voting system standards for disability access (as outlined in this paragraph).	N/A	
(4) ALTERNATIVE LANGUAGE ACCESSIBILITY- The voting system shall provide alternative language accessibility pursuant to the requirements of section 203 of the Voting Rights Act of 1965 (42 U.S.C. 1973aa-1a).	N/A *No jurisdictions in Maine are subject to section 203 of the Voting Rights Act.*	
(5) ERROR RATES- The error rate of the voting system in counting ballots (determined by taking into account only those errors which are attributable to the voting system and not attributable to an act of the voter) shall comply with the error rate standards established under section 3.2.1 of the voting systems standards issued by the Federal Election Commission which are in effect on the date of the enactment of this Act.	Meets.	
(6) UNIFORM DEFINITION OF WHAT CONSTITUTES A VOTE- Each State shall adopt uniform and nondiscriminatory standards that define what constitutes a vote and what will be counted as a vote for each category of voting system used in the State.	Partially meets. *Maine has a uniform state law requiring a determination of voter intent and has a uniform central recount procedure.*	Maine will further clarify and define voter intent for each category of voting system and will incorporate these definitions into either statute or rule by January 1, 2006.

1.B §302, Provisional Voting and Voting Information Requirements

Deadline for Compliance: January 1, 2004; no waiver permitted.

Provisional Voting Requirements

Maine's challenged ballot law (21-A M.R.S.A. §673) in combination with its Election Day registration law (21-A M.R.S.A. §122), meet the provisional voting requirements of HAVA. Maine law permits in-person voter registration on Election Day, and there is no length of residency requirement to qualify as a voter. Under current Maine law, any person whose name is not on the voting list on Election Day may show proof of identity and residency to the registrar and must then be allowed to vote. A voter whose name was removed from the voting list in error, may reinstate the registration at the polls, and be permitted to vote. A new voter who declares residency on Election Day, but does not have satisfactory proof of such residency, must be allowed to vote a challenged ballot. Maine's challenged ballot process achieves the required results of provisional voting.

Under Maine's challenged ballot law, an election official or any voter of a municipality may challenge the right of another person to vote in that municipality. A challenge of an in-person voter must be made to the election warden before that voter enters a voting booth. A challenge of an absentee voter must be made at the time that absentee ballot is being processed by the municipal clerk or election official, and before the ballot is placed in the ballot box or tabulating machine.

There are certain requirements that must be met for a challenge to be processed by the warden. If these requirements are met, the warden completes a challenge certificate, containing: the challenged voter's affirmation of the voter's qualifications and registration status; the signature and identifying information from the challenger, including the reason that the voter is being challenged; and the signature of the warden. The warden writes a unique number on the ballot as well as on the challenge certificate. This number is known only to the warden and the voter. The warden returns the ballot to the voter and the voter proceeds to vote in the usual manner. The warden seals the challenge certificate in an envelope, which is secured with the voted ballots and other materials at the end of Election Day. The warden also creates a public list containing the challenged voter's name, the name of the challenger and the reason for the challenge.

Challenged ballots are counted in the same manner as regular ballots on election night. The validity of a challenge is not reviewed unless a recount occurs, it is determined that there are a sufficient number of challenged ballots to affect the outcome of the election, and the recount remains disputed. In that event, the appropriate appeal authority promptly reviews any challenged ballots as well as ballots that were disputed during the recount, and makes a determination as to whether these ballots will be removed from the count.

Instructions for municipal election officials

The Secretary of State will provide municipal election officials with an informational sheet on the challenged ballot process that the election officials at each voting place can give to each challenged voter. The information sheet will detail how an individual can determine the status of a challenged vote. The Secretary of State will provide generic information on its web site that confirms that all challenged ballots have been counted, and provide an email address or

other electronic system where individual voters can request additional information. If there is a disputed recount, and any challenged voters are deemed not to be eligible, the Secretary of State will give notice to the individual voters affected.

Voting Information Requirements

For many years, Maine has had laws requiring the posting of voting information at the polls. In recent years, the Secretary of State has worked with adult literacy experts to produce all election information in a format that is most easily understood by voters. In addition, the Secretary of State is continually providing new and improved information and instructions for voters and election officials.

The Secretary of State provides certain instructional materials to each municipality for posting in each voting place. These materials include:

- A Notice of Election that is posted in a conspicuous place in each voting district, announcing the date and polling hours of the election, the location of the polling place in that district, and the offices and questions that will appear on the ballot. This notice must be posted at least 7 days prior to the election along with a sample ballot of each official ballot being used at that voting place.
- Instruction posters inform voters how to properly mark their ballot, how to cast a write-in vote, how to obtain assistance and what to do if they make an error. These posters are placed in each voting booth, and two additional instruction posters are located at the entrance to the voting place on Election Day. An enlarged instruction poster is placed in one of the voting booths in each precinct, that is further equipped with a magnifying device and an adjustable light.
- Two sample ballots of each official ballot being used at a voting place are posted at the entrance to that voting place on Election Day.
- A penalty poster that describes certain election law violations is posted at the entrance to each voting place on Election Day. In addition, this poster must be permanently posted at each voter registration location.
- A voting rights poster ("Your Right to Vote in Maine") is posted at the entrance to each voting place on Election Day. In addition, this poster must be permanently posted at each voter registration location.

Maine requires the posting of other election materials at the polls, including a certified copy of the voter registration list, a list of the persons appointed to be election clerks and information pertaining to the issues on the referendum ballot.

The Secretary of State will develop instructions on casting a challenged ballot and the requirements for mail-in registrants and first time voters described in section 303(b).

Requirement	State of Maine's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
SEC. 302. PROVISIONAL VOTING AND VOTING INFORMATION REQUIREMENTS.		
(a) PROVISIONAL VOTING REQUIREMENTS- If an individual declares that such individual is a registered voter in the jurisdiction in which the individual desires to vote and that the individual is eligible to vote in an election for Federal office, but the name of the individual does not appear on the official list of eligible voters for the polling place or an election official asserts that the individual is not eligible to vote, such individual shall be permitted to cast a provisional ballot as follows:	Maine law permits in-person voter registration on Election Day, and there is no length of residency requirement to qualify as a voter. Under current Maine law, any person whose name is not on the voting list on Election Day may show proof of identity and residency to register and must then be allowed to vote. A voter whose name was removed from the voting list in error may reinstate the registration at the polls, and be permitted to vote. A new voter who declares residency on Election Day, but does not have satisfactory proof of such residency, must be allowed to vote a challenged ballot. Maine's challenged ballot process achieves the required results of provisional voting.	
(1) An election official at the polling place shall notify the individual that the individual may cast a provisional ballot in that election.	Meets.	
(2) The individual shall be permitted to cast a provisional ballot at that polling place upon the execution of a written affirmation by the individual before an election official at the polling place stating that the individual is--		
(A) a registered voter in the jurisdiction in which the individual desires to vote; and	Meets.	
(B) eligible to vote in that election.	Meets.	

Requirement	State of Maine's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(3) An election official at the polling place shall transmit the ballot cast by the individual or the voter information contained in the written affirmation executed by the individual under paragraph (2) to an appropriate State or local election official for prompt verification under paragraph (4).	Meets. *Information regarding challenged voters is verified promptly, as necessary, as part of the appeal of a disputed recount.*	
(4) If the appropriate State or local election official to whom the ballot or voter information is transmitted under paragraph (3) determines that the individual is eligible under State law to vote, the individual's provisional ballot shall be counted as a vote in that election in accordance with State law.	Meets. *A challenged ballot is counted on Election Day and at any recount, unless the number of challenges is sufficient to affect the outcome of the election, when the recount becomes disputed. During an appeal of a disputed recount, if a challenged voter is determined not to be eligible by the appeal authority, then the challenged ballot is removed from the count.*	
(5)(A) At the time that an individual casts a provisional ballot, the appropriate State or local election official shall give the individual written information that states that any individual who casts a provisional ballot will be able to ascertain under the system established under subparagraph (B) whether the vote was counted, and, if the vote was not counted, the reason that the vote was not counted.	Does not meet.	Beginning January 1, 2004, Maine will provide an informational sheet on the challenged ballot process that the election officials at each voting place can give to each challenged voter.
(B) The appropriate State or local election official shall establish a free access system (such as a toll-free telephone number or an Internet website) that any individual who casts a provisional ballot may access to discover whether the vote of that individual was counted, and, if the vote was not counted, the reason that the vote was not counted.	Does not meet.	Beginning January 1, 2004, Maine will provide generic information on the Secretary of State's web site that confirms that all challenged ballots have been counted, and will provide an email address where individual voters can request additional information. If there is a disputed recount, and any challenged voters are deemed not to be eligible, Maine will give notice to individual voters affected.

Requirement	State of Maine's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
States described in section 4(b) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-2(b)) may meet the requirements of this subsection using voter registration procedures established under applicable State law. The appropriate State or local official shall establish and maintain reasonable procedures necessary to protect the security, confidentiality, and integrity of personal information collected, stored, or otherwise used by the free access system established under paragraph (5)(B). Access to information about an individual provisional ballot shall be restricted to the individual who cast the ballot.		
(b) VOTING INFORMATION REQUIREMENTS-		
(1) PUBLIC POSTING ON ELECTION DAY- The appropriate State or local election official shall cause voting information to be publicly posted at each polling place on the day of each election for Federal office.	Meets. *Maine law currently requires the posting of certain voting information at each polling place on Election Day.*	
(2) VOTING INFORMATION DEFINED- In this section, the term 'voting information' means--		
(A) a sample version of the ballot that will be used for that election;	Meets. *21-A MRSA §651 requires the posting of 2 sets of sample ballots of each type being used at each voting place to be posted in that voting place.*	
(B) information regarding the date of the election and the hours during which polling places will be open;	Meets. *21-A MRSA §622-A requires the posting of a Notice of Election in each voting district, that provides the date of the election and the polling hours as well as other information specific to that election.*	
(C) instructions on how to vote, including how to cast a vote and how to cast a provisional ballot;	Partially meets. *21-A MRSA §605 and §651 requires the posting of one Instruction Poster inside each voting booth and two additional Instruction Posters at each voting place (along with the Sample Ballots above).*	Maine will either add instructions on casting a challenged ballot to the Instruction Poster, or will develop separate instructions on this issue to be posted at each voting place.

Requirement	State of Maine's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(D) instructions for mail-in registrants and first-time voters under section 303(b);	Does not meet.	Maine will develop instructional material regarding mail-in registrants and first-time voters to be posted at each voting place.
(E) general information on voting rights under applicable Federal and State laws, including information on the right of an individual to cast a provisional ballot and instructions on how to contact the appropriate officials if these rights are alleged to have been violated; and	Meets. *21-A MRSA §605 requires the posting of a Voter Rights Poster, that informs voters of their rights, including the right to vote a challenged ballot, at the entrances to each polling place and voter registration place.*	
(F) general information on Federal and State laws regarding prohibitions on acts of fraud and misrepresentation.	Meets. *21-A MRSA §605 requires the posting of a Penalty Poster, that informs voters of the penalties for election law violations, at the entrances to each polling place and voter registration place.*	
(c) VOTERS WHO VOTE AFTER THE POLLS CLOSE- Any individual who votes in an election for Federal office as a result of a Federal or State court order or any other order extending the time established for closing the polls by a State law in effect 10 days before the date of that election may only vote in that election by casting a provisional ballot under subsection (a). Any such ballot cast under the preceding sentence shall be separated and held apart from other provisional ballots cast by those not affected by the order.	Meets. *Maine has adopted of P.L. 2003 c.407 – "An Act to Comply With Federal Election Laws Including the Help America Vote Act of 2002", effective June 3, 2003. The law brings Maine into compliance with this requirement.*	

1.C §303, Computerized Statewide Voter Registration List Requirements and Requirements for Voters Who Register by Mail

Deadline for Compliance: January 1, 2004; State can submit a certification stating "good cause" that will move the deadline for §303(a) compliance to January 1, 2006.

The most significant challenge Maine faces in meeting the requirements of the Help America Vote Act is the development, implementation and management of a computerized statewide voter registration list as described in HAVA §303(a). Due to the decentralized nature of Maine's registration process, an enormous collaborative effort of the State and municipalities will be necessary to come into compliance with this particular requirement. The State will also need to invest the most significant portion of the funds made available under HAVA to ensure the success of this effort.

The State of Maine, like most other states, has at the foundation of its elections process a system for registering those citizens who are eligible to vote in local, state, and federal elections. As referenced earlier in this plan, Maine has consistently sought to ensure that the registration process is open, easy, and accessible to all eligible citizens, while maintaining the integrity of our elections. To prevent voter registration from becoming a barrier to citizen participation in our democracy, Maine has, for the past thirty years, allowed mail-in voter registration and in-person Election Day voter registration. Maine implemented voter registration at motor vehicle branches five years prior to implementation of the National Voter Registration Act. Maine law also permits voters, whose registration qualifications are questioned, to cast a challenged ballot.

Although Maine registration laws are uniform throughout the State, individual jurisdictions are responsible for the actual collection of registration data and maintenance of official voter registration lists. The Help America Vote Act provides Maine with a challenging mandate and an opportunity to enhance the citizen access, integrity, and administrative efficiency of our registration process by developing a computerized statewide voter registration list.

Currently, each municipality's registrar of voters is responsible for maintaining a list of residents who are eligible and registered to vote in elections. These official voter registration lists are maintained separately by 503 municipal jurisdictions, in a variety of disparate formats, including handwritten, typed, and computerized lists. The number of citizens registered to vote ranges from 2 in Maine's smallest jurisdiction to 50,799 in Maine's largest city. Nearly 400 municipalities have fewer than 2,000 registered voters.

The development of a computerized statewide voter registration list as described in HAVA will be a significant undertaking in Maine due to the State's current decentralized, municipal level voter registration process, and the rural nature of our state. This project will involve the acquisition of the technological capabilities for the State to administer the system, the integration of existing and varying municipal data, the development of the necessary infrastructural capabilities throughout the State, and extensive training for state and local election officials. A substantial portion of federal funds made available to the State of Maine under HAVA will be necessary for Maine to develop a computerized statewide voter registration system.

Development and Implementation of List

In anticipation of the federal requirement to develop a computerized statewide voter registration list, and in recognition of the benefits of developing such a system, Maine enacted enabling legislation to facilitate the list's development. Maine Public Laws 2001, Chapter 637 - *An Act to Establish a Centralized Voter Registration System for the State* (21-A MRSA §§191-195), sets forth the general process Maine will use to implement this requirement. The state law established a Centralized Voter Registration Advisory Committee, consisting of various stakeholders, to advise the Secretary of State with respect to planning for the centralized voter registration system. The law also creates a pilot program and calls for a staged implementation plan to bring the entire state online.

The Secretary of State has convened the Advisory Committee and is in the process of conducting a comprehensive needs assessment, defining the system parameters, and drafting a request for proposals (RFP). During this process, in addition to consulting with the members of the Advisory Committee, the Secretary of State may also consult with municipal election officials, state agencies, and other states to define the functional requirements of a computerized statewide voter registration list. The Secretary of State will also take necessary steps to ensure that the list will be coordinated with other agency data, specifically including data from the Bureau of Motor Vehicles and the Office of Vital Statistics.

The State may also consider hiring an outside consultant to assist with the needs assessment and drafting of a request for proposals (RFP) to build and implement the system. The RFP will incorporate each of the voter registration list requirements set out in HAVA. Maine's successful implementation of a computerized statewide voter registration list will require the combined efforts of state election officials, municipal election officials, other state agencies and any contracted vendor or vendors. The Secretary of State will coordinate these efforts and manage the implementation.

Mail-in Registrations

The Secretary of State and the State Plan Committee have reviewed Maine's registration procedures and have made modifications to those procedures, where necessary, to bring Maine into compliance with the requirements for voters who register by mail. Maine has established procedures to obtain the required ID for first time mail-in registrations received after January 1, 2003. The procedures include collecting required information prior to and on Election Day. The Secretary of State has also updated the voter registration card, mail-in voter registration acknowledgement procedures and forms to advise mail-in registrants of the HAVA requirements and to notify those with incomplete applications how they may complete their registrations. Maine's challenged ballot and Election Day voter registration laws will ensure that voters who fail to provide the required ID by the first federal election in which they vote will still be eligible for fail-safe voting in person or by mail.

Upon implementation of a computerized statewide voter registration list, Maine will be capable of matching the registrants' driver license numbers or the last 4 digits of their social security numbers with existing state identification records to confirm the ID of prospective registrants and to satisfy the ID requirements.

Requirement	State of Maine's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
SEC. 303. COMPUTERIZED STATEWIDE VOTER REGISTRATION LIST REQUIREMENTS AND REQUIREMENTS FOR VOTERS WHO REGISTER BY MAIL.		
(a) COMPUTERIZED STATEWIDE VOTER REGISTRATION LIST REQUIREMENTS-		
(1) IMPLEMENTATION-		
(A) IN GENERAL- Except as provided in subparagraph (B), each State, acting through the chief state election official, shall implement, in a uniform and nondiscriminatory manner, a single, uniform, official, centralized, interactive computerized statewide voter registration list defined, maintained, and administered at the State level that contains the name and registration information of every legally registered voter in the State and assigns a unique identifier to each legally registered voter in the State (in this subsection referred to as the computerized list), and includes the following:	Does Not Meet. *In 2002, the Secretary of State secured passage of state enabling legislation to implement a computerized statewide voter registration list (PL 2001, c.637). Pursuant to this law, an advisory committee was named, and has been convened in 2003 to begin to review system parameters and draft an RFP.*	The Secretary of State anticipates the need to request a waiver of the 1/1/2004 deadline, and to evidence progress toward completing implementation by 1/1/2006. The State will develop and issue an RFP. Maine will implement the system first as a pilot program, and then will deploy the system in stages.
(i) The computerized list shall serve as the single system for storing and managing the official list of registered voters throughout the State.	Does Not Meet.	The RFP will include this requirement.
(ii) The computerized list contains the name and registration information of every legally registered voter in the State.	Does Not Meet.	The RFP will include this requirement.
(iii) Under the computerized list, a unique identifier is assigned to each legally registered voter in the State.	Does Not Meet.	The RFP will include this requirement.

Voter Registration Goals

Maine, through its implementation of a computerized statewide voter registration list and its implementation of the requirements for those who register by mail, will seek enhanced access and ease of registration for voters, accuracy and integrity of voter registration information, administrative efficiencies, uniformity, and ease of operation by municipalities.

Requirement	State of Maine's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(iv) The computerized list shall be coordinated with other agency databases within the State.	Does not meet.	The RFP will include this requirement. The Secretary of State will coordinate the list with the databases of the Bureau of Motor Vehicles and the Office of Vital Statistics, and may draft rules governing this procedure.
(v) Any election official in the State, including any local election official, may obtain immediate electronic access to the information contained in the computerized list.	Does not meet.	The RFP will include this requirement.
(vi) All voter registration information obtained by any local election official in the State shall be electronically entered into the computerized list on an expedited basis at the time the information is provided to the local official.	Does not meet.	Maine will address this requirement by policy or by rule.
(vii) The chief state election official shall provide such support as may be required so that local election officials are able to enter information as described in clause (vi).	Does not meet.	Maine will address this requirement by policy or by rule.
(viii) The computerized list shall serve as the official voter registration list for the conduct of all elections for Federal office in the State.	Does not meet.	Maine will address this requirement by policy or by rule.
(B) EXCEPTION- The requirement under subparagraph (A) shall not apply to a State in which, under a State law in effect continuously on and after the date of the enactment of this Act, there is no voter registration requirement for individuals in the State with respect to elections for Federal office.		
(2) COMPUTERIZED LIST MAINTENANCE-		
(A) IN GENERAL- The appropriate State or local election official shall perform list maintenance with respect to the computerized list on a regular basis as follows:		

Requirement	State of Maine's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(i) If an individual is to be removed from the computerized list, such individual shall be removed in accordance with the provisions of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg et seq.), including subsections (a)(4), (c)(2), (d), and (e) of section 8 of such Act (42 U.S.C. 1973gg-6).	Partially meets. *Maine currently meets the requirements of NVRA for voter list maintenance at the local level.*	The Secretary of State will explore statewide methods for list maintenance and will update procedures to be compatible with the new computerized list.
(ii) For purposes of removing names of ineligible voters from the official list of eligible voters-- (I) under section 8(a)(3)(B) of such Act (42 U.S.C. 1973gg-6(a)(3)(B)), the State shall coordinate the computerized list with State agency records on felony status; and (II) by reason of the death of the registrant under section 8(a)(4)(A) of such Act (42 U.S.C. 1973gg-6(a)(4)(A)), the State shall coordinate the computerized list with State agency records on death.	Does not meet. *Maine does not prohibit felons from voting, so it will not be necessary to coordinate the computerized list with State agency records on felony status.*	The Secretary of State will coordinate the list with the Office of Vital Statistics and will require this functionality in the RFP.
(iii) Notwithstanding the preceding provisions of this subparagraph, if a State is described in section 4(b) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-2(b)), that State shall remove the names of ineligible voters from the computerized list in accordance with State law.	N/A	
(B) CONDUCT- The list maintenance performed under subparagraph (A) shall be conducted in a manner that ensures that--		
(i) the name of each registered voter appears in the computerized list;	Does not meet.	Maine will include this requirement in the RFP.
(ii) only voters who are not registered or who are not eligible to vote are removed from the computerized list; and	Partially meets. *Maine currently meets this requirement at the municipal level.*	Maine will include this requirement in the RFP and will address in policy or rules.
(iii) duplicate names are eliminated from the computerized list.	Does not meet.	Maine will include this requirement in the RFP.
(3) TECHNOLOGICAL SECURITY OF COMPUTERIZED LIST- The appropriate State or local official shall provide adequate technological security measures to prevent the unauthorized access to the computerized list established under this section.	Does not meet.	Maine will include this requirement in the RFP.

Requirement	State of Maine's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(4) MINIMUM STANDARD FOR ACCURACY OF STATE VOTER REGISTRATION RECORDS- The State election system shall include provisions to ensure that voter registration records in the State are accurate and are updated regularly, including the following:		
(A) A system of file maintenance that makes a reasonable effort to remove registrants who are ineligible to vote from the official list of eligible voters. Under such system, consistent with the National Voter Registration Act of 1993 (42 U.S.C. 1973gg et seq.), registrants who have not responded to a notice and who have not voted in 2 consecutive general elections for Federal office shall be removed from the official list of eligible voters, except that no registrant may be removed solely by reason of a failure to vote.	Meets. *Maine currently meets this requirement at the municipal level.*	The Secretary of State will monitor implementation of the computerized list and ensure ongoing compliance.
(B) Safeguards to ensure that eligible voters are not removed in error from the official list of eligible voters.	Meets. *Maine currently meets this requirement at the municipal level. Maine's Election Day registration law is an additional safeguard for voters.*	The Secretary of State will monitor implementation of the computerized list and ensure ongoing compliance.
(5) VERIFICATION OF VOTER REGISTRATION INFORMATION-		
(A) REQUIRING PROVISION OF CERTAIN INFORMATION BY APPLICANTS-		
(i) IN GENERAL- Except as provided in clause (ii), notwithstanding any other provision of law, an application for voter registration for an election for Federal office may not be accepted or processed by a State unless the application includes-- (I) in the case of an applicant who has been issued a current and valid driver's license, the applicant's driver's license number; or (II) in the case of any other applicant (other than an applicant to whom clause (ii) applies), the last 4 digits of the applicant's social security number.	Does not meet.	Maine will meet this requirement upon implementation of the computerized statewide voter registration system.

Requirement	State of Maine's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(ii) SPECIAL RULE FOR APPLICANTS WITHOUT DRIVER'S LICENSE OR SOCIAL SECURITY NUMBER- If an applicant for voter registration for an election for Federal office has not been issued a current and valid driver's license or a social security number, the State shall assign the applicant a number which will serve to identify the applicant for voter registration purposes. To the extent that the State has a computerized list in effect under this subsection and the list assigns unique identifying numbers to registrants, the number assigned under this clause shall be the unique identifying number assigned under the list.	Does not meet.	Maine will meet this requirement upon implementation of the computerized statewide voter registration system.
(iii) DETERMINATION OF VALIDITY OF NUMBERS PROVIDED- The State shall determine whether the information provided by an individual is sufficient to meet the requirements of this subparagraph, in accordance with State law.	Does not meet.	Maine will consider what verification of voter identification is necessary and will adopt rules as appropriate.
(B) REQUIREMENTS FOR STATE OFFICIALS-		
(i) SHARING INFORMATION IN DATABASES- The chief state election official and the official responsible for the State motor vehicle authority of a State shall enter into an agreement to match information in the database of the statewide voter registration system with information in the database of the motor vehicle authority to the extent required to enable each such official to verify the accuracy of the information provided on applications for voter registration.	N/A. *The Secretary of State is both the chief state election official and the chief motor vehicle authority, so no agreement is required.*	Maine will ensure that the intended information sharing occurs.
(ii) AGREEMENTS WITH COMMISSIONER OF SOCIAL SECURITY- The official responsible for the State motor vehicle authority shall enter into an agreement with the Commissioner of Social Security under section 205(r)(8) of the Social Security Act (as added by subparagraph (C)).	Meets.	
(b) REQUIREMENTS FOR VOTERS WHO REGISTER BY MAIL-		
(1) IN GENERAL- Notwithstanding section 6(c) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4(c)) and subject to paragraph (3), a State shall, in a uniform and nondiscriminatory manner, require an individual to meet the requirements of paragraph (2) if--		
(A) the individual registered to vote in a jurisdiction by mail; and		

Requirement	State of Maine's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(B)(i) the individual has not previously voted in an election for Federal office in the State; or		
(ii) the individual has not previously voted in such an election in the jurisdiction and the jurisdiction is located in a State that does not have a computerized list that complies with the requirements of subsection (a).		
(2) REQUIREMENTS-		
(A) IN GENERAL- An individual meets the requirements of this paragraph if the individual--		
(i) in the case of an individual who votes in person-- (I) presents to the appropriate State or local election official a current and valid photo identification; or (II) presents to the appropriate State or local election official a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter;	Meets. *Maine has established procedures to collect the required information prior to and on Election Day. Voters without this information will be eligible for fail safe voting.*	
(ii) in the case of an individual who votes by mail, submits with the ballot-- (I) a copy of a current and valid photo identification; or (II) a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter	Meets. *Maine has established procedures to collect the required information prior to and on Election Day. Voters without this information will be eligible for fail safe voting.*	
(B) FAIL-SAFE VOTING-		
(i) IN PERSON- An individual who desires to vote in person, but who does not meet the requirements of subparagraph (A)(i), may cast a provisional ballot under section 302(a).	Meets. *An election official designates and counts that ballot as a challenged ballot, as established in Maine law, and as previously described in this plan.*	
(ii) BY MAIL- An individual who desires to vote by mail but who does not meet the requirements of subparagraph (A)(ii) may cast such a ballot by mail and the ballot shall be counted as a provisional ballot in accordance with section 302(a).	Meets. *An election official designates and counts that ballot as a challenged ballot, as established in Maine law, and as previously described in this plan.*	
(3) INAPPLICABILITY- Paragraph (1) shall not apply in the case of a person--		

Requirement	State of Maine's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(A) who registers to vote by mail under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) and submits as part of such registration either--		
(i) a copy of a current and valid photo identification; or	Meets. *Maine has updated mail-in voter registration acknowledgement procedures and forms, to advise mail-in registrants of HAVA requirements.*	
(ii) a copy of a current utility bill, bank statement, government check, paycheck, or government document that shows the name and address of the voter;	Meets. *Maine has updated mail-in voter registration acknowledgement procedures and forms, to advise mail-in registrants of HAVA requirements.*	
(B)(i) who registers to vote by mail under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) and submits with such registration either-- (I) a driver's license number; or (II) at least the last 4 digits of the individual's social security number; and	Does not meet.	The State will meet this requirement upon implementation of a statewide centralized voter registration program.
(ii) with respect to whom a State or local election official matches the information submitted under clause (i) with an existing State identification record bearing the same number, name and date of birth as provided in such registration; or	Does not meet.	The State will meet this requirement upon implementation of a statewide centralized voter registration program.
(C) who is--		
(i) entitled to vote by absentee ballot under the Uniformed and Overseas Citizens Absentee Voting Act (42 U.S.C. 1973ff-1 et seq.);	N/A	
(ii) provided the right to vote otherwise than in person under section 3(b)(2)(B)(ii) of the Voting Accessibility for the Elderly and Handicapped Act (42 U.S.C. 1973ee-1(b)(2)(B)(ii)); or	N/A	
(iii) entitled to vote otherwise than in person under any other Federal law.	N/A	
(4) CONTENTS OF MAIL-IN REGISTRATION FORM-		

Requirement	State of Maine's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(A) IN GENERAL- The mail voter registration form developed under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) shall include the following:		
(i) The question `Are you a citizen of the United States of America?' and boxes for the applicant to check to indicate whether the applicant is or is not a citizen of the United States.	Meets. *Maine has updated the voter registration application to comply with this requirement.*	
(ii) The question 'Will you be 18 years of age on or before Election Day?' and boxes for the applicant to check to indicate whether or not the applicant will be 18 years of age or older on Election Day.	Meets. *Maine has updated the voter registration application to comply with this requirement.*	
(iii) The statement 'If you checked 'no' in response to either of these questions, do not complete this form.'	Meets. *Maine has updated the voter registration application to comply with this requirement.*	
(iv) A statement informing the individual that if the form is submitted by mail and the individual is registering for the first time, the appropriate information required under this section must be submitted with the mail-in registration form in order to avoid the additional identification requirements upon voting for the first time.	Meets. *Maine has updated the voter registration application to comply with this requirement.*	
(B) INCOMPLETE FORMS- If an applicant for voter registration fails to answer the question included on the mail voter registration form pursuant to subparagraph (A)(i), the registrar shall notify the applicant of the failure and provide the applicant with an opportunity to complete the form in a timely manner to allow for the completion of the registration form prior to the next election for Federal office (subject to State law).	Meets. *Maine has established a notification system for incomplete registrations under NVRA to encompass information sought under 303(4)(A)(i).*	

1.D §304, Minimum Requirements

Maine understands that the requirements set forth in HAVA Title III are minimum requirements, and that the State may establish election technology and administration requirements that are more stringent. Any more stringent requirement that the State imposes will comply with all Title III requirements, as well as the laws described in HAVA §906.

1.E §305, Methods of Implementation Left to Discretion of State

Maine has chosen various means to comply with the requirements of HAVA Title III.

1.F §311, Adoption of Voluntary Guidance by Commission

Once the federal Election Assistance Commission (EAC) has issued its voluntary recommendations with respect to Title III, the State will consider that guidance in updating the State Plan. Maine will incorporate those recommendations deemed appropriate into any subsequent versions of its State Plan.

1.G §312, Process for Adoption

Maine will monitor the progress of the EAC on developing the Title III recommendations. If appropriate, the State will provide feedback during the public comment period after the recommendations are published in the Federal Register and participate in public hearings regarding the recommendations.

1.H HAVA §251(b)(2) – Other Activities

Maine does not currently plan to spend requirements payments for other activities as defined in HAVA §251(b)(2). However, Maine anticipates that it will not receive requirements payments in excess of the minimum payment amount applicable under HAVA §252(c), and thus any expenditure for such activities would be permissible.

2. Maine's Distribution of Requirements Payment

How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of --

(A) the criteria to be used to determine the eligibility of such units or entities for receiving the payment; and

(B) the methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8). -- HAVA §254 (a)(2)

2.A Eligibility of local units to receive the payment

Since the Secretary of State will bear the primary responsibility for achieving the Title III requirements, the State's implementation costs will consume most or all of the requirements payments. Therefore, Maine does not anticipate being able to grant money to municipal jurisdictions at this time.

However, should it become necessary and possible to disburse funds to municipal jurisdictions to implement the Title III requirements, Maine will establish the eligibility criteria for local units to obtain the funds based on the level of funding available, and the extent of the requirements to be met at the municipal level.

Note: The State will provide such support as is feasible and appropriate to the municipalities if they seek HAVA grants outside the scope of requirements payments.

2.B Performance measures for local units

If it becomes possible to disburse funds to municipalities to meet the Title III requirements, the Secretary of State will ensure that municipal expenditures are subject to the controls and review outlined in this section. Local units will be responsible to account for all expenditures, funding levels, program controls, and outcomes. The Secretary of State will monitor the performance of local units in three areas: financial controls, compliance with standards, and program results.

Financial Controls: The Secretary of State will develop and use standard financial reporting for all local initiatives funded by requirements payments.

Compliance with Standards: The Secretary of State will develop and use standard program management reporting for all local initiatives that are funded by requirements payments.

Program Results: The Secretary of State will develop key performance indicators (KPI) for each local initiative funded by requirements payments.

3. Voter Education, Election Official Education and Training, and Poll Worker Training

How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III. -- HAVA §254 (a)(3)

The State of Maine recognizes that voter education, election official education and training, and poll worker training are vital for the successful conduct of elections and the implementation of election reform measures. To ensure that voters, election officials and poll workers are comfortable with the processes and technologies utilized, Maine has developed extensive outreach, education, and training materials and procedures. These include:

- A mandatory training requirement for municipal election officials (the municipal clerk and the municipal registrar of voters must attend training in their area of election administration at least once every two years) [21-A M.R.S.A. §505(7-A) and §101(9)]
- Posters (Voting Instruction Posters, Voters' Rights Poster, etc.)
- Pamphlets (How to Register/Absentee Voting...)
- A Citizens Guide to the Referendum Election, describing the intent and content of citizen initiatives, referenda, and constitutional amendment questions
- Web site (www.maine.gov/sos/cec/elec.htm)
- Voter outreach efforts (Promote the Vote/Mock Elections)
- Existing municipal training and education programs (i.e. annual elections conference, regional training seminars, and various presentations before civic groups)

The Secretary of State will incorporate new processes (e.g. ID provisions, administrative complaint procedure) and technologies (e.g. DRE's, computerized statewide voter registration system) into existing education and outreach programs. The Secretary of State will also review existing programs with input from various stakeholders (possibly including educators and marketing experts) and where appropriate expand or establish new programs. These programs will include training developed specifically for poll workers.

In Maine, the Secretary of State has initiated several efforts aimed at involving youth in our democratic process. Specifically, Maine has organized statewide Student/Parent Mock Election programs, has developed election websites targeting youth, has joined with MTV to send Birthday/Registration cards to those turning 18 years old, and has worked with Promote the Vote committees to target advertisements and other outreach messages to young citizens. To strengthen these efforts, and to increase the pool of qualified poll workers, the Secretary of State will explore education and outreach possibilities made available through the Help America Vote College Program (HAVA Title V) and the Help America Vote Foundation (HAVA Title VI).

The Secretary of State is committed to ensuring that all citizens have full and complete access to Maine elections. Outreach and education designed and targeted for various disability communities are critical to achieving this goal. The Secretary of State will work with advocacy groups for individuals with disabilities to educate voters about election accessibility issues.

The Secretary of State will also explore ways to incorporate accessibility training and cultural sensitivity training into its election official and poll worker training programs and materials.

The Secretary of State may also consider voter outreach and education programs or materials designed for citizens who use languages other than English as their primary language.

4. Voting System Guidelines and Processes

How the State will adopt voting system guidelines and processes, which are consistent with the requirements of section 301. -- HAVA §254 (a) (4)

Voting systems currently utilized in the State of Maine are capable of being modified to comply with the provisions of Title III, except that disability accessibility requirements will require the addition of one DRE, or other voting system for individuals with disabilities, per voting precinct. Requirements in Title III will be met through a revision of Maine's election laws, rules, and procedures. In anticipation of some of the federal requirements, Maine has already adopted enabling legislation for the creation of a statewide centralized voter registration system and for mandatory training.

5. Maine's HAVA Fund Management

How the State will establish a fund described in subsection (b) for purposes of administering the State's activities under this part, including information on fund management. -- HAVA §254 (a) (5)

The Secretary of State, in conjunction with the Legislature, has established an Election Fund as described in HAVA §254 (b). This fund is kept separate and distinct from all other program funds under the Department of the Secretary of State. The Election Fund consists of a federal account (for the receipt and expenditure of federal funds) and a state dedicated account (for the receipt of and expenditure of state match funds). Each account in the fund is non-lapsing and will accrue interest earned.

The Secretary of State will work with the Department of Administrative and Financial Services, the Maine State Treasurer, and the Department of Audit to follow and enforce all mandated fiscal controls and policies.

6. Maine's HAVA Budget

The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on—

(A) the costs of the activities required to be carried out to meet the requirements of title III;

(B) the portion of the requirements payment which will be used to carry out activities to meet such requirements; and

(C) the portion of the requirements payment, which will be used to carry out other activities. -- HAVA §254 (a)(6)

Funding Assumptions

Maine used the following Federal and State funding assumptions, when developing its HAVA activities budget.

Maine's HAVA Funding Eligibility

	Federal Funding	Required State Match*	Based On
2003 Title I	$5,000,000	N/A	FY 2003 Federal Authorization
2003 Title II	$7,000,000	$368,421	FY 2003 Federal Authorization
2004 Title II	$5,000,000	$263,158	FY 2004 Federal Authorization
2005 Title II	$3,000,000	$157,895	FY 2005 Federal Authorization
Total Funds	**$20,000,000**	**$789,474**	

**The state match is equal to 5% of the total amount of federal and state funding made available for meeting the requirements of the law.*

The duration of the State's budget is based on HAVA deadlines and funding. Full funding of the HAVA authorizations is crucial to Maine's successful implementation of the law's requirements. Maine also anticipates that the ongoing costs of operating and maintaining the new DRE (or other voting system for individuals with disabilities) and the statewide voter registration list will be considerably higher than the State's maintenance of effort level. Therefore, Maine's maintenance and operation of HAVA compliant systems in years 2006 and beyond will require ongoing federal and state funding.

Proposed HAVA Activities Budget

Maine made the following additional assumptions in preparing the budget:

- Providing a precise estimate of the cost for the statewide voter registration list is not possible until Maine has completed its needs assessment and developed the RFP. Until that time the estimate is presented as a range.
- The State is planning to purchase a minimum of one DRE or other suitable voting system per voting precinct. Additional DRE's may be purchased if sufficient funds are available to meet all other HAVA requirements.

The State of Maine's 2003-2005 Help America Vote Act Implementation Budget

HAVA Requirements	Title I Funds	Title II Funds	State Match	Estimated Total Cost
Voting System Standards (sec. 301) (Purchase, Implementation, Administration and Maintenance of DRE's or other compliant voting systems)	$500,000	$4,500,000 to $9,500,000	$236,842 to $500,000	**$5,236,842 to $10,500,000**
Computerized Statewide Voter Registration List (sec. 303) (Purchase, Implementation, Administration and Maintenance)	$2,700,000	$5,500,000 to $10,500,000	$289,474 to $552,632	**$8,489,474 to $13,752,632**
Voter Education and Outreach and Election Official Training to Assist in Meeting Title III Requirements (sec. 254)	$750,000	$0	$0	**$750,000**
State Plan Creation and Management of HAVA Implementation (sec. 101 & 254)	$450,000	$0	$0	**$450,000**
Additional Compliance and Election Improvement Activities (sec. 101, 251, 402) (Enhancements to Election Management Systems and Processes, Administrative Complaint Procedures, Polling Place Accessibility)	$600,000	$0	$0	**$600,000**
All Activities	**$5,000,000**	**$15,000,000**	**$789,474**	**$20,789,474**

* Unspent federal funds will be set aside in the state Election Fund for payment of long-term costs of complying with HAVA.

7. Maintenance of Effort

How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000. -- HAVA §254 (a)(7)

In compliance with section 254 (a)(7) of HAVA, Maine will maintain the State's expenditures, on activities similar to those funded by the requirements payment, at the same level as expended on these activities in the State's Fiscal Year 2000, which covered the period from July 1, 1999, through June 30, 2000. Maine's total expenditures for these activities in FY00 were $429,299.

State and federal elections are administered through a partnership between the Secretary of State's Office (Division of Elections) and 503 municipal jurisdictions. The State produces and distributes the ballots, forms and instructional materials necessary for local jurisdictions to conduct the state and federal elections; provides oversight and education for municipal election officials in their administration of voter registration and election duties; and conducts recounts and tabulates the election results. Municipal election officials provide the equipment and staff for the polling places in their jurisdiction, including voting machines or automatic tabulating devices (if they do not wish to hand-count their ballots); as well as the staff and equipment to prepare and maintain the list of voters for their jurisdiction.

The State does not have a separate budgetary line or account for election administration. State election expenditures include personnel costs for the elections staff; general operating costs to maintain the office and support election administration during the fiscal year; and costs that have been specifically attributed to each election held during the election year. The election specific costs include the printing and distribution of ballots for the election; and the preparation and distribution of forms and instructional materials for municipalities to conduct the election.

The two year election cycle always includes a State Primary Election in the even fiscal year and the General Election in the odd fiscal year. The election specific costs of the State Primary and General Elections are similar. The dollar amount calculated for the FY00 maintenance of effort only includes the specific election costs for the June 2000 State Primary Election. Although in Fiscal Year 2000, Maine also conducted a Presidential Preference Primary and a State Referendum Election, the specific costs attributed to these elections is not included in the baseline maintenance of effort figure. The March 2000 Presidential Preference Primary costs were not included because the current Legislature is in the process of repealing this election. Since there will be no future expenditures for a preference primary election, Maine did not add these costs to its maintenance of effort calculation. The November 1999 State Referendum Election costs were also not included, because this election does not occur in each fiscal year.

Although Maine did not add the dollar amount of expenditures for these two elections to its maintenance of effort baseline figure, Maine will continue to expend state funds to support the election-specific costs, as described above, for any state or federal election held during any fiscal year. Maine will not expend requirements payments on these election-specific activities. Moreover, Maine will not include the amount of state funds spent to cover the specific costs of conducting elections other than the State Primary or General Election when it calculates the expenditures that go toward the future maintenance of effort amount.

8. HAVA Performance Goals and Measures

How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met. -- HAVA §254 (a)(8)

The Secretary of State will adopt performance goals and measures to determine the success of the State and municipalities in carrying out the elements of Maine's State Plan. Each element of the plan that requires "Actions Planned" to ensure Maine's compliance with HAVA, will be incorporated into the performance goals and measures. The Secretary of State will develop implementation schedules for each major project area outlined below, and will measure progress towards meeting the target dates established in each project schedule. Further, the Secretary of State will periodically monitor the implementation efforts by reviewing program results as measured through the use of key performance indicators (KPI) for each implementation step. The Secretary of State will also periodically review and update performance goals and measures as implementation steps are further developed.

Performance Deadlines and Responsibilities

HAVA Requirements	Responsible Official(s)	Deadline for Implementation
Voting System Standards (sec. 301) (Purchase, Implementation, Administration and Maintenance of DRE's or other compliant voting systems)	Secretary of State and municipal election officials	January 1, 2006
Computerized Statewide Voter Registration List (sec. 303) (Purchase, Implementation, Administration and Maintenance)	Secretary of State and municipal election officials	January 1, 2004 (January 1, 2006 with waiver)
Voter Education and Outreach & Election Official Training to Assist in Meeting Title III Requirements (sec. 254)	Secretary of State and municipal election officials	January 1, 2003 – January 1, 2006
State Plan Creation and Management of HAVA Implementation (sec. 101 & 254)	Secretary of State and State Plan Advisory Committee	September 30, 2003 – December 31, 2006
Additional Compliance and Election Improvement Activities (sec. 101, 251, 402) (Enhancements to Election Management Systems and Processes, Administrative Complaint Procedures, Polling Place Accessibility)	Secretary of State and municipal election officials	September 30, 2003 – December 31, 2006

9. State-Based Administrative Complaint Procedures

A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402. -- HAVA §254 (a)(9)
Deadline for Compliance: Prior to certification of State Plan, but no later than January 1, 2004; no waiver permitted.

Maine's Current Election Complaint Procedure
Maine currently has a simple, expeditious system for handling election questions and complaints. First, people can easily contact the clerk or registrar of voters in their municipality to either obtain election information or make a complaint about an election issue. Many questions or complaints are resolved at the local level, without the assistance of the Secretary of State's Office. However, local election officials frequently call the Secretary of State's Division of Elections for help with answering questions and resolving election complaints.

In addition, the Division of Elections receives hundreds of phone calls and e-mails in the weeks before each election, and typically receives hundreds of calls on Election Day itself. Most of these contacts involve questions about election law or procedure, or requests for information. The Division of Elections is able to quickly respond to these questions or informational requests.

A small number of contacts involve complaints about something that is occurring or has occurred on Election Day. The Division of Elections works to determine whether there is a violation of election law or procedure, and seeks an immediate resolution or remedy. A remedy may provide corrective action for the complainant, or may provide future corrective actions to prevent further violations of a similar nature during the current or future elections.

Some calls or written complaints are received after Election Day. The Division of Elections obtains information from the complainant in writing, and contacts the appropriate election officials for further information or rebuttal of the complaint. Once all the information is received, the Division of Elections determines whether there has been a violation of election law or procedure. If there has been no violation, the Division of Elections provides the information orally to the complainant and the respondent. If there has been a violation of law or an incorrect procedure was followed, the Division of Elections advises both parties about the corrective action verbally and in writing.

Maine's Proposed Administrative Complaint Procedure
While the current process for resolving election complaints is effective, uniform and nondiscriminatory, it does not meet the specific requirements in section 402 of HAVA. Therefore, the Secretary of State has adopted a rule establishing an administrative complaint procedure to resolve alleged violations of Title III of HAVA. The rule was adopted after an opportunity for a public hearing and a public comment period, pursuant to Maine's Administrative Procedure Act. The new process established by rule is intended to supplement, not substitute for, the more expedient process of resolving election complaints described above. The rule, 29-250 CMR Chapter 510 - *Administrative Complaint Procedure for Title III of the Help America Vote Act of 2002 (HAVA)*, may be obtained by contacting the Office of the Secretary of State and is available online at www.maine.gov/sos/cec/rcn/apa/29/chaps29.htm.

Requirement		State of Maine's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
SEC. 402. ESTABLISHMENT OF STATE-BASED ADMINISTRATIVE COMPLAINT PROCEDURES TO REMEDY GRIEVANCES			
(a) ESTABLISHMENT OF STATE-BASED ADMINISTRATIVE COMPLAINT PROCEDURES TO REMEDY GRIEVANCES			
(1) ESTABLISHMENT OF PROCEDURES AS CONDITION OF RECEIVING FUNDS- If a State receives any payment under a program under this Act, the State shall be required to establish and maintain State-based administrative complaint procedures which meet the requirements of paragraph (2)		Meets.	
(2) REQUIREMENTS FOR PROCEDURES- The requirements of this paragraph are as follows:			
	(A) The procedures shall be uniform and nondiscriminatory.	Meets.	
	(B) Under the procedures, any person who believes that there is a violation of any provision of title III (including a violation, which has occurred, is occurring, or is about to occur) may file a complaint.	Meets.	
	(C) Any complaint filed under the procedures shall be in writing and notarized, and signed and sworn by the person filing the complaint.	Meets.	
	(D) The State may consolidate complaints filed under subparagraph (B).	Meets.	
	(E) At the request of the complainant, there shall be a hearing on the record.	Meets.	

Requirement		State of Maine's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
	(F) If, under the procedures, the State determines that there is a violation of any provision of title III, the State shall provide the appropriate remedy.	Meets.	
	(G) If, under the procedures, the State determines that there is no violation, the State shall dismiss the complaint and publish the results of the procedures.	Meets.	
	(H) The State shall make a final determination with respect to a complaint prior to the expiration of the 90-day period, which begins on the date the complaint is filed, unless the complainant consents to a longer period for making such a determination.	Meets.	
	(I) If the State fails to meet the deadline applicable under subparagraph (H), the complaint shall be resolved within 60 days under alternative dispute resolution procedures established for purposes of this section. The record and other materials from any proceedings conducted under the complaint procedures established under this section shall be made available for use under the alternative dispute resolution procedures.	Meets.	

10. Effect of Title I Payments

If the State received any payment under title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities. -- HAVA §254 (a)(10)

Maine has received $5 million in Title I payments. These payments are critical to Maine's implementation of HAVA. Funds will be used for:

HAVA Requirements	Title I Funds
Voting System Standards (sec. 301) (Purchase, Implementation, Administration and Maintenance of DRE's or other compliant voting systems)	$500,000
Computerized Statewide Voter Registration List (sec. 303) (Purchase, Implementation, Administration and Maintenance)	$2,700,000
Voter Education and Outreach & Election Official Training to Assist in Meeting Title III Requirements (sec. 254)	$750,000
State Plan Creation and Management of HAVA Implementation (sec. 101 & 254)	$450,000
Additional Compliance and Election Improvement Activities (sec. 101, 251, 402) (Enhancements to Election Management Systems and Processes, Administrative Complaint Procedures, Polling Place Accessibility)	$600,000
All Activities	**$5,000,000**

11. Maine's HAVA State Plan Management and Changes to State Plan from Previous Fiscal Year

How the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change—

(A) is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;
(B) is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and
(C) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A). -- HAVA §254 (a)(11)

In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year. -- HAVA §254 (a) (12)

State Plan Management

The Secretary of State will be responsible for the ongoing management of this plan. The Secretary of State will review reports and performance measurements to track the success of implementation and will delegate tasks as necessary to ensure the State meets goals and objectives set forth in this plan, in a timely manner. Should it become necessary to make any material change in the administration of this plan, the State will pursue the state planning procedure, public notice and comment, and publication requirements described in Title II of HAVA.

Changes to State Plan from Previous Fiscal Year

This FY 2003 State Plan is Maine's inaugural plan under HAVA. Should it become necessary to make changes to the plan, this section of the plan will be updated to reflect those changes, and to describe how the State has succeeded in implementing the plan.

12. State Plan Development and Committee

A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the committee under such section 255 and section 256. - - HAVA §254 (a)(13)

The State of Maine's committee consists of individuals representing a cross-section of election stakeholders. The State Plan Committee was selected by Secretary of State Dan A. Gwadosky, the State of Maine's chief election official.

Members of the State Plan Committee, and the primary qualification of each for inclusion on the committee, are as follows:

Dan A. Gwadosky	Secretary of State
Joseph E. Clark	State Representative, Maine House of Representatives
Linda C. Cohen	City Clerk, City of Portland
Julie Flynn	Deputy Secretary of State
Arthur F. Mayo III	State Senator, Maine State Senate
Kathleen M. Montejo	City Clerk, City of Lewiston
Kim Moody	Disability Rights Center
Kenneth F. Morgan	Maine AFL-CIO
Nancy G. Nichols	City Clerk, City of Presque Isle
Steve Obremski	The Iris Network
Alison Smith	League of Women Voters of Maine
Rebecca Sockbeson	University of Southern Maine, Multicultural Student Affairs
Rhonda L. Stark	Town Clerk, Town of Skowhegan
Charlene Thompson	Maine AARP

The committee will comply with filing, publication, and public notice and comment requirements established in HAVA §255 and §256.

May 13, 2003

Dear Friends:

I am proud to present for public inspection and comment the Maryland State Plan as required by the *Help America Vote Act of 2002* (HAVA). The Act, signed into law by President George W. Bush, enacts numerous election reform measures and authorizes federal funds to help states and localities implement these important changes. In short, as declared by President Bush, the Act will "ensure the integrity and efficiency of voting processes in Federal elections by providing Federal governmental support for that vital endeavor."

Interestingly, many of the reforms presented before the United States Congress during the discussions leading up to the passage of HAVA had already been addressed in Maryland. Over the past several years, the General Assembly and the executive branch worked to make necessary changes in the State Election Article, the Code of Maryland Regulations (COMAR) and the State Board of Elections management procedures.

A great deal remains to be done to satisfy all the requirements of HAVA. The State of Maryland welcomes the challenges and the opportunities as well as the financial commitment of the Federal government to assist in complying with HAVA.

I would like to offer my appreciation to the bipartisan State Plan Committee of State and county election officials, representatives of advocacy groups and citizens who assisted in developing the State Plan. Their hard work will help us to improve voter registration and election management processes in Maryland.

Very truly yours,

Robert L. Ehrlich, Jr.
Governor

INTRODUCTION BY THE STATE ADMINISTRATOR OF ELECTIONS

I am pleased to offer the Maryland State Plan. Section 253(b) of the Help America Vote Act of 2002 (HAVA) requires each state to develop a long-range plan for implementing the Act. HAVA requires the state and local governments to significantly reform election processes and systems. On behalf of the Maryland elections community, I am proud to say that we, with the support of both the Governor and the General Assembly, began election reform well before the enactment of HAVA. With the appropriate federal financial support, the State of Maryland will have the opportunity to build upon our strong foundation of current election reform and accomplishments.

The State Plan, developed in conjunction with the State Plan Committee, establishes a framework for continuing progress in election reform and achieving compliance with HAVA. The Committee is comprised of a cross-section of the Maryland election community and other stakeholders.

Although HAVA increases responsibility for election administration at the State level in order to establish consistency across localities, the State Board of Elections acknowledges that the local boards of elections are charged with the conduct of elections and are critical to the elections process. Throughout the election reform efforts, the State Board will continue to encourage coordination with the local boards of elections and knowledge sharing on local innovations and successes.

Within the State Plan, Maryland also encourages election accessibility for individuals with disabilities and those with alternative language considerations. Maryland has already taken significant steps to improve polling place accessibility and is in the process of implementing an accessible, uniform statewide voting system. We will continue to strive toward accessibility throughout all aspects of the elections process.

Improving the military and overseas voting process is an important element of HAVA, though separate from the State Plan. The State Board of Elections will serve as the central point of contact in the State for all issues related to military and overseas voting.

Maryland will update and refine the State Plan as necessary over time, to reflect election reform progress and future plans. We welcome the challenges of HAVA and the financial support from the federal government in our continuing efforts to lead the nation in election reform.

Linda H. Lamone, Esq.
State Administrator of Elections

STATE PLAN APPROACH

The Maryland State Board of Elections (SBE), comprised of the Administrator as the chief State election official, the five-member State Board as the principal authority, and 30 employees, is responsible for administering and supervising elections conducted by the 24 Local Boards of Elections (LBEs) in the State. The LBEs and their respective local governments have the majority of fiscal responsibility for elections. Collaboration between the LBEs and SBE is essential to the conduct of successful elections. In addition to fulfilling federal election responsibilities, the State's elections community works cooperatively to serve State government, approximately 2.8 million registered voters, and over 1,700 political campaigns.

Before the State's 2002 Gubernatorial Election, SBE successfully adopted a number of election reforms. SBE introduced provisional balloting and a new voter registration system (VRS), replaced the remaining punch card and lever machines with Direct Recording Electronic (DRE) voting units, expanded physical accessibility of polling places, and implemented continuous voter registration from one local jurisdiction to another (eliminating the need for re-registration when a voter moves within the State). Through these programs, SBE has shown that it has a vision for election reform. The challenge for the State is to implement that vision in compliance with the Help America Vote Act (HAVA).

Despite these election reform efforts already complete or in progress, considerable effort and resources are necessary for the State to meet HAVA requirements. SBE will need to upgrade systems, redesign processes, and revamp training. SBE's ability to provide ongoing operations and maintenance of new capabilities is dependent on adequate resources and funding. In addition, SBE must address core infrastructure needs to provide a solid foundation to sustain new technology and processes. Additionally, the success of the State's election reform efforts requires implementation at an appropriate point in the election cycle, so that LBEs may use new processes in a timely manner.

This State Plan is organized as specified in HAVA §254. Each section of this document corresponds to a subsection of §254 and addresses a State Plan requirement specified in HAVA. The Plan outlines program milestones to address large-scale system or procedural changes. Additionally, where appropriate, compliance matrices are included to outline the detailed requirements of HAVA, describe the State's current status in regard to those requirements, and define the actions planned to help the State meet those requirements.

In developing the Maryland State Plan, the State Plan Committee used the following themes as a guide:

- Emphasize collaboration with stakeholder community
- Include steps to get the answers
- Focus on accessibility for individuals with disabilities and alternative language needs
- Centralize responsibility, accountability, and authority

STATE PLAN REQUIRED ELEMENTS (HAVA §254)

1. Title III Requirements and Other Activities

How the State will use the requirements payment to meet the requirements of title III, and, if applicable under section 251(b)(2), to carry out other activities to improve the administration of elections. -- HAVA §254 (a)(1)

1.A §301(a), Voting Systems Standards Requirements

Deadline for Compliance: January 1, 2006; no waiver permitted.

The State currently uses four polling place voting systems in its 24 jurisdictions, including two optical scan systems (ES+S Optech III-P Eagle and Diebold Model ES-2000) and two Direct Recording Electronic (DRE) systems (Diebold AccuVote TS and Sequoia AVC Advantage). In addition, the State uses four optical scan voting systems for absentee balloting (ES+S Optech III-P Eagle, ES+S Optech IV-C, ES+S Model 315, and Diebold Model ES-2000).

Before the passage of HAVA, the State enacted legislation mandating that, by 2006, all jurisdictions implement a uniform voting system for polling places and a uniform voting system for absentee voting. SBE began to implement this new legislation in 2001. Because SBE closely tracked innovations in voting as well as the developing federal election reform legislation, the polling place voting system selected is compliant with the HAVA requirements that were introduced a year later.

Four of the State's 24 jurisdictions, comprising approximately 32% of its registered voters, transitioned polling place equipment to the new uniform State and HAVA-compliant, DRE voting system (AccuVote TS) in 2002. This new voting system enables a voter to correct ballot errors before casting a ballot. The system also prevents a voter from over-voting, provides for accessibility for individuals with disabilities, and allows for alternative language accessibility. These four jurisdictions also transitioned to uniform absentee voting equipment (Model ES-2000). The implementation of the uniform polling place and absentee voting systems cost the State and counties approximately $15 million for hardware and services; significant costs above that amount were absorbed by the State and counties, not to mention volunteer resources (manpower and supplies). Additionally, the significant effort and cost required to train poll workers and election officials and to conduct adequate voter outreach for the new equipment drew State, local, and volunteer resources away from other important election activities.

Maryland's early and active pursuit of voting system improvements now mandated by HAVA has placed the State on course to fulfill HAVA requirements within the statutory timeframes. SBE plans to proceed with the implementation of uniform State voting systems for the remaining 20 local jurisdictions that do not currently meet HAVA §301(a) requirements. Funding is necessary for the non-compliant jurisdictions to transition to the uniform State voting systems and meet HAVA §301(a) requirements over the next three years.

State legislation mandates a uniform absentee voting system, and SBE is in the process of phasing out all other systems and implementing Model ES-2000 as the absentee

voting system. This absentee system will be used in conjunction with the AccuVote TS in all polling places, satisfying HAVA requirements.

In addition to numerous voting system requirements, §301(a) also requires states to define what constitutes a legal vote for each type of voting system used in the state. In the 2002 Standardized Election Recount Procedures for Optical Scan Automatically Tabulated Systems, the State defined what constitutes a legal vote in the case of a manual recount for optical scan ballots. The State will define a legal vote in a uniform manner for each voting system as a regulation in the Code of Maryland Regulations (COMAR) Title 33.

Uniform State Voting Systems Program Milestones

As demonstrated in the above description of the current state of voting systems, the State is on its way to meeting HAVA §301(a) requirements. Phase I of SBE's uniform State voting systems program is already complete.

1) Planning voting system compliance -- Maryland passed legislation in 2001 requiring all jurisdictions to have a uniform system for polling place voting and a uniform system for absentee voting. The uniform systems, selected by SBE, when implemented statewide, will bring the State into full compliance with HAVA. SBE assessed available options and selected the appropriate delivery method for implementation.
2) Implementing voting systems -- In 2002, four jurisdictions replaced punch-card or mechanical lever voting systems with the uniform State systems.

The State is taking actions to ensure full compliance with HAVA §301(a) requirements. Phase II of SBE's uniform State voting systems program is in progress:

1) Planning voting system compliance
   - Assess procurement options
   - Establish user group of relevant internal stakeholders to discuss next phase of implementation, lessons learned from Phase I, and guide the voting system program through planning, managing, and implementing phases
   - Create schedules, milestones, and work plans
2) Managing the implementation effort through a standardized project management framework
   - Develop reporting structures and performance measures to track progress
   - Track issues and risks to ensure smooth transition to new uniform voting systems
3) Implementing compliant voting systems
   - Procure equipment and services pursuant to the State's procurement law
   - Deliver equipment and services to remaining 20 jurisdictions
   - Ensure proper training and change management for stakeholders using new uniform systems

Phase III of SBE's uniform State voting systems program will be operations and maintenance:

1) Operating & Maintaining new uniform State voting systems
   - Maintain and improve voting system software
   - Maintain technical infrastructure for software

The matrix on the following pages outlines the HAVA §301(a) requirements, the "State of Maryland's Current Status" related to these requirements, and the "Actions Planned", where applicable. As the matrix indicates, the four jurisdictions using the uniform State voting systems are currently compliant with HAVA.

Requirement	State of Maryland's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
SEC. 301. VOTING SYSTEMS STANDARDS		
(a) REQUIREMENTS- Each voting system used in an election for Federal office shall meet the following requirements		
(1) IN GENERAL-		
(A) Except as provided in subparagraph (B), the voting system (including any lever voting system, optical scanning voting system, or direct recording electronic system) shall		
(i) permit the voter to verify (in a private and independent manner) the votes selected by the voter on the ballot before the ballot is cast and counted;	Meets.	No action needed.
(ii) provide the voter with the opportunity (in a private and independent manner) to change the ballot or correct any error before the ballot is cast and counted (including the opportunity to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error); and	Meets.	No action needed.
(iii) if the voter selects votes for more than one candidate for a single office-- (I) notify the voter that the voter has selected more than one candidate for a single office on the ballot; (II) notify the voter before the ballot is cast and counted of the effect of casting multiple votes for the office; and (III) provide the voter with the opportunity to correct the ballot before the ballot is cast and counted.	Partially Meets. • Non-compliant systems identify over-voting • Require poll workers to inform voter of error • Systems do not show error to voter directly	The State will meet this requirement upon implementation of the uniform State voting systems program described above.
(B) A State or jurisdiction that uses a paper ballot voting system, a punch card voting system, or a central count voting system (including mail-in absentee ballots and mail-in ballots), may meet the requirements of subparagraph (A)(iii) by		
(i) establishing a voter education program specific to that voting system that notifies each voter of the effect of casting multiple votes for an office; and	Meets.	No action needed.

Requirement	State of Maryland's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(ii) providing the voter with instructions on how to correct the ballot before it is cast and counted (including instructions on how to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error)	Meets.	No action needed.
(C) The voting system shall ensure that any notification required under this paragraph preserves the privacy of the voter and the confidentiality of the ballot.	Does Not Meet. • Non-compliant systems require poll workers to inform voter of error	The State will meet this requirement upon implementation of the uniform State voting systems program described above.
(2) AUDIT CAPACITY-		
(A) IN GENERAL- The voting system shall produce a record with an audit capacity for such system.	Meets.	No action needed.
(B) MANUAL AUDIT CAPACITY-		
(i) The voting system shall produce a permanent paper record with a manual audit capacity for such system.	Meets.	No action needed.
(ii) The voting system shall provide the voter with an opportunity to change the ballot or correct any error before the permanent paper record is produced.	Meets.	No action needed.
(iii) The paper record produced under subparagraph (A) shall be available as an official record for any recount conducted with respect to any election in which the system is used.	Meets.	No action needed.
(3) ACCESSIBILITY FOR INDIVIDUALS WITH DISABILITIES- The voting system shall-		
(A) be accessible for individuals with disabilities, including nonvisual accessibility for the blind and visually impaired, in a manner that provides the same opportunity for access and participation (including privacy and independence) as for other voters;	Partially Meets. • Optech III-P Eagle and Model ES-2000 do not meet requirements; require human assistance • AVC Advantage does not meet requirements; has Braille key capabilities, but	The State will meet this requirement upon implementation of the uniform State voting systems program described above.

Requirement	State of Maryland's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
	requires human assistance • AccuVote TS meets requirements (has audio ability, keypad, option to enlarge font size)	
(B) satisfy the requirement of subparagraph (A) through the use of at least one direct recording electronic voting system or other voting system equipped for individuals with disabilities at each polling place; and	Partially Meets. • At least one machine per polling place configured to provide accessibility for disabled individuals in precincts that have AccuVote TS machines • Precincts with no AccuVote TS machines -- not compliant	The State will meet this requirement upon implementation of the uniform State voting systems program described above.
(C) if purchased with funds made available under title II on or after January 1, 2007, meet the voting system standards for disability access (as outlined in this paragraph).	N/A	The State will meet this requirement upon implementation of the uniform State voting systems program described above.
(4) ALTERNATIVE LANGUAGE ACCESSIBILITY- The voting system shall provide alternative language accessibility pursuant to the requirements of section 203 of the Voting Rights Act of 1965 (42 U.S.C. 1973aa-1a).	Meets.	No action needed.
(5) ERROR RATES- The error rate of the voting system in counting ballots (determined by taking into account only those errors which are attributable to the voting system and not attributable to an act of the voter) shall comply with the error rate standards established under section 3.2.1 of the voting systems standards issued by the Federal Election Commission which are in effect on the date of the enactment of this Act.	Meets.	No action needed.

Requirement	State of Maryland's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(6) UNIFORM DEFINITION OF WHAT CONSTITUTES A VOTE- Each State shall adopt uniform and nondiscriminatory standards that define what constitutes a vote and what will be counted as a vote for each category of voting system used in the State.	Partially Meets. • Standardized Recount Procedures modified in 2002 define a legal vote in case of manual recounts of optical scan ballots • No standardized definition exists.	The State will meet this requirement upon implementation of the uniform State voting systems program described above.

1.B §302, Provisional Voting and Voting Information Requirements

Deadline for Compliance: January 1, 2004; no waiver permitted.

HAVA addresses the process of provisional voting to ensure that no individual who goes to the polls intending to cast a ballot is turned away without having the opportunity to do so. Before the passage of HAVA, the State attended to this issue – the Maryland General Assembly enacted provisional voting legislation in 2001. In developing the State Plan, SBE assessed the State's recent provisional voting legislation to determine those elements needing modification in order to fully comply with HAVA.

Currently, the State's provisional voting laws allow a voter whose name does not appear on the precinct register to cast a provisional ballot, provided the voter completes a certification in which he or she affirms under penalty of perjury that he or she is either registered in another county or made a good faith effort to register at a voter registration agency. In any election conducted under the Maryland Election Law Article, election officials must provide provisional voters with provisional ballots identical to the ballots issued to other voters in the precinct. Each LBE is required to maintain a full record of provisional ballot voting, including voter information, the action taken in canvassing the ballot, the ballot style issued, and any other information requested by SBE. On request, a provisional voter may learn whether the voter's ballot was counted and, if not, why.

The intent of the State's recent provisional voting legislation – to reduce the number of individuals unable to participate on election day – is similar to the intent of HAVA §302. However, the new HAVA requirements differ in some respects from the State's procedure, so the State must make some modifications to its legislation and processes. Through these modifications, the State will change its procedures for the issuance of provisional ballots, provide "free access" to its canvass reporting system, and assure the privacy of that reporting system.

Provisional Voting Program Milestones
SBE is in the process of proposing updates to legislation governing the State's provisional voting program:

1. Conducting an Impact Assessment
   - Assess the requirements of HAVA §302 in collaboration with the Attorney General's office
   - Review and compare existing State legislation with HAVA to determine gaps
2. Implementing Revisions
   - Develop revisions to State law with input from LBEs and other key stakeholders
   - Facilitate passage of law in State legislature
   - Put new law into operation with revised procedures, training, and outreach mechanisms
3. Managing
   - Track and report on provisional voting

Details on the current status of provisional voting and actions planned are found in the compliance matrix on the following pages.

In addition to provisional voting requirements, HAVA §302 mandates that states publicly post specific information at the polls on election day. The State currently displays voting information at each polling place, though SBE must adjust the content slightly to comply with HAVA.

Voting Information Program Milestones
SBE will comply with HAVA requirements for voting information through the following program:

1. Conducting an Impact Assessment
   - Assess the requirements of HAVA §302 in cooperation with the Attorney General's office
   - Review and compare existing voting information posted with HAVA to determine gaps
2. Implementing Revisions
   - Develop revisions to voter information materials posted on election day with input from LBEs and other key stakeholders
   - Put new voting information into operation with revised procedures, election day materials, training, and outreach mechanisms
3. Managing
   - Track and report on success of posted voting information

Details on the current status of voting information and actions planned are found in the compliance matrix on the following pages.

HAVA §302 further requires that voters who vote under a court or other order during extended hours, after the normal close of a polling place, cast provisional ballots. These ballots must be kept separate from other provisional ballots. The State did not previously include this requirement as part of its provisional voting law and procedures, and consequently, SBE is updating the law and procedures as described above.

The compliance matrix on the following pages includes the specific requirements of HAVA §302, as well as the "State of Maryland's Current Status" related to these requirements. The "Actions Planned" column includes next steps for the State.

Requirement	State of Maryland's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
SEC. 302. PROVISIONAL VOTING AND VOTING INFORMATION REQUIREMENTS.		
(a) PROVISIONAL VOTING REQUIREMENTS- If an individual declares that such individual is a registered voter in the jurisdiction in which the individual desires to vote and that the individual is eligible to vote in an election for Federal office, but the name of the individual does not appear on the official list of eligible voters for the polling place or an election official asserts that the individual is not eligible to vote, such individual shall be permitted to cast a provisional ballot as follows:		
(1) An election official at the polling place shall notify the individual that the individual may cast a provisional ballot in that election.	Partially Meets. • Individual may cast provisional ballot • State is more restrictive about when provisional ballots are issued than implied in HAVA	The State will meet this requirement upon implementation of the provisional voting program described above.
(2) The individual shall be permitted to cast a provisional ballot at that polling place upon the execution of a written affirmation by the individual before an election official at the polling place stating that the individual is--		
(A) a registered voter in the jurisdiction in which the individual desires to vote; and	Partially Meets. • To receive provisional ballot, individual must: • Fill out application and temporary certificate of registration, • Provide proof of identity, and • Sign oath stating that individual is registered voter in State	The State will meet this requirement upon implementation of the provisional voting program described above.
(B) eligible to vote in that election.	Partially Meets. • Text of written affirmation differs from HAVA requirements	The State will meet this requirement upon implementation of the provisional voting program described above.

Requirement	State of Maryland's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(3) An election official at the polling place shall transmit the ballot cast by the individual or the voter information contained in the written affirmation executed by the individual under paragraph (2) to an appropriate State or local election official for prompt verification under paragraph (4).	Meets.	No action needed.
(4) If the appropriate State or local election official to whom the ballot or voter information is transmitted under paragraph (3) determines that the individual is eligible under State law to vote, the individual's provisional ballot shall be counted as a vote in that election in accordance with State law.	Meets.	No action needed.
(5)(A) At the time that an individual casts a provisional ballot, the appropriate State or local election official shall give the individual written information that states that any individual who casts a provisional ballot will be able to ascertain under the system established under subparagraph (B) whether the vote was counted, and, if the vote was not counted, the reason that the vote was not counted.	Meets.	No action needed.
(B) The appropriate State or local election official shall establish a free access system (such as a toll-free telephone number or an Internet website) that any individual who casts a provisional ballot may access to discover whether the vote of that individual was counted, and, if the vote was not counted, the reason that the vote was not counted.	Partially Meets. • A provisional voter can call the LBE or SBE to find out if individual's ballot was counted; current system not necessarily toll free • If ballot is not counted, form letter is mailed to provisional voter, on request, explaining reason • Voter may appeal canvassing decision to appropriate circuit court within five days after completion of canvass	The State will meet this requirement upon implementation of the provisional voting program described above.

Requirement	State of Maryland's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
States described in section 4(b) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-2(b)) may meet the requirements of this subsection using voter registration procedures established under applicable State law. The appropriate State or local official shall establish and maintain reasonable procedures necessary to protect the security, confidentiality, and integrity of personal information collected, stored, or otherwise used by the free access system established under paragraph (5)(B). Access to information about an individual provisional ballot shall be restricted to the individual who cast the ballot.	N/A	Maryland is not a state described in §4(b) of the NVRA.
(b) VOTING INFORMATION REQUIREMENTS-		
(1) PUBLIC POSTING ON ELECTION DAY- The appropriate State or local election official shall cause voting information to be publicly posted at each polling place on the day of each election for Federal office.	Meets.	The State complies in terms of posting information, but actual details posted will be adjusted. See below for further detail.
(2) VOTING INFORMATION DEFINED- In this section, the term 'voting information' means--		
(A) a sample version of the ballot that will be used for that election;	Meets.	No action needed
(B) information regarding the date of the election and the hours during which polling places will be open;	Meets.	No action needed
(C) instructions on how to vote, including how to cast a vote and how to cast a provisional ballot;	Partially Meets. • Needs update to reach full compliance	The State will meet this requirement upon implementation of the voting information program described above.
(D) instructions for mail-in registrants and first-time voters under section 303(b);	Does Not Meet. • Information not included in current posting	The State will meet this requirement upon implementation of the voting information program described above.

Requirement	State of Maryland's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(E) general information on voting rights under applicable Federal and State laws, including information on the right of an individual to cast a provisional ballot and instructions on how to contact the appropriate officials if these rights are alleged to have been violated; and	Partially Meets. • Need more detail for full compliance	The State will meet this requirement upon implementation of the voting information program described above.
(F) general information on Federal and State laws regarding prohibitions on acts of fraud and misrepresentation.	Does Not Meet. • Information not included in current posting	The State will meet this requirement upon implementation of the voting information program described above.
(c) VOTERS WHO VOTE AFTER THE POLLS CLOSE- Any individual who votes in an election for Federal office as a result of a Federal or State court order or any other order extending the time established for closing the polls by a State law in effect 10 days before the date of that election may only vote in that election by casting a provisional ballot under subsection (a). Any such ballot cast under the preceding sentence shall be separated and held apart from other provisional ballots cast by those not affected by the order.	Does Not Meet. • No procedures exist currently for this requirement	The State will meet this requirement upon implementation of the provisional voting program described above.

1.C §303, Computerized Statewide Voter Registration List Requirements and Requirements for Voters Who Register by Mail

Deadline for Compliance: January 1,2004; State can submit a certification stating "good cause" that will move the deadline for §303(a) compliance to January 1, 2006.

Currently, official State voter registration records are created and maintained at the local jurisdiction level. Each LBE updates and separately maintains voter registration records for its jurisdiction, with 19 of the State's 24 jurisdictions using a uniform local system. SBE does, however, maintain an aggregate list, referred to as the centralized voter registration database (CVRDB). On a weekly basis, LBEs send data files to SBE, and these are merged into the read-only CVRDB. CVRDB is accessible to the LBEs and SBE through a read-only Intranet server. SBE performs multiple checks for voter registration duplicates and distributes reports to the LBEs, which then manually update their databases by removing the duplicates.

As explained above, the State's CVRDB is not the "single, uniform, official, centralized, interactive, computerized statewide voter registration list" required by HAVA. Moreover, information gathered and maintained on State voters does not uniformly include driver's license numbers or partial social security numbers, as required by HAVA.

The mail-in voter registration process in Maryland also currently does not meet HAVA requirements. The mail-in voter registration form requires redesign to accommodate information required by HAVA. Also, the voter registration and polling place voter qualification processes must be modified to allow for the verification of identification provided by first-time voters who register by mail.

Voter Registration System (VRS) Program Milestones

SBE's VRS program, which will ensure HAVA compliance in both technical and procedural areas of voter registration, is in progress:

1) Planning HAVA voter registration compliance
   - Assess HAVA §303 to determine requirements for system and necessary changes in procedures and regulations/legislation
   - Establish a user group of key stakeholders to guide the VRS program through all phases and milestones
   - Develop a training plan, leveraging expertise from the LBEs (Note: refer to Section 3 Voter Education, Election Official Education and Training, and Poll Worker Training)
   - Research and assess VRS options (upgrade current system, build new system, acquire replacement system, etc.)
   - Determine options for development of interfaces and data integration between SBE and Motor Vehicle Administration (MVA), Department of Health and Mental Hygiene (DHMH), Administrative Office of the Courts (AOC), and other appropriate agencies
   - Develop VRS approach (selection of option, risks, pros and cons, cost benefit analysis, rough order of magnitude, level of effort)
2) Managing the voter registration system effort through a standardized project management framework
   - Create a comprehensive resource plan, schedule, and work plan
   - Develop reporting structures and performance measures to track progress
   - Monitor issues and risks to ensure smooth transition to new voter registration system
3) Implementing the new voter registration system
   - Implement necessary changes to procedures and regulations/legislation
   - Select and procure software and services
   - Design, build, test, and deploy VRS
   - Develop and deliver appropriate training and outreach to ensure successful VRS transition
4) Operating and Maintaining the voter registration system
   - Maintain and improve voting system software
   - Utilize the user group to assist SBE in maintaining and improving voting system software
   - Maintain technical infrastructure and accessibility for software

Based on SBE review of HAVA §303, the State's voter registration system will require technological and procedural upgrades to comply with the Act. The compliance matrix on the following pages includes the specific requirements of HAVA §303, as well as the "State of Maryland's Current Status" related to these requirements. The "Actions Planned" column includes next steps for the State.

Requirement	State of Maryland's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
SEC. 303. COMPUTERIZED STATEWIDE VOTER REGISTRATION LIST REQUIREMENTS AND REQUIREMENTS FOR VOTERS WHO REGISTER BY MAIL.		
(a) COMPUTERIZED STATEWIDE VOTER REGISTRATION LIST REQUIREMENTS-		
(1) IMPLEMENTATION-		
(A) IN GENERAL- Except as provided in subparagraph (B), each State, acting through the chief State election official, shall implement, in a uniform and nondiscriminatory manner, a single, uniform, official, centralized, interactive computerized statewide voter registration list defined, maintained, and administered at the State level that contains the name and registration information of every legally registered voter in the State and assigns a unique identifier to each legally registered voter in the State (in this subsection referred to as the computerized list), and includes the following:	Does Not Meet. • Not all registration data in central database • 19 counties -- uniform local systems feed into the central database; other five counties interface with State's central database from their own applications • Official voter registration records are those maintained at the local level	The State will meet this requirement upon implementation of the VRS program described above. Also, legislation will be needed.
(i) The computerized list shall serve as the single system for storing and managing the official list of registered voters throughout the State.	Does Not Meet. • Official voter registration records are those maintained at the local level • Statewide list is stored centrally, but managed locally	The State will meet this requirement upon implementation of the VRS program described above. Also, legislation will be needed.
(ii) The computerized list contains the name and registration information of every legally registered voter in the State.	Meets.	No action needed.
(iii) Under the computerized list, a unique identifier is assigned to each legally registered voter in the State.	Does Not Meet. • 19 of 24 counties have potential for duplicate numbers, as systems assign unique numbers locally. No truly unique number assigned. • Five counties are not part of this system	The State will meet this requirement upon implementation of the VRS program described above.

Requirement	State of Maryland's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(iv) The computerized list shall be coordinated with other agency databases within the State.	Does Not Meet. • No direct, coordinated link with all NVRA agencies • Currently some coordination with DHMH and AOC (receive text file from them monthly)	SBE will work to the extent possible with other State agencies to meet this requirement.
(v) Any election official in the State, including any local election official, may obtain immediate electronic access to the information contained in the computerized list.	Partially Meets. • Local election officials have read-only access to continuous voter registration database (CVRDB), but data is not necessarily current • Batch uploads performed weekly • Election management modules of software not functioning at efficiency and effectiveness levels for access	The State will meet this requirement upon implementation of the VRS program described above.
(vi) All voter registration information obtained by any local election official in the State shall be electronically entered into the computerized list on an expedited basis at the time the information is provided to the local official.	Does Not Meet. • Assumes uploading data daily is "expedited" method of entering information into list	The State will meet this requirement upon implementation of the VRS program described above.
(vii) The chief State election official shall provide such support as may be required so that local election officials are able to enter information as described in clause (vi).	Does Not Meet. • Assumes uploading data daily is "expedited" method of entering information into list	The State will meet this requirement upon implementation of the VRS program described above.
(viii) The computerized list shall serve as the official voter registration list for the conduct of all elections for Federal office in the State.	Does Not Meet. • Official list currently created and maintained at local level	The State will meet this requirement upon implementation of the VRS program described above. Also, legislation is required.
(B) EXCEPTION- The requirement under subparagraph (A) shall not apply to a State in which, under a State law in effect continuously on and after the date of the enactment of this Act, there is no voter registration requirement for individuals in the State with respect to elections for Federal office.		
(2) COMPUTERIZED LIST MAINTENANCE-		

Requirement	State of Maryland's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(A) IN GENERAL- The appropriate State or local election official shall perform list maintenance with respect to the computerized list on a regular basis as follows:		
(i) If an individual is to be removed from the computerized list, such individual shall be removed in accordance with the provisions of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg et seq.), including subsections (a)(4), (c)(2), (d), and (e) of section 8 of such Act (42 U.S.C. 1973gg-6).	Meets.	No action needed.
(ii) For purposes of removing names of ineligible voters from the official list of eligible voters-- (I) under section 8(a)(3)(B) of such Act (42 U.S.C. 1973gg-6(a)(3)(B)), the State shall coordinate the computerized list with State agency records on felony status; and (II) by reason of the death of the registrant under section 8(a)(4)(A) of such Act (42 U.S.C. 1973gg-6(a)(4)(A)), the State shall coordinate the computerized list with State agency records on death	Partially Meets. • Convictions sent to State in text file, processed against voter registration rolls • Death information database sent monthly from DHMH to LBEs for processing	SBE will work to the extent possible with other State agencies to meet this requirement.
(iii) Notwithstanding the preceding provisions of this subparagraph, if a State is described in section 4(b) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-2(b)), that State shall remove the names of ineligible voters from the computerized list in accordance with State law.	N/A	Maryland is not a state described in 4(b) of the NVRA.
(B) CONDUCT- The list maintenance performed under subparagraph (A) shall be conducted in a manner that ensures that--		
(i) the name of each registered voter appears in the computerized list;	Meets.	No action needed.
(ii) only voters who are not registered or who are not eligible to vote are removed from the computerized list; and	Meets.	No action needed.
(iii) duplicate names are eliminated from the computerized list.	Partially Meets. • SBE calculates approx. 7000 of 2.7 million names on local voter registration lists are duplicates • Data entry methods of names not standardized	The State will meet this requirement upon implementation of the VRS program described above.

Requirement	State of Maryland's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(3) TECHNOLOGICAL SECURITY OF COMPUTERIZED LIST- The appropriate State or local official shall provide adequate technological security measures to prevent the unauthorized access to the computerized list established under this section.	Does Not Meet. • Each county establishes its own process for administering security	The State will meet this requirement upon implementation of the VRS program described above.
(4) MINIMUM STANDARD FOR ACCURACY OF STATE VOTER REGISTRATION RECORDS- The State election system shall include provisions to ensure that voter registration records in the State are accurate and are updated regularly, including the following:		
(A) A system of file maintenance that makes a reasonable effort to remove registrants who are ineligible to vote from the official list of eligible voters. Under such system, consistent with the National Voter Registration Act of 1993 (42 U.S.C. 1973gg et seq.), registrants who have not responded to a notice and who have not voted in 2 consecutive general elections for Federal office shall be removed from the official list of eligible voters, except that no registrant may be removed solely by reason of a failure to vote.	Meets.	No action needed.
(B) Safeguards to ensure that eligible voters are not removed in error from the official list of eligible voters.	Meets.	No action needed.
(5) VERIFICATION OF VOTER REGISTRATION INFORMATION-		
(A) REQUIRING PROVISION OF CERTAIN INFORMATION BY APPLICANTS-		
(i) IN GENERAL- Except as provided in clause (ii), notwithstanding any other provision of law, an application for voter registration for an election for Federal office may not be accepted or processed by a State unless the application includes-- (I) in the case of an applicant who has been issued a current and valid driver's license, the applicant's driver's license number; or (II) in the case of any other applicant (other than an applicant to whom clause (ii) applies), the last 4 digits of the applicant's social security number.	Does Not Meet. • No procedures for this currently • Storage of driver's license number planned • System stores social security number, but providing social security number voluntary on current voter registration forms	The State will meet this requirement upon implementation of the VRS program described above.

Requirement	State of Maryland's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(ii) SPECIAL RULE FOR APPLICANTS WITHOUT DRIVER'S LICENSE OR SOCIAL SECURITY NUMBER- If an applicant for voter registration for an election for Federal office has not been issued a current and valid driver's license or a social security number, the State shall assign the applicant a number which will serve to identify the applicant for voter registration purposes. To the extent that the State has a computerized list in effect under this subsection and the list assigns unique identifying numbers to registrants, the number assigned under this clause shall be the unique identifying number assigned under the list.	Does Not Meet.	The State will meet this requirement upon implementation of the VRS program described above.
(iii) DETERMINATION OF VALIDITY OF NUMBERS PROVIDED- The State shall determine whether the information provided by an individual is sufficient to meet the requirements of this subparagraph, in accordance with State law.	N/A	The State will consider what verification of voter identification information is necessary and adopt appropriate laws.
(B) REQUIREMENTS FOR STATE OFFICIALS-		
(i) SHARING INFORMATION IN DATABASES- The chief State election official and the official responsible for the State motor vehicle authority of a State shall enter into an agreement to match information in the database of the statewide voter registration system with information in the database of the motor vehicle authority to the extent required to enable each such official to verify the accuracy of the information provided on applications for voter registration.	Does Not Meet. • No current Memorandum of Understanding (MOU) between MVA and SBE; no technology in place to support this	SBE will work to the extent possible with MVA to meet this requirement.
(ii) AGREEMENTS WITH COMMISSIONER OF SOCIAL SECURITY- The official responsible for the State motor vehicle authority shall enter into an agreement with the Commissioner of Social Security under section 205(r)(8) of the Social Security Act (as added by subparagraph (C)).	Partially meets. • Three MOUs between the two parties; additional MOU may be necessary to comply with HAVA	The State will meet this requirement upon implementation of the VRS program described above.
(b) REQUIREMENTS FOR VOTERS WHO REGISTER BY MAIL-		
(1) IN GENERAL- Notwithstanding section 6(c) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4(c)) and subject to paragraph (3), a State shall, in a uniform and nondiscriminatory manner, require an individual to meet the requirements of paragraph (2) if--		
(A) the individual registered to vote in a jurisdiction by mail; and		

Requirement	State of Maryland's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(B)(i) the individual has not previously voted in an election for Federal office in the State; or		
(ii) the individual has not previously voted in such an election in the jurisdiction and the jurisdiction is located in a State that does not have a computerized list that complies with the requirements of subsection (a).		
(2) REQUIREMENTS-		
(A) IN GENERAL- An individual meets the requirements of this paragraph if the individual--		
(i) in the case of an individual who votes in person-- (I) presents to the appropriate State or local election official a current and valid photo identification; or (II) presents to the appropriate State or local election official a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter;	Does Not Meet. • Current voter registration and polling place voter identification procedures do not meet this requirement	The State will meet this requirement upon implementation of the VRS program described above.
(ii) in the case of an individual who votes by mail, submits with the ballot-- (I) a copy of a current and valid photo identification; or (II) a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter	Does Not Meet. • Current voter registration and absentee voting procedures do not meet this requirement	The State will meet this requirement upon implementation of the VRS program described above.
(B) FAIL-SAFE VOTING-		
(i) IN PERSON- An individual who desires to vote in person, but who does not meet the requirements of subparagraph (A)(i), may cast a provisional ballot under section 302(a).	Does Not Meet. • No procedures exist for this requirement	The State will meet this requirement upon implementation of the Provisional Voting Program in section 1.B of this Plan.
(ii) BY MAIL- An individual who desires to vote by mail but who does not meet the requirements of subparagraph (A)(ii) may cast such a ballot by mail and the ballot shall be counted as a provisional ballot in accordance with section 302(a).	Does Not Meet. • No procedures exist for this requirement	The State will meet this requirement upon implementation of the Provisional Voting Program in section 1.B of this Plan.
(3) INAPPLICABILITY- Paragraph (1) shall not apply in the case of a person--		
(A) who registers to vote by mail under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) and submits as part of such registration either--		

Requirement	State of Maryland's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(i) a copy of a current and valid photo identification; or	Partially Meets. • LBEs are now prepared to accept identification information if voluntarily provided • Voter registration procedures being updated to advise mail-in registrants of HAVA requirements	The State will meet this requirement upon implementation of the VRS program described above.
(ii) a copy of a current utility bill, bank statement, government check, paycheck, or government document that shows the name and address of the voter;	Partially Meets. • LBEs are now prepared to accept identification information if voluntarily provided • Voter registration procedures being updated to advise mail-in registrants of HAVA requirements	The State will meet this requirement upon implementation of the VRS program described above.
(B)(i) who registers to vote by mail under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) and submits with such registration either-- (I) a driver's license number; or (II) at least the last 4 digits of the individual's social security number; and	Does Not Meet. • Voter registration forms and procedures being updated to collect the appropriate numbers	The State will meet this requirement upon implementation of the VRS program described above.
(ii) with respect to whom a State or local election official matches the information submitted under clause (i) with an existing State identification record bearing the same number, name and date of birth as provided in such registration; or	Does Not Meet. • Voter registration forms and procedures being updated to require the matching of records	The State will meet this requirement upon implementation of the VRS program described above.
(C) who is--		
(i) entitled to vote by absentee ballot under the Uniformed and Overseas Citizens Absentee Voting Act (42 U.S.C. 1973ff-1 et seq.);	N/A	The State procedure will recognize this exemption.
(ii) provided the right to vote otherwise than in person under section 3(b)(2)(B)(ii) of the Voting Accessibility for the Elderly and Handicapped Act (42 U.S.C. 1973ee-1(b)(2)(B)(ii)); or	N/A	The State procedure will recognize this exemption.
(iii) entitled to vote otherwise than in person under any other Federal law.	N/A	The State procedure will recognize this exemption.
(4) CONTENTS OF MAIL-IN REGISTRATION FORM-		

Requirement	State of Maryland's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
(A) IN GENERAL- The mail voter registration form developed under section 6 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-4) shall include the following:		
(i) The question `Are you a citizen of the United States of America?' and boxes for the applicant to check to indicate whether the applicant is or is not a citizen of the United States.	Meets.	No action planned.
(ii) The question 'Will you be 18 years of age on or before Election Day?' and boxes for the applicant to check to indicate whether or not the applicant will be 18 years of age or older on Election Day.	Does Not Meet. • Updates necessary, planned in 2003	The State will meet this requirement upon implementation of the VRS program described above.
(iii) The statement 'If you checked 'no' in response to either of these questions, do not complete this form.'	Partially Meets. • Question of citizenship is asked; question of age to be added in 2003	The State will meet this requirement upon implementation of the VRS program described above.
(iv) A statement informing the individual that if the form is submitted by mail and the individual is registering for the first time, the appropriate information required under this section must be submitted with the mail-in registration form in order to avoid the additional identification requirements upon voting for the first time.	Does Not Meet. • Updates necessary to meet requirement	The State will meet this requirement upon implementation of the VRS program described above.
(B) INCOMPLETE FORMS- If an applicant for voter registration fails to answer the question included on the mail voter registration form pursuant to subparagraph (A)(i), the registrar shall notify the applicant of the failure and provide the applicant with an opportunity to complete the form in a timely manner to allow for the completion of the registration form prior to the next election for Federal office (subject to State law).	Partially Meets. • LBEs obtain information missing or correct incomplete information on the form, but LBEs may not require re-submission of voter registration form.	The State will meet this requirement upon implementation of the VRS program described above.

1.D §304, Minimum Requirements

The State understands that the requirements laid out in HAVA Title III are minimum requirements, and that the State may establish election technology and administration requirements that are more stringent. Any more stringent requirement that the State imposes will comply with all Title III requirements, as well as the laws described in HAVA §906. For example, the State has passed legislation requiring uniform statewide voting systems by 2006. HAVA does not require statewide voting system uniformity, and therefore the Maryland legislation could be considered more rigorous then HAVA. The State legislation is in full compliance with all HAVA requirements and with the relevant laws listed in HAVA §906.

1.E §305, Methods of Implementation Left to Discretion of State

The State chose various means to comply with the requirements of HAVA Title III. Specific details on the implementation methodology chosen can be found in Sections 1.A through 1.C of this State Plan.

1.F §311, Adoption of Voluntary Guidance by Commission

Once the federal Election Assistance Commission (EAC) has issued its voluntary recommendations with respect to Title III, the State will consider that guidance in updating the State Plan. The State will incorporate those recommendations deemed appropriate into subsequent versions of the State Plan.

1.G §312, Process for Adoption

The State will stay aware of the progress of the EAC on developing the Title III recommendations. If appropriate, the State will provide feedback during the public comment period after the recommendations are published in the Federal Register and participate in public hearings regarding the recommendations.

1.H HAVA §251(b) (2) – Other Activities

The State currently does not have the personnel and technical capacity required to fully achieve HAVA compliance. Ongoing operations and maintenance of the new capabilities required by HAVA cannot be supported with the current SBE and LBE technical infrastructure and resources. The State proposes to establish a solid foundation to build and sustain the people, processes, and technology necessary to maintain the new capabilities. The following activities are thus proposed to improve the election system:

- Conduct an assessment of the current technical infrastructure and establish a strategy to standardize technical infrastructure;
- Conduct process redesign;
- Research the possibility of integration of key election management systems;
- Continue expanding polling place accessibility; and
- Document job descriptions and staff positions with resources qualified to conduct election reform activities.

2. Maryland's Distribution of Requirements Payment

How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of --

(A) the criteria to be used to determine the eligibility of such units or entities for receiving the payment; and

(B) the methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8). -- HAVA §254 (a)(2)

2.A Eligibility of local units to receive the payment

SBE will centrally manage initiatives funded by requirements payments. SBE will be responsible to account for all expenditures, funding levels, program controls, and outcomes. The State, in conjunction with the LBE director, will determine the appropriate level of support for special local initiatives. The State will follow applicable Maryland law regarding the distribution of federal reimbursements.

Note: The State will provide such support as is feasible and appropriate to the LBEs if they seek HAVA grants outside the scope of requirements payments.

2.B Performance measures for local units

Funds will be centrally managed as described in Section 2.A, and SBE will monitor the initiatives for which those funds are authorized.

SBE will monitor the performance of each initiative that is funded by requirements payments in three areas: financial controls, compliance with standards, and program results.

Financial Controls: SBE will develop and use standard financial reporting for all initiatives funded by requirements payments.

Compliance with Standards: SBE will develop and use standard program management reporting for all initiatives that are funded by requirements payments.

Program Results: SBE will develop key performance indicators (KPI) for each initiative funded by requirements payments. See Section 8 of this document for specific performance goals and measures.

3. Voter Education, Election Official Education and Training, and Poll Worker Training

How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III. -- HAVA §254 (a) (3)

Education and training are critical to a successful program of election reform in Maryland. The proposed milestones in this document will require change management to ensure that all stakeholders (poll workers, election officials, voters, etc.) are comfortable with the new processes and supporting technologies that HAVA requires.

Currently, training programs in the State are predominantly localized and, in some cases, informal. SBE distributes policies and procedures to each LBE, and the LBE director is then responsible for how the messages are delivered to staff members, poll workers, and the public. Often, knowledge is distributed informally, in meetings and at conferences, rather than in formal training sessions. There are no SBE personnel available to take sole responsibility for training. Training conducted at the State level is usually organized by each distinct area (provisional ballots, voter registration, voting systems, etc.). Formal training is usually presented in a paper-based, person-to-person format; there is little to no use of technology in creating or delivering training.

In general, voter outreach programs within the State are limited. Each voter receives a specimen ballot in the mail before each general election. Voters can also obtain voting information through the SBE website and other State websites, as well as through public service announcements. However, when new voting systems or regulations directly affect the voter, outreach increases exponentially. For example, in the recent implementation of the new DRE voting system in four State jurisdictions, SBE worked with the voting system contractor to produce cable commercials and radio spots advertising town meetings. SBE contracted for the development of a website specifically for the new voting system, targeting messages to individuals with alternative language needs and the disabled. Also, LBEs, sometimes with corporate assistance, conducted demonstrations of the new voting system to educate voters. This type and level of outreach is both cost and resource intensive.

A thorough and thoughtful training and outreach program increases the buy-in of all affected stakeholders. It is important to develop the training and outreach program with the participation of the LBEs, as they are a critical component to the current and future process and will provide valuable expertise on previous training initiatives. Also the program must account for the changing poll worker and election official workforce, so that training is effective for a group with diverse skills. Finally, HAVA brings increased accessibility to elections. Training and outreach programs must address the needs of the disabled community and individuals with alternative language considerations. These programs need to ensure that poll workers and other election personnel are fully aware of and sensitive to the needs of persons with disabilities, and that election materials and outreach include formats accessible to those persons. In collaboration with the LBEs, effective training and outreach will help provide for smooth implementation of the State Plan.

Training and Outreach Program Milestones

To ensure the success of election reform programs, SBE needs a standard and centralized approach to training and outreach. To this end, SBE will execute a three-step program:

1. Managing Training and Outreach Program
   - Establish a central training and outreach organizational unit within SBE. This organizational unit will serve as the liaison among all LBEs regarding training: ensuring LBE participation in training development, statewide standardization, coordination among LBEs and vendors responsible for new technologies, and general consistency of message and delivery across the State. This entity will also coordinate with the Election Reform Program Management Office (as described in Section 11 of this Plan) to track progress and report on effectiveness of training and outreach efforts.
   - Acquire necessary resources for training and outreach. The current resource levels at SBE cannot support this kind of comprehensive training program. SBE will bring on personnel qualified in the areas of adult education and marketing to coordinate the training and outreach efforts.
2. Planning Training and Outreach Program
   - Conduct a training needs assessment based on the actions planned to address HAVA requirements. The assessment will include identifying current stakeholders, and documenting current and desired skill levels for each stakeholder group. LBE training expertise will be leveraged in the development of this document.
   - Base training on research and proven methods. Research training delivery options and methods used in other organizations. HAVA compliance requires that the State use a training delivery method that is easily accessed and re-used by trainees, is flexible enough to accommodate updates and changes, and is effective in the trainee's retention of information. This research will help address the best means for adult learning, taking into consideration the wide variety of skill levels within the State's training audience.
   - Using the training needs assessment and research, create a user group of relevant stakeholders to develop a training approach document for election officials and poll workers. This document will establish a standard, yet flexible training approach that outlines a strategic direction for training over time, addressing both training content and delivery methods. The approach will cover a variety of topics: the identification of organizations responsible for developing training; a matrix of the stakeholders receiving training, the content to be delivered, and phases for training delivery; a discussion of training objectives; a description of the delivery methods for training; and an outline of the types of feedback mechanisms that SBE will use to evaluate the effectiveness of training.
   - Develop a State outreach and communication plan. Outreach actively provides the voter, the end recipient of State election services, information regarding new election procedures. Increased awareness (and ultimately ownership and sponsorship) on the part of voters will correspondingly increase the success of election reform programs. An outreach and communication plan will describe the strategy for developing and delivering messages to a variety of stakeholder groups. Specifically, the document will outline the proposed audience, the party responsible for delivery, the expected outcome, the key messages, the medium for delivery, and the timing of the communication event.
3. Implementing Training and Outreach Program
   - Design, build, test, and implement training delivery method, leveraging previous training experience. This method will vary dependent on approach determined in planning phase. Regardless of whether training is instructor-led, online, paper-based, etc., the training must still go through the design and build phases, and be subject to testing to ensure its success before it is delivered to trainees.
   - Implement outreach and communication plan. Those responsible for delivering various communication messages must ensure that events occur on a timely basis.

4. Voting System Guidelines and Processes

How the State will adopt voting system guidelines and processes, which are consistent with the requirements of section 301. -- HAVA §254 (a) (4)

The State has adopted legislation mandating uniform voting systems for polling place and absentee voting by 2006. These uniform systems will meet the requirements of HAVA §301. For the 2002 implementation of the HAVA-compliant DRE system, SBE established procedures for system certification and recounts. SBE also created operational standards for the system at that time. As the implementation of the new voting systems continues, SBE will maintain these and create any new guidelines and processes as necessary. New processes at SBE can take the form of either internal procedures, regulations in the Code of Maryland Regulations (COMAR), or State legislation. SBE will determine the appropriate method to publicize any new voting system guidelines and processes.

5. Maryland's HAVA Fund Management

How the State will establish a fund described in subsection (b) for purposes of administering the State's activities under this part, including information on fund management. -- HAVA §254 (a)(5)

Working with the legislature, SBE will establish a new program for election reform that is kept separate and distinct from all other programs within the agency. This program will contain both federal and general funds. The federal fund portion will be used to maintain federal fund receipts and to expend federal funds. The general fund portion will be used to budget and expend general funds representing the 5% match required under HAVA.

The SBE Administrator and Budget Officer will work with the State Comptroller and Department of Budget and Management to follow and enforce all mandated fiscal controls and policies.

6. Maryland's HAVA Budget

The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on—

(A) the costs of the activities required to be carried out to meet the requirements of title III;

(B) the portion of the requirements payment which will be used to carry out activities to meet such requirements; and

(C) *the portion of the requirements payment, which will be used to carry out other activities.*

-- HAVA §254 (a)(6)

At the time of the writing of this Plan, HAVA appropriations were significantly less than amounts authorized. The following table outlines the assumptions regarding federal funding that the State used in creating its budget for HAVA activities.

Table 6.1: Federal Funding Assumptions for Maryland

Federal Fiscal Year*	Total Federal Funds	Maryland Share	5% State Match Requirement**
Early Payments	$650 (appropriated)	$7.25	n/a
2003	$833 (appropriated)	$15.16	$0.8
2004	$500 (President's Budget; authorized at $1,000)	$8.94	$0.47
2005	$600 (authorized)	$10.84	$0.57
Total	**$2,560**	**$42.2**	**$1.8**

**5% State Match Requirement is calculated as 5% of the total of the State Match portion plus the federal requirements payment portion of cost. To determine the 5% State Match based on federal requirements payment amount, use .0526 as the multiplier (i.e., 5/95 = 0.0526). Example from Maryland FY 2003: $15.16M x 0.0526 = $0.8M

Based on these funding levels, the State HAVA budget is representative of the activities to implement and conduct operations and maintenance through calendar year 2005 for the HAVA Title III requirements and "other" activities. The budget will be revised over time based on the most current information available regarding federal funding.

The duration for the State's budget is based on HAVA deadlines and funding. The State is concerned, however, that beyond the three years of federal funding, the ongoing costs of operating and maintaining the new voting systems and statewide voter registration list will be considerably higher than the State's maintenance of effort level (see Section 7 of the State Plan). The operation and maintenance of the new systems will be the financial burden of the State when HAVA funding is no longer available.

The State made the following additional assumptions in preparing the budget:

- The State is planning to implement uniform voting systems.
- The cost for the statewide voter registration list (§303(a)) is presented as a range, because it is unclear if the State can upgrade its current system to meet HAVA requirements. If so, the cost will be in the lower end of the range. If not, the cost will be in the higher end. The higher end cost is based on the projected cost of the Pennsylvania system, adjusted based on the number of registered voters in Maryland compared to the number in Pennsylvania.
- The cost for education, training, and outreach (§254 (3)) is presented as a range due to the uncertainty of the State's approach for the statewide voter registration list. Additionally, the State anticipates concurrent initiatives to implement the voting systems and statewide voter registration list, which will overextend the State's current education, training, and outreach resources. The State will need to develop a core curriculum and central delivery capabilities (see Section 3 of this Plan) to respond to these increased demands on resources.
- One Presidential primary and general election are factored into the budget.

The State's budget to carry out activities to meet HAVA requirements is provided in table 6.2. Except for costs already incurred for the DRE implementation in four counties, the State's 2003 and 2004 budgets do not include the following costs:

Table 6.2: Maryland's Budget for HAVA Activities

$ Millions HAVA Requirements	Total Cost	Funding Source (note 1)					Duration (note 3)	
		HAVA §101	HAVA §102	HAVA §252 & §257	State 5% Match	Unfunded (note 2)	Implementation	Operations & Maintenance (note 4)
Title III Requirements								
§301 Voting systems (note 5)	$57.5	$2.2	$2.05	$26.07	$1.37	$25.81	5/2001 to 12/2005	9/2002 to 12/2005
§302 Provisional voting and voting information requirements	$0.5	-	-	$0.48	$0.02	-	1/2001 to 12/2003	1/2004 to 12/2005
§303 Computerized statewide voter registration list requirements and requirements for voters who register by mail	$6 to $12	$1.0	-	$4.7	$0.25	up to $6	1/2003 to 12/2005	*Not included in budget.*
Other Election Reform Activities								
§254 (3) Voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III	$3 to $5	$1.0	-	$1.85	$0.10	up to $2	5/2001 to 12/2005	1/2003 to 12/2005
§402 State-based administrative complaint procedures to remedy grievances	$0.1	-	-	$0.095	$0.005	-	1/2003 to 9/2003	10/2003 to 12/2005
State Plan, Section 6 Budget and Fiscal Controls	$0.5	-	-	$0.475	$0.025	-	6/2003 to 12/2003	1/2004 to 12/2005
State Plan, Section 1.H Technical Infrastructure Strategy	$0.1	-	-	$0.095	$0.005	-	6/2003 to 12/2003	1/2004 to 12/2005
State Plan, Section 1.H End-to-End Process Redesign	$0.3	-	-	$0.285	$0.015	-	6/2003 to 12/2003	1/2004 to 12/2005
State Plan, Section 11 Election Reform Program Management	$2 to $3	$1.0	-	$0.9	$0.047	up to $1	6/2003 to 12/2003	1/2004 to 12/2005
TOTALS	$70 to $79	$5.2	$2.05	$34.94	$1.84	$25.92 to $34.92		

Notes:

1. State's portion of HAVA funding is estimated based on the funding assumptions outlined in table 6.1. Source for the State's portion of these funds is the Congressional Research Service, *Funds Allocations to States Based on P.L. 107-252: the Help America Vote Act of 2002* (November 15, 2002).
2. Funding source options: State funding other than 5% match, local jurisdiction funding, and/or additional federal funding.
3. Duration for each budget activity is through calendar year 2005.
4. Operation and maintenance for the voting systems implemented in the four counties began in September 2002 (after the Gubernatorial Primary). The cost associated with this activity is factored into the total cost.
5. In 2001, Maryland implemented the HAVA-compliant statewide voting systems in four counties (representing 32% of the registered voters in the State). Included in the cost of the voting systems is $13.8 M that the State already expended in those four counties.

7. Maintenance of Effort

How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000. -- HAVA §254 (a)(7)

Consistent with HAVA §254(a)(7), in using any requirements payment, Maryland will maintain expenditures of the State for activities funded by the payment at a level equal to or greater than the level of such expenditures in State FY 2000 -- a total of $1,994,914.

As in many states, however, this level of funding represents only a small portion of the statewide aggregate operating budget expenditures needed to sustain elections in a given fiscal year, as the great majority of election administration resources have historically been allocated at the county level. Maryland's 24 local election office budgets typically support year-round core staff and operating expenses for continuous functions such as voter registration, information services, and IT support. In addition, LBEs provide the significant increase in funding associated with each specific election -- for poll workers, temporary office staff, ballot production, mass mailings, election day support (including personnel, equipment, and supplies), etc. In some cases, key election support resources provided at the county level may not even be included within election office budgets, but are provided through other county agencies and donations.

It is therefore important to note that the projected HAVA budget set forth in Section Six of this Plan is based on the critical budget assumption that the State will maintain this foundation of county-funded election operating expenditures at existing levels. Without this foundation in place, the short-term infusion of funds HAVA provides would not be sufficient to maintain the new State election environment in the long term.

8. HAVA Performance Goals and Measures

How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met. -- HAVA §254 (a)(8)

SBE, in collaboration with LBEs, will establish performance goals and will institute a process to measure progress toward the achievement of these goals. This process will provide LBEs with structure and continued measurable targets for accomplishment. The performance goals and measures will align with the State's "Managing for Results" initiative, which seeks to "establish and ensure accountability for results by setting targets for performance" (*Maryland Managing for Results Guidebook*, 2001).

As detailed in Section 11 of this document, SBE will establish an Election Reform Program Management Office (PMO) to oversee continuous management of the State Plan. This PMO, in coordination with SBE and LBE personnel, will be responsible for developing and monitoring a uniform performance evaluation process. In measuring progress, the PMO will continue to revisit original goals and objectives and make adjustments as appropriate.

Performance Goals

Performance goals provide a high-level view of a project's direction. The State's goal is to achieve election reform and compliance with HAVA requirements through the successful implementation of the programs outlined in the State Plan. On the following page is a matrix that details each element of the Plan, the title of the official who is responsible for ensuring that each plan element is met, and the timeframe for meeting each of the elements of the Plan.

Plan Elements	State Official	Time frame
Voting Systems: -- §301	David Heller, Project Manager, Voting Systems and Joe Torre, Procurement Officer	To be implemented by January 1, 2006
Provisional Voting: -- §302	Ross Goldstein, Director, Candidacy and Campaign Finance Division	To be implemented by January 1, 2004
Voter Registration: -- §303(a) -- §303(b)	Brad Barkey, Project Manager, Voter Registration Division	§303(a) to be implemented by January 1, 2006* §303(b) to be implemented by January 1, 2004
Other Activities -- §101 (b)(1), §251(b)(2)		
Technical Infrastructure	Pam Woodside, CIO	TBD by SBE
End to End Process Redesign	Tim Augustine, Deputy Administrator	TBD by SBE
Election Reform Program Management	Tim Augustine, Deputy Administrator	TBD by SBE
Education and Training: -- §254 (a)(3)	Tim Augustine, Deputy Administrator	TBD by SBE
Budget and Fiscal Controls: -- §254 (a)(6) -- §254 (a)(2) -- §254 (a)(7) -- §254 (a)(10)	Rick Danaher, Budget Development, Fiscal Management Division	TBD by SBE
Complaint Procedures: --Title II, §254 (a)(9) --Title IV, §402	Tim Augustine, Deputy State Administrator	TBD by SBE
		*The State will certify good cause for a waiver.

Performance Measures

The State will measure the following five critical areas of each project: scope, schedule, resources, quality, and risk. The appropriate SBE and LBE personnel will develop detailed metrics to collect data to report on performance. The measures will provide the State with the ability to understand, predict, and improve overall performance and communicate expectations at the State and local levels.

- **Scope:** measures internal or external events (resource changes, political decisions, changes to funding streams, etc.) that may affect cost, implementation schedule, or quality;
- **Schedule:** measures progress toward goals (target start and stop dates, actual start and stop dates, percent complete, etc.);
- **Resources:** measures personnel and financial investment to ensure that right people are on project at right time (estimated and actual cost, estimated and actual project resource needs);
- **Quality:** measures effectiveness of project to ensure that it meets expectations (error rates, deliverable quality, value to client); and
- **Risk:** measures likelihood and impact of certain events on operations.

Requirement		State of Maryland's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
SEC. 402. ESTABLISHMENT OF STATE-BASED ADMINISTRATIVE COMPLAINT PROCEDURES TO REMEDY GRIEVANCES		Meets.	No Action Required.
(a) ESTABLISHMENT OF STATE-BASED ADMINISTRATIVE COMPLAINT PROCEDURES TO REMEDY GRIEVANCES			
(1) ESTABLISHMENT OF PROCEDURES AS CONDITION OF RECEIVING FUNDS- If a State receives any payment under a program under this Act, the State shall be required to establish and maintain State-based administrative complaint procedures which meet the requirements of paragraph (2)		Meets.	No Action Required.
(2) REQUIREMENTS FOR PROCEDURES- The requirements of this paragraph are as follows:			
	(A) The procedures shall be uniform and nondiscriminatory.	Meets.	No Action Required.
	(B) Under the procedures, any person who believes that there is a violation of any provision of title III (including a violation, which has occurred, is occurring, or is about to occur) may file a complaint.	Meets.	No Action Required.
	(C) Any complaint filed under the procedures shall be in writing and notarized, and signed and sworn by the person filing the complaint.	Meets.	No Action Required.
	(D) The State may consolidate complaints filed under subparagraph (B).	Meets.	No Action Required.
	(E) At the request of the complainant, there shall be a hearing on the record.	Meets.	No Action Required.

9. State-Based Administrative Complaint Procedures

A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402. -- HAVA §254 (a)(9)
Deadline for Compliance: Prior to certification of State Plan, but no later than January 1, 2004; no waiver permitted.

SBE has developed and adopted a procedure for complaints that meets HAVA requirements. Before the adoption of the procedures, State election laws provided for the processing of certain specific complaints, both at the administrative level and in court. These complaints were infrequent, as SBE received informal complaints mainly by phone, email, or the SBE website. Formal complaints will now follow the procedures adopted by SBE and codified as regulations in the Code of Maryland Regulations (COMAR).

The following matrix outlines HAVA requirements related to complaint procedures and the corresponding current status for the State.

10. Effect of Title I Payments

If the State received any payment under title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities. -- HAVA §254 (a)(10)

To date, the State of Maryland has not received Title I payments.

§101. Payments to States for activities to improve administration of elections.

Maryland is eligible for approximately $5.2M under §101. These funds will be used for activities to meet the following requirements:

§301 Voting systems	$2.2M
§303 Voter registration system	$1.0M
§254 (3) Training & outreach	$1.0M
HAVA program management	$1.0M
Total	**$5.2M**

§102. Replacement of punch card or lever voting machines.

Maryland is eligible for approximately $2.05 M under §102, as calculated in the following chart. The State understands that there may be a pro rata reduction to the maximum payment amount based on the total national participation under this section. State legislation makes local jurisdictions eligible to receive 50% of any federal funds "received for improvements in voting systems and equipment" under certain circumstances.

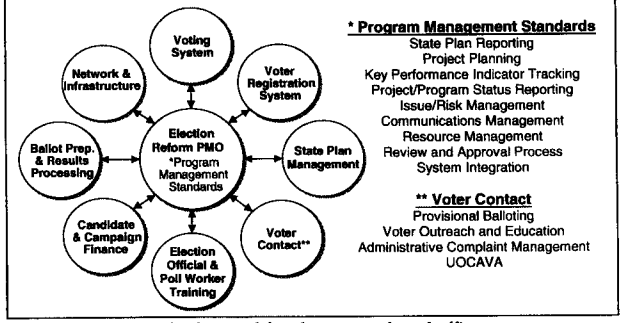
Locality	Number of Precincts	Maximum Payment Amount ($1,000 per precinct)
Allegany County	37	$148,000
Dorchester County	38	$152,000
Montgomery County	234	$936,000
Prince George's County	204	$816,000
Total	**513**	**$2,052,000**

Requirement		State of Maryland's Current Status (Meets Requirement, Partially Meets, Does Not Meet)	Actions Planned
	(F) If, under the procedures, the State determines that there is a violation of any provision of title III, the State shall provide the appropriate remedy.	Meets.	No Action Required.
	(G) If, under the procedures, the State determines that there is no violation, the State shall dismiss the complaint and publish the results of the procedures.	Meets.	No Action Required.
	(H) The State shall make a final determination with respect to a complaint prior to the expiration of the 90-day period, which begins on the date, the complaint is filed, unless the complainant consents to a longer period for making such a determination.	Meets.	No Action Required.
	(I) If the State fails to meet the deadline applicable under subparagraph (H), the complaint shall be resolved within 60 days under alternative dispute resolution procedures established for purposes of this section. The record and other materials from any proceedings conducted under the complaint procedures established under this section shall be made available for use under the alternative dispute resolution procedures.	Meets.	No Action Required.

11. Maryland's HAVA State Plan Management

How the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change—

(A) is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;



(B) is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and

(C) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A). -- HAVA §254 (a)(11)

The State intends to use the State Plan as the foundation for its future strategic direction. Consequently, sound and responsible management of the State Plan will be an essential component of the State election community's future success.

Due to the complexity of HAVA and the potential variety of projects it encompasses, SBE will establish an Election Reform Program Management Office (PMO). The Election Reform PMO will conduct ongoing management of the State Plan, including project planning (for all HAVA-related and other election reform projects) and establishing and implementing program management standards (i.e. performance measures, review and approval processes, issue/risk management, etc.). The PMO will also be responsible for other election functions, including: budget and fiscal, personnel, and office support functions. The illustration in Figure 11.1 represents some of the projects that the PMO will coordinate to ensure the successful implementation of HAVA requirements.

Figure 11.1: Centralized Election Reform Program Management

The State understands and agrees to comply with HAVA requirements related to ongoing management of the State Plan. More specifically, the State agrees that it may not make any material change in the administration of the State Plan unless the change:

(A) is developed and published in the Federal Register in accordance with HAVA §255 in the same manner as the State Plan;

(B) is subject to public notice and comment in accordance with HAVA §256 in the same manner as the State Plan; and

(C) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).

12. Changes to State Plan from Previous Fiscal Year

In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year. -- HAVA §254 (a) (12)

This FY 2003 Plan is the State's inaugural plan under HAVA. This section will be updated in the FY 2004 Plan, reflecting changes to the Plan, as well as a summary of 2003 successes.

13. State Plan Development and Committee

A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the committee under such section 255 and section 256. - HAVA §254 (a)(13)

The State's committee consists of individuals representing a cross-section of election stakeholders. The State Plan Committee was selected by the chief State election official, Linda Lamone, State Administrator for SBE.

Members of the State Plan Committee, and the primary qualification of each for being a committee member, are as follows:

- Linda Lamone, State Administrator, State Board of Elections;
- William E. Anderson, Department of Aging ADA Coordinator, Anne Arundel County;
- Jacqueline McDaniel, Baltimore County Election Director;
- Margaret Jurgensen, Montgomery County Election Director;
- Robin Downs, Maryland Association of Election Officials (MAEO) President/ Prince George's County Election Director;
- Linda Pierson, League of Women Voters;
- Michael Sanderson, representative of Maryland Association of Counties (MACo);
- James McCarthy, representative of National Federation of the Blind; and
- Kibbe Turner, Registered Voter.

In creating the State Plan, the State Plan Committee worked with Accenture, a project management vendor. The vendor was contracted to facilitate working sessions and to offer a fair and balanced assessment regarding the impact of HAVA requirements and proposed compliance steps. Based on an objective analysis of the State's current status, this State Plan highlights necessary adjustments and potential next steps in Maryland's election reform process.

The State Plan Committee will comply with the requirements of §255 and §256 of HAVA.

The Preliminary State Plan was published on the Maryland State Board of Elections website, following a public notice in the Maryland Register. The Preliminary Plan was available for 30 days of public comment, as required by HAVA. This State Plan incorporates the feedback from the 30-day period, and the honorable Governor Ehrlich is submitting this Plan for the HAVA-required 45 day publication period in the Federal Register.

INTRODUCTION

The Help America Vote Act of 2002

The Help America Vote Act (HAVA) was signed by President Bush in October 2002 in an effort to improve voting across the country and in response to the problems that arose in the 2000 presidential elections. (42 U.S.C. § 15301 *et seq.*). This federal legislation makes changes in the election process and applies to all federal elections in the United States. The most significant areas impacted by the legislation include voting equipment standards, including accessibility, provisional voting, voter registration, and voting, including voter education.

HAVA provides certain federal funding to meet the new requirements over the next three years. The availability of the money is, however, dependent upon federal appropriations and certain additional federal funding is dependent upon the appropriation of matching state funds. There are two types of funding that Massachusetts is eligible to receive—Title I and Title II funding.

The first type of funding, under Title I, has two components—Section 101 and Section 102 funding. The first component under Section 101 provided $325 million in funding for complying with the requirements of Title III.[1] The requirements under Title III include improving election administration, educating voters, training election officials and poll workers, developing the state plan for implementing HAVA, improving voting systems, and improving polling place accessibility. Massachusetts' share of the Section 101 funding is $6,590,381.

The funding available under Section 102 is to be used to replace lever machines and data-vote voting equipment as well as for acquiring accessible voting equipment.[2] The amount that Massachusetts is eligible to receive is based on the number of precincts that used lever and data-vote machines at the 2000 elections. Although HAVA authorizes an appropriation of $4,000 per precinct to replace lever and data-vote equipment, given the amount actually appropriated, this amount was reduced to $3,192.22 per precinct. Massachusetts' share of the Section 102 funding is $1,519,497.

The second type of funding--Title II funding--is to be used for continued implementation of the requirements of the act including poll worker training, providing voter education and improving the administration of federal elections.[3] This type of funding requires each state to provide matching funds, in the amount of 5 %, to those funds supplied by the federal government. Massachusetts could receive up to $69 million of the $3 billion available under Title II.

In order to receive funds under this provision, Massachusetts is required to submit a plan setting forth how it intends to comply with the act and will need to contribute $3.45 million in matching state funds.[4] The following is the Massachusetts state plan (hereinafter referred to as the "Plan") submitted pursuant to this requirement (Title II). The Plan was developed in an open manner and subject to public notice and comment by the State Steering Committee, which is comprised of state and local election officials as well as other special interest groups.[5]

The state must submit this Plan to the Election Assistance Commission (EAC)[6] and must submit similar plans in the future for each fiscal year to be eligible for a payment for that year. If the state intends to use the money for anything other than the federal requirements, the use must not be inconsistent with federal requirements. The submitted plan for each fiscal year must include the following provisions:

- How the requirements payment will be used;
- How the state will distribute and monitor the distribution of the payment to municipalities or "other entities" within the state (including the criteria for their eligibility for the funding);
- How the state will provide voter education and poll worker training;
- How the state will adopt voting system guidelines which are consistent with federal requirements;
- How the state will establish the funds to accept the federal dollars;
- What the state's budget is for activities;
- How the state will maintain their expenditure level so that it is not less than the expenditure level of the fiscal year ending prior to November 2000;
- How the state will measure performance to determine success for the state and for the local government in carrying out the plan such as timetables and outlining responsibilities;
- A description of the uniform, non-discriminatory state-based administrative procedure;
- If the state received the "early out money" to replace voting equipment, information on how it was used and the impact on the plan;
- How the state will conduct ongoing management of the plan;
- If applicable, any changes from the previous fiscal year's plan and a report on the success of the previous year's plan;
- A description of the committee who helped develop the state plan.

This plan must be completed by September 15, 2003, for public inspection and comment and thereafter published in the Federal Register no later than October 15, 2003.

The remainder of the funding outlined in HAVA will be directed towards other programs such as accessibility improvements including increased polling place access for voters with disabilities, research to improve voting technologies and pilot programs to test new voting systems and voting technology.[7]

AN OVERVIEW OF ELECTIONS IN MASSACHUSETTS

In Massachusetts, the Secretary of the Commonwealth is the Chief Election Officer. As such, the Secretary's duties include the administration of federal and state elections, receiving nomination papers, printing ballots and tabulating election returns for federal and state elections as well as certification of voting equipment.

Federal and state elections are conducted at the municipal level. There are 351 municipalities within Massachusetts that each conducts elections. For towns, the local official responsible for conducting elections is the town clerk, and for cities, the city clerk or an election commissioner, as the responsible official, generally conducts elections.[8]

Each municipality is responsible for designating polling places, appointing and training poll workers, conducting voter registration sessions, and maintaining voter lists as well as management of elections themselves.[9]

Elections in Massachusetts are conducted in accordance with applicable federal law, the Massachusetts Constitution, the Massachusetts General Laws and the Code of Massachusetts Regulations. There is also a significant volume of case law relative to the election process in Massachusetts.

As of the November 2002 State Election, there were 3,972,622 registered voters. There were 2,220,301 ballots cast at the 2002 State Election.[10]

The Help America Vote Act provides Massachusetts with an opportunity to make significant improvements in the electoral process. The State Steering Committee will be responsible for developing the state plan that will be the foundation for Massachusetts' application for federal funding.

PREPARATION OF STATE PLAN

The Secretary appointed a State Steering Committee to develop this Plan. The State Steering Committee was comprised of local election officials, representatives from the disability community, elected officials, and public interest groups. A listing of the Steering Committee members can be found at Attachment A. The Steering Committee held five (5) meetings.

The Steering Committee determined certain priorities to be addressed in the plan:

1. Purchase and implementation of new voting equipment in those municipalities that are currently using lever machines or datavote and reimbursements to those municipalities that have replaced lever machines and datavote systems since November of 2000.

2. Provide increased access to the elections process for people with disabilities through the use of specially designed Direct Recording Electronic (DRE) voting systems, improvements to facilities, training of elections staff, and enhanced public outreach.[11]

3. Modify the Central Voter Registry, the statewide database of registered voters, to comply with new requirements of HAVA.

4. Implement a comprehensive voter education program that informs voters about how to correct their ballots and how to request replacement ballots.

5. Implement a toll-free line that allows voters to check the status of their provisional ballots and determine whether or not their ballot was counted.

6. Train elections officials in Title III requirements of the Act.

The Steering Committee formed three sub-committees: Voter Identification and Provisional Voting, Voting Equipment and Accessibility, and Training and Education. Each of the sub-committees held public hearings at various locations around the state seeking public comment.

While HAVA provides increased responsibility for elections administration at the state level to achieve greater uniformity and consistency, municipal election officials are charged with the conduct of elections and are crucial to all aspects of the elections process. As Massachusetts continues to conform to HAVA requirements and standards, the Secretary will continue to work with the members of the Steering Committee, especially those local election officials, in the development of new procedures and technology to ensure compliance with HAVA.

This Plan represents the Commonwealth's initial response to the requirements of HAVA. This Plan will be revised as progress is made in compliance.

ELEMENTS OF THE STATE PLAN

For each element required of the state plan, there is a summary of the HAVA requirements and then the Massachusetts response to those requirements.

ELEMENT 1:

How the Commonwealth will use the requirements payment to meet the requirements of Title III and if applicable, under Section 251(a)(2) to carry out other activities to improve the administration of elections (Sec. 254, (a)(1).[12]

Within Title III, there are three sections: Section 301—Voting system standards; Section 302—Provisional balloting; and Section 303—Statewide list of registered voters and requirements when registering by mail. Within each of those sections are various subsections. The information being provided for Element One will follow the structure of Title III.

Voting System Standards—Section 301

HAVA requires that each voting system used in a federal election on or after January 1, 2006, meet each of the following requirements:

(1) Balloting errors:

(a) Voter verification of ballot selections (and correction)

The voting system must:

(i) permit the voter to verify privately and independently the votes selected before casting a ballot;

(ii) permit the voter privately and independently to change or correct a ballot before it is cast (including receiving a replacement ballot).

(Note that the requirement that a voting system permit the voter to verify the votes selected before casting a ballot may not be defined in a manner that makes it impossible for a paper ballot voting system to meet the new requirements of HAVA.)

(b) Voter notice on overvoting (and correction)

The voting system must:

(i) notify the voter of an overvote (casting votes for more candidates than allowed);

(ii) notify the voter of the effect of overvoting (i.e. the vote for that office will not be counted);

(iii) provide the voter with the opportunity to correct the ballot, if he or she has overvoted.

(c) Paper-based voting systems compliance

Paper-based voting systems (including absentee balloting systems) may meet the above requirements with:

(i) voting-system specific voter education programs notifying the voter of the effect of overvoting;

(ii) instructions on how to correct a ballot before it is cast (including instructions on obtaining a replacement ballot);

(iii) system designs that preserve voter confidentiality.

(2) Voting system audit requirements:

The voting system must:

(a) produce a record with an audit capacity (The paper record produced shall be available as an official record for purposes of a recount.);

(b) produce a permanent paper record with a manual audit capacity;

(c) allow the voter to correct any error before the permanent paper record is produced.

(3) Accessibility for individuals with disabilities:

The voting system must:

(a) be accessible to voters with disabilities, including voters with visual impairment, in a manner that provides the same opportunity for access and participation, including privacy and independence, as for other voters.

(The above requirement is met by providing at least one DRE voting unit, or other voting system equipped for individuals with disabilities at each polling place.)

(All voting systems purchased with Title II funding after January 1, 2007, shall comply with these requirements.)

(4) Alternative language accessibility:

The voting system must:

(a) meet all requirements of alternative language access of Section 203 of the Voting Rights Act of 1965 (42 USC 1973aa-1a).

(5) Error Rates:

The voting system must:

(a) meet FEC guidelines (Section 3.2.1) for voting system error rates (errors attributable only to system errors, and not an act of the voter) in effect at the time of HAVA's enactment (October 29, 2002).

(6) Definition of Vote:

Each state shall adopt uniform and nondiscriminatory standards that define what constitutes a vote and what will be counted as a vote for each category of voting system used in the State.

PROPOSED ACTION FOR HAVA COMPLIANCE WITH VOTING SYSTEMS STANDARDS:

To comply with HAVA, the Secretary intends, through the regulatory, legislative, voting system certification and decertification processes, or otherwise, to replace voting systems that do not comply with the new standards. As of November 2000, 434 precincts used lever voting machines and 42 precincts used data-vote voting systems. No precincts used punchcard voting systems.[13] As of November 2002, 392 precincts used lever machines and 11 precincts used data-vote voting systems. Pursuant to HAVA, the Secretary will seek replacement of these systems.

As of November 2002, 1665 precincts used optical scanning systems—1042 precincts used Accu-Vote, 176 precincts used Optech, and 447 precincts used Optech Eagle. Additionally, in November 2002, 90 precincts used paper ballots. HAVA does not mandate the discontinuation of such systems, but

instead, certain additional steps will be required, including voter education. However, those municipalities that continue to use either paper ballots or optical scanning voting systems will still be required to provide at least one accessible unit per polling location by 2006.[14]

In an effort to retain the integrity of the voting process, increase the opportunity for all eligible citizens to participate in that process, and to comply with HAVA, the Commonwealth, under the direction of the Secretary of the Commonwealth, as Chief Elections Officer, will, in part:

(a) support, promote and encourage the use of direct recording electronic (DRE/touchscreen) voting systems, at polling places in Massachusetts;
(b) expeditiously certify new DRE voting systems that are compliant with state and federal laws;
(c) through existing state law, which authorizes the Secretary to certify and decertify voting systems, develop voting system standards and system audit requirements as required in HAVA and institute an ongoing process to manage changes to these standards and ensure uniform application of the standards for each voting system including those requirements for "second chance voting";[15]
(d) develop voting system standards requiring, as part of certification process, that the system demonstrate the ability to support a representative set of possible future ballot procedure changes, including instant runoff voting, as feasible, with an upgrade cost that is substantially less than the cost of complete system replacement;
(e) develop and distribute voter education materials as appropriate to meet the requirements of Section 301(a)(1)(B) of HAVA;
(f) with the assistance of the disability community, ensure compliance with the accessibility requirements for individuals with disabilities, including ensuring that at least one DRE/touchscreen voting system is used in each Massachusetts polling place pursuant to Section 301(a)(3)(B) and, with respect to in-person voting, that the voting system itself be located in a polling place that is accessible to voters with disabilities. Compliance efforts shall include monitoring polling places to determine accessibility and education of elections officials, poll workers, and voters with respect to the rights of all voters, including voters with disabilities;
(g) continue to ensure that all voting systems provide alternative language accessibility pursuant to the requirements of the Voting Rights Act of 1965;[16]
(h) regularly evaluate voting systems to assess error rates, reliability and accuracy factors, accessibility to voters with disabilities, language assistance needs and literacy needs, and ability to accommodate alternative voting systems; work with local elections officials to share information and make improvements;

(i) develop, by regulation and/or by statute, a uniform and nondiscriminatory definition of what constitutes a vote and what will be counted for each voting system.

The Secretary intends to leave decisions regarding specific replacement of voting equipment to each municipality, so long as such decisions are consistent with the requirements of HAVA and applicable state laws and regulations. The Secretary will work with municipalities to provide reimbursement for procuring upgraded voting equipment as well as the purchase or lease of accessible equipment prior to the 2006 HAVA deadline.

Provisional Voting and Voting Information Requirements

Section 302(a) of HAVA requires that "provisional voting" be permitted in federal elections on or after January 1, 2004. Under HAVA, if a voter's name does not appear on the official list, or the elections official asserts the voter is ineligible, the voter is entitled to cast a provisional ballot as follows:

(a) Elections officials at polling place notify voters of the provisional ballot option;

(b) Voter executes written affirmation stating:

He or she is a registered voter in the jurisdiction; and
He or she is eligible to vote;

(c) The voted ballot or written affirmation information is promptly transmitted to appropriate state or local elections official for verification;

(d) If the information is verified, the ballot shall be counted;

(e) At the time the voter casts the ballot, the voter shall be provided with information about the existence of a free access system (e.g. secure, confidential telephonic or Internet-based system) that restricts access to information on individual ballots, so that only the voter who casts the ballot may determine her or his individual ballot status;

(f) State or local officials shall establish the free access system.

HAVA also requires (Section 302(c)) that voters who cast ballots after the normal poll closing as a result of a Federal or state order, vote by provisional ballot that is segregated from regular provisional ballots.

Further, Section 302(b) requires that, with respect to federal elections held on or after January 1, 2004, elections officials post specified voting information at each polling place on Election Day, including:

(a) a sample ballot for that election;

(b) the election date and polling place hours;

(c) voting instructions, including provisional voting instructions;

(d) mail-in registrant and first-time voter instructions;

(e) general voting rights information, including the right to cast a provisional ballot and instructions on how to contact appropriate officials regarding allegations of violations;

(f) general information on legal prohibitions on fraud and misrepresentation.

PROPOSED ACTION FOR HAVA COMPLIANCE WITH PROVISIONAL BALLOT AND VOTING INFORMATION REQUIREMENTS

Provisional Voting

Massachusetts currently offers a type of provisional balloting known as escrow ballots.[17] Escrow ballots are offered to persons whose names do not appear on the list of registered voters, or in a primary, to those persons who claim a listing error (wrong party). Escrow ballots are reviewed only if they could possibly make a difference in the outcome of an election. If there is sufficient number of escrow ballots to make a difference in the outcome of an election, a hearing is held to determine whether the ballot should or should not be counted.

The escrow balloting procedure does not meet the requirements of provisional voting under Section 302 of HAVA. The Secretary, in consultation with local election officials and other interested persons, intends to:

(a) develop uniform information and procedures on provisional voting, and voting generally, as required by HAVA, and take steps to ensure that elections officials, poll workers and voters thoroughly understand provisional ballot rights and procedures;
(b) to the extent permitted by law, develop procedures allowing voters to cast a provisional ballot at the polling place upon signing a statement affirming the required information, without providing additional identifying documents;
(c) to the extent permitted by law, develop procedures whereby the information obtained to acquire a provisional ballot is sufficient to register the applicant to vote, if otherwise eligible, in future elections should it be determined that the person is not eligible to vote in the precinct for which the provisional ballot is sought or cast;

(d) develop procedures whereby a provisional ballot is counted provided that there is compliance with the verification procedures set forth in Massachusetts General Laws and regulations;
(e) consider sponsoring legislation amending the Massachusetts General Laws whereby a person's provisional ballot is counted with respect to those candidates and measures for which the person is entitled to vote even if the provisional ballot is cast in the incorrect precinct;
(f) create, or oversee the creation of, in conjunction with local elections officials, a secure and confidential free access system for a provisional voter to determine if his or her vote was counted, and, if it was not counted, the reason it was not counted **or** develop procedures whereby every person who casts a provisional ballot is notified as to the status of that ballot in terms of whether it was counted or not counted, and if not counted, why it was not counted;
(g) develop procedures for complying with the requirements that ballots cast after the close of the polls pursuant to a court order be provisional and be segregated;
(h) ensure compliance with Section 203 of the Voting Rights Act (42 U.S.C. § 1973aa-1a).

Voting Information

The Secretary currently provides local election officials with posters containing instructions on voting and penalties for voting offenses, which are required to be posted in each polling location. Also, "specimen ballots" are produced and required to be posted at each polling location.[18]

Additionally, the Secretary publishes and sends certain voting information to each household containing a registered voter.[19] This information is published in the "Information for Voters" booklet and is distributed before every state election. The booklet is also available on our website.[20] The booklet is published in English and Spanish and a large print and audio version are available.

To comply with HAVA, the Secretary will work with local election officials to make any necessary revisions to voting materials to ensure voters have proper instructions on:

- the date of the election
- the deadline for registering to vote
- due date/time of absentee ballots
- the hours and locations of polling places
- the location and address of local elections offices
- instructions on how to vote a ballot including how to use the voting equipment
- instructions on how to request a replacement ballot or provisional ballot and how to check the status of a provisional ballot
- instructions for first-time voters and identification requirements

- information on voting rights and what to do if these rights are alleged to have been violated
- general information on federal and state election laws regarding fraud and misrepresentation.

The Secretary intends to work with the disability community to develop alternative methods and standards for conveying this information at the polls to disabled individuals.

Computerized Statewide Voter Registration List Requirements and Requirements for Voters Who Register by Mail

Section 303 of HAVA requires that the Secretary of State, as Chief Elections Officer, implement, in a uniform and nondiscriminatory manner, by January 1, 2004, a single, uniform, official, centralized, interactive computerized statewide voter registration list defined, maintained, and administered at the State level that contains the name and registration information of every legally registered voter in the State and assigns a unique identifier to each such voter.

(1) The computerized list shall:
(a) be the official voter registration list for federal elections;
(b) serve as the single system for storing and managing the official list;
(c) contain the name and registration information of every registered voter;
(d) contain a unique identifier (DL#, partial SS#, or assigned number) for each voter;
(e) be coordinated with other state databases (Corrections, Health Services, DMV, other state social service agencies and Social Security);
(f) provide immediate, electronic access to any election officials in the state;
(g) allow for electronically entering data by any local election officials on an expedited basis;
(h) be supported by the State.

(2) Maintenance of the official list shall be performed on a regular basis as follows:
(a) voters names shall be removed in accordance with NVRA (42 U.S.C. § 1973gg, Section 8, (a)(4), (c)(2), (d) and (e);
(b) ineligible voters shall be removed in accordance with NVRA for felony status (42 U.S.C. § 1973gg, 6(a)(3)(B)); for death (6(a)(4)(A)); or in accordance with state law;
(c) each registered voter's name shall appear on the list;
(d) only ineligible voters or voters not registered shall be removed from the list;

(e) duplicate names shall be removed from the list;
(f) other reasonable efforts to remove ineligible voters, consistent with the NVRA (42 U.S.C. § 1973gg, et. seq.) that ensure eligible voters are not removed in error, including removing registrants who have not responded to a notice and who have not voted in two consecutive general elections for federal office shall be removed from the official list of eligible voters, except that no registrant shall be removed solely by reason of failure to vote.

Section 303(a)(5)(A)(i), requires applicants to provide certain information which must be verified for their voter registration to be processed. Specifically, an application for voter registration for a federal election may not be accepted or processed unless it includes:

(i) the driver's license number of an applicant who has been issued a current, valid driver's license; or, if a valid driver's license has not been issued;
(ii) the last four digits of an applicant's social security number.

However, if an applicant has not been issued a current, valid driver's license or a social security number, then:

(i) The State shall issue a unique identifying number.

To the extent the State has a computerized list, this unique identifying number shall be the number assigned to the applicant for purposes of the computerized list.

The State shall determine whether the information provided by the applicant (driver's license number or partial social security number (the last four digits)) is sufficient to meet the requirements of HAVA. [21]

The Secretary shall enter into a cooperative agreement with the Department of Motor Vehicles, and the Department of Motor Vehicles shall enter into an agreement with the Commissioner of Social Security, to verify the accuracy of the information provided by the voter registration applicant, specifically:

(a) the applicant's name (first name and forename or surname);
(b) the applicant's date of birth;
(c) the applicant's social security number;
(d) whether such records show the applicant is deceased.

(Nothing shall be construed to require provision of applicable information under exceptional circumstances (e.g. personal safety or interference with an investigation).)

Beginning January 1, 2004, each State must, in a uniform and nondiscriminatory manner, require proof of residence from a registered voter for purposes of casting a ballot in a federal election, if the voter: (a) registered to vote in a jurisdiction by mail on or after January 1, 2003, **and** (b) has not previously voted in an election for federal office in the State, or voted in a jurisdiction and the jurisdiction is located in a State that does not have a HAVA-compliant statewide voter registration computerized list.

If the voter meets these conditions, and he or she **votes in person** (at a polling location), the voter shall, in order to vote, present to the appropriate elections official:

i. a current and valid photo identification, **or**
ii. a copy of one of the following that shows the name and address of the voter:
    (i) a current utility bill;
    (ii) a bank statement;
    (iii) a government check;
    (iv) a government paycheck;
    (v) a government document.

If the voter meets these conditions, and he or she **votes by mail** (absentee ballot), the voter shall, in order to vote, submit with his or her ballot to the appropriate elections official a copy of one of the following that shows the name and address of the voter:

(a) a current and valid photo identification, **or**
(b) a copy of one of the following that shows the name and address of the voter:
    (i) a current utility bill;
    (ii) a bank statement;
    (iii) a government check;
    (iv) a government paycheck;
    (v) a government document.

Any voter subject to these requirements who votes in person and who does not provide proof of residence as required shall be provided a provisional ballot.

Any voter subject to these requirements who votes by mail (absentee ballot) and who does not provide proof of residence as required shall have their ballot treated as a provisional ballot.

There are certain exceptions to this provision. Specifically, the identification requirements for first-time voters do not apply when:

(1) The voter registers under Section 6 of the NVRA (42 U.S.C. § 1973gg—4) and submits as part of the voter registration a copy of:
    (a) a current and valid photo identification, **or**;

(b) a copy of one of the following showing the name and address of the voter:

(i) a current utility bill;
(ii) a bank statement;
(iii) a government check;
(iv) a government paycheck;
(v) a government document.

(2) The voter registers under Section 6 of the NVRA (42 U.S.C. § 1973gg—4) and submits as part of the registration (subject to state verification of the information, including the applicant's name and birth date):

(a) a driver's license number, **or**
(b) at least the last four digits of their social security number.

(3) The voter is entitled to vote by absentee ballot under the Uniform and Overseas Citizens Absentee Voting Act (42 U.S.C. § 1973ff—1 et seq.).

(4) The voter is entitled to vote other than in person by Section 3(b)(2)(B)(ii) of the Voting Accessibility for the Elderly and Handicapped Act (42 U.S.C. § 1973ee—1).

(5) The voter is entitled under federal law to vote other than in person.

HAVA also requires changes to mail-in voter registration forms. Mail-in voter registration forms developed under Section 6 of the NVRA (42 U.S.C. § 1973gg—4) must include the questions:

(1) Are you a citizen of the United States of America? (and)
(2) Will you be 18 years of age on or before election day?

The forms must also contain the statement: "If you checked "no" in response to either of these questions, do not complete this form."

New voter registration forms must request the applicant's drivers license number or last four digits of their social security number and must contain a statement informing the applicant that if the form is submitted by mail and the voter is registering for the first time, that additional information (a copy of documents for proof of residence; or a driver's license number or partial social security number) must be provided to avoid additional proof of residence requirements at the time of voting.

If an applicant fails to answer the question: "Are you a citizen of the United States of America?" the registrar shall notify the applicant of the failure to complete the form and provide an opportunity to the applicant to complete the form in a timely manner.

PROPOSED ACTION FOR HAVA COMPLIANCE WITH STATEWIDE DATABASE REQUIREMENT AND REQUIREMENTS FOR VOTERS WHO REGISTER BY MAIL:

Central Voter Registry of Massachusetts

As part of the implementation of the National Voter Registration Act of 1993 (Motor Voter), Massachusetts developed the Voter Registration Information System (VRIS).[22] The VRIS is a statewide database that contains the name and address of every registered voter in Massachusetts. The system connects 350[23] municipalities and the Registry of Motor Vehicles. The VRIS is a closed system that does not provide for Internet or outside access. Each municipality is responsible for updating and maintaining information relative to registered voters in their municipality. [24]

The processing of voter registrations using the VRIS system allows for the detection of duplicates and allows for municipalities to communicate information electronically such as deletion of a voter in one municipality when they register in another.

The Secretary maintains a Help Desk to provide support for the system. The Help Desk runs periodic reviews of the system for possible duplicates not detected at the time of registration. The Help Desk also works with the Department of Public Health to obtain reported death information that is communicated to the local election officials.

The Voter Registration Information System:

- ✓ Is a secure statewide voter registration database that is a single, uniform, centralized, interactive system that is defined, maintained, and administered at the state level;
- ✓ Provides local elections officials with immediate access to the voter registration information;
- ✓ Serves as the official voter registration list for federal elections;
- ✓ Assigns every voter a unique identifier (voter identification number);
- ✓ Coordinates with the Department of Public Health to obtain death information;
- ✓ Provides for the removal of individuals who are clearly ineligible to vote, in accordance with all state and federal laws, while ensuring that eligible voters are not erroneously removed from the registration list;
- ✓ Provides a mechanism to notify an individual with respect to changes in status or failure in registration, or proposed purging of the individual from the database as an eligible voter and affording the individual a reasonable opportunity to present clarifying or correcting information.

The Secretary currently provides ongoing technical assistance to local elections officials regarding the VRIS and ensures that the database and the information contained therein are not subject to improper use.

To comply with HAVA, certain changes to the VRIS will be necessary. Those changes include modifications to allow the system to interface with other state agencies to coordinate records and to communicate with the Registry of Motor Vehicles to verify driver's license and social security number information.

The Secretary has already begun discussions with the Registry of Motor Vehicles to determine what modifications are necessary to both computer networks so that information can be verified in a timely manner. The discussions have included what information will be verified.

In complying with the requirements of HAVA, the Secretary will, in part:

(a) Consider whether an applicant's state identification card number issued by the Massachusetts Registry of Motor Vehicles is sufficient to meet the requirements of a driver's license number;[25]

(b) To the extent permitted by law, establish a procedure for and rules requiring local elections officials to provide any person whose voter registration application is not accepted with written notice and an opportunity to correct errors or provide missing information;

(c) Clarify, in legislation or otherwise, to local elections officials, poll workers, and voters, which documents are valid for identification purposes under this section.[26]

Requirements for Voters Who Register by Mail

The Secretary will comply with HAVA's requirements with respect to special requirements for certain voters who register by mail. In implementing these provisions, the Secretary will, in part:

(a) Ensure that elections officials, poll workers and voters understand clearly which voters are subject to the identification requirements; understand the procedures for soliciting, reviewing and processing identification; and advise individuals of their right to cast a provisional ballot when appropriate;

(b) Determine whether to apply the identification requirements only to those who meet the specific criteria set forth in Section 303(b)(1), namely those who register by mail on or after January 1, 2003, **and** who have not previously voted in an election for federal office in the jurisdiction or to seek legislation to require all voters to present identification;

(c) Clarify for voters, local election officials, and poll workers, in a uniform and nondiscriminatory way, which forms of identification are acceptable to be used as valid identification as permitted under Section 303(b)(2)(A), construing such provisions of law broadly in permitting the use of the identification to satisfy the requirements of HAVA;

(d) Monitor the application of the identification provisions, including providing instruction on how to report alleged illegal application of identification requirements;

(e) Ensure compliance with Section 203 of the Voting Rights Act (42 U.S.C. § 1973aa-1a).

The Secretary will work with local election officials to determine the most practical application of the HAVA requirements.

Mail-In Registration Form Requirements

The Secretary is working with local election officials to re-design the voter registration forms used in Massachusetts. Any new form will include the questions: "Are you a citizen of the United States of America?" and "Will you be 18 years of age or older on or before election day?". The new forms will also instruct the voter not to complete the form if they answered "no" in response to either of the questions. The new forms will be designed to instruct the voter to provide their driver's license number or, if they do not have a driver's license, to provide the last four digits of their social security number, and inform the voter that if they have neither, that they will be assigned a unique identifier.

The forms will also include information relative to identification requirements. For voters who do not submit identification with their registration, local election officials will take the following steps:

- Register the voter, inform the voter that their voter registration has been processed and request identification from the voter using a form letter which indicates that if they do not provide the identification before the next federal election, they will be required to present it at the polls on election day.
- If identification is not received prior to the next federal election, request identification at the polls on election day when the voter appears to vote.

Use of Requirements Payment for Other Than Complying with Title III

Section 251(b) permits the use of requirements payments only for complying with Title III, EXCEPT that a State may use a requirements payment

to carry out other activities to improve the administration of elections, if the state certifies that it has implemented the requirements of Title III **or** the amount expended with respect to such other activities does not exceed an amount equal to the minimum payment amount applicable to the State under Section 252(c) (1/2 of 1 percent of the total amount appropriated for requirements payments for the year).

PROPOSED ACTION FOR HAVA COMPLIANCE WITH USE OF REQUIREMENTS PAYMENT FOR OTHER THAN COMPLYING WITH TITLE III

The Secretary intends to, in consultation with local election officials and other interested persons, determine how any funds available pursuant to Section 251(b) should be spent in order to improve the administration of elections for federal office in the Commonwealth of Massachusetts.

ELEMENT 2:

How the State will distribute and monitor the distribution of the requirements payments to units of local government or other entities in the state for carrying out the activities described in paragraph (1) including a description of:

(a) The criteria to be used to determine the eligibility of such units or entities for receiving the payments; and

(b) The methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8) (Sec. 254, (a)(2)).

HAVA requires that payments available be used for the purposed described in Element One, or as otherwise authorized by HAVA. The Secretary of the Commonwealth, as Chief Elections Officer, is required to establish a procedure for distributing and monitoring payments to local governments and other entities. This procedure must be developed in consultation with local elections officials and other interested parties, and after considering any voluntary guidelines adopted by the Commission pursuant to Subtitle B of Title III.

To assist in this regard, the Secretary will work with the Steering Committee who will advise and make recommendations regarding the distribution of funds. After considering the advice and recommendations of the Steering Committee, the Secretary intends to:

(a) establish the procedure, including an application forms and process, for receiving funds;
(b) establish criteria for the distribution of funds, including identification of the types of individuals and entities eligible to receive funds;
(c) establish specific performance goals and measures to monitor the use of those funds, requiring periodic reports and accounting to the Secretary to ensure the funds are being spent in accordance with Title III and the application for funds, and to ensure that programs are meeting the performance goals and measures adopted by the Secretary;
(d) by general press release, by posting on the Internet, by communication to interested parties, and other appropriate methods, make the application for funds, the performance goals and measures, and other information regarding the procedure for the distribution of funds, publicly available.

As HAVA requirements result in significant changes on a municipal level, the Secretary will ensure that municipalities have an opportunity to seek funding to improve the election process. For funding to replace or obtain additional voting equipment, the Secretary intends to provide a reimbursement program. The municipality will be required to provide detailed information to the Secretary regarding the equipment as well as planned education for the new equipment.

The Secretary will also consider providing grant programs to other organizations for purposes of voter registration and voter education.

ELEMENT 3:

How the state will provide for programs for voter education, election official education and training, and poll worker training which will assist the state in meeting the requirements of Title III.

All participants in the elections process, including poll workers and voters, can benefit from instruction in elections law and procedure. The Secretary intends to provide programs for voter education, election official education and training and poll worker training. The Secretary intends to develop such programs in consultation with local election officials and other interested persons.

Election Official Education and Training and Poll Worker Training

As the chief elections officer of the state, it is the Secretary's responsibility to obtain and maintain uniformity in the application, operation, and interpretation of State election laws. However, as previously indicated, elections in Massachusetts are administered by local election officials, who are responsible for appointing and training poll workers.

The Secretary currently works with the local election official's organization to coordinate training. Both the City and Town Clerks' Associations hold meetings three times a year. During those meetings, the Secretary often teaches classes on various topics relating to elections. Additionally, the Secretary is available to assist with poll worker training upon request.

The Massachusetts Town Clerks' Association has also developed an educational and certification program to establish minimum standards of knowledge of the Massachusetts General Laws and regulations relating to elections, and to enhance the professionalism of the position. To be awarded the designation of "Certified Massachusetts Municipal Clerk," participants are required to pass a written examination based on the contents of the education programs. The Town Clerks' Association also offers scholarships and encourages clerks to further their education by participating in the educational program sponsored by the New England Municipal Clerks Institute (NEMCI) that is held at Salve Regina University.

To ensure compliance with Title III of HAVA and improve the overall administration of elections the Secretary will work with local election officials to:

(1) Sponsor annual election administration workshops, and require local election officials to participate, using federal funds, if available;
(2) Continue to attend and participate in City and Town Clerk Association meetings to communicate concerns, practices, and information;
(3) Produce separate training presentations for election officials, staff, and board workers on specific election practices and procedures;
(4) Consider developing statewide training videos or PowerPoint presentations for poll workers, including special instructions for various positions such as warden and clerk;

(5) Conduct and videotape a statewide training session on the needs of voters with disabilities for all local elections officials;
(6) Consider establishing, in conjunction with local elections officials, an on-line, interactive training seminar to train, educate and certify elections officials and poll workers while ensuring that such seminar is accessible to the widest possible audience, including bilingual poll workers and poll workers with disabilities;
(7) Ensure that any training provided to poll workers cover at least the following topics:
    (a) the proper operation and maintenance of voting systems and technology;
    (b) the rights of voters to cast provisional ballots and the proper processing and counting of those ballots;
    (c) the non-discriminatory application of HAVA's identification requirements for certain voters who register by mail;
    (d) the rights of minority language voters in jurisdictions covered under Section 203 of the Voting Rights Act of 1965 to receive language assistance at the polling place.

Voter Education and Outreach

The Secretary intends to embark on new voter education and outreach initiatives. Such programs will be designed after consultation with local election officials and other interested parties.

In the past, the Secretary has sponsored a grant program for voter registration organizations to conduct voter registration and promote voter education. The program was recently discontinued due to lack of funding. Using the monies from HAVA, the Secretary intends to reinstate the program.

Also, to meet the requirements of HAVA and to enhance the administration of elections, the Secretary intends to:

(1) establish an outreach and education program in the Office of the Secretary of State to educate local elections officials and voters, and to do the following:
    (a) to assist in meeting the goals and requirements of Title III;
    (b) to serve as a "clearinghouse" for the coordination of voter education;
    (c) to produce and place public service announcements relative to poll worker recruitment and voter education;
    (d) to design and post additional information on the website regarding the voting process;
    (e) to target younger voters and those not yet old enough to vote regarding the importance of and the mechanics of participating in the voting process;

    (f) to educate all eligible citizens as to the procedures relative to voting;
    (g) to work with federal, state and local governmental agencies, including the Registry of Motor Vehicles, to streamline the procedures to facilitate voter registration and voter participation;
    (h) to develop procedures for informing individuals whose attempted efforts to register to vote or to vote are defective, and to provide for the correction of such deficiencies;
    (i) to explore proposals that may facilitate the opportunity to participate in the voting process, including Election Day registration, on demand absentee voting, and Election Day Holiday voting;
    (j) to take all other appropriate action to educate elections officials and voters regarding the voting process.

(2) through the process for distribution of funds, provide funds to local election officials and other entities, including community-based, employee-based, campus-based, and similar organizations, to assist in voter education, election official education and training, and poll worker training;

(3) consider enhancing the existing toll-free telephone number and Secretary of the Commonwealth website to provide additional information to citizens on how to participate in the elections process and ensure that there are sufficient staff and resources to make the toll-free number and the website easily accessible to persons with disabilities and persons with language assistance needs;

(4) consider the development of public service announcements and other videos that would be available for local cable networks;

(5) develop for posting in polling places, on the Internet, and elsewhere, materials in appropriate languages and in alternate formats (Braille, large print, audio tape, or electronic computer disk) containing useful information regarding the election process and how to participate in it. The Secretary shall ensure that such materials are accessible to the widest possible audience, including persons with disabilities and language assistance needs;

(6) encourage voter education efforts conducted in connection with the foregoing activities to cover at least the following topics:
    (a) information on how to register to vote;
    (b) information on how voters can determine the location of their polling places and hours of voting;
    (c) information on absentee balloting;
    (d) the proper use of voting systems and technology;
    (e) the rights of voters to cast provisional ballots;

(f) the rights of minority language voters in jurisdictions covered under Section 203 of the Voting Rights Act of 1965 to receive language assistance at the polling place;
(g) the availability of the complaint procedure and toll-free numbers described in this State Plan;
(h) the rights of voters with disabilities in jurisdictions covered under the Voting Accessibility for the Elderly and Handicapped Act to receive assistance at the polling place.

(7) re-assess the information currently provided by the Secretary's office, including but not limited to, the Information for Voters guide. The informational material will be re-evaluated to determine what information needs to be modified and what additional information should be provided. The Secretary will direct sufficient resources towards strengthening existing publications and programs and establishing ones that will be the most effective in addressing voting issues in Massachusetts.

ELEMENT 4:

How the State will adopt voting system guidelines and processes that are consistent with the requirements of Section 301.

Section 254(a)(4) of HAVA requires the Commonwealth to describe how it plans to adopt voting system guidelines and processes that are consistent with the requirements of Section 301 of HAVA. The Secretary, under existing state law and regulation, certifies voting systems and equipment.[27] The procedures for the use of voting equipment is set forth in the general laws and in the Code of Massachusetts Regulations. The Secretary also has the authority to decertify voting systems and equipment, and the procedures for their use. No voting system may be used for any election without being certified.

The Secretary, through existing processes, after considering any voluntary guidelines adopted by the Commission pursuant to Subtitle B of Title III, will certify and decertify voting systems, and the procedures for their use, to ensure that all voting systems and the procedures for their use comply with the requirements of Section 301 and other provisions of HAVA.

ELEMENT 5:

How the State will establish a fund described in Section (b) for purposes of administering the State's activities under this part, including information on fund management.

Section 254(b) of HAVA requires the Secretary to establish a fund to be used to administer the state's activities relating to its requirements payments. The election fund is to include:

(1) amounts appropriated or otherwise made available by the State for carrying out the activities for which the requirements payment [has been] made to the State. . .;
(2) the requirements payments made to the State;
(3) such other amounts as may be appropriated under law; and
(4) interest earned on deposits of the fund.

The Secretary of the Commonwealth has administratively established an Election Fund. The Secretary's fiscal, accounting, and budgeting offices will have overall responsibility, under the direction of the Secretary of the Commonwealth, for the administration of this fund. The administration of the fund will meet all requirements of federal and state law for fiscal management.

ELEMENT 6:

The State's proposed budget for activities under Part II of HAVA, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on:

(A) the costs of the activities required to be carried out to meet the requirements of Title III;
(B) the portion of the requirements payment which will be used to carry out activities to meet such requirements; and
(C) the portion of the requirements payment which will be used to carry out such other activities.

Section 254(a)(6) of HAVA requires the Secretary to describe in the state plan a budget for its proposed activities and anticipated expenditures for those activities.

HAVA creates additional requirements on states. The success of this reform effort is dependent upon adequate funding. It is important to realize that budgetary issues cannot be completely resolved until the amount of funds available is finally determined, the voluntary guidelines (Subtitle B of Title III) promulgated by the Commission can be considered, and the costs of actual implementation are ascertained. However, as the Election Assistance Commission has not yet been established to develop and announce specific funding and guidelines, no further funding has been determined. Accordingly, it is difficult to formulate a proposed budget. When the amount of funds are finally determined, the guidelines are promulgated, and the implementation costs can be ascertained, a detailed budget will be presented by the Secretary.

Section 253(b)(5) of HAVA requires that each state provide 5 % matching funds for the Title II funding. Massachusetts is working to appropriate such matching funds.

The general principles that are being followed in the budgeting process are set forth below:

(a) The Secretary of the Commonwealth will adopt policies and procedures to ensure that all funds received, including interest earned on those funds, with the exception of funds identified in Sections 251(b)(2)(A) and (B) from Title II allocations, will be used to accomplish the requirements of Title III.

(b) The Secretary will identify its "maintenance of effort" level for each of the requirements in Title III and will not use HAVA funds to supplant activities already funded.

(c) The State will use some of the monies received under Section 101 to supplement the monies received under Section 102 for reimbursing those municipalities that used either lever machines or punch card voting machines at the 2000 election.

(d) No funds received pursuant to Title II will be used for purposes of litigation or payment of judgment.

(e) The Secretary will administer the Election Fund described in Section 254(b) of the Act.

SECTION 101 FUNDS BUDGET:

PURPOSE	AMOUNT
Statewide Voter Registration Database	$3,000,000
Voting Equipment	$1,246,944
Voter Education	$1,000,000
Poll Worker Training	$750,000
Alternative Language Assistance	$100,000
Provisional Balloting Information	$200,000
Administrative Expenses/Complaint Process	$200,000
Disability Access/Accessibility	$100,000
Miscellaneous/State Plan Expenses	$50,000
TOTAL	$6,646,944

SECTION 102 FUNDS:

All monies received under Section 102 will be directed to the municipalities. Additionally, certain amounts received under Section 101, as noted above, will be used to supplement any amounts provided to municipalities that are required to replace voting equipment.

TITLE II FUNDS:

The Secretary of the Commonwealth, in administering the Election Fund, will provide funding for the following specific requirements of Title III:

VOTING SYSTEMS STANDARDS

The Secretary will allocate funds to meet the requirements of Section 301. This may include allocation of funds to local election officials, according to allocation criteria developed by the Secretary.

If federal standards or state standards are adopted that require retrofitting of existing equipment, funds may also be necessary for this purpose.

The Secretary shall establish a procedure to determine which local election jurisdictions require or request funds to meet the requirement of

Section 301(a)(3) for at least one accessible voting system in each polling place. There are approximately 2,158 precincts in the Commonwealth of Massachusetts.

The Secretary shall ensure that all voting equipment meets the provisions of Section 301, including, but not necessarily limited to: (1) permitting voters to verify and correct their ballots prior to casting the ballot; (2) providing notice of the fact and effect of overvotes and permitting voters an opportunity to correct an overvote before the ballot is cast; (3) producing a permanent paper record with a manual audit capacity; (4) providing a uniform definition of a vote cast on any voting systems; (5) ensuring accessibility to persons with disabilities; (6) ensuring accessibility for language minorities as required by the Voting Rights Act of 1965, as amended; and (7) meeting the "error rate" guidelines adopted by the Federal Election Commission.

100% of the Section 102 monies will be dedicated to this purpose. Additional funding from Section 101 monies will be used to supplement monies distributed to municipalities for purposes of acquiring new voting equipment. It is estimated that an additional 15% of Title II monies will be used to acquire accessible voting equipment for each polling location as well as for other municipal activities.

PROVISIONAL VOTING

Massachusetts law does not currently provide for provisional voting that complies with the requirements of Section 302. Legislation will be introduced and regulations promulgated which provide for provisional voting in compliance with the requirements of Section 302. The Secretary intends to disburse funds to ensure that the provisional voting requirements are implemented and that all notices required by HAVA are developed and included at each polling place. In addition, the Secretary will, in cooperation with local elections officials, define a "free access" system (or systems) to permit voters to determine if their provisional ballot was counted and if it was not, why not. The funds necessary for this "free access" system will depend on the design of the system (Internet, telephone, etc.), who operates and manages the system (one state system, or local systems), and the volume of inquiries made by voters for the required information or the volume of notices provided to provisional voters.

It is estimated that 5% of the Title II funding will be dedicated to this purpose.

VOTER INFORMATION

HAVA requires that certain information be provided to voters at the polling place. This information shall include a sample ballot, the date and hours of voting, how to vote, how to vote a provisional ballot, procedures for first time

registrants required to present identification, a listing of the rights of voters and other general information on other laws and protections for voters.

The Secretary will ensure that the necessary materials are developed, distributed and provided at all polling locations.

Preliminarily, it is estimated that 7% of the funds will be dedicated for this purpose.

STATEWIDE DATABASE

The Secretary is required to develop a single, uniform, official, centralized, and interactive database of registered voters that is defined, maintained, and administered at the state level. The database shall be the official list of voters for federal elections.

Massachusetts currently has a centralized database called the Voter Registration Information System. The system was developed in response to the National Voter Registration Act of 1993 and meets all requirements of that act. The system will, however, need to be modified to meet the new requirements of HAVA.

The costs associated with modifications of the system will include establishing further connections with the Registry of Motor Vehicles to facilitate the verification of driver's license number and social security number.

Preliminarily, it is estimated that 10% of the available funds be used for this purpose.

REQUIREMENTS FOR VOTERS WHO REGISTER BY MAIL

The Secretary will develop procedures for the uniform implementation of the requirements of Section 303(b).

It is estimated that 5% of the funds will be dedicated for this purpose.

VOTER EDUCATION

Section 254(a) requires that the State Plan include a description of how Title II funds will be used to educate voters to assist in meeting the requirements of Title III. Educating voters on the use of new voting equipment as well as new procedures will be critical to the success of the reforms in the election process.

The Secretary will allocate substantial funds to the education of voters concerning voter registration, voting, new voting equipment, voter rights, and other appropriate subjects.

These funds will provide for educational efforts in the minority language and disability communities, and will make a special effort to inform and educate young voters as they begin their careers as voters.

In addition to funds expended by the Secretary, funds may be allocated to local elections officials, individuals, organizations, and others for educational purposes. Funding allocation will be in accordance with criteria established by the Secretary.

Outreach methods may include: printed materials, radio and television announcements, mailings, newsletters, organizing community groups and utilizing their networks to extend into the community, or other means to effectively reach the target audience.

Preliminarily, it is estimated that 10% of the funding available be used for this purpose.

ELECTIONS OFFICIAL EDUCATION

Section 254(a) requires that the State Plan include a description of how Title II funds will be used to educate election officials. Local election officials are a key component of a successful election as they actually administer elections and interact with the voters.

The Secretary will work with local election officials to develop a plan for specific training of election officials. The funding required for this training program will depend on the curriculum and program design.

Preliminarily, it is estimated that 20% of the available funds be dedicated for this purpose.

POLL WORKER EDUCATION

Section 254(a) requires that the State Plan include a description of how Title II funds will be used to educate poll workers.

The Secretary will expend and allocate funds to assist local elections officials in programs to train poll workers. These programs will include, among other topics, instruction on the proper operation of voting equipment, applicable federal and state laws, the specific needs of minority language and disabled voters, voting provisionally in accordance with the HAVA, procedures for voters who register for the first time by mail, and the rights of voters.

Preliminarily, it is estimated that 15% of the funding be dedicated for this purpose.

THE PORTION OF THE REQUIREMENTS PAYMENT THAT WILL BE USED TO CARRY OUT OTHER ACTIVITIES

Complaint Procedure

The Secretary will establish a complaint procedure that meets the requirements of Section 402. The funds necessary for administering this procedure will depend on the type and the number of complaints received and processed. Funding for administering the procedure is likely to come from the requirements payment. The Secretary would also use such funds for other administrative costs for implementation of HAVA.

It is estimated that 1.5% of the Title II funding would be dedicated to this purpose.

Other Costs:

Providing Grants to Organizations and Municipalities, including voter registration grants: 10%

Administrative Costs: 1.5%

SUMMARY OF COSTS AND PORTIONS USED TO CARRY OUT ACTIVITIES

The chart below lists activities and costs of HAVA to be implemented in Massachusetts. Should Congress fail to provide amounts authorized by HAVA, funding amounts for each activity will be reduced proportionately based on the percentage of the total funding the activity represents.

ACTIVITY	PERCENTAGE	PURPOSE
Voting Systems	100% of Section 102 Monies and 15% of Title II Monies	For the purchase of new voting equipment, including accessible equipment
Provisional Voting Information	5%	To establish a provisional ballot system and the required free access system
Voter Information	7%	To provide the required information to voters
Voter Registration Database	10%	Modifications to VRIS
Requirements for Voters Who Register by Mail	5%	To implement procedures uniformly
Voter Education	10%	Administered by state in coordination with municipalities
Election Officer Training	20%	Administered by State to municipalities
Poll Worker Training	15%	Administered by State in coordination with municipalities
Complaint Procedure	1.5%	To ensure that HAVA is implemented fairly
Administrative Expenses/ Implementation Costs	1.5%	For state personnel to administer HAVA and other costs for implementation
Grants	10%	Includes activities such as voter registration
TOTAL	100%	

ELEMENT 7:

How the state, in using the requirements payment, will maintain the expenditures of the state for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the state for the fiscal year ending prior to November 2000.

The Secretary of the Commonwealth, through the state's budgetary processes and the distributions of the requirements payment, intends to ensure that the expenditures of the state for activities funded by the payment will be maintained at a level that is not less than the level of such expenditures maintained by the state for the 1999-2000 Fiscal Year.

ELEMENT 8:

How the state will adopt performance goals and measures that will be used by the state to determine its success and the success of units of local government in the state carrying out the plan, including the timetable for meeting each of the elements of the plan, descriptions of the criteria the state will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.

Section 254(a)(8) of HAVA requires the Secretary to describe how the state will adopt performance goals and measures to be used by the Commonwealth to measure Massachusetts' success in implementing this state plan.

To ensure continued implementation and monitor performance, the Secretary intends to assign at least one employee of the Elections Division to oversee the HAVA project. This employee would be responsible for coordination of efforts between the state and municipalities as well as reporting progress to the Secretary.

The Secretary intends to:

(a) develop performance goals and measures, with timetables, descriptions of criteria, the process used to develop the criteria, and identification of accountable officials, to determine the effectiveness of all programs and efforts receiving HAVA funds;

(b) monitor, through consultations with local elections officials and interested individuals and organizations, the performance of the state, units of local government and other entities with respect to reaching goals and each and every provision of HAVA.

Some planned performance goals include:

- ✓ Elimination of lever voting machines and punch card voting systems: November 2004
- ✓ Implementation of Updates to Central Voter Registry System: January 2004
- ✓ Implementation of Free Access System for Provisional Voting: February 2004

ELEMENT 9:

A description of the uniform, nondiscriminatory state-based administrative complaint procedures in effect under section 402 of HAVA.

Section 402 of HAVA requires each state to establish and maintain a state-based administrative complaint procedure that:

(a) is uniform and nondiscriminatory;

(b) allows any person who believes that there is a violation of any provision of Title III to file a complaint;

(c) requires that the complaint be in writing and be notarized;

(d) permits consolidation of complaints;

(e) requires that there be a hearing on the record if the complainant requests such;

(f) an appropriate remedy be provided if the State determines that there is a violation of Title III;

(g) the complaint be dismissed and that the results be published if it is determined that there is no violation;

(h) a final determination be made within 90 days from the date the complaint is filed unless the complainant consents to a longer period for making such a determination;

(i) alternative dispute resolution procedures be established for resolving the complaint within 60 days if the State fails to meet the 90 day deadline set forth above.

Under the current provisions of Massachusetts General Laws, any person may complain to the Secretary of the Commonwealth, as Chief Elections Officer, that a pattern of conduct, or a standard, practice or procedure of a local election official is contrary to the elections laws.[28]

The Secretary will establish a uniform, nondiscriminatory state-based administrative complaint procedure in compliance with Section 402 of HAVA by amending the Code of Massachusetts Regulations.[29] The procedure will provide individuals with a meaningful, expedited means of voicing a complaint concerning the implementation of Title III of HAVA and an appropriate remedy if a violation has occurred. The procedure will address the accessibility needs of minority language voters and individuals with disabilities.

The complaint procedure will authorize any individual residing in the Commonwealth of Massachusetts to file a written complaint with the Secretary alleging that Title III has been violated, is being violated or is about to be violated. Pursuant to HAVA, the complaint must be notarized. (The Complainant must sign the complaint after being sworn by a notary public.) The Secretary intends to develop forms for filing such complaints, but any other form that meets the specified requirements will be accepted. Forms prescribed by the Secretary will be translated into appropriate languages.

The complaint may be filed in person at any office of the Secretary of the Commonwealth or mailed to Secretary of the Commonwealth, Elections Division, HAVA Complaint, 1 Ashburton Place, Room 1705, Boston, MA 02108. The Secretary may consolidate complaints when appropriate. When a complaint is filed, the Secretary shall assign an investigator, who shall be an employee of the Elections Division. The process will allow for the complainant to request a hearing on the record. A final determination, in writing, must be made within 90 days of filing the complaint. An appropriate remedy must be provided if a violation is found.

The process will include provisions if a determination is not made within 90 days, that an alternative dispute resolution will be provided.

ELEMENT 10:

If the state received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under such plan, including the amount of funds available for such activities.

Section 254(a)(10) of HAVA requires the Commonwealth to describe in its State Plan how funds that it has received under sections 101 or 102 of HAVA will affect the activities that the state plans to carry out under the State Plan. Section 254(a)(10) also requires the Secretary to state the amount of funds available for its proposed activities.

The Secretary intends to use the funding received by the Commonwealth under Title I of HAVA to assist the state and municipalities to implement the provisions of HAVA. The funding will be allocated as follows:

PURPOSE	AMOUNT
Statewide Voter Registration Database	$3,000,000
Voting Equipment	$1,246,944
Voter Education	$1,000,000
Poll Worker Training	$750,000
Alternative Language Assistance	$100,000
Provisional Balloting Information	$200,000
Administrative Expenses/Complaint Process	$200,000
Disability Access/Accessibility	$100,000
Miscellaneous/State Plan Expenses	$50,000
TOTAL	$6,646,944

All monies received under Section 102, will be dedicated to the replacement of lever voting machines and data-vote voting systems. The amount received for this purpose is $1,519,497.

ELEMENT 11:

How the state will conduct ongoing management of the plan, except that a state may not make any material change in the administration of the plan unless the change—

(a) is developed and published in the Federal Register in accordance with section 255 as required in the same manner as the State plan;

(b) is subject to public notice and comment in accordance with section 256 as required in the same manner as the State plan;

(c) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with section 255 of HAVA.

Section 254(a)(1) of HAVA requires the state to describe in its plan how it will conduct ongoing management of the plan.

The Secretary will provide ongoing monitoring and oversight of compliance with the requirements of HAVA. To facilitate such, the Secretary will require that:

(a) any official or other entity receiving any funds under HAVA will be required to make ongoing reports on progress of implementation;

(b) funds be awarded on a schedule or other basis that requires proof of satisfactory completion of one phase of a project before funds for the next phase are distributed;

(c) local election officials and members of the State Steering Committee be consulted on a continuing basis with respect to management of the State Plan and any perceived problems with its implementation and/or the need for material change;

(d) no material change be made in the administration of the State Plan prior to appropriate notice and publication in the *Federal Register*.

ELEMENT 12:

In the case of a State with a State Plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State Plan for the previous fiscal year and of how the state succeeded in carrying out the State Plan for such previous fiscal year.

As this is the first year Massachusetts is submitting a plan, there is no response to this element. Any changes to the State Plan for future fiscal years will be forwarded as required, including documentation as to the success under the plan for the previous fiscal year.

The Secretary will also provide copies of the same to the Senate and House Ways and Means Committees as well as the Office of Administration and Finance.

ELEMENT 13:

A description of the committee which participated in the development of the State Plan in accordance with section 255 of HAVA and the procedures followed by the committee under sections 255 and 256.

As discussed above in the Introduction, this Preliminary Plan was developed through a State Steering Committee of twenty-eight individuals representing a cross-section of Massachusetts. As required by Section 255(a), the individuals included the chief elections officials of the two most populous jurisdictions conducting federal elections in Massachusetts (the cities of Boston and Worcester), other local elections officials, stakeholders (including representatives of groups of individuals with disabilities) and other persons. The list of the members and biographical information is included below as Attachment "A."

The Committee, as discussed in the Overview, held five (5) public meetings. The Committee formed three sub-committees: Voter Identification and Provisional Voting, Voting Equipment and Accessibility, and Training and Education. Each of the sub-committees held public hearings at various locations around the state, inviting and receiving comment from the public. The Committee thereafter met in Boston and the Chairs of each of the sub-committees provided their findings to the Secretary. Those findings were considered by the Secretary in drafting the Preliminary State Plan which was first provided to the Steering Committee for comment before being released for public comment.

Attachment A

William Francis Galvin was elected to the Commonwealth's third-ranking constitutional office in 1994 and was sworn-in as the 28th Secretary of the Commonwealth of Massachusetts on January 18, 1995. He is currently serving his third 4-year term having been re-elected in 1998 and 2002. Sensitive to the Commonwealth's rich and storied history, Secretary Galvin, Chairman of the Massachusetts Historical Commission, has overseen the award of more than $26 million in preservation grants to sites in over 150 communities, and a grant program that helps cities and towns preserve their historical records. Besides serving as the Commonwealth's chief elections officer, Galvin is one of the state's premier election law specialists, an experience that helped prompt him to decertify the Votomatic punch card system in Massachusetts three years before its notoriety in Florida. Overseeing the "Motor Voter Law" which made it more convenient for people to register to vote, Secretary Galvin implemented the Central Voter Registry, the first statewide network of election records and increased voter registration to a record number. Designated the state liaison with the U.S. Census Bureau, Secretary Galvin targeted traditionally undercounted populations in a campaign that saw the Massachusetts census count become larger than predicted. As the state's chief securities regulator, Secretary Galvin has aggressively protected investors against fraud and has recovered millions of dollars for victims of scam artists and rogue dealers. Secretary Galvin has been an active participant in the National Association of Secretaries of State, serving first as Chairman of the Standing Committee on Securities and currently as Chairman of the Committee on Presidential Primaries. Secretary Galvin was born in Boston where he lives today with his wife Eileen and daughter Bridget. He graduated from Boston College in 1972 and Suffolk University School of Law in 1975. He is a member of the Massachusetts and Federal Bars.

Myra Berloff is the Acting Director of the Massachusetts Office on Disability, the state agency that works to eliminate discrimination against people with disabilities. Under her leadership the agency handles over 15,000 requests annually for individual or systemic advocacy, technical assistance or information and referral. During her years at MOD she has held the positions of Deputy Director and Assistant Director for Community Services. She is well known for her expertise in providing training and technical assistance to state agencies, municipal officials, Community Access Monitors, persons with disabilities, social service providers, and businesses on the Americans with Disabilities Act and other disability related laws and regulations. She spends much time promoting disability awareness throughout the state in order to advance the civil rights of people with disabilities. She helped design and continues to promote the nationally acclaimed Cultural Access Initiative that has trained representatives from over 30 states to make systemic changes that influence the quality and accessibility of cultural resources. Her work in the disability community was recognized with the Manuel Carballo Governor's Award for Excellence in Public

Service. She has been involved in promoting disability awareness for over 17 years.

Nancy Carapezza is the immediate past President of the League of Women Voters of Massachusetts. The League of Women Voters (LWV) is a nonpartisan organization that encourages informed and active citizen participation in government through citizen education and voters service projects. The League serves the public with individuals and organizations by providing advice and training on how to make government responsive and accessible. Nancy has also served as LWVM Vice-President for Citizen Education/ Voters Service and Vice-President for Local League Services. A resident of Wayland, she has served the local League in numerous offices. She is involved throughout the Commonwealth moderating debates and forums, and speaking at events on topics such as voter registration and participation in the political process, ballot questions, current public policy issues and Making Democracy Work. In 1995, she worked on the implementation of the National Voter Registration Act (NVRA/Motor Voter) here in the Commonwealth, and was then appointed to the Voter Registration Reform Advisory Committee. She is also a director of the Boston Network for Women in Politics and Government, a division of the McCormack Institute of Public Affairs at UMASS Boston. Nancy has worked as a probation officer and social worker. She is currently the coordinator of her Church's Confirmation Program and Wayland Public Schools Program: "Just Like Me: Understanding People with Disabilities".

Kathleen A. Casavant is representing the Massachusetts AFL-CIO.

Kim Charlson is the director of the Braille and Talking Book Library at the Perkins School for the Blind in Watertown, Massachusetts. She is a recognized national and international expert on library services for people with disabilities, Braille literacy, adaptive technology and information access. She serves on a number of committees for the National Library Service for the Blind and Physically Handicapped of the Library of Congress, and serves as a national member of the Braille Authority of North America, which is the standard-setting body for Braille. She is an active consumer advocate in many other arenas including guide dog issues, arts access, voting access, information and adaptive technologies, and disability policy development. In the area of education, she serves as the chair of the Department of Education's Braille Literacy Advisory Council. In advocacy and civil rights efforts, she served as the lead consumer advocate in the Fleet and Sovereign Bank Talking ATM initiative, and is an appointed member of the Governor's Advisory Council on Disability Policy. She has served as president of the Bay State Council of the Blind, the Massachusetts affiliate of the American Council of the Blind (ACB), and she has served as president of two national organizations -- Guide Dog Users Inc. and the Braille Revival League.

John Cloonan served as the Director the Elections Division in the Office of the Secretary of the Commonwealth from 1983 to 1999. Prior to that, Mr. Cloonan was the Supervisor of Election Material and the Assistant Supervisor of Elections. Mr. Cloonan had a total of 31 years of service in the Elections Division prior to his retirement in 1999. During that time, he worked on the implementation of the "Motor Voter Law" in the Commonwealth of Massachusetts. Mr. Cloonan has 4 children and 4 grandchildren and is enjoying his retirement spending time with them.

Diane Foley is the West Springfield City Clerk. Ms. Foley was first appointed as Assistant Town Clerk in 1986 and then appointed as Acting Town in 1987 before being elected as Town Clerk in 1987. She has served as Census Director and Clerk to the Board of Registrars since 1987 and was an elected Town Meeting Member from 1987 to 1993. In 2000, the form of government changed from Representative Town Meeting to a city form of government at which time Ms. Foley became City Clerk. Ms. Foley served as Clerk to City Council from 2000 to 2001. Recently, Ms. Foley was re-appointed for another three-year term as City Clerk. Ms. Foley is a Certified Massachusetts Municipal Clerk and has an Associates Degree in Legal Secretarial Sciences.

John Hanlon has been the City Clerk in the City of Everett since January of 1989. John has been a contributing member of the International Institute of Municipal Clerks, the Massachusetts City Clerks' Association, the New England Association of City and Town Clerks, Middlesex Town and City Clerks' Association, the North Shore Municipal Clerks' Association and a recent Affiliate Member of the Massachusetts Town Clerks' Association. He is a member of the MCCA Legislative Committee and was the most recent President of the MCCA for a two-year period. Prior to becoming City Clerk, John was a member of the Everett Board of Alderman for twenty-two years. Mr. Hanlon, always a community and charitable citizen has, in his career, been a three time loaned executive to the United Way, the United Way community chairman for two years and many years as a United Way volunteer, a special events chairman for the American Red Cross, the chairman of the Italian Earthquake Victim fundraising event. A longtime member of the Everett Chapter of the GBARC, a Senior Advisor of the Immaculate Conception CYO, Quarter Master for the Immaculate Conception marching band and the Chairman of the Everett Kennedy Statute fundraising events. At present, Mr. Hanlon is also a member of the Board of Directors for the Everett Credit Union.

Randall L. Hanson, CMC, MCMC, has been Town Clerk in Andover, Massachusetts for the past 14 years. She has a B.S. in Education and has worked providing constituent services for a U.S. Senator and has also worked in the Public Relations department of a regional bank. A life long resident of Massachusetts, Mrs. Hanson is a member of the Massachusetts Town Clerks Associations where she has chaired and is still a member of their Legislative Committee. She was an active member of the Secretary of State's task force

that help draft legislation to implement the federal legislation in 1993 to allow residents to register to vote by mail and at the registry of motor vehicles. Mrs. Hanson is also a member of the New England Association of City and Town Clerks, the International Institute of Municipal Clerks, Vice President of the North Shore City and Town Clerk's Association and is an active member of the Greater Lawrence Kiwanis Club that provides services to disadvantaged children.

Dominick Ianno is a seasoned veteran of the Massachusetts Republican political scene. He has worked as a research and media operative for several statewide Republican campaigns in Massachusetts, most recently for the successful Romney-Healey ticket in 2002. In addition to his extensive campaign experience, he spent two years serving as the Communications Director for the Massachusetts Republican Party (1999-2000) and one year as Press Secretary in the Executive Office for Administration and Finance (2001), where he was the chief fiscal spokesman for Governors Cellucci and Swift. In February 2002, Chairman Darrell Crate nominated Mr. Ianno to become the Executive Director of the Massachusetts Republican Party, where he is responsible for overseeing the party's day-to-day operations, including candidate recruitment, media relations and financial management. Dominick Ianno is a native of New Hartford, NY and currently resides in Watertown, MA. He has earned a Bachelor of Arts degree in political science from SUNY Oswego in 1995 and a Juris Doctorate degree from the New England School of Law in 1998.

Kamal Jain has worked in various technical staff and management positions in the high-tech industry for over 13 years. He currently is the Manager of Hosting Services at BrassRing in Waltham, Massachusetts. Prior to high-tech, he spent a number of years involved in volunteer and professional emergency services, including working for 2 years as an Emergency Medical Technician. Kamal has studied finance and accounting at Bentley College. He is 33-year resident of Massachusetts, and currently serves as Chairman of the Massachusetts Libertarian Party. He ran for State Senator from the Middlesex and Worcester district in 2000 and for State Auditor in 2002.

Philip W. Johnston is Chairman of the Massachusetts Democratic State Committee.

Peter Karg is the Executive Secretary of the Newton Election Commission. Mr. Karg was appointed to his present position in February 2002. He previously served in several senior level positions in the executive branch of state government. He holds a Bachelor and Master's degree from Northeastern University. In his present position he is responsible for the city census, voter registrations, campaign and political finance reports and elections.

Paul Lachelier is the Massachusetts Green-Rainbow Party representative to the Massachusetts HAVA Committee. He is a PhD student in political sociology specializing in electoral and non-electoral political participation. Mr. Lachelier

was the 2002 Green Party candidate for State Representative in Massachusetts' 26th Middlesex District (East Cambridge and East Somerville), garnering 37 percent of the vote. He has been a political activist for 11 years in student, labor and third party politics. He lives in Somerville, MA.

Nancy Lo is Chairperson of the Boston Election Commission and has been since December of 1999. Prior to her appointment as Chairperson, Ms. Lo served as the Director of the Mayor's office of Consumer Affairs and Licensing for approximately three years. Ms. Lo was Senior Policy Advisor to the Mayor for four years and previously worked in the Massachusetts office of United States Senator John Kerry for three years. Ms. Lo has a B.A. from Regis College and a Masters degree in Public Administration from Northeastern University. Ms. Lo currently resides in Jamaica Plain with her husband and three children.

Denise L. MacAloney, CMMC/MMC, has served as the Elected Town Clerk of Westminster, MA for the past 19 years. She has a BS Degree in History from Fitchburg State College and a MA Degree in Public Administration from Framingham State College. Her professional accreditations and certifications include Massachusetts Certified Municipal Clerk (CMMC), Master Municipal Clerk (MMC through the International Institute of Municipal Clerks) and she serves as a Justice of the Peace and Notary Public for the Commonwealth of Massachusetts. She is a past president of the Massachusetts Town Clerks' Association and the Worcester County City and Town Clerks' Association and is currently on the Board of Directors for the International Institute of Municipal Clerks (IIMC). She has served on the Central Voter Registry User Advisory Board, the Central Voter Registry Software Development Committee, and the Municipal Permit Streamlining Committee under the direction of the Secretary of the Commonwealth and was appointed to the Special Commission on Clean Elections by Director of the Office of Campaign & Political Finance.

Craig Manseau is Executive Director for the Worcester Election Commission.

John McGarry is a life long resident of Brockton and a graduate of Brockton Hospital School of Nursing. He has been employed in the medical industries as a nurse, orthopedic specialist and certified renal lithotripsy specialist. Mr. McGarry served as Assistant Registrar of voters for several years before being elected Ward Three councilor, a position that he held from 1990 until 1999. Mr. McGarry served as City Council President in 1993 and 1999 and was then appointed as Executive Director of Registrar of Voters by the City Clerk in 2000, which later became the Election Commission, by vote of the City Council. Mr. McGarry has been married for twenty five years to his wife Jan, who is a school nurse working with three and four year old multiple handicapped children in an early intervention program. Mr. and Mrs. McGarry have a daughter, Katie who recently graduated from Marymount Manhattan College with

a degree in Technical Theater and has already stage-managed two off Broadway shows.

Harry J. Petrucci is currently the Director of Local Administrative Assistance for the Secretary of the Commonwealth. As an employee of the Secretary, Mr. Petrucci worked in the Elections Division for 32 years. During that time, he served as the Secretary's designee to Local Election Districts Review Commission. This Commission reviews and approves the redrawing of precinct lines following the federal census. On the local level, Mr. Petrucci served on the Wakefield Planning Board for 5 years and on the Finance Committee for 19 years and was Chair of the Finance Committee for 3 years. He is a graduate of Boston College and the University of New Hampshire. He currently resides in Northampton.

Laurence R. Pizer has served as appointed Town Clerk of Plymouth since 1992. He was elected President of the Massachusetts Town Clerks' Association from 2001 to 2003, and he was appointed to the Legislative Committee of that organization. He earned the position of Certified Massachusetts Municipal Clerk from the Massachusetts Town Clerks' Association and the position of Certified Municipal Clerk from the International Institute of Municipal Clerks. He received a Bachelor's degree from Brown University and a Master's degree from the University of Iowa, both with a concentration in American history.

Senator Stanley Rosenberg (D-Amherst) was named President Pro Tem of the Massachusetts Senate on January 8th, 2003, thus becoming the first senator in the state's history to hold this leadership position. This appointment came after he served seven years in other leadership posts: four as Assistant Majority Leader and three years as the first western Massachusetts legislator to chair the Senate Committee on Ways and Means. Prior to his most recent appointments, Stan served as chairman of the state's Redistricting Committee, which was responsible for redrawing the Commonwealth's state and federal districts, based on the 2000 census, and as chairman of the Banks and Banking Committee. Prior to that he served as co-chairman of the Legislature's Joint Committee on Election Laws, where he was a catalyst behind some fundamental changes in the Massachusetts political system. In 1993, the Committee's "motor voter" bill was signed into law, making Massachusetts one of the most convenient states in the nation for voter registration. Then in 1994, the Committee's campaign finance reform bill became law. This law reduces the influence of private money on public policymaking by placing tough restrictions on the amount of money lobbyists, political action committees and individuals may contribute to political candidates. Stan was elected to the state House of Representatives in 1986 and served as the representative for Amherst and Pelham until 1991 when he won a special election for the state Senate seat being vacated by Congressman John Olver.

Judith L. St. Croix is a life long resident of the Town of Wayland and a graduate of Wayland High School and Michigan State University. She has served as

elected Town Clerk since June 1986 having attained the following: CMC – Certified Municipal Clerk; CMMC – Certified Massachusetts Municipal Clerk; Notary Public; Justice of the Peace; and Commissioner to Qualify. Currently, Ms. St. Croix serves as First Vice President of the Massachusetts Town Clerk's Association and member of the Legislative Committee. Previously, she served on the Executive Board for three years; Treasurer for four years; and Second Vice President for two years. Ms. St. Croix is also a member of Middlesex County Town and City Clerk Association; New England Town Clerk Association; and the International Institute of Municipal Clerk's Association.

Joseph Shea is the City Clerk in the City of Quincy. Mr. Shea has been City Clerk since 1992 and prior to that served as Assistant Clerk beginning in 1990. Mr. Shea also served as Executive Secretary to the Mayor of Quincy in the 1970's. Mr. Shea graduated from Suffolk University with a B.A. in Government and is a recent graduate of the New England Municipal Clerk Institute. He has three children and one grandchild and lives in Quincy with his wife and daughter.

Elisabeth C. Smith served as the Deputy Field Director of the 2002 Romney-Healey campaign, where she coordinated the campaign's absentee ballot initiative and supervised the efforts of thousands of volunteers to get out the vote. Ms. Smith also worked with a team of attorneys and election officials to develop ballot security procedures and to ensure voters were informed of their rights to cast their votes on Election Day. Following the election of Governor Romney, Elisabeth Smith has held positions on the transition team and in the Administration, and is currently serving as Deputy Chief of Staff in the newly created Executive Office of Economic Development. Elisabeth Smith earned Bachelor's and Master's degrees in Economics from Utah State University, and a Juris Doctorate degree from Boston University School of Law. Before joining the campaign, Ms. Smith practiced corporate and securities law at a large Boston law firm.

Representative Bill Straus has been a member of the Massachusetts Legislature since 1992. He represents the Towns of Fairhaven, Marion, Mattapoisett, Rochester and Middleboro. Prior to his election, Representative Straus was a member of the Mattapoisett Conservation Commission and an appointee to the Massachusetts Hazardous Waste Facilities Site Safety Council on which he served for four years. Throughout his term he has served on a number of committees including the Joint Health Care Committee and as the Vice Chairman of the Joint Committee on Transportation. He currently is the House Chairman of the Joint Committee on Election Laws. Representative Straus was a member of the Rules Committee to the 2000 Democratic National Convention in Los Angeles, CA.

Joseph Tringale has been working in the field of independent living for nearly 20 years. He has recently assumed the role of Chair of the Statewide Independent Living Council. This statewide council represents Independent Living Centers, consumer, and state agencies representing people with disabilities. He has completed extensive training by the Department of Justice in order to review the requirements of the Americans with Disabilities Act. Due to numerous trainings and years of hands-on experience, he has acquired a high level of expertise in the fields of physical and programmatic accessibility. Joseph has worked with the private and public sectors to disseminate this information and has participated in a number of projects, which require evaluating physical environments and consumer access. He has also provided workshops to municipal representatives and business owners explaining the state and federal requirements for accessibility. Currently Joseph is the Director of community services at the Stavros Center for Independent Living, which is the third oldest Center in the country.

Patrick Joseph Ward is currently serving his fourth elected three-year term as Town Clerk for the Town of Brookline. He is also a practicing attorney. Mr. Ward has over twenty-five years of legislative and election administration experience. Prior to his election as Town Clerk, he served as the Town of Brookline's Assistant Town Clerk and Chairman of the Board of Registrars of Voters. Mr. Ward also served as Legislative Director for the Office of the Secretary of the Commonwealth and is currently the Vice-Chair of the Massachusetts Town Clerks' Association's Legislative Committee. Mr. Ward is a graduate of Boston College and New England School of Law. He resides in Brookline with his wife Jennifer.

Help America Vote Act

Michigan's
STATE PLAN

As required by Public Law 107-252,
HELP AMERICA VOTE ACT OF 2002

TERRI LYNN LAND
Michigan Secretary of State
Lansing, Michigan 48901-0726
(517) 373-2540

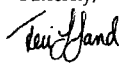
December 19, 2003

Dear Michigan voter:

I am pleased to present Michigan's final State Plan for implementing the federal Help America Vote Act (HAVA) of 2002.

HAVA requires state and local governments to upgrade elections processes and systems. Every Michigan voter and election administrator has a stake in these enhancements. The changes will ensure the integrity of our voter registration process, increase privacy and independence for voters with disabilities, improve access for military voters stationed overseas, upgrade systems that support our elections process, and provide residents with better information on how to vote.

Equally important, HAVA provides critical federal funding to help implement these improvements. Michigan is fortunate it can build upon its record of election excellence despite lean budgetary times.



To access its share of the $1.5 billion authorized by Congress, each state must develop and submit a State Plan outlining how it will comply with the requirements. The completion of Michigan's plan caps a 9-month process that began with my appointment of a 30-member advisory committee. This diverse group of dedicated residents sought extensive public input and drafted a plan that truly reflects Michigan's voice. We are grateful for their service.

HAVA is without question the most sweeping federal voting reform measure in decades. Its successful implementation demands well-trained, dedicated election administrators who fulfill their responsibilities with the utmost integrity. We are fortunate to have administrators of this caliber at all levels of Michigan's election process. State and local election officials must forge a new level of cooperation to ensure a seamless integration of these comprehensive reforms. I have no doubt we will meet this challenge.

Please take time to review Michigan's plan. You can find it on the HAVA page of the Department of State Web site at www. Michigan.gov/hava. Printed copies are also being sent to each county clerk.

I look forward to continuing to work with you as we ensure Michigan's status as a national leader in election integrity, efficiency and innovation.

Sincerely,

Terri Lynn Land
Secretary of State

INTRODUCTION

An Era of New Expectations

The November 7, 2000 presidential election marked a watershed event for election administrators throughout the country. Perhaps most significantly, the national news media's detailed coverage of the Florida vote recount (replete with animated "hanging, dimpled and pregnant" chads) engendered new levels of public awareness over the *mechanics* of the elections process. This, in turn, has accelerated public demand for improvements in the elections system and has driven new and heightened performance expectations for those who administer the system.

Michigan entered the new millennium "ahead of the curve" with respect to the management of the State's voter registration data. However, like many states, Michigan did not find itself in the best position to satisfy the post-2000 election demand for wide-scale improvements in its elections system due to the lack of available funding for such purposes. In addition, diversification in the processes and procedures employed by Michigan's local units of government to administer elections has markedly increased over the last 12 years due to the steady introduction of new voting technologies during the period. Consider: From the mid-1800s until the early 1970s when punch card voting was first introduced in Michigan, paper ballots and voting machines were exclusively used to conduct elections in the State. (Voting machines were approved for use in Michigan in 1893.) After punch card voting was introduced, no new voting systems were marketed in the State until 1991 when the Board of State Canvassers approved the State's first "optical scan" voting apparatus. Since 1991, ten *additional* systems have been approved for use in the State.

At the present time, Michigan's cities and townships are continuing to migrate away from mechanical voting machines, paper ballots and punch card voting systems that employ "central count" tabulation technology and are moving toward optical scan voting systems that employ "precinct based" tabulation technology. Jurisdictions of all sizes are participating in the migration, from Michigan's largest cities (e.g., City of Detroit, Wayne County: 606,900 registered voters) to Michigan's smallest townships (e.g., Warner Township, Antrim County: 225 registered voters).

While many cities and townships have been quick to embrace the new voting equipment technology marketed in Michigan over the last 12 years, a sizable number of jurisdictions still use outdated equipment to administer elections. As recently as the

November 5, 2002 general election, lever style voting machines were used in 445 of Michigan's 5,305 precincts (8.4%); paper ballots were used in 98 precincts (1.8%); and "central count" punch card systems were used in 866 precincts (16%). The resulting "technology gap" has created significant disparities in the measures implemented at the precinct level to protect voters from spoiling their ballots and losing votes.

The proliferation of different voting systems in the State has produced other concerns as well:

- The more balloting methods in operation in a county, the greater the administrative burden and cost at the county level. This is because county clerks are responsible for training the election workers appointed to serve throughout the county and the County Election Commissions are responsible for producing the ballots needed to conduct state and federal elections. In addition, the Boards of County Canvassers, responsible for certifying elections in the county, must review a variety of different Statement of Vote forms and Poll Book formats.

- The skills and experience of seasoned precinct inspectors who move within the State are often lost. This occurs in instances when the voting equipment used to conduct elections in their former jurisdiction of residence differs from the voting equipment used to conduct elections in their new jurisdiction of residence.

- Voters are frequently placed at a disadvantage when they change residence. There is a strong likelihood that an elector who moves will be confronted with an unfamiliar voting procedure the next time he or she attends the polls. At the same time, the coordination of voter education programs is increasingly difficult due to the multiplicity of voting systems in use.

- The ability of Michigan's county, city and township clerks to share information and offer peer support is diminished.

This same dynamic contributed to the problems Florida experienced in administering the 2000 presidential election as the local units were last in line for election reform support. Without State assistance, many local jurisdictions were not prepared to fund needed upgrades in their voting technology.

Building on a Tradition of Election Reform

Of the eight states that administer elections on the local level, Michigan is the largest both in terms of its population and geography. Involving 83 county clerks, 272 city clerks, 1,242 township clerks, 261 village clerks and 580 school election coordinators (school board secretaries), Michigan's elections system is administered by a total of 2,438 county and local election officials. This makes it the most decentralized elections system in the nation. State and federal elections are administered by Michigan's county, city and township clerks.

Michigan's highly decentralized elections system was essentially designed to serve the needs of an earlier age when its population was smaller and less mobile.

However, two significant election reform measures put in place during the last several decades have kept the system in step with Michigan's population growth and mobility patterns:

Michigan's Branch Office Voter Registration Program: The first reform measure came in 1975 with the introduction of the Secretary of State's Branch Office Voter Registration Program. This was the first "motor/voter" program established anywhere in the United States and the precursor to the motor/voter program mandated under the National Voter Registration Act of 1993. Nationally recognized for its performance and success, the program afforded Michigan electors the opportunity to apply for and update voter registrations in Secretary of State branch offices – a revolutionary concept at the time.

Prior to the program, many qualified electors had a difficult time determining where they should register to vote. Far worse, voters who had moved to a different jurisdiction within the State often failed to recognize that it was necessary to reregister to vote in his or her new city, township or village of residence.

With the introduction of the program, a resident could register to vote in any Secretary of State Branch Office in the State with the assurance that their application would be forwarded to the proper jurisdiction in a matter of days. In addition, as Michigan citizens were accustomed to visiting a Secretary of State Branch Office after moving to update the address appearing on their driver's license, the number of voters who also changed their voter registration address after moving was greatly increased.

Michigan's Qualified Voter File System: Just as rapidly changing demographics prompted the development and implementation of the Branch Office Voter Registration Program, new pressures and demands placed on the State's voter registration system during the ensuing years created a critical need for a similarly innovative response. Pressure was exerted by public officials interested in enhancing the security and integrity of the system, advocacy groups promoting greater system flexibility and service, and political organizations searching for greater convenience in accessing data maintained on file under the system. While these pressures were compelling in and of themselves, the passage of the National Voter Registration Act of 1993 greatly heightened the urgency of a response.

Under the new Act, Michigan's cities and townships were required to absorb increased voter registration file maintenance costs, cope with new and highly detailed voter registration file maintenance procedures, and confront a sharp increase in unnecessary voter registration transactions due to overlapping voter registration programs.

To address these various needs, the Michigan Legislature initiated a second wave of voter registration reform through the enactment of PA 441 of 1994 - legislation that required the Secretary of State to establish and maintain a statewide Qualified Voter File (QVF) system. Placed in operation in 1998, the QVF is a distributed database that ties Michigan's city and township clerks to a fully automated, interactive statewide voter registration file to achieve a wide variety of significant advantages. Benefits include the identification and elimination of over 800,000 duplicate voter registration records in the system; the streamlining of the State's voter registration cancellation process; the elimination of registration forwarding errors; and the elimination of duplicative voter registration processing tasks.

With the implementation of the QVF, every motor/voter registration transaction executed in a Secretary of State Branch Office is electronically forwarded to the appropriate local election official. A paper copy of the transaction follows within days to confirm the electronic notification and supply the election official with the voter's signature. After receiving the electronic notification of the transaction and the paper voter registration application form executed by the applicant, the clerk reviews the information supplied by the applicant and renders a final determination on the acceptability of the voter registration. The clerk's role in determining the acceptability of the registration application effectively works to preserve the local control of Michigan's voter registration process.

Under a later amendment to the Michigan Vehicle Code (PA 118 of 1999), all drivers are now required to use their voter registration address for driver's license purposes. With this requirement, all voter registration address changes are automatically posted to the

driver file. The Department also supplies all voters who submit a new voter registration address with an address change sticker for their driver's license. This additional measure is notable as it is the first instance where a state has used voter registration address change data filed with local election officials to update driver's license records. A Michigan citizen is free to change his or her driver's license/voter registration address as frequently as may be needed without the imposition of any fees or transaction costs.

Nationally recognized for the innovation and efficiency of its design, Michigan's Qualified Voter File system was cited as a "best practice" in managing voter registration records under the Caltech/MIT Voting Technology Project (*Voting-- What Is, What Could Be*; released July 2001). It was also highlighted as an "outstanding model" under the report issued by the National Commission on Federal Election Reform (*To Assure Pride and Confidence in the Electoral Process*; released August 2001).

Ultimately, Michigan's Qualified Voter File system served as the inspiration for the statewide voter registration system requirements enacted under the Help America Vote Act of 2002 – an interesting parallel to the earlier inclusion of the "motor/voter" concept pioneered in Michigan in the National Voter Registration Act of 1993.

A New Vision for the Future

With the Qualified Voter File system in place, the funding available under the Help America Vote Act of 2002 provides unprecedented opportunities for improvements in Michigan's elections system. Most important, Michigan will now have the means to satisfy public demand for increased efficiency, accuracy and convenience in the administration of elections; achieve new levels of consistency in the processes and procedures used to conduct elections; assure access to the State's election system for all voters; uniformly extend "second chance" voting throughout the State; and enhance the integrity of the elections process through the implementation of the "provisional" balloting process required under the Help America Vote Act. Many of the measures Michigan will implement to achieve these goals and objectives are detailed throughout this document.

STATE PLAN REQUIRED ELEMENTS (HAVA 254(A))

The 13 specified elements that must be included in the State Plan pursuant to Section 254(a) of the Help America Vote Act of 2002 are addressed in the following section of this report.

Each element is introduced with a title and a description of the requirements involved. Actions that the State of Michigan will take to fulfill the requirements are highlighted in bold.

I. Title III Requirements and Other Activities

How the State will use the requirements payment to meet the requirements of title III, and, if applicable under section 251(b)(2), to carry out other activities to improve the administration of elections. -- HAVA §254 (a)(1)

Section 301(a): Voting System Standards Requirements

There are five different types of balloting methods employed throughout the United States to administer elections: (1) optical scan voting systems, (2) direct recording electronic (DRE) voting systems, (3) punch card voting systems, (4) mechanical lever voting machines, and (5) paper ballots. Michigan employs all five types. Within the optical scan, DRE and punch card balloting method categories, there is a certain degree of variety as the equipment involved is marketed and sold under different brand names by private sector firms. Mechanical lever voting machines were similarly produced and sold by a number of different manufacturers throughout the years.

By the mid-1990s, the unprecedented acceleration in the development and introduction of new voting systems in the State had created a series of issues that required a legislative response. Most critically, Michigan election law needed updating to ensure the comprehensive and meaningful evaluation of the technology built into the systems. In answer, PA 583 of 1996, an amendment to Michigan election law was enacted to:

- Stipulate all new voting systems used in Michigan be approved by an independent testing authority (ITA) to ensure the system's conformance with all federal voting system standards.
- Require vendors seeking approval of *a new voting system* to file a $1,500 application fee. Require vendors seeking approval of *a voting system upgrade* to file a $500 application fee.
- Require voting system vendors to submit on an ongoing basis: (1) information on other states using the system, (2) performance evaluations produced by any state or local governmental unit, (3) copies of all standard contracts and maintenance agreements, and (4) all changes made in standard contracts and maintenance agreements.

- Direct the Board of State Canvassers to field test under "simulated election day conditions" all new voting equipment as a part of the certification process. Require the vendor to pay for the cost of the testing.

- Require all governmental units to notify the Secretary of State within thirty (30) days before purchasing a new voting system. Require the Secretary of State to forward to any governmental unit providing such notification all information concerning the operation of the voting system in Michigan or any other state.

- Grant the Board of State Canvassers the authority to "decertify" voting systems.

As noted in the Introduction, Michigan's cities and townships are currently in the process of migrating from mechanical voting machines, paper ballots and punch card voting systems that use "central count" tabulation technology and are moving toward optical scan voting systems that use "precinct based" tabulation technology.

Jurisdictions of all sizes are participating in the migration from Michigan's largest cities (e.g., City of Detroit, Wayne County: 606,900 registered voters) to Michigan's smallest townships (e.g., Warner Township, Antrim County: 225 registered voters). Since the 1998 election cycle, cities and townships containing *over 1.5 million Michigan voters* have replaced their voting machines, paper ballots and punch card voting systems with updated optical scan voting technology.

Despite the fact that many cities and townships in the State have been quick to embrace the new voting equipment technology marketed in Michigan over the last 12 years, a sizable number of jurisdictions continue to use outdated equipment to administer elections.

As recently as the November 5, 2002 general election, lever style voting machines were used in 445 of Michigan's 5,305 precincts (8.4%); paper ballots were used in 98 precincts (1.8%); and "central count" punch card systems were used in 866 precincts (16%). The resulting "technology gap" has created significant disparities in the measures implemented at the precinct level to protect voters from spoiling their ballots and losing votes.

To address the emergent "technology gap" and associated concerns noted in the Introduction, the Michigan Legislature adopted legislation in 2002 – calling for the implementation of a statewide, uniform voting system (PA 91 of 2002).

The legislation directs the Secretary of State to convene an "advisory committee" for the purpose of selecting a "uniform voting system" for the State if and when funds are appropriated for selecting, acquiring and implementing a statewide, uniform voting system. It further directs the Secretary of State to proceed with the implementation of a statewide, uniform voting system after the selection of the voting system best suited for the State's needs.

The use of the funds available under the Help America Vote Act and how to proceed with the implementation of a statewide, uniform voting system was a primary topic discussed by the members of the Secretary of State's State Plan Advisory Committee. The committee's activities included the following:

- On April 17, 2003 the Secretary of State hosted a "Voting Equipment Technology Fair" in Lansing. It provided the public, members of the State Plan Advisory Committee, media and all interested parties with the opportunity to view the most recent voting technology developed by manufacturers throughout the country.

- The requirements of Public Act 91 of 2002 were reviewed and discussed.

- Optical scan, punch card and direct recording electronic (DRE) voting systems were demonstrated by local clerks who employ the systems.

- Presentations on the relative advantages and disadvantages of optical scan, punch card, and direct recording electronic (DRE) voting systems under recount conditions were offered.

- Public testimony on the implementation of a statewide, uniform voting system was accepted.

On June 20, 2003, the Secretary of State convened the State Plan Advisory Committee and obtained the members' agreement to also serve on a special advisory committee. The special advisory committee, a requirement under PA 91 of 2002, provided input on the selection of a statewide, uniform voting system. After receiving the committee's input, the Secretary of State announced on August 4, 2003, that optical scan voting equipment using "precinct based" tabulation technology had been selected for the implementation of Michigan's statewide, uniform voting system.

The implementation of PA 91 of 2002 in conjunction with the federal funding Michigan is eligible to receive provides the State with an excellent framework for ensuring timely compliance with Section 301 of the Help America Vote Act including all accessibility requirements. The following actions are planned:

- **Assessment of the voting system procurement options.**
- **Creation of a project management framework to guide the implementation of the statewide voting system and a successful transition to the system.**
- **Procurement of needed equipment and services pursuant to Michigan's procurement laws.**
- **Delivery of the equipment to the affected jurisdictions.**
- **Development and implementation of appropriate training programs.**

In addition to the voting system requirements, Section 301(a) of the Help America Vote Act requires states to define what constitutes a legal vote for each type of voting system used.

Michigan is fully compliant with this requirement at the present time as both Michigan election law and the rules promulgated to administer electronic voting systems clearly address what is and what is not a valid vote in specific terms.

Section 302: Provisional Voting and Voting Information Requirements

The Help America Vote Act provides a "provisional" balloting process to ensure that no individual who goes to the polls to vote is turned away without having the opportunity to obtain a ballot.

Prior to the passage of the Help America Vote Act, the Michigan Legislature addressed this issue through the enactment of PA 441 of 1994, an amendment to Michigan election law that established an "affidavit" balloting process for all elections conducted in the State.

The following compares and contrasts the "affidavit" balloting process currently established in Michigan and the "provisional" balloting process provided under the Help America Vote Act:

Current Procedure ("Affidavit" Balloting Process): In an instance where (1) a voter who appears in the polls to vote cannot be found on the precinct's Qualified Voter File list, *and* (2) the voter is unable to demonstrate his or her registration status by producing a validated voter registration receipt, the voter can obtain a ballot if he or she:

(1) signs an "Affidavit of Voter Registration" affirming that he or she submitted a voter registration application through a Secretary of State branch office, a designated voter registration agency, the county clerk or the mail on or before the "close of registration" for the election at hand;

(2) provides identification to confirm his or her identity and residence within the jurisdiction and precinct where he or she has offered to vote; and

(3) completes and submits a new voter registration application.

Such voters are issued a paper, punch card or optical scan ballot. The election inspectors write the number appearing on the voter's ballot in pencil on the back of the ballot. If a punch card ballot is used, the election inspector writes the ballot number on the secrecy envelope. After writing the ballot number on the ballot, the election inspector conceals the number with tape and/or a slip of paper as directed by the election official administering the election.

After the ballot has been prepared in the above manner, the elector votes the ballot in a voting station. The ballot is then counted under routine procedure. The "Affidavit of Voter Registration" completed by the voter is forwarded to the

local clerk's office immediately after the election. Upon the receipt of the form, the clerk enters the voter in the Qualified Voter File system.

It merits emphasis that in all cases, the votes cast on a ballot issued under the above procedure are counted. If an interested party wishes to dispute the qualifications of a voter who cast a ballot under the above procedure, he or she must seek redress through the courts. (If the retrieval of the ballot is ordered by the courts, the ballot number concealed on the ballot is used to identify the ballot.) Unless a court order is obtained, a ballot cast under the above procedure cannot be retrieved for inspection or invalidated for any reason. It merits further note that if a recount is conducted, a ballot cast under the above procedure is recounted under the same procedures employed to recount any other ballots cast in the precinct. The fact that the ballot was cast under the above procedure is *not* a matter that can be questioned or disputed under the recount proceedings.

Requirements Provided Under the Help America Vote Act ("Provisional" Balloting Process): In an instance where (1) a voter who appears in the polls to vote cannot be found on the precinct's registration list, *and* (2) the voter is unable to demonstrate his or her registration status by producing a validated voter registration receipt, the voter can obtain a ballot if he or she:

(1) asserts that he or she is a "registered voter in the jurisdiction"; and

(2) executes a "written affirmation" attesting that he or she is a "registered voter in the jurisdiction" and is eligible to vote in the election.

Such voters are issued a paper, punch card or optical scan ballot. The voter then votes the ballot in a voting station. After the voter returns the ballot, it is secured in an envelope for later disposition. Here, it merits observation that a voter who executes the above referenced "written affirmation" is eligible to receive and vote a "provisional" ballot *even in an instance where the election official administering the election "asserts that the individual is not eligible to vote."*

After the polls close, any ballots issued and voted under the above procedure are forwarded to the local election official for verification. If the election official determines the individual is eligible to vote, the ballot is counted. On the other hand, if the election official determines that the individual is *not* eligible to vote, the ballot is *not* counted.

The Help America Vote Act stipulates that in any instance where voters are permitted to vote after the close of the polls pursuant to a court order or other

order, the voters must cast "provisional" ballots. "Provisional" ballots cast in such instances must be kept separate from any other "provisional" ballots cast at the election.

The Help America Vote Act further stipulates that the State must establish "a free access system" which permits any individual who casts a provisional ballot to discover whether his or her ballot was counted and, if the ballot was not counted, the reason why the ballot was invalidated.

The Help America Vote Act provides that at the time an individual casts a "provisional" ballot, the election inspectors must give the individual written instructions for accessing the above referenced information system.

As the "provisional" balloting process provided under the Help America Vote Act differs in some respects from the current "affidavit" balloting process established in Michigan, it is Michigan's intent to modify its current law and processes as necessary. Through these modifications, the State will ensure full compliance with the "provisional" balloting process provided under the Help America Vote Act, establish the required "free access system" and arrange for the distribution of instructions for obtaining information through the "free access system." The following actions are planned:

- **Development of revisions to Michigan election law to authorize "provisional" balloting for all public elections. The "provisional" balloting process will supplement the current "affidavit" balloting process.**
- **Implementation of revised procedures to allow for the issuance of a "provisional" ballot in instances where the "affidavit" balloting procedure cannot be employed.**
- **Establishment of a "free access system" that any individual who casts a "provisional" ballot can use to discover whether his or her ballot was counted and, if the ballot was not counted, the reason why the ballot was invalidated.**
- **Development and implementation of a program to track and compile data on the "provisional" balloting process.**

In addition to the "provisional" balloting process, Section 302 of the Help America Vote Act stipulates that the information listed below must be posted in the polls whenever a federal election is conducted:

- A sample ballot.
- The date of the election and the hours the polls will remain open.
- Voting instructions.
- Instructions on voting a "provisional" ballot.
- The identification requirements that apply to voters who register to vote by mail.
- General information on voting rights including information on the right of an individual to cast a "provisional" ballot and instructions on how to contact the appropriate officials regarding alleged voting rights violations.
- General information on the laws that prohibit fraud and misrepresentation.

Michigan currently provides informational posters for display in the polls on Election Day. The Michigan Department of State's Bureau of Elections intends to modify the information provided on these posters as necessary to ensure compliance with the Help America Vote Act. The posters will be redesigned to prominently list pertinent information and clearly state "what every voter should know."

Section 303: Computerized Statewide Voter Registration List Requirements and Requirements for Voters Who Register by Mail

As noted in the Introduction, the Michigan Legislature adopted legislation in 1994 that required the Secretary of State to establish a statewide Qualified Voter File (QVF) system (PA 441 of 1994). Placed in operation in 1998, the QVF is a distributed database that ties Michigan's city and township clerks to a fully automated, interactive statewide voter registration file. It provides a wide variety of significant advantages including the elimination of all duplicate voter registration records in the system; the streamlining of the state's voter registration cancellation process; the elimination of registration forwarding errors; and the elimination of duplicative voter registration processing tasks.

The QVF was populated with every registered elector appearing in the Department of State's driver's license/personal identification card file and the voter registration files held by the state's city and township clerks. Data on the voters is maintained on a UNIX-based computer located in Lansing.

The system also offers Michigan's election officials a full array of election management features including components created to assist with absent voter ballot processing; petition and candidate tracking; election planning; and election inspector tracking. The election management components, designed in consultation with a special task force of county and local election officials, have introduced a new level of convenience to the administration of elections in Michigan. The election management components have also standardized many of the election-related forms and procedures used throughout the State. Proper and consistent application of the state and federal laws that govern the voter registration process is essential given the various disenfranchisement protections provided under Michigan election law and the National Voter Registration Act of 1993.

Michigan's 83 county clerks and the clerks of all local jurisdictions with a voting age population over 5,000 were provided with the hardware and software needed to establish a direct link with the QVF. Smaller cities and townships (i.e., those with a voting age population under 5,000) have either purchased the hardware and software needed for a direct link with the QVF or access the QVF through their local county clerk's office.

The QVF system comprises three primary components:

Lansing File Server: The heart of the QVF system is the file server located in Lansing, the state capital. The file server holds the voter registration database for the entire state. It also holds all system software (QVF application software and Oracle database software). The file server exchanges information with the driver file database (new registrations originating in branch offices) through a series of "server processes" (automated computer programs). The file server exchanges information with local system users through a data replication process.

To facilitate the exchange of data with the State's driver file database, every voter registration record is identified with the voter's driver license number or personal identification card number. (If the voter does not hold a driver license or personal identification card, a similar unique number is assigned to the voter's registration record.)

County/Local QVF Installations: All of Michigan's 83 counties and 236 of Michigan's largest cities and townships (voting age population over 5,000) were provided with QVF installations at state expense. At their own expense, one hundred and forty-nine (149) additional cities and townships opted to purchase QVF systems.

Telecommunications Network: The QVF system uses the Internet as its telecommunications network. Each QVF jurisdiction was provided with an Internet account (Merit is the Internet provider) and an Internet browser that includes e-mail and web searching capabilities. The data replication process is automated and operates on a daily basis. Local QVF users may also establish an Internet connection if they wish to initiate a manual replication. Replication updates the Lansing server with new information provided by the local jurisdiction and updates the local jurisdiction with new information provided by the file server (usually branch office transactions). An average replication takes 10 to 15 minutes.

The Michigan Department of State's Bureau of Elections maintains a Help Desk to assist the county and local clerks throughout the State with any questions they have regarding the operation of the QVF. The Help Desk offers assistance in the following areas:

Replications: The replication process involves the transfer of data between the QVF server in Lansing and the remote QVF installations throughout the State. If there is a problem with the replication process, it generally stems from a user error, an equipment failure or a network failure. The Help Desk is able to trace such problems, find the source and offer corrective measures.

Equipment Problems: The Help Desk troubleshoots all equipment-related problems. In some cases, a contract vendor is sent to the site. In other cases, the Help Desk staff members pick up the equipment for in-house problem solving.

Training: The Help Desk provides training and on-site consultations to QVF users throughout the State. The Help Desk is also responsible for updating all user guides and training materials.

Software Support: The Help Desk offers QVF users advice and instruction on using the QVF software and documents requests for QVF software enhancements. The majority of all inquiries received by the Help Desk involve questions over the operation and functions of the QVF software.

While Michigan's Qualified Voter File system is in substantial compliance with the Help America Vote Act's requirements for a centrally administered statewide voter registration system, the following actions are planned to enhance the performance of the system:

- **Exploration of the potential for electronically exchanging data with Michigan's Family Independence Agency.**
- **Exploration of the potential for providing Michigan's smaller jurisdictions with additional methods of electronically accessing the QVF system.**
- **Use of GIS mapping technology to administer the street index built into the QVF system.**
- **Use digitized signatures in the QVF database which are already on the department's driver's license file.**
- **Development of a process that permits the QVF system to electronically remove voters who have not responded to notices pursuant to the National Voter Registration Act. (The review of the action by clerks will continue to be a requirement.)**
- **Development of new capabilities that permit the QVF system to store the last four digits of a voter's Social Security Number.**
- **Development of revisions to Michigan election law to provide for any additional processes needed to electronically verify new registrants who register to vote by mail.**
- **Establishment of an agreement with the Commissioner of Social Security to provide for the verification of voter identification information.**

Section 303 of the Help America Vote Act further addresses the identification of voters who register to vote by mail and the contents of mail-in voter registration application forms as indicated below:

- Stipulates that an individual who (1) submits a mail-in voter registration form, *and* (2) has never participated in a federal election conducted in the state must provide an identification document with the mail-in voter registration form. Provides that if the applicant does not submit an acceptable identification document with the mail-in voter registration form, he or she must produce identification *the first time* he or she attends the polls to participate in a federal election. It further provides that if such a voter wishes to cast an absentee ballot, he or she must submit an acceptable identification document when returning the absentee ballot.

- Provides that if a voter subject to the above identification requirements does not produce or submit an acceptable identification document, he or she may cast a "provisional" ballot in the polls or a "provisional" absentee ballot as desired.

- Provides that the above voter identification requirements are waived if (1) the voter registration applicant enters his or her driver license number or the last four digits of his or her Social Security Number on the mail-in voter registration form, and (2) the state or local election official has a program in place which permits the identification of the voter through the comparison of the entered number against another "State identification record" which bears the same number and the voter registration applicant's name and date of birth.

- Directs the Secretary of State to include the following two questions on the mail-in voter registration application form with "yes" and "no" checkoff boxes: (1) "Are you a citizen of the United States of America?" and (2) "Will you be 18 years of age on or before Election Day?" It further directs the Secretary of State to include the following statement on the form: "If you checked 'no' in response to either of these questions, do not complete this form."

- Stipulates that if a voter registration applicant fails to answer the citizenship question on the mail-in voter registration application form, the registrar must notify the applicant and provide him or her with an opportunity to complete the form no later than the voter registration deadline for the next federal election.

The following actions are planned to ensure compliance with the requirements associated with the identification of voters who register to vote by mail:

- **Implementation of the identification requirements imposed on individuals who (1) submit a mail-in voter registration form, and (2) have never participated in a federal election conducted in Michigan.**

- **Establishment of procedures that permit a voter who is subject to the identification requirements to obtain a "provisional" ballot if the voter is unable to produce or submit an acceptable identification document.**

- **Modification of Michigan's Mail-In Voter Registration Application form as necessary.**

- **Development and implementation of a process that provides individuals who (1) submit a mail-in voter registration, and (2) fail to respond to the citizenship question with an opportunity to complete the form no later than the voter registration deadline established for the next federal election.**

Section 251(b)(2): Other Activities

Michigan intends to use requirements payments to fund other activities to improve the administration of elections, including, but not limited to the following:

- **Establishment of a polling place accessibility program to ensure that all polling places in Michigan are and continue to be compliant with all applicable state and federal laws.**

- **Extension of necessary assistance to persons with limited proficiency in the English language as required by the Voting Rights Act.**

- **Implementation of a variety of voter education and outreach activities including public service announcements and voting equipment demonstrations.**

- **Development of election official and poll worker training initiatives.**

II. Michigan's Distribution of Requirements Payment

How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of --

(A) the criteria to be used to determine the eligibility of such units or entities for receiving the payment, and

(B) the methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8). -- HAVA §254 (a)(2)

Eligibility of Local Units to Receive the Payment

The Michigan Department of State's Bureau of Elections will centrally manage all initiatives funded by requirements payments and will be responsible for establishing all expenditure funding levels, program controls and outcomes. The State will follow applicable Michigan law regarding the distribution of federal reimbursements.

Performance Measures for Local Units

The Bureau of Elections will monitor the performance of each initiative funded by requirements payments in three areas: financial controls, compliance with standards, and program results.

Financial Controls: The Bureau of Elections will develop and use standard financial reporting for all initiatives funded by requirements payments.

Compliance with Standards: The Bureau of Elections will develop and use standard program management reporting for all initiatives funded by requirements payments.

Program Results: The Bureau of Elections will develop key performance indicators for each initiative funded by requirements payments. See Section VIII of this document for specific performance goals and measures.

III. Voter Education, Election Official Education and Training, and Poll Worker Training

How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III. -- HAVA §254 (a) (3)

Voter Education

As voter turnouts continue to dwindle, voter education has become an increasingly important component of the elections process. At the present time, the majority of voter education efforts in Michigan for statewide and federal elections are coordinated through the Michigan Department of State's Bureau of Elections and the offices of Michigan's city and township clerks. The voter education initiatives currently in place include the following:

Citizens Guide to Voting Systems: Internet-based instructional system where voters can learn what type of voting equipment is used in their jurisdiction of residence and how it operates. The site utilizes video clips, slides, audio and printed text.

Electronic Voter Guide: Internet-based informational guide established for November general elections where voters can learn about the political parties, state level candidates and statewide ballot proposals on the ballot. Candidates and political parties are invited to post statements on the site. Candidates are also extended the opportunity to post a photograph on the site.

Voter Information Center: Internet-based informational site where voters can preview their ballot for November general elections, confirm their registration status, obtain information on the location of their polling place (including a map), link to candidate websites and obtain other election-related information.

Both the Citizens Guide to Voting Systems and the Electronic Voter Guide are linked to the Voter Information Center. The Voter Information Center, in tandem with the Citizens Guide to Voting Systems and Electronic Voter Guide, provides Michigan voters with the most comprehensive on-line election information available in the nation.

Voter Education (continued)

Secretary of State Web site: Provides dates for upcoming state and local elections, general information on the registration process, a mail-in voter registration form that can be printed for immediate use, information on obtaining an absent voter ballot and other general information on registering and participating in elections.

Local Web sites: Many counties and local jurisdictions have established Web sites that provide information on registering to vote and participating in elections.

Published Notices: All cities and townships publish two notices to announce each upcoming voter registration deadline and two notices to announce each upcoming election. As Michigan has 1,514 cities and townships, this results in the publication of over 6,000 election-related notices prior to each August primary and 6,000 additional notices prior to each November general election.

Voter Instruction Placards: Prior to each August primary and each November general election, the Secretary of State produces and distributes over 10,000 voter instruction placards for display in the polling places located throughout the state.

Ballot Proposal Information: When a statewide proposal is presented on Michigan's August primary ballot or November general election ballot, the Secretary of State produces and distributes over 10,000 informational posters on the proposals for display in the polling places. The information is also distributed to all newspapers, television stations and radio stations in the state. Information on the proposals is also distributed through the 173 Secretary of State branch offices operated and managed by the Michigan Department of State.

Assistance in the Polls: Michigan election law stipulates that all election workers appointed to serve in the polls must ask each voter if he or she would like to receive instruction on voting the ballot. To assist with the instruction, "demonstration models" are placed in each polling place. Comprehensive voting instructions are also printed on each ballot.

Voter ID Cards: Michigan's local clerks issue "Voter ID Cards" to all registrants which list their voting districts, their polling place location and a contact office for additional information.

Absent Voter Ballot Application Distribution Lists: Many local clerks maintain lists of regular absentee voters that are used to mass mail absent voter ballot application forms prior to elections.

Registration Reminder Cards: The Secretary of State sends all Michigan citizens a birthday greeting when they reach age 18 with a reminder that they are now eligible to register and vote. The postcard directs the newly eligible voter to the mail-in voter registration application form provided on the Secretary of State's Web site.

University/College E-mails: The Secretary of State, in cooperation with the Presidents Council of State Universities of Michigan, the Association of Independent College and Universities of Michigan and the Michigan Community College Association, sends a specially developed e-mail message to all university and college students to provide them with pertinent registration and voting information.

Public Service Announcements (PSAs): The Secretary of State regularly develops PSAs on registering and voting for distribution to all media outlets in the State.

Informational Brochures: The Secretary of State prints and distributes a voter information brochure prior to every election cycle that provides concise information on registering to vote, obtaining absent voter ballots and voting in the polls.

Michigan recognizes the need to enhance its voter education programs to better inform voters and promote participation in the electoral process. In addition to the maintenance of the voter education programs detailed above, Michigan will pursue the following initiatives:

- **Establish a Voter Education and Outreach Fund. The fund will be used to support public and private sector programs designed to educate voters and promote electoral participation.**
- **Double the current efforts made to ensure that all voter outreach materials produced through the Department reflect and meet the needs of Michigan's diverse voting populations.**
- **Develop educational outreach initiatives designed to instruct voters on the operation of the voting equipment selected for the implementation of Michigan's uniform voting system.**

- **Coordinate voter education efforts with nonpartisan community organizations and advocacy groups committed to voter education including groups that provide services to individuals with disabilities.**
- **Encourage local jurisdictions to partner with nonpartisan community organizations and advocacy groups committed to voter education to promote voter registration and participation. Facilitate such efforts through the development and dissemination of voter outreach materials.**
- **Improve and increase public service announcements and informational materials.**
- **Expand and improve upon the use the Internet-based Voter Information Center and the voter instruction posters provided for display in the polls.**

Election Official Education

Trained, professional election officials are essential to the administration of efficient and secure elections. At the present time, the Michigan Department of State's Bureau of Elections administers a variety of mandated and discretionary training programs. These programs are designed to familiarize the State's county clerks, city clerks, township clerks, village clerks and school election coordinators with the laws and processes that govern Michigan's elections system. Current election official training programs administered through the Bureau of Elections include the following:

Election Officials Accreditation Program: Michigan election law, MCL 168.31(j), directs the Secretary of State to "Establish a curriculum for comprehensive training and accreditation of all county, city, township, village, and school election officials." Participation is mandatory. To date, over 3,700 county clerks, local clerks, school board secretaries and election assistants appointed on the county and local level have attended the accreditation program.

County Clerk Training: Michigan election law, MCL 168.33(1), directs the State Elections Director to "...conduct training schools throughout this state preceding the general November election, and preceding such other elections as the director considers advisable, for county clerks and their representatives with respect to the conducting of elections in accordance with the election laws...."

The training programs are routinely conducted every two years in advance of the November general election.

County Board of Canvasser Training: Conducted in conjunction with required County Clerk Training programs.

City/Township Clerk Training: Conducted on a regional basis prior to the August primary. All city clerks and township clerks are encouraged to attend.

School Election Coordinator Training: Conducted on a regional basis prior to the June school election. All school election administrators are encouraged to attend.

Village Clerk Training: Conducted on a regional basis prior to the village primary election. All village clerks are encouraged to attend.

New Clerk Training: Michigan election law, MCL 168.31(k), directs the Secretary of State to "Establish and require attendance by all new appointed or elected election officials at an initial course of instruction within 6 months before the date of the election." New Clerk Training is offered to new clerks on a regional basis. Participation is mandatory.

Michigan recognizes the need to enhance its training programs to better ensure that all election officials possess the training, tools and resources critical to the successful administration of elections. In addition to the maintenance of the programs detailed above, Michigan will pursue the following initiatives:

- **Improve training and accreditation materials to promote the retention of the information.**
- **Research and implement new and innovative training delivery methods such as interactive web-based training and video teleconferencing.**
- **Develop "training partnerships" with the various clerk associations established in the State, state universities and community colleges.**
- **Establish an advisory group to review and evaluate the training programs and materials developed to train election officials.**
- **Contract with training consultants to enhance the skills of the trainers.**

- **Develop educational programs designed to instruct election officials on the operation of the voting equipment selected for the implementation of Michigan's statewide, uniform voting system.**

Poll Worker Training

Trained poll workers who have a full understanding of the laws and procedures that govern the administration of the polls on Election Day are critical to the successful conduct of elections. In view of this need, Michigan election law, MCL 168.683, directs the State's county clerks to provide the poll workers appointed in their respective counties with the training needed to perform their duties. MCL 168.683 further extends to a city or township, having a population of 10,000 or more, the option of conducting its own poll worker training if desired.

To ensure the quality of the training programs and the consistency of the instruction, Michigan election law, MCL 168.33(2), directs the State Elections Director to "... train all county, city and township clerks who are involved in the training of precinct inspectors ...." MCL 168.33(3) further directs the State Elections Director to conduct all poll worker training in counties where the county clerk has not been accredited to conduct the training programs.

The Bureau of Elections also provides a various materials and training aids to augment the materials developed at the county and local level. The training materials and aids available through the Bureau include the following:

- ***Training Outline*** – A general training outline developed for use by trainers conducting instructional programs for poll workers.
- ***Election Inspectors' Procedure Manual*** – A 24-page quick reference guide to the laws that govern the operation of polling places. Developed for use as a training aid and as a reference tool on Election Day.
- ***Training Video on the Management of Polling Places*** – Used to motivate poll workers and reinforce instruction on the state laws that govern the operation of polling places.
- ***Training Video on Accommodating the Needs of Voters Who Are Disabled*** – Used to heighten poll worker sensitivity to the needs of disabled voters.

- ***Video Exam*** – A self-administered test developed for use with the training video. Used to focus attention on the points of emphasis in the video.
- ***Technical Sheets*** – Step-by-step instructions on the operation of the various voting systems employed in Michigan to administer elections. Developed for use as a training aid and as a reference tool on Election Day. Used by trainers to instruct poll workers on the proper administration of the voting system they will use in the polls.
- ***Voting Equipment Q & A Exercises*** – Used by trainers to reinforce instruction on the operation of the voting equipment used by the jurisdiction involved.
- ***Model Overheads*** – Suggested overheads developed for use by trainers conducting instructional programs for poll workers. Used by trainers to instruct poll workers on the proper completion of the various forms and documents which must be completed in the polls on Election Day.

Michigan recognizes the need to continually improve the training programs for poll workers to promote the efficient operation of the polls and the effective administration of the laws that govern the voting process. In addition to the poll worker training programs and services detailed above, Michigan will pursue the following initiatives:

- **Improve the content of the "train the trainer" programs offered county, city and township clerks.**
- **Update and expand the materials provided county, city and township clerks to assist with the instruction of poll workers.**
- **Develop and produce an updated poll worker training video.**
- **Contract with training consultants to enhance the skills of the trainers.**

IV. Voting System Guidelines and Processes

How the State will adopt voting system guidelines and processes, which are consistent with the requirements of section 301. -- HAVA §254(a)(4)

Michigan has adopted legislation that mandates the implementation of a statewide, uniform voting system (PA 91 of 2002). The voting system selected will meet the requirements of Section 301 of the Help America Vote Act, including all accessibility requirements.

The legislation directs the Secretary of State to convene an "advisory committee" for the purpose of selecting a "uniform voting system" for the State if and when funds are appropriated for selecting, acquiring and implementing a statewide, uniform voting system.

The legislation further authorizes the Secretary of State to proceed with the implementation of a statewide, uniform voting system after the selection of the voting system best suited for the State's needs.

Michigan election law currently provides procedures for the certification of new voting systems and the conduct of recounts. Operational standards for the administration of electronic voting systems have been promulgated under the State's Administrative Procedures Act (APA), PA 306 of 1969, as amended.

As the implementation of the statewide, uniform voting system progresses, the Michigan Department of State will create any new processes necessary to ensure the effective and efficient administration of the system. New processes adopted by the Department typically take the form of new legislation, internal procedures and promulgated rules. The Department will determine the appropriate method for publicizing new voting system standards and processes.

V. Michigan's HAVA Fund Management

How the State will establish a fund described in subsection (b) for purposes of administering the State's activities under this part, including information on fund management. -- HAVA §254(a)(5)

Working with the Michigan Legislature, the Michigan Department of State's Bureau of Elections is establishing a new election reform fund that will be separate and distinct from all other agency funds. The election reform fund will contain both federal and general funds. The federal fund portion will be used to maintain federal fund receipts and expend federal funds. The general fund portion will be used to budget and expend general funds representing the 5% match required under Help America Vote Act.

The Director of the Michigan Department of State's Bureau of Elections and the Director of the Michigan Department of State's Bureau of Administrative Services will work with the Michigan Department of Treasury to follow and enforce all mandated fiscal controls and policies.

VI. Michigan's HAVA Budget

The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on—

(A) the costs of the activities required to be carried out to meet the requirements of Title III;

(B) the portion of the requirements payment which will be used to carry out activities to meet such requirements; and

(C) the portion of the requirements payment, which will be used to carry out other activities. -- HAVA §254(a)(6)

Title I Funds: Election Administration and the Replacement of Voting Equipment

Title I of the Help America Vote Act authorizes the General Services Administration (GSA) to administer $650 million in payments to (1) implement election administration improvements, and (2) replace punch card voting systems and lever voting machines.

Election Administration Improvements ($325 Million): States are guaranteed a minimum payment of $5 million. The remaining funds are allocated according to the state's voting age population. Michigan is eligible for approximately $9.9 million.

Replacement of Punch Card Voting Systems and Lever Voting Machines ($325 Million): The funds must be used to replace the State's punch card voting systems and lever voting machines in advance of the November 2, 2004 general election. An extension through the first federal election conducted after January 1, 2006, can be requested for good cause.

Each State is eligible to receive up to $4,000 for each "qualifying precinct." A "qualifying precinct" is a precinct that used a punch card voting system or lever voting machines to administer the November 7, 2000 general election.

Michigan is eligible for approximately $6.8 million. If the total claimed exceeds the $325 million appropriation, the payments will be proportionately reduced.

Titles II and III: Election Assistance "Requirements Payments"

The Election Assistance Commission is required to make election assistance "requirements payments" to qualifying States. Under this section, the Appropriations bill authorized payments of $1.4 billion for FY 2003, $1 billion for FY 2004 and $600 million for FY 2005. However, only $830 million was actually appropriated and made available for spending for FY 2003. The funds "authorized" for each fiscal year must be appropriated under separate action before the funds are available to the States.

The funds are allocated according to the State's voting age population with a guaranteed minimum payment equal to ½ of 1% of the total appropriation for each year. Michigan is eligible for approximately $28 million this fiscal year.

Future Funding Assumptions

The remaining federal funds available to Michigan through FY 2005 are calculated by multiplying the total available amount of federal funding in that year by 3.3%. These portions require a 5% State match for all funds spent in each fiscal year. However, the State may draw down funds each fiscal year without providing the match if the State's election plan accounts for the future expenditure of the matching funds.

The following table outlines the assumptions regarding federal funding that Michigan used in creating its budget.

Federal Fiscal Year	Total Federal Funds Authorized [1]	Total Federal Funds Appropriated [2]	Michigan's Share
Early Payments	$650 million	$650 million (appropriated)	$6.8 million [3]
2003	$1.4 billion	$830 million (appropriated)	$28 million
2004	$1 billion	Pending	$33 million (estimated)
2005	$600 million	Pending	$16.5 million (estimated)
Total	**$3.65 billion**		**$67.8 million**

[1] "Authorized funds" represent the amount Congress recommended for the implementation of the Help America Vote Act when the Act was adopted.

[2] "Appropriated funds" represent the amount Congress has actually made available to the States for the implementation of the Help America Vote Act.

[3] Does not include $9.9 million Michigan is eligible to receive under Title I, Section 101, of the Help America Vote Act. The funds will be used to extend smaller jurisdictions access to the Qualified Voter File system, convert the street index to a GIS mapping system, add digitized signatures to the Qualified Voter File database and provide other technology enhancements.

Projected Budget

Michigan's projected budget, based on the funding assumptions detailed above, represents the cost of implementing the requirements of Title I and Title III of the Help America Vote Act. The budget will be revised as appropriate to reflect the most current information available on federal funding, and any changes that may be made in the implementation schedule.

OVERALL HAVA COMPLIANCE BUDGET

HAVA Requirements	Estimated Total Cost	Source of Funding			Implementation Period
Title III Requirements		§102	Title II	State 5% Match	
(§301) Voting System	$55 million	$6.8 million	$45.45 million	$2.75 million	FY 2004 to FY 2006
(§302) Provisional Voting and voting information requirements	$500,000		$475,000	$25,000	FY 2004 to FY 2006
(§303) Computerized statewide voter registration list requirements and requirements for voters who register by mail	$5 million		$4.75 million	$250,000	FY 2004 to FY 2006
"Other" Activities					
Programming software, ballot production licensing, service contracts and polling place accessibility supplements to HHS grants	$5 million		$4.75 million	$250,000	FY 2004 to FY 2006
(§254 (3)) Voter education, election official education and training, and poll worker training which will assist the state in meeting the requirements of Title III	$5 million		$4.75 million	$250,000	FY 2004 to FY 2006
(§402) Establish a State-based HAVA administrative complaint procedure to remedy grievances	$500,000		$475,000	$25,000	

FISCAL YEAR 2004 ESTIMATED BUDGET

HAVA Requirements	Estimated Total Cost (3 Fiscal Years)	Source of Funding for FY04 Anticipated Disbursements		
Title III Requirements		§102	Title II	State 5% Match
(§301) Voting System [1]	***$55 million***	$4 - 6.8 million	$11 million	$1 million
(§302) Provisional Voting voting information requirements [2]	***$500,000***		***$300,000***	***$25,000***
(§303) Computerized statewide voter registration list requirements and requirements for voters who register by mail [2]	***$5 million***		***$2 million***	***$100,000***
"Other" Activities				
Programming software, ballot production licensing, service contracts and polling place accessibility supplements to HHS grants [2]	***$5 million***		***$2 million***	***$150,000***
(§254 (3)) Voter education, election official education and training, and poll worker training which will assist the state in meeting the requirements of Title III [2]	***$5 million***		***$1 million***	***$100,000***
(§402) Establish a State-based HAVA administrative complaint procedure to remedy grievances [2]	***$500,000***		***$250,000***	***$10,000***

VII. Maintenance of Effort

[1] Determinations not yet made on prices for voting systems or number of precincts converting in FY04.

[2] The state procurement and bid process will determine actual costs for the contracts necessary to implement these requirements.

How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000. -- HAVA §254(a)(7)

Consistent with Section 254(a)(7), Michigan will maintain the same level of expenditures on activities funded by the requirements payments as was expended in the fiscal year that ended prior to November 2000 (October 1, 1999 through September 30, 2000). (Michigan expended $1.2 million on such activities during the period.)

As with many states, the amount spent by the State of Michigan to administer elections is only a small fraction of the aggregate amount spent on elections statewide as the majority of the costs involved are handled at the county and local level. In addition, many of Michigan's 83 county clerk offices and 1,514 city and township clerk offices employ year-round core staff for continuous functions such as voter registration, information services and IT support. When elections are conducted, Michigan's county and local clerks must budget for the additional costs associated with the rental of polling places, poll workers, temporary office staff, ballot production, mass mailings, election day support, etc.

VIII. HAVA Performance Goals and Measures

How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met. -- HAVA §254(a)(8)

Performance goals provide a high-level view of a project's direction. The State's goal is to achieve election reform and compliance with the requirements of the Help America Vote Act through the successful implementation of the programs outlined in the State Plan.

Performance Goal 1: Statewide Voter Registration System

At this date, Michigan's Qualified Voter File (QVF) is in substantial compliance with the Help America Vote Act's requirements for a centrally administered statewide voter registration system. Michigan will use existing QVF data retrieval mechanisms to ensure that the system is as accurate as possible and includes every registered voter in the State at their proper address and removes voters who have died or moved out of the State. Michigan will make enhancements to the QVF to provide additional tools for election officials.

Performance Measure #1	*The following statistics will be compiled to determine data accuracy and the effectiveness of voter outreach programs:* • Number of registered voters in the State as a percentage of the State's voting age population. • Number of registered voters in each county as a percentage of each county's voting age population. • Number of registered voters in each jurisdiction as a percentage of each jurisdiction's voting age population. • Number of digitized signatures captured.

	• Number of voting histories captured for each statewide federal election. • Number of driver license numbers or PID numbers captured. • Number of duplicate driver license numbers or PID numbers.
Timetable	January 1, 2004, and annually thereafter.
Description of the criteria used to measure performance	Statistical reports should be generated from the QVF and measured against census data, voter turnout data and other reliable data sources.
Process used to develop criteria	Success of the effort will be dependent upon the performance of election officials statewide in updating the QVF and performing State prescribed "data scrubbing" initiatives.
Description of official to be held responsible for ensuring each performance goal is met	The Secretary of State and the Bureau of Elections, with the cooperation of all city, township and county election officials in the State, are responsible for ensuring that each performance goal is met.

Performance Goal 2: Training and Education

Michigan state and local election officials realize that the effectiveness of the Help America Vote Act relies heavily on communication among or between the participants in the process. Opportunities for training exist for city, township and county election officials; for election inspectors; and for voters who may only interact with equipment and the voting process occasionally.

Performance Measure #2(a)	***The following information will be collected to measure election official training performance:*** • Number of training classes/opportunities offered. • Number of election officials receiving initial certification under the Bureau of Election's Clerk Accreditation Program. • Number of election officials receiving ongoing certification under the Bureau of Election's Clerk Accreditation Program. • Number of election officials attending New Clerk training programs. • Number of election officials attending even-year training programs pursuant to MCL 168.33(1). • Number of election officials attending election inspector training programs pursuant to MCL 168.33(2) and (3).
Timetable	January 1, 2004, and annually thereafter.
Description of criteria used to measure performance	The Secretary of State will prepare a report form for completion by Michigan's county and local elections officials.
Process used to develop the criteria	The State already provides training and accreditation programs for election officials.
Description of official to be held responsible for ensuring each performance goal is met	The Director of Elections through the Michigan Department of State's Bureau of Elections is responsible for election official training.

Performance Measure #2(b)	*The following information will be compiled to measure the effectiveness of efforts to increase the number of available election inspectors for statewide federal elections:* • Number of election inspectors trained by instructors in classroom. • Number of new election inspectors recruited. • Number of high school and college students contacted by election officials to work as inspectors. • Number of complaints filed. • Percentage of election inspectors who attended training.
Timetable	January 1, 2005, and every odd-year January 1 thereafter.
Description of the criteria used to measure performance	Local election officials will submit this information to the Michigan Department of State's Bureau of Elections following each federal election.
Process used to develop criteria	County and local election officials currently conduct election inspector training. The Bureau of Elections will rely on input from local election officials (and perhaps professional trainers) to develop both the content and evaluation criteria for the program.
Description of official to be held responsible for ensuring each performance goal is met	The Bureau of Elections establishes training guidelines and tools. Each county or jurisdiction (as permitted by law) will continue to oversee election inspector training.

Performance Measure #2(c)	*The following information will be gathered to measure the effectiveness of voter education initiatives for statewide federal elections:* • Number of public display sites for voter education. • Number of PSAs (public service announcements). • Number of Web hits on Secretary of State's Voter Information Center and/or other Web sites. • Number of high schools and colleges contacted. • Increase/change in percentage of voter turnout.
Timetable	January 1, 2005, and every odd-year January 1 thereafter.
Description of the criteria used to measure performance	Local election officials will submit information to the Michigan Department of State's Bureau of Elections following each federal election. The Bureau of Elections may also compile its own data.
Process used to develop criteria	These steps are being taken to ensure voters receive information on the Help America Vote Act and related election processes.
Description of official to be held responsible for ensuring each performance goal is met	The Bureau of Elections is responsible for developing the training tools. Local election officials will be responsible for implementation and reporting.

Performance Goal 3: Grievance System

The Help America Vote Act requires the establishment of a state-based grievance procedure.

Performance Measure #3	***The following information will be collected to measure the effectiveness of the grievance process:*** • The number of inquiries received. • The number and nature of complaints filed. • The number of complaints dismissed. • The number of complaints resolved informally by the Michigan Department of State's Bureau of Elections. • The number of complaints resolved by formal hearing. • The average time for a complaint to be investigated and resolved.
Timetable	January 1, 2005, and every odd-year January 1 thereafter.
Description of the criteria used to measure performance	The Secretary of State will review the reports from the Bureau of Elections following each federal election cycle.
Process used to develop criteria	The Bureau of Elections will submit a report containing number of complaints received, number of complaints resolved and time required/used for resolution.
Description of official to be held responsible for ensuring each performance goal is met.	The Bureau of Elections is responsible for administering the statewide grievance procedure.

Performance Goal 4: Provisional Ballots

The following will be measured with respect to provisional ballots: uniform processing, verification and status availability. Provisional ballot status reporting will be performed by each jurisdiction. The goal is to have uniform procedures in place in each jurisdiction for processing and verifying provisional ballots.

Performance Measure #4	***The following information will be collected to measure the effectiveness and uniformity of the "provisional" balloting process for statewide federal elections:*** • Number of provisional ballots cast in each precinct. • Number of voters in each precinct. • Number of provisional ballots verified and counted for each precinct. • Number of provisional ballots not counted in each precinct and reason.
Timetable	January 1, 2005, and every odd-year January 1 thereafter.
Description of the criteria used to measure performance	The election report from each jurisdiction will provide the Secretary of State with an indication of what additional tools may be needed for uniformity.
Process used to develop criteria	The Michigan Department of State's Bureau of Elections will enhance its election official training materials to include provisional ballot procedures and information.
Description of official to be held responsible for ensuring each performance goal is met	The Bureau of Elections will be responsible for uniform guidelines for processing and verifying provisional ballots. Local election officials will be responsible for provisional ballot verification, counting and reporting.

Performance Goal 5: Accessibility

One of the Help America Vote Act's principal objectives is to make the election process more accessible. Michigan will address both voting equipment and polling place accessibility. Michigan will also utilize part of the remaining Help America Vote Act funds to address accessibility issues through training and to provide materials and web information in accessible formats.

Performance Measure #5	***The following information will be collected to measure the effectiveness of the accessibility initiatives for statewide federal elections:*** • Number of military/overseas absentee applications. • Number of military/overseas ballots cast. • Number of military ballots rejected and associated reasons. • Number of polling locations. • Number of polling locations that are accessible. • Number of polling locations with accessible devices. • Number of polling locations without accessible devices. • Number of accessibility brochures distributed. • Number of accessibility complaints received and resolved. • Whether Michigan Web site and materials are available in accessible formats.
Timetable	January 1, 2005, and every odd-year January 1 thereafter.
Description of the criteria used to measure performance	Local election officials will submit this information semiannually to the Michigan Department of State's Bureau of Elections.
Process used to develop criteria	Election officials will be required to certify polling place accessibility.
Description of official responsible for ensuring each performance goal is met	The local election officials will be responsible for certifying polling place accessibility. The Bureau of Elections will ensure that the Web site is in an accessible format.

IX. State-Based Administrative Complaint Procedures

A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402. -- HAVA §254(a)(9)

The Michigan Department of State has agreed upon a uniform, non-discriminatory complaint procedure that meets the requirements of the Help America Vote Act. The complaint procedure will be adopted as a series of guidelines pursuant to the State's Administrative Procedures Act (APA), PA 306 of 1969, as amended.

The complaint procedure permits a person who believes that an election authority has violated or will violate a provision of Title III of the Help America Vote Act to invoke a formal investigation by submitting a sworn statement to the Michigan Department of State's Bureau of Elections. The statement must specify the election authority who is alleged to have violated Title III, the provision of Title III involved, how the violation is alleged to have occurred and whether the complainant personally witnessed or possesses first-hand knowledge of the alleged violation. The complainant may request a hearing on the matter. If the complaint is valid and a hearing is requested, the Bureau of Elections is required to proceed with the conduct of a hearing on the record.

The complaint procedure further directs the Bureau of Elections to resolve any formal complaints it receives within ninety (90) calendar days unless the complainant consents to an extension. If the Bureau of Elections determines that a violation of Title III occurred, it is authorized to order an appropriate remedy. If the Bureau of Elections is unable to render a final determination within ninety (90) calendar days, it is required to forward the record to the Department's Legal and Regulatory Services Administration for alternative dispute resolution. Upon the receipt of a referred complaint, the Legal and Regulatory Services Administration is required to conduct a review of the complaint and render a final determination within sixty (60) calendar days. If the Legal and Regulatory Services Administration determines a violation of Title III occurred, it is authorized to order an appropriate remedy. In such an instance, the Bureau of Elections is authorized to enforce any remedies ordered by the Legal and Regulatory Services Administration.

A copy of the complaint procedure is provided in the Appendix.

X. Effect of Title I Payments

If the State received any payment under title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities. -- HAVA §254 (a)(10)

Section 101: Election Administration Improvements

Michigan is eligible for approximately $9.9 million under Section 101 of the Help America Vote Act.

Section 102: Replacement of Punch Card Voting Systems and Lever Voting Machines

Michigan is eligible for approximately $6.8 million under Section 102 of the Help America Vote Act. The funds will be used to purchase voting systems that are compliant with the requirements of the Help America Vote Act.

XI. Michigan's HAVA State Plan Management

How the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change—

(A) is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;

(B) is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and

(C) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A). -- HAVA §254(a)(11)

Michigan will use the State Plan as the basis for managing the activities associated with the implementation of the Help America Vote Act. The Secretary of State, with guidance from the Help America Vote Act Steering Committee, will be responsible for the management and implementation of the State Plan. Michigan will conduct plan management at four levels:

Secretary of State: In Michigan, the Secretary of State functions as the State's Chief Election Officer. Accordingly, the Secretary of State is ultimately responsible for the implementation of the State Plan. As a result, the Secretary of State will possess the final authority in decision-making and management of the State Plan.

Help America Vote Act Steering Committee: A Steering Committee comprising the Secretary of State, the Department's Chief Operating Officer and the State Elections Director will be established to oversee all State Plan activities and provide necessary guidance, leadership and direction. The Steering Committee will meet on a regular basis to address compliance with the requirements of the Help America Vote Act and the implementation of the State Plan.

Help America Vote Act Project Committees: The Project Committees will comprise Department staff selected on an ad hoc basis. The Project Committees will be responsible for research, analysis and the development of any needs associated with the implementation of the State Plan.

Help America Vote Act Project Managers: Specified employees of the Michigan Department of State will be responsible for the day-to-day coordination and implementation of selected projects associated with the implementation of the State Plan. The Project Managers will be responsible for coordinating project activities; seeking the advice of county and local election officials, voter advocacy groups and other stakeholders in Michigan's elections process; reporting on the progress of the activities; and relaying any resource needs to the Steering Committee.

Michigan understands and agrees to comply with the requirements of the Help America Vote Act related to the ongoing management of the State Plan. More specifically, the State agrees that it may not make any material changes in the administration of the State Plan unless the change:

(1) is developed and published in the Federal Register in accordance with Section 255 of the Help America Vote Act in the same manner as the State Plan;

(2) is subject to public notice and comment in accordance with Section 256 of the Help America Vote Act in the same manner as the State Plan; and

(3) takes effect only after the expiration of the 30-day period that begins on the date the change is published in the Federal Register.

XII. Changes to State Plan from Previous Fiscal Year

In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State Plan for the previous fiscal year and of how the State succeeded in carrying out the State Plan for such previous fiscal year. -- HAVA §254(a)(12)

The FY 2003 Plan is Michigan's initial plan under the Help America Vote Act. This section will be updated in the FY 2004 Plan to reflect the changes made in the Plan as well as a summary of the 2003 successes.

XIII. State Plan Development and Committee

A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the committee under such section 255 and section 256. -- HAVA §254 (a)(13)

A draft of the State Plan was created by the Department of State's Bureau of Elections with input from the Secretary of State's State Plan Advisory Committee and the public. The members of the committee conducted meetings on March 20, March 31, April 21, May 5, May 12, May 21, June 11 and June 20, 2003. The State Plan was distributed to the members of the Advisory Committee for review and discussion.

The preliminary version of the State Plan was released for public inspection and comment on June 17, 2003. The public comment period closed on July 31, 2003. All public comments submitted were taken into consideration when the final State Plan was prepared in accordance with Section 256 of the Help America Vote Act.

Committee Members

The Secretary of State named the following individuals to serve on the State Plan Advisory Committee:

Lynn Alexander, Senior Citizen Advisor of Oakland County

The Honorable Diane Byrum, State Representative

G. William Caddell, Oakland County Clerk

Robert Campau, Michigan Republican Party

Denise Cook, Michigan State AFL-CIO

The Honorable Maura D. Corrigan, Chief Justice, Michigan Supreme Court

The Honorable Mike Cox, Attorney General

Jackie Currie, Detroit City Clerk

A. Edwin Dore, Representing the Public's Interest

Kathryn Dornan, Farmington Hills City Clerk

Judy Elliott, Branch County Clerk

The Honorable Jennifer Granholm, Governor

The Honorable Beverly Hammerstrom, State Senator

Terri Hegarty, Grand Rapids City Clerk

Melvin Butch Hollowell, Michigan Democratic Party

Susan Kaltenbach, Saginaw County Clerk

Justin P. King, Michigan Association of School Boards

The Honorable Joseph Knollenberg, U.S. Representative

Terri Kowal, Shelby Charter Township Clerk

Robert LaBrant, Michigan Chamber of Commerce

The Honorable Carl Levin, U.S. Senator

Simone Lightfoot, NAACP

Committee Members (continued)

Tom Masseau, Michigan Protection & Advocacy Service

Ruth Pruis, Jamestown Township Clerk

Robert Richards, City of Escanaba Clerk

The Honorable Mark Schauer, State Senator

Lucille Taylor, Representing the Public's Interest

Mercedes Toohey, Former Director of Hispanic Community Center of Grand Rapids

Janice Vedder, Delta Charter Township Clerk

The Honorable Chris Ward, State Representative

Presentations and Statements

The following individuals offered formal presentations and/or statements at the meetings conducted by the Secretary of State's State Plan Advisory Committee:

Sandra Abrams, Commerce Charter Twp. Clerk (on behalf of MI Assoc. of Municipal Clerks)

William R. Barrett, Fidlar Election Company

Norma Bauer, Citizen

G. William Caddell, Oakland County Clerk

Charlene Corrigan, Ingham Cty. Election Coordinator (on behalf of Mike Bryanton, Ingham Cty. Clerk)

Jeff Delongchamp, Sequoia Voting Systems

Patricia Donath, President, League of Women Voters

Eric E. Doster, Foster, Swift, Collins & Smith, P.C.

Casey Dutmer, Legislative Chairman, MI Council of the Blind & Visually Impaired

Susan Fitzmaurice, ADA Coordinator, Cty. of Dearborn Commission on Disability Concerns

Richard C. Fox, Election Systems & Software

Michael F. Harris, Deputy Executive Director, Paralyzed Veterans of America

Terri Hegerty, Grand Rapids City Clerk

Michael J. Hodge, Miller, Canfield, Paddock & Stone

Rochel Jones, City of Detroit/Department of Elections

Robert Kakos, Wayne State University

Vincent Keenan, President, Publius.org

Terri Kowal, Shelby Charter Twp. Clerk (on behalf of MI Assoc. of Municipal Clerks)

Bud Kraft, Citizen

Gail Kundinger, Muskegon City Clerk (on behalf of MI Assoc. of Municipal Clerks)

Presentations and Statements (continued)

John Anthony LaPietra, Elections Coordinator, Green Party of Michigan

Sally Lollie, Intermediate School District Representative

Alice Mailhot, Citizen

Tom Masseau, Director of Public Policy, Michigan Protection & Advocacy Service, Inc.

M. Catherine McAdams, Chair, City of Dearborn Commission on Disability Concerns

Barry Miller, Miller Consultations

William B. Milzarski, Access Coordinator, Disability Advocates of Kent County

Sue Morrow, Plainfield Charter Township Clerk

Dave Murley, Michigan Department of State, Legal and Regulatory Services Admin.

John D. Pirich, Honigman, Miller, Schwartz & Cohn, LLP

Lucia Rios, Lakeshore Center for Independent Living

Roy Sovis, State Coordinator, Michigan Student/Parent Mock Election

Aimee Sterk, Lakeshore Center for Independent Living

Mari Stone, Vergennes Township Clerk (on behalf of Kent County Clerks Association)

Bill Trevarthen, Michigan Government Television

Larry Wanger, Disability Advocates of Kent County

Prof. Franklin H. Westervelt, Ph.D., P.E., Wayne State University

Mile Wilkinson, Sequoia Voting Systems

E'Lon-Eloni Wilks, Ph.D., Assistant to the Clerk, City of Detroit/Dept. of Elections

Gloria Williams, Director of Elections, City of Detroit/Dept. of Elections

R. Anthony Wong, Michigan Association of Centers for Independent Living

Ray Ziarno, M-FORE (Michigan Focus on Reforming Elections)

Diana Zucker, Clinton County Clerk

APPENDIX

Complaint Process

COMPLAINT PROCESS

I. *INTRODUCTION*

A. A person who believes that an election authority has violated or will violate a provision of Title III of the Help America Vote Act (42 U.S.C. 15512) that concerns an election for federal office may file a complaint with the Michigan Department of State's Bureau of Elections (Bureau) pursuant to these guidelines.

B. A person, before filing a complaint pursuant to these guidelines, should contact the election authority and attempt to resolve his or her concerns. However, failure to contact the election authority will not prevent a person from utilizing these complaint procedures.

II. *COMPLAINT PROCEDURE*

A. Timing

1. If the complaint meets Section III's requirements, the Department shall forward the complaint to the named election authority in five (5) days for a response.

2. An election authority shall have thirty (30) days to provide a written response to the complaint.

B. Complaint consolidation/withdrawal

1. The Bureau may consolidate complaints filed pursuant to these guidelines. Complaints will be consolidated if they contain substantially similar allegations against an election authority. The Bureau will generally consolidate additional complaints with an original complaint.

2. The Bureau may consolidate two or more complaints filed by the same person. A person who files more than one complaint shall be deemed to have consented to waive any timing requirements for previous complaints filed with the Bureau.

3. The Bureau may consolidate a complaint with a complaint that has been subject to a final determination by the Bureau.

4. A complainant may withdraw his or her complaint at any time during the complaint process. A complaint, once withdrawn, shall not be re-filed.

III. *COMPLAINTS*

A. Required Information

1. A complaint filed under these guidelines shall be in writing, notarized, signed and sworn by the person filing the complaint.

2. The complaint shall allege, with specificity, the following:

a) The election authority that has violated Title III

b) The Title III provision the election authority violated

c) An explanation of how the election authority named in (III)(2)(a) violated the Title III provision listed in (III)(2)(b)

d) A statement that the complainant either witnessed or possesses first-hand knowledge of the conduct alleged in (III)(2)(c)

B. Dismissal

1. Complaints that do not meet the requirements of III(A)(1) and III(A)(2) shall be dismissed without prejudice.

2. A person may re-file a complaint that has been dismissed without prejudice.

III. *COMPLAINTS (continued)*

C. Optional Information

The complaint may include the following information:

1. A request that the Bureau conduct a hearing on the record (See Section V below)

2. Notarized affidavits from a maximum of three (3) persons who witnessed the alleged violations.

IV. *RESPONSES*

A. Requirements

1. The response shall be in writing, notarized and signed by the chief election officer of the election authority.

2. The response shall confirm or deny the allegation (if known).

3. The election authority shall respond to the complaint within 25 days after receipt.

4. The election authority is not required to respond to a complaint.

B. Optional Information

1. The response may include notarized affidavits from a maximum of three (3) persons who have information that may assist the Bureau in determining whether the election authority violated Title III.

V. *HEARINGS*

A. Procedure

1. A complainant may request that the Bureau conduct a hearing on the record (hereafter "hearing") regarding an alleged violation of Title III.

2. A complainant who desires a hearing must make such a request in the complaint.

3. The Department will schedule a hearing only if it receives a valid complaint.

B. Notice & Appearance

1. The Bureau shall notify the election authority of the complainant's hearing request.

2. The election authority shall inform the Bureau within twenty-five (25) days whether it intends to appear at the hearing. If the election authority opts to forgo the hearing, the Bureau shall rely on the authority's written response to the complaint, if any.

3. A complainant who has requested a hearing, but fails to appear at the hearing, shall have his or her complaint dismissed with prejudice.

C. Witnesses

1. Complainant - The Complainant may call as witnesses only those persons who provided affidavits pursuant to Section III (C)(2).

2. Election Authority - The election authority may call as witnesses only those persons who provided affidavits pursuant to Section IV (B)(1).

3. Bureau of Elections

a. The Bureau shall review both witness lists to ascertain the nature of the testimony, and shall strike those witnesses it believes will offer irrelevant or redundant testimony. A witness excised from a witness list shall not testify at the hearing.

b. The Bureau shall not bar the testimony of the complainant or the election authority's chief election officer.

D. Procedures

1. A witness shall testify only to those Title III violations alleged in the complaint.

2. Absent extraordinary circumstances, the Bureau shall hold hearings in Lansing. The Bureau shall schedule the date and time of the hearing.

3. The Bureau shall make an audio recording of the hearing.

4. The complaint, the response, any valid accompanying affidavits, and the relevant hearing testimony shall constitute the record.

5. Hearings shall be informal, non-contested case hearings and shall not be governed by the Administrative Procedures Act (APA), 1969 P.A. 306, as amended.

6. The Bureau of Elections shall designate one or more persons to direct the hearing.

VI. *DETERMINATION*

A. The Bureau shall review the record regarding the alleged Title III violations.

1. Procedures

a. The Bureau shall weigh written testimony—whether offered via complaint, response, or affidavit—equally with any oral testimony offered at a hearing.

b. The Bureau shall not draw any inference from a complainant's decision to request or not request a hearing or an election authority's decision to attend or not attend a hearing.

B. If, under the guidelines, the Bureau does not find reason to believe that the election authority has violated Title III, it shall dismiss the complaint and publish the results on its Web site.

C. If, under the guidelines, the Bureau has found reason to believe that the election authority has violated Title III, it shall, pursuant to Section 21 of the Michigan Election Law, 1954 P.A. 116, as amended, provides an appropriate remedy. The Bureau shall publish the results of its final determination on its Web site.

VII. *REMEDY*

A. The Bureau shall have wide discretion to provide an appropriate remedy

1. A remedy may include, but is not limited to, the following:

a. Sending a written finding of a Title III violation to the authority

b. Requiring a written response from the election authority, detailing how it will remedy a Title III violation

c. Additional election training for the election authority

B. A remedy shall not, under any circumstances, include a financial penalty

VIII. *TIMING*

A. The Bureau shall issue a final determination within ninety (90) days after it receives the complaint, unless the complainant consents to an extension or a complaint has been consolidated with another complaint.

1. If the Bureau fails to issue a final determination within ninety (90) days, it shall forward the record to the Department of State's Bureau of Legal Services for alternative dispute resolution.

IX. *ALTERNATIVE DISPUTE RESOLUTION*

A. The Legal and Regulatory Services Administration shall appoint a hearing officer to review the record. The hearing officer shall render a final determination within sixty (60) days after receiving the record.

B. After reviewing the record, the hearing officer shall issue a final determination declaring whether there is reason to believe that the election authority has violated Title III.

1. If the hearing officer finds reason to believe that an election authority has violated Title III, he or she shall order an appropriate remedy. The Bureau of Elections shall enforce the remedy.

    a. The Bureau of Elections shall report the hearing officer's decision and remedy (if any) on its Web site.

State of Minnesota

Minnesota State Plan

Developed pursuant to Public Law 107-252, Help America Vote Act of 2002, Section 253(b)

"The Act appropriately respects the primacy of state and local governments in the administration of elections, while helping to ensure the integrity and efficiency of voting processes in federal elections by providing federal governmental support for that vital endeavor."

PRESIDENT GEORGE W. BUSH
THE WHITE HOUSE
October 29, 2002

"The four pillars of voter rights—access, accuracy, privacy, and integrity—need to be strong and in balance in order for the election system to be as good as it can be. HAVA is a major national reinforcement of those four pillars."

Introduction by Secretary of State Mary Kiffmeyer

St. Paul, Minnesota
July 2003

Fellow Minnesotans:

I am pleased to share this document, Minnesota's plan for implementing the Help America Vote Act, P.L. 107-252 (HAVA) of 2002.

HAVA—the federal response to the 2000 election—requires state and local governments to improve election processes and systems, and it provides federal funding to help with these improvements. I am grateful to President Bush and the U.S. Congress for making election improvement a priority and for getting this historic legislation passed. It was an honor to work with Senators Wellstone and Dayton and with the rest of Minnesota's congressional delegation in crafting HAVA.

Through the years, Minnesota has demonstrated excellence in citizen participation. Our young people, 18- to 24-years-old, typically participate at twice the national average for voters of that age. In 2000 and in 2002, we had the highest overall voter turnout in the nation. Additionally, in 2002 we had the highest voter turnout in our state in a non-presidential election year since 1954.

We are fortunate in Minnesota because our state also has demonstrated a commitment to voting system improvements to support the high citizen involvement. In 2000, the state legislature established a voting equipment grant account to encourage local governments to replace hand-count and central-count voting systems with modern optical-scan in-the-precinct tabulators.

The additional federal funds will enable us to provide Minnesota with a HAVA-compliant statewide system. We will be able to train election officials effectively, efficiently, and more cost-effectively with uniform systems and materials.

HAVA will allow us to enhance the integrity of our voter registration process, increase privacy and independence for voters with disabilities, improve the election systems that support the absentee voting process, and provide all Minnesotans with better information on how to vote.

The four pillars of voter rights—access, accuracy, privacy, and integrity—need to be strong and in balance in order for the election system to be as good as it can be. HAVA is a major national reinforcement of those four pillars.

We are on schedule to make sure Minnesota complies with federal HAVA deadlines. I thank the HAVA Advisory Committee members who committed considerable time and showed great dedication to giving input on this plan. Their involvement has helped to ensure that Minnesota will have an accessible, uniform, statewide voting system that strives to meet both the spirit and letter of the law.

Sincerely,

Mary Kiffmeyer

Mary Kiffmeyer
Secretary of State

Glossary 40

Overview: State of Elections in Minnesota

Minnesota has a proud tradition of citizen participation, always ranking nationally at or near the top for voter turnout. Minnesota has a population of 4,919,479, according to the 2000 census. The state's rural population comprises about 28 percent of the total, and the urban population comprises about 72 percent. The largest cities are Minneapolis (population approximately 382,000), St. Paul (287,000), Rochester (89,000), Duluth (86,000), and Bloomington (85,000). Minnesota has 87 counties. By population, Hennepin is the largest (over 1 million) and Traverse is the smallest (4,100). By area, St. Louis is the largest (over 4 million acres) and Ramsey is the smallest (101,190 acres).

2002 General Election Data:
For the 2002 General Election, the Office of the Secretary of State estimated the voting age population to be 3,712,500. This is the voting age population (VAP) or the pool of potential voters. These voters are spread throughout Minnesota and vote in a variety of jurisdictions.

Minnesota Jurisdictions:

8	Congressional Districts
67	Senate Districts
87	Counties
134	House of Representatives Districts
425	School Districts
850	Charter and Statutory Cities
1800	Townships
4106	Precincts

Unorganized Territories:
Fifteen counties also have unorganized territories. Unorganized territories are portions of counties that do not fall inside the corporate boundaries of a city or an organized township. These areas do not have their own local government and fall under the direct control of the county board of commissioners.

Most unorganized territories are in Northern Minnesota with Cook, Lake, Koochiching, and Lake of the Woods Counties being comprised largely of unorganized territories. The most densely populated unorganized territory is West Crow Wing County unorganized territory, located directly north of the city of Baxter. The West Crow Wing unorganized territory is comprised of three precincts and has a total population of over 5,000 people. Hennepin County is the only metropolitan county with unorganized territory. The Fort Snelling unorganized territory is located directly south of Minneapolis and is in the vicinity of Fort Snelling, the VA hospital, and the Twin Cities Metropolitan Airport.

Voter Turnout:
For the 2002 General Election, the Office of the Secretary of State estimated the voting age population to be 3,712,500. With 2,282,860 ballots cast, the estimated voter turnout in Minnesota was 61.5 percent. This is the highest voter turnout for a mid-term (Minnesota constitutional offices and U.S. Congressional offices) election since 1952.

Ballots Cast by Precinct:
In 2002 there were 4,106 precincts in the state of Minnesota. The average precinct had 556 ballots cast. A majority of voters cast their ballot in large precincts. The five largest precincts account for 7.4 percent of all ballots cast, 13 percent from the ten largest, and 30 percent of all ballots cast were cast in the 25 largest precincts.

On the other hand, the 1,858 smallest precincts, accounting for over 45 percent of precincts, produced only 8.8 percent of ballots cast in 2002. The were 13 designated precincts with zero (0) ballots cast, 58 precincts with ten or fewer ballots cast, 394 with fifty or fewer, and 934 precincts with 100 or fewer ballots cast. Precincts with 250 voters or less cast 8.8 percent of ballots and 21 percent of ballots were cast in precincts with 556 or fewer voters.

In terms of the number of ballots cast, 24 precincts had over 2,500 ballots cast. There also were 101 precincts with over 2,000 ballots, 348 precincts with over 1,500, and 880 precincts with over 1,000 ballots cast in the 2002 General Election.

Absentee Ballots:
For each precinct, ballots may be cast in person at the polling place or by absentee ballot. There were 2,282,860 ballots cast at the 2002 General Election. Of those ballots, 2,169,556, or 95 percent, were cast by voters in the polling place and 110,885 (5 percent) were cast as absentee ballots. Of the absentee ballots 110,168 were regular absentee ballots and 717 were federal absentee ballots.

The average number of in-person ballots cast in a precinct was 528. The five precincts with the largest number of in-person voters had between 2,841 and 3,439 votes cast in the precinct. On the small end, there were 56 precincts with zero in-person voters and nearly 100 precincts with 10 or fewer in-person voters. In Minnesota nearly one-fifth of all precincts have 100 or fewer in-person voters.

Pre-Registered Voters:
In addition to the number of ballots cast statewide and in each precinct, important statistics include the number of registered voters, voters registering on Election Day, and voter turnout.

As of 7:00 on the morning of the 2002 General Election, the total number of pre-registered voters was 2,844,428. The average number of pre-registered voters in each precinct was 693.

Election Day Registrations:
The total number of persons registering on Election Day was 342,978. Election Day registrants accounted for approximately 15 percent of all ballots cast at the 2002 General Election. The average number of Election Day registrations in each precinct was 84 Election Day registrations.

Precincts with large college student populations have the largest number of Election Day registrations. The University of Minnesota, Midwest Bible College, the Minneapolis College of Art and Design in Minneapolis, St. Olaf College in Northfield, and the College of St. Benedict in St. Joseph are among the schools with the largest number of Election Day registrants.

A total of 28 precincts had 500 or more Election Day registrations, while 1,121 precincts had 10 or fewer Election Day registrations.

County	Est. Voting Age Pop	7:00 AM Registrations	Election Day Registrations	Absentee Ballots Cast	Total Ballots Cast
Aitkin	12,618	9,974	804	709	8,106
Anoka	220,095	162,310	19,985	4,824	140,361
Becker	22,423	16,835	1,748	924	13,539
Beltrami	29,056	20,292	2,723	1,186	15,547
Benton	25,695	16,238	2,965	415	13,724
Big Stone	4,314	3,368	231	782	2,741
Blue Earth	44,398	28,718	4,918	961	24,306

Voting Systems:

The voting method used in each precinct at the 2002 General Election included central count optical scan, precinct tabulator optical scan, and hand-counted paper ballots.

Of Minnesota's 87 counties, seven were entirely hand-count, 24 were entirely central count optical scan, 14 were entirely precinct tabulator optical scan, and the remaining 42 used a mix of counting systems.

In terms of number and percent of precincts, with 1,882 or 46 percent of all precincts, precinct tabulator optical scan was the predominant voting system used in Minnesota. Central count optical scan was the second most prevalent system with 1,530 or 37 percent of precincts. The remaining 694 or 17 percent of precincts used hand-counted paper ballots.

At the 2002 General Election, there were 1,816,028 ballots cast on precinct tabulator optical scan machines. This amounts to 80 percent of all ballots cast. A total of 375,432 ballots, or 16 percent of all ballots, were counted on central count optical scan equipment. Four percent of ballots cast, or 91,400, were hand-counted on election night.

The largest precincts in the state used precinct tabulator equipment. Central count optical scan equipment and hand counting options are used in substantially smaller precincts.

The statewide average number of people voting in each precinct is 556. Precincts using precinct tabulator optical scan voting systems average 965 voters. Precincts using central count optical scan and hand-counted paper ballots are much smaller, at 245 and 132 respectively.

There are some fairly large hand-counted precincts. Pine City in Pine County is the largest hand-counted precinct with a total of 1,253 voters. Pine, St. Louis, Grant, Big Stone, Mower, and Roseau Counties all have hand-counted precincts with over 600 voters.

Voting System Vendors:

In terms of vendors and equipment used, the largest numbers of precincts are using Election System and Software (ES&S) equipment. A total of 2,897 precincts use some model of ES&S precinct tabulating or central counting optical scan voting equipment. A total of 515 precincts use precinct tabulating optical scan voting equipment produced by Diebold and 694 precincts are hand-counted and do not use any voting equipment.

The Voting System Equipment:

# of precincts	Model	System Type
853	Model 100	Precinct Tabulator
515	AccuVote	Precinct Tabulator
300	Optech IIIP Eagle	Precinct Tabulator
214	Optech IIIP	Precinct Tabulator
529	Model 150	Central Count
331	Model 115	Central Count
234	Optech IV	Central Count

# of precincts	Model	System Type
130	Model 315	Central Count
158	Model 550	Central Count
148	Various Precinct tabulators	Central Count
694	None	Hand Count

HAVA State Plan Development

The Federal Help America Vote Act (HAVA) of 2002, signed into law by President George W. Bush on October 29, 2002, provides the state of Minnesota an opportunity to enrich its already stellar election system. HAVA's purpose is to ensure fair elections and to empower voters to exercise their right to vote. HAVA embraces the goals of election improvement by expecting all levels of government to provide a process that:

- maintains an accurate list of citizens who are qualified to vote;
- encourages every eligible voter to effectively participate in the voting process;
- uses equipment that reliably enables voters to check their selections and registers the voter's choice;
- handles close elections in a predictable and fair way;
- operates with equal effectiveness for every citizen and community;
- displays limited and responsible federal participation; and
- requires providing voters with disabilities the ability to vote independently and in private.

The first step in the development of the State Plan was learning about HAVA and ensuring that everyone understood the federal mandates, the timeframes in which they were to be incorporated, and the resulting opportunities for Minnesota.

Office of the Secretary of State staff participated in workshops dedicated to the review and in-depth discussion of each Section of the Help America Vote Act. Staff also attended special sessions dedicated to HAVA, which were conducted by the National Association of Secretary of States (NASS) and the National Association of State Election Directors (NASED). Other states were consulted for advice and guidance to help assure that Minnesota's State Plan conforms to HAVA.

To inform the general public of HAVA, statewide press releases were distributed, and the topic of HAVA was discussed at various election official meetings.

A State Plan Advisory Committee was assembled pursuant to HAVA Section 255(a) with the role of reviewing the State Plan as it evolved, providing feedback on its content and offering their perspectives to election improvement in Minnesota. The committee consisted of a broad range of contributors representing counties, townships, municipalities, minority communities, disability communities, legislators, the governor's office, the League of Women Voters, students, and business.

On the topic of election accessibility improvements, Minnesota sought the insights, personal experiences, and suggestions from key stakeholders.

A listening session was conducted with the disabilities community to enlist and gather suggestions for ways in which Minnesota can meet the needs of voters with a full range of disabilities. Invitations were sent to over 30 agencies, and key points were gathered from various contributors including the National Federation of the Blind of Minnesota, the Minnesota State Council on Disability, Deaf & Hard of Hearing Services at the Minnesota Department of Human Services,

United Cerebral Palsy of MN, the Minnesota Commission Serving Deaf & Hard of Hearing People, and students from Blind, Inc.

HAVA Section 261 also has established a federal grant at the U.S. Department of Health and Human Services to establish, expand, and improve methods to ensure participation in the election process by people with disabilities. Minnesota has applied for this grant, and key points from the listening session were incorporated into the grant application.

A listening session was held with Minority communities. Some of the attendees included the Metropolitan Economic Development Association (MEDA), India Association of Minnesota, Council on Asian Pacific MN, as well as representatives from the African-American, Hispanic, and other Asian communities.

Legislation was passed creating an account in the state treasury into which all HAVA funds are being deposited and credited. (Laws 2003, First Special Session, Chapter 7) The benefits of this account are to house the funds separately to ensure it is used exclusively for election improvement and to assist the annual audit effort.

The State Plan was published and available for public comment during the comment period of June 9 through July 9, 2003, as required by HAVA, Section 256, which states:

For purposes of Section 251(a)(1)(C), a State plan meets the public notice and comment requirement of this Section if--

(1) not later than 30 days prior to the submission of the plan, the State made a preliminary version of the plan available for public inspection and comment;
(2) the State publishes notice that the preliminary version of the plan is so available; and
(3) the State took the public comments made regarding the preliminary version of the plan into account in preparing the plan, which was filed with the Commission.

Legislation was prepared during the 2003 legislature by the Office of the Secretary of State to conform Minnesota state election laws to the specific, applicable requirements of the HAVA federal election law. One of the objectives of the legislation is to establish a single voter registration and election administration process that applies to all elections conducted in the state, rather than a dual system with separate processes for elections of federal offices and those for non-federal offices, which might be required if no state HAVA-conformity legislation is enacted. The legislation, HF 1006, was passed by the State House of Representatives, but was not passed by the State Senate. This legislation can still be considered by the 2004 legislature, which convenes in February 2004. Passage would avoid or minimize voter confusion and the administrative complexity of maintaining two processes.

To define the details of the plan, work groups are being formed to give input to help to analyze, identify, and clarify the work effort. Various work groups may be established for the Statewide Voter Registration System, polling place ADA compliance, election judge training regarding disabilities, same-day registration, minority issues, and voter education.

Implementation Components

Section 1
Use of Requirements Payment Funds to meet Title III

Section 1 of the Minnesota State Plan describes "how the State will use the requirements payment to meet the requirements of Title III, and, if applicable under Section 251(a)(2) *sic*, to carry out other activities to improve the administration of elections" as required by Public Law 107-252, Help America Vote Act of 2002, Section 254(a)(1).

To meet the requirements of Title III, Minnesota will expend funds from the State HAVA account established by the 2003 Minnesota state legislature as directed by the legislature. (Laws 2003, First Special Session, Chapter 7, Sections 1 and 3)

Requirements payment expenditures will be used for the Title III purposes as described in State Plan Sections 1.1 through 1.7, by expenditures for:

- equipment, software, technical or physical infrastructures, materials, services, salaries, overhead;
- other expenses related to the activities described in this Section;
- planning, development, implementation, documentation, maintenance and operation, and administration of the activities; and
- outreach, education, and training to promote the activities.

After certification by the State of Minnesota to the Election Assistance Commission that the requirements described in Title III of HAVA have been met, requirements payments received and earnings accrued in the fund may be expended for other purposes related to the improvement of the administration of federal elections, HAVA Section 251(b)(2), subject to legislative appropriation.

1.1 Voting System Standards

Minnesota will use requirements payment funds for the implementation of a uniform, statewide voting system with locally-owned, precinct-based, optical scan equipment, and direct recording electronic voting technology or other voting system equipped for individuals with disabilities to bring each polling place into compliance with the voting system standards outlined in Title III of HAVA.

To meet Minnesota and HAVA voting system standards, Minnesota will:

- maintain certification standards to ensure that only systems meeting or exceeding the voting system standards in HAVA Section 301 may be certified for use in Minnesota;
- pursue legislation to codify the requirement that voting systems certified in Minnesota meet Federal Election Commission (FEC) standards, including FEC standards for error rates;
- pursue legislation to enable certification and use of direct recording electronic voting systems or other voting system equipped for individuals with disabilities that provide accessibility, privacy and independence for individuals with disabilities;
- use requirements payments funding to bring polling places into compliance with the voting system standards outlined in HAVA Section 301; and

- develop and distribute educational materials and voting instructions on voting procedures, voting rights, and voting technology.

1.2 Standards to Define Votes Counted by Equipment Type

For each category of voting system certified for use in Minnesota, the Office of the Secretary of State as required by HAVA Section 301(a)(6) will propose uniform and nondiscriminatory standards that define what constitutes a vote on each voting system and what will be counted as a vote.

1.3 Provisional Voting Requirements

Minnesota is exempt from the provisional voting requirements of the National Voter Registration Act (NVRA). Minnesota satisfies the requirements of HAVA, Section 302(a), through the use of election-day voter registration procedures established under Minnesota State law. (*Minn. Stat. Section* 201.061).

1.4 Voters Who Vote After the Polls Close

Minnesota State law (*Minn. Stat. Section* 204B.47) authorizes the Secretary of State to establish alternate procedures as necessary to administer a court order affecting the conduct of elections. The Secretary of State as required by HAVA Section 302(c) will develop procedures to administer voting in instances when voting hours have been extended by a court beyond the time established by Minnesota State law.

1.5 Voting Information Requirements

The Office of the Secretary of State will develop, produce, and distribute materials and example posters and make them available for posting on Election Day.

To the extent that additional, supplementary, or new materials are necessary to enable each polling place to meet voting information requirements mandated in HAVA Section 302(b), those materials will be developed, produced and distributed.

Minnesota is exempt from the requirements of 42 U.S.C.1973 aa-1a and 28 CFR Part 55 with respect to requirements to provide minority language materials and assistance, including election assistance, information, ballots and other materials in languages other than English. See Appendix to 28 CFR Part 55, which lists designated jurisdictions. Minnesota does not appear in that appendix as a designated jurisdiction.

1.6 Uniform Statewide Voter Registration System

The State of Minnesota will plan, develop, and implement a statewide voter registration system to meet all HAVA Title III requirements.

The system will, as required by HAVA Section 303:

- provide a unique identifier for every voter in the system;

- coordinate with other Minnesota State agencies databases to permit verification of registration data;
- identify ineligible registrants;
- provide increased system access for local election administrators;
- permit the administration of requirements for voters who register by mail; and
- accommodate the use of Minnesota driver license numbers and Social Security information as identifiers in voter records.

System development will also modify existing systems that interface with the statewide voter registration system elements and functionalities to preserve system integrity, ensure quality, and to be sufficiently robust to support increases in the number of users.

The Office of the Secretary of State will coordinate database information with other Minnesota State agencies, particularly the Minnesota Department of Public Safety to improve processing of voter registration applications, and the Minnesota Department of Health, to remove deceased registrants from voting rosters.

The Office of the Secretary of State will:

- provide information and training support to county officials for voter registration data entry;
- develop technology to process registration and voter history information in an expedited basis as well as training to use the technology:
- provide for security measures in the system to preclude unauthorized system access; and
- ensure that all applicable Minnesota State laws meet voter list maintenance requirements in HAVA Section 303.

1.7 Voter Registration Cards

Minnesota voter registration cards as required by HAVA Section 303(a)(5)(A)(i) will accommodate Minnesota driver license numbers and the last four digits of Social Security numbers and any other HAVA-required information. Minn. Stat. Section 201.071, subd. 1 already authorizes the use of NVRA forms for voter registration in Minnesota.

Section 2
Distribution and Monitoring Distribution of Requirements Payment

Section 2 of the Minnesota State Plan describes "how the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of (A) the criteria to be used to determine the eligibility of such units or entities for receiving the payment; and (B) the methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8)" as required by Public Law 107-252, Help America Vote Act of 2002, Section 254(a)(2).

2.1 Distribution and Monitoring Distribution of Requirements Payments

The Office of the Secretary of State as required by HAVA Section 254(a)(2) will develop statewide standards for complying with HAVA requirements. The expenditure of funds will be based on availability of State and federal funds deposited in the HAVA account. The Office of the Secretary of State will centrally administer expenditures funded through HAVA to meet the requirements of HAVA and fulfill initiatives in accordance with the State Plan. The use of funds will be consistent with the State budget plan described in HAVA Section 254(a)(6).

Requirements payment funds will be paid out based on the priorities referenced in Section 6.2 of the State Plan, with the funds distributed proportionately depending on the funding available and legislative authorization. Voter registration statistics and election-related expenditures at the time of 2002 General Election or the most recent State General Election, and for existing voting systems may be taken into consideration for any expenditure of funds for local governments and other entity's initiatives.

Any expenditure of funds for the initiatives of local governments or other entities in Minnesota will be in accordance with an agreement detailing the use of the funds. The Secretary of State may revise the State Plan as needed.

2.2 Method Used to Monitor the Performance of Recipients of Requirements Payments

If the units or other entities receive payments, the State will monitor the performance of the units or entities consistent with the performance goals and measures adopted under Section 8 of the State Plan.

Section 3
Training and Education

Section 3 of the Minnesota State Plan describes "how the State will provide for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III" as required by Public Law 107-252, Help America Vote Act of 2002, Section 254(a)(3).

Minnesota's HAVA funding will allow the state to increase its outreach and communications program to educate the voting public. The Office of the Secretary of State will utilize a multitude of media options in the method of voter education, including the following:

- public notices and public service announcements;
- publications (such as brochures);
- speeches and presentations;
- continuous direct contact with the statewide media;
- toll-free telephone system for voters to obtain their polling place location and other information; and
- electronic voter guides.

3.1 Programs for Voter Education

The Office of the Secretary of State will produce instructional posters for use in polling places and other educational materials containing instructions for voter registration and election procedures pursuant to Minnesota State Law *(Minn. Stat. Section 204B.27)* and HAVA Title III. Polling place materials will contain information needed by voters to cast their ballots and indicate the types of assistance available for elderly voters, voters with disabilities, and other voters needing assistance registering and voting.

Voter education information may be distributed by the Office of the Secretary of State using means such as public service announcements, brochures, posters, a toll-free telephone number, or a website (www.sos.state.mn.us).

The Office of the Secretary of State will ask system vendors to collaborate with staff in the production of clear, graphically driven pamphlets and brochures that will inform voters on how the voting devices work. The Office of the Secretary of State will investigate the idea of providing simulators and internet-based simulation of new voting devices to voters so they have an opportunity to view the new technology before they enter the voting booth to cast their official ballots on Election Day.

The Office of the Secretary of State will coordinate voter education and awareness efforts with Minnesota's Native Americans and other minority groups. The Office of the Secretary of State will target voter education efforts to address the needs of the disabled community, individuals with alternative language considerations, and the state's large college student population. The Office of the Secretary of State will enlist stakeholders to help work with media and community groups, political organizations, schools, and similar groups to communicate these changes and carry the state's messages about election improvements resulting from the implementation of HAVA.

Minnesota is exempt from the requirements of 42 U.S.C.1973 aa-1a and 28 CFR Part 55 with respect to requirements to provide minority language materials and assistance, including election assistance, information, ballots and other materials in languages other than English. See Appendix to 28 CFR Part 55, which lists designated jurisdictions. Minnesota does not appear in that appendix as a designated jurisdiction.

3.1.a Information on How to Cast a Vote

The voter education program will include information on how to cast a vote on the voting system used in the polling place. The polling place materials will:

- instruct voters of the effect of casting multiple votes for an office;
- provide instructions on how to correct a ballot before it is cast and counted; and
- include instructions on how to receive a replacement ballot if the voter is unable to correct the error.

The Office of the Secretary of State will:

- investigate the development of an Internet online tutorial (website application which would display a voter's precinct number, polling place location, offices and issues on the ballot, type of voting system, and instructions on how to use the voting system that exists in the precinct); and
- develop a program for each type of voting system to educate the voter on what constitutes a legal vote for each type of voting system, and how to cast a ballot correctly for each type of voting system, and to provide on the Secretary of State website an interactive county map with specific county information.

3.1.b Information on Absentee Balloting

The Office of the Secretary of State will modify example instructions to absentee voters to include information from the voter education program. Under Minnesota State law (*Minn. Stat. Section* 203B.07), instructions provided by the Office of the Secretary of State must also be provided to voters who vote by absentee ballot.

3.1.c Information on Election Procedures

The Office of the Secretary of State will develop and provide educational materials and instructions or example educational materials and instructions for display in polling places. Materials suitable for posting will contain information for voters including:

- an example version of the ballot used for that election;
- the date of the election and the hours during which the polling place is open;
- instructions on how to register to vote;
- instructions for mail-in registrants and first-time voters under HAVA Section 303(b);
- instructions on how to vote, including how to cast a vote and the Election Day registration process;
- general information on voter rights under applicable federal and Minnesota State laws, including information on the right of an individual to register on Election Day by using the Election Day registration process and information on how to contact the proper officials if these rights are alleged to have been violated; and

- general information on federal and Minnesota State laws prohibiting voter fraud and misrepresentation.

3.1.d Review of Voter Education Efforts

Understanding more about voter behavior and non-voter behavior is a proactive step to fully embrace the spirit, intent, principles and objectives of the Help America Vote Act. Innovation is important to understand voter needs and to view our election process through the eyes of the "consumer." Information will be collected from sample voters to guide the development of relevant and meaningful training materials for election officials and poll workers and in developing voter education materials for future elections. Research suggests that get-out-the-vote messages are rendered more effective when they include voter education components—e.g., information on the technical aspects of how to cast a ballot.

Therefore, the Office of the Secretary of State will:

- create public service announcements designed specifically to entice first-time voters to the polls and to educate them on what to expect;
- collaborate with researchers to conduct communication and voter behavior research aims to learn more about people's decisions to participate or not to participate in the election process and to determine if there are programs and initiatives that can be implemented, messages conveyed, or means of communicating that entice people to the polls and prepare them for the voting experience;
- share findings nationally as potential best practices to assist other state election administrators in understanding what messages and strategies are most effective; and
- promote elementary and high school civic education.

3.2 Election Official Education and Training

The Office of the Secretary of State will produce materials for dissemination to local government officials outlining the new requirements established by HAVA. The Office of the Secretary of State will also incorporate information on procedural and legal changes resulting from the requirements of HAVA and changes in Minnesota Election Law into the Election Training Program and supporting materials.

Pursuant to Minnesota State Law (*Minn. Stat. Section* 204B.25 and *Minn. Rules chapter* 8240), county auditors, municipal clerks, and school district clerks will be trained and certified to administer elections. The Office of Secretary of State will provide direct consultation and support for the training of municipal and school district election administrators.

The Office of the Secretary of State will produce and distribute, example educational materials for use in training programs for local election officials.

The Office of the Secretary of State will provide:

- conferences and updated materials for county auditors and county election staff;
- periodic training for city, township, and school district clerks responsible for the conduct of elections; and
- direct consultation and support for the training of city, township, and school district clerks.

The Office of the Secretary of State will develop and provide example training and educational materials suitable for use in training programs for local election officials that contain information on:

- how to use the statewide voter registration system;
- how to conduct voter and election judge training;
- voting system equipment and software operation, maintenance, storage, and programming;
- ballot testing, logic and accuracy testing, and information related to the implementation of new and additional optical scan and direct recording electronic voting systems or other voting system equipped for individuals with disabilities;
- how to set up, prepare for use, operate, troubleshoot, and close voting systems on Election Day;
- the responsibility of local election officials to provide election judges with the materials specified in Section 3.1 of the State Plan and that are to be posted in polling places on Election Day; and
- how to use technology to process registration and voter history information in an expedited basis.

3.3 Election Judge Training

Pursuant to Minnesota State Law (*Minn. Stat. Section* 204B.25 and *Minn. Rules chapter* 8240), election judges who work in polling places on Election Day are required to be trained and certified to administer elections.

County auditors and city clerks will train election judges to administer elections in the manner required by HAVA and Minnesota State law. The Office of the Secretary of State will produce election judge training materials for use by election judge trainers. The Office of the Secretary of State will provide direct consultation and support for the training of election judges.

The Office of the Secretary of State will develop and provide HAVA-compliant example training and educational materials suitable for use in election judge training programs conducted by local election officials. These materials will contain the following information and instructions:

- how to setup, prepare for use, initiate, operate, troubleshoot, and close voting systems on Election Day;
- how to instruct voters in the operation of voting equipment in the polling place;
- the posting of materials, specified in Section 3.1 of the State Plan, that are required to be posted in the polling place on Election Day;
- how to assist voters with disabilities;
- how to assist new voters; and
- how to address issues surrounding the need for accurate understanding of the voting process with individuals who lack experience in voting, limited proficiency in the English language, cultural diversity or other matters.

3.4 Election Judge Trainee

The Office of the Secretary of State will promote and provide materials and resources for an election judge training program.

Section 4
Adoption of Voting System Guidelines and Processes

Section 4 of the Minnesota State Plan describes "how the State will adopt voting system guidelines and processes that are consistent with the requirements of Title III" as required by Public Law 107-252, Help America Vote Act of 2002, Section 254(a)(4).

4.1 Voting System Guidelines and Certification Processes

Minnesota will implement voting system certification standards that are consistent with requirements outlined in HAVA Section 301(a)(1)(A) and (C) and Section 301(a)(2) and (3). Those Sections read:

> SEC. 301. VOTING SYSTEMS STANDARDS.
> (a) REQUIREMENTS.—Each voting system used in an election for Federal office shall meet the following requirements:
> (1) IN GENERAL.—
>
> (A) Except as provided in subparagraph (B), the voting system (including any lever voting system, optical scanning voting system, or direct recording electronic system) shall—
> (i) permit the voter to verify (in a private and independent manner) the votes selected by the voter on the ballot before the ballot is cast and counted;
> (ii) provide the voter with the opportunity (in a private and independent manner) to change the ballot or correct any error before the ballot is cast and counted (including the opportunity to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error); and
> (iii) if the voter selects votes for more than one candidate for a single office—
> (I) notify the voter that the voter has selected more than one candidate for a single office on the ballot;
> (II) notify the voter before the ballot is cast and counted of the effect of casting multiple votes for the office; and
> (III) provide the voter with the opportunity to correct the ballot before the ballot is cast and counted.
>
> * * *
>
> (C) The voting system shall ensure that any notification required under this paragraph preserves the privacy of the voter and the confidentiality of the ballot.
>
> (2) AUDIT CAPACITY.—
> (A) IN GENERAL.—The voting system shall produce a record with an audit capacity for such system.
> (B) MANUAL AUDIT CAPACITY.—
> (i) The voting system shall produce a permanent paper record with a manual audit capacity for such system.
> (ii) The voting system shall provide the voter with an opportunity to change the ballot or correct any error before the permanent paper record is produced.

(iii) The paper record produced under subparagraph (A) shall be available as an official record for any recount conducted with respect to any election in which the system is used.

(3) ACCESSIBILITY FOR INDIVIDUALS WITH DISABILITIES.— The voting system shall—

(A) be accessible for individuals with disabilities, including nonvisual accessibility for the blind and visually impaired, in a manner that provides the same opportunity for access and participation (including privacy and independence) as for other voters;
(B) satisfy the requirement of subparagraph (A) through the use of at least one direct recording electronic voting system or other voting system equipped for individuals with disabilities at each polling place; and
(C) if purchased with funds made available under title II on or after January 1, 2007, meet the voting system standards for disability access (as outlined in this paragraph).

Under current Minnesota State law (*Minn. Stat. Sections* 206.57–206.58 and *Minn. Rules chapters* 8220–8230), voting systems must be examined and certified by the Office of the Secretary of State before being adopted for use in Minnesota. An application for voting system examination must be accompanied by a certification from an approved Independent Testing Authority attesting to the conformance of the system to the standards for voting equipment issued by the Federal Election Commission (including standards for error rates).

Applications for examination must also be accompanied by:

- complete specifications for system hardware, firmware, software, related services that may be purchased separately or bundled as part of a purchased package, materials and supplies;
- all system documentation including technical manuals and instructional materials;
- vendor past history in implementation, installation and use of equipment;
- a current list of all jurisdictions where the equipment has been used or certified;
- all information, materials, and procedures required by Minnesota Statutes and Rules; and
- all other information and materials as requested by the Office of the Secretary of State.

Before certification of any voting system in Minnesota, designees of the Office of the Secretary of State must attend an acceptance demonstration conducted by the vendor to verify that the system operates in compliance with Minnesota State law and procedures. The designees of the Office of the Secretary of State must observe the system in operation under conditions closely simulating an election. The Office of the Secretary of State may impose additional testing and technical evaluation.

4.2 Current Voting System Requirements - Paper Ballots

Minnesota law currently sets a number of specific requirements for voting systems in statute and rule.

Under Minnesota Statutes, Sections 206.55 to 206.90, all voting systems that are not traditional, manually counted paper ballot systems must be certified in advance for use by the Office of the Secretary of State. At the current time, only optical scan systems have been so certified.

Changes from the current voting system requirements must be approved by the legislature as an amendment to current Minnesota law before they can be implemented. To permit a non-paper ballot direct recording electronic voting system, the legislature must approve language amending Minnesota Statutes, Chapter 206 and Minnesota Rules, Chapter 8220.

All votes in Minnesota, other than those in pilot projects specifically authorized under Section 206.81, are currently required to be cast by marking paper ballots of one kind or another.

All optical scan voting systems in use in Minnesota are required to use ballot cards in connection with voting. Current law requires that all electronic voting systems in Minnesota are voted by marking a paper ballot card (Section 206.56, subd. 5).

4.3 Current Voting System Requirements: Audit Trail

Existing Minnesota law also sets forth strict requirements as to audit trail for ballots.

Minnesota Rules, part 8220.0250, Subp. 1a, defines the audit trail as including:
"any documentation of changes made to voting system programming, the incident report, and the report generated by an electronic voting system on election day. "

Furthermore, Rule 8220.0450 more specifically requires the following features on each and every voting system in Minnesota:

C. full audit capability, with an audit trail, which includes a printout of overvotes and undervotes for each office and issue, and with the undervotes recorded directly from the ballots and not determined by subtraction of totals from ballots that were not overvoted; ...

G. the production of reports, which include vote totals and all statistics and other information required by the secretary of state;

H. simulation of vote counting involving a configuration of the largest number of voters, precincts, offices, and candidates with which the system is expected to be used, which vote counting includes ballots showing overvotes, undervotes, and invalid votes as well as those with no overvotes or stray marks, in many different combinations, and demonstrates rotation sequences and the ability to count votes cast on the partisan, nonpartisan, and proposal sections of the ballot independently;

I. accuracy of vote counting and procedures or process for testing accuracy;

J. provisions for maintaining the security and integrity of elections.

Minnesota Rules, Chapter 8220 sets forth numerous other requirements for electronic voting systems, which would include all voting systems proposed to be purchased under this Plan, including Part 8220.0750, which regulates the computer program to be used in counting the votes.

Any changes from the current voting system audit trail requirements must be adopted in rule or approved by the legislature as an amendment to current Minnesota law before they can be implemented.

4.4 Voting System Administrative Processes

The Office of the Secretary of State will adopt voting systems guidelines and processes consistent with the voting systems standards required by HAVA Section 301 as well as state law.

4.5 Direct Recording Electronic Voting System Simulation Project

HAVA, Section 301(a)(3)(b) has mandated that direct recording electronic voting systems, or other voting system equipped for individuals with disabilities (assistive voting technology or AVT), be added to each polling place in Minnesota for elections for federal office occurring after January 1, 2006.

All election administration procedures must be in place prior to complete implementation of direct recording electronic or AVT voting systems in polling places by 2006. A simulation election is planned for November 2003 to replicate the election administration processes and procedures necessary for the incorporation of direct recording electronic or AVT voting systems in Minnesota elections. The simulation election will be overseen by the Office of the Secretary of State and conducted by local election officials. The simulation election will include all administrative steps necessary for inclusion of direct recording electronic or AVT voting systems in Minnesota elections. The simulation election will not accumulate actual votes but will allow voters to operate voting equipment in the polling place to cast simulation ballots. The simulation will be used to evaluate election administration procedures, including polling place procedures, for using direct recording electronic or AVT voting systems.

The processes and procedures used in Minnesota elections assure the election integrity and accuracy. The direct recording electronic or AVT voting systems will provide for voter access and privacy for voters with disabilities, including visually impaired voters and voters with low vision.

Section 5
State Fund for Administering Minnesota's Activities

Section 5 of the Minnesota State Plan describes "how the State will establish a fund described in subsection (b) for purposes of administering the State's activities under this part, including information on fund management" as required by Public Law 107-252, Help America Vote Act of 2002, Section 254(a)(5).

5.1 Establishment of State Election Fund

The Minnesota legislature created an account in law to receive federal funds transferred to Minnesota under HAVA. The account is specifically for HAVA purposes only, is specifically compliant with Section 254(b), and is in effect as of the time of the submission of the State Plan. (See Laws 2003, First Special Session, Chapter 7.) HAVA provides that the funds deposited in the account and earnings accrued may be used for a variety of election purposes, including training election officials, educating voters, developing and implementing a HAVA-compliant statewide voter registration system and buying or developing voting systems. The account will also contain any State funds appropriated for HAVA purposes.

The State law establishes that funds previously expended on compliant voting equipment constitute the five percent match requirement that applies to the requirements payments of the HAVA authorized federal funds.

5.2 Fund Management

Laws 2003, First Special Session, Chapter 7 appropriates to the Office of the Secretary of State funds to be used for election administration purposes set forth in that legislation that are consistent with HAVA and the State Plan certified by the Governor. Federal money deposited in the account, and earnings accrued, carries over from one fiscal year to the next. The account is effective retroactively to the full extent permitted by HAVA.

Section 6
Minnesota's Proposed Budget

Section 6 of the Minnesota State Plan describes "the State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on:

(A) The costs of the activities required to be carried out to meet the requirements of Title III;
(B) The portion of the requirements payment which will be used to carry out activities to meet such requirements; and
(C) The portion of the requirements payment that will be used to carry out other activities" as required by Public Law 107-252, Help America Vote Act of 2002, Section 254(a)(6).

6.1 Minnesota's Anticipated Federal and State Funds

Fiscal Year	Federal Funds Authorized	Federal Funds Appropriated	Minnesota Share*	5% Match
2003 Title II	$1,400 million	$830 million	$14.2 million	$712,000
2004	$1,000 million	$500 million**	$8.5 million***	$410,000***
2005	$600 million	Unknown	***	***

* Minnesota's share is based on a HAVA formula using a voting age population of 1.71 percent of total US voters. Figures are estimates.
**For federal fiscal year 2004, the President's budget proposal includes a placeholder of about $500 million for all HAVA activities.
***Figure will change depending on the actual appropriation, the proportional funding of Title III requirements, and the MN State match.

Federal funds listed above include all money available to the 50 states, U.S. territories, and other entities with funding authorization through HAVA. Early payments and fiscal year 2003 values include the funds appropriated in 2002.

6.2 Costs of Activities Required by Title III

The State will use requirements payment funds to meet the requirements of HAVA Title III. These funds will be expended to develop or purchase uniform statewide voting equipment and systems, including related expenses, and the purchase of county-owned, optical scan precinct tabulators, voting equipment and direct recording electronic or AVT recording technology voting system equipped for individuals with disabilities.

It is recognized that accessible, accurate, and efficient election administration and the voter registration system in Minnesota requires the coordinated resources and efforts of the state, counties, cities, towns, and school districts. Because of this, it is further recognized that funds received under HAVA will be used to assist all jurisdictions to achieve the goals specified by HAVA and the Minnesota State Plan.

Funds will be used for HAVA-compliant voter registration system development. These funds will be used to plan, develop, and implement a statewide voter registration system that meets HAVA

Title III requirements, including all the items specified in Section 1 of the State Plan and items required by Minnesota Election Laws.

Funds will be used to update and conduct the Election Training Program as described in Section 3 of the State Plan. Educational and training materials and information developed and distributed to election administrators and election judges as required by HAVA, and materials and information about changes in Minnesota Election Law as the result of changes required by HAVA, will be included in the expenditures of requirements payment funds as described in Section 3 of the State Plan. The voter education programs necessary to implement new voting technology are included in this category of requirements payment expenditures.

As described in Section 1 of the State Plan, administrative costs will cover:

- changes due to the requirements in HAVA;
- technology planning and improvements;
- changes to the Election Night Reporting System to make that system compatible with the HAVA-compliant voter registration system;
- polling place infrastructure upgrades;
- other expenditures to implement the requirements of Title III of HAVA; and
- voter information and education programs as described in Section 3 of the State Plan.

Activity	Estimated Cost
Voter registration system enhancements	$5 – 10 million
Election official training, election judge training, and voter education	$2 – 5 million
Administrative costs	$1.25 million
Technology planning and improvements	$0.6 – 1.1 million
Voter information and education program	$0.5 – 1 million
Vote tabulating equipment and systems	$30 million
Total	$39.35 – 48.35 million

As mentioned in Section 2.1 of the State Plan, funds will be paid out based on these priorities, with the funds distributed proportionately depending on the funding available.

6.3 Portion of Requirements Payments for Other Activities

An amount up to one-half of one percent may be reserved for activities that are consistent with other laws and requirements as provided in HAVA Section 101(c). The use of these funds will be determined by the Office of the Secretary of State and will be used to pay for expenses related to the improvement of the administration of federal elections and to fulfill initiatives in accordance with the State Plan. These may include any expenses for the planning, development, implementation, documentation, maintenance and operation, and administration of election activities, and for outreach, education, training, and promotion of election activities.

Funding shall be provided for an increased outreach and education effort to encourage voters to register prior to the pre-registration cutoff date and/or Election Day, thus easing the administrative work involved with processing Election Day information on an expedited basis as required in HAVA (Section 303, Section (a)(1)(vi)).

6.4 Use of Requirements Payment after Certification that Minnesota Has Met the Requirements Described in Title III of HAVA

After certification by the State of Minnesota to the Election Assistance Commission that the requirements described in Title III of HAVA have been met, requirements payments received or remaining, and earnings accrued in the fund, may be expended for other purposes related to the improvement of the administration of federal elections.

Requirements payment expenditures will be used subject to legislative approval for equipment, software, technical or physical infrastructures, materials, services, salaries, overhead, and any other expenses related to the activities described in Section 1 of the State Plan. This may include any expenses for the planning, development, implementation, documentation, maintenance and operation, and administration of the activities, for outreach, education, and training to promote the activities, and for other purposes related to the improvement of the administration of federal elections.

6.5 Use of Earnings Accrued on Requirements Payment in State Election Fund

Earnings accrued on requirements payment deposited in the State Election Fund as described in Section 5 of the State Plan may be used subject to legislative approval for other purposes related to the improvement of the administration of federal elections including expenditures for equipment, software, technical or physical infrastructures, materials, services, salaries, overhead, and any other expenses related to the activities described in Section 1 of the State Plan to fulfill initiatives in accordance with the State Plan.

These additional expenses may include any expenses for the planning, development, implementation, documentation, maintenance and operation, and administration of the activities, for outreach, education, training, and promotion of the activities, and for other purposes related to the improvement of the administration of federal elections.

Section 7
Maintenance of Effort

Section 7 of the Minnesota State Plan describes "how the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000" as required by Public Law 107-252, Help America Vote Act of 2002, Section 254(a)(7).

7.1 State Maintenance of Effort

State funding for activities for which requirements payments are used will not be reduced below the fiscal year 2000 State expenditure level. In addition, the State will expend funds above that base expenditure level generally to meet the requirements of HAVA Title III and improve the administration of federal elections.

The maintenance of effort amount is based on expenditures in fiscal year 2000 for items or activities now required by HAVA Title III including:

- those activities in 2000 necessary to meet the requirements including expenditures for equipment, software, technical and physical infrastructures, materials, services, salaries, overhead; and
- other expenses in 2000 related to the requirements including expenditures for the planning, development, documentation, maintenance and operation, administration of the requirements, and for outreach, education, and training to promote the items and activities now required by HAVA Title III.

Section 8
Development and Adoption of Performance Goals and Measures

Section 8 of the Minnesota State Plan describes "how the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met" as required by Public Law 107-252, Help America Vote Act of 2002, Section 254(a)(8).

8.1 Development and Adoption of Performance Goals

The Office of the Secretary of State will develop and adopt performance goals for the implementation of the requirements of HAVA Title III and the various elements of the State Plan. The Office of the Secretary of State will collect input from county auditors and municipal election officials in the development of the goals. The goals will be reviewed and edited to reflect collected input, successes and completion of elements of the State Plan, and the availability of State and federal funds.

The goals will be set to measure successes related to the voting system standards, voting information requirements, the uniform statewide voter registration system, voter registration cards, voting system guidelines and certification processes, voting system administration processes, programs for voter education, election official education and training, and election judge training.

The Office of the Secretary of State will develop measures to evaluate the performance and successes toward meeting goals. The measures will contain criteria by which to evaluate the correct, complete, and timely performance of each goal. Tasks will be allocated to state or local officials as provided in Minnesota Election Law, if the responsible official is specified in law. Where responsible officials are not specified, the Office of the Secretary of State will solicit input from county auditors and municipal election officials and will specify the responsible official.

The performance goals will include specific deadlines for the completion of various tasks and goals to meet the requirements of HAVA Title III and the various elements of the State Plan.

Section 9
Administrative Complaint Procedures

Section 9 of the Minnesota State Plan provides "a description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402" as required by Public Law 107-252, Help America Vote Act of 2002, Section 254(a)(9).

9.1 Establishment of Uniform, Nondiscriminatory State-based Administrative Complaint Procedure

A uniform, nondiscriminatory, state-based complaint system is being administered by the Office of the Secretary of State.

9.2 Overview of Complaint Procedure

The Office of the Secretary of State administers the complaint procedure, enacted in Laws 2003, First Special Session, Chapter 7, Section 2 and which is now in effect. The procedures provide for the review of complaints related to:

- voting system standards;
- computerized statewide registration lists and equipment;
- voter registration requirements; and
- other features of State implementation of Title III of the Help America Vote Act of 2002.

The Office of the Secretary of State will provide forms on which complaints may be filed. The forms require the signature of the complainant, an affidavit and notarization, and the attachment of supporting documentation.

The Office of the Secretary of State will process notarized, written complaints. The complaint must be signed and sworn to by the person filing the complaint. The Office of the Secretary of State will review the notarized, written complaints. Election judges are to be deemed notaries public for purposes of this complaint procedure.

9.3 Procedure for Complaints Concerning a Town, City, School, or County Employee or Official

If the person files a complaint concerning a town, city, school, or county employee or official the procedure is:

1. A complaint is filed with the Office of the Secretary of State;
2. The Office of the Secretary of State sends a copy of the complaint to the election official in the town, city, school district, or county named;
3. The election official, receiving the copy, either:
    a. reaches an agreement with the complainant within 20 days; or
    b. files a response to the complaint with the Office of the Secretary of State;
4. If the election official cannot reach an agreement and files a response to the complaint, then:
    a. the Office of the Secretary of State will provide a copy of the response to the person filing the complaint; and
    b. will provide the person filing the complaint an opportunity for hearing on the record. If a hearing is requested, the election official is notified and given an opportunity to participate;

5. The Office of the Secretary of State shall issue a final ruling, and, if necessary, a remedial plan within 90 days of receipt of the initial complaint;
6. If the Office of the Secretary of State does not issue a ruling within 90 days of receipt of the initial complaint, the Office of the Secretary of State will provide alternative dispute resolution;
7. The alternative dispute resolution process must be completed within 60 days of its commencement; and
8. Determinations by the Office of the Secretary of State or in alternative dispute resolution involving local election employees or officials may be appealed to the district court for the county in which the local election employee or official is employed.

9.4 Procedure for Complaints Concerning the Office of the Secretary of State

If the person files a complaint concerning the Office of the Secretary of State, the general procedure is:

1. A complaint is filed with the Office of the Secretary of State;
2. The Office of the Secretary of State sends a copy of the complaint to the Office of Administrative Hearings (OAH);
3. The Office of the Secretary of State either:
   a. reaches an agreement with the complainant within 20 days; or
   b. files a response to the complaint with the Office of Administrative hearings;
4. If the Office of the Secretary of State cannot reach an agreement and files a response to the complaint, then:
   a. the OAH will provide a copy of the response to the person filing the complaint; and
   b. provide the person filing the complaint an opportunity for a hearing. If the informal hearing is requested, the Office of the Secretary of State is notified and given an opportunity to participate;
5. The OAH shall issue a final ruling, and, if necessary, a remedial plan within 90 days of receipt of the initial complaint;
6. If the OAH does not issue a ruling within 90 days of the initial complaint, the OAH will provide alternative dispute resolution;
7. The alternative dispute resolution process must be completed within 60 days of its commencement; and
8. Determinations by the OAH involving the Office of the Secretary of State are subject to appellate review.

Section 10
Title I Payments

Section 10 of the Minnesota State Plan provides, "if the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities" as required by Public Law 107-252, Help America Vote Act of 2002, Section 254(a)(10).

10.1 Use of Title One Payments

The State of Minnesota will use HAVA Title I funds to plan, develop, and implement a uniform statewide voter registration system to meet HAVA Title III requirements.

Minnesota's Anticipated Federal and State Funds:

Fiscal Year	Federal Funds Authorized	Federal Funds Appropriated	Minnesota Share*	5% Match
2003 Title I	$650 million	$650 million	$5.3 million	Not required

* Minnesota's share is based on a HAVA formula using a voting age population of 1.71 percent of total US voters. Figures are estimates.

The system will:

- provide a unique identifier for every voter in the system;
- coordinate with other State agency's databases to permit verification of registration data;
- identify ineligible registrants;
- provide increased system access for local election administrators;
- permit the administration of requirements for voters who register by mail; and
- accommodate the use of Minnesota driver license numbers and Social Security information as identifiers in voter records.

System development will also modify existing system elements and functionalities to preserve system integrity, ensure quality and be sufficiently robust to support increases in the number of users.

Minnesota also will use the funds under HAVA Title I to carry out one or more of the activities delineated in Section 101 of HAVA, and, if funds remain, HAVA Title III requirements.

Section 11
Ongoing Plan Management

Section 11 of the Minnesota State Plan describes "how the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change (A) is developed and published in the Federal Register in accordance with Section 255 in the same manner as the State plan; (B) is subject to public notice and comment in accordance with Section 256 in the same manner as the State plan; and (C) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A)" as required by Public Law 107-252, Help America Vote Act of 2002, Section 254(a)(11).

11.1 Ongoing Management of the Plan

The Office of the Secretary of State will conduct ongoing management of the State Plan. The Office of the Secretary of State will review the State Plan each fiscal year. The State Plan will be evaluated on the ability of the State to meet objectives in Section 1 of the State Plan, based on the availability of State and federal funds, and the extent to which the budget defined in the State Plan reflects available funds.

The Office of the Secretary of State will establish and implement management standards such as the adoption of goals and performance measures, and review and approval processes. The Office of the Secretary of State also will be responsible for other election functions, including budget and fiscal, personnel, and office support functions.

The Office of the Secretary of State will periodically collect input from county auditors and municipal election officials to review progress and outcomes and to assess and recommend revisions to the State Plan. Based on input provided, the Office of the Secretary of State may make non-material changes in the State Plan without additional notice.

11.2 Material Changes to the State Plan

When a material change in the administration of the Plan is deemed necessary, the Office of the Secretary of State will assure the change:

- is developed and published in the Federal Register in accordance with HAVA Section 255 in the same manner as the State Plan;
- is subject to public notice and comment in accordance with HAVA Section 256 in the same manner as the State Plan; and
- takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with item (A).

Section 12
State Plan Changes and Successes in Previous Fiscal Year
