Federal Register

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, *www.archives.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** *www.access.gpo.gov/nara,* available through GPO Access, is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

For more information about GPO Access, contact the GPO Access User Support Team, call toll free 1-888-293-6498; DC area 202-512-1530; fax at 202-512-1262; or via email at *gpoaccess@gpo.gov.* The Support Team is available between 7:00 a.m. and 9:00 p.m. Eastern Time, Monday–Friday, except official holidays.

The annual subscription price for the **Federal Register** paper edition is $699, or $764 for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $264. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $10.00 for each issue, or $10.00 for each group of pages as actually bound; or $2.00 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 40% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, *bookstore@gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 69 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Printing Office, Washington DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register
Vol. 69, No. 57
Wednesday, March 24, 2004

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF ENERGY

10 CFR Part 852

RIN 1901–AB13

Guidelines for Physician Panel Determinations on Worker Requests for Assistance in Filing for State Worker's Compensation Benefits; Procedural Amendments

AGENCY: Department of Energy.

ACTION: Interim final rule; request for comment.

SUMMARY: In order to expedite the handling of applications submitted by contractor employees or their survivors to the Department of Energy (DOE) Office of Worker Advocacy for assistance in pursuing workers' compensation under State law for illness or death arising from exposure to toxic substances at a DOE workplace, DOE today publishes and makes immediately effective certain procedural amendments. Today's procedural amendments will help streamline the processing of applications submitted to DOE under part D of the Energy Employees Occupational Illness Compensation Program Act of 2000 (''EEOICPA''). The amendments reduce from three to one the minimum number of physicians required for an affirmative physician panel determination in most instances. To ensure that the procedural amendments in today's rule accomplish their purpose, DOE invites public comment on today's rule.

DATES: *Effective Date:* March 24, 2004. *Comment Date:* Comments are due April 23, 2004.

ADDRESSES: You may submit comments, identified by RIN 1901–AB13, by any of the following methods:

Electronic comments may be submitted at the Federal eRulemaking Portal: *http://www.regulations.gov.*

E-mail comments may be submitted to: *Judy.Keating@eh.doe.gov.* Comments may be mailed to: Judy Keating, Room 6B–128, U.S. Department of Energy, Office of Worker Advocacy, EH–8, 1000 Independence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT: Judy Keating, U.S. Department of Energy, Office of Worker Advocacy, EH–8, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–7551, e-mail address: *Judy.Keating@eh.doe.gov*.

SUPPLEMENTARY INFORMATION:

I. Background

On August 14, 2002, DOE published a final rule implementing part D of the Energy Employees Occupational Illness Compensation Program Act of 2000 (''the Act'') (42 U.S.C. 7384, *et seq.*), Guidelines for Physician Panel Determinations on Worker Requests for Assistance in Filing for State Workers' Compensation Benefits, 67 FR 52841. The rule, codified at 10 CFR part 852, sets forth procedures under which a DOE contractor employee or an employee's estate or survivor may seek assistance from the DOE Office of Worker Advocacy (''Program Office'') in filing a claim with the appropriate State workers' compensation system based on an illness or death that arose out of exposure to a toxic substance during the course of employment at a DOE facility. The rule also establishes the internal procedures to be followed by DOE in processing and considering an application for assistance.

DOE has received more than 20,000 applications for assistance under Part D of the Act. The Program Office conducts an initial screening of the applications to identify applications that are not eligible for assistance. An application must contain reasonable evidence that the following three conditions are met. First, the application was filed by or on behalf of a DOE contractor employee or the employee's estate or survivor. Second, the illness or death of the DOE contractor employee may have been caused by exposure to a toxic substance. Third, the illness or death may have been related to employment at a DOE facility. (See 67 FR at 52842–43, 52845).

Applications that pass the initial screening process are then submitted to a case development and document acquisition process whereby documents within DOE's control and relevant to the application are acquired from DOE's facilities and contractors, the files are organized, and a case summary is prepared. The complete application package is then presented to a Physician Panel for review. Pursuant to the terms of DOE's regulations, the Physician Panel reviews the package and determines whether the illness or death arose out of and in the course of employment by a DOE contractor and exposure to a toxic substance at a DOE facility. The Physician Panel determination is then forwarded to the Program Office.

Under DOE's regulations issued in August 2002, a Physician Panel is composed of three physicians appointed by the Secretary of Health and Human Services (''HHS''). The physicians are compensated at a rate not exceeding the cap established by law in 42 U.S.C. 7385o(d)(2)(B). Moreover, the Act requires that Physician Panel members have occupational medicine experience and competency in diagnosing occupational illnesses. (42 U.S.C. 7385o(d)(2)(A)). Only a small percentage of licensed physicians have the experience and competency in diagnosing occupational illnesses necessary to be qualified by HHS. While HHS has qualified over 150 physicians, participation on panels by qualified physicians is limited by the physicians' other professional obligations and a reluctance to devote time to this program for a number of reasons, including the compensation rate cap established by the Act (42 U.S.C. 7385o(d)(2)(B)).

The Physician Panels' review process is labor intensive; each physician is required to review all materials relating to the application. All panel members meet in conference, in person or by teleconference, in order to discuss the application and arrive at a determination agreed to by a majority of the members of the panel.

Today's rule permits a Physician Panel to be composed of a single qualified physician. Permitting single-physician panels will have the immediate effect of increasing the number of panels available to review completed applications. Single-physician panels will also simplify logistics by largely eliminating the time expended in coordinating and attending conferences, teleconferences, or meetings (though any panel physician is still free to consult with other appointed

physicians, Office of Worker Advocacy physicians, or other competent health care professionals, in accordance with DOE's regulations, to discuss assigned applications).

Today's rule also requires that negative determinations issued by a single-physician panel be reviewed independently by an additional single-physician panel. If the second single-physician panel issues a negative opinion, the Program Office accepts the two negative results. If the second single-physician panel issues a positive opinion, the case is reviewed independently by a third single-physician panel. The Program Office accepts the opinion of the majority of the three single-physician panels. Reexamination of an initial single-physician panel negative opinion assures that no application will receive a final negative determination based on the opinion of a single physician. DOE believes the use of single-physician panels coupled with a reexamination of single-physician panel negative determinations by additional single-physician panels will significantly increase the number of applications that can be reviewed by panels in a given time frame, while at the same time ensuring that this procedural change does not disadvantage applicants. Moreover, in DOE's experience, the usual time frame for providing a panel determination has been less than 20 days from the time of receipt by the panel. In less frequent cases, the rule would allow for the panels to request more time.

Today's rule amends § 852.13 to shorten the time permitted for a Physician Panel to make a determination and to submit the determination to the Program Office. DOE believes that the increased efficiencies of a single-physician panel will permit a more expeditious review of the application.

Today's rule will apply to all applications processed under part D of the EEOICPA. Cases that are presently being reviewed by three-physician panels will proceed to a determination by the panels as assigned. Cases assigned after the effective date of this rule will be assigned to single-physician panels or three-physician as determined by the Program Office.

II. Section by Section Analysis

The definition of ''Physician Panel'' is revised to permit a single physician to constitute a ''panel'' for the purpose of determining whether a death or illness arose out of and in the course of employment by a DOE contractor and exposure to a toxic substance at a DOE facility under § 852.8. Previously, ''Physician Panel'' was defined as ''a group of three physicians. * * *'' This formulation proved to be burdensome, too resource-intensive and unnecessary for a thorough review of applications for assistance. Analyzing an application for assistance and issuing a determination under § 852.8 can be performed efficiently and thoroughly by a single physician. The definition adopted today preserves DOE's discretion to convene three-physician panels. Nevertheless, DOE contemplates that a single-physician panel will be used in most instances in order to expedite processing of the applications. DOE also has modified the definition of ''Physician Panel'' so that it more accurately describes the functions of such panels.

Section 852.16 is amended by adding two new paragraphs (a) and (b) that read as follows. ''(a) If a panel composed of a single physician issues a negative determination, the negative determination is considered an initial opinion and the Program Office must direct an additional single-physician panel to review the application and issue an independent opinion. If the second single-physician panel issues a negative determination, the Program Offices considers the opinions as a negative determination by the Physician Panel for purposes of § 852.17(a) of this part. (b) If a second single-physician panel issues a positive opinion, the Program Office must direct an additional single-physician panel to review the application and issue an independent opinion. The Program Office reviews the three opinions and considers the majority of the three opinions as the determination by the Physician Panel for purposes of § 852.17(a) of this part.'' The independent reviews must occur before the Program Office can accept a negative determination under § 852.17. The entire text of the original § 852.16 is unchanged, but has been redesignated as paragraph (c).

Section 852.11(b) is amended by adding the phrase, ''If a Physician Panel has more than one physician,'' to recognize that this paragraph does not apply to a panel composed of a single physician. The rule continues to allow Physician Panels to be composed of more than one physician. DOE thus would retain the discretion to use multi-physician panels should it decide do so. DOE might determine that particular groups of applications or applications presenting a particular type of alleged illness were appropriate for multi-physician panels. Or experience might demonstrate that in certain circumstances single-physician panels were less efficient than three-physician panels. The rule preserves DOE's ability to use single-physician and multi-physician panels in the most efficient, most fair way, based on DOE's experience as this program progresses. If DOE uses panels composed of more than one physician, the panels will continue to be required to meet, discuss the application, and arrive at a determination agreed to by a majority. However, a negative determination by panels composed of more than one physician would not automatically be submitted for review by additional physicians, as will be done with negative determinations by panels composed of only one physician.

Section 852.13 sets a limit on the time that may elapse between the submission of the completed application to the Physician Panel and the submission of the panel's determination to the Program Office. Today's rule adjusts the time for this action from 30 working days to 20 working days.

III. Regulatory Review

A. Review under Executive Order 12866

This regulatory action has been determined to be a ''significant regulatory action'' under Executive Order 12866, Regulatory Planning and Review. *See* 58 FR 51735 (October 4, 1993). Accordingly, today's action was subject to review under the Executive Order by the Office of Information and Regulatory Affairs (OIRA) of the Office of Management and Budget.

B. Review Under the Paperwork Reduction Act

No new information collection requirements subject to the Paperwork Reduction Act, 44 U.S.C. 501 *et seq.* are imposed by today's regulatory action.

C. Review Under Executive Order 13132

Executive Order 13132, ''Federalism'' (64 FR 43255, August 4, 1999), imposes certain requirements on agencies formulating and implementing policies or regulations that preempt State law or that have federalism implications. Agencies are required to examine the constitutional and statutory authority supporting any action that would limit the policymaking discretion of the States and carefully assess the necessity for such actions. The Executive Order also requires agencies to have an accountable process to ensure meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications. On March 14, 2000, DOE published a statement of policy

describing the intergovernmental consultation process it will follow in the development of such regulations (65 FR 13735). DOE has examined today's rule and has determined that it does not preempt State law and does not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. No further action is required by Executive Order 13132.

D. Review Under the National Environmental Policy Act

DOE has concluded that today's rule falls into a class of actions that would not individually or cumulatively have a significant impact on the human environment, as determined by DOE's regulations implementing the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*). Specifically, today's amendment to the Physician Panel procedures is covered under the Categorical Exclusion for rulemakings that are strictly procedural in paragraph A6 of appendix A to subpart D, 10 CFR part 1021. Accordingly, neither an environmental assessment nor an environmental impact statement is required.

E. Review Under the Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandates Reform Act of 1995 requires each agency to prepare a written assessment of the effects of any Federal mandate in a proposed or final rule that may result in the expenditure by State, local, and tribal governments and the private sector, of $100 million in any single year. DOE has determined that today's regulatory action does not impose a Federal mandate on State, local, or tribal governments or on the private sector.

F. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, directs agencies to prepare a regulatory flexibility analysis whenever an agency is required to publish a general notice of proposed rulemaking for a rule. DOE has determined that today's rule is procedural and is not subject to prior notice and opportunity for public comment. In accordance with 5 U.S.C. 604(a), no regulatory flexibility analysis has been prepared for today's rule.

G. Review Under Executive Order 12988

With respect to the review of existing regulations and the promulgation of new regulations, section 3(a) of Executive Order 12988, ''Civil Justice Reform'' (61 FR 4729, February 7, 1996), imposes on Federal agencies the general duty to adhere to the following requirements: (1) Eliminate drafting errors and ambiguity; (2) write regulations to minimize litigation; and (3) provide a clear legal standard for affected conduct rather than a general standard and promote simplification and burden reduction. Section 3(b) of Executive Order 12988 specifically requires that Executive agencies make every reasonable effort to ensure that the regulation: (1) Clearly specifies the preemptive effect, if any; (2) clearly specifies any effect on existing Federal law or regulation; (3) provides a clear legal standard for affected conduct while promoting simplification and burden reduction; (4) specifies the retroactive effect, if any; (5) adequately defines key terms; and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General. Section 3(c) of Executive Order 12988 requires Executive agencies to review regulations in light of applicable standards in section 3(a) and section 3(b) to determine whether they are met or it is unreasonable to meet one or more of them. DOE has completed the required review and determined that, to the extent permitted by law, this rule meets the relevant standards of Executive Order 12988.

H. Review Under the Treasury and General Government Appropriations Act, 1999

Section 654 of the Treasury and General Government Appropriations Act, 1999 (Pub. L. 105–277) requires Federal agencies to issue a Family Policymaking Assessment for any rule that may affect family well-being. This rule would not have any impact on the autonomy or integrity of the family as an institution. Accordingly, DOE has concluded that it is not necessary to prepare a Family Policymaking Assessment.

I. Review Under the Treasury and General Government Appropriations Act, 2001

The Treasury and General Government Appropriations Act, 2001 (44 U.S.C. 3516, note) provides for agencies to review most disseminations of information to the public under guidelines established by each agency pursuant to general guidelines issued by OMB. OMB's guidelines were published at 67 FR 8452 (February 22, 2002), and DOE's guidelines were published at 67 FR 62446 (October 7, 2002). DOE has reviewed today's notice under the OMB and DOE guidelines and has concluded that it is consistent with applicable policies in those guidelines.

J. Review Under Executive Order 13211

Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001), requires Federal agencies to prepare and submit to OIRA, a Statement of Energy Effects for any proposed significant energy action. A ''significant energy action'' is defined as any action by an agency that promulgated or is expected to lead to promulgation of a final rule, and that: (1) Is a significant regulatory action under Executive Order 12866, or any successor order; and (2) is likely to have a significant adverse effect on the supply, distribution, or use of energy, or (3) is designated by the Administrator of OIRA as a significant energy action. For any proposed significant energy action, the agency must give a detailed statement of any adverse effects on energy supply, distribution, or use should the proposal be implemented, and of reasonable alternatives to the action and their expected benefits on energy supply, distribution, and use. Today's regulatory action is not a significant energy action. Accordingly, DOE has not prepared a Statement of Energy Effects.

K. Congressional Notification

As required by 5 U.S.C. 801, DOE will submit to Congress a report regarding the issuance of today's rule. The report will state that it has been determined that the rule is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 10 CFR Part 852

Administrative practice and procedure, Government contracts, Hazardous substances, Workers' compensation.

Issued in Washington, DC, on March 17, 2004.

Robert G. Card,

Under Secretary for Energy, Science and Environment.

■ For the reasons set forth in the preamble, 10 CFR part 852 is amended as follows:

PART 852—GUIDELINES FOR PHYSICIAN PANEL DETERMINATIONS ON WORKER REQUESTS FOR ASSISTANCE IN FILING FOR STATE WORKER'S COMPENSATION BENEFITS

■ 1. The authority citation for part 852 continues to read as follows:

Authority: 42 U.S.C. 7384, *et seq.*; 42 U.S.C. 2201 and 7101, *et seq.*; 50 U.S.C. 2401 *et seq.*

■ 2. Section 852.2 is amended by revising the definition of the term ''Physician Panel'' to read as follows:

§ 852.2 What are the definitions of terms used in this part?

* * * * *

Physician panel means one or more physicians (as determined by the Program Office), who are appointed by the Secretary of Health and Human Services, pursuant to part D of the Act, to evaluate applications of DOE contractor employees, under the procedures and requirements of this part.

* * * * *

■ 3. Section 852.11 is amended by revising paragraph (b) as follows:

§ 852.11 How is a Physician Panel to carry out its deliberations and arrive at a determination?

* * * * *

(b) If a Physician Panel has more than one physician, all panel members meet in conference, in person, or by teleconference in order to discuss the application and arrive at a determination agreed to by a majority of the members of the Physician Panel.

* * * * *

■ 4. Section 852.13 is amended by revising paragraph (a) as follows:

§ 852.13 When must a Physician Panel issue its determination?

(a) A Physician Panel must submit its determination and findings to the Program Office within 20 working days of the time that panel member(s) have received the complete application for review from the Program Office.

* * * * *

■ 5. Section 852.16 is revised to read as follows:

§ 852.16 When may the Program Office ask a Physician Panel to reexamine an application that has undergone prior Physician Panel review?

(a) If a panel composed of a single physician issues a negative determination, the negative determination is considered an initial opinion and the Program Office must direct an additional single-physician panel to review the application and issue an independent opinion. If the second single-physician panel issues a negative determination, the Program Offices considers the opinions as a negative determination by the Physician Panel for purposes of § 852.17(a) of this part.

(b) If a second single-physician panel issues a positive opinion, the Program Office must direct an additional single-physician panel to review the application and issue an independent opinion. The Program Office reviews the three opinions and considers the majority of the three opinions as the determination by the Physician Panel for purposes of § 852.17(a) of this part.

(c) The Program Office may direct the original Physician Panel or a different Physician Panel to reexamine an application that has undergone prior Physician Panel review if:

(1) There is significant evidence contrary to the panel determination;

(2) The Program Office obtains new information the consideration of which would be reasonably likely to result in a different determination;

(3) The Program Office becomes aware of a real or potential conflict of interest of a member of the original panel in relation to the application under review; or

(4) Reexamination is necessary to ensure consistency among panels.

[FR Doc. 04–6555 Filed 3–23–04; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2003–CE–55–AD; Amendment 39–13531; AD 2004–06–05]

RIN 2120–AA64

Airworthiness Directives; Pilatus Aircraft Ltd. Models PC–12 and PC–12/45 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA adopts a new airworthiness directive (AD) for all Pilatus Aircraft Ltd. (Pilatus) Models PC–12 and PC–12/45 airplanes. This AD requires you to determine whether certain main landing gear shock absorber attachment bolts have been replaced and, if not replaced, would require you to replace shock absorber attachment bolts on main landing gear assemblies that have a serial number beginning with AM001 through AM053. This AD is the result of mandatory continuing airworthiness information (MCAI) issued by the airworthiness authority for Switzerland. We are issuing this AD to detect and correct hydrogen embrittlement in the main landing gear shock absorber attachment bolts, which could result in failure of the main landing gear. This failure could lead to main landing gear collapse during operation with consequent loss of airplane control.

DATES: This AD becomes effective on May 6, 2004.

As of May 6, 2004, the Director of the Federal Register approved the incorporation by reference of certain publications listed in the regulation.

ADDRESSES: You may get the service information identified in this AD from Pilatus Aircraft Ltd., Customer Liaison Manager, CH–6371 Stans, Switzerland; telephone: +41 41 619 63 19; facsimile: +41 41 619 6224; or from Pilatus Business Aircraft Ltd., Product Support Department, 11755 Airport Way, Broomfield, Colorado 80021; telephone: (303) 465–9099; facsimile: (303) 465–6040.

You may view the AD docket at FAA, Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 2003–CE–55–AD, 901 Locust, Room 506, Kansas City, Missouri 64106. Office hours are 8 a.m. to 4 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Doug Rudolph, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4059; facsimile: (816) 329–4090.

SUPPLEMENTARY INFORMATION:

Discussion

What events have caused this AD? The Federal Office for Civil Aviation (FOCA), which is the airworthiness authority for Switzerland, recently notified FAA that an unsafe condition may exist on Pilatus Models PC–12 and PC–12/45 airplanes. The FOCA reports that certain shock absorber attachment bolts (part number 532.10.12.110) in the main landing gear assemblies could fail during operation. Investigations revealed that an improper cadmium plating process applied to the high strength steel part causes the problem. This can cause hydrogen embrittlement.

The only bolts affected are those installed on main landing gear assemblies with a serial number that starts with AM.

What is the potential impact if FAA took no action? Failure of the main landing gear could lead to main landing gear collapse during operation with consequent loss of airplane control.

Has FAA taken any action to this point? We issued a proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an AD that would apply to all Pilatus Models PC–12 and PC–12/45 airplanes.

This proposal was published in the **Federal Register** as a notice of proposed rulemaking (NPRM) on January 9, 2004 (69 FR 1551). The NPRM proposed to require you to determine whether certain main landing gear shock absorber attachment bolts have been replaced and, if not replaced, would require you to replace shock absorber attachment bolts on main landing gear assemblies that have a serial number beginning with AM.

Comments

Was the public invited to comment? We provided the public the opportunity to participate in developing this AD. The following presents the comments received on the proposal and FAA's response to each comment:

Comment Issue No. 1: Limit the Effectivity of the AD

What is the commenter's concern? Two commenters want the effectivity of the AD limited to Pilatus Models PC–12 and PC–12/45 airplanes with serial numbers 101 through 482 (as listed in Pilatus SB PC12 Service Bulletin No: 32–015, dated September 12, 2003). The commenters state that the suspected bolts have been installed on a limited number of landing gears. Further, it is very unlikely that bolts have been swapped between airplanes. The proposed effectivity to all serial numbers will place an undue burden on owners and operators.

The commenters conclude that limiting the effectivity to airplanes with serial numbers 101 through 482 is enough to assure the airworthiness of Pilatus Models PC–12 and PC–12/45 airplanes.

What is FAA's response to the concern? We believe that the practice of swapping bolts is rare, however, it is still possible. To help alleviate this possibility, we are including the action of a logbook check in the AD.

We also believe that the swapping of the main landing gear assemblies is possible so limiting the airplane serial numbers is not enough to assure the airworthiness of Pilatus Models PC–12 and PC–12/45 airplanes.

We are not changing the final rule AD action as a result of theses comments.

Comment Issue No. 2: Limit Effectivity on the Shock-Absorber Attachment Bolts

What is the commenter's concern? Two commenters note that main landing gear assemblies with new bolts (part number (P/N) 532.10.12.110) marked ''AT'' or ''VLG'' are good bolts and do not require replacement.

The commenters request limiting the effectivity of the AD to those P/N 532.10.12.110 bolts *not marked* ''AT'' or ''VLG.''

What is FAA's response to the concern? We agree that the main landing gear assemblies with new bolts (part number (P/N) 532.10.12.110) marked ''AT'' or ''VLG'' are good bolts and do not require replacement.

We are changing the final rule AD action accordingly to reflect the commenters' request.

Comment Issue No. 3: AD Is Not Needed

What is the commenter's concern? One commenter suggests that the aviation industry has influence over FAA. Further, FAA neglects the public's concerns.

We infer that the commenters want us to withdraw the NPRM.

What is FAA's response to the concern? Through the NPRM process, FAA provides the public opportunity to comment on and influence the AD action.

Since the commenter gave no specific reasons to withdraw or change the proposed rule, we are not changing the final rule AD action as a result of these comments.

Comment Issue No. 4: Limit Effectivity on the Main Landing Gear Assemblies

What is the commenter's concern? One commenter requests that FAA limit the effectivity on the main landing gear assemblies to those assemblies with the serial numbers that start ''AM001'' through ''AM053'' since Pilatus has identified these were assembled with the defective bolts. The commenter notes that limiting the effectivity will lessen the impact on owners/operators.

What is FAA's response to the concern? The FAA agrees that the AD should limit the effectivity on the main landing gear assemblies.

We are changing the final rule AD action accordingly.

Conclusion

What is FAA's final determination on this issue? We have carefully reviewed the available data and determined that air safety and the public interest require adopting the AD as proposed except for the changes discussed above and minor editorial corrections. We have determined that these changes and minor corrections:

—Are consistent with the intent that was proposed in the NPRM for correcting the unsafe condition; and

—Do not add any additional burden upon the public than was already proposed in the NPRM.

Changes to 14 CFR Part 39—Effect on the AD

How does the revision to 14 CFR part 39 affect this AD? On July 10, 2002, the FAA published a new version of 14 CFR part 39 (67 FR 47997, July 22, 2002), which governs the FAA's AD system. This regulation now includes material that relates to altered products, special flight permits, and alternative methods of compliance. This material previously was included in each individual AD. Since this material is included in 14 CFR part 39, we will not include it in future AD actions.

Costs of Compliance

How many airplanes does this AD impact? We estimate that this AD affects 260 airplanes in the U.S. registry.

What is the cost impact of this AD on owners/operators of the affected airplanes? The manufacturer will provide parts free of charge and will pay for the estimated 3 workhours required to do the inspection and replacement of the shock absorber attachment bolts.

Compliance Time of This AD

What will be the compliance time of this AD? The compliance time of this AD is within the next 30 calendar days after the effective date of this AD.

Why is this compliance time presented in calendar time instead of hours time-in-service (TIS)? The unsafe condition exists or could develop on airplanes equipped with the affected parts regardless of airplane operation. For example, the unsafe condition has the same chance of occurring on an airplane with 50 hours TIS as it does on one with 5,000 hours TIS. Therefore, we are presenting the compliance time of this AD in calendar time instead of hours TIS.

Regulatory Findings

Will this AD impact various entities? We have determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

Will this AD involve a significant rule or regulatory action? For the reasons discussed above, I certify that this AD:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities

under the criteria of the Regulatory Flexibility Act.

We prepared a summary of the costs to comply with this AD and placed it in the AD Docket. You may get a copy of this summary by sending a request to us at the address listed under **ADDRESSES.** Include ''AD Docket No. 2003–CE–55–AD'' in your request.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. FAA amends § 39.13 by adding a new AD to read as follows:

2004–06–05 Pilatus Aircraft Ltd.: Amendment 39–13531; Docket No. 2003–CE–55–AD.

When Does This AD Become Effective?

(a) This AD becomes effective on May 6, 2004.

What Other ADs Are Affected by This Action?

(b) None.

What Airplanes Are Affected by This AD?

(c) This AD affects Models PC–12 and PC–12/45 airplanes, all serial numbers, that are certificated in any category.

What is the Unsafe Condition Presented in This AD?

(d) This AD is the result of mandatory continuing airworthiness information (MCAI) issued by the airworthiness authority for Switzerland. The actions specified in this AD are intended to detect and correct hydrogen embrittlement in the main landing gear shock absorber attachment bolts, which could result in failure of the main landing gear. This failure could lead to main landing gear collapse during operation with consequent loss of airplane control.

What Must I do To Address This Problem?

(e) To address this problem, you must do the following:

Actions	Compliance	Procedures
(1) Maintenance Records Check: ..... (i) Check the maintenance records to determine whether the main landing gear (MLG) shock absorber attachment bolts (part number (P/N) 532.10.12.110) have been replaced. The bolts must have been replaced by following Pilatus PC12 Service Bulletin No: 32–015, dated September 12, 2003. The owner/operator holding at least a private pilot certificate as authorized by section 43.7 of the Federal Aviation Regulations (14 CFR 43.7) may perform this check. (ii) If, by checking the maintenance records, the owner/operator can definitely show that the MLG gear shock absorber attachment bolts (P/N 532.10.12.110) have been replaced (by following Pilatus PC12 Service Bulletin No: 32–015, dated September 12, 2003), then report the removal of any bolts to FAA at the address in paragraph (f) of this AD. You must make an entry into the aircraft records that shows compliance with this portion of the AD in accordance with section 43.9 of the Federal Aviation Regulations (14 CFR 43.9).	Within the next 30 calendar days after May 6, 2004 (the effective date of this AD), unless already done.	No special procedures necessary to check the maintenance records.
(2) If you find as a result of the check in paragraph (e)(1) that there is no record of bolt replacement, inspect the left and right MLG assemblies (P/N 532.10.12.049 and P/N 532.10.12.050) for any serial number beginning with AM001 through AM053. You may choose to do the inspection without doing the logbook check.	Within the next 30 calendar days after May 6, 2004 (the effective date of this AD), unless already done.	Follow the Accomplishment Instructions of Pilatus PC12 Service Bulletin No: 32–015, dated September 12, 2003.
(3) If during the inspection required by paragraph (e)(2) of this AD, you find any MLG assembly with a serial number beginning with AM001 through AM053, replace any shock absorber bolts (P/N inspection 532.10.12.110) NOT MARKED with ''AT'' or ''VLG'' with new bolts.	Before further flight after the inspection required by paragraph (e)(2) of this AD.	Follow the Accomplishment Instructions of Pilatus PC12 Service Bulletin No: 32–015, dated September 12, 2003.

Actions	Compliance	Procedures
(4) After removal of the shock absorber bolts (P/N 532.10.12.110), send the old removed bolts to Pilatus. Report this to FAA at the address in paragraph (f) of this AD. The Office of Management and Budget (OMB) approved the information collection requirements contained in this regulation under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) and assigned OMB Control Number 2120–0056.	Within the next 30 calendar days after May 6, 2004 (the effective date of this AD), unless already done..	Not Applicable.
(5) Before installing any left or right MLG assembly (P/N 532.10.12.049 or P/N 532.10.12.050) that has a serial number beginning with AM, ensure that the shock absorber bolts (P/N 532.10.12.110) NOT MARKED with ''AT'' or ''VLG'' have been replaced, and, if not, replace with new bolts.	As of May 6, 2004 (the effective date of this AD).	Follow Pilatus PC12 Service Bulletin No: 32–015, dated September 12, 2003

May I Request an Alternative Method of Compliance?

(f) You may request a different method of compliance or a different compliance time for this AD by following the procedures in 14 CFR 39.19. Unless FAA authorizes otherwise, send your request to your principal inspector. The principal inspector may add comments and will send your request to the Manager, Standards Office, Small Airplane Directorate, FAA. For information on any already approved alternative methods of compliance, contact Doug Rudolph, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4059; facsimile: (816) 329–4090.

Does This AD Incorporate Any Material by Reference?

(g) You must do the actions required by this AD following the instructions in Pilatus PC12 Service Bulletin No: 32–015, dated September 12, 2003. The Director of the Federal Register approved the incorporation by reference of this service bulletin in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. You may get a copy from Pilatus Aircraft Ltd., Customer Liaison Manager, CH–6371 Stans, Switzerland; telephone: +41 41 619 63 19; facsimile: +41 41 619 6224; or from Pilatus Business Aircraft Ltd., Product Support Department, 11755 Airport Way, Broomfield, Colorado 80021; telephone: (303) 465–9099; facsimile: (303) 465–6040. You may review copies at FAA, Central Region, Office of the Regional Counsel, 901 Locust, Room 506, Kansas City, Missouri 64106; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

Is There Other Information That Relates to This Subject?

(h) Swiss AD Number HB 2003–522, dated November 14, 2003, also addresses the subject of this AD.

Issued in Kansas City, Missouri, on March 15, 2004.

James E. Jackson,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; Dornier Model 328–100 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Dornier Model 328–100 series airplanes, that requires replacement of the existing main landing gear (MLG) leg assembly with a modified assembly. This action is necessary to prevent fatigue damage of the MLG leg, which could result in collapse of the MLG. This action is intended to address the identified unsafe condition.

DATES: Effective April 28, 2004.

The incorporation by reference of a certain publication listed in the regulations is approved by the Director of the Federal Register as of April 28, 2004.

ADDRESSES: The service information referenced in this AD may be obtained from AvCraft Aerospace GmbH, P.O. Box 1103, D–82230 Wessling, Germany. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Tom Groves, Aerospace Engineer, International Branch, ANM–116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–1503; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to certain Dornier Model 328–100 series airplanes was published in the **Federal Register** on January 5, 2004 (69 FR 287). That action proposed to require replacement of the existing main landing gear (MLG) leg assembly with a modified assembly.

Comments

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were submitted in response to the proposal or the FAA's determination of the cost to the public.

Conclusion

After careful review of the available data, we have determined that air safety and the public interest require the adoption of the rule as proposed.

Cost Impact

We estimate that 53 airplanes of U.S. registry will be affected by this AD, that it will take approximately 8 work hours per airplane to accomplish the required

replacement, and that the average labor rate is $65 per work hour. Required parts will be provided by the manufacturer at no charge. Based on these figures, the cost impact of this AD on U.S. operators is estimated to be $27,560, or $520 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted. The cost impact figures discussed in AD rulemaking actions represent only the time necessary to perform the specific actions actually required by the AD. These figures typically do not include incidental costs, such as the time required to gain access and close up, planning time, or time necessitated by other administrative actions.

Regulatory Impact

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this action (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

■ Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. Section 39.13 is amended by adding the following new airworthiness directive:

2004–06–01 Fairchild Dornier Gmbh (Formerly Dornier Luftfahrt GmbH): Amendment 39–13527. Docket 2001–NM–400–AD.

Applicability: Model 328–100 series airplanes, certificated in any category, serial numbers (S/Ns) 3005 through 3119 inclusive, equipped with a main landing gear (MLG) leg assembly, main body, or main machined body having a part number (P/N) and S/N listed in Table 1 of this AD.

TABLE 1.—MLG LEG ASSEMBLY, MAIN BODY, AND MAIN MACHINED BODY P/NS AND S/NS

MLG part name	P/N	S/Ns
Leg assembly	22730–000–02	U16 through U22 inclusive.
Leg assembly	22731–000–02	U16 through U22 inclusive.
Main body	22415–000–01	U16 through U22 inclusive.
Main body	22416–000–01	U16 through U22 inclusive.
Main machined body	24284–000–00	U56, U62, U64, U66, U68, U70, U74.
Main machined body	22286–000–00	U51, U57, U59, U65, U67, U73, U85.

Compliance: Required as indicated, unless accomplished previously.

To prevent fatigue damage of the MLG leg, which could result in collapse of the MLG, accomplish the following:

Replacement of MLG Leg Assembly

(a) Prior to the accumulation of 16,000 total landings on the MLG body, or within 300 flight hours after the effective date of this AD, whichever occurs later, replace the existing MLG leg assembly with a modified leg assembly per Dornier Service Bulletin SB 328–32–344, Revision 1, dated June 11, 2001.

Note 1: Dornier Service Bulletin SB 328–32–344, Revision 1, refers to Messier-Dowty Service Bulletins 800–32–028, dated November 27, 2000; and 800–32–014, dated January 18, 1999; as appropriate sources of service information for modifying the MLG leg assembly.

Alternative Methods of Compliance

(b) In accordance with 14 CFR 39.19, the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, is authorized to approve alternative methods of compliance for this AD.

Incorporation by Reference

(c) The actions shall be done in accordance with Dornier Service Bulletin SB 328–32–344, Revision 1, dated June 11, 2001. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from AvCraft Aerospace GmbH, P.O. Box 1103, D–82230 Wessling, Germany. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

Note 2: The subject of this AD is addressed in German airworthiness directive 2002–001, dated January 10, 2002.

Effective Date

(d) This amendment becomes effective on April 28, 2004.

Issued in Renton, Washington, on March 5, 2004.

Ali Bahrami,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Chapter 1

Change of Name; Technical Amendment

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule; technical amendment.

SUMMARY: The Food and Drug Administration (FDA) is amending its regulations to reflect a change in the name of the Dockets Management

Branch to the Division of Dockets Management. This action is editorial in nature and is intended to improve the accuracy of the agency's regulations.

DATES: Effective March 30, 2004.

FOR FURTHER INFORMATION CONTACT: Joyce A. Strong, Office of Policy and Planning (HF–27), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–827–7010.

SUPPLEMENTARY INFORMATION: This document amends FDA's regulations to reflect the Dockets Management Branch address change by removing the entire outdated name wherever it appears and by adding the new name in its place in 21 CFR parts 3, 5, 7, 10, 12, 13, 14, 15, 17, 20, 25, 60, 100, 101, 109, 170, 184, 201, 312, 314, 316, 328, 330, 341, 355, 369, 500, 509, 520, 522, 558, 570, 601, 740, 808, 812, 814, 860, 861, 895, 900, 1010, 1030, 1240, and 1250.

Publication of this document constitutes final action on these changes under the Administrative Procedure Act (5 U.S.C. 553). Notice and public procedure are unnecessary because FDA is merely correcting nonsubstantive errors.

■ Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR chapter I is amended as follows:

Chapter I—[Amended]

■ 1. Parts 3, 5, 7, 10, 12, 13, 14, 15, 17, 25, 60, 100, 101, 109, 170, 184, 201, 312, 314, 316, 328, 330, 341, 355, 369, 500, 509, 520, 522, 558, 570, 601, 740, 808, 812, 814, 860, 861, 895, 900, 1010, 1030, 1240, and 1250 are amended by removing ''Dockets Management Branch'' wherever it appears and by adding in its place ''Division of Dockets Management''.

■ 2. Parts 20, 170, 570, and 860 are amended by removing ''Dockets Management Branch's'' wherever it appears and by adding in its place ''Division of Dockets Management's''.

Dated: March 17, 2004.

Jeffrey Shuren,

Assistant Commissioner for Policy.

Food and Drug Administration

21 CFR Part 201

[Docket No. 90N–0309]

Drug Labeling; Sodium Labeling for Over-the-Counter Drugs; Technical Amendment; Termination of Delay of Effective Date; Compliance Dates

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule; technical amendment; termination of delay of effective date; compliance dates.

SUMMARY: The Food and Drug Administration (FDA) is amending the regulation that established conditions under which the labeling of over-the-counter (OTC) drug products intended for oral ingestion must include the sodium content and a general warning that persons who are on a sodium restricted diet should not take the product unless directed by a doctor. This final rule makes a few minor labeling changes and broadens the conditions for using the descriptive term ''sodium free.'' This document also terminates the delay of the effective date of the provisions concerning sodium labeling (§ 201.64(a) through (h)) and establishes compliance dates for the final rule.

DATES: The effective date for § 201.64(a) through (h), added at 61 FR 17806, April 22, 1996, and delayed at 62 FR 19923, April 24, 1997, as amended by this final rule is April 23, 2004. The amendments in this final rule are effective April 23, 2004.

Compliance Dates: The compliance date for any single entity and combination products subject to drug marketing applications approved on or after April 23, 2004, is immediately upon approval of the application. The compliance date for all other OTC drug products, whether subject to drug marketing applications approved before April 23, 2004, subject to any OTC drug monograph, or not yet the subject of any OTC drug monograph, is September 24, 2005.

FOR FURTHER INFORMATION CONTACT: Robert L. Sherman, Center for Drug Evaluation and Research (HFD–560), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–827–2222.

SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of April 22, 1996 (61 FR 17798), FDA issued a final rule amending the general labeling provisions for OTC drug products (§ 201.64) to: (1) Require that the sodium content of all OTC drug products intended for oral ingestion be included in labeling when the product contains 5 milligrams (mg) or more sodium per a single dose; (2) require that all OTC drug products intended for oral ingestion containing more than 140 mg sodium in the labeled maximum daily dose bear a general warning that persons who are on a sodium-restricted diet should not take the product unless directed by a doctor; and (3) provide for the voluntary use of certain terms (''sodium free,'' ''very low sodium,'' and ''low sodium'') relating to an OTC drug product's sodium content per labeled maximum daily dose. The effective date of the final rule was April 22, 1997. In the final rule, FDA also sought comments whether the rule should be amended to include sodium content labeling for OTC rectal laxative, vaginal, dentifrice, mouthwash, and mouth rinse drug products.

Interested persons were invited to submit comments by July 22, 1996. In response to two requests for extension of time to file comments to the final rule, FDA published a document in the **Federal Register** of July 22, 1996 (61 FR 38046), extending the comment period until September 20, 1996.

In response to the final rule, FDA received comments from four manufacturers and two trade associations. Two of the comments requested that the effective date of the final rule be extended for at least an additional 6 months, to October 1997 or later. One comment mentioned the need for ongoing technical work, noting that manufacturers have undertaken formal product testing to ascertain precise sodium content before preparing new labels with accurate content declarations. The comment identified several problems with the sodium content of inactive ingredients. Specifications for some OTC drug ingredients do not include limits for sodium; suppliers often do not provide entire formulation information to companies; and sodium content may vary from lot to lot and/or supplier to supplier, especially for ingredients of natural origin. The comment stated that it would be difficult for some companies to complete product testing in time to have new labeling prepared by April 1997. The other comment stated that additional time would reduce label obsolescence, allow the use of already printed labeling, and allow labeling to be changed using current staff levels.

Both comments emphasized that FDA should delay implementation of the

sodium labeling final rule until the proposed rule on labeling for OTC drug products containing calcium, magnesium, and potassium (61 FR 17807, April 22, 1996) was finalized. The comments contended that coordinating the effective date of both rules, which could apply to any single product, would avoid two label changes and the related economic impact of phasing in label changes for two separate rulemakings. One comment added that no major public health consequence should be expected from this delay for the sodium labeling because OTC drug products with relatively high sodium contents, e.g., antacids and laxatives, already bear a restricted sodium-use warning.

FDA agreed with the comments' rationale that it was desirable to coordinate implementation of the sodium labeling with the calcium, magnesium, and potassium labeling. A single effective date for both final rules avoids two labeling changes and reduces the economic impact of phasing in labeling changes for two separate, but related, rulemakings. In addition, a delay would provide manufacturers additional time that should be sufficient to complete all product analyses. FDA notified all commentors of its intentions in a feedback letter (Ref. 1) and asked the Consumer Healthcare Products Association (formerly the Nonprescription Drug Manufacturers Association) to notify its members and suggest that they incorporate calcium, magnesium, and potassium analyses into current plans to do sodium analyses so that all analyses can be completed and new labeling implemented by the effective date. FDA also concurred with one comment that there should be no major public health consequences because of this delay.

In the **Federal Register** of April 24, 1997 (62 FR 19923), FDA delayed the effective date of § 201.64(a) through (h) until further notice. The current final rule terminates the delay of the effective date, establishes a new effective date of 30 days after the date of publication in the **Federal Register**, and sets dates for manufacturers to be in compliance with the final rule.

Elsewhere in this issue of the **Federal Register**, FDA is publishing a final rule containing the labeling requirements for orally ingested OTC drug products containing calcium, magnesium, and potassium. That final rule also becomes effective 30 days after the date of publication in the **Federal Register**, and has the same compliance dates as this final rule for sodium labeling.

II. FDA's Response to the Comments

A. Situations Where Rule Should Not Apply

1. Two comments disagreed with across-the-board sodium labeling for all orally ingested OTC drug products. The comments favored a category-by-category approach for considering warnings and cited the review of OTC antacid and laxative drug products as examples that had successfully established the need for sodium warnings for those products. One comment added that FDA should not require sodium-related warnings on additional categories of OTC drug products without sufficient evidence of a public health need. The comment contended that people who have been advised by a physician or decided on their own to monitor their sodium intake are able to use content declarations to make food selections in their targeted limit and would be able to similarly use the content declaration on OTC drug products. The comment argued that the warning to avoid the product if on a sodium-restricted diet, unless directed by a doctor, is not needed and would not help consumers make decisions. The comment acknowledged, however, that information about the sodium content in a dosage unit is useful for people who are monitoring sodium intake.

A third comment contended that a warning statement is not necessary or helpful and is not a good use of limited OTC drug label space. The comment stated that people on a restricted diet are typically instructed by a medical professional to be aware of certain habits and monitor their intake using information provided by the declared sodium level on a product. The comment added that the sodium content per dose declaration helps those people make choices in order to limit sodium intake and contended that the content labeling on a per dose basis alone is the most useful information for the consumer. The comment endorsed the proposed declaration of sodium content on OTC drug labels but opposed the warning statement. The comment concluded that the warning statement does not help people on a sodium-restricted diet make decisions, is unnecessary for the general population, tends to confuse consumers, and is inconsistent with FDA's position that warning statements be clinically significant and important for the safe and effective use of a product by consumers.

FDA appreciates the one comment's endorsement of the sodium content declaration part of the regulation, but disagrees with the comments' arguments that the warning statement is unnecessary and should not apply to all orally ingested OTC drug products.

FDA addressed this issue in comment 4 of the sodium labeling final rule (61 FR 17798 at 17799 to 17800). FDA stated that across-the-board labeling has been used during the OTC drug review, instead of category-by-category, when the situation warrants, such as the pregnancy-nursing warning for OTC drug products in § 201.63 (21 CFR 201.63). FDA indicated that there was sufficient evidence of a public health need for this warning because a certain level (140 mg) of sodium may present a potential safety problem, regardless of the source of the sodium, and an across-the-board approach was based on sodium being present in any OTC drug product. FDA also believes that the warning is necessary for the entire population. Currently, there is no reliable genetic marker to determine susceptibility to sodium-induced hypertension. Because salt sensitive persons cannot be identified, FDA believes that it is prudent to recommend caution concerning sodium intake for the general population. Therefore, FDA deemed a category-by-category or limited approach inappropriate.

FDA also pointed out that implementation of a warning on a category-by-category basis would result in a lack of uniformity in OTC drug product labeling until FDA's evaluation of each drug category was completed. FDA notes that one of the comments also stated that the sodium labeling final rule affects thousands of OTC drug products. FDA finds that another important reason why sodium labeling requirements should be implemented across-the-board and become effective at the same time.

FDA notes that a number of the comments submitted in response to the April 25, 1991 (56 FR 19222), proposal to require sodium labeling stated that this labeling would be especially helpful to those individuals who must restrict their sodium intake, especially the elderly. (See comment 1 at 61 FR 17798.) FDA strongly believes that the addition of sodium content (per dosage unit) information in OTC drug product labeling will assist consumers in selecting the desirable and appropriate product. However, FDA has determined that this information alone may not provide consumers complete and adequate guidance. FDA firmly believes that consumers on a sodium-restricted diet should be informed to check with their doctor not to use a particular product if it contains above a certain level of sodium in the labeled maximum

daily dose of the product. A warning of this type has been required on OTC antacid drug products for almost 30 years, and there is no evidence that it has confused consumers. FDA concludes that this warning statement will help consumers make better-informed decisions and will result in safer use of OTC drug products containing sodium by those consumers who must or wish to monitor their sodium intake.

2. One comment noted that liquid and chewable products, many of which are intended for use in children because of difficulty or reluctance to swallow a whole tablet, are likely to have a higher sodium content. The sodium comes from inactive ingredients such as flavors and sweeteners (e.g., sodium saccharin) used to make the products more palatable. The comment stated that it would be unfortunate if a child was not given a product because of the sodium content labeling. The comment added that the advantages of using the more suitable dosage forms of children's products outweighed any risk from ingestion of small amounts of sodium. The comment contended that children are not likely to require such a restriction and that the sodium declaration on children's products is unnecessary information that is likely to confuse consumers because the information is meant for people who are not likely to use the product. The comment asked FDA to reconsider the necessity for sodium labeling on OTC drug products directed for intermittent use in children.

FDA has reconsidered the sodium labeling requirements for liquid and chewable products, including those directed for use in children, and determined that the labeling serves several useful functions. First, some children need to limit sodium intake for medical reasons. Second, and more important, a number of adults, especially the elderly, prefer liquid and chewable dosage forms because of swallowing problems or reluctance to swallow a whole tablet or capsule. Sodium labeling information is especially important for elderly people who may have to limit their sodium intake for medical reasons.

FDA concludes that sodium labeling information on liquid and chewable tablet products will be useful to consumers who need or desire this information and will not be confusing to those consumers who have no need for the information. FDA believes the same reasoning applies to inactive ingredient information. This information is not of interest to every consumer, but is important for those consumers who need or want it. According to a 1988 Diet and Health Survey (Ref. 2), sodium remains the most commonly mentioned component that consumers try to avoid in their diet. Moreover, another survey (Ref. 3) reported that 88 percent of shoppers felt label information on sodium was either very or somewhat important. FDA has not received any reports that this information is confusing to consumers who have no interest in it.

3. Five comments responded to FDA's request about expanding the sodium content labeling to OTC rectal laxative, vaginal, dentifrice, mouthwash, and mouth rinse drug products. All felt strongly that such labeling would be inappropriate and unnecessary for these products. The comments pointed out that dentifrices, mouthwashes, and mouth rinses are intended to be spit out and not swallowed. The comments mentioned that if a consumer swallowed a small amount of the product the amount of sodium ingested would be minuscule. Two comments added that the amount of sodium absorbed from the oral mucosa during approximately 30 seconds to 1 minute of use would be insignificant. The comments contended that quantification of any amount of potentially absorbed sodium from dentifrices, mouthwashes, and mouth rinses would be difficult and meaningless because these products are used and spit out in varying quantities. The comments concluded that sodium content labeling would not provide consumers who use these products any useful information. Two comments added that FDA had reached the same conclusion when it changed the scope of the sodium labeling regulation from ''orally administered OTC drug products'' to ''OTC drug products intended for oral ingestion.''

Two comments stated that products intended for vaginal or rectal administration should not be labeled for sodium content. The comments contended that consumers would likely be confused by this labeling, which is viewed as nutritional content labeling, and would not know how to use the information. The comments added that such labeling might cause consumers to mistakenly assume such products are meant for ingestion and thus orally use suppositories or liquid meant for vaginal or rectal use.

FDA generally concurs with the comments and, at this time, is not requiring sodium labeling for OTC vaginal, dentifrice, mouthwash, or mouth rinse drug products. Because of reports of problems associated with rectal enemas containing sodium phosphate/sodium biphosphate (where the product has not produced a bowel movement and has been retained in the body), FDA is proposing sodium content labeling for these products. These products contain a high sodium content and may represent a problem to people who need to limit sodium intake. Elsewhere in this issue of the **Federal Register**, FDA is proposing to amend § 201.64 to include sodium content labeling for OTC rectal drug products containing sodium phosphate/sodium biphosphate.

B. Dose That Triggers Sodium Content Declaration

4. One comment requested that § 201.64(a) be amended to state the specific recommended dose, which presumably is the maximum recommended dose, that triggers the requirement to declare the sodium content on the product label. The comment contended that some of the preamble to the final rule appears to be inconsistent with § 201.64(a), which states that the criterion for a required declaration of sodium content is 5 mg or more sodium in a ''single recommended dose of the product (which may be one or more dosage units).'' The comment felt that the statement that ''The agency * * * decided to use 5 mg of sodium per maximum recommended dose as the basis for including sodium content in the labeling of OTC drug products'' (61 FR 17798 at 17800) was inconsistent with § 201.64(a).

FDA addressed this issue in comment 8 of the preamble to the final rule (61 FR 17798 at 17800). We acknowledge that the discussion might have been confusing in some regards. FDA stated that a 5 mg maximum labeled dose is consistent with the antacid monograph, which has been in effect since 1974. FDA noted that the requirement for OTC antacid drug products in § 331.30(f) (21 CFR 331.30(f)), which was removed in the sodium labeling final rule, provides that the labeling include sodium content per dosage unit if it contains 5 mg or more. Because the sodium content declaration can vary from product to product if based on the maximum daily dose of the product, FDA deemed it important to have a fixed number at which the sodium content per dosage unit would have to be declared. FDA determined that the amount per single recommended dose was the most useful information to consumers.

The criterion in § 201.64(a) determines whether there is a need for a sodium content declaration. The intent of the final rule was to require content declaration based on the amount of sodium present in the maximum number of dosage units

recommended for a single dose. Thus, if one tablet contains 4 mg of sodium and the recommended dosage range is ''one or two'' tablets, sodium content labeling (in mg per dosage unit) would be required because two tablets exceed the 5 mg threshold. Because a single recommended dose may include one or more dosage units, FDA believes the term ''single maximum recommended dose'' is a better term than ''single recommended dose'' to state the basis for requiring sodium content labeling. Accordingly, FDA is amending § 201.64(a).

C. Placement of the Sodium Content Declaration

5. One comment requested that FDA allow flexibility in the placement of the sodium content declaration so that it would not have to be on a separate line, as required by § 201.64 (b). The comment requested that the information be allowed to be part of a paragraph listing of ingredients that would include other cations, e.g., calcium, magnesium, and potassium, per the FDA proposed rule for orally ingested OTC drug products containing those ingredients (61 FR 17807, April 22, 1996). The comment stated that such a paragraph listing could include as many content declarations as required and appear as follows: ''Each tablet contains: sodium (_____mg), calcium (_____mg), magnesium (_____mg), potassium (_____mg).'' The comment contended that such flexibility was especially important for small packages where economy of space is important and placement of sodium content on a separate line would be difficult.

The comment also requested as another alternative that other means, such as color, boldface, underlining, etc., be allowed to give prominence to a new type of information within the listing of ingredients so that the sodium content declaration is readily visible within the paragraph listing of inactive ingredients. In addition, the comment requested clarification whether the sodium declaration is supposed to follow the required listing of active ingredients or the voluntary listing of inactive ingredients.

Since the sodium labeling final rule was published on April 22, 1996, FDA has addressed this issue in a final rule on a general labeling format for all OTC drug products (64 FR 13254, March 17, 1999). That final rule established a specific order and format in which information must appear in OTC drug product labeling. Section 201.66(c)(7)(i) (21 CFR 201.66(c)(7)(i)) states that required information about certain ingredients in OTC drug products (e.g., sodium in § 201.64(b)) shall appear as follows: ''each (insert appropriate dosage unit) contains:'' [in bold type] (insert name(s) of ingredient(s) and the quantity of each ingredient). This information shall be the first statement under the heading ''Other information.'' Concurrently, FDA revised the last sentence in § 201.64(b) to state: ''The sodium content per dosage unit shall follow the heading ''Other information'' as stated in § 201.66(c)(7).'' (See 64 FR 13254 at 13286.) Elsewhere in this issue of the **Federal Register**, FDA is revising § 201.66(c)(7)(i) to include calcium, magnesium, and potassium and their CFR citations as other examples covered by that section.

D. Rounding-off to the Nearest 5 Mg

6. Three comments disagreed with the sodium content having to be rounded-off to the nearest whole number. The comments argued that this requirement was inconsistent with the food labeling regulations, which allow rounding to the nearest 5-mg level rather than to the nearest whole number (1-mg level). One comment contended that allowing for the 5-mg increment in sodium labeling for OTC drug products would reduce the cost of label changes for lot-to-lot variations in sodium content and would protect consumers from industry label conversion costs associated with minor reformulations that result in minor sodium content changes. The comment stated that FDA had presented no basis for requiring drug products to contain more accurate sodium content labeling than food products. Another comment mentioned the potential variability in the sodium content of ingredients of natural origin, as occurs with food products. The comment was concerned that the additive effect of sodium as an unassayed component in multiple raw materials could result in an OTC drug product containing greater than 5 mg sodium per dosage unit and thus result in inaccurate labeling. For this reason, the comment contended that manufacturers should be permitted to round the sodium content declaration to the nearest 5-mg level, as permitted in food product labeling.

FDA discussed this issue in response to a comment's concern in comment 3 of the preamble of the final rule for sodium labeling (61 FR 17798 at 17799). The author of the comment was concerned that descriptive terms based on sodium content using rounded-off numbers could be different from descriptive terms based on sodium content using actual numbers.

FDA discussed how rounding-off could result in potential discrepancies between the actual and apparent sodium content in OTC drug products, and may lead to consumer confusion. For instance, if the actual sodium content of a product is 8 mg per dosage unit and the product is to be taken four times daily, the labeled maximum daily dose is 32 mg. Because the sodium content is less than 35 mg (per labeled maximum daily dose), the term ''very low sodium'' could be used. However, if the actual dosage unit (8 mg) is rounded-off to 10 mg, the apparent labeled maximum daily dose for that product would be 40 mg and the descriptive term would be ''low sodium''. FDA did note that regulations for labeling food provide for the rounding-off to the nearest 5 to 10 mg sodium per serving. We explained that a larger rounding-off range is more appropriate in the context of food because most food products contain naturally occurring sodium and variation in sodium content is expected. On the other hand, most OTC drug products are manufactured and the amount of sodium in products can be strictly controlled. Thus, the sodium content of OTC drug products is expected to be less variable than that of foods and can be more accurately described on the label. Based on this discussion, FDA concluded that the 5-mg rounding rule for foods should not be used in the OTC drug content even if it results in different criteria for food and drug products.

FDA has considered the current comments' concerns, but is not persuaded to change its position. Based on the example discussed herein, minor reformulation of a drug product may result in a change in descriptive category when using the 5-mg rounding rule for foods, but no change if the foods rule is not applied. For example, if the sodium content of a drug product that is taken four times a day increases from 7 mg [5 mg under the 5-mg rounding rule] to 8 mg [10 mg under the same rule] per dosage unit, that increase would change the descriptive category from ''very low sodium'' (20 mg per labeled maximum daily dose) to ''low sodium'' (40 mg per labeled maximum daily dose). However, when the 5-mg rounding rule is not applied, the descriptive category (''very low sodium'') is the same before and after reformulation (28 and 32 mg, respectively).

Further, FDA notes that the amount of sodium (140 mg) present in a product to require the warning in § 201.64 (c) is much lower than the amount of calcium (3.2 g), magnesium (600 mg), or potassium (975 mg) that trigger a similar warning for these cations. Therefore, rounding-off to the nearest 1 mg provides consumers more accurate

information about sodium content in OTC drug products.

FDA believes that because the sodium content in drug products is less variable than for foods, and can be determined more accurately, consumers should have the more accurate information. Thus, providing consumers attempting to monitor their sodium intake with more accurate information, to use in their ingredient calculations, should increase consumer safety. FDA continues to believe that rounding-off to the nearest whole number will result in less consumer confusion and add to consumer safety, and that any associated industry label conversion costs associated with minor reformulations that may result in minor sodium content changes will be minimal. The comment provided no information to indicate what these conversion costs might be or that they would have any impact on consumers. Analysis of product lots for variations in sodium content is discussed in section II.G, comment 11 of this document.

E. Sodium Versus Sodium Chloride Content

7. One comment disagreed with FDA's conclusion that sodium content labeling should reflect sodium content without regard to the anion (e.g., chloride) with which the sodium is associated in the drug product formulation. The comment referred to its previous comments on this issue, which FDA addressed in comment 16 of the preamble of the final rule for sodium labeling (61 FR 17798 at 17803 to 17804). Referring to that response, the comment noted that FDA had stated that hypertension was not the sole reason for adoption of sodium labeling requirements and that the only other example that FDA mentioned was that sodium bicarbonate had been reported to exacerbate congestive heart failure. The comment added that it had reviewed the rulemakings for other sodium labeling proceedings and they showed that hypertension has been, if not the only, certainly the principal rationale supporting sodium content labeling and warning requirements. The comment indicated that the scientific literature did not support the very low levels of sodium present in OTC drug products as being of significant concern in the management of congestive heart failure. The comment concluded that the final rule should have required salt (sodium chloride) content labeling and not just sodium content labeling.

FDA can appreciate the comment's views, but does not agree with them. FDA recognized in comment 16 of the preamble of the final rule for sodium labeling that there were differences of opinion on the relationship of sodium and hypertension. FDA provided an extensive discussion on this issue there and sees no reason to repeat it here. FDA also pointed out that sodium labeling is not aimed specifically at persons with hypertension, but is intended to benefit all people who need or wish to monitor their sodium intake for whatever reason. Accordingly, FDA is not changing the sodium labeling requirement from ''sodium'' content to ''sodium chloride (salt)'' content.

F. Descriptive Terms

8. Two comments contended that the descriptive terms ''sodium free,'' ''very low sodium,'' and ''low sodium'' should be based on the amount of sodium in a single dose rather than on the total content in the labeled maximum daily dose. The comments noted that these descriptive terms for food labeling are based on the content in one serving. One comment added that labeling OTC drug products on the basis of dosage unit is more consistent with the food labeling system, in which content labeling and voluntary descriptive terms are based on a ''serving.'' The other comment added that consumers often use only one dose of an OTC drug product and, because of the inconsistency with the food labeling regulations, it is more relevant and consistent to describe the sodium content of OTC drug products on a per dose basis.

FDA disagrees with the comments. Many OTC drugs that contain sodium have daily dosing that involves more than one dose. Basing the descriptive terms on a single dose would potentially be misleading to consumers because it is the maximum daily dose of the product that determines the consumer's daily sodium intake from the OTC drug product.

9. Two comments requested that FDA change the requirement for use of the term ''sodium free.'' One comment stated that, as a practical matter, it would seem reasonable to allow a product containing less than 0.5 mg of sodium per dosage unit to be called ''sodium free,'' even though the amount was not zero, if the labeled maximum daily dose contains less than 5 mg of sodium. The comment stated that the addition of this amount of sodium to a consumer's sodium load is comparably negligible from a clinical standpoint. The comment noted FDA's statement in the preamble to the sodium labeling final rule (61 FR 17798 at 17800) that ''the agency considers a sodium level below 5 mg per dose to be physiologically insignificant.''

The other comment pointed out that it marketed a product with a sodium content between 0.1 to 0.2 mg per tablet and less than 5 mg in the maximum labeled daily dose. The comment complained that the final rule would prevent this product from being labeled as ''sodium free,'' when it has been labeled as ''sodium free'' for over 10 years. The comment contended that the final rule allowing ''sodium free'' to be used only when the maximum daily dose contains less than 0.5 mg sodium is more stringent than necessary for consumer protection and avoiding consumer confusion. The comment stated that the final rule as written would effectively eliminate the use of the term ''sodium free'' from OTC drug product labeling. The comment suggested that § 201.64(d) be revised to read: The term ''sodium free'' may be used in the labeling of OTC drug products intended for oral ingestion if the amount of sodium in the labeled maximum daily dose is less than 5 milligrams and the amount of sodium per dosage unit is 0 milligram (when rounded-off as per paragraph (b) of this section).

The comment noted that its proposed revision, like the final rule, eliminates the possibility that products labeled ''sodium free'' will at the same time be labeled with a sodium content greater than ''0 mg,'' which would be a potential basis for consumer confusion. The comment concluded that consumers would be better served by the suggested revision of the final rule, and that the minor change also accomplishes FDA's objectives.

FDA agrees with the comments. Accordingly, in this technical amendment, FDA is revising § 201.64(d) to read: ''The term ''sodium free'' may be used * * * if the amount of sodium in the labeled maximum daily dose is 5 milligrams or less and the amount of sodium per dosage unit is 0 milligram (when rounded-off in accord with paragraph (b) of this section).''

G. Economic Impact

10. One comment stated that the economic impact of the final rule is substantially greater than presumed by FDA, based on information that companies provided. The comment stated that the sodium labeling requirement could potentially add costs for manufacturers, and therefore for consumers, when labels must be changed even if a minor reformulation results in a relatively minor change in the amount of sodium in a finished OTC drug product. The comment added that companies were still assessing the actual economic impact related to

product analysis for sodium, calcium, magnesium, and potassium, and would submit additional information when it becomes available.

Another comment stated that it was uncertain of the full impact of the final rule. It estimated that the rule has the potential to impact an estimated 1,500 stockkeeping units (SKUs), which could result in a $1 million impact for art and obsolescence costs alone.

FDA notes that, unfortunately, industry did not provide any comments on the agency's economic impact determination that appeared in the proposed rule for sodium labeling (56 FR 19222 at 19225). At that time (April 25, 1991), FDA estimated the relabeling cost for manufacturers who marketed products containing sodium to be less than $500,000 for the entire industry. That estimate was based on the number of products that would be affected by the final rule, the number of distinct label changes, and the cost of printing new labels. The estimate did not include any projections for product analyses because that issue had not been raised in the rulemaking. FDA did state in the final rule for sodium labeling (61 FR 17798 at 17799) that most OTC drug products are manufactured and the amount of sodium in products can be strictly controlled. The industry has indicated that it would provide additional information on the cost of product analyses when available, but has not done so to date. The current final rule provides for coordination of the sodium labeling requirements with the implementation of the rule requiring calcium, magnesium, and potassium labeling, published elsewhere in this issue of the **Federal Register**. This coordination should reduce the economic impact for products containing sodium and one or more of the other cations.

11. One comment asked whether FDA expected cation analysis for every manufactured lot of OTC drug products and, if yes, whether the labeling had to bear the exact amount of assayed cation. The comment stated that if this were required to be done, this would mean that labeling needed to be printed for each lot, which would have a significant economic implication. The comment asked whether a company can base cation content on average values (taken from historical lots) and known lot-to-lot variations, and what amount of variation would be acceptable without a need for a change in the sodium content declaration.

FDA's position is that manufacturers must use the same standards for labeling of sodium (or other cations) as used to assure accurate content labeling of active ingredients in OTC drug products. Manufacturers are expected to follow good manufacturing practices (21 CFR part 211) and general guidance provided by the United States Pharmacopeia/National Formulary in determining a product's cation content.

FDA recognizes that there is some acceptable variation between different product lots that bear the same labeling. The amount of an ingredient declared in the labeling is a composite value derived from a number of product samples. Some content determinations for some lots may be based, in part, on average values (taken from historical lots) and on known lot-to-lot variations. However, manufacturers should be able to ascertain when it is necessary to do new analyses, e.g., when a raw material is purchased from a new supplier or the raw material contains a sodium declaration that differs from previous lots. Many compendial monographs provide that a product contains not less than 90 percent and not more than 110 percent of the labeled amount of an active ingredient. FDA considers this ±10 percent criterion as acceptable for cation content labeling. FDA does not see a need for cation content information from individual batch analysis to appear in product labeling. However, when batch analyses reflect greater than ±10 percent in cation content, relabeling should occur. Therefore, there should not be a significant economic implication for manufacturers.

III. Summary of Significant Changes

1. This final rule terminates the delay of the effective date of paragraphs (a) through (h) of § 201.64 and establishes compliance dates for sodium labeling of OTC drug products. (See the **DATES** section and section I of this document.)

2. FDA is revising § 201.66(a) to more clearly state the basis for requiring sodium content labeling. (See section II.B, comment 4 of this document.)

3. The sodium content per dosage unit follows the heading ''Other information'' as stated in § 201.66(c)(7). (See section II.C, comment 5 of this document.)

4. FDA is revising § 201.64(c) to state the sodium-restricted diet warning in the new OTC drug product labeling format.

5. FDA is revising § 201.64(d) to expand the conditions for use of the term ''sodium free'' for products containing 5 mg or less of sodium in the labeled maximum daily dose. This technical amendment allows for the use of the term ''sodium free'' when the amount of sodium per dosage unit is 0 mg (when rounded-off in accord with § 201.64(b)) and the labeled maximum daily dose contains 5 mg or less sodium. (See section II.F, comment 9 of this document.)

IV. FDA's Final Conclusions on Sodium Labeling

A. New Labeling Requirements

FDA concludes that public interest and public health consequences related to sodium intake have produced a need for more informative and consistent sodium content and warning information in the labeling of OTC drug products. This is especially true for individuals with hypertension, heart failure, or other conditions who must monitor their sodium intake.

FDA is implementing the following content and warning requirements for OTC drug products intended for oral ingestion: Content—if the product contains 5 mg sodium or more per single maximum recommended dose; warning—if the product contains more than 140 mg sodium in the labeled maximum daily dose. The content labeling shall be rounded-off to the nearest whole number and shall appear after the heading ''Other information.'' The sodium labeling requirements apply to OTC drug products intended for oral ingestion, whether marketed under an OTC drug monograph, the ongoing OTC drug review, an approved application, or no application. This final rule terminates the delay of the effective date of paragraphs (a) through (h) of § 201.64 and establishes compliance dates for sodium labeling of OTC drug products.

B. Statement About Warnings

Mandating warnings in an OTC drug product regulation does not require a finding that any or all of the OTC drug products covered by the regulation actually caused an adverse event, and FDA does not so find. Nor does FDA's requirement of warnings repudiate the prior OTC drug monographs and regulations under which the affected drug products have been lawfully marketed. Rather, as a consumer protection agency, FDA has determined that warnings are necessary to ensure that these OTC drug products continue to be safe and effective for their labeled indications under ordinary conditions of use as those terms are defined in the Federal Food, Drug, and Cosmetic Act (the act). This judgment balances the benefits of these drug products against their potential risks (see 21 CFR 330.10(a)).

FDA's decision to act in this instance need not meet the standard of proof required to prevail in a private tort action (*Glastetter* v. *Novartis*

Pharmaceuticals Corp., 252 F.3d 986, 991 (8th Cir. 2001)). To mandate warnings, or take similar regulatory action, FDA need not show, nor do we allege, actual causation. For an expanded discussion of case law supporting FDA's authority to require such warnings, see the final rule entitled ''Labeling of Diphenhydramine-Containing Drug Products for Over-the-Counter Human Use'' (67 FR 72555, December 6, 2002).

C. Statutory Authority

In this final rule, FDA is addressing legal issues relating to the agency's action to require sodium content labeling for OTC drug products. FDA is relying on section 502(e) of the act (21 U.S.C. 352(e)) to require disclosure in the labeling of OTC drug products of: (1) The presence and quantity of sodium that is an active ingredient, and (2) the presence of sodium that is an inactive ingredient. To require disclosure of the quantity of sodium that is an inactive ingredient, FDA is relying on sections 502(a) and 201(n) of the act (21 U.S.C. 321(n)).

Section 502(e) of the act deems a drug to be misbranded unless its label bears the established name and quantity of each active ingredient or, if determined to be appropriate by the Secretary of Health and Human Services (the Secretary), the proportion of each active ingredient (21 U.S.C. 352(e)(1)(A)(ii)). That provision also deems a drug to be misbranded unless its label bears the established name of each inactive ingredient on the outside container, and if determined appropriate by the Secretary, on the immediate container (21 U.S.C. 352(e)(1)(A)(iii)). Under section 502(a) of the act, a drug is deemed to be misbranded if its labeling is ''false or misleading in any particular.'' Section 201(n) of the act amplifies what is meant by ''misleading'' in section 502(a). Section 201(n) states that, in determining whether labeling is misleading, FDA shall take into account not only representations made about the product, but also the extent to which the labeling fails to reveal facts material in the light of such representations or material with respect to consequences which may result from the use of the article to which the labeling relates under the conditions of use prescribed in the labeling, or under such conditions of use as are customary or usual (see § 1.21 (21 CFR 1.21)). Finally, FDA has authority under section 701(a) of the act (21 U.S.C. 371(a)) to issue regulations for the efficient enforcement of the act.

As discussed in sections I, II, and IV of this document and in the final rule (61 FR 17798), FDA has determined that for OTC drug products containing more than the specified amount of sodium, the quantity of this substance as an inactive ingredient in OTC drug products is material with respect to consequences that may result from use of such products within the meaning of section 201(n) of the act. Certain levels of sodium present a potential safety problem. People with hypertension, heart failure, or other conditions need to monitor their intake of sodium, which can cause serious toxicity in persons with these conditions. Many people are on sodium-restricted diets. Other people must monitor their intake of sodium from foods (including dietary supplements) and OTC drugs for other medical or health reasons. Absent mandatory sodium content labeling, these people would not be able to understand the relative contribution that OTC drug products make to their intake of sodium, and would not be able to compare the sodium content of various OTC drug products.

D. The First Amendment

This final rule passes muster under the first amendment. FDA's requirement of sodium content labeling for OTC drug products (where sodium is an inactive ingredient and is present beyond the specified threshold level) is constitutionally permissible because it is reasonably related to the government's interest in preventing deception of consumers and because it is not an ''unjustified or unduly burdensome'' disclosure requirement that offends the first amendment. (See *Zauderer* v. *Office of Disciplinary Counsel*, 471 U.S. 626, 651 (1985); see also *Ibanez* v. *Florida Dep't of Bus. and Prof'l Regulation*, 512 U.S. 136, 146 (1994)). Such a reasonable relationship is plain here. The prescribed labeling disclosure would contribute directly to the consumption of quantities of sodium that do not threaten the health of people for whom sodium use has material consequences. Some people, newly informed by the required labeling, will properly reduce or discontinue their intake of sodium-containing OTC drug products and thereby protect and promote their own health. By encouraging such changes in behavior, the labeling requirement is rationally related to the government's goal of ensuring appropriate sodium consumption. Finally, it is not ''unduly burdensome'' to require an additional disclosure of this kind.

In any event, this final rule passes muster when analyzed under the four-part test in *Central Hudson Gas and Electric Corporation* v. *Public Service Commission*, 447 U.S. 557 (1980), because it is necessary for the labeling of OTC drug products containing sodium in excess of the threshold amount to be nonmisleading (id. at 563–564). As discussed in this document, FDA has determined that the failure to disclose in an OTC drug product's labeling the amount of sodium in the product when it is present in amounts exceeding a certain threshold misbrands the product because the failure causes the labeling to be false or misleading under sections 502(a) and 201(n) of the act.

Although this determination obviates the need for FDA to address the other three parts of the Central Hudson test, we believe that the sodium content labeling requirement satisfies each of these parts. With respect to the second part, FDA's interest in requiring sodium content labeling under this final rule is to ensure that people who must monitor their sodium intake for health reasons have information necessary to understand the relative contribution that OTC drug products make to their sodium intake and to compare the sodium content of OTC drug products. FDA's interest in protecting the public health has been previously upheld as a substantial government interest under *Central Hudson*. (See *Pearson* v. *Shalala*, 164 F.3d 650, 656 (D.C. Cir. 1999) (citing *Rubin* v. *Coors Brewing Co.*, 514 U.S. 476, 484–485 (1995)). The labeling requirement directly advances this interest, thereby satisfying the third part of the Central Hudson test, because by requiring labeling disclosure of the presence and quantity of sodium in OTC drug products, the rule gives people the precise information they need to determine whether a particular product is consistent with their health requirements.

Finally, under the fourth part of the Central Hudson test, there are not numerous and obvious (*Cincinnati* v. *Discovery Network*, 507 U.S. 410, 418 n. 13 (1993)) alternatives to mandatory sodium content labeling of OTC drug products that directly advance the government's interest but are less burdensome to speech. Consumers are accustomed to using the label as their primary source of information about a product's contents. Neither a public education campaign, nor encouraging OTC drug product marketers to provide information on sodium content in the labeling of their products, would ensure that people have the information they need about sodium content at the point of sale or ingestion. And establishing limits on sodium content would be more harmful to the public health. It is unnecessary for consumers who are not

at risk to reduce or closely monitor their added daily sodium intake from OTC drug products. Further, some consumers may wish to use OTC drug products to enrich the amount of sodium in their diets. Finally, for many products, the sodium content is linked to product design and determined by pharmaceutical necessity. Requiring disclosure here meets the fourth part of the test.

In conclusion, FDA believes it has complied with its burdens under the first amendment to support mandatory disclosure of the amount of sodium above a specified level in OTC drug product labeling.

V. Analysis of Impacts

FDA discussed the impacts of this sodium labeling requirement in the final rule for sodium labeling (61 FR 17798 at 17805 to 17806) and noted that no comments were received in response to the agency's request for specific comment on the economic impact of this rulemaking. Since that time, FDA has received two comments. (See section II.G, comments 10 and 11 of this document.)

FDA has examined the impacts of this final rule under Executive Order 12866 and the Regulatory Flexibility Act (5 U.S.C. 601–612), and the Unfunded Mandates Reform Act of 1995 (Public Law 104–4). Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). Under the Regulatory Flexibility Act, if a rule has a significant economic impact on a substantial number of small entities, an agency must analyze regulatory options that would minimize any significant impact of the rule on small entities. Section 202(a) of the Unfunded Mandates Reform Act of 1995 requires that agencies prepare a written statement of anticipated costs and benefits before proposing any rule that may result in an expenditure in any one year by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million (adjusted annually for inflation).

FDA concludes that this final rule is consistent with the principles set out in Executive Order 12866 and in these two statutes. As discussed in this section, the final rule will not be economically significant as defined by the Executive order. With respect to the Regulatory Flexibility Act, FDA does not believe the rule would have a significant economic impact on a substantial number of small entities. The Unfunded Mandates Reform Act of 1995 does not require FDA to prepare a statement of costs and benefits for the final rule, because the final rule in not expected to result in any 1-year expenditure that would exceed $100 million adjusted for inflation. The current inflation adjusted statutory threshold is about $110 million.

The purpose of this final rule is to provide two minor labeling revisions, terminate the delay in the effective date, and set compliance dates for the final rule. The labeling revisions will not have any further economic impact. The termination of the delay in the effective date and the establishment of compliance dates will not have any additional economic impact above that stated in the preamble to the final rule (61 FR 17798). Accordingly, FDA has not reconsidered its earlier certification that the final rule will not have a significant economic impact on a substantial number of small entities. For the reasons stated in this section and under the Regulatory Flexibility Act (5 U.S.C. 605(b)), FDA certifies that this rule will not have a significant economic impact on a substantial number of small entities.

VI. Paperwork Reduction Act of 1995

FDA concludes that the labeling requirements in this document are not subject to review by the Office of Management and Budget because they do not constitute a ''collection of information'' under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). Rather, the labeling is a ''public disclosure of information originally supplied by the Federal government to the recipient for the purpose of disclosure to the public'' (5 CFR 1320.3(c)(2)).

VII. Environmental Impact

FDA has determined under 21 CFR 25.31(a) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

VIII. Federalism

FDA has analyzed this final rule in accordance with the principles set forth in Executive Order 13132. FDA has determined that the rule does not contain policies that have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Accordingly, the agency has concluded that the rule does not contain policies that have federalism implications as defined in the Executive order and, consequently, a federalism summary impact statement is not required.

List of Subjects in 21 CFR Part 201

Drugs, Labeling, Reporting and recordkeeping requirements.

■ Therefore, under the Federal Food, Drug, and Cosmetic Act, and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 201 is amended as follows:

PART 201—LABELING

■ 1. The authority citation for 21 CFR part 201 continues to read as follows:

Authority: 21 U.S.C. 321, 331, 351, 352, 353, 355, 358, 360, 360b, 360gg–360ss, 371, 374, 379e; 42 U.S.C. 216, 241, 262, 264.

■ 2. Section 201.64 is amended by revising paragraphs (a), (c), and (d) and by adding paragraph (j) to read as follows:

§ 201.64 Sodium labeling.

(a) The labeling of over-the-counter (OTC) drug products intended for oral ingestion shall contain the sodium content per dosage unit (e.g., tablet, teaspoonful) if the sodium content of a single maximum recommended dose of the product (which may be one or more dosage units) is 5 milligrams or more. OTC drug products intended for oral ingestion include gum and lozenge dosage forms, but do not include

dentifrices, mouthwashes, or mouth rinses.

* * * * *

(c) The labeling of OTC drug products intended for oral ingestion shall contain the following statement under the heading ''Warning'' (or ''Warnings'' if it appears with additional warning statements) if the amount of sodium present in the labeled maximum daily dose of the product is more than 140 milligrams: ''Ask a doctor before use if you have [in bold type] [bullet][1] a sodium-restricted diet''. The warnings in §§ 201.64(c), 201.70(c), 201.71(c), and 201.72(c) may be combined, if applicable, provided the ingredients are listed in alphabetical order, e g., a calcium or sodium restricted diet.

(d) The term *sodium free* may be used in the labeling of OTC drug products intended for oral ingestion if the amount of sodium in the labeled maximum daily dose is 5 milligrams or less and the amount of sodium per dosage unit is 0 milligram (when rounded-off in accord with paragraph (b) of this section).

* * * * *

(j) Any product subject to paragraphs (a) through (h) of this section that is not labeled as required and that is initially introduced or initially delivered for introduction into interstate commerce after the following dates is misbranded under sections 201(n) and 502(a) and (f) of the Federal Food, Drug, and Cosmetic Act.

(1) As of the date of approval of the application for any single entity and combination products subject to drug marketing applications approved on or after April 23, 2004.

(2) Septemeber 24, 2005, for all OTC drug products subject to any OTC drug monograph, not yet the subject of any OTC drug monograph, or subject to drug marketing applications approved before April 23, 2004.

Dated: March 15, 2004.

Jeffrey Shuren,

Assistant Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 201 and 331

[Docket No. 1995N–0254]

Drug Labeling; Orally Ingested Over-the-Counter Drug Products Containing Calcium, Magnesium, and Potassium

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the general labeling provisions for over-the-counter (OTC) drug products to require that the labeling of all OTC drug products intended for oral ingestion include: The calcium content per dosage unit when the product contains 20 milligrams (mg) or more per single dose; a warning statement that persons with kidney stones and persons on a calcium-restricted diet should ask a doctor before using when the product contains more than 3.2 grams (g) of calcium in the labeled maximum daily dose; the magnesium content per dosage unit when the product contains 8 mg or more per single dose; a warning statement that persons with kidney disease and persons on a magnesium-restricted diet should ask a doctor before using if the product contains more than 600 mg magnesium in the labeled maximum daily dose; the potassium content per dosage unit when the product contains 5 mg or more per single dose; and a warning statement that persons with kidney disease and persons on a potassium restricted diet should ask a doctor before using if the product contains more than 975 mg potassium in the labeled maximum daily dose. FDA is issuing this final rule in order to provide uniform calcium, magnesium, and potassium content and warning labeling for all OTC drug products intended for oral ingestion whether marketed under an OTC drug monograph, the ongoing OTC drug review, a new drug application (NDA) or abbreviated new drug application (ANDA), or no application.

DATES: *Effective Date*: This final rule is effective April 23, 2004.

Compliance Dates: The compliance date for any single entity and combination products subject to drug marketing applications approved on or after April 23, 2004, is immediately upon approval of the application. The compliance date for all other OTC drug products, whether subject to drug marketing applications approved before April 23, 2004, subject to any OTC drug monograph, or not yet the subject of any OTC drug monograph, is September 24, 2005.

FOR FURTHER INFORMATION CONTACT: Robert L. Sherman, Center for Drug Evaluation and Research (HFD–560), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–827–2222.

SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of April 22, 1996 (61 FR 17807), FDA proposed to amend the general labeling provisions for OTC drug products to require that the labeling of all OTC drug products intended for oral ingestion include: (1) Content labeling for the cations calcium, magnesium, and potassium when a dosage unit of the product contains certain levels of the ingredient(s); and (2) warning statement(s) when the labeled maximum daily dose of the product contains a certain level of the ingredient(s). FDA proposed this labeling because of public interest in, and health consequences related to, calcium, magnesium, and potassium intake. These labeling requirements are needed to alert people with renal failure, kidney stones, or other conditions, and to assist people who wish to monitor their intake of calcium, magnesium, and potassium. Ingestion of large amounts of calcium can result in renal stones, and both potassium and magnesium can cause serious toxicity in people with impaired renal function (see 61 FR 17807 for a more complete discussion). Many consumers need to know their intake of these cations from foods, dietary supplements, and drugs. Therefore, FDA is issuing a final rule for calcium, magnesium, and potassium content and warning labeling for all OTC drug products intended for oral ingestion that contain certain levels of these ingredients (including both active and inactive ingredients). This final rule establishes calcium, magnesium, and potassium content labeling of OTC drug products similar to that used in food labeling.

Interested persons were invited to submit comments by July 22, 1996. In response to two requests for extension of time to file comments to the proposed rule, FDA published a notice in the **Federal Register** of July 22, 1996 (61 FR 38047), extending the comment period until September 20, 1996. Four manufacturers and one trade association submitted comments.

II. FDA's Response to the Comments

A. Effective Date of the Final Rule

(Comment 1) One comment stated that it is currently performing the testing required to implement the sodium labeling final rule (61 FR 17798, April 22, 1996), and that it plans to perform the required calcium, magnesium, and potassium testing after publication of that final rule. The comment requested that FDA provide 1 year for implementation. Another comment requested at least 18 months for implementation for economic reasons (see also section II.G, comment 8 of this document), and that FDA coordinate the date with any label changes required for products containing sodium.

FDA agrees that the effective date of this final rule and the effective date of the sodium labeling final rule should provide for implementation at the same time. Elsewhere in this issue of the **Federal Register**, FDA has provided the same compliance dates for the sodium labeling requirements. The same dates for both final rules allow a single labeling revision, thereby reducing the economic impact of phasing in labeling changes for two separate but related rulemakings. In addition, FDA is providing 18 months for implementation.

B. Situations Where Rule Should Not Apply

(Comment 2) Two comments disagreed with across-the-board calcium, magnesium, and potassium labeling for all orally ingested OTC drug products. The comments favored a category-by-category approach for cation labeling as was done for OTC antacid and laxative drugs. One comment added that the across-the-board approach ignores the OTC drug review's well-established category-by-category mechanism for considering warnings related to levels of magnesium, potassium, and sodium in OTC antacid and laxative drug products. The comment contended that FDA gave no documented evidence for the need for the proposed warnings, that requiring warnings without adequate support results in the dilution of all warnings, and asked whether FDA conducted any label comprehension studies to support the proposed labeling.

Another comment endorsed the proposed declaration of cation content on OTC drug labels for the benefit of people who monitor intake for medical reasons, but opposed a warning statement. The comment stated that cation content per dose is much more useful than a warning to inform consumers. The comment concluded that a warning statement does not help people on a calcium, magnesium, or potassium-restricted diet make decisions, is unnecessary for the general population, tends to confuse consumers, and is inconsistent with FDA's position that warning statements be clinically significant and important for the safe and effective use of a product by consumers.

Another comment stated that the proposed rule would be helpful to people who have a condition that requires close monitoring of various cation intakes, but for only a small group, mainly end-stage renal failure patients. The comment said cation information might detract from other important labeling information and recommended that cation information be provided directly to individual patients by pharmaceutical companies rather than in product labeling.

FDA disagrees with the comments' arguments that the warning statements are unnecessary, do not need to appear in product labeling, and should not apply to all orally ingested OTC drug products. FDA addressed the issue of across-the-board labeling in comment 4 of the sodium labeling final rule (61 FR 17798 at 17799 to 17800). FDA stated that across-the-board content and warning labeling is important, useful information for OTC drug products intended for oral ingestion containing calcium, magnesium, and potassium, as well as sodium.

In the proposed rule, FDA stated that it believes that the public interest in, and the public health consequences of, calcium, magnesium, and potassium intake have produced a need for more informative and consistent labeling information for these ingredients in OTC drug products (61 FR 17807 at 17809). FDA added that it believes that certain labeling requirements are needed to alert people with renal failure, kidney stones, or other conditions; and to alert people taking medications who wish to monitor their intake of calcium, magnesium, and potassium (61 FR 17807 at 17809). Certain levels of calcium, magnesium, and potassium present a potential safety problem, regardless of the source, and this rule affects thousands of OTC drug products. Implementation of warnings on a category-by-category basis would result in lack of uniformity in OTC drug product labeling until FDA's evaluation of each drug category is completed. Therefore, FDA finds an across-the-board labeling approach more appropriate than the category-by-category approach.

In the March 17, 1999, final rule for labeling requirements for OTC drug products (64 FR 13254 at 13263) (the March 17, 1999, final rule), in discussing present and future requirements for information to be included in the labeling of OTC drug products containing these ingredients, FDA stated: ''This information is significant for individuals who monitor their intake of certain nutrients, including persons with hypertension and renal insufficiency, and for persons who want to increase their intake of certain nutrients (e.g., calcium). The agency is requiring this important information to be the first statement under 'Other information' to draw attention to it.'' FDA considers it misleading for consumers looking for this information not to have it uniformly in place and provided at the same time for all OTC drug products that contain certain levels of these ingredients.

FDA has required a magnesium and potassium warning on OTC antacid drug products for almost 30 years, and there is no evidence that these warnings have confused consumers. FDA has no reports of any consumer label comprehension concerns and does not believe that label comprehension studies are necessary to support this type of labeling change. FDA concludes that the cation warning statements will help consumers who have kidney disease, get kidney stones, or wish to monitor their calcium, magnesium, or potassium intake, make better-informed decisions, resulting in safer use of OTC drug products containing these cations.

In discussing calcium, the Advisory Review Panel on OTC Antacid Drug Products (Antacid Panel) stated that hypercalcuria in response to calcium ingestion is not rare in the population and the danger of renal stone formation has to be considered in determining the intake of calcium antacids (see 61 FR 17807). The Advisory Review Panel on OTC Miscellaneous Internal Drug Products stated that adverse reactions associated with calcium carbonate, including hypercalcemia, alkalosis, acid rebound, milk-alkali syndrome, and constipation, usually occur with ingestion of larger than recommended doses and/or with chronic ingestion (see 61 FR 17807). In discussing magnesium, the Antacid Panel stated that hypermagnesemia toxicity may occur in renal dysfunction (see 61 FR 17807). In discussing potassium, the Antacid Panel concluded that potassium can accumulate in the body of people with impaired renal function and exert toxic effects (see 61 FR 17807 at 17808). FDA believes there is a large consumer population who will use this

information, and that it is not practical for these individuals to have to obtain it directly from a manufacturer when it can be readily provided in the product's labeling.

(Comment 3) Three comments opposed cation content labeling for OTC drug products that are not intended for oral ingestion. The comments considered the labeling unnecessary, and said consumers may view such labeling as indicating that the product is for oral ingestion. Two comments contended that there is no reason to require cation content declarations on products such as dentifrices, mouthwashes, and mouth rinses, because the amount of cation absorbed or incidentally ingested is negligible. The comments stated that consumers would be confused by cation labeling on OTC vaginal or rectal drug products and could assume such products are meant for ingestion because this information is viewed as nutritional content labeling.

At this time, FDA is not aware of any safety issues related to the calcium, magnesium, or potassium content of OTC dentifrice, mouthwash, mouth rinse, rectal, or vaginal drug products and is not requiring cation labeling for these products.

C. Dose That Triggers Labeling Requirements

(Comment 4) One comment stated that the language regarding the criteria for requiring a cation declaration may cause confusion, and FDA should clearly state in the rule the specific recommended dose that triggers the requirement for a cation content declaration. The comment contended that the word ''single'' in ''single recommended dose'' was the problem. The comment argued that for products whose active ingredient has an established dosage range, a ''single recommended dose'' could be interpreted to be the ''minimum recommended dose,'' which would be given on the product label, whereas FDA more likely intends it to mean the ''maximum recommended dose.'' The comment concluded that if FDA intends the criteria to be the quantity of a specific cation in the ''maximum recommended dose,'' then the word ''maximum'' should be used in place of the word ''single.''

The proposed regulations in §§ 201.70(a), 201.71(a), and 201.72(a) (21 CFR 201.70(a), 201.71(a), and 201.72(a)) state the amount of cation per single recommended dose (calcium 20 mg, magnesium 8 mg, and potassium 5 mg, respectively) that triggers the content labeling requirements. The intent of the proposal was to require content declaration based on the amount of cation present in the maximum number of dosage units recommended for a single dose. Thus, if one tablet of a product contains 15 mg of calcium and the dosage range is ''one or two tablets,'' calcium content labeling (in mg per dosage unit) would be required because two tablets exceed the 20 mg threshold. FDA agrees that the term ''single recommended dose'' could be confusing because a single recommended dose may consist of more than one dosage unit. However, the term ''maximum recommended dose'' could be confused to mean ''maximum recommended daily dose.'' Therefore, FDA is revising the language in §§ 201.70(a), 201.71(a), and 201.72(a) to state the amount of cation in a ''single maximum recommended dose'' that triggers the content labeling requirements.

D. Percentage Criterion for Cation Labeling

(Comment 5) One comment noted that not all OTC drug ingredient specifications contain limits for cation content, and that some ingredients of natural origin are subject to the same variability in cation content as food products. Therefore, the additive effect of these cations as an unassayed component in multiple raw materials could result in a product containing more than the threshold limit of a given cation, resulting in inaccurate labeling of an OTC drug product. Another comment stated that establishing a criteria of ± 10 percent for cation labeling would meet the needs of many products but might be problematic for some products (e.g., antacids and laxatives). Another comment mentioned that according to the compendial monograph for magnesium stearate, the magnesium content can vary by ± 10 percent. Thus, lot-to-lot variation can occur for products manufactured in accord with compendial materials and good manufacturing practices. The comment recommended that the labeling provide an expected maximum level of the cation(s). The comment also asked whether it is necessary to test or report the amounts for cations not expected to be present in the final product as they are not contained in the product formula. The comment added that routine testing for cations in a product would be costly and recommended periodic testing to confirm the expected amount of cation(s) calculated from the product formula.

FDA recognizes that some ingredients of natural origin have variable cation content and that there is some acceptable variation between different product lots that bear the same labeling. The amount declared in the labeling is a composite value derived from a number of product samples. Some content determinations for some lots may be based, in part, on average values (taken from historical lots) and on known lot-to-lot variation. However, manufacturers should be able to ascertain when it is necessary to do new analyses, e.g., when a raw material is purchased from a new supplier or the raw material contains a cation declaration that differs from previous lots. Manufacturers should also be able to ascertain when it may be necessary to analyze the raw material or the finished product for a cation(s) not expected to be present in the ingredient or product. Many compendial monographs provide that a product contains no less than 90 percent and no more than 110 percent of the labeled amount of an active ingredient. FDA considers this criterion acceptable for cation content labeling. Manufacturers need to follow good manufacturing practices (21 CFR part 211) and general guidance provided by the United States Pharmacopeia/National Formulary in determining a product's cation content.

E. Drug Labeling Versus Food Labeling

(Comment 6) Three comments stated that cation content labeling on OTC drug products should be consistent with food labeling regulations. One comment endorsed the proposal to declare cation content on OTC drug labels if consistent with food labeling practices. However, the comments pointed out that the proposed drug regulations were different from the food labeling regulations in several ways. First, the ''rounding'' rules are different. Two of the comments requested that manufacturers be permitted to round cation content labeling to the nearest 5 mg level, more consistent with food labeling, rather than to the nearest whole number. Second, FDA regulations (§ 101.9 (21 CFR 101.9)) do not require magnesium or potassium content labeling on food products that do not make claims about these cations. Third, FDA regulations (§ 101.9) require that the percent of daily value for calcium be labeled to the nearest 2-percent increment up to and including the 10-percent level, the nearest 5-percent increment above 10 percent and up to and including the 50-percent level, and the nearest 10-percent increment above the 50-percent level. One comment added that using these criteria for drug products would help reduce the cost of label changes for lot-to-lot variations in calcium content.

The comments contended that magnesium and potassium content labeling should be optional unless magnesium or potassium claims are made. One comment added that it seems inconsistent to require magnesium and potassium declarations for OTC drug products when foods can contain as much as 451 mg potassium in a medium banana or 97 mg magnesium in 1 cup of boiled baby lima beans and not list these amounts on their labels. One comment concluded that FDA should not require a cation content declaration on an OTC drug product that would not be required on a food when the same amount of the cation was present in a serving of the food and a dose of the drug product.

FDA is aware that the cation content of foods and OTC drug products is different. Cations present in food are naturally occurring and information about the amount present appears in numerous publications. Most OTC drug products do not make claims about the cation present because the cation is often part of an inactive ingredient, e.g., magnesium hydroxide, potassium bicarbonate. Many consumers who must or wish to monitor specific cation intake would not know that many OTC drug products contain these cations, or the amount present, unless the labeling contains the information. While health professionals may generally advise consumers about the cation content of many foods (e.g., bananas contain large amounts of potassium), these health professionals would not be able to advise consumers of the cation content of OTC drug products unless the product labeling contains this information. Thus, FDA has determined it is important for OTC drug products to declare their calcium, magnesium, and potassium content. As one comment to this rulemaking noted, the proposed rule would affect thousands of OTC drug products. Accordingly, FDA concludes that OTC drug products containing magnesium or potassium must declare their content if it equals or exceeds the amounts listed in §§ 201.71 and 201.72, and that such labeling should not be optional.

Section 101.9(c)(8) provides that the labeling of food products shall contain a statement of the amount per serving of the vitamins and minerals described in this paragraph as a percent of the reference daily intake (RDI) and expressed as a percent of the daily value. The percent of the daily value is required for calcium in all cases and for magnesium when it is added or when a claim is made about it. Section 101.9(c)(8)(iii) provides for stating the percentages for vitamins and minerals as one comment previously noted, and § 101.9(c)(8)(iv) establishes RDIs for calcium (1,000 mg) and magnesium (400 mg). FDA does not find this labeling scheme practical to use for OTC drug products containing calcium or magnesium because consumers do not routinely relate drug products to RDIs for vitamins and minerals and, in general, the space available on OTC drug labels is more limited than on food labels. Thus, FDA is including the necessary information (in mg units only) on OTC drug labels, using a minimum amount of space.

Section 101.9(c)(5) provides that potassium content shall be expressed as zero when the serving contains less than 5 mg of potassium, to the nearest 5-mg increment when the serving contains less than or equal to 140 mg of potassium, and to the nearest 10-mg increment when the serving contains more than 140 mg. FDA notes that the proposed regulations in §§ 201.70(b), 201.71(b), and 201.72(b) already provide that the amount of calcium, magnesium, and potassium can be rounded-off to the nearest tenth of a g if over 1 g. This flexibility in rounding-off the higher levels of cation content in the labeling of OTC drug products is similar to the broader flexibility provided in § 101.9(c) of the food labeling regulations when products contain larger amounts of these cations.

FDA is willing to allow rounding of the calcium, magnesium, and potassium content declaration to the nearest 5 mg for two reasons. First, the amounts of calcium (3.2 g), magnesium (600 mg), and potassium (975 mg) that trigger the requirement for a warning are much greater than the amount of sodium (140 mg) that triggers the requirement for a warning in § 201.64(c) (21 CFR 201.64(c)). Second, the calcium, magnesium, and potassium regulations do not contain a provision for descriptive terms, such as ''____ free,'' ''very low ____,'' ''low ____,'' as in the sodium regulation. In comment 3 of the preamble of the sodium labeling final rule (61 FR 17798 at 17799), FDA provided an example of how this rounding rule could work to a manufacturer's disadvantage and, thus, this concern was sufficient reason not to use the 5-mg rounding rule for sodium labeling. Because this concern does not apply to calcium, magnesium, or potassium labeling, FDA sees no reason to not allow the 5-mg rounding rule for the labeling of OTC drug products containing these three cations. FDA concludes that the ability to round the calcium, magnesium, and potassium content declaration to the nearest 5 mg along with a ± 10 percent declaration range should help reduce the burden on industry in establishing the proper content declaration due to the variability of the cation content of some raw ingredients used in manufacturing OTC drug products.

In conclusion, FDA has revised this aspect of the cation labeling requirements for OTC drug products to parallel the food labeling requirements.

F. Placement of the Cation Content Declarations

(Comment 7) Two comments requested clarification on how the cation content declarations should appear in product labeling when the product contains more than one cation. The comments pointed out that each proposed content declaration regulation stated that the (name of cation) content shall be listed on a separate line after the heading ''(name of cation) Content'' as the last statement in the ingredients section. The comments requested guidance as to the order these declarations should follow when more than one is required to appear. One comment requested that the information be allowed to be part of a paragraph listing of ingredients that would include other cations and appear as follows: ''Each tablet contains: sodium (____ mg), calcium (____ mg), magnesium (____ mg), potassium (____ mg).'' The comment contended that flexibility was important for small packages when economy of space is critically important and it would be difficult to place each cation content on a separate line.

As another alternative, the comment also requested that other means, such as color, boldface, underlining, etc., be allowed to give prominence to a new type of information within the listing of ingredients so that the cation content declarations are readily visible within the paragraph listing of inactive ingredients. Another comment requested that this information be allowed to be included in the inactive ingredient list if the labeling contains such information.

Because the calcium, magnesium, and potassium labeling proposed rule was published on April 22, 1996, FDA addressed this issue in the March 17, 1999, final rule. The March 17, 1999, final rule establishes a specific order and format in which information must appear in OTC drug product labeling. New § 201.66(c)(7)(i) states that required information about certain ingredients in OTC drug products (e.g., sodium in § 201.64(b)) shall appear as follows: ''each (insert appropriate dosage unit) contains:'' [in bold type] (insert name(s) of ingredient(s) and the quantity of each ingredient). This information shall be

the first statement under the heading ''Other information.''

When § 201.66(c)(7)(i) was finalized, calcium, magnesium, and potassium were not referenced because the regulations for these cations were not completed at that time. Now that those regulations are being finalized, FDA is amending § 201.66(c)(7)(i) to cross-reference these three cations in addition to sodium. FDA has also determined that there is a need for uniformity in when more than one cation content declaration needs to appear in the labeling. Therefore, FDA is further revising § 201.66(c)(7)(i) to state that when more than one cation declaration is required, the declarations shall appear in alphabetical order. Revised § 201.66(c)(7)(i) now reads as follows:

Required information about certain ingredients in OTC drug products (e.g, sodium in § 201.64(b), calcium in § 201.70(b), magnesium in § 201.71(b), and potassium in § 201.72(b)) shall appear as follows: ''each (insert appropriate dosage unit) contains:'' [in bold type] (insert name(s) of ingredient(s) (in alphabetical order) and the quantity of each ingredient). This information shall be the first statement under this heading.

G. Economic Impact

(Comment 8) One comment stated that the OTC drug industry was not currently able to provide an estimate of the total economic impact of the proposed rule on industry because individual companies do not yet know how to estimate their full costs. The comment added that the industry's expenditure of labor and other resources to comply with the sodium labeling final rule has made it difficult to gather data on the precise contents of other cations in finished drug products. The comment noted that there would be additional relabeling and other technical costs and asked FDA to be open to receiving additional data on the economic impact of the proposed cation labeling requirements when those costs were calculated.

Another comment identified the following several cost factors: (1) The testing of multiple lots of finished products to determine a ''mean'' for each specific cation was resource intense, (2) a large number of products requiring analysis would be a sizable resource investment, and (3) the relabeling costs included both the printing of new labels and the loss of some label inventory that would no longer be in compliance. A third comment stated that costs included label obsolescence and analytical, marketing, and regulatory review costs. The comment mentioned that it would incur label conversion costs of $2.7 million due to the far-reaching scope of the proposed rule. The comment concluded that coordinating the calcium, magnesium, and potassium labeling changes with the sodium labeling changes and allowing an 18-month implementation date would permit it to handle the labeling changes at current staff levels, to use preprinted labeling, and to reduce the cost of compliance significantly.

A fourth comment stated that validation of classical cation measurements and methods would be time consuming and expensive for OTC drug products. The comment mentioned that it did not currently test any of its products for these measurements, and testing would involve incremental costs and resources to validate these methods for its products.

To date, the industry has not provided any additional comments on the economic impact of this rule. This final rule provides for coordination of the calcium, magnesium, and potassium, labeling requirements with the sodium labeling requirements and with an 18-month implementation period to reduce the economic impact of this rule. FDA previously encouraged industry to concomitantly plan product analyses for all of the cations at the same time to reduce costs and obtain the needed information at the earliest possible time (Ref. 1).

III. Summary of Significant Changes

1. The calcium, magnesium, and potassium content per dosage unit follows the ''Other information'' heading and appears in alphabetical order as stated in revised § 201.66(c)(7). (See section II.F, comment 7 of this document.)

2. FDA is allowing the calcium, magnesium, and potassium content declaration to be rounded-off to the nearest 5 mg instead of the nearest whole number in milligrams. (See section II.E, comment 6 of this document.)

3. FDA is revising the language in §§ 201.70(a), 201.71(a), and 201.72(a) to state the amount of cation in a ''single maximum recommended dose'' that triggers the content labeling requirements. (See section II.C, comment 4 of this document.)

4. FDA is changing the format of the warning statements to follow the new OTC drug labeling requirements in § 201.66(c)(5)(iv). The warning statements appear in the following format in this final rule: ''Ask a doctor before use if you have [in bold type] [bullet][1] kidney disease [or stones in one case] [bullet] a (insert name of cation)-restricted diet''. If more than one cation is present in the product, the names of the cations can be inserted in the blank space in alphabetical order, e.g., a magnesium or potassium-restricted diet.

IV. FDA's Final Conclusions on Calcium, Magnesium, and Potassium Labeling

A. New Labeling Requirements

FDA concludes that public interest and public health consequences related to calcium, magnesium, and potassium intake have produced a need for more informative and consistent cation content and warning information in the labeling of OTC drug products. This is especially true for individuals with kidney disease or kidney stones, or who need or want to monitor their intake of any or all of these cations.

FDA is implementing the following content and warning requirements for OTC drug products intended for oral ingestion: Content—if the product contains 20 mg calcium, 8 mg magnesium, or 5 mg potassium or more per single maximum recommended dose; warning—if the product contains more than 3.2 g calcium, 600 mg magnesium, or 975 mg potassium in the labeled maximum daily dose. The content labeling may be rounded-off to the nearest 5 mg (if less than 1 g) or nearest tenth of a g (if over 1 g) and shall appear after the heading ''Other information.'' The new calcium, magnesium, and potassium labeling requirements apply to OTC drug products intended for oral ingestion, whether marketed under an OTC drug monograph, the ongoing OTC drug review, an approved application, or no application. The existing requirements relating to magnesium and potassium labeling in § 331.30(c)(4) and (c)(5) (21 CFR 331.30(c)(4) and (c)(5)) of the final monograph for OTC antacid drug products are being deleted because they are superseded by the new requirements of this final rule. Any proposed calcium, magnesium, or potassium labeling requirements in other ongoing OTC drug rulemakings will be deleted when final monographs for those drug classes are issued in a future issue of the **Federal Register**.

B. Statement About Warnings

Mandating warnings in an OTC drug product regulation does not require a finding that any or all of the OTC drug products covered by the regulation actually caused an adverse event, and FDA does not so find. Nor does FDA's requirement of warnings repudiate the

[1] See § 201.66(b)(4) of this chapter for definition of bullet symbol.

prior OTC drug monographs and regulations under which the affected drug products have been lawfully marketed. Rather, as a consumer protection agency, FDA has determined that warnings are necessary to ensure that these OTC drug products continue to be safe and effective for their labeled indications under ordinary conditions of use as those terms are defined in the Federal Food, Drug, and Cosmetic Act (the act). This judgment balances the benefits of these drug products against their potential risks (see 21 CFR 330.10(a)).

FDA's decision to act in this instance need not meet the standard of proof required to prevail in a private tort action (*Glastetter* v. *Novartis Pharmaceuticals Corp.*, 252 F.3d 986, 991 (8th Cir. 2001)). To mandate warnings, or take similar regulatory action, FDA need not show, nor do we allege, actual causation. For an expanded discussion of case law supporting FDA's authority to require such warnings, see Labeling of Diphenhydramine-Containing Drug Products for Over-the-Counter Human Use final rule (67 FR 72555, December 6, 2002).

C. Statutory Authority

In this final rule, FDA is addressing legal issues relating to the agency's action to require cation content labeling for OTC drug products. FDA is relying on section 502(e) of the act (21 U.S.C. 352(e)) to require disclosure in the labeling of OTC drug products of: (1) The presence and quantity of cations that are active ingredients and (2) the presence of cations that are inactive ingredients. To require disclosure of the quantity of cations that are inactive ingredients, FDA is relying on sections 502(a) and 201(n) of the act (21 U.S.C. 352(a) and 321(n)).

Section 502(e) of the act deems a drug to be misbranded unless its label bears the established name and quantity of each active ingredient or, if determined to be appropriate by the Secretary, the proportion of each active ingredient (21 U.S.C. 352(e)(1)(A)(ii)). That provision also deems a drug to be misbranded unless its label bears the established name of each inactive ingredient on the outside container, and if determined appropriate by the Secretary, on the immediate container (21 U.S.C. 352(e)(1)(A)(iii)). Under section 502(a) of the act, a drug is deemed to be misbranded if its labeling is ''false or misleading in any particular.'' Section 201(n) of the act amplifies what is meant by ''misleading'' in section 502(a) of the act. Section 201(n) of the act states that, in determining whether labeling is misleading, FDA shall take into account not only representations made about the product, but also the extent to which the labeling fails to reveal facts material in the light of such representations or material with respect to consequences which may result from the use of the article to which the labeling relates under the conditions of use prescribed in the labeling, or under such conditions of use as are customary or usual (see § 1.21 (21 CFR 1.21)). Finally, FDA has authority under section 701(a) of the act (21 U.S.C. 371(a)) to issue regulations for the efficient enforcement of the act.

As discussed in sections I, II, and IV of this document and in the proposed rule (61 FR 17807), FDA has determined that for OTC drug products containing more than the specified amount of cations, the quantity of these substances as inactive ingredients in OTC drug products is material with respect to consequences that may result from use of such products within the meaning of section 201(n) of the act. Certain levels of calcium, magnesium, and potassium present a potential safety problem. People with renal failure, kidney stones, or other conditions need to monitor their intake of calcium, which can result in kidney stones, and both potassium and magnesium can cause serious toxicity in persons with impaired renal function. Many people are on calcium, magnesium, or potassium-restricted diets. Other people must monitor their intake of calcium, magnesium, and potassium from foods (including dietary supplements) and OTC drugs for other medical or health reasons. Absent mandatory cation content labeling, these people would not be able to understand the relative contribution that OTC drug products make to their intake of cations, and would not be able to compare the cation contents of various OTC drug products.

D. The First Amendment

This final rule passes muster under the First Amendment. FDA's requirement of cation content labeling for OTC drug products (where cations are inactive ingredients and are present beyond the specified threshold level) is constitutionally permissible because it is reasonably related to the Government's interest in preventing deception of consumers and because it is not an ''unjustified or unduly burdensome'' disclosure requirement that offends the First Amendment. (See *Zauderer* v. *Office of Disciplinary Counsel*, 471 U.S. 626, 651 (1985); see also *Ibanez* v. *Florida Dep't of Bus. and Prof'l Regulation*, 512 U.S. 136, 146 (1994).) Such a reasonable relationship is plain here. The prescribed labeling disclosure would contribute directly to the consumption of quantities of cations that do not threaten the health of people for whom cation use has material consequences. Some people, newly informed by the required labeling, will properly reduce or discontinue their intake of cation-containing OTC drug products and thereby protect and promote their own health. By encouraging such changes in behavior, the labeling requirement is rationally related to the Government's goal of ensuring appropriate cation consumption. Finally, it is not ''unduly burdensome'' to require an additional disclosure of this kind.

In any event, this final rule passes muster when analyzed under the four-part test in *Central Hudson Gas & Electric Corporation* v. *Public Service Commission*, 447 U.S. 557 (1980), because it is necessary for the labeling of OTC drug products containing cations in excess of the threshold amount to be non-misleading (Id. at 563–564). As discussed in this document, FDA has determined that the failure to disclose in an OTC drug product's labeling the amount of cations in the product when they are present in amounts exceeding a certain threshold misbrands the product because the failure causes the labeling to be false or misleading under sections 502(a) and 201(n) of the act.

Although this determination obviates the need for FDA to address the other three parts of the *Central Hudson* test, we believe that the cation content labeling requirement satisfies each of these parts. With respect to the second part, FDA's interest in requiring cation content labeling under this final rule is to ensure that people who must monitor their intake of cations for health reasons have information necessary to understand the relative contribution that OTC drug products make to their intake of cations and to compare the cation contents of OTC drug products. FDA's interest in protecting the public health has been previously upheld as a substantial government interest under *Central Hudson*. (See *Pearson* v. *Shalala*, 164 F.3d 650, 656 (D.C. Cir. 1999) (citing *Rubin* v. *Coors Brewing Co.*, 514 U.S. 476, 484–485 (1995).) The labeling requirement directly advances this interest, thereby satisfying the third part of the *Central Hudso*n test, because by requiring labeling disclosure of the presence and quantity of cations in OTC drug products, the rule gives people the precise information they need to determine whether a particular product is consistent with their health requirements.

Finally, under the fourth part of the *Central Hudson* test, there are not numerous and obvious (*Cincinnati* v. *Discovery Network*, 507 U.S. 410, 418 n. 13 (1993)) alternatives to mandatory cation content labeling of OTC drug products that directly advance the Government's interest but are less burdensome to speech. Consumers are accustomed to using the label as their primary source of information about a product's contents. Neither a public education campaign, nor encouraging OTC drug product marketers to provide information on cation content in the labeling of their products, would ensure that people have the information they need about cation content at the point of sale or ingestion. And establishing limits on cation content would be more harmful to the public health. It is unnecessary for consumers who are not at risk to reduce or closely monitor their added daily cation intake from OTC drug products. Further, some consumers may wish to use OTC drug products to enrich the amount of cations in their diets. Finally, for many products, the cation content is linked to product design and determined by pharmaceutical necessity. Requiring disclosure here meets the fourth part of the test.

In conclusion, FDA believes it has complied with its burdens under the First Amendment to support mandatory disclosure of the amount of cations above a specified level in OTC drug product labeling.

V. Analysis of Impacts

FDA has examined the impacts of this final rule under Executive Order 12866, the Regulatory Flexibility Act (5 U.S.C. 601–612), and the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1501 *et.* seq.) Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). Under the Regulatory Flexibility Act, if a rule has a significant economic impact on a substantial number of small entities, an agency must analyze regulatory options that would minimize any significant impact of the rule on small entities. Section 202(a) of the Unfunded Mandates Reform Act of 1995 requires that agencies prepare a written statement of anticipated costs and benefits before proposing any rule that may result in an expenditure in any 1 year by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million (adjusted annually for inflation).

FDA concludes that this final rule is consistent with the principles set out in Executive Order 12866 and in these two statutes. As discussed in this section of the document, the final rule will not be economically significant as defined by the Executive order. With respect to the Regulatory Flexibility Act, the rule may have a significant economic impact on a substantial number of small entities. Thus, this preamble contains FDA's regulatory flexibility analysis. The Unfunded Mandates Reform Act of 1995 does not require FDA to prepare a statement of costs and benefits for the final rule, because the final rule is not expected to result in any 1-year expenditure that would exceed $100 million adjusted for inflation. The current inflation adjusted statutory threshold is about $110 million.

The purpose of this final rule is to add calcium, magnesium, and potassium content and warning information to the labeling of OTC drug products containing these ingredients. This rule is intended to help ensure the safe and effective use of all OTC drug products that contain these ingredients. Potential benefits include reduced toxicity when consumers use such products.

OTC antacid drug products containing the threshold amounts of magnesium and potassium have had a magnesium or potassium warning in their labeling since 1974. The final rule revises the wording of this warning and requires the magnesium and potassium content to be added to product labeling if the amount exceeds the threshold amounts. The final rule also requires calcium, magnesium, and potassium labeling for other OTC drug products for the first time if those products contain above the threshold amounts stated in the final rule.

FDA discussed the impacts of the calcium, magnesium, and potassium labeling requirement in the proposed rule (61 FR 17807 at 17810). Four of the comments submitted in response to the proposal addressed FDA's economic impact determination. (See section II.G, comment 8 of this document.)

One of the comments stated that the rule would affect thousands of OTC drug products. However, the comment provided no additional information. Another comment discussed the large number of formulations requiring analyses, stating that there would be over 50 for its company, and the company would be faced with sizable resource investments. However, the comment did not provide any estimates of the cost of product analyses for calcium, magnesium, or potassium content or the cost of its resource investments.

FDA's Drug Listing System (DLS) and standard texts can identify OTC drug products containing calcium, magnesium, and potassium as active ingredients. However, these sources do not identify those products containing these cations as inactive ingredients or indicate whether the inactive ingredient quantities meet the threshold levels that require content labeling and warnings to appear in product labeling. Therefore, FDA is unable to accurately estimate the number of products that will be affected by this final rule. However, FDA agrees with one comment that states that thousands of OTC drug products are likely to be affected.

FDA's DLS identifies a large number of products that contain calcium, magnesium, and potassium as active ingredients. For example, the DLS identifies 129 manufacturers, 319 marketers, and 744 products containing a number of calcium salts (acetate, carbonate, citrate, lactate, oxide, phosphate, polycarbophil, and sulfate). The DLS identifies 202 manufacturers, 613 marketers, and 1,553 products containing magnesium (aluminosilicates, carbonate, chloride, citrate, glycinate, hydroxide, magaldrate, oxide, phosphate, phosphate dibasic, salicylate, sulfate, and trisilicate). The DLS identifies 84 manufacturers, 149 marketers, and 445 products containing potassium (bicarbonate, carbonate, phosphate, phosphate dibasic or tribasic, salicylate, and tartrate). There are also a number of other less frequently used calcium, magnesium, and potassium salts included in the DLS. Some of these products contain more than one of these salts. Thus, the number of manufacturers and marketers affected by this final rule is less than the totals (415 manufacturers and 1,081 marketers) of the numbers stated herein. However, the total number of products (2,742) provides an estimate of the number of products that may need analyses. In addition, a number of these products are likely to have more than one stockkeeping unit (SKU) (individual products, packages, and sizes) that requires relabeling. For example, one private label manufacturer informed FDA that it has 91 products that would be affected by this final rule (that would need product analyses done), but these 91 products represent 4,000 SKUs that would require relabeling. (Note—these figures also included products containing sodium.) Another manufacturer informed FDA that it had 42 formulations affected by the calcium, magnesium, potassium, and sodium

labeling requirements, but did not mention the number of SKUs affected. Based on these numbers, FDA estimates that 10,000 SKUs may need labeling revisions.

FDA is aware of varying cost estimates for conducting an individual cation analysis for an individual lot of a specific formulation. These estimates range from $150 for private label products to between $300 and $400 for nationally branded products. If more than one cation is tested at the same time, there would likely be a slight cost savings ($400 for four cations (including sodium if sodium is also done) for one product), but not a significant savings because a separate sample analysis would need to be done for each cation. FDA has also been informed that some manufacturers plan to perform tests on three lots of each specific formulation; thus, the cost per formulation would be $450 to $1,200 per cation, and $1,200 to $3,600 if the analysis had to be done for all three cations (calcium, magnesium, and potassium). For certain cations, the need for analysis would be clear from the batch formulation. However, in some cases, manufacturers might have to test for all three cations to obtain baseline data.

To estimate the cost of product analysis, FDA weighted the cost of product testing to reflect the difference in testing costs reported by private label and branded product manufacturers. FDA estimates that branded products account for about 20 percent of all OTC drug products, and private label products account for the remaining 80 percent. The weighted cost of product testing for one cation, assuming that all product manufacturers will conduct tests on three lots, is $570 (($150 x .8 x 3)+($350 x .2 x 3)). Most manufacturers will know by their product formulations how many cations they will need to test. To estimate testing cost, FDA assumes that 50 percent of the products will require testing for 2 or 3 cations (midpoint of 2.5 used for estimation purposes). Assuming 3,000 products may need to be tested, the total cost of this requirement is $3.0 million (($570 x 1,500)+($570 x 2.5 x 1,500)).

All products containing over the threshold amounts of the cations will be required to be relabeled. Estimates of relabeling costs for the type of changes required by this rule vary greatly and range from $500 to $15,000 per SKU, depending on whether the products are nationally branded or private label. Because of the large number of products affected by this rule, FDA used the same weighted average cost to relabel (i.e., $3,600 per SKU) that was estimated for the final rule for the standardized format and content labeling requirements of OTC drug products (64 FR 13254 at 13279 to 13281). If 10,000 SKUs need to be relabeled, therefore, the one-time costs will be $36 million. The cost of this rule may be mitigated to the extent that manufacturers can coordinate the testing and relabeling required by this final rule with that of the OTC drug sodium content labeling rule, published elsewhere in this issue of the **Federal Register**, and to the extent that the relabeling can be coordinated with the general OTC drug products labeling rule (64 FR 13254).

In addition to the above costs, some manufacturers may incur one-time and annually recurring costs if they need to increase the label and/or package size of some SKUs because of the additional information required by this final rule. FDA had estimated that about 6,400 of the almost 100,000 marketed OTC drug SKUs may require increased label and/or package sizes to comply with the final labeling rule (64 FR 13254). As about one-half of these 6,400 SKUs were for products subject to this final rule, much of the costs for increasing label and/or package sizes may have already been accounted for in the impact analysis of that broader rule. FDA estimates that the additional few lines of labeling required by this final rule could compel an additional 3 percent of the approximately 10,000 affected SKUs to increase their label and/or package size. These costs were not accounted for in the prior rule.

Because of the large number of products affected by this final rule, FDA assumes that the average cost per SKU to increase label and/or package size would be essentially the same as FDA previously estimated in its analysis of the standardized format and content labeling requirements for OTC drug products. The model used to estimate the cost to change label/package sizes for the standardized format and content labeling requirements rule was developed by the Eastern Research Group, Inc. (ERG), a private economics consulting firm under contract to FDA (Ref. 2). ERG assigned probabilities to several options for package changes, including adding a carton (if not already present), adding a fifth panel, increasing the size of the packaging, or switching to a nonstandard form of labeling such as peel-back or accordion labels. Where applicable, the costs for changing a container size included container inventory loss, adjustment of the packaging line, and stability testing. Based on this model, FDA had estimated that the cost to increase label/package sizes to comply with the standardized format and content labeling requirements for OTC drug products in § 201.66 was $38.1 million for 6,313 SKUs, with an annual recurring cost of $11.5 million. Consequently, the average per SKU one-time cost was $6,038, and the average per SKU recurring cost was $1,820. Under the same assumptions, this final rule would impose additional one-time costs for increasing label/package sizes of $1.8 million (0.03 x 10,000 x $6,038) with annual recurring costs of $0.5 million (0.03 x 10,000 x $1,820). Thus, FDA estimates the overall costs of this final rule to be $40.8 million in one-time costs (i.e., $36 million to relabel, $3 million for testing, and $1.8 million to increase label/package sizes) and $0.5 million in annual recurring costs.

This final rule will not require any new reporting and recordkeeping activities. Therefore, no additional professional skills are needed. There are no other Federal rules that conflict with this final rule.

This final rule may have a significant economic impact on some small entities. It will affect the information content of all OTC drug products that contain above the threshold amounts of calcium, magnesium, and potassium. Firms that manufacture or relabel these OTC drug products will need to change the labeling for each affected product. FDA estimates that there are at least 400 firms that manufacture OTC drug products. Based on the Small Business Administration's determination that a small firm in this industry has fewer than 750 employees, roughly 70 percent of the firms are considered small.

The economic impact on any particular small firm is very difficult to measure because it will vary with the number of products affected, the number of SKUs per product, the ability to coordinate these label changes with those required for other purposes, the number of cation tests that must be performed, and the size of the required labeling compared to the space available on existing packaging. For example, assuming average industry costs, a small firm that would need to change labels for 5 products with 3 SKUs each, for a total of 15 SKUs, could experience a one-time cost from $50,000 to $120,000, plus some annually recurring costs. If only one cation test were required for each product and the labeling fit on existing packaging, the one-time cost to comply with the rule would be about $57,000 and there would be no annually recurring costs. However, if the products required tests for all three cations and one SKU from each product required a larger label/package size, the cost to comply would increase to

$92,750 with an annual recurring cost of approximately $9,100. A small private label manufacturer with the same product line and 10 customers for each SKU would face costs of $562,500 and $848,650, with $91,000 in annually recurring costs, respectively. These costs would be largely offset, however, to the extent that OTC drug manufacturers can coordinate these label changes with those already required by the final rule for the labeling requirements of OTC drug products (64 FR 13254), the sodium labeling rule, and any voluntary market-driven label changes that would be completed within the permitted compliance period.

FDA has taken the following steps to minimize the impact on small entities: (1) Providing sufficient time for implementation to enable entities to use up existing labeling stock and (2) coordinating the labeling revisions in this final rule with the revisions required by the final rule for sodium content labeling. FDA believes that these actions provide substantial flexibility and reductions in cost for small entities.

FDA considered but rejected the following several labeling alternatives: (1) A shorter or longer implementation period, and (2) an exemption from coverage for small entities. While FDA believes that consumers would benefit from having this new labeling in place as soon as possible, we also acknowledge that a shorter implementation period could significantly increase the compliance costs and these costs could be passed through to consumers. A longer time period for this rule may cost more if firms would have to undertake two successive labeling revisions. In addition, a longer time period would unnecessarily delay the benefit of the new labeling to consumers who self-medicate with these OTC drug products. FDA rejected an exemption for small entities because the new labeling information is also needed by consumers who purchase products marketed by those entities.

This analysis shows that FDA has considered the burden to small entities. Thus, this economic analysis, together with other relevant sections of this document, serves as FDA's final regulatory flexibility analysis, as required under the Regulatory Flexibility Act.

VI. Paperwork Reduction Act of 1995

FDA concludes that the labeling requirements in this document are not subject to review by the Office of Management and Budget because they do not constitute a ''collection of information'' under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). Rather, the labeling is a ''public disclosure of information originally supplied by the Federal Government to the recipient for the purpose of disclosure to the public'' (5 CFR 1320.3(c)(2)). The calcium, magnesium, and potassium content per dosage unit for active ingredients is product formulation information that many manufacturers should have on hand as part of their usual and customary business practice. Some manufacturers may need to do content analysis for inactive ingredients.

VII. Environmental Impact

FDA has determined under 21 CFR 25.31(a) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

VIII. Federalism

FDA has analyzed this final rule in accordance with the principles set forth in Executive Order 13132. FDA has determined that the rule does not contain policies that have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Accordingly, FDA concludes that the rule does not contain policies that have federalism implications as defined in the Executive order and, consequently, a federalism summary impact statement is not required.

List of Subjects

21 CFR Part 201

Drugs, Labeling, Reporting and recordkeeping requirements.

21 CFR Part 331

Labeling, Over-the-counter drugs.

■ Therefore, under the Federal Food, Drug, and Cosmetic Act, and under authority delegated to the Commissioner of Food and Drugs, 21 CFR parts 201 and 331 are amended as follows:

PART 201—LABELING

■ 1. The authority citation for 21 CFR part 201 continues to read as follows:

Authority: 21 U.S.C. 321, 331, 351, 352, 353, 355, 358, 360, 360b, 360gg–360ss, 371, 374, 379e; 42 U.S.C. 216, 241, 262, 264.

■ 2. Section 201.66 is amended by revising paragraph (c)(7)(i) to read as follows:

§ 201.66 Format and content requirements for over-the-counter (OTC) drug product labeling.

* * * * *

(c) * * *

(7) * * *

(i) Required information about certain ingredients in OTC drug products (e.g., sodium in § 201.64(b), calcium in § 201.70(b), magnesium in § 201.71(b), and potassium in § 201.72(b)) shall appear as follows: ''each (insert appropriate dosage unit) contains:'' [in bold type (insert name(s) of ingredient(s) (in alphabetical order) and the quantity of each ingredient). This information shall be the first statement under this heading.

* * * * *

■ 3. Section 201.70 is added to subpart C to read as follows:

§ 201.70 Calcium labeling.

(a) The labeling of over-the-counter (OTC) drug products intended for oral ingestion shall contain the calcium content per dosage unit (e.g., tablet, teaspoonful) if the calcium content of a single maximum recommended dose of the product (which may be one or more dosage units) is 20 milligrams or more. OTC drug products intended for oral ingestion include gum and lozenge dosage forms, but do not include dentifrices, mouthwashes, or mouth rinses.

(b) The calcium content shall be expressed in milligrams or grams per dosage unit and shall include the total amount of calcium regardless of the source, i.e., from both active and inactive ingredients. If the dosage unit contains less than 1 gram of calcium, milligrams should be used. The calcium

content per dosage unit shall be rounded-off to the nearest 5 milligrams (or nearest tenth of a gram if over 1 gram). The calcium content per dosage unit shall follow the heading ''Other information'' as stated in § 201.66(c)(7).

(c) The labeling of OTC drug products intended for oral ingestion shall contain the following statement under the heading ''Warning'' (or ''Warnings'' if it appears with additional warning statements) if the amount of calcium present in the labeled maximum daily dose of the product is more than 3.2 grams: ''Ask a doctor before use if you have [in bold type] [bullet][1] kidney stones [bullet] a calcium-restricted diet''. The warnings in §§ 201.64(c), 201.70(c), 201.71(c), and 201.72(c) may be combined, if applicable, provided the ingredients are listed in alphabetical order, e.g., a calcium or sodium restricted diet.

(d) Any product subject to this paragraph that is not labeled as required by this paragraph and that is initially introduced or initially delivered for introduction into interstate commerce after the following dates is misbranded under sections 201(n) and 502(a) and (f) of the Federal Food, Drug, and Cosmetic Act.

(1) As of the date of approval of the application for any single entity and combination products subject to drug marketing applications approved on or after April 23, 2004.

(2) September 24, 2005, for all OTC drug products subject to any OTC drug monograph, not yet the subject of any OTC drug monograph, or subject to drug marketing applications approved before April 23, 2004.

■ 4. Section 201.71 is added to subpart C to read as follows:

§ 201.71 Magnesium labeling.

(a) The labeling of over-the-counter (OTC) drug products intended for oral ingestion shall contain the magnesium content per dosage unit (e.g., tablet, teaspoonful) if the magnesium content of a single maximum recommended dose of the product (which may be one or more dosage units) is 8 milligrams or more. OTC drug products intended for oral ingestion include gum and lozenge dosage forms, but do not include dentifrices, mouthwashes, or mouth rinses.

(b) The magnesium content shall be expressed in milligrams or grams per dosage unit and shall include the total amount of magnesium regardless of the source, i.e., from both active and inactive ingredients. If the dosage unit contains less than 1 gram of magnesium, milligrams should be used. The magnesium content shall be rounded-off to the nearest 5 milligrams (or nearest tenth of a gram if over 1 gram). The magnesium content per dosage unit shall follow the heading ''Other information'' as stated in § 201.66(c)(7).

(c) The labeling of OTC drug products intended for oral ingestion shall contain the following statement under the heading ''Warning'' (or ''Warnings'' if it appears with additional warning statements) if the amount of magnesium present in the labeled maximum daily dose of the product is more than 600 milligrams: ''Ask a doctor before use if you have [in bold type] [bullet][1] kidney disease [bullet] a magnesium-restricted diet''. The warnings in §§ 201.64(c), 201.70(c), 201.71(c), and 201.72(c) may be combined, if applicable, provided the ingredients are listed in alphabetical order, e.g., a magnesium or potassium-restricted diet.

(d) Any product subject to this paragraph that is not labeled as required by this paragraph and that is initially introduced or initially delivered for introduction into interstate commerce after the following dates is misbranded under sections 201(n) and 502(a) and (f) of the Federal Food, Drug, and Cosmetic Act.

(1) As of the date of approval of the application for any single entity and combination products subject to drug marketing applications approved on or after April 23, 2004.

(2) September 24. 2005, for all OTC drug products subject to any OTC drug monograph, not yet the subject of any OTC drug monograph, or subject to drug marketing applications approved before April 23, 2004.

■ 5. Section 201.72 is added to subpart C to read as follows:

§ 201.72 Potassium labeling.

(a) The labeling of over-the-counter (OTC) drug products intended for oral ingestion shall contain the potassium content per dosage unit (e.g., tablet, teaspoonful) if the potassium content of a single maximum recommended dose of the product (which may be one or more dosage units) is 5 milligrams or more. OTC drug products intended for oral ingestion include gum and lozenge dosage forms, but do not include dentifrices, mouthwashes, or mouth rinses.

(b) The potassium content shall be expressed in milligrams or grams per dosage unit and shall include the total amount of potassium regardless of the source, i.e., from both active and inactive ingredients. If the dosage unit contains less than 1 gram of potassium, milligrams should be used. The potassium content shall be rounded-off to the nearest 5 milligrams (or nearest tenth of a gram if over 1 gram). The potassium content per dosage unit shall follow the heading ''Other information'' as stated in § 201.66(c)(7).

(c) The labeling of OTC drug products intended for oral ingestion shall contain the following statement under the heading ''Warning'' (or ''Warnings'' if it appears with additional warning statements) if the amount of potassium present in the labeled maximum daily dose of the product is more than 975 milligrams: ''Ask a doctor before use if you have [in bold type] [bullet][1] kidney disease [bullet] a potassium-restricted diet''. The warnings in §§ 201.64(c), 201.70(c), 201.71(c), and 201.72(c) may be combined, if applicable, provided the ingredients are listed in alphabetical order, e.g., a magnesium or potassium-restricted diet.

(d) Any product subject to this paragraph that is not labeled as required by this paragraph and that is initially introduced or initially delivered for introduction into interstate commerce after the following dates is misbranded under sections 201(n) and 502(a) and (f) of the Federal Food, Drug, and Cosmetic Act.

(1) As of the date of approval of the application for any single entity and combination products subject to drug marketing applications approved on or after April 23, 2004.

(2) September 24, 2005, for all OTC drug products subject to any OTC drug monograph, not yet the subject of any OTC drug monograph, or subject to drug marketing applications approved before April 23, 2004.

PART 331—ANTACID PRODUCTS FOR OVER-THE-COUNTER (OTC) HUMAN USE

■ 6. The authority citation for 21 CFR part 331 continues to read as follows:

Authority: 21 U.S.C. 321, 351, 352, 353, 355, 360, 371.

§ 331.30 [Amended]

■ 7. Section 331.30 *Labeling of antacid products* is amended by removing paragraphs (c)(4) and (c)(5) and redesignating paragraph (c)(6) as paragraph (c)(4).

[1] See § 201.66(b)(4) of this chapter for definition of bullet symbol.

[1] See § 201.66(b)(4) of this chapter for definition of bullet symbol.

[1] See § 201.66(b)(4) of this chapter for definition of bullet symbol.

Dated: March 15, 2004.

Jeffrey Shuren,

Assistant Commissioner for Policy.

[FR Doc. 04–6480 Filed 3–23–04; 8:45 am]

BILLING CODE 4160–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 522

Implantation or Injectable Dosage Form New Animal Drugs; Trenbolone and Estradiol

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a supplemental abbreviated new animal drug application (ANADA) filed by Ivy Laboratories, Div. of Ivy Animal Health, Inc. The supplemental ANADA provides for the addition of tylosin tartrate to an approved subcutaneous implant containing trenbolone and estradiol used for increased rate of weight gain in feedlot heifers.

DATES: This rule is effective March 24, 2004.

FOR FURTHER INFORMATION CONTACT: Eric S. Dubbin, Center for Veterinary Medicine (HFV–126), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–827–0232, e-mail: *edubbin@cvm.fda.gov*.

SUPPLEMENTARY INFORMATION: Ivy Laboratories, Div. of Ivy Animal Health, Inc., 8857 Bond St., Overland Park, KS 66214, filed a supplement to ANADA 200–346 for COMPONENT TE–IH (trenbolone acetate and estradiol) with TYLAN, a subcutaneous implant used for increased rate of weight gain in heifers fed in confinement for slaughter. The supplemental ANADA provides for the addition of a pellet containing 29 milligrams tylosin tartrate to the approved implant. The supplemental application is approved as of February 23, 2004, and the regulations are amended in 21 CFR 522.2477 to reflect the approval. The basis of approval is discussed in the freedom of information summary.

In accordance with the freedom of information provisions of 21 CFR part 20 and 21 CFR 514.11(e)(2)(ii), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852, between 9 a.m. and 4 p.m., Monday through Friday.

Under section 512(c)(2)(F)(iii) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(c)(2)(F)(iii)), this approval qualifies for 3 years of marketing exclusivity beginning February 23, 2004.

The agency has determined under 21 CFR 25.33(a)(1) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This rule does not meet the definition of ''rule'' in 5 U.S.C. 804(3)(A) because it is a rule of ''particular applicability.'' Therefore, it is not subject to the congressional review requirements in 5 U.S.C. 801–808.

BILLING CODE 4160–01–S

DEPARTMENT OF JUSTICE

Bureau of Prisons

28 CFR Part 551

[BOP–1084–F]

RIN 1120–AA79

Smoking/No Smoking Areas

AGENCY: Bureau of Prisons, Justice.

ACTION: Final rule.

SUMMARY: In this document, the Bureau of Prisons (Bureau) revises its regulations pertaining to smoking/no smoking areas in Bureau facilities. The revised regulations require the Warden to designate a smoking area for use in instances where smoking is to be part of an authorized religious activity. If the Warden designates smoking areas for general use (that is, for smoking which is not part of an authorized religious activity), the area must be in visibly designated outdoor locations. The amendment also requires the concurrence of the Regional Director if the Warden chooses not to designate smoking areas for general use. Once this occurs, the Regional Director's concurrence is also required if the Warden later chooses to designate smoking areas for general use at the institution. We intend this amendment to promote a clean air environment and to protect the health and safety of staff and inmates.

EFFECTIVE DATE: This rule will be effective on July 15, 2004.

ADDRESSES: Rules Unit, Office of General Counsel, Bureau of Prisons, 320 First Street, NW., Washington, DC 20534.

FOR FURTHER INFORMATION CONTACT: Sarah Qureshi, Office of General Counsel, Bureau of Prisons, phone (202) 307–2105.

SUPPLEMENTARY INFORMATION: The Bureau adopts as final a revision of its regulations in 28 CFR part 551, subpart N on smoking. We published a proposed rule on this subject on November 25, 1998 (63 FR 65502), which we modified in a supplemental notice on May 6, 1999 (64 FR 24468).

Both the original proposed rule and the supplemental notice would eliminate indoor smoking (with the

exception of smoking which is to be part of an authorized religious activity). The supplemental notice further allowed the Warden to eliminate outdoor smoking. The Regional Director's concurrence would be required either for the Warden's initial decision to eliminate outdoor smoking or for a subsequent decision to reinstate outdoor smoking. After due consideration of comments received, the Bureau is adopting as final the regulations proposed in the supplemental notice, with one change: After internal consideration, to promote accuracy of our regulations, we retain the original language in § 551.160, Purpose and Scope.

The supplemental notice contained a response to comments received on the original proposed rule. The Bureau received further comments on the supplemental notice. This final rule contains a response to comments received on the supplemental notice together with the response to comments received on the original proposed rule.

One commenter objected to the provisions in the supplemental notice, stating that he believed that the regulations currently in effect which govern smoking at Bureau facilities are adequate to protect inmates and staff from second-hand smoke. The commenter believed eliminating all indoor smoking will create hardships for staff and inmates alike and that Wardens should not be given the discretion to designate an institution as totally smoke-free. The commenter suggests that a resulting lack of uniformity in the smoking policy among the Bureau's various institutions would be tolerable if inmate requests for a transfer based upon a smoking preference would be allowed. The commenter further believes elimination of tobacco products at an institution will have an adverse economic effect on businesses and vendors who serve an institution's commissary as well as funds from tobacco sales, which as with other commissary sales, may be used for any purpose accruing to the benefit of the inmate body.

This same commenter, in response to another proposed rule on inmate discipline sanctions involving the smoking policy, states that nicotine addiction should be recognized as a serious medical condition requiring treatment and therapy and that smoking cessation programs and nicotine patches should be offered to assist those inmates who wish to quit smoking instead of elevating the severity level of the offense.

Four other commenters objected to the supplemental notice, proposing instead a total ban on the possession and use of lighted tobacco products for all prisoners, staff, management and visitors. Several of these commenters expressed dissatisfaction with the enforcement of the current smoking policy. One of these commenters alternately proposed separate smoking and non-smoking housing units. This commenter recommended limitations on dispensing cigarettes to ensure that the cigarette would be consumed under staff supervision at the point of purchase.

Commenters on the original proposed rule expressed a general belief that prohibiting indoor smoking within Bureau facilities will have little impact on reducing smoking and improving the air quality. Specifically, four commenters stressed that the current restrictions on smoking are rarely enforced. One commenter, alleging that most staff are smokers, expressed concern that the proposed regulations are not clear as to whether staff must also adhere to the ban on indoor smoking. This commenter included statements from four individuals concurring with his views.

As a practical alternative, three commenters on the original proposed rule support non-smoking units instead of a total prohibition against indoor smoking. One commenter expressed concern that tobacco use not be restricted for religious purposes. The supplemental notice was clarified to address this concern. One commenter expressed concern over the availability of health services support (including nicotine patches and nicorette gum) to those wishing to quit smoking. Four commenters objected to eliminating the Warden's authority to designate indoor smoking areas. These commenters believed that designated outdoor smoking areas would lack protection from adverse weather. They requested that the proposed rule specifically assure the availability of a protective environment for designated outdoor smoking areas. One commenter on the original proposed rule suggested installing smoke detectors in all cells. Two commenters on the original proposed rule suggested that all tobacco products be banned and no tobacco products be sold in federal prisons.

In response, the Bureau wishes to emphasize its intention to protect the health and safety of both staff and inmates. The hazards associated with tobacco smoke and second-hand inhalation of smoke by nonsmokers is well documented and the known health risks associated with smoking support implementation of stricter smoking/no smoking rules. The Bureau believes that adopting the provisions in the supplemental notice is the most practicable step toward promoting a clean air environment and protecting the health and safety of staff and inmates. Under the provisions in the supplemental notice, a Warden must designate a smoking area for use in instances where smoking is to be part of an authorized religious activity. The Warden may designate only outdoor smoking areas for general use (that is, for smoking which is not part of an authorized religious activity). Designating living units within an institution as smoking and non-smoking will not eliminate the health risks associated with passive inhalation of second-hand smoke indoors. By further allowing the Warden the discretion not to designate any smoking areas for general use if the Regional Director concurs, the Bureau is essentially adopting the recommendations of several of the commenters. If an institution did not have designated smoking areas for general use, that institution's commissary would not have corresponding tobacco products available for sale. The Bureau does not believe that removing tobacco products from the institution's commissary will have a significant economic impact as defined by the controlling statutes noted below. While there may be some impact on commissary profits, the Bureau believes that the health benefits outweigh any potential drop in such profits.

With respect to concerns raised by various commenters over enforcement of the smoking regulations, the Bureau is committed to investigate reported violations of the smoking policy. To emphasize the Bureau's commitment to reducing the health risks associated with tobacco smoke, the Bureau, in a separate document (64 FR 9432), proposed to elevate violations of the smoking policy from a low moderate category act to a moderate category prohibited act. Maintaining a smoke-free environment necessarily means that staff and visitors will be bound by the restrictions.

With respect to concerns over the availability of health services support for those inmates who wish to stop smoking, the Bureau notes that currently institutions are encouraged to offer smoking cessation programs. Upon implementation of these revised regulations, smoking cessation programs are to be offered at all institutions. Nicotine patches are available at the inmate's expense through commissary purchase.

With respect to the concern over the lack of uniformity in the application of policy system-wide, the Bureau believes

that role of the Regional Director will serve to minimize apparent disparity. The designation of an inmate to any particular institution remains subject to separate procedures designed to assess the inmate's designation needs in light of management variables and public safety factors.

With respect to the more technical comments, the Bureau notes that the effect on businesses and vendors who serve an institution's commissary does not rise to the level of an economically significant action. The Bureau does not believe additional smoke detectors are necessary as a deterrent to violations of the smoking policy because a total ban on indoor smoking simplifies enforcement. The Bureau is in compliance with fire safety codes on smoke detectors in its housing units. Nor does the Bureau believe it to be practicable to impose limitations on the dispensing and consumption of tobacco products as recommended by one commenter. Finally, the Bureau declines to incorporate the recommendation to require in the regulation some provision to accommodate outdoor smokers from adverse weather conditions. Security considerations make a blanket assurance of such accommodations impracticable. However, each Warden may give consideration to this issue based upon the security concerns of the institution and local weather conditions.

Members of the public may submit comments concerning this rule by writing to the previously cited address. These comments will be considered but will receive no response in the **Federal Register**.

Executive Order 12866

This regulation has been drafted and reviewed in accordance with Executive Order 12866, ''Regulatory Planning and Review'', section 1(b), Principles of Regulation. The Director of the Bureau of Prisons has determined that this rule is not a ''significant regulatory action'' under Executive Order 12866, section 3(f), and accordingly this rule has not been reviewed by the Office of Management and Budget.

Executive Order 13132

This regulation will not have substantial direct effects on the States, on the relationship between the national government and the States, or on distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 13132, it is determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Regulatory Flexibility Act

The Director of the Bureau of Prisons, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed this regulation and by approving it certifies that this regulation will not have a significant economic impact upon a substantial number of small entities for the following reasons: This rule pertains to the correctional management of offenders committed to the custody of the Attorney General or the Director of the Bureau of Prisons, and its economic impact is limited to the Bureau's appropriated funds.

Unfunded Mandates Reform Act of 1995

This rule will not result in the expenditure by State, local and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more in any one year, and it will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

Small Business Regulatory Enforcement Fairness Act of 1996

This rule is not a major rule as defined by § 804 of the Small Business Regulatory Enforcement Fairness Act of 1996. This rule will not result in an annual effect on the economy of $100,000,000 or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based companies to compete with foreign-based companies in domestic and export markets.

List of Subjects in 28 CFR Part 551

Prisoner.

Harley G. Lappin,

Director, Bureau of Prisons.

■ Under the rulemaking authority vested in the Attorney General in 5 U.S.C. 552(a) and delegated to the Director, Bureau of Prisons, we amend 28 CFR part 551 as set forth below.

SUBCHAPTER C—INSTITUTIONAL MANAGEMENT

PART 551—MISCELLANEOUS

■ 1. Revise the authority citation for 28 CFR 551 to read as follows:

Authority: 5 U.S.C. 301; 18 U.S.C. 1512, 3621, 3622, 3624, 4001, 4005, 4042, 4081, 4082 (Repealed in part as to offenses committed on or after November 1, 1987), 4161–4166 (Repealed as to offenses committed on or after November 1, 1987), 5006–5024 (Repealed October 12, 1984 as to offenses committed after that date), 5039; 28 U.S.C. 509, 510; Pub. L. 99–500 (sec. 209); Attorney General's May 1, 1995 Guidelines for Victim and Witness Assistance.

■ 2. Revise subpart N to read as follows:

Subpart N—Smoking/No Smoking Areas

Sec.

551.160 Purpose and scope.
551.161 Definitions.
551.162 Designated smoking areas.

Subpart N—Smoking/No Smoking Areas

§ 551.160 Purpose and scope.

To advance towards becoming a clean air environment and to protect the health and safety of staff and inmates, the Bureau of Prisons will restrict areas and circumstances where smoking is permitted within its institutions and offices.

§ 551.161 Definitions.

For purpose of this subpart, *smoking* is defined as carrying or inhaling a lighted cigar, cigarette, pipe, or other lighted tobacco products.

§ 551.162 Designated smoking areas.

(a) The Warden must designate a smoking area for use in instances where smoking is part of an authorized inmate religious activity.

(b)(1) The Warden may designate only outdoor smoking areas for general inmate use (that is, for smoking which is not part of an authorized religious activity). These smoking areas must be clearly identified.

(2) The Warden, with the Regional Director's concurrence, may choose not to designate smoking areas for general use. Once this occurs, the Regional Director's concurrence is required if the Warden later chooses to designate smoking areas for general use at the institution.

BILLING CODE 4410–05–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[DE 070–1043a; FRL–7639–4]

Approval and Promulgation of Air Quality Implementation Plans; Delaware; Amendments to Regulation 24, Section 10—Aerospace Coatings

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is taking direct final action to approve a revision to the State

of Delaware State Implementation Plan (SIP). The revision corrects the definition of the term ''Fire-Resistant (interior) Coating'' in Delaware's regulation to control volatile organic compound (VOC) emissions from aerospace coatings operations. The correction to the definition makes it consistent with EPA's Control Technique Guideline (CTG) for this VOC source category. EPA is approving this revision to the SIP in accordance with the requirements of the Clean Air Act.

DATES: This rule is effective on May 24, 2004 without further notice, unless EPA receives adverse written comment by April 23, 2004. If EPA receives such comments, it will publish a timely withdrawal of the direct final rule in the **Federal Register** and inform the public that the rule will not take effect.

ADDRESSES: Comments may be submitted either by mail or electronically. Written comments should be mailed to Makeba Morris, Chief, Air Quality Planning Branch, Mailcode 3AP21, U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103. Electronic comments should be sent either to *morris.makeba@epa.gov* or to *http://www.regulations.gov,* which is an alternative method for submitting electronic comments to EPA. To submit comments, please follow the detailed instructions described in Part III of the Supplementary Information section. Copies of the documents relevant to this action are available for public inspection during normal business hours at the Air Protection Division, U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103; and the Delaware Department of Natural Resources & Environmental Control, 89 Kings Highway, P.O. Box 1401, Dover, Delaware 19903.

FOR FURTHER INFORMATION CONTACT: Janice Lewis, (215) 814–2185, or by e-mail at *lewis.janice@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

On January 26, 1996 (61 FR 2419), EPA approved Regulation 24, Section 10, Aerospace Coatings of the Delaware Regulations Governing the Control of Air Pollution. On April 10, 2003, the Delaware Department of Natural Resources and Environmental Control (DNREC) submitted a formal revision to the Delaware SIP. The SIP revision consists of an amendment to Regulation 24, Section 10—Aerospace Coatings to correct the definition of the term ''Fire-Resistant (interior) Coating'' to reflect the definition found in EPA's final CTG document, ''Control of Volatile Organic Compound Emissions from Coating Operations at Aerospace Manufacturing and Rework Operations'' issued December 1997.

II. Summary of SIP Revision

On April 10, 2003, DNREC submitted a formal revision to the Delaware SIP which amends Regulation 24, Section 10—Aerospace Coatings. The revision amends the definition of the term ''Fire-Resistant (interior) Coating'' to differentiate, correctly, between civilian aircraft subject to Federal Aviation Administration (FAA) fireworthiness requirements, and military aircraft and space applications subject to other flammability requirements. The revised definition is consistent with EPA's final CTG document ''Control of Volatile Organic Compound Emissions from Coating Operations at Aerospace Manufacturing and Rework Operations'' (1997).

III. Final Action

EPA is approving the revision to the Delaware SIP submitted on April 10, 2003 by DNREC. The revision amends the definition of the term ''Fire-Resistant (interior) Coating'' in Regulation 24, Section 10—Aerospace Coatings to be consistent with that found in EPA's final CTG document ''Control of Volatile Organic Compound Emissions from Coating Operations at Aerospace Manufacturing and Rework Operations'' (1997). EPA is publishing this rule without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comment. However, in the ''Proposed Rules'' section of today's **Federal Register**, EPA is publishing a separate document that will serve as the proposal to approve the SIP revision if adverse comments are filed. This rule will be effective on May 24, 2004 without further notice unless EPA receives adverse comment by April 23, 2004. If EPA receives adverse comment, EPA will publish a timely withdrawal in the **Federal Register** informing the public that the rule will not take effect. EPA will address all public comments in a subsequent final rule based on the proposed rule. EPA will not institute a second comment period on this action. Any parties interested in commenting must do so at this time.

You may submit comments either electronically or by mail. To ensure proper receipt by EPA, identify the appropriate rulemaking identification number DE070–1043 in the subject line on the first page of your comment. Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked ''late.'' EPA is not required to consider these late comments.

1. *Electronically.* If you submit an electronic comment as prescribed below, EPA recommends that you include your name, mailing address, and an e-mail address or other contact information in the body of your comment. Also include this contact information on the outside of any disk or CD ROM you submit, and in any cover letter accompanying the disk or CD ROM. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. EPA's policy is that EPA will not edit your comment, and any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

i. *E-mail.* Comments may be sent by electronic mail (e-mail) to *Makeba.Morris@epa.gov,* attention DE 070–1043. EPA's e-mail system is not an ''anonymous access'' system. If you send an e-mail comment directly without going through Regulations.gov, EPA's e-mail system automatically captures your e-mail address. E-mail addresses that are automatically captured by EPA's e-mail system are included as part of the comment that is placed in the official public docket.

ii. *Regulations.gov.* Your use of Regulation.gov is an alternative method of submitting electronic comments to EPA. Go directly to *http://www.regulations.gov,* then select ''Environmental Protection Agency'' at the top of the page and use the ''go'' button. The list of current EPA actions available for comment will be listed. Please follow the online instructions for submitting comments. The system is an ''anonymous access'' system, which means EPA will not know your identity, e-mail address, or other contact information unless you provide it in the body of your comment.

iii. *Disk or CD ROM.* You may submit comments on a disk or CD ROM that you mail to the mailing address identified in the **ADDRESSES** section of this document. These electronic submissions will be accepted in WordPerfect, Word or ASCII file format.

Avoid the use of special characters and any form of encryption.

2. *By Mail.* Written comments should be addressed to the EPA Regional office listed in the **ADDRESSES** section of this document. For public commenters, it is important to note that EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing at the EPA Regional Office, as EPA receives them and without change, unless the comment contains copyrighted material, confidential business information (CBI), or other information whose disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in the official public rulemaking file. The entire printed comment, including the copyrighted material, will be available at the Regional Office for public inspection.

Submittal of CBI Comments

Do not submit information that you consider to be CBI electronically to EPA. You may claim information that you submit to EPA as CBI by marking any part or all of that information as CBI (if you submit CBI on disk or CD ROM, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2.

In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the official public regional rulemaking file. If you submit the copy that does not contain CBI on disk or CD ROM, mark the outside of the disk or CD ROM clearly that it does not contain CBI. Information not marked as CBI will be included in the public file and available for public inspection without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person identified in the **FOR FURTHER INFORMATION CONTACT** section.

Considerations When Preparing Comments to EPA

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.

2. Describe any assumptions that you used.

3. Provide any technical information and/or data you used that support your views.

4. If you estimate potential burden or costs, explain how you arrived at your estimate.

5. Provide specific examples to illustrate your concerns.

6. Offer alternatives.

7. Make sure to submit your comments by the comment period deadline identified.

8. To ensure proper receipt by EPA, identify the appropriate regional file/rulemaking identification number in the subject line on the first page of your response. It would also be helpful if you provided the name, date, and **Federal Register** citation related to your comments.

IV. Statutory and Executive Order Reviews

A. General Requirements

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a ''significant regulatory action'' and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001). This action merely approves state law as meeting Federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule approves pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4). This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). This action also does not have Federalism implications because it does not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This action merely approves a state rule implementing a Federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. This rule also is not subject to Executive Order 13045 ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997), because it is not economically significant. In reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a SIP submission, to use VCS in place of a SIP submission that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

B. Submission to Congress and the Comptroller General

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This rule is not a ''major rule'' as defined by 5 U.S.C. 804(2).

C. Petitions for Judicial Review

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 24, 2004. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it

extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action approving the State of Delaware's amendment to the definition of the term ''Fire-Resistant (interior) Coating'' in Regulation 24, Section 10—*Aerospace Coatings* may not be challenged later in proceedings to enforce its requirements. (*See* section 307(b)(2).)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes an exemption from the requirement of a tolerance for residues of the biochemical pesticide, ammonium bicarbonate on all food commodities when applied/used according to its label instructions as a feeding attractant. Certis USA, LLC submitted a petition to EPA under the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended by the Food Quality Protection Act of 1996 (FQPA), requesting an exemption from the requirement of a tolerance. This regulation eliminates the need to establish a maximum permissible level for residues of ammonium bicarbonate.

DATES: This regulation is effective March 24, 2004. Objections and requests for hearings, identified by docket ID number OPP–2004–0001, must be received on or before May 24, 2004.

ADDRESSES: Written objections and hearing requests may be submitted electronically, by mail, or through hand delivery/courier. Follow the detailed instructions as provided in Unit IX. of the **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Andrew Bryceland, Biopesticides and Pollution Prevention Division (7511C), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: (703) 305–6928; e-mail address: *bryceland.andrew@epa.gov*.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does This Action Apply to Me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected entities may include, but are not limited to:

- Crop production (NAICS 111)
- Animal production (NAICS 112)
- Food manufacturing (NAICS 311)
- Pesticide manufacturing (NAICS 32532)

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. To determine whether you or your business may be affected by this action, you should carefully examine the applicability provisions. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Copies of This Document and Other Related Information?

1. *Docket.* EPA has established an official public docket for this action under docket identification (ID) number OPP–2004–0001. The official public docket consists of the documents specifically referenced in this action, any public comments received, and other information related to this action. Although a part of the official docket, the public docket does not include Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. The official public docket is the collection of materials that is available for public viewing at the Public Information and Records Integrity Branch (PIRIB), Rm. 119,

Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA. This docket facility is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The docket telephone number is (703) 305–5805.

The legacy docket for this case is OPP–2002–0214, which was set up in connection with the Notice of Filing of this pesticide petition, (PP 2F6477). It contains the **Federal Register** Notice dated September 25, 2002 (68 FR 60236) (FRL–7194–1), which was published to announce this petition.

2. *Electronic access.* You may access this **Federal Register** document electronically through the EPA Internet under the ''**Federal Register**'' listings at *http://www.epa.gov/fedrgstr/*. A frequently updated electronic version of 40 CFR part 180 is available at *http://www.access.gpo.gov/nara/cfr/cfrhtml_00/Title_40/40cfr180_00.html*, a beta site currently under development. To access the OPPTS Harmonized Guidelines referenced in this document, go directly to the guidelines at *http://www.epa.gov/opptsfrs/home/guidelin.htm*.

An electronic version of the public docket is available through EPA's electronic public docket and comment system, EPA Dockets. You may use EPA Dockets at *http://www.epa.gov/edocket/* to submit or view public comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Once in the system, select ''search,'' then key in the appropriate docket ID number.

II. Background and Statutory Findings

In the **Federal Register** of September 25, 2002 (67 FR 60233), EPA issued a notice pursuant to section 408 of the FFDCA, 21 U.S.C. 346a(e), as amended by FQPA (Public Law 104–170), announcing the filing of a pesticide tolerance petition (PP 2F6477) by Certis USA LLC, 9145 Guild Road, Suite 175, Columbia, MD 21046. This notice included a summary of the petition prepared by the petitioner Certis USA LLC. There were no comments received in response to the notice of filing.

The petition requested that 40 CFR part 180 be amended by establishing an exemption from the requirement of a tolerance for residues of ammonium bicarbonate.

III. Risk Assessment

Section 408(c)(2)(A)(i) of the FFDCA allows EPA to establish an exemption from the requirement for a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is''safe.'' Section 408(c)(2)(A)(ii) of the FFDCA defines ''safe'' to mean that ''there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information.'' This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section 408(b)(2)(c) of the FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to ''ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue * * *.'' Additionally, section 408(b)(2)(D) of the FFDCA requires that the Agency consider''available information'' concerning the cumulative effects of a particular pesticide's residues and ''other substances that have a common mechanism of toxicity.''

EPA performs a number of analyses to determine the risks from aggregate exposure to pesticide residues. First, EPA determines the toxicity of pesticides. Second, EPA examines exposure to the pesticide through food, drinking water, and through other exposures that occur as a result of pesticide use in residential settings.

IV. Toxicological Profile

Consistent with section 408(b)(2)(D) of the FFDCA, EPA has reviewed the available scientific data and other relevant information in support of this action and considered its validity, completeness, and reliability and the relationship of this information to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable subgroups of consumers, including infants and children.

Ammonia is a substance naturally produced in the human body from the metabolism of protein, amino acids, and other nitrogen containing chemicals (Refs. 1 and 2). A fairly large amount of ammonia (>50 mk/kg) is produced in the body each day from the breakdown of dietary protein and amino acids (Refs. 1 and 2). Bicarbonates are part of several commonly consumed compounds such as sodium bicarbonate and potassium bicarbonate, both of which have tolerance exemptions from EPA under 40 CFR 180.1176 and 40 CFR 180.1177, respectively. The Food and Drug Administration (FDA) allowed the use of ammonium bicarbonate as a direct food additive and EPA exempted ammonium bicarbonate from the requirement from a tolerance when used as an inert ingredient such as a surfactant or a suspending or dispersing agent in formulations applied to growing crops, and as a post-harvest treatment (Refs. 1 and 3). EPA has been petitioned to exempt from the requirement of a tolerance ammonium bicarbonate as an active ingredient. The toxicology of ammonium bicarbonate is no different for an active ingredient than it is from an inert ingredient.

Exposure of ammonium bicarbonate to ambient sunlight and heat results in the slow release of small amounts of ammonia (Refs. 1, 2, and 3). Ammonium bicarbonate is a preexisting component of the diet and degrades into ammonia, carbon dioxide, and water (Refs. 1, 2, and 3); therefore, during decomposition, ammonia would be the only component of concern and based on the commonly understood toxicology of ammonia, oral toxicity is not anticipated because when used as an attractant, the concentration of ammonia is estimated to be 100 times less than worldwide ambient atmospheric concentration (Refs. 1 and 2). Thus, it is unlikely that exposure to ammonium bicarbonate, or to the component(s) of ammonium bicarbonate, from the use of this pesticide will significantly add to ambient exposures already documented and without adverse effects.

The petitioner did not generate any toxicology and/or pathogenecity data in support of this tolerance exemption. Waivers for data requirements for toxicology and pathogenecity were requested and granted based on information/data submitted from the open scientific literature in support of the tolerance exemption for ammonium bicarbonate and are discussed below.

The following discussion of the evaluation of the information from the open scientific literature indicates a lack of toxicity and exposure to the pesticide and its degradation products will not likely add significantly to levels already present in the environment. More detailed analyses of these literature citations can be found in the specific Agency review of such information (Ref. 1). In addition, a substantial body of information on ammonium bicarbonate is published and selected copies are included in this reference (Refs. 2 and 3).

1. *Hypersensitivity incidents (40 CFR 152.12).* No hypersensitivity incidents have been reported by the registrant. However, to comply with the Agency's requirements under section 6(a)(2), any incident of hypersensitivity associated with the use of this pesticide must be reported to the Agency.

2. *Data waivers*. Data waivers were requested for the following studies:

i. *Acute oral toxicity (OPPTS Harmonized Guideline 870.1100)*. No MRID. Acute oral LD_{50} toxicity study in the rat. No study was submitted, however, the literature and submitted material safety data sheets, report an acute oral LD_{50} value of 1,576 milligrams/kilogram (mg/kg) in the rat. This information is acceptable to allow placement of ammonium bicarbonate in Toxicity Category III for the oral route (Refs. 1 and 2).

ii. *Acute dermal toxicity (OPPTS Harmonized Guideline 870.1200)*. The pH of ammonium bicarbonate is 7.8 in a 0.1N solution, and it degrades into ammonia, carbon dioxide, and water (Refs. 1 and 3). Therefore, no toxicity or irritation to the skin is expected, and further, no incidents of toxicity to the skin are reported.

iii. *Acute inhalation toxicity (OPPTS Harmonized Guideline 870.1300)*. Ammonium bicarbonate degrades into ammonia, carbon dioxide, and water, and the only component of concern would be ammonia during decomposition. Acute and chronic inhalation minimum risk levels (MRL) for ammonia have been set at 0.5 parts per million (ppm) and 0.3 ppm, respectively; which far exceeds any potential exposure from the pesticide use (Ref. 1).

iv. *90–Day oral toxicity in rodents (OPPTS Harmonized Guideline 870.3100)*. Ammonium bicarbonate is a preexisting component of the diet, and degrades only to ammonia, carbon dioxide, and water; therefore, oral toxicity is not anticipated (Refs. 1, 2, and 3).

v. *Reproduction/developmental toxicity screening test (OPPTS Harmonized Guideline 870.3550)*. Ammonium bicarbonate is a preexisting component of the diet, and degrades only to ammonia, carbon dioxide, and water; therefore, reproduction/ developmental toxicity is not anticipated(Refs. 1, 2, and 3).

vi. *Bacterial reverse mutation test (OPPTS Harmonized Guideline (870.5100)*. Ammonium bicarbonate (with or without S9 mix activation) was not mutagenic in the Ames assay when *S. typhimurium* strains TA97 and TA102 were exposed to 0.1 to 10 mg/ assay plate (Refs. 1 and 2).

vii. *Immunotoxicity (OPPTS Harmonized Guideline 870.7800)*. Ammonium bicarbonate is a preexisting component of the diet, and degrades only to ammonia, carbon dioxide, and water; therefore, immunotoxicity is not anticipated (Refs. 1, 2, and 3).

Data waivers of acute and subchronic oral studies, a dermal toxicity study, an acute inhalation study, mutagenicity studies, an immunotoxicity study, and a developmental toxicity study were requested and granted based on the submitted information from the public literature (Ref.1). Exposure to either ammonium bicarbonate, or to the ammonia component of ammonium bicarbonate, from the pesticidal use is not likely to add significantly to ambient exposures already documented and without reported adverse effects (Ref. 1). The amounts of ammonia released from the product over time result in calculated concentrations of 0.03 parts per billion (ppb)/day, well below the chronic human inhalation MRL of 0.3 ppm (Refs. 1 and 2). This exemption is supported by the fact that there are likely to be zero to minimal residues and any residues that might be found are within the safe limits identified by the data.

3. *Subchronic, chronic toxicity, and oncogenicity, and residue data*. Based on the information submitted by the registrant in accordance with the Tier I data requirements set forth in 40 CFR 158.690(c), the Tier II and III data requirements were not triggered and, therefore, not required in connection with this action. In addition, because the Tier II and Tier III data requirements were not required, the residue data requirements set forth in 40 CFR 158.690(b) also were not required.

V. Aggregate Exposures

In examining aggregate exposure, section 408 of the FFDCA directs EPA to consider available information concerning exposures from the pesticide residue in food and all other non-occupational exposures, including drinking water from ground water or surface water and exposure through pesticide use in gardens, lawns, or buildings (residential and other indoor uses).

A. Dietary Exposure

The ammonium bicarbonate in the end-use product will be contained within a polymeric substance, and as such will not come into direct contact with olives, thus no residues are expected and exposure via the oral route is unlikely.

1. *Food*. Ammonium bicarbonate at low levels is a preexisting component of the diet and is not known to be a toxic compound in the human diet. FDA has classified ammonium bicarbonate as Generally Regarded As Safe (GRAS) (21 CFR 582.1135), and allows its use as a direct food additive (21 CFR 184.1135). Because the product is contained within a polymeric substance, there will be minimal additional dietary exposure from this use (Ref. 1). There is however, some potential for the ammonia gas from the decomposed product to come into contact with growing olives. However, it is expected that levels of gaseous ammonia would be well below the normal background levels of atmospheric ammonia present in an area of crop production.

2. *Drinking water exposure*. Exposure to residues of ammonium bicarbonate via drinking water is not likely to occur because ammonium bicarbonate is soluble in water and would break down into ammonia, carbon dioxide and water (Ref. 1). As gases, most of the ammonia and carbon dioxide will be released from the water.

B. Other Non-Occupational Exposure

The exposure levels of ammonia established by the Office of Safety and Health Administration (OSHA) at 35 ppm for 15 minutes (Refs. 1 and 2). In addition, the levels of exposure expected from use of this product are again less than the levels of ammonia in the workplace as recommended by the National Institute of Occupational Safety and Health (NIOSH) which are to be 50 ppm for 5 minutes of exposure (Refs. 1 and 2). The use of ammonium bicarbonate as a pesticide active ingredient is for field use, rather than indoor use. The additional exposure to ammonia as a degradation product of ammonium bicarbonate when used as a pesticide under field conditions will be far less than limits established by OSHA or NIOSH for occupational uses. Non-occupational exposure should be minimal.

1. *Dermal exposure*. The potential for non-occupational exposure to residues of ammonium bicarbonate is unlikely because the method of application in a polymeric substance limits any anticipated dermal exposure (Ref. 1).

2. *Inhalation exposure*. The potential for non-occupational inhalation exposure to residues of ammonium bicarbonate will occur at levels far lass than those established by OSHA and NIOSH. The total amount of ammonium bicarbonate applied per orchard/acre is 168 grams. The ammonium bicarbonate will slowly decompose to ammonia, carbon dioxide and water vapor. The total yield of ammonia would be 34.5 grams per season. If 36 g of ammonia is distributed in a single point in time over an acre of olive orchard to a height of 15 feet, the calculated concentration of ammonia would be 3 ppb. Assuming a release of ammonia from the product occurs over a 4–5 month period, a theoretical daily concentration can be

estimated at about 0.03 ppb/day during this time. This 0.03 ppb value is about 100 times less than the worldwide ambient atmospheric estimates of 1–3 ppb, and about 10,000 fold lower than ammonia concentrations (i.e., 300 ppb) reported over an agricultural field after fertilizer application. Furthermore, the 0.03 ppb value is lower than: The acute inhalation LC_{50} values after 15 minutes of exposure to ammonia that were reported as 17,401 ppm in the rat, and after 30 minutes of exposure, 21,430 ppm in the mouse; the acute and chronic inhalation minimal risk levels (MRLs) of 0.5 ppm and 0.3 ppm, respectively, that have been derived from studies with humans; the OSHA short-term (15 minute) exposure level of 35 ppm for ammonia; and the NIOSH recommended limited ammonia levels in the workplace of 50 ppm for 5 minutes of exposure (Ref. 1).

VI. Cumulative Effects

The Agency has considered the cumulative effects of ammonium bicarbonate and other substances in relation to a common mechanism of toxicity. These considerations include the possible cumulative effects of such residues on infants and children. There is no indication of mammalian toxicity at the maximum doses tested, of this or other products containing ammonium bicarbonate. Ammonium bicarbonate degrades into ammonia, carbon dioxide and water and the only component of concern would be ammonia (Refs. 1, 2, and 3); therefore, reasonably foreseeable exposures do not approach any toxicological level of concern.

VII. Determination of Safety for U.S. Population, Infants and Children

1. *U.S. population*. There is reasonable certainty that no harm will result from aggregate exposure to residues of ammonium bicarbonate to the U.S. population, infants and children. This includes all anticipated dietary exposures and all other exposures for which there is reliable information. The Agency has arrived at this conclusion based on the classification by FDA that ammonium bicarbonate is GRAS (21 CFR 582.1135), and allows its use as a direct food additive (21 CFR 184.1135). EPA exempts ammonium bicarbonate from the requirement of a tolerance when used as a surfactant, or a suspending or dispensing agent in formulations applied to growing crops or to food commodities after harvest, 40 CFR 180.1001(c) (Refs. 1, 2, and 3). Further, the active ingredient will be contained in a polymeric substance, in a retrievable device and while contained in this device, the product will slowly decompose to ammonia, carbon dioxide, and water at a rate which exceeds that which the human body produces each day from the breakdown of proteins and amino acids. Moreover, the levels of ammonia produced by the human body far exceed those levels of ammonia anticipated to be released from the use of this product and the estimated worldwide atmospheric levels of ammonia.

2. *Infants and children*. FFDCA section 408 provides that EPA shall apply an additional tenfold margin of exposure (safety) for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the data base unless EPA determines that a different margin of exposure (safety) will be safe for infants and children. Margins of exposure (safety) are often referred to as uncertainty (safety) factors. In this instance, based on all available information, the Agency concludes that ammonium bicarbonate is practically non-toxic to mammals including infants and children. Because there are no threshold effects of concern to infants, children and adults when ammonium bicarbonate is used as labeled, the provision requiring an additional margin of safety does not apply. Further, the provisions of consumption patterns, special susceptibility, and cumulative effects do not apply. As a result, EPA has not used a margin of exposure (safety) approach to assess the safety of ammonium bicarbonate.

VIII. Other Considerations

A. Endocrine Disruptors

Based on available data, no endocrine system-related effects have been identified with consumption of ammonium bicarbonate. It is produced in the human body, exempt for tolerance requirement by EPA as an inert ingredient, and allowed by the U.S. Department of Agriculture as a direct food additive. To date, there is no evidence to suggest that ammonium bicarbonate affects the immune system, function in a manner similar to any known hormone, or that it acts as an endocrine disruptor.

B. Analytical Method(s)

The Agency proposes to establish an exemption from the requirement of a tolerance for residues of ammonium bicarbonate, without any numerical limitation. Reasonably forseeable exposures to residues of ammonium bicarbonate will not significantly add to the levels already in the environment because the proposed use involves containing the active ingredient within a polymeric substance and because ammonium bicarbonate rapidly degrades to ammonia. Exposure to residues from ammonium bicarbonate will not significantly add to the levels already present in the environment because the active ingredient will be contained within a polymeric substance and it rapidly degrades into ammonia, water and carbon dioxide, at levels much below any reported levels of toxicological concern. Ammonium bicarbonate is a preexisting component of the human diet and is allowed as a direct food additive by the FDA (Refs. 1, 2, and 3).

The Agency concludes that an analytical method is not required for enforcement purposes for ammonium bicarbonate. However, an enforcement analytical method (OPPTS Harmonized Guideline 830.1800) was provided by the petitioner.

C. Codex Maximum Residue Level

There is no CODEX maximum residue levels for residues of ammonia or ammonium bicarbonate.

IX. Objections and Hearing Requests

Under section 408(g) of the FFDCA, as amended by the FQPA, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. The EPA procedural regulations which govern the submission of objections and requests for hearings appear in 40 CFR part 178. Although the procedures in those regulations require some modification to reflect the amendments made to the FFDCA by the FQPA, EPA will continue to use those procedures, with appropriate adjustments, until the necessary modifications can be made. The new section 408(g) of the FFDCA provides essentially the same process for persons to ''object'' to a regulation for an exemption from the requirement of a tolerance issued by EPA under new section 408(d) of the FFDCA, as was provided in the old sections 408 and 409 of the FFDCA. However, the period for filing objections is now 60 days, rather than 30 days.

A. What Do I Need To Do To File an Objection or Request a Hearing?

You must file your objection or request a hearing on this regulation in accordance with the instructions provided in this unit and in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number OPP–2004–0001 in the subject line on the first page of your submission. All requests must be in writing, and must be

mailed or delivered to the Hearing Clerk on or before May 24, 2004.

1. *Filing the request.* Your objection must specify the specific provisions in the regulation that you object to, and the grounds for the objections (40 CFR 178.25). If a hearing is requested, the objections must include a statement of the factual issues(s) on which a hearing is requested, the requestor's contentions on such issues, and a summary of any evidence relied upon by the objector (40 CFR 178.27). Information submitted in connection with an objection or hearing request may be claimed confidential by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the information that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice.

Mail your written request to: Office of the Hearing Clerk (1900C), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001. You may also deliver your request to the Office of the Hearing Clerk in Rm.104, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA. The Office of the Hearing Clerk is open from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Office of the Hearing Clerk is (703) 603–0061.

2. *Tolerance fee payment.* If you file an objection or request a hearing, you must also pay the fee prescribed by 40 CFR 180.33(i) or request a waiver of that fee pursuant to 40 CFR 180.33(m). You must mail the fee to: EPA Headquarters Accounting Operations Branch, Office of Pesticide Programs, P.O. Box 360277M, Pittsburgh, PA 15251. Please identify the fee submission by labeling it ''Tolerance Petition Fees.''

EPA is authorized to waive any fee requirement ''when in the judgement of the Administrator such a waiver or refund is equitable and not contrary to the purpose of this subsection.'' For additional information regarding the waiver of these fees, you may contact James Tompkins by phone at (703) 305–5697, by e-mail at *tompkins.jim@epa.gov*, or by mailing a request for information to Mr. Tompkins at Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001.

If you would like to request a waiver of the tolerance objection fees, you must mail your request for such a waiver to: James Hollins, Information Resources and Services Division (7502C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001.

3. *Copies for the Docket.* In addition to filing an objection or hearing request with the Hearing Clerk as described in Unit IX.A., you should also send a copy of your request to the PIRIB for its inclusion in the official record that is described in Unit I.B.1. Mail your copies, identified by docket ID number OPP–2004–0001, to: Public Information and Records Integrity Branch, Information Resources and Services Division (7502C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001. In person or by courier, bring a copy to the location of the PIRIB described in Unit I.B.1. You may also send an electronic copy of your request via e-mail to:*opp-docket@epa.gov*. Please use an ASCII file format and avoid the use of special characters and any form of encryption. Copies of electronic objections and hearing requests will also be accepted on disks in WordPerfect 6.1/8.0 or ASCII file format. Do not include any CBI in your electronic copy. You may also submit an electronic copy of your request at many Federal Depository Libraries.

B. When Will the Agency Grant a Request for a Hearing?

A request for a hearing will be granted if the Administrator determines that the material submitted shows the following: There is a genuine and substantial issue of fact; there is a reasonable possibility that available evidence identified by the requestor would, if established resolve one or more of such issues in favor of the requestor, taking into account uncontested claims or facts to the contrary; and resolution of the factual issues(s) in the manner sought by the requestor would be adequate to justify the action requested (40 CFR 178.32).

3. Wagner, J.M. *Volume 2: Public Literature Submitted to Support the Petition for the Exemption of Ammonium Bicarbonate from the Requirement of a Tolerance for Residues in or on Olives, MRID No. 457120–01.* April 2002.

XI. Statutory and Executive Order Reviews

This final rule establishes an exemption from the tolerance requirement under section 408(d) of the FFDCA in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled *Regulatory Planning and Review* (58 FR 51735, October 4, 1993). Because this rule has been exempted from review under Executive Order 12866 due to its lack of significance, this rule is not subject to Executive Order 13211, *Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use* (66 FR 28355, May 22, 2001). This final rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501*et seq.*, or impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104–4). Nor does it require any special considerations under Executive Order 12898, entitled *Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations* (59 FR 7629, February 16, 1994); or OMB review or any Agency action under Executive Order 13045, entitled *Protection of Children from Environmental Health Risks and Safety Risks* (62 FR 19885, April 23, 1997). This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104–113, section 12(d) (15 U.S.C. 272 note). Since tolerances and exemptions that are established on the basis of a petition under section 408(d) of the FFDCA, such as the exemption in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) do not apply. In addition, the Agency has determined that this action will not have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, entitled *Federalism* (64 FR 43255, August 10,

1999). Executive Order 13132 requires EPA to develop an accountable process to ensure ''meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.'' ''Policies that have federalism implications'' is defined in the Executive Order to include regulations that have''substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.'' This final rule directly regulates growers, food processors, food handlers and food retailers, not States. This action does not alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of section 408(n)(4) of the FFDCA. For these same reasons, the Agency has determined that this rule does not have any ''tribal implications'' as described in Executive Order 13175, entitled *Consultation and Coordination with Indian Tribal Governments* (65 FR 67249, November 6, 2000). Executive Order 13175, requires EPA to develop an accountable process to ensure ''meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications.'' ''Policies that have tribal implications'' is defined in the Executive Order to include regulations that have ''substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and the Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.'' This rule will not have substantial direct effects on tribal governments, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified in Executive Order 13175. Thus, Executive Order 13175 does not apply to this rule.

XII. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of this final rule in the **Federal Register**. This final rule is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: March 5, 2004.

James Jones,

Director, Office of Pesticide Programs.

■ Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346(a) and 371.

■ 2. Section 180.1244 is added to subpart D to read as follows:

§ 180.1244 Ammonium bicarbonate; exemption from the requirement of a tolerance.

An exemption from the requirement of tolerance is established for residues of ammonium bicarbonate used in or on all food commodities when used in accordance with good agricultural practices.

[FR Doc. 04–6431 Filed 3–23–04; 8:45 am]

BILLING CODE 6560–50–S

FEDERAL COMMUNICATIONS COMMISSION

47 CFR PART 0

[DA 04–683]

Freedom of Information Act

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Federal Communications Commission is modifying a section of the Commission's rules that implements the Freedom of Information Act (FOIA) Fee Schedule. This modification pertains to the charge for recovery of the full, allowable direct costs of searching for and reviewing records requested under the FOIA and the Commission's rules, unless such fees are restricted or waived. The fees are being revised to correspond to modifications in the rate of pay approved by Congress.

DATES: Effective March 24, 2004.

FOR FURTHER INFORMATION CONTACT: Shoko B. Hair, Freedom of Information Act Officer, Office of Performance Evaluation and Records Management, Room 1-A827, Federal Communications Commission, 445 12th Street, SW., Washington, DC 20554, (202) 418–1379 or via Internet at *shoko.hair@fcc.gov.*

SUPPLEMENTARY INFORMATION: The Federal Communications Commission is modifying § 0.467(a) of the Commission's rules. This rule pertains to the charges for searching and reviewing records requested under the FOIA. The FOIA requires federal agencies to establish a schedule of fees for the processing of requests for agency records in accordance with fee guidelines issued by the Office of Management and Budget (OMB). In 1987, OMB issued its Uniform Freedom of Information Act Fee Schedule and Guidelines. However, because the FOIA requires that each agency's fees be based upon its direct costs of providing FOIA services, OMB did not provide a unitary, government-wide schedule of fees. The Commission based its FOIA Fee Schedule on the grade level of the employee who processes the request. Thus, the Fee Schedule was computed at a Step 5 of each grade level based on the General Schedule effective January 1987 (including 20 percent for personnel benefits). The Commission's rules provide that the Fee Schedule will be modified periodically to correspond with modifications in the rate of pay approved by Congress. *See* 47 CFR 0.467(a)(1) note.

In an Order adopted on March 10, 2004 and released on March 15, 2004 (DA 04–683), the Managing Director revised the schedule of fees set forth in 47 CFR 0.467 for the recovery of the full, allowable direct costs of searching for and reviewing agency records requested pursuant to the FOIA and the Commission's rules, 47 CFR 0.460, 0.461. The revisions correspond to modifications in the rate of pay, which was approved by Congress.

These modifications to the Fee Schedule do not require notice and comment because they merely update the Fee Schedule to correspond to modifications in rates of pay, as required under the current rules.

Accordingly, pursuant to the authority contained in § 0.231(b) of the Commission's rules, 47 CFR 0.231(b), it is hereby ordered, that, effective on March 24, 2004, the Fee Schedule contained in § 0.467 of the Commission's rules, 47 CFR 0.467, is amended, as described herein.

List of Subjects in 47 CFR Part 0

Freedom of information.

Federal Communications Commission.

Marlene H. Dortch,

Secretary.

Rule Changes

For the reasons discussed in the preamble, the Federal Communications Commission amends 47 CFR part 0 as follows:

PART 0—COMMISSION ORGANIZATION

■ 1. The authority citation for part 0 continues to read as follows:

Authority: 47 U.S.C. 155, unless otherwise noted.

■ 2. Section 0.467 is amended by revising the last sentence, the table in paragraph (a)(1) and its note, and paragraph (a)(2) to read as follows:

§ 0.467 Search and review fees.

(a)(1) * * * The fee is based on the grade level of the employee(s) who conduct(s) the search or review, as specified in the following schedule:

Grade	Hourly fee
GS–1	11.66
GS–2	12.71
GS–3	14.32
GS–4	16.07
GS–5	17.99
GS–6	20.05
GS–7	22.27
GS–8	24.67
GS–9	27.25
GS–10	30.01
GS–11	32.96
GS–12	39.52
GS–13	46.99
GS–14	55.52
GS–15	65.32

Note: These fees will be modified periodically to correspond with modifications in the rate of pay approved by Congress.

(2) The fees in paragraph (a)(1) of this section were computed at Step 5 of each grade level based on the General Schedule effective January 2004 and include 20 percent for personnel benefits.

* * * * *

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 2

[ET Docket No. 03–102; FCC 04–20]

Above 76 GHz

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Commission reallocated spectrum in the 76–81 GHz frequency band and the frequency bands above 95 GHz to conform the United States Table of Frequency Allocations with recent changes to the International Table of Frequency Allocations maintained by the International Telcommunication Union. In order to protect passive services in the 55.78–56.26 GHz band, the Commission also adopted a limit on the maximum power spectral density that can be delivered to a fixed service transmitter antenna.

DATES: Effective April 23, 2004.

FOR FURTHER INFORMATION CONTACT: Shameeka Hunt, Office of Engineering and Technology, (202) 418–2062, email: *Shameeka.Hunt@fcc.gov*

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Report and Order*, ET Docket No. 03–102, FCC 04–20, adopted February 4, 2004, and released February 12, 2004. The full text of this Commission decision is available on the Commission's Internet site at *www.fcc.gov*. It is available for inspection and copying during normal business hours in the FCC Reference Information Center, Room CY–A257, 445 12th Street, SW., Washington, DC 20554. The complete text of this document also may be purchased from the Commission's copy contractor, Qualex International, Room CY–B402, 445 12th Street, SW., Washington, DC 20554. Alternate formats are available to persons with disabilities by contacting Brian Millin at (202) 418–7426 or TTY (202) 418–7365.

Summary of the Report and Order

1. In the *Report and Order*, the Commission amended part 2 of the Commission's rules to realign spectrum in the 76–81 GHz frequency band and the frequency bands above 95 GHz to conform the United States Table with international allocation changes made at WRC–2000. The Commission also set a maximum power spectral density limit in the 55.78–56.26 GHz band to protect passive services.

2. Above 76 GHz. The Commission found that implementing the allocation changes from WRC–2000 in these bands was necessary to provide EESS and RAS operations with the flexibility to operate in spectrum suited to meet their needs. This action also promoted consistency between the U.S. Table and the International Table.

3. Regarding the 76–77 GHz band, the Commission recognized that vehicular radar operations in this band may be able to increase the level of safety on highways and benefit the public. The Commission agreed with commenters that sharing between RAS and SRS and vehicular radar operations was possible. Therefore, the 76–77 GHz band was allocated to the RAS on a primary basis and to the SRS on a secondary basis, as proposed.

4. In addition, the Commission found evidence of potential interference conflicts between the amateur-satellite service and vehicular radar systems. On this basis, it was anticipated that an amateur earth station could either receive interference to its operations or cause interference to a passing vehicular radar device. Therefore, the proposed secondary amateur-satellite allocation for the 76–77 GHz band as not implemented. However, the existing secondary amateur service allocation was retained, noting that the existing secondary amateur service allocation in this band was currently suspended and restricted until technical sharing criteria was developed to address potential sharing problems in this band. The Commission also found that not allowing amateur operations in the 76–77 GHz band was not a significant burden on this service because amateurs typically do not operate at these higher frequencies and they are permitted to operate in the adjacent 77–81 GHz band.

5. Regarding the 77–81 GHz segment, the Commission adopted domestically the RAS and SRS allocations as proposed in the *Notice of Proposed Rule Making* (NPRM), 68 FR 33043, June 3, 2003. Also, the Commission adopted the proposal set forth in the *NPRM* to realign spectrum in the bands above 95 GHz. This realignment would have little impact on the small number of systems that are currently implemented in these bands and no parties filed comments opposing these changes. It was found that potential interference conflicts between allocations or development of technical sharing criteria would be addressed, as appropriate, as future applications are developed or through the development of service rules.

6. Finally, the Commission deleted the seven United States footnotes that were adopted in the *Table Clean-up Order* in DA No. 02–1872, 67 FR 59601, September 23, 2002, for the purpose of maintaining the status quo for the U.S. Table, since the Report and Order adopted the realignment of WRC–2000, these footnotes no longer applied.

7. Maximum Power Density in the Band 55.78–56.26 GHz. The Commission found that the current state of the art output power for fixed systems operating in this spectrum was still several dB less than the power that

would be permitted under the output power limit of −28.5 dB(W/MHz) that was recommended. It was noted that no licenses had been issued for operation in the fixed service in the 55.78–56.26 GHz band and that the Commission had only granted a few experimental licenses in this spectrum. Therefore, to protect EESS from unaccepted interference from fixed and mobile operations, footnote US379 was adopted, which limited the maximum power density delivered to fixed service transmitter antennas to −28.5 dB(W/MHz)

Final Regulatory Flexibility Analysis

8. As required by the Regulatory Flexibility Act (''RFA''),[1] the Commission incorporated an Initial Regulatory Flexibility Analysis (''IRFA'') in the Notice of Proposed Rulemaking and Order (''*NPRM*''), ET Docket No. 03–102.[2] The Commission sought written public comments on the proposals in the *NPRM*, including the IRFA. The Final Regulatory Flexibility Analysis (''FRFA'') in the *Report and Order* conforms to the RFA, as amended by the Contract With America Advancement Act of 1996 (''CWAAA''), Public Law 104–121, 110 Stat. 847 (1996).

9. The RFA directs agencies to provide a description of, and, where feasible, an estimate of the number of small entities that may be affected by the action taken.[3] The RFA generally defines the term ''small entity'' as having the same meaning as the terms ''small business,'' ''small organization,'' and ''small governmental jurisdiction.''[4] In addition, the term ''small business'' has the same meaning as the term ''small business concern'' under the Small Business Act.[5] A small business concern is one that: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) meets any additional criteria established by the Small Business Administration (''SBA'').[6] A small organization is generally ''any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.''[7] Nationwide, as of 1992, there were approximately 275,801 small organizations.[8] Finally, ''small governmental jurisdiction'' generally means ''governments of cities, counties, towns, townships, villages, school districts, or special districts, with a population of less than 50,000.''[9]

10. The Commission will send a copy of this Final Regulatory Flexibility Analysis, along with this Report and Order, in a report to be sent to Congress pursuant to the Congressional Review Act, 5 U.S.C. 801(a)(1)(A). In addition, the Commission will send a copy of this Report and Order, including this FRFA, to the Chief Counsel for Advocacy of the Small Business Administration.

Rule Changes

■ For the reasons discussed in the preamble, the Federal Communications Commission amends 47 CFR part 2 as follows:

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

■ 1. The authority citation for part 2 continues to read as follows:

Authority: 47 U.S.C. 154, 302a, 303, and 336, unless otherwise noted.

■ 2. Section 2.106, the Table of Frequency Allocations, is amended as follows:

■ a. Revise pages 79 and 81 through 89 and remove page 90.

■ b. In the list of International Footnotes, remove footnotes 5.563 and 917; remove headings ''I: New Numbering Scheme'' and ''II: Old Numbering Scheme''; and remove Note immediately following the heading ''INTERNATIONAL FOOTNOTES.''

■ c. In the list of United States (US) Footnotes, revise footnotes US74, US211, US246, US263, and US342; remove footnotes US369, US371, US372, US373, US374, US375, and US376; and add footnote US379.

The revisions and addition read as follows:

§ 2.106 Table of Frequency Allocations.

BILLING CODE 6712–01–U

[1] *See* 5 U.S.C. 603. The RFA, see 5 U.S.C. 601 *et seq.*, has been amended by the Contract With America Advancement Act of 1996, Public Law 104–121, 110 Stat. 847 (1996) (CWAAA). Title II of the CWAAA is the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA).

[2] *See Notice of Proposed Rule Making and Order,* 18 FCC Rcd 8347 (2003).

US342 In making assignments to stations of other services to which the bands:

[1] Medical telemetry equipment shall not cause harmful interference to radio astronomy operations in the band 608–614 MHz and shall be coordinated under the requirements found in 47 CFR 95.1119.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 031125292–4061–02; I.D. 031904A]

Fisheries of the Exclusive Economic Zone Off Alaska; Pollock in Statistical Area 620 of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Closure.

SUMMARY: NMFS is prohibiting directed fishing for pollock in Statistical Area 620 of the Gulf of Alaska (GOA). This action is necessary to prevent exceeding the B season pollock total allowable catch (TAC) for Statistical Area 620 of the GOA.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), March 21, 2004, through 1200 hrs, A.l.t., August 25, 2004.

FOR FURTHER INFORMATION CONTACT: Josh Keaton, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The B season allowance of the pollock TAC in Statistical Area 620 of the GOA is 10,704 metric tons (mt) as established by the final 2004 harvest specifications for groundfish of the GOA (69 FR 9261, February 27, 2004). In accordance with § 679.20(a)(5)(iii)(B) the Administrator, Alaska Region, NMFS (Regional Administrator), hereby increases the B

season pollock TAC by 1,522 mt, the amount of the A season pollock allowance in Statistical Area 620 that was not previously taken in the A season. The revised B season allowance of pollock TAC in Statistical Area 620 is therefore 12,226 mt (10,704 mt plus 1,522 mt).

In accordance with § 679.20(d)(1)(i), the Regional Administrator, has determined that the revised B season allowance of the pollock TAC in Statistical Area 620 will be reached. Therefore, the Regional Administrator is establishing a directed fishing allowance of 12,000 mt, and is setting aside the remaining 226 mt as bycatch to support other anticipated groundfish fisheries. In accordance with § 679.20(d)(1)(iii), the Regional Administrator finds that this directed fishing allowance will soon be reached. Consequently, NMFS is prohibiting directed fishing for pollock in Statistical Area 620 of the GOA.

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA, (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent the Agency from responding to the most recent fisheries data in a timely fashion and would delay the closure of the B season pollock TAC in Statistical Area 620.

The AA also finds good cause to waive the 30–day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

This action is required by § 679.20 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: March 19, 2004.

Alan D. Risenhoover,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[FR Doc. 04–6564 Filed 3–19–04; 1:48 pm]

BILLING CODE 3510–22–S

Proposed Rules

Federal Register
Vol. 69, No. 57
Wednesday, March 24, 2004

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2003–NM–92–AD]

RIN 2120–AA64

Airworthiness Directives; BAE Systems (Operations) Limited Model Avro 146–RJ Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to all BAE Systems (Operations) Limited Model Avro 146–RJ series airplanes. This proposal would require replacing the existing digital flight guidance computer(s) (DFGC) with a new flight computer(s). This action is necessary to prevent a premature flare due to an erroneous reading by the DFGC(s) occurring at any point on the approach after 1,500 feet plus 10 seconds once category III landing status has been achieved, and subsequent reduced controllability of the airplane. This action is intended to address the identified unsafe condition.

DATES: Comments must be received by April 23, 2004.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2003–NM–92–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays. Comments may be submitted via fax to (425) 227–1232. Comments may also be sent via the Internet using the following address: *9-anm-nprmcomment@faa.gov.* Comments sent via fax or the Internet must contain ''Docket No. 2003–NM–92–AD'' in the subject line and need not be submitted in triplicate. Comments sent via the Internet as attached electronic files must be formatted in Microsoft Word 97 or 2000 or ASCII text.

The service information referenced in the proposed rule may be obtained from British Aerospace Regional Aircraft American Support, 13850 Mclearen Road, Herndon, Virginia 20171. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Todd Thompson, Aerospace Engineer; International Branch, ANM–116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–1175; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this action may be changed in light of the comments received.

Submit comments using the following format:

- Organize comments issue-by-issue. For example, discuss a request to change the compliance time and a request to change the service bulletin reference as two separate issues.
- For each issue, state what specific change to the proposed AD is being requested.
- Include justification (*e.g.*, reasons or data) for each request.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this action must submit a self-addressed, stamped postcard on which the following statement is made: ''Comments to Docket Number 2003–NM–92–AD.'' The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2003–NM–92–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The Civil Aviation Authority (CAA), which is the airworthiness authority for the United Kingdom, notified the FAA that an unsafe condition may exist on all BAE Systems (Operations) Limited Model Avro 146–RJ series airplanes. The CAA advises that, due to an erroneous reading by the digital flight guidance computer (DFGC), once category III landing status has been achieved, a premature flare can occur at any point on the approach after 1,500 feet plus 10 seconds. This could cause the pilot to attempt manual compensation and to apply force to the control column while the autopilot is engaged, which can lead to a runaway condition of the autotrim. This condition, if not corrected, could result in a continued lack of awareness by the flight crew of autopilot engagement status and may result in the buildup of considerable stick forces, leading to reduced controllability of the airplane.

Explanation of Relevant Service Information

BAE Systems (Operations) Limited has issued Service Bulletin SB.22–068–70628B, dated November 4, 2002, which describes procedures for replacement of the existing digital flight guidance computer(s) (DFGC) with a new DFGC(s). Accomplishment of the actions specified in the service bulletin is intended to adequately address the identified unsafe condition. The CAA classified this service bulletin as mandatory and issued British airworthiness directive 001–11–2002 to ensure the continued airworthiness of these airplanes in the United Kingdom.

FAA's Conclusions

This airplane model is manufactured in the United Kingdom and is type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the CAA has kept the FAA informed of the situation described above. The FAA has examined the findings of the CAA, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require accomplishment of the actions specified in the service bulletin described previously, except as described below.

Difference Between Proposed AD and Service Bulletin

Although the service bulletin referenced in this AD specifies to submit information to the manufacturer, this AD does not include such a requirement.

Cost Impact

The FAA estimates that 36 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 1 work hour per airplane to accomplish the proposed actions, and that the average labor rate is $65 per work hour. Required parts would cost approximately $4,250 per DFGC (some airplanes may have 2 DGFCs. Based on these figures, the cost impact of the proposed AD on U.S. operators is estimated to be between $4,315 and $8,565 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted. The cost impact figures discussed in AD rulemaking actions represent only the time necessary to perform the specific actions actually required by the AD. These figures typically do not include incidental costs, such as the time required to gain access and close up, planning time, or time necessitated by other administrative actions.

Regulatory Impact

The regulations proposed herein would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this proposal would not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this proposed regulation (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

BAE Systems (Operations) Limited (Formerly British Aerospace Regional Aircraft): Docket 2003–NM–92–AD.

Applicability: All Model Avro 146–RJ series airplanes; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent a premature flare due to an erroneous reading by the DFGC(s) occurring at any point on the approach after 1,500 feet plus 10 seconds once category III landing status has been achieved, and subsequent reduced controllability of the airplane, accomplish the following:

Replacement

(a) Within 29 months after the effective date of this AD, replace the existing digital flight guidance computer(s) (DFGC) with a new DFGC(s), in accordance with the Accomplishment Instructions of BAE Systems (Operations) Limited Service Bulletin SB.22–068–70628B, dated November 4, 2002.

Reporting Requirements

(b) Although the service bulletin referenced in paragraph (a) of this AD specifies to submit information to the manufacturer, this AD does not include such a requirement.

Alternative Methods of Compliance

(c) In accordance with 14 CFR 39.19, the Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate, is authorized to approve alternative methods of compliance for this AD.

Note 1: The subject of this AD is addressed in British airworthiness directive 001–11–2002.

Issued in Renton, Washington, on March 12, 2004.

Ali Bahrami,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 04–6504 Filed 3–23–04; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2004–NM–29–AD]

RIN 2120–AA64

Airworthiness Directives; Boeing Model 737–100, –200, –200C, –300, –400, and –500 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes to revise an existing airworthiness directive (AD), applicable to certain Boeing Model 737–100, –200, –200C, –300, –400, and –500 series airplanes, that currently requires replacing existing screw, nut, and washers that attach the latch cable assembly to the latch block assembly of the door mounted escape slides, with new, improved screw, nut, and washers. The actions specified by that AD are intended to prevent the latch cable assembly from disconnecting from the latch block assembly of the door mounted escape slide, which could result in an escape slide not deploying in an emergency situation. This action would revise the parts installation paragraph to allow certain nuts to be installed and is intended to address the identified unsafe condition.

DATES: Comments must be received by May 10, 2004.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2004–NM–29–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays. Comments may be submitted via fax to (425) 227–1232. Comments may also be sent via the Internet using the following address: *9-anm-nprmcomment@faa.gov*. Comments sent via fax or the Internet must contain ''Docket No. 2004–NM–29–AD'' in the subject line and need not be submitted in triplicate. Comments sent via the Internet as attached electronic files must be formatted in Microsoft Word 97 or 2000 or ASCII text.

The service information referenced in the proposed rule may be obtained from Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124–2207. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Keith Ladderud, Aerospace Engineer, Cabin Safety and Environmental Systems Branch, ANM–150S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 917–6435; fax (425) 917–6590.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this action may be changed in light of the comments received.

Submit comments using the following format:

- Organize comments issue-by-issue. For example, discuss a request to change the compliance time and a request to change the service bulletin reference as two separate issues.
- For each issue, state what specific change to the proposed AD is being requested.
- Include justification (*e.g.*, reasons or data) for each request.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this action must submit a self-addressed, stamped postcard on which the following statement is made: ''Comments to Docket Number 2004–NM–29–AD.'' The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2004–NM–29–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

On February 5, 2004, the FAA issued AD 2004–03–34, amendment 39–13478 (69 FR 7553, February 18, 2004), applicable to certain Boeing Model 737–100, –200, –200C, –300, –400, and –500 series airplanes, to require replacing existing screw, nut, and washers that attach the latch cable assembly to the latch block assembly of the door mounted escape slides, with new, improved screw, nut, and washers. That action was prompted by a report that the cable on a door mounted escape slide had disconnected from the latch block assembly on a Boeing Model 737 series airplane. The requirements of that AD are intended to prevent the latch cable assembly from disconnecting from the latch block assembly of the door mounted escape slide, which could result in an escape slide not deploying in an emergency situation.

Actions Since Issuance of Previous Rule

Since the issuance of AD 2004–03–34, the FAA has recognized that paragraph (b) of that AD does not allow any nut, part number (P/N) BACN10R10L, to be installed ''on the latch block assembly of any airplane.'' It is not our intention to prevent nut, P/N BACN10R10L, from being installed on the latch block assembly. We do however want to prevent any nuts, P/N BACN10R10LH, that were removed from any airplane, from being installed on the latch block assembly. While the notice of proposed rulemaking (NPRM) for AD 2004–03–34 states ''no person may install a nut, part number (P/N) BACN10R10L, that was removed from any airplane,'' the text ''that was removed from any airplane,'' was inadvertently removed from paragraph (b) of the final rule. We have revised paragraph (b) of this proposed AD to state, ''* * * no person may install a nut, part number (P/N) BACN10R10L, that was removed from any airplane.''

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would revise AD 2004–03–34 to continue to require replacing the existing screw, nut, and washers that attach the latch cable assembly to the latch block assembly of the door mounted escape slides, with new, improved screw, nut, and washers. In addition, the proposed AD would allow nuts, P/N BACN10R10L, that were not removed from the airplane, to be installed on the latch block assembly.

Cost Impact

The proposed changes in this action add no additional economic burden. The current costs for this proposed AD are repeated for the convenience of affected operators, as follows:

There are approximately 2,919 airplanes of the affected design in the worldwide fleet. The FAA estimates that 1,129 airplanes of U.S. registry would be affected by this proposed AD. The FAA estimates that it would take approximately 2 work hours for each airplane specified as Group 1 in the referenced service bulletin, and approximately 1 work hour for each airplane specified as Group 2 in the referenced service bulletin, to accomplish the proposed actions; the average labor rate is estimated to be $65 per work hour. Parts and materials are standard and are to be supplied by the operator. Based on these figures, the cost impact of the proposed AD on U.S. operators is estimated to be $130 per Group 1 airplane, and $65 per Group 2 airplane.

The cost impact figures discussed above are based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this proposed AD were not adopted. The cost impact figures discussed in AD rulemaking actions represent only the time necessary to perform the specific actions actually required by the AD. These figures typically do not include

incidental costs, such as the time required to gain access and close up, planning time, or time necessitated by other administrative actions. The manufacturer may cover the cost of replacement parts associated with this proposed AD, subject to warranty conditions. Manufacturer warranty remedies may also be available for labor costs associated with this proposed AD. As a result, the costs attributable to the proposed AD may be less than stated above.

Regulatory Impact

The regulations proposed herein would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this proposal would not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this proposed regulation (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39–13478 (69 FR 7553, February 18, 2004), and by adding a new airworthiness directive (AD), to read as follows:

2004–03–34 R1 Boeing: Docket 2004–NM–29–AD. Revises AD 2004–03–34, Amendment 39–13478.

Applicability: Model 737–100, –200, –200C, –300, –400, and –500 series airplanes, as listed in Boeing Special Attention Service Bulletin 737–25–1434, dated March 22, 2001; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent the latch cable assembly from disconnecting from the latch block assembly of the door mounted escape slide, which could result in an escape slide not deploying in an emergency situation, accomplish the following:

Replacement

(a) Within 36 months after the effective date of this AD, replace existing screw, nut, and washers that attach the latch cable assembly to the latch block assembly of the door mounted escape slides, with new, improved screw, nut, and washers; per the Work Instructions of Boeing Special Attention Service Bulletin 737–25–1434, dated March 22, 2001.

Parts Installation

(b) As of the effective date of this AD, no person may install either of the parts specified in paragraphs (b)(1) and (b)(2) of this AD on the latch block assembly of any airplane.

(1) A nut, part number (P/N) BACN10R10L, that has been removed from any airplane.

(2) A screw, P/N NAS623–3–8.

Alternative Methods of Compliance

(c)(1) In accordance with 14 CFR 39.19, the Manager, Seattle Aircraft Certification Office (ACO), FAA, is authorized to approve alternative methods of compliance (AMOC) for this AD.

(2) An AMOC that provides an acceptable level of safety may be used for repair of the latch cable assembly and the latch block assembly for the door mounted escape slide, if it is approved by a Boeing Company Designated Engineering Representative (DER) who has been authorized by the Manager, Seattle ACO, to make such findings.

Issued in Renton, Washington, on March 15, 2004.

Kevin M. Mullin,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2003–NM–52–AD]

RIN 2120–AA64

Airworthiness Directives; Airbus Model A300 B2 Series Airplanes; Model A300 B4 Series Airplanes; and Model A300 B4–600, B4–600R, C4 605R Variant F, and F4–600R (Collectively Called A300–600) Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to all Airbus Model A300 B2 series airplanes; Model A300 B4 series airplanes; and Model A300 B4–600, B4–600R, C4 605R Variant F, and F4–600R (collectively called A300–600) series airplanes. This proposal would require inspection of the label of certain slat friction brakes for correct label wording, and corrective actions if necessary. This proposal also provides for optional terminating actions for certain repetitive corrective actions. These actions are necessary to find and fix incorrect labels on the housings of the slat friction brakes, which may lead to the use of unapproved oil in the brakes. Use of unapproved oil could affect the efficiency of the brakes and lead to failure of the brakes to maintain proper slat orientation in the event of a rupture of the slat drive shaft, consequent uncommanded retraction of the slat, and reduced controllability of the airplane. These actions are intended to address the identified unsafe condition.

DATES: Comments must be received by April 23, 2004.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2003–NM–52–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays. Comments may be submitted via fax to (425) 227–1232. Comments may also be sent via the Internet using the following address: *9-anm-nprmcomment@faa.gov.* Comments sent via fax or the Internet must contain ''Docket No. 2003–NM–52–AD'' in the subject line and need not be submitted

in triplicate. Comments sent via the Internet as attached electronic files must be formatted in Microsoft Word 97 or 2000 or ASCII text.

The service information referenced in the proposed rule may be obtained from Airbus, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Dan Rodina, Aerospace Engineer; International Branch, ANM–116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2125; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this action may be changed in light of the comments received.

Submit comments using the following format:

- Organize comments issue-by-issue. For example, discuss a request to change the compliance time and a request to change the service bulletin reference as two separate issues.
- For each issue, state what specific change to the proposed AD is being requested.
- Include justification (*e.g.*, reasons or data) for each request.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this action must submit a self-addressed, stamped postcard on which the following statement is made: ''Comments to Docket Number 2003–NM–52–AD.'' The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2003–NM–52–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The Direction Générale de l'Aviation Civile (DGAC), which is the airworthiness authority for France, notified the FAA that an unsafe condition may exist on certain Airbus Model A300 B2 series airplanes; Model A300 B4 series airplanes; and Model A300 B4–600, B4–600R, C4 605R Variant F, and F4–600R (collectively called A300–600) series airplanes. The DGAC advises that one operator reported that the oil of the slat friction brakes was replaced with oil not qualified for use on these components; consequently the brakes had to be replaced before the next flight. Further, the brake vendor shipped spares of brakes among which was one with an incorrect label. Additionally, there is no traceability of how many brake units have been released with an incorrect label. The incorrect label, if not corrected, may lead to the use of unapproved oil in the brake unit, which could affect the efficiency of the brake and lead to failure of the brake to maintain proper slat orientation in the event of a rupture of the slat drive shaft. This failure could result in uncommanded retraction of the slat and consequent reduced controllability of the airplane.

Explanation of Relevant Service Information

Airbus has issued All Operators Telex (AOT) 27A0199, Revision 01, dated February 5, 2003 (for Model A300 B2 and A300 B4 series airplanes); and AOT 27A6055, Revision 01, dated February 5, 2003 (for Model A300–600 series airplanes); which describe procedures for inspection of the label on the housing of the slat friction brake for correct label wording, and corrective actions if necessary. The corrective actions include replacement of incorrect labels with new labels, replacement of brake oil with Exxon 2120, repetitive verification of correct operational torque of the brakes, and replacement of the brakes with new brakes; as applicable. The AOTs also describe procedures for analysis of suspect brake oil and replacement of brakes with new brakes, which, if accomplished, would eliminate the need for certain repetitive corrective actions. Accomplishment of the actions specified in the applicable AOT is intended to adequately address the identified unsafe condition. The DGAC classified these AOTs as mandatory and issued French airworthiness directive 2003–48(B), effective February 5, 2003, to ensure the continued airworthiness of these airplanes in France.

FAA's Conclusions

These airplane models are manufactured in France and are type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the DGAC has kept the FAA informed of the situation described above. The FAA has examined the findings of the DGAC, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require accomplishment of the actions specified in the applicable AOT described previously, except as described below. The proposed AD also provides for optional terminating actions for certain repetitive corrective actions.

Difference Between Proposed Rule and Referenced AOTs

Operators should note that, although the referenced AOTs describe procedures for submitting oil drained from the friction brakes to the brake manufacturer for analysis, this proposed AD would not require that the manufacturer be the sole source of such analysis.

Cost Impact

The FAA estimates that 120 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 1 work hour to accomplish the proposed label inspection, and that the average labor rate is $65 per work hour. Based on these figures, the cost impact of the proposed AD on U.S. operators is estimated to be $7,800, or $65 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has accomplished any of the proposed requirements of this AD

action, and that no operators would accomplish those actions in the future if this proposed AD were not adopted. The cost impact figures discussed in AD rulemaking actions represent only the time necessary to perform the specific actions actually required by the AD. These figures typically do not include incidental costs, such as the time required to gain access and close up, planning time, or time necessitated by other administrative actions.

Regulatory Impact

The regulations proposed herein would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this proposal would not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this proposed regulation (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Airbus: Docket 2003–NM–52–AD.

Applicability: All Model A300 B2 series airplanes; Model A300 B4 series airplanes; and Model A300 B4–600, B4–600R, C4 605R Variant F, and F4–600R (collectively called A300–600) series airplanes; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent the possible use of unqualified oil in the slat friction brakes, which could cause failure of the brakes to maintain proper slat orientation in the event of a rupture of the slat drive shaft, consequent uncommanded retraction of the slats, and reduced controllability of the airplane, accomplish the following:

All Operators Telex (AOT) Reference

(a) The term AOT as used in this AD means paragraph 4.3, ''Description,'' of the following, as applicable:

(1) For Model A300 B2 and A300 B4 series airplanes: Airbus AOT 27A0199, Revision 01, dated February 5, 2003.

(2) For Model A300 B4–600, B4–600R, C4–605R Variant F, and F4–600R (collectively called A300–600) series airplanes: Airbus AOT 27A6055, Revision 01, dated February 5, 2003.

Inspection

(b) Within 3 weeks from the effective date of this AD, perform a general visual inspection of the label on the housings of the slat friction brakes for correct wording, in accordance with the applicable AOT.

Note 1: For the purposes of this AD, a general visual inspection is defined as: ''A visual examination of an interior or exterior area, installation, or assembly to detect obvious damage, failure, or irregularity. This level of inspection is made from within touching distance unless otherwise specified. A mirror may be necessary to enhance visual access to all exposed surfaces in the inspection area. This level of inspection is made under normally available lighting conditions such as daylight, hangar lighting, flashlight, or droplight and may require removal or opening of access panels or doors. Stands, ladders, or platforms may be required to gain proximity to the area being checked.''

Corrective Actions

(c) If the wording of the label is found to be incorrect during the inspection required by paragraph (b) of this AD, prior to further flight, remove the label then perform the actions specified in paragraphs (c)(1), (c)(2), and (c)(3) of this AD in accordance with the applicable AOT.

(1) Within 500 flight hours after removing the incorrect label, apply a correctly worded label to the housing.

(2) Prior to further flight after removing the label, drain the friction brake and refill with Exxon 2120 oil.

(3) Prior to further flight after removing the label, verify the torque of the friction brake.

(i) If the torque is within the limits specified in the applicable AOT, repeat the torque verification thereafter at intervals not to exceed 500 flight hours, until the optional terminating actions specified in paragraph (d) of this AD have been accomplished.

(ii) If the torque is not within the limits specified in the applicable AOT, prior to further flight, replace the friction brake with a new brake in accordance with the applicable AOT. Accomplishment of this replacement terminates the requirement for the repetitive torque verification for that brake.

Optional Terminating Actions

(d) Accomplishment of either paragraph (d)(1) or (d)(2) of this AD terminates the repetitive torque verification required by paragraph (c)(3)(i) of this AD.

(1) Analyze the oil drained from the friction brake.

(i) If the oil is Exxon 2120, no further action is required by this AD.

(ii) If the oil is not Exxon 2120, prior to further flight, replace the friction brake as specified in paragraph (d)(2) of this AD.

(2) Replace the friction brake with a new brake in accordance with the applicable AOT.

Analysis of Brake Oil

(e) Although the referenced AOTs describe procedures for submitting oil drained from the friction brakes to the brake manufacturer for analysis, this AD does not require that the manufacturer be the sole source of such analysis.

Alternative Methods of Compliance

(f) In accordance with 14 CFR 39.19, the Manager, International Branch, ANM–116, FAA, is authorized to approve alternative methods of compliance for this AD.

Note 2: The subject of this AD is addressed in French airworthiness directive 2003–48(B), dated February 5, 2003.

Issued in Renton, Washington, on March 15, 2004.

Kevin M. Mullin,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 201

[Docket No. 1990N–0309]

Drug Labeling; Sodium Labeling for Over-the-Counter Drugs

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a proposed rule that would amend the regulations for sodium labeling for over-the-counter (OTC) drug products by extending the sodium content labeling requirement to rectal drug products containing sodium phosphate/sodium biphosphate (sodium phosphates). FDA is taking this action because people with

certain medical conditions are at risk for an electrolyte imbalance to occur when using rectal sodium phosphates products. Serious adverse events and deaths have occurred because of the high level of sodium present in these products. This proposal is part of FDA's ongoing review of OTC drug products.

DATES: Submit written or electronic comments by June 22, 2004. Submit written or electronic comments on FDA's economic impact determination by June 22, 2004. See section IX of this document for the effective date of any final rule that may publish based on this proposal.

ADDRESSES: Submit written comments to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. Submit electronic comments to *http://www.fda.gov/dockets/ecomments*.

FOR FURTHER INFORMATION CONTACT: Robert L. Sherman, Center for Drug Evaluation and Research (HFD–560), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–827–2222.

SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of April 22, 1996 (61 FR 17798), FDA issued a final rule on sodium labeling for OTC drug products that included sodium content labeling for products intended for oral ingestion. FDA provided an opportunity for comment on whether the final rule should be amended to include sodium content labeling for OTC rectal laxative, vaginal, dentifrice, mouthwash, and mouth rinse drug products. FDA noted that sodium labeling is important because a substantial portion of daily sodium intake can come from OTC drugs, especially those used frequently, such as laxatives. Interested persons were given until July 22, 1996, to submit comments on labeling for those products. In the **Federal Register** of July 22, 1996 (61 FR 38046), FDA published a notice extending the comment period until September 20, 1996.

Elsewhere in this issue of the **Federal Register**, FDA responds to the comments submitted in response to the final rule. At this time, FDA is not requiring sodium labeling for OTC vaginal, dentifrice, mouthwash, or mouth rinse drug products. Because of reports of problems associated with rectal enemas containing sodium phosphates and because the sodium is absorbed in the body when the product has not produced a bowel movement and has been retained in the body, FDA is proposing sodium content labeling for these products. These products contain a high sodium content (9.5 grams (g) monobasic sodium phosphate and 3.5 g dibasic sodium phosphate per 59 milliliters) and the sodium content per delivered dose is 4.4 g for the adult product and 2.2 g for the children's product (Ref. 1). This amount of sodium may represent problems to people who need to limit sodium intake.

In the **Federal Register** of May 21, 1998 (63 FR 27886), FDA published a proposal to amend the tentative final monograph for OTC laxative drug products to include additional general and professional labeling for oral and rectal sodium phosphates drug products. That proposal includes a discussion of a number of situations where people with different medical conditions are at risk for an electrolyte imbalance to occur with use of oral and rectal sodium phosphates products. Because of this risk for an electrolyte imbalance to occur, FDA proposed new warnings and directions for these sodium phosphates products. However, that proposal did not contain any requirement for the sodium phosphates enemas to bear sodium content labeling. FDA considers it important for both consumers and health care professionals to have such information. The current proposal is intended to require sodium content labeling for these rectal products.

II. FDA's Proposal

FDA considers it important that consumers be aware of the sodium content of OTC sodium phosphates rectal drug products and that this information appear in product labeling so that it will be readily available to physicians. Section 201.64 (21 CFR 201.64) requires orally ingested sodium phosphates products to bear this information. Some OTC laxative drug products intended for rectal administration can contain very high levels of sodium from both active and inactive ingredients. Significant amounts of some of these products may be absorbed causing an electrolyte imbalance (61 FR 17798 at 17800). Therefore, FDA is proposing to add paragraph (k) to § 201.64 to require sodium content information to appear in the labeling of rectal drug products containing dibasic sodium phosphate and/or monobasic sodium phosphate.

III. FDA's Tentative Conclusions on Sodium Labeling for Rectal Drug Products

A. Proposed New Labeling Requirements

FDA concludes that public interest and public health consequences related to sodium intake have produced a need for more informative and consistent sodium content and warning information in the labeling of OTC drug products. This is especially true for individuals with hypertension, heart failure, or other conditions, who must monitor their sodium intake.

FDA is proposing to require sodium content information to appear in the labeling of OTC rectal drug products containing dibasic sodium phosphate and/or monobasic sodium phosphate. Warnings for these products will be addressed in the final monograph for OTC laxative drug products.

B. Statutory Authority

In this proposed rule, FDA is addressing legal issues relating to the agency's action to require sodium content labeling for OTC rectal drug products. FDA is relying on section 502(e) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 352(e)) to require disclosure in the labeling of OTC rectal drug products of the following: (1) The presence and quantity of sodium that is an active ingredient and (2) the presence of sodium that is an inactive ingredient. To require disclosure of the quantity of sodium that is an inactive ingredient, FDA is relying on sections 502(a) and 201(n) of the act (21 U.S.C. 321(n)).

Section 502(e) of the act deems a drug to be misbranded unless its label bears the established name and quantity of each active ingredient or, if determined to be appropriate by the Secretary of Health and Human Services (the Secretary), the proportion of each active ingredient (21 U.S.C. 352(e)(1)(A)(ii)). That provision also deems a drug to be misbranded unless its label bears the established name of each inactive ingredient on the outside container, and if determined appropriate by the Secretary, on the immediate container (21 U.S.C. 352(e)(1)(A)(iii)). Under section 502(a) of the act, a drug is deemed to be misbranded if its labeling is ''false or misleading in any particular.'' Section 201(n) of the act amplifies what is meant by ''misleading'' in section 502(a). Section 201(n) of the act states that, in determining whether labeling is misleading, FDA shall take into account not only representations made about the product, but also the extent to which the labeling fails to reveal facts material in the light of such representations or material with respect to consequences that may result from the use of the article to which the labeling relates under the conditions of use prescribed in the labeling, or under such conditions of use as are customary or

usual (see 21 CFR 1.21). Finally, FDA has authority under section 701(a) of the act (21 U.S.C. 371(a)) to issue regulations for the efficient enforcement of the act.

As discussed in sections I, II, and III of this document, FDA has tentatively determined that for OTC rectal drug products containing more than the specified amount of sodium, the quantity of this substance as an active or inactive ingredient in these drug products is material with respect to consequences that may result from their use. Certain levels of sodium present a potential safety problem. People with hypertension, heart failure, or other conditions need to monitor their intake of sodium, which can cause serious toxicity in persons with these conditions. Many people are on sodium-restricted diets. Other people must monitor their intake of sodium from foods (including dietary supplements) and OTC drugs for other medical or health reasons. Without mandatory sodium content labeling, these people would not be able to understand the relative contribution that OTC rectal drug products containing sodium make to their intake of sodium, and would not be able to compare the sodium content of various OTC rectal drug products.

C. The First Amendment

This proposed rule passes muster under the first amendment. FDA's proposed requirement of sodium content labeling for OTC rectal drug products (where sodium is an active or inactive ingredient and is present beyond the specified threshold level) is constitutionally permissible because it is reasonably related to the Government's interest in preventing deception of consumers and because it is not an ''unjustified or unduly burdensome'' disclosure requirement that offends the First Amendment. (See *Zauderer* v. *Office of Disciplinary Counsel*, 471 U.S. 626, 651 (1985); see also *Ibanez* v. *Florida Dep't of Bus. and Prof'l Regulation*, 512 U.S. 136, 146 (1994)). Such a reasonable relationship is plain here. The prescribed labeling disclosure would contribute directly to the use of products containing quantities of sodium that do not threaten the health of people for whom sodium use has material consequences. Some people, newly informed by the required labeling, will properly reduce or discontinue using sodium-containing OTC rectal drug products and thereby protect and promote their own health. By encouraging such changes in behavior, the labeling requirement is rationally related to the Government's goal of ensuring appropriate use of rectal drug products containing sodium. Finally, it is not ''unduly burdensome'' to require an additional disclosure of this kind.

In any event, this proposed rule passes muster when analyzed under the four-part test in *Central Hudson Gas & Electric Corporation* v. *Public Service Commission*, 447 U.S. 557 (1980), because it is necessary for the labeling of OTC rectal drug products containing sodium in excess of the threshold amount to be nonmisleading (Id. at 563–564). As discussed in this document, FDA has determined that the failure to disclose in an OTC rectal drug product's labeling the amount of sodium in the product when it is present in amounts exceeding a certain threshold misbrands the product because the failure causes the labeling to be false or misleading under sections 502(a) and 201(n) of the act.

Although this determination obviates the need for FDA to address the other three parts of the *Central Hudson* test, we believe that the sodium content labeling requirement satisfies each of these parts. With respect to the second part, FDA's interest in requiring sodium content labeling under this proposed rule is to ensure that people who must monitor their sodium intake for health reasons have information necessary to understand the relative contribution that OTC rectal drug products make to their sodium intake and to compare the sodium content of such products. FDA's interest in protecting the public health has been previously upheld as a substantial government interest under *Central Hudson*. (See *Pearson* v. *Shalala*, 164 F.3d 650, 656 (D.C. Cir. 1999) (citing *Rubin* v. *Coors Brewing Co.*, 514 U.S. 476, 484–485 (1995)). The labeling requirement directly advances this interest, thereby satisfying the third part of the *Central Hudson* test, because by requiring labeling disclosure of the presence and quantity of sodium in OTC rectal drug products, the rule gives people the precise information they need to determine whether a particular product is consistent with their health requirements.

Finally, under the fourth part of the *Central Hudson* test, there are not numerous and obvious (*Cincinnati* v. *Discovery Network*, 507 U.S. 410, 418 n. 13 (1993)) alternatives to mandatory sodium content labeling of OTC rectal drug products that directly advance the Government's interest but are less burdensome to speech. Consumers are accustomed to using the label as their primary source of information about a product's contents. Neither a public education campaign, nor encouraging OTC drug product marketers to provide information on sodium content in the labeling of their products, would ensure that people have the information they need about sodium content at the point of sale or use. And establishing limits on sodium content would be more harmful to the public health. It is unnecessary for consumers who are not at risk to reduce or closely monitor their added daily sodium intake from OTC rectal drug products. For these rectal products, sodium content is linked to product design and determined by pharmaceutical necessity. Requiring disclosure here meets the fourth part of the test.

In conclusion, FDA believes it has complied with its burdens under the First Amendment to support mandatory disclosure of the amount of sodium above a specified level in OTC rectal drug product labeling.

IV. Analysis of Impacts

FDA has examined the impacts of this proposed rule under Executive Order 12866, the Regulatory Flexibility Act (5 U.S.C. 601–612), and the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1501 *et seq.*). Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). Under the Regulatory Flexibility Act, if a rule has a significant economic impact on a substantial number of small entities, an agency must analyze regulatory options that would minimize any significant impact of the rule on small entities. Section 202(a) of the Unfunded Mandates Reform Act of 1995 requires that agencies prepare a written statement of anticipated costs and benefits before proposing any rule that may result in an expenditure in any one year by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million (adjusted annually for inflation).

FDA believes that this proposed rule is consistent with the principles set out in Executive Order 12866 and in these two statutes. As discussed in this section, the proposed rule will not be economically significant as defined by the Executive order. With respect to the Regulatory Flexibility Act, FDA does not believe the rule would have a significant economic impact on a substantial number of small entities, but FDA cannot be certain. Thus, this preamble contains FDA's regulatory flexibility analysis. The Unfunded

Mandates Reform Act of 1995 does not require FDA to prepare a statement of costs and benefits for the proposed rule, because the proposed rule is not expected to result in any 1-year expenditure that would exceed $100 million adjusted for inflation. The current inflation adjusted statutory threshold is about $110 million.

The purpose of this proposed rule is to extend the requirement for sodium content labeling to OTC rectal drug products that contain sodium phosphates so that the information is available to individuals who need to limit their sodium intake. The proposed rule would require minor relabeling of sodium phosphates rectal products. There are fewer than five manufacturers of these products in the OTC drug marketplace. One company manufactures a nationally branded product with the others producing private label products. One large manufacturer produces about one-half to two-thirds of the products covered by this proposed rule. Three small manufacturers account for the remainder of the market. There may be other manufacturers/marketers not identified in sources FDA reviewed, but FDA believes there are a limited number and they would be small manufacturers. FDA does not believe that this proposed rule would have a significant economic impact on small entities, using the U.S. Small Business Administration designations for this industry (750 employees). Together, the manufacturers will have to relabel fewer than 300 stockkeeping units (SKUs). The manufacturer of the nationally branded product and some private label manufacturers of these products already include sodium content information in the labeling of their products. This relabeling (addition of sodium content labeling) will impose direct one-time costs on some manufacturers. FDA has been informed that the cost to relabel these products ranges from $500 to $3,500. Using the conservative estimate of $3,500 per SKU, and assuming all SKUs would need to be relabeled, the total one-time cost to relabel these products would be $1,050,000. Actual costs will be lower because of current voluntary compliance.

Manufacturers that have not voluntarily included sodium content information may also incur one-time costs to test their products. The cost to test for one cation is about $150 for private label manufacturers. Assuming they repeat the testing, the total one-time costs for an estimated 10 products would be $3,000.

FDA considered but rejected several labeling alternatives: (1) A longer implementation period and (2) an exemption from coverage for small entities. A longer time period would unnecessarily delay the benefit of the new labeling to consumers who self-medicate with these products. FDA rejected an exemption for small entities because the labeling is also needed by consumers who purchase products marketed by those entities.

This analysis shows that FDA has considered the burden to small entities. Thus, this economic analysis, together with other relevant sections of this document, serves as FDA's initial regulatory flexibility analysis, as required under the Regulatory Flexibility Act.

FDA invites public comment regarding any substantial or significant economic impact that this proposed rule would have on manufacturers or marketers of OTC rectal drug products containing sodium phosphates. Comments regarding the impact of this proposed rule on OTC rectal drug products containing sodium phosphates should be accompanied by appropriate documentation. FDA is providing a period of 90 days from the date of publication of this proposed rule in the **Federal Register** for development and submission of comments on this subject. FDA will evaluate any comments and supporting data that are received and will reassess the economic impact of this proposed rule in the preamble to the final rule.

V. Paperwork Reduction Act of 1995

FDA tentatively concludes that the labeling requirement proposed in this document is not subject to review by the Office of Management and Budget because it does not constitute a ''collection of information'' under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). Rather, the proposed labeling statement is a ''public disclosure of information originally supplied by the Federal government to the recipient for the purpose of disclosure to the public'' (5 CFR 1320.3(c)(2)).

VI. Environmental Impact

FDA has determined under 21 CFR 25.31(a) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

VII. Request for Comments

FDA is providing interested persons 90 days after the date of publication of this proposed rule in the **Federal Register** to submit written or electronic comments on the proposed rule and FDA's economic impact determination to the Division of Dockets Management (see **ADDRESSES**). Three copies of all written comments are to be submitted. Individuals submitting written comments or anyone submitting electronic comments may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document and may be accompanied by a supporting memorandum or brief. FDA is requesting that comments be submitted within 90 days because it wants to finalize this proposal as quickly as possible to coordinate this proposed labeling addendum with other labeling changes that are occurring for these products. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

VIII. Federalism

FDA has analyzed this proposed rule in accordance with the principles set forth in Executive Order 13132. FDA has determined that the proposed rule does not contain policies that have substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Accordingly, FDA tentatively concludes that the proposed rule does not contain policies that have federalism implications as defined in the Executive order and, consequently, a federalism summary impact statement is not required.

IX. Proposed Effective Date

FDA proposes that any final rule based on this proposal become effective 12 months after its date of publication in the **Federal Register**.

X. Reference

The following reference is on display in the Division of Dockets Management (see **ADDRESSES**) and may be seen by interested persons between 9 a.m. and 4 p.m., Monday through Friday.

1. Enema label, OTC Vol. 090TFM3, Docket No. 78N–036L.

List of Subjects in 21 CFR Part 201

Drugs, Labeling, Reporting and recordkeeping requirements.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, it is proposed that 21 CFR part 201 be amended as follows:

PART 201—LABELING

1. The authority citation for 21 CFR part 201 continues to read as follows:

Authority: 21 U.S.C. 321, 331, 351, 352, 353, 355, 358, 360, 360b, 360gg–360ss, 371, 374, 379e; 42 U.S.C. 216, 241, 262, 264.

2. Section 201.64 is amended by adding paragraph (k) to read as follows:

§ 201.64 Sodium labeling.

* * * * *

(k) The labeling of OTC drug products intended for rectal administration containing dibasic sodium phosphate and/or monobasic sodium phosphate shall contain the sodium content per delivered dose if the sodium content is 5 milligrams or more. The sodium content shall be expressed in milligrams or grams. If less than 1 gram, milligrams should be used. The sodium content shall be rounded-off to the nearest whole number if expressed in milligrams (or nearest tenth of a gram if expressed in grams). The sodium content per delivered dose shall follow the heading ''Other information'' as stated in § 201.66(c)(7). Any product subject to this paragraph that contains dibasic sodium phosphate and/or monobasic sodium phosphate as an active ingredient intended for rectal administration and that is not labeled as required by this paragraph and that is initially introduced or initially delivered for introduction into interstate commerce after [date 12 months after date of publication in the **Federal Register**], is misbranded under sections 201(n) and 502(a) and (f) of the act.

Dated: March 15, 2004.

Jeffrey Shuren,

Assistant Commissioner for Policy.

[REG–128309–03]

RIN 1545–BC26

Section 411(d)(6) Protected Benefits

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking and notice of public hearing.

SUMMARY: This document contains proposed regulations providing guidance on the conditions under which a plan amendment may eliminate or reduce an early retirement benefit, a retirement-type subsidy, or an optional form of benefit (section 411(d)(6)(B) protected benefits) with respect to a participant's benefits attributable to service before the amendment. The proposed regulations would also provide guidance concerning how the notice requirements of section 4980F apply with respect to such plan amendments. These proposed regulations would generally affect plan sponsors of, and participants in, qualified retirement plans.

DATES: Written or electronic comments must be received by June 22, 2004.

Requests to speak (with outlines of oral comments to be discussed) at the public hearing scheduled for June 24, 2004, at 10 a.m. must be received by June 3, 2004.

ADDRESSES: Send submissions to: CC:PA:LPD:PR (REG–128309–03), room 5203, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington DC 20044. Submissions may be hand delivered Monday through Friday between the hours of 8 a.m. and 4 p.m. to CC:PA:LPD:PR (REG–128309–03), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC. Alternatively, taxpayers may submit comments electronically to the IRS Internet site at *http://www.irs.gov/regs.* The public hearing will be held in the Auditorium, Internal Revenue Building, 1111 Constitution Avenue NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Concerning the proposed regulations, Pamela R. Kinard at (202) 622–6060; concerning submissions of comments, the hearing, and the requests to be placed on the building access list to attend the hearing, contact Guy Traynor, (202) 622–7180 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed amendments to 26 CFR parts 1 and 54 under sections 411(d)(6) and 4980F of the Internal Revenue Code (Code) and section 204(g) and (h) of the Employee Retirement Income Security Act of 1974 (ERISA). These proposed regulations, when finalized, would revise Treasury regulations § 1.411(d)–3 to reflect changes to section 411(d)(6) made by the Economic Growth and Tax Relief Reconciliation Act of 2001, Public Law 107–16 (115 Stat. 38) (EGTRRA). These proposed regulations would also include rules relating to changes to section 411(d)(6) made by the Retirement Equity Act of 1984, Public Law 98–397 (98 Stat. 1426) (REA). In addition, these proposed regulations would amend § 54.4980F–1(b), Q&A–8, relating to the notice requirement for certain plan amendments that reduce early retirement benefits or retirement-type subsidies.

Section 411(d)(6)(A) provides that a plan is treated as not satisfying the requirements of section 411 if the accrued benefit of a participant is decreased by an amendment of the plan, other than an amendment described in section 412(c)(8) of the Code or section 4281 of ERISA. Section 411(a)(7) generally defines the term ''accrued benefit'' as meaning, for a defined benefit plan, the employee's accrued benefit determined under the plan and, except as provided in section 411(c)(3), expressed in the form of an annual benefit commencing at normal retirement age. Under section 411(c)(3), if an employee's accrued benefit under a defined benefit plan is to be determined as an amount other than an annual benefit commencing at normal retirement age, the employee's accrued benefit is the actuarial equivalent of such benefit.

Section 301(a) of REA amended section 411(d)(6) to add subparagraph (B), which provides that a plan amendment that has the effect of eliminating or reducing an early retirement benefit or a retirement-type subsidy, or eliminating an optional form of benefit, with respect to benefits attributable to service before the amendment is treated as impermissibly reducing accrued benefits. For a retirement-type subsidy, this protection applies only with respect to an employee who satisfies the preamendment conditions for the subsidy (either before or after the amendment). Section 411(d)(6)(B) also authorizes the Secretary to provide, through regulations, that section 411(d)(6)(B) does not apply to any plan amendment that eliminates optional forms of benefit (other than a plan amendment that has the effect of eliminating or reducing an early retirement benefit or a retirement-type subsidy).

On July 11, 1988, final regulations (TD 8212) under section 411(d)(6) were published in the **Federal Register** (53 FR 26050). Section 1.411(d)–4, Q&A–1(a), of the Regulations provides that section 411(d)(6) protects certain benefits, to the extent they have accrued, so that such benefits cannot be reduced or eliminated by plan amendment, except to the extent permitted by regulations. Section 1.411(d)–4 provides rules for when a plan may be amended to reduce or eliminate a section 411(d)(6) protected benefit.

Section 4980F of the Code and section 204(h) of ERISA each require that a plan administrator must give notice of a plan amendment to affected plan participants and beneficiaries when the plan amendment provides for a significant reduction in the rate of future benefit accrual or the elimination or significant reduction in an early retirement benefit or a retirement-type subsidy.

Section 645(b)(1) of EGTRRA amended section 411(d)(6)(B) of the Code to direct the Secretary to issue regulations providing that section 411(d)(6)(B) does not apply to any amendment that reduces or eliminates early retirement benefits or retirement-type subsidies that create significant burdens or complexities for the plan and plan participants unless such amendment adversely affects the rights of any participant in a more than *de minimis* manner. Section 645(b)(2) of EGTRRA also amended section 204(g)(2) of ERISA to include a similar directive for purposes of section 204(g) of ERISA, which provides a rule parallel to section 411(d)(6) of the Code.

Under section 101 of Reorganization Plan No. 4 of 1978 (43 FR 47713), the Secretary of the Treasury has interpretive jurisdiction over the subject matter addressed in these regulations for purposes of ERISA, as well as the Code. Further, section 204(g) of ERISA authorizes the Secretary of the Treasury to issue the regulations under section 204(g) of ERISA, relating to the permissible elimination of optional forms of benefit. Thus, these proposed Treasury regulations issued under sections 411(d)(6) and 4980F of the Code apply as well for purposes of section 204(g) and (h) of ERISA, and respond to the EGTRRA directive for purposes of both section 411(d)(6) of the Code and section 204(g) of ERISA.

In Notice 2002–46 (2002–2 C.B. 96), Treasury and the IRS requested comments regarding the possible approaches for eliminating optional forms of benefit from defined benefit plans, including comments on whether the retention of certain optional forms of benefit under a defined benefit plan results in significant burdens or complexities for plan sponsors and participants, and the conditions under which these optional forms of benefit are of *de minimis* value to plan participants. In Notice 2003–10 (2003–5 I.R.B. 369), Treasury and the IRS announced that regulations would be proposed to provide general guidance relating to early retirement benefits and retirement-type subsidies under section 411(d)(6)(B). Comments were requested on the guidance that should be provided with respect to early retirement benefits and retirement-type subsidies, as well as whether the proposed regulations should permit plan amendments that eliminate or reduce early retirement benefits or retirement-type subsidies that are contingent on unpredictable events. A number of helpful comments were received in response to these notices and those comments were considered in drafting these proposed regulations.

Explanation of Provisions

General Overview

The proposed regulations would implement the provisions of section 645(b)(1) of EGTRRA by permitting the elimination of early retirement benefits, retirement-type subsidies, and optional forms of benefit under a plan which create significant burdens or complexities for the plan and its participants, but only if the elimination does not adversely affect the rights of any participant in a more than *de minimis* manner. These rules relating to the permissible elimination of section 411(d)(6)(B) protected benefits are in addition to the rules permitting elimination of section 411(d)(6) protected benefits under § 1.411(d)–4. These proposed regulations would also include general guidance on section 411(d)(6), including the meaning of terms used therein, the scope of the section 411(d)(6)(A) protection against plan amendments decreasing a participant's accrued benefit, and the scope of the section 411(d)(6)(B) protection for early retirement benefits, retirement-type subsidies, and optional forms of benefit.

Scope of Section 411(d)(6) Protections

The proposed regulations would revise the existing final regulations at § 1.411(d)–3. The rules under those regulations would generally be retained but would be updated to reflect statutory changes such as the elimination of class-year vesting and the enactment of section 411(d)(6)(B).

The proposed regulations also would take into account and respond to judicial decisions interpreting section 411(d)(6) (or its parallel provision at section 204(g) of ERISA).[1] For example, the proposed regulations would provide that section 411(d)(6) protection applies to a participant's entire accrued benefit without regard to whether any portion of that accrued benefit is accrued before a participant's severance from employment or is included in the accrued benefit of the participant pursuant to a plan amendment adopted after the participant's severance from employment.[2]

The proposed regulations would retain the rules in the existing regulations that provide that, for purposes of determining whether or not any participant's accrued benefit is decreased, all plan amendments affecting, directly or indirectly, the computation of accrued benefits are taken into account, and that, in determining whether a reduction has occurred, all amendments with the same applicable amendment date (the later of the adoption date or the effective date) are treated as one plan amendment, and would provide that these rules apply to section 411(d)(6)(B) protected benefits as well. Thus, for example, if there are two amendments with the same applicable amendment date, and one amendment increases accrued benefits and the other amendment decreases the early retirement factors that are used to determine the early retirement annuity, the amendments are treated as one amendment and only violate section 411(d)(6) if the net dollar amount of the early retirement annuity after the two amendments is lower at any point in time than it would have been without the two amendments.[3]

The proposed regulations would also provide that a plan amendment violates the requirements of section 411(d)(6) if it is one of a series of plan amendments made at different times that, when taken together, have the effect of reducing or eliminating a section 411(d)(6) protected benefit in a manner that would otherwise be prohibited if accomplished through a single amendment. The

[2] This is contrary to the analysis in *Board of Trustees of the Sheet Metal Workers' National Pension Fund* v. *C.I.R.*

[3] This is contrary to the analysis in *Michael* v. *Riverside Cement.*

proposed regulations, however, do not address the interaction of the vesting rules in section 411(a) with section 411(d)(6). This topic, which is currently before the Supreme Court in *Central Laborers' Pension Fund* v. *Heinz,* No. 02–891, is instead reserved for future guidance.

The proposed regulations also provide a number of clarifications regarding section 411(d)(6)(B) protected benefits. The proposed regulations would clarify that, if a plan amendment merely replaces an optional form of benefit with another optional form of benefit that is of inherently equal or greater value, the amendment is not to be treated as eliminating an optional form of benefit, or eliminating or reducing an early retirement benefit or retirement-type subsidy. For example, a change in the method of calculating a joint and survivor annuity from using a 90% adjustment factor on account of the survivorship payment at particular ages on the annuity starting date to using a 91% adjustment factor at the same ages on the annuity starting date is not treated as an elimination of an optional form of benefit.

The proposed regulations would reflect the rules in the existing regulation § 1.411(d)–4, Q&A–1(d), that ancillary benefits, other rights or features, and any other benefits not described in section 411(d)(6) are not benefits protected under section 411(d)(6). The definitions of optional form of benefit, ancillary benefit, and other right or feature have been drawn from the definitions in § 1.401(a)(4)–4. In addition the proposed regulations would provide a definition of early retirement benefit, retirement-type benefit, and retirement-type subsidy. *See* the discussion in this preamble under the heading *Retirement-Type Subsidies and Contingent-Event Benefits.*

Permitted Elimination of Benefits That Are Burdensome or Complex and of De Minimis Value to Participants

Section 411(d)(6)(B) of the Code, as amended by EGTRRA, directs the Secretary to issue regulations providing that section 411(d)(6)(B) does not apply to any amendment that reduces or eliminates benefits or subsidies that create significant burdens or complexities for the plan and plan participants unless such amendment adversely affects the rights of any participant in a more than *de minimis* manner.

The EGTRRA Conference Report provides that it is intended that the factors to be considered in determining whether a plan amendment has more than a *de minimis* adverse effect on any participant will include: (1) All of the participant's early retirement benefits, retirement-type subsidies, and optional forms of benefit that are reduced or eliminated by the amendment; (2) the extent to which early retirement benefits, retirement-type subsidies, and optional forms of benefit in effect with respect to a participant after the amendment's effective date provide rights that are comparable to the rights that are reduced or eliminated by the plan amendment; (3) the number of years before the participant attains normal retirement age under the plan (or early retirement age, as applicable); (4) the size of the participant's benefit that is affected by the plan amendment, in relation to the amount of the participant's compensation; and (5) the number of years before the plan amendment is effective. H.R. Conf. Rep. 107–84, at 254 (2001).

The proposed regulations would generally permit an employer to eliminate a section 411(d)(6)(B) protected benefit if the eliminated optional form of benefit is redundant with respect to a retained optional form of benefit. Additional rules would apply to an amendment that, in addition to eliminating an optional form of benefit, also eliminates an early retirement benefit or a retirement-type subsidy. Alternatively, an employer would be permitted to eliminate a section 411(d)(6)(B) protected benefit if the plan amendment was not effective for benefits that begin in the next four years and certain core options are made available to plan participants.

The concepts of allowing an employer to eliminate a redundant optional form of benefit and allowing an employer to eliminate all optional forms of benefit that fall outside a list of core optional forms of benefit were included in suggestions made by commentators who suggested that the elimination of an optional form of benefit would not adversely affect the right of a plan participant in more than a *de minimis* manner as long as the plan offers other optional forms of benefit that are sufficiently similar to the eliminated optional form of benefit. These concepts also reflect factors identified in the legislative history (*e.g.,* the extent to which section 411(d)(6)(B) protected benefits that are available to a participant after the amendment's effective date provide rights that are comparable to the rights of section 411(d)(6)(B) protected benefits that are reduced or eliminated by the plan amendment).

The Treasury and IRS also received comments from practitioners suggesting that the proposed regulations provide a utilization test, which would permit the elimination of an optional form of benefit if the employer can show that the benefit has been utilized rarely by plan participants. These commentators suggested that the lack of utilization is compelling evidence that the elimination of the optional form of benefit would not adversely affect the rights of any plan participant in more than a *de minimis* manner. The Treasury and IRS did not include a utilization test in the proposed regulations because of, among other reasons, the difficulty in applying a utilization standard in situations where there are few retirements (*e.g.,* a small plan).

Under the proposed regulations, the determination of whether the optional forms of benefit that remain after an amendment are sufficiently similar to an eliminated optional form of benefit such that its elimination would not adversely affect the rights of any plan participant in more than a *de minimis* manner depends on a number of factors. These factors include the extent to which the remaining optional forms of benefit provide the same essential characteristics as the eliminated optional form of benefit; whether the remaining optional forms of benefit are available on the same date and are actuarially equivalent to the eliminated optional form of benefit; and the period of time before the eliminated optional form of benefit could have commenced.

The rules in the proposed regulations would require any amendment eliminating an optional form of benefit to have a delayed effective date. This requirement reflects some of the relevant factors listed in the legislative history (*i.e.*, the number of years until the participant reaches retirement age and the number of years until the amendment is effective). A participant's expectations as to which optional forms of benefit will be available are more settled for a participant who is closer to commencing benefits. Therefore, whether any remaining optional form of benefit is sufficiently similar to an eliminated optional form of benefit so that the substitution of one for the other does not adversely affect the right of a plan participant in more than a *de minimis* manner depends in part on how far in the future the participant is expecting to commence benefits.

The Treasury and IRS believe that the proposed regulations would assist plans that have accumulated numerous optional forms of benefits by simplifying plan administration and reducing plan complexity for participants. At the same time, the

proposed regulations would continue to protect the rights of plan participants by not permitting plan amendments that eliminate or reduce an early retirement benefit or a retirement-type subsidy by more than a *de minimis* amount and by protecting the right to elect an optional form of benefit that is most advantageous for a participant with substandard mortality (through inclusion of that form of benefit as a required core option). The rule regarding multiple amendments, discussed above, would preclude the adoption of a series of amendments that, when taken together, constitute an impermissible elimination of a section 411(d)(6)(B) protected benefit. This rule would apply, for example, if a series of amendments were adopted that eliminated a benefit of more than *de minimis* value when considered together, even though each amendment by itself eliminated a benefit of *de minimis* value.

Elimination of Redundant Optional Forms of Benefit

The proposed regulations would provide that a plan may be amended to eliminate an optional form of benefit for a participant with respect to benefits attributable to service before the applicable amendment date if the optional form of benefit is redundant with respect to a retained optional form of benefit and certain other conditions are satisfied. An optional form of benefit is considered redundant with respect to a retained optional form of benefit if the retained optional form of benefit is in the same family of optional forms of benefit as the optional form of benefit being eliminated and the participant's rights with respect to the retained optional form of benefit are not subject to materially greater restrictions than applied to the optional form of benefit being eliminated.

Under the proposed regulations, a plan would be permitted to be amended to eliminate a redundant optional form of benefit for a participant (with respect to benefits attributable to service before the applicable amendment date) only if the plan amendment does not apply to an optional form of benefit with an annuity starting date that is earlier than 90 days after the date the amendment is adopted. In addition, in cases in which the retained optional form of benefit for the participant does not commence on the same annuity starting date as the optional form of benefit that is being eliminated, or, as of the applicable amendment date, the actuarial present value of the retained optional form of benefit is less than the actuarial present value of the optional form of benefit being eliminated, the plan amendment would have to satisfy additional conditions described below.

The proposed regulations would describe 6 basic families of optional forms of benefit—the 50% or more joint and contingent family, the below 50% joint and contingent family, the 10 years or less term certain and life annuity family, the greater than 10 years term certain and life annuity family, the 10 years or less level installment family, and the greater than 10 years level installment family. For this purpose, the determination of whether two optional forms of benefit are in one of the 6 basic families is made without regard to certain differences among enumerated additional features, such as the actuarial factors used to determine the amount of benefits under the optional form of benefit, a social security leveling feature, a refund of employee contributions feature, or a retroactive annuity starting date feature.

Under the proposed regulations, not every optional form of benefit will fit within one of the 6 families listed above. For example, a single-sum distribution option will not be in one of the 6 families listed above and, therefore, the right to receive a single-sum distribution cannot be eliminated under the redundancy rule. However, if there are two optional forms of benefit that do not fit within a family listed above and the only differences between those optional forms of benefit are differences that would be disregarded in determining whether two optional forms of benefits are within the same family (*e.g.*, a single-sum distribution option with and without a retroactive annuity starting date feature), the two optional forms of benefit are treated as members of a separate family.

The proposed regulations would provide that the ability to eliminate redundant optional forms of benefits generally would not apply to optional forms of benefit that are core options (as described below). However, an optional form of benefit that is a core option could be eliminated in favor of a similar retained core option (where the only differences between the eliminated optional form of benefit and the retained optional form of benefit are differences that would be disregarded in determining whether the two optional forms of benefits are within the same family).

The proposed regulations would also provide that, to the extent an optional form of benefit that is being eliminated includes either a social security leveling feature or a refund of employee contributions feature, the retained optional form of benefit must also include that feature, and, to the extent that the optional form of benefit that is being eliminated does not include a social security leveling feature or a refund of employee contributions feature, the retained optional form of benefit must not include that feature. Thus, a plan cannot eliminate an optional form of benefit that includes a refund of employee contributions feature in favor of an optional form of benefit that does not include that feature. Similarly, a plan cannot eliminate an optional form of benefit that includes a social security leveling feature in favor of an optional form of benefit that does not include that feature. However, the plan need not retain social security leveling features that provide for assumed commencement of social security benefits at more than one date.

In addition, the proposed regulations provide that, to the extent an optional form of benefit that is being eliminated is payable without a retroactive annuity starting date feature, the retained optional form of benefit must be payable without that feature. Thus, a plan cannot eliminate an optional form of benefit that is payable without a retroactive annuity starting date feature in favor of an optional form of benefit that is payable only with a retroactive annuity starting date. However, the plan can eliminate an optional form of benefit payable with a retroactive annuity starting date feature in favor of an optional form of benefit that is payable without a retroactive annuity starting date.

Permissible Elimination of Noncore Optional Forms of Benefit Where Core Options Are Offered

As an alternative to the redundancy rule, the proposed regulations would allow a plan amendment to eliminate an optional form of benefit for plan participants with respect to benefits attributable to service before the applicable amendment date if: (1) The plan, after the amendment, offers a designated set of core options to plan participants with respect to benefits attributable to service both before and after the amendment; and (2) the amendment does not apply to participants with annuity starting dates less than four years after the date the amendment is adopted.

The core options are defined in the proposed regulations as a straight life annuity, a 75% joint and contingent annuity, a 10-year certain and life annuity, and the most valuable option for a participant with a short life expectancy. The core options were selected to define a minimum set of

optional forms of benefit that provide participants with a sufficiently broad set of choices to meet participants' essential needs in a wide range of personal circumstances. The 75% joint and contingent annuity has been chosen as a required core option based on a recommendation from the 1994–1996 report of the Advisory Council on Social Security.[4] In that report, the Council recommended that dependent spousal benefits in Social Security be gradually increased to 75% of the combined benefit that the surviving spouse and decedent spouse were receiving when both of the spouses were alive. This recommendation was based on statistical studies concluding that a retired surviving spouse generally needs to receive at least 75% of the amount that the retired couple was receiving in order for the surviving spouse to maintain his or her standard of living.

The Treasury and IRS received comments emphasizing the importance of ensuring that a core set of options include some forms of distribution that would be particularly valuable to a participant whose life expectancy differs from the life expectancy used by the plan for actuarial adjustments. This includes providing an option of a life annuity (valuable for a participant with an above-average life expectancy) and the importance of retaining a single-sum payment option (or the form providing the largest death benefit) for a participant with a below-average life expectancy, such as a participant who retires due to a mortal illness.

In light of the comments received, the proposed regulations would include in the list of core options the most valuable option for a participant with a short life expectancy. This is defined as the optional form of benefit that is reasonably expected to result in payments that have the largest actuarial present value in the case of a participant who dies shortly after the annuity starting date. The proposed regulations would provide a safe harbor method for determining which optional form of benefit under the plan is the most valuable option for a participant with a short life expectancy. Under this safe harbor method, a plan may treat a single-sum distribution option with an actuarial present value that is not less than the actuarial present value of any optional form of benefit being eliminated as the most valuable option for a participant with a short life expectancy. If a plan does not offer such a single-sum distribution option, the plan may treat a joint and contingent annuity with a continuation percentage of at least as great as the highest continuation percentage available before the amendment as the most valuable option for a participant with a short life expectancy, provided that the continuation percentage is at least 75%. In the event a plan has neither a single-sum distribution option nor a joint and contingent annuity with a continuation percentage of at least 75%, the plan may treat a term certain and life annuity with a term certain period of at least 15 years as the most valuable option for a participant with a short life expectancy.

In addition, an employer would not be permitted to use the core options alternative to eliminate a single-sum distribution. An exception applies for a single-sum distribution option with respect to less than 25% of the participant's accrued benefit as of the date that the single-sum distribution option is eliminated. This protection against elimination of a single-sum distribution option is in addition to any protection that might be afforded such option as the most valuable option for a participant with a short life expectancy.

The proposed regulations also would provide that, to the extent an optional form of benefit being eliminated includes either a social security leveling feature or a refund of employee contributions feature, at least one of the core options must also be available with that feature. In addition, to the extent that an optional form of benefit being eliminated does not include a social security leveling feature or a refund of employee contributions feature, each of the core options must be available without that feature.

As with the redundancy rule, if the core options do not commence on the same annuity starting date as the optional form of benefit that is being eliminated, or, as of the applicable amendment date, the actuarial present value of the core option is less than the actuarial present value of the optional form of benefit being eliminated, the plan amendment would have to satisfy additional conditions described below.

Elimination of Early Retirement Benefits and Retirement-Type Subsidies

The proposed regulations would set forth additional requirements that a plan amendment must satisfy if the retained optional form of benefit or each core option does not have the same annuity starting date or has a lower actuarial present value than the optional form of benefit that is being eliminated. Such an amendment would be permitted only if the optional form of benefit creates significant burdens and complexities for the plan and plan participants and the elimination does not adversely affect the rights of any participant in more than a *de minimis* manner. If the additional requirements are satisfied, a plan may be amended to eliminate an optional form of benefit without regard to whether the amendment has the effect of eliminating an early retirement benefit or reducing a retirement-type subsidy. These additional requirements would not apply to an amendment that eliminates an optional form of benefit in a manner that is otherwise permissible under these proposed regulations where both the annuity starting date and the actuarial present value of the retained optional form of benefit are the same as those features of the eliminated optional form of benefit.

The determination of whether a plan amendment eliminates or reduces section 411(d)(6)(B) protected benefits that create significant burdens or complexities for the plan and its participants is based on facts and circumstances. In the case of an amendment that eliminates an early retirement benefit, relevant factors include whether the annuity starting dates under the plan considered in the aggregate are burdensome or complex (*e.g.*, the number of categories of early retirement benefits, whether the terms and conditions applicable to the plan's early retirement benefits are difficult to summarize in a manner that is concise and readily understandable to the average plan participant, and whether those different early retirement benefits were added to the plan as a result of plan mergers, acquisitions, or other business transactions), and whether the effect of the plan amendment is to reduce the number of categories of early retirement benefit. Analogous factors apply in the case of a plan amendment eliminating a retirement-type subsidy or changing actuarial factors.

The proposed regulations would provide a rebuttable presumption for plan amendments that eliminate a set of annuity starting dates or actuarial factors where the annuity starting dates or actuarial factors under the plan considered in the aggregate are burdensome or complex. If this is the case, then elimination of any one item of the relevant category (*i.e.*, annuity starting dates or actuarial factors) is presumed to eliminate section 411(d)(6)(B) protected benefits that create significant burdens or complexities for the plan and its participants. However, if the effect of a plan amendment with respect to a set of

[4] *See* the Report of the 1994–1996 Advisory Council on Social Security, available at *http://www.ssa.gov/history/reports/adcouncil/report/findings.htm.*

optional forms of benefit is merely to substitute one set of annuity starting dates for another set of annuity starting dates (or one set of actuarial factors for another set of actuarial factors), without any reduction in the number of different annuity starting dates (or actuarial factors), then the plan amendment would not be permitted under these regulations.

The generally applicable rules regarding multiple amendments apply to a series of plan amendments that first create burdens and complexities and then later eliminate them. In accordance with these rules, for example, section 411(d)(6)(B) protected benefits are not considered to create burdens and complexities for a plan and its participants if the plan adds a retirement-type subsidy in order to later eliminate another retirement-type subsidy, even if the elimination of the other subsidy would not adversely affect the rights of any plan participant in a more than *de minimis* manner as provided in the regulations.

In the case of a plan amendment eliminating an optional form of benefit under the redundancy rule, the proposed regulations would provide that a plan amendment eliminating the optional form of benefit does not adversely affect the rights of any participant in more than a *de minimis* manner if the retained optional form of benefit has substantially the same annuity starting date as the optional form of benefit that is being eliminated and the actuarial present value of the eliminated optional form of benefit does not exceed the actuarial present value of the retained optional form of benefit by more than a *de minimis* amount. In the case of a plan amendment eliminating an optional form of benefit under the core options rule, the proposed regulations would provide the plan amendment does not adversely affect the rights of any participant in more than a *de minimis* manner if each of the core options is available with substantially the same annuity starting date as the optional form of benefit that is being eliminated and the actuarial present value of the eliminated benefit does not exceed the actuarial present value of any core benefit by more than a *de minimis* amount. For these purposes, the proposed regulations would provide that annuity starting dates are considered substantially the same if they are within six months of each other.

The Conference Report to EGTRRA provides that the intent of the provision authorizing regulations is solely to permit the elimination of early retirement benefits, retirement-type subsidies, or optional forms of benefit that have no more than a *de minimis* effect on any participant but create disproportionate burdens and complexities for a plan and its participants, and provides two examples illustrating this intent. H.R. Conf. Rep. 107–84, at 254–55 (2001). These examples involve a situation in which the acquisition of the employer and subsequent merger of plans results in the maintenance of multiple retirement-type subsidies (including early retirement subsidies) that create disproportionate burdens and complexities for the plan and its participants. Under the first example, for a 25-year-old participant with compensation of $40,000, the Conference Report provides that Treasury regulations could permit the participant's retirement-type subsidy under the plan to be eliminated entirely. For this participant, taking into account all relevant factors, including the value of the benefit, the participant's compensation, and the number of years before eligibility for the subsidy, the participant's subsidy, with a present value of $75, is of *de minimis* value. Under the second example, for a 50-year-old participant with compensation of $40,000, the Conference Report provides that Treasury regulations could permit the participant's retirement-type subsidy with a present value of $10,000 to be replaced with another retirement-type subsidy with a present value of $9,850. The Conference Report provides that the regulations could permit replacement in the retirement-type subsidy (which reduces the value of the participant's subsidy by $150) because the difference in subsidies is *de minimis*. However, the $10,000 subsidy could not be entirely eliminated. *Id.*

Based on these examples, the proposed regulations would provide that a reduction in actuarial present value is of no more than a *de minimis* amount (and hence, the rights of any participant are not adversely affected in a more than *de minimis* manner) if the reduction does not exceed the greater of 2% of the present value of the retirement-type subsidy under the eliminated optional form of benefit (if any) prior to the amendment or 1% of the participant's compensation for the prior plan year (as defined in section 415(c)(3)).

In addition to this numerical test, the proposed regulations would provide a *de minimis* test relating to changes in early retirement and other actuarial adjustment factors. Under this rule, the elimination of an optional form of benefit does not adversely affect the rights of any participant in more than a *de minimis* manner if the amendment does not apply to an annuity starting date before the end of the expected transition period for that optional form of benefit. The expected transition period for an optional form of benefit is the period by the end of which it is reasonable to expect, taking into account future accruals, that the section 411(d)(6)(B) protected benefit being eliminated would be subsumed by another optional form of benefit if the plan amendment limited the optional form of benefit being eliminated to the participant's benefits attributable to service before the applicable amendment date. The expected transition period is thus based on the expected wearaway period.

For purposes of this expected transition rule, the expected transition period must be determined in accordance with reasonable actuarial assumptions about the future that are likely to result in the longest reasonable expected transition period, such as the assumption that the participant's compensation will not increase and that future accruals will not exceed accruals in recent periods. If the plan is subsequently amended to reduce the rate of future benefit accrual (or otherwise to lengthen the expected transition period) before the end of the previously determined expected transition period, the subsequent plan amendment must provide that the elimination of the optional form of benefit is void (or must provide for the effective date to be further extended to a new expected transition date taking into account the subsequent amendment). In addition, a plan amendment eliminating an optional form of benefit using the expected transition rule must be limited to participants who continue employment through the end of the expected transition period.

Advance Notice to Participants

Section 4980F(e) of the Code and section 204(h) of ERISA require notice of an amendment to an applicable pension plan that either provides for a significant reduction in the rate of future benefit accrual or that eliminates or significantly reduces an early retirement benefit or a retirement-type subsidy. *See* § 54.4980F–1 generally. While § 54.4980F–1(b), Q&A–7(b) and 8(c), generally provide that an amendment eliminating an optional form of benefit as permitted under these proposed regulations would not be a significant reduction for which advance notice to participants is required, plan sponsors are reminded that an amendment limiting an early retirement

benefit or retirement-type subsidy to service before the applicable amendment date might be a significant reduction in future benefits for which advance notice is required. Accordingly, advance notice may be required for an amendment permitted under these rules.

These regulations include proposed amendments to the section 4980F regulations clarifying that, for purposes of determining whether an amendment reducing a retirement-type subsidy as permitted under the expected transition period rule is a significant reduction for purposes of section 4980F, the amendment is treated in the same manner as an amendment that limits the retirement-type subsidy to benefits that accrue before the applicable amendment date with respect to the participants (and alternate payees) to whom the reduction is reasonably expected to apply. The proposed changes to the section 4980F regulations also include examples illustrating these rules and clarifying that the effective date of the amendment for purposes of section 4980F(e) of the Code and section 204(h) of ERISA is not the same as the effective date of the reduction.

Retirement-Type Subsidies and Contingent-Event Benefits

Since section 411(d)(6)(B) was added to the Code in REA, questions have arisen as to whether a benefit that is contingent on the occurrence of an unpredictable event—such as a plant shutdown—is a retirement-type subsidy and, thus, protected by section 411(d)(6). Some courts have held that an unpredictable contingent-event benefit is protected, while one has held that it is not.[5]

Notice 2003–10 requested comments on anticipated guidance regarding early retirement benefits and retirement-type subsidies under section 411(d)(6)(B). Notice 2003–10 also stated that regulations addressing subsidies provided upon a plant shutdown would be prospective and that relief from disqualification would be provided.

After reviewing the legislative history, the analysis in the relevant cases, and the submissions of the commentators, Treasury and the IRS have concluded that, if a contingent-event benefit is a retirement-type subsidy, the benefit cannot be reduced or eliminated with respect to service prior to the applicable amendment date without violating section 411(d)(6)(B). The proposed regulations would apply this result without regard to whether the contingent event that triggers the payment of the benefit has or has not occurred prior to the amendment. Thus, the proposed regulations would require the protection of contingent-event benefits that provide retirement-type subsidies under section 411(d)(6)(B) even before the occurrence of the contingency.

The rules under the proposed regulations for determining whether a contingent-event benefit provides a retirement-type subsidy that is protected under section 411(d)(6) or an ancillary benefit that is not protected would be based on the legislative history of REA. The legislative history provides that:

> [T]he term ''retirement-type subsidy'' is to be defined by Treasury regulations. The committee intends that under these regulations, a subsidy that continues after retirement is generally to be considered a retirement-type subsidy. The committee expects, however, that a qualified disability benefit, a medical benefit, a social security supplement, a death benefit (including life insurance), or a plant shutdown benefit (that does not continue after retirement age) will not be considered a retirement-type subsidy. The committee expects that Treasury regulations will prevent the recharacterization of retirement-type benefits as benefits that are not protected [under section 411(d)(6)].[6]

The proposed regulations would provide that ancillary benefits are the benefits listed in the legislative history and other similar benefits that do not affect the payment of the accrued benefit. Thus, if the contingent-event benefit is a plant-shutdown benefit that does not continue beyond retirement age, then the proposed regulations would include the benefit in the definition of ancillary benefits and the contingent-event benefit could be reduced or eliminated without violating section 411(d)(6).

By contrast, the proposed regulations would provide that the payment of an accrued benefit in an optional form or the payment of any other benefit that continues after retirement is a retirement-type benefit (provided that it is not in the list of ancillary benefits set forth in the regulations). Thus, the proposed regulations would provide that if the contingent-event benefit continues beyond retirement (and is not in the list of ancillary benefits set forth in the regulations), the contingent-event benefit would be a retirement-type benefit. To the extent that the retirement-type benefit has a present value in excess of the present value of the accrued benefit, the contingent-event benefit provides a retirement-type subsidy that is protected under section 411(d)(6)(B).

Further, in accordance with the legislative history to REA, the regulations would specifically prohibit an amendment that recharacterizes a retirement-type benefit as an ancillary benefit. Thus, for example, a plan cannot be amended to recharacterize any portion of an early retirement subsidy as a social security supplement that is an ancillary benefit. *See also* § 1.411(d)–4, Q&A–2(c), for rules relating to serial amendments.

Proposed Effective Date

These regulations are proposed to be applicable to amendments adopted on or after the date of the publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**. These proposed regulations cannot be relied upon until they are adopted in final form. When these regulations are finalized, the IRS, under its general authority in section 7805(b), will not treat a plan as failing to satisfy the requirements of sections 401 and 411 merely because of a plan amendment that eliminates or reduces an early retirement benefit or retirement-type subsidy that is conditioned on the occurrence of an unpredictable contingent event (within the meaning of section 412(l)) if the amendment is adopted and effective prior to the occurrence of the contingent event and prior to the finalization of these proposed regulations.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866. Therefore a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations. This notice of proposed rulemaking does not impose a collection of information on small entities, thus the Regulatory Flexibility

LEXIS 13166, 31 Employee Benefit Cas. (BNA) 1473 (S.D. Ind. July 22, 2003) (plant shutdown benefit is a retirement-type subsidy protected by the anticutback rule because the benefit continues beyond normal retirement age and the amount of the benefit exceeds the actuarially reduced normal retirement benefit); with *Ross* v. *Pension Plan for Hourly Employees of SKF Industries, Inc.,* 847 F. 2d 329 (6th Cir. 1988) (plant shutdown benefit is not a retirement-type subsidy).

[6] S. Rep. No. 98–575, at 26 (1984).

Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f) of the Code, these proposed regulations will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written comments (a signed original and eight (8) copies) or electronic comments that are submitted timely to the IRS. The Treasury and IRS specifically request comments on the clarity of the proposed rules and how they can be made easier to understand. All comments will be available for public inspection and copying.

Comments are also requested on the following issues:

- Whether there should be additional families of optional forms of benefit besides the six families listed in the redundancy rule at § 1.411(d)–3(c)(4);
- Whether the core options, including the specification of the most valuable option for a participant with a short life expectancy, are sufficient to protect the value of benefit distribution options in a broad range of personal circumstances, such as for a participant with substandard mortality;
- Whether the rules in § 1.411(d)–3(e) permitting the reduction of present value through changes in actuarial factors are administrable and sufficiently protective of participants' interests;
- Whether the expected transition period rule should be permitted to apply to a participant who severs employment during the expected transition period (and who satisfies the pre-amendment conditions for the optional form of benefit) if the optional form of benefit being eliminated (or a comparable optional form of benefit with at least the same present value) is available before the end of the expected transition period and the former employee receives written notice describing the effect of the amendment before the amendment becomes applicable.
- How to determine whether a benefit, including a contingent-event benefit, continues after retirement (or retirement age);
- The extent to which plant-shutdown benefits that do not continue after retirement age are permitted to be provided in a qualified plan (*e.g.*, whether such benefits are limited to payments payable before the plan's earliest retirement age or are the benefits limited to amounts that are less than the expected social security benefit or, alternatively, the normal retirement benefit); and
- What other benefits (*e.g.*, involuntary termination benefits) that do not continue after retirement age and which are similar to the benefits listed as ancillary in the legislative history should be considered ancillary and should be permitted to be provided in a qualified plan.

A public hearing has been scheduled for June 24, 2004, beginning at 10 a.m. in the Auditorium, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC. Due to building security procedures, visitors must enter at the main entrance, located at 1111 Constitution Avenue, NW. In addition, all visitors must present photo identification to enter the building. Because of access restrictions, visitors will not be admitted beyond the immediate entrance area more than 30 minutes before the hearing starts. For information about having your name placed on the building access list to attend the hearing, *see* the **FOR FURTHER INFORMATION CONTACT** portion of this preamble.

The rules of 26 CFR 601.601(a)(3) apply to the hearing. Persons who wish to present oral comments must submit written or electronic comments and an outline of the topics to be discussed and time to be devoted to each topic (signed original and eight (8) copies) by June 3, 2004. A period of 10 minutes will be allotted to each person for making comments. An agenda showing the scheduling of the speakers will be prepared after the deadline for receiving comments has passed. Copies of the agenda will be available free of charge at the hearing.

Drafting Information

The principal author of these proposed regulations is Pamela R. Kinard, Office of Division Counsel/ Associate Chief Counsel (Tax Exempt and Government Entities), Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in their development.

List of Subjects

26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

26 CFR Part 54

Excise taxes, Pensions, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR parts 1 and 54 are proposed to be amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 is amended by adding entries to read, in part, as follows:

Authority: 26 U.S.C. 7805 * * *

Section 1.411(d)–3 also issued under 26 U.S.C. 411(d)(6) and section 645(b) of the Economic Growth and Tax Relief Reconciliation Act of 2001, Pub. L. 107–16 (115 Stat. 38).* * *

Par. 2. Section 1.411(d)–3 is revised to read as follows:

§ 1.411(d)–3 Section 411(d)(6) protected benefits.

(a) *Protection of accrued benefits*—(1) *General rule.* Under section 411(d)(6)(A), a plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) if a plan amendment decreases the accrued benefit of any plan participant, except as provided in section 412(c)(8), section 4281 of the Employee Retirement Income Security Act of 1974 as amended (ERISA), or other applicable law (*e.g.*, section 1541(a)(2) of the Taxpayer Relief Act of 1997 (Pub. L. 105–34, 111 Stat. 788, 1085)). For purposes of this section, a plan amendment includes any changes to the terms of a plan and includes a plan termination. The protection of section 411(d)(6) applies to a participant's entire accrued benefit without regard to whether any portion of that accrued benefit is accrued before a participant's severance from employment or is included in the accrued benefit of the participant pursuant to a plan amendment adopted after the participant's severance from employment.

(2) *Plan provisions taken into account*—(i) *Direct and indirect reduction in accrued benefit.* For purposes of determining whether or not any participant's accrued benefit is decreased, amendments to all the provisions of a plan affecting, directly or indirectly, the computation of accrued benefits are taken into account. Plan provisions indirectly affecting accrued benefits include, for example, provisions relating to years of service and compensation.

(ii) *Amendments effective on the same applicable amendment date.* In determining whether a reduction in accrued benefit has occurred, all amendments with the same applicable amendment date are treated as one plan amendment. Thus, if there are two

amendments with the same applicable amendment date, and one amendment, standing alone, increases benefits and the other amendment, standing alone, decreases benefits, the amendments are treated as one amendment and will only violate section 411(d)(6) if the net effect is to decrease the accrued benefit on that date for any participant.

(iii) *Multiple amendments.* A plan amendment violates the requirements of section 411(d)(6) if it is one of a series of plan amendments made at different times that, when taken together, have the effect of reducing or eliminating a section 411(d)(6) protected benefit in a manner that would be prohibited by section 411(d)(6) if accomplished through a single amendment.

(3) *Application of section 411(a) nonforfeitability provisions with respect to section 411(d)(6) protected benefits.* [Reserved].

(4) *Examples.* The following examples illustrate the application of this paragraph (a):

Example 1. (i) *Facts.* Plan A provides an annual benefit of 2% of career average pay times years of service commencing at normal retirement age (age 65). Plan A is amended on November 1, 2004, effective as of January 1, 2005, to provide for an annual benefit of 1.3% of final pay times years of service, with final pay computed as the average of a participant's highest 3 consecutive years of compensation. As of January 1, 2005, Participant M has 16 years of service, his career average pay is $37,500, and the average of his highest 3 consecutive years of compensation is $67,308. Thus, M's accrued benefit as of the effective date of the amendment is increased from $12,000 per year at normal retirement age (2% times $37,500 times 16 years of service) to $14,000 per year at normal retirement age (1.3% times $67,308 times 16 years of service). As of January 1, 2005, Participant N has 6 years of service, his career average pay is $50,000, and the average of his highest 3 consecutive years of compensation is $51,282. Participant N's accrued benefit as of the applicable amendment date is decreased from $6,000 per year at normal retirement age (2% times $50,000 times 6 years of service) to $4,000 per year at normal retirement age (1.3% times $51,282 times 6 years of service).

(ii) *Conclusion.* The plan amendment fails to satisfy the requirements of section 411(d)(6)(A) because the amendment decreases the accrued benefit of Participant N below the level of the accrued benefit of Participant N immediately before the applicable amendment date.

Example 2. (i) *Facts.* The facts are the same as *Example 1* except that Plan A includes a provision under which Participant N's accrued benefit cannot be less than what it was immediately before the amendment (so that Participant N's accrued benefit could not be less than $6,000 per year at normal retirement age).

(ii) *Conclusion.* The amendment does not violate the requirements of section 411(d)(6)(A) with respect to Participant N (although Participant N would not accrue any benefits until the point in time at which the new formula amount would exceed the amount payable under the minimum provision, approximately 3 years after the amendment becomes effective).

(b) *Protection of section 411(d)(6)(B) protected benefits*—(1) *General rule*—(i) *Prohibition against plan amendments eliminating or reducing section 411(d)(6)(B) protected benefits.* A plan is treated as decreasing an accrued benefit if it is amended to eliminate or reduce a section 411(d)(6)(B) protected benefit as defined in paragraph (f)(4) of this section, except as provided in this section. This paragraph (b)(1) applies to participants who satisfy (either before or after the plan amendment) the pre-amendment conditions for the section 411(d)(6)(B) protected benefit.

(ii) *Contingent benefits.* The rule of paragraph (b)(1)(i) of this section applies to participants who satisfy (either before or after the plan amendment) the pre-amendment conditions for the section 411(d)(6)(B) protected benefit even if the condition on which the eligibility for the section 411(d)(6)(B) protected benefit depends is an unpredictable event (*e.g.,* a plant shutdown).

(iii) *Application of general rules.* For purposes of determining whether or not any participant's section 411(d)(6)(B) protected benefit is eliminated or reduced, the rules of paragraph (a) of this section apply to section 411(d)(6)(B) protected benefits in the same manner as they apply to benefits described in section 411(d)(6)(A). As an example of the application of paragraph (a)(2)(ii) of this section to section 411(d)(6)(B) protected benefits, if there are two amendments with the same applicable amendment date, and one amendment increases accrued benefits and the other amendment decreases the early retirement factors that are used to determine the early retirement annuity, the amendments are treated as one amendment and only violate section 411(d)(6) if the net dollar amount of the early retirement annuity after the two amendments is lower at any point in time than it would have been without the two amendments. As an example of the application of paragraph (a)(2)(iii) of this section to section 411(d)(6)(B) protected benefits, a series of amendments that, when taken together, have the effect of reducing or eliminating early retirement benefits or retirement-type subsidies in a manner that adversely affects the rights of any participant in more than a *de minimis* manner violates section 411(d)(6)(B) even if each amendment would be permissible pursuant to paragraphs (c) through (e) of this section.

(2) *Permissible elimination of section 411(d)(6)(B) protected benefits*—(i) *In general.* A plan may be amended to eliminate a section 411(d)(6)(B) protected benefit if the elimination is in accordance with section 411(d)(6)(C), (D), or (E), paragraph (c) or (d) of this section, or § 1.411(d)–4.

(ii) *Increases in payment amounts do not eliminate an optional form of benefit.* If a plan amendment merely replaces an optional form of benefit with another optional form of benefit that is of inherently equal or greater value (within the meaning of § 1.401(a)(4)–4(d)(4)(i)(A)), the amendment is not to be treated as eliminating an optional form of benefit, or eliminating or reducing an early retirement benefit or retirement-type subsidy. Thus, for example, a change in the method of calculating a joint and survivor annuity from using a 90% adjustment factor on account of the survivorship payment at particular ages on the annuity starting date to using a 91% adjustment factor at the same ages on the annuity starting date is not treated as an elimination of an optional form of benefit.

(3) *Permissible elimination of benefits that are not section 411(d)(6) protected benefits*—(i) *In general.* Section 411(d)(6) does not provide protection for benefits that are ancillary benefits, other rights and features, or any other benefits that are not described in section 411(d)(6). See § 1.411(d)–4, Q&A–1(d). However, a plan may not be amended to recharacterize a retirement-type benefit as an ancillary benefit. Thus, for example, a plan amendment to recharacterize any portion of an early retirement subsidy as a Social Security supplement that is an ancillary benefit violates section 411(d)(6).

(ii) *No protection for future benefit accruals.* Section 411(d)(6) only protects benefits that accrue before the applicable amendment date. Thus, a plan may be amended to eliminate or reduce an early retirement benefit, a retirement-type subsidy, or an optional form of benefit with respect to benefits not yet accrued on the applicable amendment date without violating section 411(d)(6). However, section 4980F(e) of the Internal Revenue Code and section 204(h) of ERISA require notice of an amendment to an applicable pension plan that either provides for a significant reduction in the rate of future benefit accrual or that eliminates or significantly reduces an early retirement benefit or a retirement-type subsidy. *See* § 54.4980F–1 of this chapter generally, and *see* § 54.4980F–

1(b), Q&A–7(b) and Q&A–8(c), with respect to whether such notice is required for a reduction in an early retirement benefit or retirement-type subsidy permitted under section 411(d)(6)(B).

(c) *Permissible elimination of optional forms of benefit that are redundant*—(1) *General rule.* Except as otherwise provided in paragraph (c)(5) of this section, a plan may be amended to eliminate an optional form of benefit for a participant with respect to benefits accrued before the applicable amendment date if—

(i) The optional form of benefit is redundant with respect to a retained optional form of benefit, within the meaning of paragraph (c)(2) of this section;

(ii) The plan amendment is not applicable with respect to an optional form of benefit with an annuity starting date that is less than 90 days after the date the amendment is adopted; and

(iii) In any case in which the retained optional form of benefit for the participant does not commence on the same annuity starting date as the optional form of benefit that is being eliminated or, as of the applicable amendment date, the actuarial present value of the retained optional form of benefit for the participant is less than the actuarial present value of the optional form of benefit that is being eliminated, the requirements of paragraph (e) of this section are satisfied.

(2) *Similar types of optional forms of benefit are redundant*—(i) *General rule.* An optional form of benefit is redundant with respect to a retained optional form of benefit if—

(A) The retained optional form of benefit is available to the participant;

(B) The retained optional form of benefit is in the same family of optional forms, within the meaning of paragraphs (c)(3) and (4) of this section, as the optional form of benefit being eliminated; and

(C) A participant's rights with respect to the retained optional form of benefit are not subject to materially greater restrictions (such as conditions relating to eligibility, restrictions on a participant's ability to designate the person who is entitled to benefits following the participant's death, or restrictions on a participant's right to receive an in-kind distribution) than applied to the optional form of benefit being eliminated.

(ii) *Special rule for core options.* An optional form of benefit that is a core option may not be eliminated as a redundant benefit under the rules of this paragraph (c) unless the retained optional form of benefit and the eliminated core option are identical except for differences described in paragraph (c)(3)(ii) of this section. Thus, for example, a particular 10-year certain and life annuity may not be eliminated by plan amendment unless the retained optional form of benefit is another 10-year certain and life annuity.

(3) *Family of optional forms of benefit*—(i) *In general.* Paragraph (c)(4) of this section describes certain families of optional forms of benefits. Not every optional form of benefit that is offered under a plan necessarily fits within a family as described in paragraph (c)(4) of this section. Each optional form of benefit that is not included in any particular family listed in paragraph (c)(4) of this section is in a separate family with other optional forms of benefit that would be identical to that optional form of benefit but for differences that are described in paragraph (c)(3)(ii) of this section.

(ii) *Certain differences among optional forms of benefit*—(A) *Differences in actuarial factors and annuity starting dates.* The determination of whether two optional forms of benefit are within a family of optional forms of benefit is made without regard to the actuarial factors that are used to determine the amount of the distributions under those optional forms of benefit and without regard to annuity starting dates. For example, if a plan has a single-sum distribution option that is calculated using a 5% interest rate and a specific mortality table and another single-sum distribution option that is calculated using the applicable interest rate as defined in section 417(e)(3)(A)(ii)(II) and the applicable mortality table as defined in section 417(e)(3)(A)(ii)(I), both single-sum distribution options are in the same family under the rules of paragraph (c)(3)(i) of this section.

(B) *Differences in Social Security leveling features, refund of employee contributions features, and retroactive annuity starting date features.* Two optional forms of benefit that are identical except with respect to Social Security leveling features, refund of employee contributions features, or retroactive annuity starting date features are treated as members of the same family of optional forms of benefit. But see paragraph (c)(5) of this section for special rules relating to Social Security leveling, refund of employee contributions, and retroactive annuity starting date features in optional forms of benefit.

(4) *List of families.* The following are families of optional forms of benefit for purposes of this paragraph (c):

(i) *Joint and contingent options with continuation percentages of 50% to 100%.* An optional form of benefit is within the 50% or more joint and contingent family if it provides a life annuity to the participant and a survivor annuity to an individual that is at least 50% and no more than 100% of the annuity provided to the participant. An optional form of benefit is within the 50% or more joint and contingent family without regard to whether the form of benefit includes a term certain provision, a pop-up provision (under which payments increase upon the death of the beneficiary or another event that causes the beneficiary not to be entitled to a survivor annuity), or a cash refund feature (under which payment is provided upon the death of the last annuitant in an amount equal to the excess of the present value of the annuity at the annuity starting date over the total of payments before the death of the last annuitant).

(ii) *Joint and contingent options with continuation percentages less than 50%.* An optional form of benefit is within the below 50% joint and contingent family if it provides a life annuity to the participant and a survivor annuity to an individual that is no more than 50% of the annuity provided to the participant. An optional form of benefit is within the below 50% joint and contingent family without regard to whether the form of benefit includes a term certain provision, a pop-up provision (under which payments increase upon the death of the beneficiary or another event that causes the beneficiary not to be entitled to a survivor annuity), or a cash refund feature (under which payment is provided upon the death of the last annuitant in an amount equal to the excess of the present value of the annuity at the annuity starting date over the total of payments before the death of the last annuitant).

(iii) *Term certain and life annuity options with a term of 10 years or less.* An optional form of benefit is within the 10 years or less term certain and life family if it is a life annuity with a guarantee that payments will continue to the participant's designated beneficiary for the remainder of a fixed period that is not in excess of 10 years if the participant dies before the end of the fixed period.

(iv) *Term certain and life annuity options with a term in excess of 10 years.* An optional form of benefit is within the greater than 10 years term certain and life family if it is a life annuity with a guarantee that payments will continue to the participant's designated beneficiary for the remainder of a fixed period that is in excess of 10

years if the participant dies before the end of the fixed period.

(v) *Level installment payment options over a period of 10 years or less.* An optional form of benefit is within the 10 years or less installment family if it provides for substantially level payments to the participant for a fixed period of at least two years with a guarantee that payments will continue to the participant's beneficiary for the remainder of the fixed period not in excess of 10 years if the participant dies before the end of the fixed period.

(vi) *Level installment payment options over a period of more than 10 years.* An optional form of benefit is within the greater than 10 years installment family if it provides for substantially level payments to the participant for a fixed period with a guarantee that payments will continue to the participant's beneficiary for the remainder of a fixed period that is in excess of 10 years if the participant dies before the end of the fixed period.

(5) *Special rules for certain features included in optional forms of benefit.* For purposes of applying this paragraph (c), to the extent an optional form of benefit that is being eliminated includes either a social security leveling feature or a refund of employee contributions feature, the retained optional form of benefit must also include that feature, and to the extent that the optional form of benefit that is being eliminated does not include a social security leveling feature or a refund of employee contributions feature, the retained optional form of benefit must not include that feature. For purposes of applying this paragraph (c), to the extent an optional form of benefit that is being eliminated does not include a retroactive annuity starting date feature, the retained optional form of benefit must not include the feature.

(d) *Permissible elimination of noncore optional forms of benefit where core options are offered*—(1) *General rule.* Except as otherwise provided in paragraph (d)(2) of this section, a plan may be amended to eliminate an optional form of benefit for a participant with respect to benefits attributable to service before the applicable amendment date if—

(i) After the amendment, each of the core options described in paragraph (f)(3) of this section is available to the participant with respect to benefits attributable to service before and after the amendment;

(ii) The plan amendment is not applicable with respect to an optional form of benefit with an annuity starting date that is less than four years after the date the amendment is adopted; and

(iii) In any case in which all of the core options are not available commencing on the same annuity starting date as each optional form of benefit that is being eliminated or, as of the applicable amendment date, the actuarial present value of the benefit payable under any of the core options with the same annuity starting date is less than the actuarial present value of benefits payable under the optional form of benefit that is being eliminated, the requirements of paragraph (e) of this section are satisfied.

(2) *Special rules*—(i) *Treatment of certain features included in optional forms of benefit.* For purposes of applying this paragraph (d), to the extent an optional form of benefit that is being eliminated includes either a social security leveling feature or a refund of employee contributions feature, at least one of the core options must also be available with that feature, and, to the extent that the optional form of benefit that is being eliminated does not include a social security leveling feature or a refund of employee contributions feature, each of the core options must be available without that feature. For purposes of applying this paragraph (d), to the extent an optional form of benefit that is being eliminated does not include a retroactive annuity starting date feature, each of the core options must be available without that feature.

(ii) *Eliminating the most valuable option for a participant with a short life expectancy.* For purposes of applying this paragraph (d), if the most valuable option for a participant with a short life expectancy as described in paragraph (f)(3)(i)(D) of this section is eliminated, then, after the plan amendment, an optional form of benefit that is identical, except for differences described in paragraph (c)(3)(ii) of this section, must be available to the participant. However, such a plan amendment cannot eliminate a refund of employee contributions feature from the most valuable option for a participant with a short life expectancy.

(iii) *Single-sum distributions.* A plan amendment is not treated as satisfying this paragraph (d) if it eliminates an optional form of benefit that includes a single-sum distribution that applies with respect to at least 25% of the participant's accrued benefit as of the date the optional form of benefit is eliminated. But *see* § 1.411(d)–4, Q&A–2(b)(2)(v), relating to involuntary single-sum distributions for benefits with a present value not in excess of the maximum dollar amount in section 411(a)(11).

(e) *Permissible plan amendments under paragraphs (c) and (d) eliminating or reducing section 411(d)(6)(B) protected benefits that are burdensome and of de minimis value*—(1) *In general.* A plan amendment that, pursuant to paragraph (c)(1)(iii) or (d)(1)(iii) of this section, is required to satisfy this paragraph (e) satisfies this paragraph (e) if—

(i) The amendment eliminates section 411(d)(6)(B) protected benefits that create significant burdens or complexities for the plan and its participants as described in paragraph (e)(2) of this section; and

(ii) The amendment does not adversely affect the rights of any participant in a more than *de minimis* manner as described in paragraph (e)(3) of this section.

(2) *Plan amendments eliminating section 411(d)(6)(B) protected benefits that create significant burdens and complexities*—(i) *Facts and circumstances analysis.* The determination of whether a plan amendment eliminates section 411(d)(6)(B) protected benefits that create significant burdens or complexities for the plan and its participants is based on facts and circumstances. In the case of an amendment that eliminates an early retirement benefit, relevant factors include whether the annuity starting dates under the plan considered in the aggregate are burdensome or complex (*e.g.*, the number of categories of early retirement benefits, whether the terms and conditions applicable to the plan's early retirement benefits are difficult to summarize in a manner that is concise and readily understandable to the average plan participant, and whether those different early retirement benefits were added to the plan as a result of plan mergers, acquisitions, or other business transactions), and whether the effect of the plan amendment is to reduce the number of categories of early retirement benefit. Similarly, in the case of a plan amendment eliminating a retirement-type subsidy or changing actuarial factors, relevant factors include whether the actuarial factors used for determining benefit distributions available in otherwise identical forms of benefit under the plan considered in the aggregate are burdensome or complex (*e.g.*, the number of different retirement-type subsidies and other actuarial factors available under the plan, whether the terms and conditions applicable to the plan's retirement-type subsidies are difficult to summarize in a manner that is concise and readily understandable to the average plan participant, and

whether those different retirement-type subsidies and other actuarial factors were added to the plan as a result of plan mergers, acquisitions, or other business transactions), and whether the effect of the plan amendment is to reduce the number of categories of retirement-type subsidies or other actuarial factors.

(ii) *Presumption for certain amendments.* If the annuity starting dates under the plan considered in the aggregate are burdensome or complex, then elimination of any one of the annuity starting dates is presumed to eliminate section 411(d)(6)(B) protected benefits that create significant burdens or complexities for the plan and its participants. However, if the effect of a plan amendment with respect to a set of optional forms of benefit is merely to substitute one set of annuity starting dates for another set of annuity starting dates, without any reduction in the number of different annuity starting dates, then the plan amendment does not satisfy the requirements of paragraph (e) of this section. Similarly, if the actuarial factors used for determining benefit distributions available in otherwise identical forms of benefit under the plan considered in the aggregate are burdensome or complex, then elimination of any one set of actuarial factors is presumed to eliminate section 411(d)(6)(B) protected benefits that create significant burdens or complexities for the plan and its participants. However, if the effect of a plan amendment with respect to a set of optional forms of benefit is merely to substitute one set of actuarial factors for another set of actuarial factors, without any reduction in the number of different actuarial factors, then the plan amendment does not satisfy the requirements of paragraph (e) of this section.

(iii) *Restrictions against creating burdens or complexities.* See paragraph (b)(1)(ii) of this section for general rules applicable to multiple amendments. In accordance with these rules, for example, section 411(d)(6)(B) protected benefits are not considered to create burdens and complexities for a plan and its participants if the plan adds a retirement-type subsidy in order to later eliminate another retirement-type subsidy, even if the elimination of the other subsidy would not adversely affect the rights of any plan participant in a more than *de minimis* manner as provided in paragraph (e)(3) of this section.

(3) *Elimination of early retirement benefits or retirement-type subsidies that are de minimis*—(i) *Rules for retained optional forms of benefit under paragraph (c) of this section.* For purposes of paragraph (c) of this section, the elimination of an optional form of benefit does not adversely affect the rights of any participant in a more than *de minimis* manner if—

(A) The retained optional form of benefit described in paragraph (c) of this section has substantially the same annuity starting date as the optional form of benefit that is being eliminated, as described in paragraph (e)(4) of this section; and

(B) Either the actuarial present value of the benefit payable in the optional form of benefit that is being eliminated does not exceed the actuarial present value of the benefit payable in the retained optional form of benefit by more than a *de minimis* amount, as described in paragraph (e)(5) of this section, or the amendment satisfies the requirements of paragraph (e)(6) of this section relating to a delayed effective date.

(ii) *Rules for core options under paragraph (d) of this section.* For purposes of paragraph (d) of this section, the elimination of an optional form of benefit does not adversely affect the rights of any participant in a more than *de minimis* manner if, with respect to each of the core options—

(A) The core option is available after the amendment with substantially the same annuity starting date as the optional form of benefit that is being eliminated, as described in paragraph (e)(4) of this section; and

(B) Either the actuarial present value of the benefit payable in the optional form of benefit that is being eliminated does not exceed the actuarial present value of the benefit payable under the core option by more than a *de minimis* amount, as described in paragraph (e)(5) of this section, or the amendment satisfies the requirements of paragraph (e)(6) of this section.

(4) *Definition of substantially the same annuity starting dates.* For purposes of applying paragraphs (e)(3)(i)(A) and (ii)(A) of this section, annuity starting dates are considered substantially the same if they are within six months of each other.

(5) *Definition of de minimis difference in actuarial present value.* For purposes of applying paragraphs (e)(3)(i)(B) and (ii)(B) of this section, a difference in actuarial present value between the optional form of benefit being eliminated and the retained optional form of benefit or core option is of no more than a *de minimis* amount if, as of the applicable amendment date, the difference between the actuarial present value of the eliminated optional form of benefit and the actuarial present value of the retained optional form of benefit or core option is not more than the greater of—

(i) 2% of the present value of the retirement-type subsidy under the eliminated optional form of benefit (if any) prior to the amendment; or

(ii) 1% of the participant's compensation for the prior plan year (as defined in section 415(c)(3)).

(6) *Delayed effective date*—(i) *General rule.* For purposes of applying paragraph (e)(3) of this section, an amendment that eliminates an optional form of benefit satisfies the requirements of this paragraph (e)(6) if the elimination of the optional form of benefit is not applicable to any annuity starting date before the end of the expected transition period for that optional form of benefit.

(ii) *Determination of expected transition period.* The expected transition period for an optional form of benefit is the period that begins when the amendment is adopted and ends when it is reasonable to expect, with respect to a section 411(d)(6)(B) protected benefit (*i.e.* not taking into account future service), that the form being eliminated would be subsumed by another optional form of benefit (after taking into account expected future accruals). For this purpose, the expected transition period must be determined in accordance with reasonable actuarial assumptions about the future that are likely to result in the longest period of time until the eliminated optional form of benefit would be subsumed, such as the assumption that the participant's compensation will not increase and that future accruals will not exceed accruals in recent periods. In addition, if the plan is subsequently amended to reduce the rate of future benefit accrual (or otherwise to lengthen the expected transition period) before the end of the previously determined expected transition period, the later plan amendment must provide that the elimination of the optional form of benefit is void (or must provide for the effective date to be further extended to a new expected transition date that satisfies this paragraph (e)(6) taking into account the subsequent amendment).

(iii) *Applicability of the delayed effective date rule limited to employees who continue to accrue benefits through the end of expected transition period.* An amendment eliminating an optional form of benefit under this paragraph (e)(6) must be limited to participants who continue to accrue benefits under the plan through the end of the expected transition period. Thus, for example, the plan amendment may not apply to any participant who has a severance from

employment during the expected transition period.

(iv) *Special rule for section 204(h) notice. See* § 54.4980F–1(b), Q&A–8(c), of this chapter for a special rule relating to this paragraph (e)(6).

(f) *Definitions and use of terms*—(1) *Ancillary benefit.* An *ancillary benefit* means a social security supplement (other than a QSUPP as defined in § 1.401(a)(4)–12), a disability benefit not in excess of a qualified disability benefit described in section 411(a)(9), an ancillary life insurance or health insurance benefit, a death benefit under a defined contribution plan, a preretirement death benefit under a defined benefit plan, a plant shutdown benefit that does not continue past retirement age, or any other similar benefit that does not affect the payment of the accrued benefit. *See* §§ 1.401–1(b)(1)(i), (ii), and (iii) and 1.401(a)(4)–4(e)(2).

(2) *Applicable amendment date.* The term *applicable amendment date* means, with respect to a plan amendment, the later of the effective date of the amendment or the date the amendment is adopted.

(3) *Core options*—(i) *General rule.* The *core options* in a plan are—

(A) A straight life annuity under which the participant is entitled to a level life annuity with no benefit payable after the participant's death;

(B) A joint and contingent annuity under which the participant is entitled to a life annuity with a survivor annuity for the individual designated by the participant (whether or not the participant's spouse) that is 75% of the amount payable during the participant's life;

(C) A 10-year certain and life annuity under which the participant is entitled to a life annuity with a guarantee that payments will continue to any person designated by the participant for the remainder of a fixed period of 10 years if the participant dies before the end of the 10-year period; and

(D) The most valuable option for a participant with a short life expectancy (as defined in paragraph (f)(3)(iv) of this section).

(ii) *Treatment of similar core options with different actuarial factors and annuity starting dates.* Except for core options described in paragraph (f)(3)(i)(D) of this section, whether an option is a core option is determined without regard to the actuarial factors that are used to determine the amount of the distributions under those optional forms and without regard to annuity starting dates. Thus, two core options that are described in paragraph (f)(3)(i)(A), or (B) or (C) of this section are not different core options solely because the core options start on different annuity starting dates.

(iii) *Modification of core options to satisfy other requirements.* An annuity does not fail to be a joint and contingent annuity described in paragraph (f)(3)(i)(B) of this section or a 10-year certain and life annuity described in paragraph (f)(3)(i)(C) of this section as a result of differences to comply with applicable law, such as limitations on death benefits to comply with the incidental benefit requirement of § 1.401–1(b)(1)(i) or on account of the spousal consent rules of section 417.

(iv) *The most valuable option for a participant with a short life expectancy*—(A) *General definition.* Except as provided in paragraph (f)(3)(iv)(B) of this section, *the most valuable option for a participant with a short life expectancy* means the optional form of benefit, for each annuity starting date, that is reasonably expected to result in payments that have the largest actuarial present value in the case of a participant who dies shortly after the annuity starting date, taking into account both payments due to the participant prior to the participant's death and any payments due after the participant's death. For this purpose, a plan is permitted to assume that the spouse of the participant is the same age as the participant. In addition, a plan is permitted to assume that the optional form of benefit that is the most valuable option for a participant with a short life expectancy when the participant is age 70½ also is the most valuable option for a participant with a short life expectancy at all older ages, and that the most valuable option for a participant with a short life expectancy at age 55 is the most valuable option for a participant with a short life expectancy at all younger ages.

(B) *Safe harbor hierarchy*—(*1*) A plan may treat a single-sum distribution option with an actuarial present value that is not less than the actuarial present value of any optional form of benefit eliminated by the plan amendment as the most valuable option for a participant with a short life expectancy for each annuity starting date if it is available at all annuity starting dates, without regard to whether the option was available before the plan amendment.

(*2*) If a plan before the amendment does not offer a single-sum distribution option as described in paragraph (f)(3)(iv)(B)(*1*) of this section, a plan may treat a joint and contingent annuity with a continuation percentage that is at least 75% and that is at least as great as the highest continuation percentage available before the amendment as the most valuable option for a participant with a short life expectancy for each annuity starting date if it is available at all annuity starting dates, without regard to whether the option was available before the plan amendment.

(*3*) If the plan before the amendment offers neither a single-sum distribution option as described in paragraph (f)(3)(iv)(B)(*1*) of this section nor a joint and contingent annuity with a continuation percentage as described in paragraph (f)(3)(iv)(B)(*2*) of this section, a plan may treat a term certain and life annuity with a term certain period no less than 15 years as the most valuable option for a participant with a short life expectancy for each annuity starting date if it is available at all annuity starting dates, without regard to whether the option was available before the plan amendment.

(4) *Definitions of types of section 411(d)(6)(B) protected benefits*—(i) *Early retirement benefit.* An *early retirement benefit* means the right, under the terms of a plan, to commence distribution of a retirement-type benefit at a particular date after severance from employment with the employer and before normal retirement age. Different early retirement benefits result from differences in terms relating to timing.

(ii) *Optional form of benefit.* An *optional form of benefit* means a distribution alternative (including the normal form of benefit) that is available under the plan with respect to benefits described in section 411(d)(6)(A) or a distribution alternative with respect to a retirement-type benefit. Different optional forms of benefit exist if a distribution alternative is not payable on substantially the same terms as another distribution alternative. The relevant terms include all terms affecting the value of the optional form, such as the method of benefit calculation and the actuarial assumptions used to determine the amount distributed. Thus, for example, different optional forms of benefit may result from differences in terms relating to the payment schedule, timing, commencement, medium of distribution (*e.g.*, in cash or in kind), election rights, differences in eligibility requirements, or the portion of the benefit to which the distribution alternative applies. Differences in the normal retirement ages of employees or in the form in which the accrued benefit of employees is payable at normal retirement age under a plan are taken into account in determining whether a distribution alternative constitutes one or more optional forms of benefit.

(iii) *Retirement-type benefit.* A *retirement-type benefit* means the payment of a distribution alternative with respect to an accrued benefit or the payment of any other benefit that continues after retirement that is not an ancillary benefit (including a QSUPP as defined in § 1.401(a)(4)–12).

(iv) *Retirement-type subsidy.* A *retirement-type subsidy* means the excess, if any, of the actuarial present value of a retirement-type benefit, over the actuarial present value of the accrued benefit commencing at normal retirement age or at actual commencement date, if later, with both such actuarial present values determined as of the date the retirement-type benefit commences. Examples of retirement-type subsidies include a subsidized early retirement benefit and a subsidized qualified joint and survivor annuity as described in § 1.415–3(c)(2)(i).

(v) *Subsidized early retirement benefit or early retirement subsidy.* A *subsidized early retirement benefit* or an *early retirement subsidy* means the right, under the terms of a plan, to commence distribution of a retirement-type benefit at a particular date after severance from employment with the employer and before normal retirement age where the actuarial present value of the optional forms of benefit available to the participant under the plan at that annuity starting date exceeds the actuarial present value of the accrued benefit commencing at normal retirement age (with such actuarial present values determined as of the annuity starting date). Thus, an early retirement subsidy is an early retirement benefit that provides a retirement-type subsidy.

(5) *Eliminate; elimination; reduce; reduction.* The terms *eliminate* or *elimination* when used in connection with a section 411(d)(6)(B) protected benefit mean to eliminate or the elimination of an optional form of benefit or an early retirement benefit and to reduce or a reduction in a retirement-type subsidy. The terms *reduce* and *reduction* when used in connection with a retirement-type subsidy mean to reduce or a reduction in the amount of the subsidy. For purposes of this section, an *elimination* includes a *reduction* and a *reduction* includes an *elimination.*

(6) *Retirement.* In general, for purposes of this section, the date of *retirement* refers to the annuity starting date. Thus, the term preretirement refers to the time period before the annuity starting date.

(7) *Other rights and features.* The term *other right or feature* generally means any right or feature applicable to employees under a plan. Different rights or features exist if a right or feature is not available on substantially the same terms as another right or feature. For exceptions to the definition of other right or feature, *see* § 1.401(a)(4)–4(e)(3)(ii).

(8) *Actuarial present value.* For purposes of this section, the term actuarial present value means actuarial present value (within the meaning of § 1.401(a)(4)–12) determined using reasonable actuarial assumptions.

(9) *Refund of employee contributions feature.* A *refund of employee contributions features* means a feature with respect to an optional form of benefit that provides for employee contributions and interest thereon to be paid in a single sum at the annuity starting date with the remainder to be paid in another form beginning on that date.

(10) *Retroactive annuity starting date feature.* A *retroactive annuity starting date* feature means a feature with respect to an optional form of benefit under which the annuity starting date for the distribution occurs prior to the date the participant is furnished the notice described in section 417(a)(3).

(11) *Section 411(d)(6)(B) protected benefit.* The term *section 411(d)(6)(B) protected benefit* means the portion of an early retirement benefit, a retirement-type subsidy, or an optional form of benefit attributable to the service of a participant before the applicable amendment date.

(12) *Social security leveling feature.* A *social security leveling feature* means a feature with respect to an optional form of benefit which is designed to provide an approximately level amount annually when the participant's estimated old age benefits from Social Security are taken into account.

(g) *Examples.* The following examples illustrate the application of paragraphs (b) through (f) of this section:

Example 1. (i) *Facts involving amendments to an early retirement subsidy.* Plan A provides an annual benefit of 2% of career average pay times years of service commencing at normal retirement age (age 65). Plan A is amended on November 1, 2004, effective as of January 1, 2005, to provide for an annual benefit of 1.3% of final pay times years of service, with final pay computed as the average of a participant's highest 3 consecutive years of compensation. Participant M is age 50, he has 16 years of service, his career average pay is $37,500, and the average of his highest 3 consecutive years of compensation is $67,308. Thus, M's accrued benefit as of the effective date of the amendment is increased from $12,000 per year at normal retirement age (2% times $37,500 times 16 years of service) to $14,000 per year at normal retirement age (1.3% times $67,308 times 16 years of service). (These facts are similar to the facts in *Example 1* in paragraph (a)(4) of this section.) Before the amendment, Plan A permitted a former employee to commence distribution of benefits as early as age 55 and, for a participant with at least 15 years of service, actuarially reduced the amount payable in the form of a straight life annuity commencing before normal retirement age by 3% per year from age 60 to age 65 and by 7% per year from age 55 through age 59. Thus, before the amendment, the amount of M's early retirement benefit that would be payable for commencement at age 55 was $6,000 per year ($12,000 per year minus 3% for 5 years and minus 7% for 5 more years). The amendment also alters the actuarial reduction factor so that, for a participant with at least 15 years of service, the amount payable in a straight life annuity commencing before normal retirement age is reduced by 6% per year. As a result, the amount of M's early retirement benefit at age 55 becomes $5,600 per year after the amendment ($14,000 minus 6% for 10 years).

(ii) *Conclusion.* The straight life annuity payable under Plan A at age 55 is an optional form of benefit that is an early retirement subsidy. The plan amendment fails to satisfy the requirements of section 411(d)(6)(B) because the amendment decreases the optional form of benefit payable to Participant M below the level that Participant M was entitled to receive immediately before the effective date of the amendment. If instead Plan A had included a provision under which M's straight life annuity payable at any age could be not be less than what it was immediately before the amendment (so that M's straight life annuity payable at age 55 could not be less than $6,000 per year), then the amendment would not fail to satisfy the requirements of section 411(d)(6)(B) with respect to M's straight life annuity payable at age 55 (although the straight life annuity payable to M at age 55 would not increase until the point in time at which the new formula amount with the new actuarial reduction factors exceeds the amount payable under the minimum provision, approximately 14 months after the amendment becomes effective).

Example 2. (i) *Facts involving contingent-event benefits.* Plan B permits participants who have a severance from employment before normal retirement age to commence distributions at any time after age 55 with the amount payable to be actuarially reduced using reasonable actuarial assumptions regarding interest and mortality, but provides that the annual reduction for any participant who has at least 20 years of service and who has a severance from employment after age 55 is only 3% per year (which is a smaller reduction than would apply under reasonable actuarial reductions). Plan B also provides two plant shutdown benefits to participants who have a severance of employment as a result of a plant shutdown. First, the favorable 3% actuarial reduction will apply for commencement of benefits after age 55 and before age 65 for any participant who has a severance from employment as a result of a plant shutdown

and who has at least 10 years of service. Second, all participants who have at least 20 years of service and who have a severance from employment after age 55 (and before retirement age) as a result of a plant shutdown will receive a supplement. Under the supplement, an additional amount equal to the participant's estimated old-age insurance benefit under the Social Security Act is payable until age 65. The supplement is not a QSUPP, as defined in § 1.401(a)(4)–12, because the plan's terms do not state that the supplement is treated as an early retirement benefit that is protected under section 411(d)(6).

(ii) *Conclusion.* The benefit payable with the 3% annual reduction is a retirement-type benefit. The excess of the actuarial present value of the early retirement benefit using the 3% annual reduction over the actuarial present value of the normal retirement benefit is a retirement-type subsidy and the right to receive payments of the subsidy at age 55 is an early retirement benefit. Thus, the right to receive the retirement-type subsidy for participants with at least 10 years of service at the time of a plant shutdown is an early retirement benefit that provides a retirement-type subsidy and is a section 411(d)(6)(B) protected benefit (even though no plant shutdown has occurred). Therefore, a plan amendment cannot eliminate this benefit with respect to service before the applicable amendment date, even before the occurrence of the plant shutdown. Because the plan provides that the supplement cannot exceed the OASDI benefit (Social Security), the supplement is a social security supplement, which is an ancillary benefit that is not a section 411(d)(6)(B) protected benefit.

Example 3. (i) *Facts involving elimination of optional forms of benefit as redundant.* Plan C is a defined benefit plan under which employees may elect to commence distributions at any time after the later of termination of employment or attainment of age 55. At each potential annuity starting date, Plan C permits employees to select, with spousal consent where required, a straight life annuity or any of a number of actuarially equivalent alternative forms of payment, including a straight life annuity with cost-of-living increases and a joint and contingent annuity with the participant having the right to select any beneficiary and any continuation percentage from 1% to 100%, subject to modification to the extent necessary to satisfy the requirements of the incidental benefit requirement of § 1.401–1(b)(1)(i). The amount of any alternative payment is determined as the actuarial equivalent of the straight life annuity payable at the same age using reasonable actuarial assumptions. On September 2, 2004, Plan C is amended to delete all continuation percentages for joint and contingent options other than 25%, 50%, 75% or 100%, effective with respect to annuity starting dates that are on or after January 1, 2005.

(ii) *Conclusion.* (A) *Categorization of family members under the redundancy rule.* The optional forms of benefit described in paragraph (i) of this *Example 3* are members of four families: a straight life annuity; a straight life annuity with cost-of-living increases; joint and contingent options with continuation percentages of less than 50%; and joint and contingent options with continuation percentages of 50% or more. The amendment does not affect either of the first two families, but affects the two families relating to joint and contingent options.

(B) *Conclusion for elimination of optional forms of benefit as redundant.* The amendment satisfies the requirements of paragraph (c) of this section. First, the eliminated optional forms of benefit are redundant with respect to the retained optional forms of benefit because each eliminated joint and contingent annuity option with a continuation percentage of less than 50% is redundant with respect to the 25% continuation option and each eliminated joint and contingent annuity option with a continuation percent of 50% or higher is redundant with respect to any one of the retained 50%, 75%, or 100% continuation options. In addition, to the extent that the optional form of benefit that is being eliminated does not include a social security leveling feature, return of employee contribution feature, or retroactive annuity starting date feature, the retained optional form of benefit does not include that feature. Second, the amendment is not effective with respect to annuity starting dates that are less than 90 days from the date of the amendment. Third, the plan amendment does not eliminate any available core options, including the most valuable option for a participant with a short life expectance, treating a joint and contingent annuity with a 100% continuation percentage as this optional form of benefit pursuant to paragraph (f)(3)(iv)(B)(*2*) of this section. Finally, the amendment need not satisfy the requirements of paragraph (e) of this section because the retained optional forms of benefit are available on the same annuity starting dates and have the same actuarial present value as the optional forms of benefit that are being eliminated.

Example 4. (i) *Facts involving elimination of optional forms of benefit as redundant if additional restrictions are imposed.* The facts are the same as *Example 3,* except that the plan amendment also restricts the class of beneficiaries that may be elected under the four retained joint and contingent annuities to the employee's spouse.

(ii) *Conclusion.* The amendment fails to satisfy the requirements of paragraph (c)(2)(i)(C) of this section because the retained joint and contingent annuities have materially greater restrictions on the beneficiary designation than did the eliminated joint and contingent annuities. Thus, the joint and contingent annuities being eliminated are not redundant with respect to the retained joint and contingent annuities. In addition, the amendment fails to satisfy the requirements of the core option rules in paragraph (d) of this section because the amendment fails to be limited to annuity starting dates that are at least 4 years after the date the amendment is adopted, the amendment fails to include the core option in paragraph (f)(3)(i)(B) of this section because the participant does not have the right to designate any beneficiary, and the amendment fails to include the core option described in paragraph (f)(3)(i)(C) of this section because the plan does not provide a 10-year certain and life annuity.

Example 5. (i) *Facts involving elimination of a social security leveling feature and a period certain annuity as redundant.* Plan D is a defined benefit plan under which participants may elect to commence distributions in the following actuarially equivalent forms, with spousal consent if applicable: a straight life annuity; a 50%, 75%, or 100% joint and contingent annuity; a 5-year, 10-year, or a 15-year period certain and life annuity; and an installment refund annuity (*i.e.*, an optional form of benefit that provides a period certain, the duration of which is based on the participant's age), with the participant having the right to select any beneficiary. In addition, each annuity offered under the plan, if payable to a participant who is less than age 65, is available both with and without a social security leveling feature. The social security leveling feature provides for an assumed commencement of social security benefits at any age selected by the participant between age 62 and 65. Plan D is amended on September 1, 2004, effective as of January 1, 2005, to eliminate the installment refund form of benefit and to restrict the social security leveling feature to an assumed social security commencement age of 65.

(ii) *Conclusion.* The amendment satisfies the requirements of paragraph (c) of this section. First, the installment refund annuity option is redundant with respect to the 15-year certain and life annuity (except for advanced ages where, because of shorter life expectancies, the installment refund annuity option is redundant with respect to the 5-year certain and life annuity and also redundant with respect to the 10-year certain and life annuity). Second, with respect to restricting the social security leveling feature to an assumed social security commencement age of 65, under paragraph (c)(3)(ii) of this section, straight life annuities with social security leveling features that have different social security commencement ages are treated as members of the same family as straight life annuities without social security leveling features. To the extent an optional form of benefit that is being eliminated includes a social security leveling feature, the retained optional form of benefit must also include that feature, but it is permitted to have a different assumed age for commencement of social security benefits. Third, to the extent that the optional form of benefit that is being eliminated does not include a social security leveling feature, a return of employee contribution feature, or retroactive annuity starting date feature, the retained optional form of benefit must not include that feature. Fourth, the plan amendment does not eliminate any available core options, including the most valuable option for a participant with a short life expectance, treating a joint and contingent annuity with a 100% continuation percentage as this optional form of benefit pursuant to paragraph (f)(3)(iv)(B)(*2*) of this section. Fifth, the amendment is not effective with respect to annuity starting dates that are less than 90 days from the date the amendment is adopted. The amendment

need not satisfy the requirements of paragraph (e) of this section because the retained optional forms of benefit are available on the same annuity starting dates and have the same actuarial present value as the optional forms of benefit that are being eliminated.

Example 6. (i) *Facts involving elimination of noncore options.* Employer N sponsors Plan E, a defined benefit plan that permits every participant to elect payment in the following actuarially equivalent optional forms of benefit (Plan E's uniformly available options), with spousal consent if applicable: a straight life annuity, a 50%, 75%, or 100% joint and contingent annuity with no restrictions on designation of beneficiaries, and a 5-, 10-, or 15-year period certain and life annuity. In addition, each can be elected in conjunction with a social security leveling feature, with the participant permitted to select a social security commencement age from age 62 to age 67. None of Plan E's uniformly available options include a single-sum distribution. The plan has been in existence for over 30 years, during which time Employer N has acquired a large number of other businesses, including merging over 20 defined benefit plans of acquired entities into Plan E. Many of the merged plans offered optional forms of benefit that were not among Plan E's uniformly available options, including some plans funded through insurance products, often offering all of the insurance annuities that the insurance carrier offers, and with some of the merged plans offering single-sum distributions. In particular, under the XYZ acquisition, the XYZ acquired plan offered a single-sum distribution option that was frozen at the time of the acquisition. On April 1, 2005, each single-sum distribution option applies to less than 25% of the XYZ acquired participants' accrued benefits. Employer N has generally, but not uniformly, followed the practice of limiting the optional forms of benefit for an acquired unit to an employee's service before the date of the merger, and has uniformly followed this practice with respect to each of the early retirement subsidies in the acquired unit's plan. As a result, as of April 1, 2005, Plan E includes a large number of optional forms of benefit which are not members of families identified in paragraph (c)(4) of this section, but there are no participants who are entitled to any early retirement subsidies because any subsidies have been subsumed by the actuarially reduced accrued benefit. Plan E is amended in April of 2005 to eliminate all of the optional forms of benefit that Plan E offers other than Plan E's uniformly available options, except that the amendment does not eliminate any single-sum distribution option except with respect to XYZ acquired participants and permits any commencement date that was permitted under Plan E before the amendment. Plan E also eliminates the single-sum distribution option for XYZ acquired participants. Further, each of Plan E's uniformly available options has an actuarial present value that is not less than the actuarial present value of any optional form of benefit offered before the amendment. The amendment is effective with respect to annuity starting dates that are on or after May 1, 2009.

(ii) *Conclusion.* The amendment satisfies the requirements of paragraph (d) of this section. First, Plan E, as amended, does not eliminate any single-sum distribution option as provided in paragraph (d)(2)(iii) of this section except for single-sum distribution options that apply to less than 25% of a plan participant's accrued benefit as of the date the option is eliminated (May 1, 2009). Second, Plan E, as amended, includes each of the core options as defined in paragraph (f)(3) of this section, including offering the most valuable option for a participant with a short life expectancy (treating the 100% joint and contingent annuity as this benefit, under paragraph (f)(3)(iv)(B)(*2*) of this section). The grandfathered single-sum distribution options are not the most valuable option for a participant with a short life expectancy because these distributions are not available with respect to a participant's entire accrued benefit. In addition, as required under paragraph (d)(2) of this section, to the extent an optional form of benefit that is being eliminated includes either a social security leveling feature or a refund of employee contributions feature, at least one of the core options is available with that feature and, to the extent that the optional form of benefit that is being eliminated does not include a social security leveling feature or a refund of employee contributions feature, each of the core options is available without that feature. Third, the amendment is not effective with respect to annuity starting dates that are less than 4 years after the date the amendment is adopted. Finally, the amendment need not satisfy the requirements of paragraph (e) of this section because the retained optional forms of benefit are available on the same annuity starting date and have the same actuarial present value as the optional forms of benefit that are being eliminated.

Example 7. (i) *Facts involving reductions in actuarial present value.* (A) Plan F is a defined benefit plan providing an accrued benefit of 1% of the average of a participant's highest 3 consecutive years' pay times years of service, payable as a straight life annuity beginning at age 65. Plan F permits employees to elect to commence reduced distributions at any time after the later of termination of employment or attainment of age 55. At each potential annuity starting date, Plan F permits employees to select, with spousal consent, either a straight life annuity, a joint and contingent annuity with the participant having the right to select any beneficiary and a continuation percent of 50%, 66⅔%, 75%, or 100%, or a 10-year certain and life annuity with the participant having the right to select any beneficiary, subject to modification to the extent necessary to satisfy the requirements of the incidental benefit requirement of § 1.401–1(b)(1)(i). The amount of any joint and contingent annuity and the 10-year certain and life annuity is determined as the actuarial equivalent of the straight life annuity payable at the same age using reasonable actuarial assumptions. The plan covers employees at four divisions, one of which, division X, was acquired on January 1, 1999. The plan provides for distributions before normal retirement age to be actuarially reduced, but, if a participant retires after attainment of age 55 and completion of 10 years of service, the applicable early retirement reduction factor is 3% per year for the years between age 65 and 62 and 6% per year for the ages from 62 to 55 for all employees at any division, except for employees who were in division X on January 1, 1999, for whom the early retirement reduction factor for retirement after age 55 and 10 years of service is 5% for each year before age 65. On December 2, 2004, effective January 1, 2005, Plan F is amended to change the early retirement reduction factors for all employees of division X to be the same as for other employees, effective with respect to annuity starting dates that are on or after January 1, 2006, but only with respect to participants who are employees on or after January 1, 2006 and only if Plan F continues accruals at the current rate through January 1, 2006 (or the effective date of the change in reduction factors is delayed to reflect the change in the accrual rate). For purposes of this *Example 7*, it is assumed that an actuarially equivalent early retirement factor would have a reduction shown in column 4 of the following table, which compares the reduction factors for division X before and after the amendment:

Age	Old division X factor	New factor	Actuarially equivalent factor	Column 3 minus column 2
1	2	3	4	5
65	NA	NA	NA	NA
64	95	97	91.1	+2
63	90	94	83.2	+4
62	85	91	76.1	+5
61	80	85	69.8	+5
60	75	79	64.1	+4
59	70	73	59.0	+3

Age	Old division X factor	New factor	Actuarially equivalent factor	Column 3 minus column 2
1	2	3	4	5
58	65	67	54.3	+2
57	60	61	50.1	+1
56	55	55	46.3	0
55	50	49	42.8	−1

(B) On January 1, 2005, the employee with the largest number of years of service is Employee E, who is age 54 and has 20 years of service. For 2004, Employee E's compensation is $80,000 and E's highest 3 consecutive years of pay on January 1, 2005 is $75,000. Employee E's accrued benefit as of the effective date of the amendment is a life annuity of $15,000 per year at normal retirement age (1% times $75,000 times 20 years of service) and E's early retirement benefit commencing at age 55 has a present value of $91,397 as of January 1, 2005. It is assumed for purposes of this example that the longest expected transition period for any active employee does not exceed 5 months (20 years and 5 months, times 1% times 49% exceeds 20 years times 1% times 50%). Finally, it is assumed for purposes of this example that the amendment reduces optional forms of benefit which are burdensome or complex.

(ii) *Conclusion concerning application of section 411(d)(6)(B).* The amendment reducing the early retirement factors has the effect of eliminating the existing optional forms of benefit (where the amount of the benefit is based on preamendment early retirement factors in any case where the new factors result in a smaller amount payable) and adding new optional forms of benefit (where the amount of benefit is based on the different early retirement factors). Accordingly, the elimination must satisfy the requirements of paragraph (c) or (d) of this section if the amount payable at any date is less than would have been payable under the plan before the amendment.

(iii) *Conclusion concerning application of redundancy rules.* The amendment satisfies the requirements of paragraph (c)(1)(i) and (ii) of this section (see paragraphs (iv) through (vi) of this *Example 7* for the requirements of paragraph (c)(1)(iii) of this section). First, with respect to each eliminated optional form of benefit (*i.e.*, with respect to each optional form of benefit with the Old Division X Factor), after the amendment there is a retained optional form of benefit that is in the same family of optional forms of benefit (*i.e.*, the optional form of benefit with the New Factor). Second, the amendment is not effective with respect to annuity starting dates that are less than 90 days from the date the amendment is adopted. Third, to the extent that the plan amendment eliminates the most valuable option for a participant with a short life expectancy, the retained optional form of benefit is identical except for differences in actuarial factors.

(iv) *Conclusion concerning application of the requirements under paragraph (e) of this section.* The plan amendment must satisfy the requirements of paragraph (e) of this section because, as of the applicable amendment date, the actuarial present value of the early retirement subsidy is less than the actuarial present value of the early retirement subsidy being eliminated. The plan amendment satisfies the requirements under paragraph (e)(1)(i) of this section because the amendment eliminates optional forms of benefit that create significant burdens or complexities for the plan and its participants. See below for the *de minimis* requirement under paragraph (e)(1)(ii) of this section.

(v) *Conclusion concerning application of de minimis rules under paragraph (e)(5) of this section.* The amendment does not satisfy the requirements of paragraph (e)(5) of this section because the reduction in the actuarial present value is more than a *de minimis* amount under paragraph (e)(5) of this section. For example, for Employee E, the amount of the joint and contingent annuity payable at age 55 is reduced from $7,500 (50% of $15,000) to $7,350 (49% of $15,000) and the reduction in present value as a result of the amendment is $1,828 ($91,397–$89,569). In this case, the retirement-type subsidy at age 55 is the excess of the present value of the 50% early retirement benefit over the present value of the deferred payment of the accrued benefit, or $13,921 ($97,269–$83,348) and the present value at age 54 of the retirement-type subsidy is $13,081. The reduction in present value is more than the greater of 2% of the present value of the retirement-type subsidy and 1% of E's compensation because the reduction in present value exceeds $800 (the greater of $262, which is 2% of the present value of the retirement-type subsidy for the benefit being eliminated, and $800, which is 1% of E's compensation of $80,000).

(vi) *Conclusion involving application of de minimis rules under paragraph (e)(6) relating to expected transition period.* The amendment satisfies the requirements of paragraph (e)(6) of this section and, thus, satisfies the requirements of paragraph (c) of this section, including the requirement in paragraph (c)(1)(iii) of this section that paragraph (e) of this section be satisfied. First, it is presumed that the amendment reduces optional forms of benefit that are burdensome or complex. Second, the plan amendment is not effective for annuity starting dates before January 1, 2006, and that date is not earlier than the longest expected transition period for any participant in Plan F on the date of the amendment. Third, the amendment does not apply to any participant who has a severance from employment during the transition period. If, however, a later plan amendment reduces accruals under Plan F, the initial amendment will no longer satisfy the requirements of paragraph (e)(6) of this section (and must be voided) unless, as part of the later amendment, the expected transition period is extended to reflect the reduction in accruals under Plan F.

(h) *Effective date.* The rules of this section apply to amendments adopted on or after the date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**.

PART 54—PENSION EXCISE TAXES

Par. 3. The authority citation for part 54 continues to read, in part, as follows:

Authority: 26 U.S.C. 7805 * * * 54.4980F–1 also issued under 26 U.S.C. 4980F. * * *

Par. 4. Section 54.4980F–1(b) is amended by:

1. Revising paragraph (c) of A–8.
2. Revising paragraph (d) of A–8.

The revisions read as follows:

§ 54.4980F–1 Notice requirements for certain pension plan amendments significantly reducing the rate of future benefit accrual.

* * * * *

A–8. * * *

(c) *Application to certain amendments reducing early retirement benefits or retirement-type subsidies.* Section 204(h) notice is not required for an amendment that reduces an early retirement benefit or retirement-type subsidy if the amendment is permitted under the third sentence of section 411(d)(6)(B) of the Internal Revenue Code and regulations thereunder (relating to the elimination or reduction of benefits or subsidies which create significant burdens or complexities for the plan and plan participants unless the amendment adversely affects the rights of any participant in a more than *de minimis* manner). However, in determining whether an amendment provides for a significant reduction for purposes of this section with respect to an amendment that has an effective date on or after these rules are adopted as final regulations and that reduces a retirement-type subsidy as permitted under § 1.411(d)–3(e)(6) of this chapter,

the amendment is treated in the same manner as an amendment that limits the retirement-type subsidy to benefits that accrue before the applicable amendment date (as defined at § 1.411(d)–3(f)(2) of this chapter) with respect to each participant or alternate payee to whom the reduction is reasonably expected to apply.

(d) *Example.* The following examples illustrate the rules in this Q&A–8:

Example 1. (i) *Facts.* Pension Plan A is a defined benefit plan that provides a rate of benefit accrual of 1% of highest-five years' pay multiplied by years of service, payable annually for life commencing at normal retirement age (or at actual retirement age, if later). Plan A is amended on August 1, 2007, effective January 1, 2008, to provide that any participant who separates from service after December 31, 2007, and before January 1, 2013, will have the same number of years of service he or she would have had if his or her service continued to December 31, 2012.

(ii) *Conclusion.* While the amendment will result in a reduction in the annual rate of future benefit accrual from 2009 through 2012 (because under the amendment, benefits based upon an additional five years of service accrue on January 1, 2008, and no additional service is credited after January 1, 2008 until January 1, 2013), the amendment does not result in a reduction that is significant because the amount of the annual benefit commencing at normal retirement age (or at actual retirement age, if later) under the terms of the plan as amended is not under any conditions less than the amount of the annual benefit commencing at normal retirement age (or at actual retirement age, if later) to which any participant would have been entitled under the terms of the plan had the amendment not been made.

Example 2. (i) *Facts.* The facts are the same as in *Example 1,* except that the 2008 amendment does not alter the plan provisions relating to a participant's number of years of service, but instead amends the plan's provisions relating to early retirement benefits. Before the amendment, the plan provides for distributions before normal retirement age to be actuarially reduced, but, if a participant retires after attainment of age 55 and completion of 10 years of service, the applicable early retirement reduction factor is 3% per year for the years between age 65 and 62 and 6% per year for the ages from 62 to 55. The amendment changes these provisions so that an actuarial reduction applies in all cases, but, in accordance with section 411(d)(6)(B), provides that no participant's early retirement benefit will be less than the amount provided under the plan as in effect on December 31, 2007 with respect to service before January 1, 2008. For participant X, the reduction is significant.

(ii) *Conclusion.* The amendment will result in a reduction in a retirement-type subsidy provided under Plan A (*i.e.*, Plan A's early retirement subsidy). Section 204(h) notice must be provided to participant X and any other participant for whom the reduction is significant and the notice must be provided at least 45 days before January 1, 2008 (or by such other date as may apply under Q&A–9 of this section).

Example 3. (i) *Facts.* The facts are the same as in *Example 2,* except that, for participant X, the change does not go into effect for any annuity starting date before January 1, 2009. Participant X continues employment through January 1, 2009.

(ii) *Conclusion.* The conclusion is the same as in *Example 2.* Taking into account the rule in the second sentence of Q&A–8(c) of this section, the reduction that occurs for participant X on January 1, 2009, is treated as the same reduction that occurs under *Example 2.* Accordingly, section 204(h) notice must be provided to participant X at least 45 days before January 1, 2008 (or by such other date as may apply under Q&A–9 of this section).

* * * * *

Mark E. Matthews,

Deputy Commissioner for Services and Enforcement.

BILLING CODE 4830–01–P

POSTAL SERVICE

39 CFR Part 601

Purchasing of Property and Services

AGENCY: Postal Service.

ACTION: Proposed rule with request for comments.

SUMMARY: The Postal Service™ proposes to amend its regulations in order to implement the acquisition portions of its *Transformation Plan* (April 2000) and the similar recommendations of the President's Commission on the United States Postal Service (July 2003) as they relate to the acquisition of property and services in accordance with 39 U.S.C. 101, 401, 403, 404, and 410.

DATES: Written comments must be received on or before April 23, 2004.

ADDRESSES: Written comments should be mailed to Michael J. Harris, Supply Management Infrastructure, United States Postal Service, 475 L'Enfant Plaza, SW., Room 4130, Washington, DC 20260–6201. Copies of all written comments will be available for inspection and photocopying between 9 a.m. and 4 p.m., Monday through Friday, at the Library, United States Postal Service, 475 L'Enfant Plaza, SW., Room 11800, Washington, DC 20260, (202) 268–2900.

FOR FURTHER INFORMATION, CONTACT: Michael J. Harris, (202) 268–3569.

SUPPLEMENTARY INFORMATION: The Board of Governors of the Postal Service has determined in the *Transformation Plan* that challenging times require the Postal Service to change its business model and practices to meet the challenge of the future in order to fulfill its charter to serve the American public. As part of that challenge, the Postal Service determined to ''revise purchasing regulations to allow for the acquisition of goods and services in a manner similar to that followed by businesses.'' *Transformation Plan* (April 2002), p. v.

The President's Commission on the Postal Service also has recommended the Postal Service exercise the ''latitude to conduct its procurement with fewer substanti[ve] regulations'' pursuant to authority granted by Congress in the Postal Reorganization Act, Report (July 2003), p. 94. The Commission expressed its view that ''it is inappropriate to apply regulations * * * aimed at traditional agencies to a Federal entity required to finance its own multi-billion dollar operations.'' Rather, the public will benefit greatly if the Postal Service applies purchasing practices by leading corporate enterprises. In accordance with the *Transformation Plan* and the Commission's recommendations, the Postal Service proposes to replace all of its current purchasing regulations with those discussed here.

Section-by-Section Analysis

Section 601.100 Purchasing Policy

This section describes the policy of the Postal Service to acquire property and services in accordance with all applicable laws enacted by Congress. It is intended the Postal Service will exercise the full powers granted by Congress to it with respect to the acquisition of property and services and will acquire goods and services in a manner akin to the best commercial practices in the private sector in order to serve the American public.

Section 601.101 Effective Date

The effective date of the new regulations will be set at some point in the future after consideration is given to public comments and the final regulations have been published. Sufficient time will be provided to prospective suppliers and members of the public to become acquainted with the new regulations.

Section 601.102 Revocation of Prior Purchasing Regulations

This section specifies that all other regulations dealing with any or all aspects of purchasing are revoked and will be of no further force or effect, excepting only as applied to contracts signed prior to the effective date of these regulations. Examples of the revoked regulations are given.

Section 601.103 Applicability and Coverage

This section makes it clear that the regulations apply to all acquisitions of property (except real property) and services.

Section 601.104 Postal Purchasing Authority

This section discusses who is authorized to bind the Postal Service with respect to contracts involving the acquisition of property and services. Only certain people legally may bind the Postal Service. Those persons are identified by title or position in the regulations. The regulations also provide that other persons may be given authority by appropriate written delegation to enter into contracts to bind the Postal Service with respect to any and all purchasing matters. Absent specific authority, however, a person may not enter into a contract or commitment on behalf of the Postal Service or otherwise bind the Postal Service.

Section 601.105 Business Relationships

This section states the Postal Service's expectation that it will be treated by each of its suppliers and prospective suppliers as a valued customer. This section also informs the supplier community that the Postal Service may cease doing business with any person or organization that fails to meet the Service's expectations of high quality, prompt service, and overall professionalism.

Section 601.106 Canceling Business Relationships

This section states the Postal Service's policy that it may elect not to do business with persons or organizations that do not meet reasonable business expectations or provide a high level of confidence about current and/or future business relationships. Examples of the kind of behavior that may lead the Postal Service to cease doing business with a person or organization are given. The reasons that may cause the Postal Service to cease doing business under § 601.106 with a potential supplier differ from the reasons that may cause the Postal Service to debar a supplier under § 601.113. Cessation may be informed by a supplier's unreasonable or unsatisfactory business practices while debarment is reserved for more egregious forms of supplier misconduct.

This section also provides that when the Postal Service elects to exercise its right to cease doing business with any person or organization, the Postal Service will notify that person or organization, state the reason(s) it has taken that action, and give the person or organization an opportunity to contest the Postal Service's actions. Dispute-resolution procedures have been created in the regulations to resolve disagreements over such decisions as well as some other matters.

Section 601.107 Alternative Dispute Resolution

This section states the Postal Service's policy to try to resolve disputes through alternative dispute resolution procedures, if possible. Whenever a person disputes a Postal Service decision under these regulations, the Postal Service contracting officer must consider alternative dispute procedures as a means of resolving the disagreement with the supplier. Illustrations of various types of dispute resolution procedures are listed. No supplier, however, will be required to use such procedures if the supplier chooses not to do so.

Section 601.108 Ombudsman and Dispute Resolution

This section states the Postal Service's policy that all disagreements that arise between suppliers or potential suppliers and the Postal Service regarding all aspects of solicitations, awards of contracts, and related matters should be resolved quickly and inexpensively, preferably through alternative dispute resolution, but if not, by an ombudsman appointed by the Postal Service. An expedited procedure is provided to resolve any such disagreements quickly and with finality. The ombudsman is expected to give a written decision within 30 to 60 days after receiving notice of a disagreement from a supplier or prospective supplier. Decisions of the ombudsman will be final and binding, with limited exceptions specified in this section of the regulations.

This section also provides that it does not apply to disputes arising under the Contract Disputes Act or with respect to disputes about debarment, suspension, and ineligibility from government contracting under § 601.113.

Section 601.109 Contract Claims and Procedures

This section implements the Contract Disputes Act. The section is very similar to the current regulations regarding contract disputes and it does not reflect substantive changes.

Section 601.113 Debarment, Suspension, and Ineligibility

This section sets forth the Postal Service's policies and practices regarding debarment, suspension, and ineligibility from contracting with the Postal Service and agencies of the Federal Government, and related matters. Debarment generally is considered for very serious offenses. Examples of such offenses are given in this section. Procedures to be followed by the Postal Service regarding debarment, suspension, and ineligibility are given in this section.

Debarment is applicable to more serious instances of supplier misconduct as compared to a cessation of business under § 601.106, which is akin to decisions by private organizations to choose not to do business with other private organizations for legitimate business reasons.

In view of the matters discussed above, although exempt from the notice and comment requirements of the Administrative Procedure Act (5 U.S.C. 553 (b)(c)) regarding proposed rulemaking by 39 U.S.C. 410 (a), the Postal Service invites comments on the following proposed amendments to part 601 of title 39, Code of Federal Regulations.

List of Subjects in 39 CFR Part 601

Postal Service.

1. Revise 601 to read as follows:

PART 601—PURCHASING OF PROPERTY AND SERVICES

Sec.

601.100 Purchasing policy.
601.101 Effective date.
601.102 Prior purchasing regulations.
601.103 Applicability and coverage.
601.104 Postal purchasing authority.
601.105 Business relationships.
601.106 Canceling business relationships.
601.107 Alternative dispute resolution.
601.108 Ombudsman and dispute resolution.
601.109 Contract claims and disputes.
601.110 Payment of claims.
601.111 Interest on claim amounts.
601.112 Review of adverse decisions.
601.113 Debarment, suspension, and ineligibility.

Authority: 39 U.S.C. 401, 404, 410, 411, 2008, 5001–5605.

§ 601.100 Purchasing policy.

It is the policy of the Postal Service to acquire property and services in accordance with 39 U.S.C. 410 and all other applicable public laws enacted by Congress.

§ 601.101 Effective date.

These regulations are effective on and after [reserved].

§ 601.102 Prior purchasing regulations.

This part revokes, replaces, and supersedes all previous postal

purchasing regulations, including the *Postal Contracting Manual, Procurement Manual,* the Purchasing Manual (Issue 2 and Issue 3), and procurement handbooks, circulars, and instructions except as provided in § 601.103.

§ 601.103 Applicability and coverage.

The regulations contained in this part apply to all Postal Service acquisition of property (except real property) and services. Contracts entered into prior to the effective date of the regulations in this part will be governed by the regulations in effect at the time the contract was signed.

§ 601.104 Postal purchasing authority.

Only the Postal Service's vice president, Supply Management; contracting officers with written statements of specific authority; and others designated in writing or listed in this part have the authority to bind the Postal Service with respect to entering into, modifying, or terminating any contract regarding the acquisition of property, services, and related purchasing matters. The Postal Service's vice president, Supply Management, or his or her designee, may also delegate local buying authority throughout the Postal Service.

§ 601.105 Business relationships.

A person or organization wishing to enjoy a continuing business relationship with the Postal Service in purchasing matters is expected to treat the Postal Service in the same manner as it would other valued customers of similar size and importance. The Postal Service reserves the right to cease business relations with a person or organization when that person or organization fails to meet reasonable business expectations of high quality, prompt service, and overall professionalism. In addition to terminating existing contracts for its convenience or for default, the Postal Service may cease or cancel a business relationship or it may undertake debarment, suspension, and ineligibility proceedings as provided in this part.

§ 601.106 Canceling business relationships.

(a) *General.* The Postal Service may cancel its business relationship or decline to enter into a business relationship with a person or organization that does not meet reasonable business expectations or that does not provide a high level of confidence about current or future business relations. Typically, these sorts of unacceptable conduct and business practices will not rise to the level of unethical or criminal activities that could lead to the debarment, suspension, or ineligibility of a supplier. Unacceptable conduct or business practices include, but are not limited to:

(1) Marginal or dilatory contract performance;

(2) Failure to deliver on promises made in the course of dealings with the Postal Service;

(3) Spurious, frivolous, or bad-faith litigation and/or claims;

(4) Failure to respond promptly and completely to Postal Service inquiries and requests for information, without inadvertence or good reason;

(5) Negotiating or dealing in bad faith with the Postal Service, including engaging in uncooperative practices;

(6) Providing false or misleading information as to financial condition, ability to perform, or other material matters, including any aspect of performance on a contract; and

(7) Engaging in other questionable or unprofessional conduct or business practices.

(b) *Notice.* If the Postal Service elects to cancel its business relationship with a person or organization, the vice president, Supply Management, or his or her designee, will provide a written notice to the person or organization explaining:

(1) The reasons for the cancellation;

(2) the effective date of cancellation;

(3) the scope of the cancellation;

(4) the duration of the cancellation (this may be limited to a specified length of time or may extend indefinitely); and

(5) the supplier's right to contest the cancellation.

(c) *Contesting cancellations.* If a person or organization believes the cancellation is not merited, it may contest the matter in accordance with the ombudsman and supplier dispute-resolution procedures contained in this part, seek to resolve the matter by agreement through alternative dispute resolution, or both. The Postal Service may reconsider the matter and, if warranted, rescind or modify the cancellation.

§ 601.107 Alternative dispute resolution.

It is the policy of the Postal Service to resolve purchasing disagreements through the use of alternative disputes resolution (ADR), whenever possible. The Postal Service supports and encourages the use of ADR as an effective way to understand, address, and resolve disagreements and conflicts. A person or organization disputing a Postal Service decision and the Postal Service contracting officer must consider the use of ADR to resolve a particular purchasing disagreement, regardless of the nature of the disagreement or when it occurs during the purchasing process. ADR methods include informal negotiation, mediation by a neutral third party, facilitation by the supplier ombudsman, and any other agreed-upon method.

§ 601.108 Ombudsman and dispute resolution.

(a) Policy. From time to time, disagreements arise between suppliers, potential suppliers, and the Postal Service regarding solicitations, awards of contracts, and related matters. The Postal Service desires to resolve all such disagreements quickly and inexpensively in keeping with the regulations in this part, 39 U.S.C. 410, and all other applicable public laws enacted by Congress. In resolving disagreements, non-Postal Service procurement rules or regulations and internal Postal Service purchasing guidelines will not apply or be taken into account.

(b) Scope and applicability. In order to resolve disagreements and demands expeditiously, to reduce litigation expenses, inconvenience, and other costs for all parties, and to facilitate successful business relationships with Postal Service suppliers, the supplier community, and other persons, the following procedure is established as the sole and exclusive means to resolve disagreements arising in connection with awards of contracts for the purchase of property or services and all related matters. All disputes, protests, claims, disagreements, demands, or grievances of whatsoever nature (hereinafter ''disagreements'') against the Postal Service arising in connection with the purchasing process, except claims that arise pursuant to a contract under the Contracts Disputes Act or claims concerning debarment, suspension, or ineligibility under § 601.113 of this part, will be presented and resolved, with finality, under and in accordance with the sole and exclusive procedure established in this section.

(c) A disagreement may be lodged by an organization or a person with respect to the cancellation of a business relationship, the terms of a Postal Service solicitation, the award of a contract, and/or related issues in regard to the purchasing process.

(d) The disagreement must be lodged in writing and must state the factual circumstances relating to it, the remedy sought, and the rationale for the disagreement. Counsel is not required, but may be retained to assist in the disagreement. The person or organization lodging the disagreement must indicate in the disagreement

whether it is willing to attempt to resolve the matter through informal discussions, mediation, or another means of ADR.

(e) The disagreement must be delivered to the ombudsman for the Postal Service within 15 calendar days of the time the grounds for the disagreement arose. The ombudsman may grant an extension of time to deliver a disagreement or to provide supporting information when warranted. Any request for an extension must set forth the reasons for the request, be made in writing, and be delivered to the ombudsman on or before the time to deliver a disagreement lapses. The address of the ombudsman is [reserved].

(f) The ombudsman will promptly provide a copy of a disagreement to the contracting officer, who will promptly deliver a copy to other interested persons (*i.e.*, actual or prospective offerors whose direct economic interests would be affected by the award of, or failure to award, the contract). The ombudsman will consider a disagreement and any response by other interested persons and appropriate Postal Service officials within a time frame established by the ombudsman. The ombudsman may also meet individually or jointly with the person or organization lodging the disagreement, other interested persons, and/or Postal Service officials, and may undertake other activities in order to obtain materials, information, or advice that may help to resolve the disagreement. The person or organization lodging the disagreement, other interested persons, or Postal Service officials must promptly provide all relevant, nonprivileged materials and other information requested by the ombudsman. After obtaining such information, materials, and advice as may be needed, the ombudsman will promptly issue a decision in writing resolving a disagreement and will deliver the decision to the person or organization lodging the disagreement, other interested persons, and appropriate Postal Service officials. If confidential or privileged material is needed in order to reach a decision, the ombudsman will notify the appropriate party to provide such material to the ombudsman only. The confidential material will be held in confidence by the ombudsman and will be returned to the party upon request at the conclusion of the matter.

(g) In considering and in resolving a disagreement, the ombudsman will be guided by the regulations contained in this part and all applicable public laws enacted by Congress. Non-Postal Service procurement rules or regulations, revoked Postal Service regulations, and internal Postal Service purchasing guidelines will not apply or be taken into account in resolving disagreements.

(h) A decision of the ombudsman will be final and binding on the person or organization lodging the disagreement, other interested persons, and the Postal Service. However, the person or organization that lodged the disagreement or another interested person may appeal the decision to a federal court with jurisdiction over such claims, but only on the grounds that the decision was procured by fraud or other criminal misconduct or was obtained in violation of the regulations contained in this part or an applicable public law enacted by Congress. Any such appeal must be filed with the clerk of court and a copy of the appeal must be delivered to the ombudsman within 15 calendar days of the date of receipt of the decision, or the appeal is waived.

(i) It is intended that this procedure generally will resolve disagreements within approximately 30 to 60 days after the ombudsman receives the disagreement.

§ 601.109 Contract claims and disputes.

(a) *General.* This section implements the Contract Disputes Act of 1978, as amended (41 U.S.C. 601–613).

(b) *Policy.* It is Postal Service policy to resolve contractual claims and disputes by mutual agreement at the level of an authorized contracting officer whenever possible. In addition, the Postal Service supports and encourages the use of alternative dispute resolution as an effective way to understand, address, and resolve conflicts with suppliers. Efforts to resolve differences should be made before the issuance of a final decision on a claim, and even when the supplier does not agree to use ADR, the contracting officer should consider holding informal discussions between the parties in order to resolve the conflict before the issuance of a final decision.

(c) *Contractor claim initiation.* Supplier claims must be submitted in writing to the contracting officer for final decision. The contracting officer must document the contract file with evidence of the date of receipt of any submission that the contracting officer determines is a claim. Supplier claims must be submitted within 6 years after accrual of a claim unless the parties agreed to a shorter time period. The 6-year time period does not apply to contracts awarded prior to October 1, 1995.

(d) *Postal service claim initiation.* The contracting officer must issue a written decision on any Postal Service claim against a supplier, within 6 years after accrual of a claim, unless the parties agreed in writing to a shorter time period. The 6-year time period does not apply to contracts awarded prior to October 1, 1995, or to a Postal Service claim based on a supplier claim involving fraud.

(e) *Certified claims.* Each supplier claim exceeding $100,000 must be accompanied by a certification in accordance with the supplier's contract.

(f) *Decision and appeal.* (1) *Contracting Officer's authority.* A contracting officer is authorized to decide or settle all claims arising under or relating to a contract subject to the Contract Disputes Act, except for:

(i) Claims or disputes for penalties or forfeitures prescribed by statutes or regulation that a Federal agency administers; or

(ii) Claims involving fraud.

(2) *Contracting Officer's decision.* The contracting officer must review the facts pertinent to the claim, obtain assistance from assigned counsel and other advisors, and issue a final decision in writing. The decision must include a description of the claim or dispute with references to the pertinent contract provisions, a statement of the factual areas of agreement and disagreement, and a statement of the contracting officer's decision with supporting rationale.

(3) *Insufficient information.* When the contracting officer cannot issue a decision because the supplier has not provided sufficient information, the contracting officer must promptly request the required information. Further failure to provide the requested information is an adequate reason to deny the claim.

(4) *Furnishing decisions.* The contracting officer must furnish a copy of the decision to the supplier by Certified Mail™, return receipt requested, or by any other method that provides evidence of receipt.

(5) *Decisions on claims for $100,000 or less.* If the supplier has asked for a decision within 60 days, the contracting officer must issue a final decision on a claim of $100,000 or less within 60 calendar days of its receipt. The supplier may consider the contracting officer's failure to issue a decision within the applicable time period as a denial of its claim, and may file a suit or appeal on the claim.

(6) *Decisions on certified claims.* For certified claims over $100,000, the contracting officer must either issue a final decision within 60 calendar days of their receipt or notify the supplier within the 60-day period of the time

when a decision will be issued. The time period established must be reasonable, taking into account the size and complexity of the claim, the adequacy of the supplier's supporting data, and any other relevant factors.

(7) *Wording of decisions.* The contracting officer's final decision must contain the following paragraph: ''This is the final decision of the contracting officer pursuant to the Contract Disputes Act of 1978 and the clause of your contract entitled Claims and Disputes. You may appeal this decision to the Postal Service Board of Contract Appeals by mailing or otherwise furnishing written notice (preferably in triplicate) to the contracting officer within 90 days from the date you receive this decision. The notice should identify the contract by number, reference this decision, and indicate that an appeal is intended. Alternatively, you may bring an action directly in the United States Court of Federal Claims within 12 months from the date you receive this decision.

(8) *Additional wording for decisions of $50,000 or less.* When the claim or claims denied total $50,000 or less, the contracting officer must add the following to the paragraph: ''In taking an appeal to the Board of Contract Appeals, you may include in your notice of appeal an election to proceed under the Board's small claims (expedited) procedure, which provides for a decision within approximately 120 days, or an election to proceed under the Board's accelerated procedure, which provides for a decision within approximately 180 days. If you do not make an election in the notice of appeal, you may do so by written notice anytime thereafter.''

(9) *Additional wording for decisions over $50,000 up to $100,000.* When the claim or claims denied total $100,000 or less, but more than $50,000, the contracting officer must add the following to the paragraph: ''In taking an appeal to the Board of Contract Appeals, you may include in your notice of appeal an election to proceed under the Board's accelerated procedure, which provides for a decision within approximately 180 days. If you do not make an election in the notice of appeal, you may do so by written notice anytime thereafter.''

§ 601.110 Payment of claims.

Any claim amount determined in a final decision to be payable, less any portion previously paid, should be promptly paid to the supplier without prejudice to either party in the event of appeal or action on the claim. In the absence of appeal by the Postal Service, a board or court decision favorable in whole or in part to the supplier must be implemented promptly. In cases when only the question of entitlement has been decided and the matter of amount has been remanded to the parties for negotiation, a final decision of the contracting officer must be issued if agreement is not reached promptly.

§ 601.111 Interest on claim amounts.

Interest on the amount found due on the supplier's claim must be paid from the date the contracting officer received the claim (properly certified, if required) or from the date payment would otherwise be due, if that date is later, until the date of payment. Simple interest will be paid at the rate established by the Secretary of the Treasury for each 6-month period in which the claim is pending. Information on the rate at which interest is payable is announced periodically in the *Postal Bulletin.*

§ 601.112 Review of adverse decisions.

Any party may seek review of an adverse decision of the Board of Contract Appeals in the Court of Appeals for the Federal Circuit or in any other appropriate forum.

§ 601.113 Debarment, suspension, and ineligibility.

(a) *General.* Except as provided otherwise in this part, contracting officers may not solicit proposals from, award contracts to, or consent to subcontracts with debarred, suspended, or ineligible suppliers.

(b) *Definitions.* (1) *Affiliate.* A business, organization, person, or individual connected by the fact that one controls or has the power to control the other or by the fact that a third party controls or has the power to control both. Factors such as common ownership, common management, and contractual relationships may be considered. Franchise agreements are not conclusive evidence of affiliation if the franchisee has a right to profit in proportion to its ownership and bears the risk of loss or failure.

(2) *Debarment.* An exclusion from contracting and subcontracting for a reasonable, specified period of time commensurate with the seriousness of the offense, failure, or inadequacy of performance.

(3) *General Counsel.* This includes the General Counsel's authorized representative.

(4) *Indictment.* Indictment for a criminal offense. An information or other filing by competent authority charging a criminal offense is given the same effect as an indictment.

(5) *Ineligible.* An exclusion from contracting and subcontracting by an entity other than the Postal Service under statutes, executive orders, or regulations, such as the Davis Bacon Act, the Service Contract Act, the Equal Employment Opportunity Acts, the Walsh-Healy Public Contracts Act, or the Environmental Protection Acts and related regulations or executive orders, to which the Postal Service is subject or has adopted as a matter of policy.

(6) *Judicial Officer.* This includes the acting Judicial Officer.

(7) *Suspension.* An exclusion from contracting and subcontracting for a reasonable period of time due to specified reasons or the pendency of a debarment proceeding.

(8) *Supplier.* For the purposes of this part, a supplier is any individual, person, or other legal entity that:

(i) *Directly or indirectly* (*e.g.*, through an affiliate) submits offers for, is awarded, or reasonably may be expected to submit offers for or be awarded, a Postal Service contract, including a contract for carriage under Postal Service or commercial bills of lading, or a subcontract under a Postal Service contract; or

(ii) Conducts business or reasonably may be expected to conduct business with the Postal Service as a subcontractor, an agent, or as a representative of another supplier.

(c) *Establishment and maintenance of lists.* (1) The vice president, Supply Management, will establish, maintain, and distribute to purchasing offices a list of suppliers debarred or suspended by the Postal Service.

(2) The General Services Administration (GSA) compiles and maintains a consolidated list of all persons and entities debarred, suspended, proposed for debarment, or declared ineligible by Federal agencies or the General Accounting Office. GSA posts the list on the Internet and publishes a hardcopy of the list.

(3) The vice president, Supply Management, will notify the GSA of any Postal Service debarment, suspension, and change in the status of suppliers, including any of their affiliates, on the Postal Service list.

(d) *Treatment of suppliers on Postal Service or GSA lists.* (1) Contracting officers will review the Postal Service and GSA lists before making a contract award.

(2) Suppliers on the Postal Service list are excluded from receiving contracts and subcontracts, and contracting officers may not solicit proposals or quotations from, award contracts to, or, when a contract provides for such consent, consent to subcontracts with

such suppliers, unless the vice president, Supply Management, or his or her designee, after consultation with the General Counsel, has approved such action. Suppliers on the Postal Service list may not provide goods or services to other persons or entities for resale, in whole or part, to the Postal Service and such other persons or entities are obligated to obtain and review the Postal Service list in order to exclude debarred or suspended suppliers from performing any part of a Postal Service contract.

(3) Suppliers on the GSA list are assigned a code by GSA which is related to the basis of ineligibility. The vice president, Supply Management, maintains a table describing the Postal Service treatment assigned to each code. Suppliers on the GSA list who are coded as ineligible are excluded from receiving contracts and subcontracts, and contracting officers may not solicit proposals or quotations from, award contracts to, or, when the contract provides for such consent, consent to subcontracts with such suppliers, unless the vice president, Supply Management, or designee, after consultation with the General Counsel, has approved such action. Suppliers on the GSA list may not provide goods or services to other persons or entities for resale, in whole or part, to the Postal Service and such other persons or entities are obligated to obtain and review the GSA list in order to exclude debarred or suspended suppliers from performing any part of a Postal Service contract.

(4) Suppliers on the GSA list are assigned codes for which the table provides other Postal Service guidance, and are considered according to that guidance. When so indicated on the table, contracting officers must obtain additional information from the entity responsible for establishing the supplier's ineligibility, if such information is available.

(5) The debarment, suspension, or ineligibility of a supplier does not, of itself, affect the rights and obligations of the parties to any valid, pre-existing contract. The Postal Service may terminate for default a contract with a supplier that is debarred, suspended, or determined to be ineligible. Except for service changes under mail transportation contracts, contracting officers may not add new work to the contract by supplemental agreement, by exercise of an option, or otherwise, except with the approval of the vice president, Supply Management, or designee.

(e) *Causes for debarment.* The vice president, Supply Management, with the concurrence of the General Counsel, may debar a supplier, including its affiliates, for cause such as the following:

(1) Conviction of a criminal offense incidental to obtaining or attempting to obtain contracts or subcontracts, or in the performance of a contract or subcontract.

(2) Conviction under a Federal antitrust statute arising out of the submission of bids or proposals.

(3) Commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, or receiving stolen property.

(4) Violation of a Postal Service contract so serious as to justify debarment, such as willful failure to perform a Postal Service contract in accordance with the specifications or within the time limit(s) provided in the contract; a record of failure to perform or of unsatisfactory performance in accordance with the terms of one or more Postal Service contracts occurring within a reasonable period of time preceding the determination to debar (except that failure to perform or unsatisfactory performance caused by acts beyond the control of the supplier may not be considered a basis for debarment); violation of a contractual provision against contingent fees; or acceptance of a contingent fee paid in violation of a contractual provision against contingent fees.

(5) Any other cause of a serious and compelling nature that debarment is warranted.

(i) The existence of a conviction in paragraph (e)(1) or (2) of this section may be established by proof of a conviction in a court of competent jurisdiction. If appeal taken from such conviction results in a reversal of the conviction, the debarment may be removed upon the request of the supplier, unless another cause or another basis for debarment exists.

The existence of any of the other causes in paragraphs (e)(1), (2), (3), (4), or (5) of this section may be established by a preponderance of the evidence, either direct or indirect, in the judgment of the debarring official.

(ii) The criminal, fraudulent, or improper conduct of an individual may be imputed to the firm with which he or she is or has been connected when an impropriety was committed. Likewise, when a firm is involved in criminal, fraudulent, or other improper conduct, any person who participated in, knew of, or had reason to know of the impropriety may be debarred.

(iii) The fraudulent, criminal, or other improper conduct of one supplier participating in a joint venture or similar arrangement may be imputed to other participating suppliers if the conduct occurred for or on behalf of the joint venture or similar arrangement, or with the knowledge, approval, or acquiescence of the supplier. Acceptance of the benefits derived from the conduct will be evidence of such knowledge, approval, or acquiescence.

(f) *Mitigating factors.* (1) The existence of any cause for debarment does not necessarily require that a supplier be debarred. The decision to debar is within the discretion of the vice president, Supply Management, and must be made in the best interest of the Postal Service. The following factors may be assessed in determining the seriousness of the offense, failure, or inadequacy of performance, and may be taken into account in deciding whether debarment is warranted:

(i) Whether the supplier had established written standards of conduct and had published internal control systems at the time of the activity that constitutes cause for debarment or had adopted such procedures prior to any Postal Service investigation of the activity cited as a cause for debarment.

(ii) Whether the supplier brought the activity cited as a cause for debarment to the attention of the Postal Service in a prompt, timely manner.

(iii) Whether the supplier promptly and fully investigated the circumstances involving debarment and, if so, made the full results of the investigation available to appropriate officials of the Postal Service.

(iv) Whether the supplier cooperated fully with the Postal Service during in its investigation into the matter.

(v) Whether the supplier paid or agreed to pay all criminal, civil, and administrative liability and other costs arising out of the improper activity, including any investigative or administrative costs incurred by the Postal Service, and made or agreed to make full restitution.

(vi) Whether the supplier took appropriate disciplinary action against the individual(s) responsible for the activity that could cause debarment.

(vii) Whether the supplier implemented and/or agreed to implement remedial measures, including those identified by the Postal Service.

(viii) Whether the supplier instituted and/or agreed to institute new and/or revised review and control procedures and ethics programs.

(ix) Whether the supplier had adequate time to eliminate circumstances within the supplier's organization that could lead to debarment.

(x) Whether the supplier's senior officers and mid-level management recognize and understand the seriousness of the misconduct giving rise to debarment.

(2) The existence or nonexistence of mitigating factors or remedial measures such as those in paragraph (f)(1) of this section is not determinative whether or not a supplier should be debarred. If a cause for debarment exists, the supplier has the burden of demonstrating, to the satisfaction of the debarring official, that debarment is not warranted or necessary.

(g) *Period of debarment.* (1) When an applicable statute, executive order, or controlling regulation of other agencies provides a specific period of debarment, that period applies. In other cases, debarment by the Postal Service should be for a reasonable, definite, stated period of time, commensurate with the seriousness of the offense or the failure or inadequacy of performance. Generally, a period of debarment should not exceed 3 years. When debarment for an additional period is deemed necessary, notice of the proposed additional period of debarment must be furnished to the supplier as in the case of original debarment.

(2) Except as precluded by an applicable statute, executive order, or controlling regulation of another agency, debarment may be removed or the period may be reduced by the vice president, Supply Management, when requested by the debarred supplier and when the request is supported by a reasonable justification, such as newly discovered material evidence, reversal of a conviction, bona fide change of ownership or management, or the elimination of the causes for which debarment was imposed. The vice president, Supply Management, may, at his or her discretion, deny any request or refer it to the Judicial Officer for a hearing and for findings of fact, which the vice president, Supply Management, will consider when deciding the matter. When a debarment is removed or the debarment period is reduced, the vice president, Supply Management, must state in writing the reason(s) for the removal of the debarment or the reduction of the period of debarment.

(h) *Procedural requirements for debarment.* (1) The vice president, Supply Management, will initiate a debarment proceeding by sending the supplier a written notice of proposed debarment. The notice will be served by sending it to the last known address of the supplier by Certified Mail, return receipt requested. A copy of the notice will be furnished to the Office of Inspector General. The notice will state that debarment is being considered; the reason(s) for the proposed debarment; the anticipated period of debarment and the proposed effective date; and, within 30 days of receipt of the notice, the supplier may submit, in person or in writing, or through a representative, information and argument in opposition to the proposed debarment. In the event a supplier does not submit information or argument in opposition to the proposed debarment to the vice president, Supply Management, within the time allowed, the debarment will become final with no further review or appeal.

(2) If the proposed debarment is based on a conviction or civil judgment, the vice president, Supply Management, may decide whether debarment is merited based on the conviction or judgment, including any information received from the supplier. If the debarment is based on other circumstances or if there are questions regarding material facts, the vice president, Supply Management, may seek additional information from the supplier and/or other persons, and may request the Judicial Officer to hold a fact-finding hearing on such matters. The hearing will be governed by rules of procedure promulgated by the Judicial Officer. The vice president, Supply Management, may reject any findings of fact, in whole or in part, when they are clearly erroneous.

(3) When the vice president, Supply Management, proposes to debar a supplier already debarred by another government agency for a period concurrent with such debarment, the debarment proceedings before the Postal Service may be based entirely upon the record of evidence, facts, and proceedings before the other agency, upon any additional facts the Postal Service deems relevant, or on the decision of another government agency. In such cases, the findings of facts by another other government agency may be considered as established, but, within 30 days of the notice of proposed debarment, the supplier may submit, in person or in writing, or through a representative, any additional facts, information, or argument to the vice president, Supply Management, and/or the Judicial Officer and to explain why debarment by the Postal Service should not be imposed.

(4) Questions of fact to be resolved by a hearing before the Judicial Office will be based on the preponderance of the evidence.

(5) After consideration of the circumstances and any information and argument submitted by the supplier, the vice president, Supply Management, in consultation with the General Counsel, will issue a written decision regarding whether the supplier is debarred, and, if so, for the period of debarment. The decision will be mailed to the supplier by Certified Mail, return receipt requested. A copy of the decision will be furnished to the Office of the Inspector General. The decision will be final and binding, unless (a) the decision was procured by fraud or other criminal misconduct or (b) the decision was obtained in violation of the regulations contained in this part or an applicable public law enacted by Congress.

(i) *Causes for suspension.* The vice president, Supply Management, may suspend any supplier, including any of its affiliates, if:

(1) The supplier commits, is indicted for, or is convicted of fraud or a criminal offense incidental to obtaining, attempting to obtain, or performing a government contract, violates a Federal antitrust statute arising out of the submission of bids and proposals, or commits or engages in embezzlement, theft, forgery, bribery, falsification or destruction of records, receipt of stolen property, or any other offense indicating a lack of business integrity or business honesty or

(2) If the Postal Service has notified a supplier of its proposed debarment under this Part.

(j) *Period of suspension.* A suspension will not exceed 1 year in duration, except a suspension may be extended for reasonable periods of time beyond 1 year by the vice president, Supply Management. The termination of a suspension will not prejudice the Postal Service's position in any debarment proceeding. A suspension will be superceded by a decision rendered by the vice president, Supply Management, under paragraph (h)(5) of this section.

(k) *Procedural requirements for suspension.* (1) The vice president, Supply Management, will notify a supplier of a suspension or an extension of a suspension and the reason(s) for the suspension or extension in writing sent to the supplier by Certified Mail, return receipt requested, within 10 days after the effective date of the suspension or extension. A copy of the notice will be furnished to the Office of the Inspector General.

(2) The notice will state the reason(s) for the suspension or extension.

(3) Within 30 days of notice of suspension or an extension, a supplier may submit to the vice president, Supply Management, in writing, any information or reason(s) the supplier believes makes a suspension or an extension inappropriate, and the vice

president, Supply Management, in consultation with the General Counsel, will consider the supplier's submission, and, in their discretion, may revoke a suspension or an extension of a suspension. If a suspension or extension is revoked, the revocation will be in writing and a copy of the revocation will be sent to the supplier by Certified Mail, return receipt requested. A copy of the revocation will be furnished to the Office of the Inspector General.

Neva Watson,

Attorney, Legislative.

BILLING CODE 7710–12–U

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[DE 070—1043b; FRL–7639–5]

Approval and Promulgation of Air Quality Implementation Plans; Delaware; Amendments to Regulation 24, Section 10—Aerospace Coatings

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve a revision to the State of Delaware State Implementation Plan (SIP). The revision corrects the definition of the term ''Fire-Resistant (interior) Coating'' in Delaware's regulation to control volatile organic compound (VOC) emissions from aerospace coatings operations. The correction to the definition makes it consistent with EPA's Control Technique Guideline (CTG) for this VOC source category. In the Final Rules section of this **Federal Register**, EPA is approving the State's SIP submittal as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this action, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time.

DATES: Comments must be received in writing by April 23, 2004.

ADDRESSES: Comments may be submitted either by mail or electronically. Written comments should be mailed to Makeba Morris, Chief, Air Quality Planning Branch, Mailcode 3AP21, U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103. Electronic comments should be sent either to *morris.makeba@epa.gov* or to *http://www.regulations.gov,* which is an alternative method for submitting electronic comments to EPA. To submit comments, please follow the detailed instructions described in the Supplementary Information section. Copies of the documents relevant to this action are available for public inspection during normal business hours at the Air Protection Division, U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103; the Air and Radiation Docket and Information Center, U.S. Environmental Protection Agency, 1301 Constitution Avenue, NW., Room B108, Washington, DC 20460; and Delaware Department of Natural Resources & Environmental Control, 89 Kings Highway, P.O. Box 1401, Dover, Delaware 19903.

FOR FURTHER INFORMATION CONTACT: Janice Lewis, (215) 814–2185, or by e-mail at *lewis.janice@epa.gov.*

SUPPLEMENTARY INFORMATION: For further information, please see the information provided in the direct final action, with the same title, that is located in the ''Rules and Regulations'' section of this **Federal Register** publication.

You may submit comments either electronically or by mail. To ensure proper receipt by EPA, identify the appropriate rulemaking identification number DE 070–1043 in the subject line on the first page of your comment. Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked ''late.'' EPA is not required to consider these late comments.

1. *Electronically.* If you submit an electronic comment as prescribed below, EPA recommends that you include your name, mailing address, and an e-mail address or other contact information in the body of your comment. Also include this contact information on the outside of any disk or CD ROM you submit, and in any cover letter accompanying the disk or CD ROM. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. EPA's policy is that EPA will not edit your comment, and any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

i. *E-mail.* Comments may be sent by electronic mail (e-mail) to *morris.makeba@epa.gov,* attention MD145/'54–3104. EPA's e-mail system is not an ''anonymous access'' system. If you send an e-mail comment directly without going through Regulations.gov, EPA's e-mail system automatically captures your e-mail address. E-mail addresses that are automatically captured by EPA's e-mail system are included as part of the comment that is placed in the official public docket.

ii. *Regulations.gov.* Your use of Regulation.gov is an alternative method of submitting electronic comments to EPA. Go directly to *http://www.regulations.gov,* then select ''Environmental Protection Agency'' at the top of the page and use the ''go'' button. The list of current EPA actions available for comment will be listed. Please follow the online instructions for submitting comments. The system is an ''anonymous access'' system, which means EPA will not know your identity, e-mail address, or other contact information unless you provide it in the body of your comment.

iii. *Disk or CD ROM.* You may submit comments on a disk or CD ROM that you mail to the mailing address identified in the **ADDRESSES** section of this document. These electronic submissions will be accepted in WordPerfect, Word or ASCII file format. Avoid the use of special characters and any form of encryption.

2. *By Mail.* Written comments should be addressed to the EPA Regional office listed in the **ADDRESSES** section of this document.

For public commenters, it is important to note that EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing at the EPA Regional Office, as EPA receives them and without change, unless the comment contains copyrighted material, confidential business information (CBI), or other information whose disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in the official public rulemaking file. The entire printed comment, including the

copyrighted material, will be available at the Regional Office for public inspection.

Submittal of CBI Comments

Do not submit information that you consider to be CBI electronically to EPA. You may claim information that you submit to EPA as CBI by marking any part or all of that information as CBI (if you submit CBI on disk or CD ROM, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2.

In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the official public regional rulemaking file. If you submit the copy that does not contain CBI on disk or CD ROM, mark the outside of the disk or CD ROM clearly that it does not contain CBI. Information not marked as CBI will be included in the public file and available for public inspection without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person identified in the **FOR FURTHER INFORMATION CONTACT** section.

Considerations When Preparing Comments to EPA

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.

2. Describe any assumptions that you used.

3. Provide any technical information and/or data you used that support your views.

4. If you estimate potential burden or costs, explain how you arrived at your estimate.

5. Provide specific examples to illustrate your concerns.

6. Offer alternatives.

7. Make sure to submit your comments by the comment period deadline identified.

8. To ensure proper receipt by EPA, identify the appropriate regional file/rulemaking identification number in the subject line on the first page of your response. It would also be helpful if you provided the name, date, and **Federal Register** citation related to your comments.

Dated: March 16, 2004.

Thomas C. Voltaggio,

Acting Regional Administrator, Region III.

[FR Doc. 04–6563 Filed 3–23–04; 8:45 am]

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 54, 61, and 69

[CC Docket Nos. 00-256 and 96-45; FCC 04-31]

Multi-Association Group (MAG) Plan for Regulation of Interstate Services of Non-Price Cap Incumbent Local Exchange Carriers and Interexchange Carriers; Federal-State Joint Board on Universal Service

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: By this *Second Further Notice of Proposed Rulemaking (NPRM),* the Commission initiates an NPRM seeking comment on two specific plans that propose establishing optional alternative regulation mechanisms for rate-of-return carriers. In conjunction with the consideration of those alternative regulation proposals, the Commission also seeks comment on modifications that would permit a rate-of-return carrier to adopt an alternative regulation plan for some study areas, while retaining rate-of-return regulation for other of its study areas.

DATES: Comments are due on or before April 23, 2004. Written comments by the public on the proposed information collections are due on or before April 23, 2004. Reply comments are due on or before May 10, 2004. Written reply comments by the public on the proposed information collections are due on or before May 10, 2004. Written comments must be submitted by the Office of Management and Budget (OMB) on the proposed information collection(s) on or before May 24, 2004.

ADDRESSES: All filings must be sent to the Commission's Secretary, Marlene H. Dortch, Office of the Secretary, Federal Communications Commission, Room TW–A325, 445 Twelfth Street SW., Washington, DC 20554. In addition to filing comments with the Secretary, a copy of any comments on the information collections contained herein must be submitted to Judith Boley Herman, Federal Communications Commission, Room 1–C804, 445 Twelfth Street SW., Washington, DC 20554, or via the Internet to *Judith-B.Herman@fcc.gov,* and to Kim A. Johnson, OMB Desk Officer, Room 10236 NEOB, 725 17th Street NW., Washington, DC 20503, or via the Internet to *Kim_A._Johnson@omb.eop.gov.*

FOR FURTHER INFORMATION CONTACT: Douglas Slotten, Wireline Competition Bureau, Pricing Policy Division, 202–418–1572, or Ted Burmeister, Wireline Competition Bureau, Telecommunications Access Policy Division, 202–418–7389. For additional information concerning the information collection(s) contained in this document, contact Judith Boley Herman at 202–418–0214, or via the Internet at *Judith-B.Herman@fcc.gov.*

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Second Further Notice of Proposed Rulemaking (NPRM) in CC Docket Nos. 96–45 and 00–256, adopted on February 12, 2004, and released on February 26, 2004. The complete text of this NPRM is available for public inspection Monday through Thursday from 8 a.m. to 4:30 p.m. and Friday from 8 a.m. to 11:30 a.m. in the Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, Room CY–A257, 445 Twelfth Street, SW., Washington, DC 20554. The complete text is also available on the Commission's Internet site at *www.fcc.gov.* Alternative formats are available to persons with disabilities by contacting Brian Millin at 202–418–7426 or TTY 202–418–7365. The complete text of the NPRM may be purchased from the Commission's duplicating contractor, Qualex International, Room CY–B402, 445 Twelfth Street, SW., Washington, DC 20554, telephone 202–863–2893, facsimile 202–863–2898, or e-mail at *qualexint@aol.com.*

Synopsis of Notice of Proposed Rulemaking

1. The Commission seeks additional comment on incentive regulation and on the all-or-nothing rule. CenturyTel, Inc. (CenturyTel) and a group of carriers (ALLTEL Communications, Inc. (ALLTEL), Madison River Communications, LLC (Madison River), and TDS Telecommunications Corporation (TDS)) filed separate alternative regulation proposals as *ex parte* filings in response to the 2001 notice. These two proposals each contain a feature that would permit a rate-of-return carrier to elect to move some, but not all, of its study areas to incentive regulation.

2. CenturyTel proposes a five-year plan that would modify the Commission's price cap rules to permit rate-of-return carriers to elect a modified

form of price cap regulation on a study area basis. The plan would eliminate the all-or-nothing rules contained in § 61.41(c)(2) and (3) so that rate-of-return carriers that acquire price cap exchanges need not convert to price caps at the holding company level. CenturyTel also proposes that the Commission eliminate § 61.41(b) so that rate-of-return carriers can elect price cap regulation on a study area basis.

3. Under CenturyTel's proposal, average traffic-sensitive (ATS) target rates would be established. These target traffic-sensitive rates in electing study areas would depend on line density at the holding company level, excluding lines acquired from mandatory price cap carriers. The plan would set the target rates at the lesser of: (1) $0.0125 per minute, or the actual rate for carriers with a line density of less than 15 lines per square mile; or (2) $0.0095 per minute, or the actual rate for carriers with a line density of at least 15, but less than 19, lines per square mile; or (3) the current levels up to a maximum ATS rate of $0.0095 per minute for carriers with a line density higher than 19 lines per square mile for carriers newly electing the plan. CenturyTel would have the Commission set the productivity factor, or X-Factor, at GDP–PI for carriers electing price caps under this plan. The plan would contain a low-end adjustment set at 10.25 percent to ensure reasonable earnings opportunities. Finally, the CenturyTel plan would permit a rate-of-return carrier to elect price caps for some study areas and remove those study areas from the National Exchange Carrier Association (NECA) pools, while leaving its other study areas in the NECA pools subject to rate-of-return regulation. CenturyTel proposes that rate-of-return carriers be able to choose alternative regulation at any annual or semi-annual tariff filing to be effective for the remainder of the five-year plan.

4. CenturyTel's plan would permit an electing rate-of-return carrier to move its rate to a target rate on a revenue-neutral basis by allowing a rate-of-return carrier to recover the difference between the target rate and its existing revenue requirement through an ATS additive to ICLS; the plan would freeze the ATS additive on a study area basis for the duration of the plan. The plan would also freeze Interstate Common Line Support (ICLS) and Long Term Support (LTS) on a per-line basis for electing carriers for the plan's duration, as well as freezing Local Switching Support (LSS) on a study area basis for the plan's duration. The $650 million fund of interstate CALLS support would not be available to the new price cap carriers. High-cost loop support would be frozen on a per-line basis, subject to adjustment for GDP–CPI.

5. The Rate-of-Return Carrier Tariff Option, filed by AllTel, Madison River, and TDS, would extend the current § 61.39 small carrier tariff option to all rate-of-return carriers, not just those serving 50,000 or fewer lines. Under this option, electing rate-of-return carriers would file tariffs for a two-year period, with rates based on historical costs and demand. Initial traffic-sensitive rates would be established using costs and demand for the previous calendar year, while rates for succeeding tariff periods would be based on the actual costs and demand of the two preceding years. Thus, efficiencies achieved during the two-year tariff period would not be reflected in the form of rates until the next two-year tariff period. Electing rate-of-return carriers would develop Subscriber Line Charges (SLCs) and other end user charges based on historical costs, just as they do for traffic-sensitive charges.

6. The Rate-of-Return Carrier Tariff Option would initially establish per-line, common line support at the historical level of costs recovered through universal service divided by the historical level of access lines. Specifically, the historical interstate common line revenue requirement, including line port and Transport Interconnection Charge (TIC) reallocations, would be reduced by SLC revenues, the Special Access Surcharge, the Line Port Costs in Excess of Basic Analog Service, and universal service funding assessments recovered from end users. The proposal would reassess the level of support every two years, based on the cost and demand levels during the previous two-year period. Finally, the proposal would not alter the manner in which LSS and high-cost loop support is calculated or obtained.

7. With the NPRM, the Commission takes a more focused look at the issues surrounding alternative regulation plans for rate-of-return carriers based on the two proposals presented to the Commission. In conjunction with that review, the Commission addresses the issues surrounding the retention or modification of the all-or-nothing rule as it relates to the ability of rate-of-return carriers to elect to adopt an alternative regulation plan for only some of its study areas. The Commission builds upon the record of its earlier notice as it proceeds with its evaluation of alternative regulation opportunities and the all-or-nothing rule.

8. The two plans each are premised on a carriers ability to elect alternative regulation on a study area basis, rather than at the holding company level, and thus are dependent on modification of the all-or-nothing rule. The Commission tentatively concludes that any alternative regulation plan it adopts will be optional on the part of the rate-of-return carrier and will permit a rate-of-return carrier to elect participation in the alternative plan by study area. The Commissions experience over the years in attempting to develop incentive regulation for smaller companies has led it to the view that it would not be possible to devise a plan suitable for mandatory imposition on all rate-of-return carriers. Likewise, it appears that most rate-of-return holding company groups are composed of very diverse operating companies, and that such companies will not be able to elect incentive regulation if they must do it on an all-or-nothing basis. The Commission seeks comment on these tentative conclusions, but asks that parties evaluate the plans as though they were going to be implemented on a study-area basis.

9. The Commission invites parties to comment on the two alternative regulation proposals in the record and asks whether one, both, or neither of the plans should be available. Parties may propose modifications to the two proposals. In doing so, they should be guided by the general inquiries that the Commission made in the 2001 *MAG NPRM* with respect to the evaluation of both alternative plans and the modification of the all-or-nothing rule. The Commission also asks parties to address the implications of CenturyTels proposed five-year time frame on the resolution of long-term access issues raised in the intercarrier compensation proceeding.

10. The CenturyTel plan essentially freezes access rates by proposing a productivity factor equal to GDP–PI, while the Rate-of-Return Carrier Tariff Option would adjust rates every two years to reflect any efficiency gains. The Commission invites parties to comment on whether these proposals would produce rates that would be just and reasonable, as required by section 201(b) of the Act, and not unreasonably discriminatory, as required by section 202(a) of the Act. Parties are asked to address whether the CenturyTel plan should contain a productivity factor other than GDP–PI. Parties proposing such productivity factors are asked to explain in detail how such factors can be accurately calculated for the diverse group of carriers currently subject to rate-of-return regulation. The use of GDP–PI would mean that lower traffic-sensitive rates resulting from traffic

growth would no longer occur as they would under rate-of-return regulation. Parties should address whether, as an alternative approach to an X-Factor, a G-factor should be used. A G-factor would adjust the rate cap for rates of traffic-sensitive services based on the rate of growth of the relevant traffic-sensitive measure, e.g., minutes. If so, should it be set based on historical data, or based on projections for the next tariff period? Alternatively, should the CenturyTel plan include a sharing mechanism if a productivity factor higher than that proposed, or a G-factor, is not adopted? Parties should address the need for, and level of, a low-end adjustment factor and how its level should be set in relation to any productivity factor, G-factor, or sharing requirement that might be adopted. Finally, the Commission invites parties to discuss the implications for the Commissions goals if CenturyTel were the only carrier to elect its proposed form of alternative regulation.

11. Parties are also invited to comment on the effect that each plan will have on the incentives of electing rate-of-return carriers to invest in, and maintain, their exchange access facilities and to ensure that service quality is not degraded. The Commission asks parties to evaluate the differences between the two plans on this score and to address what additional steps, if any, would be necessary to ensure that service quality does not decline in the face of any incentive to increase profits. The Commission also asks parties to address the effects that the option to elect by study area and at a time of the rate-of-return carriers choosing would have on these investment and service quality considerations.

12. Parties should also address the universal service aspects of the two plans. To what extent is either the CenturyTel plan or the Rate-of-Return Carrier Tariff Option likely to increase the size of the universal service fund, and how would support levels change over time? What effect, if any, would adoption of either plan have on the overall sustainability of universal service? What incentives would be created if, as CenturyTel proposes, high-cost loop support is fixed on a per-line basis and grows by GDP–PI, without regard to investment in loop facilities? With respect to either proposal, commenters should provide a detailed explanation as to how support should be calculated and the administrative burdens entailed. Commenters should also address how the proposal would serve the principles of section 254 of the Act.

13. The Commission tentatively concludes that the opportunity to elect alternative regulation on a study area basis should be available only to holding company groups in which all non-average schedule companies file their own cost-based tariffs. The Commission is especially concerned about the ability of any NECA internal process, or formula, to insulate the remaining pool members from the risk that may be introduced by a carriers adoption of an alternative regulation plan. It will also be important to consider the extent to which pool participation makes cost shifting more difficult to detect. Parties should also address what modifications in tariff cost support rules and/or reporting requirements would be necessary under two scenarios: (1) The Commission were to require holding companies electing alternative regulation to remove all study areas from the NECA pools, and (2) the Commission were to permit some or all study areas of rate-of-return carriers electing alternative regulation to participate in the NECA pools.

14. The Commission tentatively concludes that existing accounting and regulatory processes should permit parties and the Commission to detect cost shifting by the rate-of-return carriers that file cost-based access tariffs. Interexchange carriers (IXCs) and competitors argue that the incentive for rate-of-return carriers to shift costs continues to exist and that existing processes are inadequate to check such cost shifting. The Commission notes that this debate has been joined in very general terms, with little in the way of specific detail. The Commission asks parties to identify the most significant means by which a rate-of-return carrier could shift costs from a study area electing an alternative regulation plan to a study area subject to rate-of-return regulation. Parties should also describe why existing procedures will, or will not, permit the cost shift to be identified and quantified. To the extent parties argue that existing processes are inadequate, the Commission invites them to identify with specificity what additional reporting or regulatory procedures would allow the parties and the Commission to identify and quantify cost shifts.

15. The debate over incentive regulation is often clouded by uncertainty as to whether the CALLS plan contemplated that additional study areas would enter that plan during its five-year term. Three years have passed and no rate-of-return carrier has sought entry. To eliminate the uncertainty, the Commission tentatively concludes that the CALLS plan was not designed to be open to new carriers or study areas. The CALLS plan began as a voluntarily negotiated agreement among price cap carriers and certain IXCs that addressed pricing and universal service concerns as a package, without consideration of possible participation by carriers that were then under rate-of-return regulation. That CALLS was not intended to accommodate additional entry is most clearly indicated by the fact that in adopting the plan, the Commission made no provision for how the universal service component of the CALLS plan would address future expansion to new carriers. The Commission therefore believes the rules should be amended to clarify that new carriers or carrier study areas may not elect this plan. The Commission invites parties to comment on this tentative conclusion.

16. The Commission also tentatively concludes that, whatever final rule it adopts with respect to the election of alternative regulation on a study area basis, that rule should also apply when carriers under different regulatory plans come together by merger or acquisition. This would include those cases in which a price cap carrier acquired a rate-of-return study area, but could not bring it into the CALLS plan, if the Commission adopts its tentative conclusion in the previous paragraph. Thus, if the Commission were to permit rate-of-return carriers to elect alternative regulation by study area, the current ALLTEL/Aliant, Verizon/PRTC, and Valor/Kerrville waivers of the all-or-nothing rule would no longer be necessary. Under this tentative conclusion, affected carriers would continue to receive universal service support through the preexisting support mechanism(s). The Commission seeks comment on this tentative conclusion. Parties opposing this approach should indicate how they would harmonize the interrelated considerations arising from mergers or acquisitions between carriers subject to different regulatory regimes.

Procedural Matters

Ex Parte Requirements

17. This proceeding will continue to be governed by ''permit-but-disclose'' *ex parte* procedures that are applicable to non-restricted proceedings under 47 CFR 1.1206. Parties making oral *ex parte* presentations are reminded that memoranda summarizing the presentation must contain a summary of the substance of the presentation and not merely a listing of the subjects discussed. More than a one- or two-sentence description of the views and arguments presented generally is

required. *See* 47 CFR 1.1206(b)(2). Other rules pertaining to oral and written presentations are set forth in § 1.1206(b) as well. Interested parties are to file any written *ex parte* presentations in this proceeding with the Commission's Secretary, Marlene H. Dortch, 445 12th Street, SW., TW–B204, Washington, DC 20554, and serve with one copy: Pricing Policy Division, Wireline Competition Bureau, 445 12th Street, SW., Room 5–A452, Washington, DC 20554, Attn: Douglas Slotten. Parties shall also serve with one copy: Qualex International, Portals II, 445 12th Street, SW., Room CY–B402, Washington, DC 20554, (202) 863–2893, *qualexint@aol.com.*

Paperwork Reduction Act Analysis

18. The NPRM contains either a proposed or modified information collection. As part of the continuing effort to reduce paperwork burdens, the Commission invites the general public and the OMB to comment on the information collections contained in this *NPRM,* as required by the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.* Public and agency comments are due at the same time as other comments on this *NPRM;* OMB comments are due 60 days from the date of publication of this *NPRM* in the **Federal Register**. Comments should address: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (2) the accuracy of the Commission's burden estimates; (3) ways to enhance the quality, utility, and clarity of the information collected; and (4) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

Initial Regulatory Flexibility Act Analysis

19. The Regulatory Flexibility Act of 1980, as amended (RFA), requires that an initial regulatory flexibility analysis be prepared for notice-and-comment rule making proceedings, unless the agency certifies that ''the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.'' The RFA generally defines the term ''small entity'' as having the same meaning as the terms ''small business,'' ''small organization,'' and ''small governmental jurisdiction.'' In addition, the term ''small business'' has the same meaning as the term ''small business concern'' under the Small Business Act. A ''small business concern'' is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA.

20. As required by the RFA, the Commission has prepared this IRFA of the possible significant economic impact on a substantial number of small entities by the policies and rules proposed in this *NPRM.* Written public comments are requested on this IRFA. Comments must be identified as responses to the IRFA and must be filed by the deadlines for comments on the NPRM.

Need for, and Objectives of, the Proposed Rules

21. The Commission continues to explore means of providing incentives for smaller telephone companies to become more efficient and innovative in ways that benefit both rate-of-return carriers and their customers. The NPRM seeks additional comment on two alternative incentive regulation proposals for all rate-of-return carriers, and on the closely related all-or-nothing rule.

22. The alternative incentive regulation plans were filed by CenturyTel (the CenturyTel Plan) and by ALLTEL, Madison River and TDS (the Rate-of-Return Carrier Tariff Option). The CenturyTel Plan proposes to lower traffic-sensitive charges, according to participation on a study area-by-study area basis, to target rates based on specific average traffic-sensitive target rates determined by line density. The CenturyTel Plan would apply an X-Factor equal to GDP–PI. The CenturyTel Plan would convert universal service support to per-line amounts, with ICLS and LSS being frozen for the five-year duration of the proposed plan and high-cost loop support being frozen subject to adjustment for GDP–CPI. Finally, CenturyTel proposes that carriers should be allowed to take certain study areas out of the NECA pools and into alternative regulation, while leaving other study areas in the pools, subject to rate-of-return regulation. The Rate-of-Return Carrier Tariff Option would allow all rate-of-return carriers (not just those serving 50,000 or fewer lines) to elect to adopt a revised § 61.39 approach under which they would file access tariffs every two years based on the previous two years' historical cost and demand data. The Rate-of-Return Carrier Tariff Option would provide a participating company with a per-line ICLS based on two years of historical data. Finally, both plans would make participation in the alternative regulation plan optional, and would allow election by study area.

23. The NPRM tentatively concludes that any alternative regulation plan that the Commission may adopt should be optional on the part of the rate-of-return carrier, with participation through election on a study area basis. Additionally, such participation should be available only to holding company groups in which all non-average schedule companies file their own cost-based tariffs. Among the issues on which the *NPRM* seeks comment are whether the two plans will produce rates that are just and reasonable and not unreasonably discriminatory for all entities, including small entities. The *NPRM* also asks whether the CenturyTel Plan should contain a productivity factor other than GDP–PI, whether a G-factor should be used as an alternative approach to an X-factor, and whether it should be based on historical data or on projections for the next tariff period. In addition, the *NPRM* asks about the effect each plan will have on rate-of-return carriers' investment and maintenance of their exchange access facilities, whether service quality will be degraded, and whether the universal service fund will be increased.

24. The *NPRM* also tentatively concludes that existing accounting and regulatory processes should equip parties and the Commission to detect cost-shifting by the rate-of-return carriers that file cost-based access tariffs. Nonetheless, the Commission asks commenters to identify the ways that a rate-of-return carrier could shift costs from a study area electing an alternative regulation plan to a study area subject to rate-of-return regulation. The Commission also asks commenters to identify what additional reporting or regulatory procedures would help detect and prevent such cost shifting. The NPRM tentatively concludes that the rules should be amended to indicate that new carriers or carrier study areas may not elect the CALLS plan because it was not designed to be open to new carriers or study areas. Finally, the Commission also tentatively concludes that the option to elect alternative regulation on a study area basis, if adopted, should also be available when carriers under different regulatory plans come together by merger or acquisition.

Legal Basis

25. This rulemaking action is supported by sections 4(i), 4(j), 201–205, 254, and 403 of the Communications Act of 1934, as amended.

Description and Estimate of the Number of Small Entities to Which the Notice Will Apply

26. The RFA directs agencies to provide a description of, and, where feasible, an estimate of the number of small entities that may be affected by the rules proposed herein. In this section, the Commission further describes and estimates the number of small entity licensees and regulatees that may also be directly affected by proposals contained in this NPRM. The most reliable source of information regarding the total numbers of certain common carrier and related providers nationwide, as well as the number of commercial wireless entities, appears to be the data that the Commission publishes in its *Trends in Telephone Service* report. The SBA has developed small business size standards for wireline and wireless small businesses within the three commercial census categories of Wired Telecommunications Carriers, Paging, and Cellular and Other Wireless Telecommunications. Under these categories, a business is small if it has 1,500 or fewer employees. Below, using the above size standards and others, the commission discusses the total estimated numbers of small businesses that might be affected by its actions.

27. The commission includes small incumbent LECs in this present RFA analysis. As noted above, a ''small business'' under the RFA is one that, *inter alia,* meets the pertinent small business size standard (*e.g.,* a wired telecommunications carrier having 1,500 or fewer employees), and ''is not dominant in its field of operation.'' The SBA's Office of Advocacy contends that, for RFA purposes, small incumbent LECs are not dominant in their field of operation because any such dominance is not ''national'' in scope. The Commission therefore includes small incumbent LECs in this RFA analysis, although it emphasizes that this RFA action has no effect on Commission analyses and determinations in other, non-RFA contexts.

28. *Wired Telecommunications Carriers.* The SBA has developed a small business size standard for Wired Telecommunications Carriers, which consists of all such companies having 1,500 or fewer employees. According to Census Bureau data for 1997, there were 2,225 firms in this category, total, that operated for the entire year. Of this total, 2,201 firms had employment of 999 or fewer employees, and an additional 24 firms had employment of 1,000 employees or more. Thus, under this size standard, the majority of firms can be considered small.

29. *Incumbent Local Exchange Carriers (LECs).* Neither the Commission nor the SBA has developed a size standard for small businesses specifically applicable to incumbent local exchange services. The closest applicable size standard under SBA rules is for Wired Telecommunications Carriers. Under that size standard, such a business is small if it has 1,500 or fewer employees. According to Commission data, 1,337 carriers reported that they were engaged in the provision of local exchange services. Of these 1,337 carriers, an estimated 1,032 have 1,500 or fewer employees and 305 have more than 1,500 employees. Consequently, the Commission estimates that most providers of incumbent local exchange service are small businesses that may be affected by the proposed rules and policies.

30. *Competitive Local Exchange Carriers (CLECs), Competitive Access Providers (CAPs), and ''Other Local Exchange Carriers.''* Neither the Commission nor the SBA has developed a size standard for small businesses specifically applicable to providers of competitive exchange services or to competitive access providers or to ''Other Local Exchange Carriers,'' all of which are discrete categories under which TRS data are collected. The closest applicable size standard under SBA rules is for Wired Telecommunications Carriers. Under that size standard, such a business is small if it has 1,500 or fewer employees. According to Commission data, 609 companies reported that they were engaged in the provision of either competitive access provider services or competitive local exchange carrier services. Of these 609 companies, an estimated 458 have 1,500 or fewer employees and 151 have more than 1,500 employees. In addition, 35 carriers reported that they were ''Other Local Service Providers.'' Of the 35 ''Other Local Service Providers,'' an estimated 34 have 1,500 or fewer employees and one has more than 1,500 employees. Consequently, the Commission estimates that most providers of competitive local exchange service, competitive access providers, and ''Other Local Exchange Carriers'' are small entities that may be affected by the proposed rules and policies.

31. *Interexchange Carriers (IXCs).* Neither the Commission nor the SBA has developed a size standard for small businesses specifically applicable to interexchange services. The closest applicable size standard under SBA rules is for Wired Telecommunications Carriers. Under that size standard, such a business is small if it has 1,500 or fewer employees. According to Commission data, 261 companies reported that their primary telecommunications service activity was the provision of interexchange services. Of these 261 companies, an estimated 223 have 1,500 or fewer employees and 38 have more than 1,500 employees. Consequently, the Commission estimates that the majority of interexchange service providers are small entities that may be affected by the proposed rules and policies.

32. *Operator Service Providers (OSPs).* Neither the Commission nor the SBA has developed a size standard for small businesses specifically applicable to operator service providers. The closest applicable size standard under SBA rules is for Wired Telecommunications Carriers. Under that size standard, such a business is small if it has 1,500 or fewer employees. According to Commission data, 23 companies reported that they were engaged in the provision of operator services. Of these 23 companies, an estimated 22 have 1,500 or fewer employees and one has more than 1,500 employees. Consequently, the Commission estimates that the majority of operator service providers are small entities that may be affected by the proposed rules and policies.

33. *Payphone Service Providers (PSPs).* Neither the Commission nor the SBA has developed a size standard for small businesses specifically applicable to payphone service providers. The closest applicable size standard under SBA rules is for Wired Telecommunications Carriers. Under that size standard, such a business is small if it has 1,500 or fewer employees. According to Commission data, 761 companies reported that they were engaged in the provision of payphone services. Of these 761 companies, an estimated 757 have 1,500 or fewer employees and four have more than 1,500 employees. Consequently, the Commission estimates that the majority of payphone service providers are small entities that may be affected by the proposed rules and policies.

34. *Prepaid Calling Card Providers.* The SBA has developed a size standard for a small business within the category of Telecommunications Resellers. Under that SBA size standard, such a business is small if it has 1,500 or fewer employees. According to Commission data, 37 companies reported that they were engaged in the provision of prepaid calling cards. Of these 37 companies, an estimated 36 have 1,500 or fewer employees and one has more

than 1,500 employees. Consequently, the Commission estimates that the majority of prepaid calling card providers are small entities that may be affected by the proposed rules and policies.

35. *Other Toll Carriers.* Neither the Commission nor the SBA has developed a size standard for small businesses specifically applicable to ''Other Toll Carriers.'' This category includes toll carriers that do not fall within the categories of interexchange carriers, operator service providers, prepaid calling card providers, satellite service carriers, or toll resellers. The closest applicable size standard under SBA rules is for Wired Telecommunications Carriers. Under that size standard, such a business is small if it has 1,500 or fewer employees. According to Commission's data, 92 companies reported that their primary telecommunications service activity was the provision of other toll carriage. Of these 92 companies, an estimated 82 have 1,500 or fewer employees and ten have more than 1,500 employees. Consequently, the Commission estimates that most ''Other Toll Carriers'' are small entities that may be affected by the proposed rules and policies.

36. *Paging.* The SBA has developed a small business size standard for Paging, which consists of all such firms having 1,500 or fewer employees. According to Census Bureau data for 1997, in this category there was a total of 1,320 firms that operated for the entire year. Of this total, 1,303 firms had employment of 999 or fewer employees, and an additional seventeen firms had employment of 1,000 employees or more. Thus, under this size standard, the majority of firms can be considered small.

37. *Cellular and Other Wireless Telecommunications.* The SBA has developed a small business size standard for Cellular and Other Wireless Telecommunication, which consists of all such firms having 1,500 or fewer employees. According to Census Bureau data for 1997, in this category there was a total of 977 firms that operated for the entire year. Of this total, 965 firms had employment of 999 or fewer employees, and an additional twelve firms had employment of 1,000 employees or more. Thus, under this size standard, the majority of firms can be considered small.

38. *Broadband Personal Communications Service.* The broadband Personal Communications Service (PCS) spectrum is divided into six frequency blocks designated A through F, and the Commission has held auctions for each block. The Commission defined ''small entity'' for Blocks C and F as an entity that has average gross revenues of $40 million or less in the three previous calendar years. For Block F, an additional classification for ''very small business'' was added and is defined as an entity that, together with its affiliates, has average gross revenues of not more than $15 million for the preceding three calendar years.'' These standards defining ''small entity'' in the context of broadband PCS auctions have been approved by the SBA. No small businesses, within the SBA-approved small business size standards bid successfully for licenses in Blocks A and B. There were 90 winning bidders that qualified as small entities in the Block C auctions. A total of 93 small and very small business bidders won approximately 40 percent of the 1,479 licenses for Blocks D, E, and F. On March 23, 1999, the Commission re-auctioned 347 C, D, E, and F Block licenses. There were 48 small business winning bidders. On January 26, 2001, the Commission completed the auction of 422 C and F Broadband PCS licenses in Auction No. 35. Of the 35 winning bidders in this auction, 29 qualified as ''small'' or ''very small'' businesses. Based on this information, the Commission concludes that the number of small broadband PCS licenses will include the 90 winning C Block bidders, the 93 qualifying bidders in the D, E, and F Block auctions, the 48 winning bidders in the 1999 re-auction, and the 29 winning bidders in the 2001 re-auction, for a total of 260 small entity broadband PCS providers, as defined by the SBA small business size standards and the Commission's auction rules. The Commission notes that, as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Also, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated.

39. *Narrowband Personal Communications Services.* To date, two auctions of narrowband personal communications services (PCS) licenses have been conducted. For purposes of the two auctions that have already been held, ''small businesses'' were entities with average gross revenues for the prior three calendar years of $40 million or less. Through these auctions, the Commission has awarded a total of 41 licenses, out of which 11 were obtained by small businesses. To ensure meaningful participation of small business entities in future auctions, the Commission has adopted a two-tiered small business size standard in the *Narrowband PCS Second Report and Order.* A ''small business'' is an entity that, together with affiliates and controlling interests, has average gross revenues for the three preceding years of not more than $40 million. A ''very small business'' is an entity that, together with affiliates and controlling interests, has average gross revenues for the three preceding years of not more than $15 million. The SBA has approved these small business size standards. In the future, the Commission will auction 459 licenses to serve Metropolitan Trading Areas (MTAs) and 408 response channel licenses. There is also one megahertz of narrowband PCS spectrum that has been held in reserve and that the Commission has not yet decided to release for licensing. The Commission cannot predict accurately the number of licenses that will be awarded to small entities in future actions. However, four of the 16 winning bidders in the two previous narrowband PCS auctions were small businesses, as that term was defined under the Commission's Rules. The Commission assumes, for purposes of this analysis, that a large portion of the remaining narrowband PCS licenses will be awarded to small entities. The Commission also assumes that at least some small businesses will acquire narrowband PCS licenses by means of the Commission's partitioning and disaggregation rules.

40. *220 MHz Radio Service—Phase I Licensees.* The 220 MHz service has both Phase I and Phase II licenses. Phase I licensing was conducted by lotteries in 1992 and 1993. There are approximately 1,515 such non-nationwide licensees and four nationwide licensees currently authorized to operate in the 220 MHz band. The Commission has not developed a small business size standard for small entities specifically applicable to such incumbent 220 MHz Phase I licensees. To estimate the number of such licensees that are small businesses, the Commission applies the small business size standard under the SBA rules applicable to ''Cellular and Other Wireless Telecommunications'' companies. This standard provides that such a company is small if it employs no more than 1,500 persons. According to Census Bureau data for 1997, there were 977 firms in this category, that operated for the entire year. Of this total, 965 firms had employment of 999 or fewer employees, and an additional 12 firms had employment of 1,000

employees or more. If this general ratio continues in the context of Phase I 220 MHz licensees, the Commission estimates that nearly all such licensees are small businesses under the SBA's small business size standard.

41. *220 MHz Radio Service—Phase II Licensees.* The 220 MHz service has both Phase I and Phase II licenses. The Phase II 220 MHz service is a new service, and is subject to spectrum auctions. In the *220 MHz Third Report and Order*, the Commission adopted a small business size standard for ''small'' and ''very small'' businesses for purposes of determining their eligibility for special provisions such as bidding credits and installment payments. This small business size standard indicates that a ''small business'' is an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding $15 million for the preceding three years. A ''very small business'' is an entity that, together with its affiliates and controlling principals, has average gross revenues that do not exceed $3 million for the preceding three years. The SBA has approved these small business size standards. Auctions of Phase II licenses commenced on September 15, 1998, and closed on October 22, 1998. In the first auction, 908 licenses were auctioned in three different-sized geographic areas: Three nationwide licenses, 30 Regional Economic Area Group (EAG) Licenses, and 875 Economic Area (EA) Licenses. Of the 908 licenses auctioned, 693 were sold. Thirty-nine small businesses won licenses in the first 220 MHz auction. The second auction included 225 licenses: 216 EA licenses and 9 EAG licenses. Fourteen companies claiming small business status won 158 licenses.

42. *800 MHz and 900 MHz Specialized Mobile Radio Licenses.* The Commission awards ''small entity'' and ''very small entity'' bidding credits in auctions for Specialized Mobile Radio (SMR) geographic area licenses in the 900 MHz bands to firms that had revenues of no more than $15 million in each of the three previous calendar years, or that had revenues of no more than $3 million in each of the previous calendar years. The SBA has approved these size standards. The Commission awards ''small entity'' and ''very small entity'' bidding credits in auctions for Specialized Mobile Radio (SMR) geographic area licenses in the 800 MHz bands to firms that had revenues of no more than $40 million in each of the three previous calendar years, or that had revenues of no more than $15 million in each of the previous calendar years. These bidding credits apply to SMR providers in the 800 MHz and 900 MHz bands that either hold geographic area licenses or have obtained extended implementation authorizations. The Commission does not know how many firms provide 800 MHz or 900 MHz geographic area SMR service pursuant to extended implementation authorizations, nor how many of these providers have annual revenues of no more than $15 million. One firm has over $15 million in revenues. The Commission assumes, for purposes here, that all of the remaining existing extended implementation authorizations are held by small entities, as that term is defined by the SBA. The Commission has held auctions for geographic area licenses in the 800 MHz and 900 MHz SMR bands. There were 60 winning bidders that qualified as small or very small entities in the 900 MHz SMR auctions. Of the 1,020 licenses won in the 900 MHz auction, bidders qualifying as small or very small entities won 263 licenses. In the 800 MHz auction, 38 of the 524 licenses won were won by small and very small entities. The Commission notes that, as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Also, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated.

43. *Private and Common Carrier Paging. In the Paging Third Report and Order,* the Commission developed a small business size standard for ''small businesses'' and ''very small businesses'' for purposes of determining their eligibility for special provisions such as bidding credits and installment payments. A ''small business'' is an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding $15 million for the preceding three years. Additionally, a ''very small business'' is an entity that, together with its affiliates and controlling principals, has average gross revenues that are not more than $3 million for the preceding three years. The SBA has approved these size standards. An auction of Metropolitan Economic Area licenses commenced on February 24, 2000, and closed on March 2, 2000. Of the 985 licenses auctioned, 440 were sold. Fifty-seven companies claiming small business status won. At present, there are approximately 24,000 Private-Paging site-specific licenses and 74,000 Common Carrier Paging licenses. According to the most recent *Trends in Telephone Service*, 471 carriers reported that they were engaged in the provision of either paging and messaging services or other mobile services. Of those, the Commission estimates that 450 are small, under the SBA business size standard specifying that firms are small if they have 1,500 or fewer employees.

44. *700 MHz Guard Band Licensees.* In the 700 MHz Guard Band Order, the Commission adopted a small business size standard for ''small businesses'' and ''very small businesses'' for purposes of determining their eligibility for special provisions such as bidding credits and installment payments. A ''small business'' as an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding $15 million for the preceding three years. Additionally, a ''very small business'' is an entity that, together with its affiliates and controlling principals, has average gross revenues that are not more than $3 million for the preceding three years. An auction of 52 Major Economic Area (MEA) licenses commenced on September 6, 2000, and closed on September 21, 2000. Of the 104 licenses auctioned, 96 licenses were sold to nine bidders. Five of these bidders were small businesses that won a total of 26 licenses. A second auction of 700 MHz Guard Band licenses commenced on February 13, 2001 and closed on February 21, 2001. All eight of the licenses auctioned were sold to three bidders. One of these bidders was a small business that won a total of two licenses.

45. *Rural Radiotelephone Service.* The Commission has not adopted a size standard for small businesses specific to the Rural Radiotelephone Service. A significant subset of the Rural Radiotelephone Service is the Basic Exchange Telephone Radio System (BETRS). The Commission uses the SBA's small business size standard applicable to ''Cellular and Other Wireless Telecommunications,'' *i.e.*, an entity employing no more than 1,500 persons. There are approximately 1,000 licensees in the Rural Radiotelephone Service, and the Commission estimates that there are 1,000 or fewer small entity licensees in the Rural Radiotelephone Service that may be affected by the proposed rules and policies.

46. *Air-Ground Radiotelephone Service.* The Commission has not adopted a small business size standard specific to the Air-Ground Radiotelephone Service. The Commission will use SBA's small business size standard applicable to ''Cellular and Other Wireless Telecommunications,'' *i.e.,* an entity employing no more than 1,500 persons.

There are approximately 100 licensees in the Air-Ground Radiotelephone Service, and the Commission estimates that almost all of them qualify as small under the SBA small business size standard.

47. *Aviation and Marine Radio Services.* Small businesses in the aviation and marine radio services use a very high frequency (VHF) marine or aircraft radio and, as appropriate, an emergency position-indicating radio beacon (and/or radar) or an emergency locator transmitter. The Commission has not developed a small business size standard specifically applicable to these small businesses. For purposes of this analysis, the Commission uses the SBA small business size standard for the category ''Cellular and Other Telecommunications,'' which is 1,500 or fewer employees. Most applicants for recreational licenses are individuals. Approximately 581,000 ship station licensees and 131,000 aircraft station licensees operate domestically and are not subject to the radio carriage requirements of any statute or treaty. For purposes of its evaluations in this analysis, the Commission estimates that there are up to approximately 712,000 licensees that are small businesses (or individuals) under the SBA standard. In addition, between December 3, 1998 and December 14, 1998, the Commission held an auction of 42 VHF Public Coast licenses in the 157.1875–157.4500 MHz (ship transmit) and 161.775–162.0125 MHz (coast transmit) bands. For purposes of the auction, the Commission defined a ''small'' business as an entity that, together with controlling interests and affiliates, has average gross revenues for the preceding three years not to exceed $15 million. In addition, a ''very small'' business is one that, together with controlling interests and affiliates, has average gross revenues for the preceding three years not to exceed $3 million. There are approximately 10,672 licensees in the Marine Coast Service, and the Commission estimates that almost all of them qualify as ''small'' businesses under the above special small business size standards.

48. *Fixed Microwave Services.* Fixed microwave services include common carrier, private operational-fixed and broadcast auxiliary radio services. At present, there are approximately 22,015 common carrier fixed licensees and 61,670 private operational-fixed licensees and broadcast auxiliary radio licensees in the microwave services. The Commission has not created a size standard for a small business specifically with respect to fixed microwave services. For purposes of this analysis, the Commission uses the SBA small business size standard for the category ''Cellular and Other Telecommunications,'' which is 1,500 or fewer employees. The Commission does not have data specifying the number of these licensees that have more than 1,500 employees, and thus is unable at this time to estimate with greater precision the number of fixed microwave service licensees that would qualify as small business concerns under the SBA's small business size standard. Consequently, the Commission estimates that there are up to 22,015 common carrier fixed licensees and up to 61,670 private operational-fixed licensees and broadcast auxiliary radio licensees in the microwave services that may be small and may be affected by the proposed rules and policies. The Commission notes, however, that the common carrier microwave fixed licensee category includes some large entities.

49. *Offshore Radiotelephone Service.* This service operates on several UHF television broadcast channels that are not used for television broadcasting in the coastal areas of states bordering the Gulf of Mexico. There are presently approximately 55 licensees in this service. The Commission is unable to estimate at this time the number of licensees that would qualify as small under the SBA's small business size standard for ''Cellular and Other Wireless Telecommunications'' services. Under that SBA small business size standard, a business is small if it has 1,500 or fewer employees.

50. *Wireless Communications Services.* This service can be used for fixed, mobile, radiolocation, and digital audio broadcasting satellite uses. The Commission established small business size standards for the wireless communications services (WCS) auction. A ''small business'' is an entity with average gross revenues of $40 million for each of the three preceding years, and a ''very small business'' is an entity with average gross revenues of $15 million for each of the three preceding years. The SBA has approved these small business size standards. The Commission auctioned geographic area licenses in the WCS service. In the auction, there were seven winning bidders that qualified as ''very small business'' entities, and one that qualified as a ''small business'' entity. The Commission concludes that the number of geographic area WCS licensees affected by this analysis includes these eight entities.

51. *39 GHz Service.* The Commission created a special small business size standard for 39 GHz licenses—an entity that has average gross revenues of $40 million or less in the three previous calendar years. An additional size standard for ''very small business'' is: An entity that, together with affiliates, has average gross revenues of not more than $15 million for the preceding three calendar years. The SBA has approved these small business size standards. The auction of the 2,173 39 GHz licenses began on April 12, 2000 and closed on May 8, 2000. The 18 bidders who claimed small business status won 849 licenses. Consequently, the Commission estimates that 18 or fewer 39 GHz licensees are small entities that may be affected by the proposed rules and policies.

52. *Multipoint Distribution Service, Multichannel Multipoint Distribution Service, and ITFS.* Multichannel Multipoint Distribution Service (MMDS) systems, often referred to as ''wireless cable,'' transmit video programming to subscribers using the microwave frequencies of the Multipoint Distribution Service (MDS) and Instructional Television Fixed Service (ITFS). In connection with the 1996 MDS auction, the Commission established a small business size standard as an entity that had annual average gross revenues of less than $40 million in the previous three calendar years. The MDS auctions resulted in 67 successful bidders obtaining licensing opportunities for 493 Basic Trading Areas (BTAs). Of the 67 auction winners, 61 met the definition of a small business. MDS also includes licensees of stations authorized prior to the auction. In addition, the SBA has developed a small business size standard for Cable and Other Program Distribution, which includes all such companies generating $12.5 million or less in annual receipts. According to Census Bureau data for 1997, there were a total of 1,311 firms in this category, total, that had operated for the entire year. Of this total, 1,180 firms had annual receipts of under $10 million and an additional 52 firms had receipts of $10 million or more but less than $25 million. Consequently, the Commission estimates that the majority of providers in this service category are small businesses that may be affected by the proposed rules and policies. This SBA small business size standard also appears applicable to ITFS. There are presently 2,032 ITFS licensees. All but 100 of these licenses are held by educational institutions. Educational institutions are included in this analysis as small entities. Thus, the Commission

tentatively concludes that at least 1,932 licensees are small businesses.

53. *Local Multipoint Distribution Service.* Local Multipoint Distribution Service (LMDS) is a fixed broadband point-to-multipoint microwave service that provides for two-way video telecommunications. The auction of the 1,030 Local Multipoint Distribution Service (LMDS) licenses began on February 18, 1998 and closed on March 25, 1998. The Commission established a small business size standard for LMDS licenses as an entity that has average gross revenues of less than $40 million in the three previous calendar years. An additional small business size standard for ''very small business'' was added as an entity that, together with its affiliates, has average gross revenues of not more than $15 million for the preceding three calendar years. The SBA has approved these small business size standards in the context of LMDS auctions. There were 93 winning bidders that qualified as small entities in the LMDS auctions. A total of 93 small and very small business bidders won approximately 277 A Block licenses and 387 B Block licenses. On March 27, 1999, the Commission re-auctioned 161 licenses; there were 40 winning bidders. Based on this information, the Commission concludes that the number of small LMDS licenses consists of the 93 winning bidders in the first auction and the 40 winning bidders in the re-auction, for a total of 133 small entity LMDS providers.

54. *218–219 MHz Service.* The first auction of 218–219 MHz spectrum resulted in 170 entities winning licenses for 594 Metropolitan Statistical Area licenses. Of the 594 licenses, 557 were won by entities qualifying as a small business. For that auction, the small business size standard was an entity that, together with its affiliates, has no more than a $6 million net worth and, after federal income taxes (excluding any carry over losses), has no more than $2 million in annual profits each year for the previous two years. In the *218–219 MHz Report and Order and Memorandum Opinion and Order*, the Commission established a small business size standard for a ''small business'' as an entity that, together with its affiliates and persons or entities that hold interests in such an entity and their affiliates, has average annual gross revenues not to exceed $15 million for the preceding three years. A ''very small business'' is defined as an entity that, together with its affiliates and persons or entities that hold interests in such an entity and its affiliates, has average annual gross revenues not to exceed $3 million for the preceding three years. The SBA has approved these size standards. The Commission cannot estimate, however, the number of licenses that will be won by entities qualifying as small or very small businesses under the Commission's rules in future auctions of 218–219 MHz spectrum.

55. *24 GHz—Incumbent Licensees.* This analysis may affect incumbent licensees who were relocated to the 24 GHz band from the 18 GHz band, and applicants who wish to provide services in the 24 GHz band. The applicable SBA small business size standard is that of ''Cellular and Other Wireless Telecommunications'' companies. This category provides that such a company is small if it employs no more than 1,500 persons. According to Census Bureau data for 1997, there were 977 firms in this category that operated for the entire year. Of this total, 965 firms had employment of 999 or fewer employees, and an additional 12 firms had employment of 1,000 employees or more. Thus, under this size standard, the great majority of firms can be considered small. These broader census data notwithstanding, the Commission believes that there are only two licensees in the 24 GHz band that were relocated from the 18 GHz band, Teligent and TRW, Inc. It is the Commission's understanding that Teligent and its related companies have less than 1,500 employees, though this may change in the future. TRW is not a small entity. Thus, only one incumbent licensee in the 24 GHz band is a small business entity.

56. *24 GHz—Future Licensees.* With respect to new applicants in the 24 GHz band, the small business size standard for ''small business'' is an entity that, together with controlling interests and affiliates, has average annual gross revenues for the three preceding years not in excess of $15 million. ''Very small business'' in the 24 GHz band is an entity that, together with controlling interests and affiliates, has average gross revenues not exceeding $3 million for the preceding three years. The SBA has approved these small business size standards. These size standards will apply to the future auction, if held.

Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements

57. The *NPRM* explores options for developing an alternative regulatory structure that would be available to those rate-of-return carriers electing it. It considers the widely varying operating circumstances of rate-of-return carriers, the implications of competitive and intrastate regulatory conditions on the options available, and the need to facilitate and ensure the deployment of advanced services in rural America. If adopted, alternative regulation may require additional recordkeeping. For example, during CenturyTel's five-year plan, line density averages would have to be reported in order to assess applicable ATS target rates. Furthermore, under the Rate-of-Return Carrier Tariff Option, electing rate-of-return carriers would file tariffs for a two-year period, with rates based on historical costs and demand. The NPRM also addresses the continued need for the Commission's all-or-nothing rule, seeking comment on whether repeal or modification of the all-or-nothing rule could involve additional reporting or regulatory procedures to prevent cost shifting.

Steps Taken To Minimize Significant Economic Impact on Small Entities, and Significant Alternatives Considered

58. The RFA requires an agency to describe any significant alternatives that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): (1) The establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for small entities.

59. The two alternative incentive regulation proposals in the *Second NPRM* could have varying positive or negative impacts on small rate-of-return carriers. The proposals involve elective options, so that a small entity should be able to assess the potential impacts as part of its decision-making process. Nonetheless, public comments are welcomed on any modifications to the proposals contained in the *Second NPRM* that would reduce potential adverse impacts on small entities. Specifically, suggestions are sought on different compliance or reporting requirements that would take into account the resources of small entities; and clarification, consolidation, or simplification of compliance and reporting requirements for small entities that would be subject to the rules. What are the relative merits between applying an X-factor, based on GDP–PI or some other productivity factor, and a G-factor, based on growth, as they relate to small entities under the CenturyTel Plan? How can the Commission ensure that

adequate investment and service quality levels are maintained? How would the adoption of an incentive regulation plan affect small carriers, and how would a low-end adjustment affect such plan? How would the adoption of either alternative regulation plan affect universal service? If the Commission should repeal or modify the Commission's all-or-nothing rule, how can it prevent the danger of cost shifting for small carriers? How would the proposals impact NECA pooling from the perspective of small carriers? Comments should be supported by specific economic analysis.

Federal Rules That May Duplicate, Overlap, or Conflict With the Proposed Rules

60. None.

Report to the Small Business Administration

61. The Commission will send a copy of the *NPRM*, including this IRFA, to the Chief Counsel for Advocacy of the Small Business Administration (SBA). In addition, the *NPRM* and IRFA (or summaries thereof) will be published in the **Federal Register**.

Filing of Comments and Reply Comments

62. Pursuant to sections 1.415 and 1.419 of the Commission's rules, 47 CFR 1.415 and 1.419, interested parties may file comments on or before 30 days and reply comments on or before 45 days of publication of this *NPRM* in the **Federal Register**. Comments may be filed using the Commission's Electronic Comment Filing System (ECFS) or by filing paper copies. Comments filed through the ECFS can be sent as an electronic file via the Internet to *http://www.fcc.gov/cgb/ecfs*. Generally, only one copy of an electronic submission must be filed. If multiple docket or rulemaking numbers appear in the caption of this proceeding, however, commenters must transmit one electronic copy of the comments to each docket or rulemaking number referenced in the caption. In completing the transmittal screen, commenters should include their full name, U.S. Postal Service mailing address, and the applicable docket or rulemaking number. Parties may also submit an electronic comment by Internet e-mail. To get filing instructions for e-mail comments, commenters should send an e-mail to *ecfs@fcc.gov*, and should include the following words in the body of the message: ''get form your e-mail address.'' A sample form and directions will be sent in reply. Commenters also may obtain a copy of the ASCII Electronic Transmittal Form (FORM–ET) at *http://www.fcc.gov/e-file/email.html*.

63. Parties who choose to file by paper must file an original and four copies of each filing. If more than one docket or rulemaking number appear in the caption of this proceeding, commenters must submit two additional copies for each additional docket or rulemaking number.

64. Filings can be sent by hand or messenger delivery, by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail (although the Commission continues to experience delays in receiving U.S. Postal Service mail). The Commission's contractor, Natek, Inc., will receive hand-delivered or messenger-delivered paper filings for the Commission's Secretary at 236 Massachusetts Avenue, NE., Suite 110, Washington, DC 20002.

- The filing hours at this location are 8 a.m. to 7 p.m.
- All hand deliveries must be held together with rubber bands or fasteners.
- Any envelopes must be disposed of before entering the building.
- Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9300 East Hampton Drive, Capitol Heights, MD 20743.
- All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.

65. Regardless of whether parties choose to file electronically or by paper, parties should also file one copy of any documents filed in this docket with the Commission's copy contractor, Qualex International, Portals II, 445 12th Street SW., Washington, DC 20554 (telephone 202–863–2893; facsimile 202–863–2898) or via e-mail at *qualexint@aol.com*. In addition, one copy of each submission must be filed with the Chief, Pricing Policy Division, 445 12th Street SW., Washington, DC 20554. Documents filed in this proceeding will be available for public inspection during regular business hours in the Commission's Reference Information Center, 445 12th Street SW., Washington, DC 20554, and will be placed on the Commission's Internet site. For further information, contact Douglas Slotten at (202) 418–1572, or Ted Burmeister at (202) 418–7389.

66. Written comments by the public on the proposed and/or modified information collections are due on the same day as comments on the *NPRM, i.e.*, on or before 30 days after publication of the *NPRM* in the **Federal Register**. Written comments must be submitted by OMB on the proposed and/or modified information collections on or before 60 days after publication of the *NPRM* in the **Federal Register**. In addition to filing comments with the Secretary, a copy of any comments on the information collections contained herein should be submitted to Judith B. Herman, Federal Communications Commission, 445 12th Street SW., Washington, DC 20554, or via the Internet to *jbherman@fcc.gov*, and to Jeanette Thornton, OMB Desk Officer, Room 10236 NEOB, 725 17th Street NW., Washington, DC 20503, or via the Internet to *JThornto@omb.eop.gov*.

67. Accessible formats (computer diskettes, large print, audio recording and Braille) are available to persons with disabilities by contacting the Consumer & Governmental Affairs Bureau, at (202) 418–0531, TTY (202) 418–7365, or at *fcc504@fcc.gov*.

68. Pursuant to the authority contained in sections 4(i), 4(j), 201–205, 254, and 403 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 154(j), 201–205, 254, and 403, this *Second Further Notice of Proposed Rulemaking* is adopted.

69. The Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, shall send a copy of this *Second Further Notice of Proposed Rulemaking*, including the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration.

[Docket No. FMCSA–2000–7174]

RIN 2126–AA53

Interstate School Bus Safety; Withdrawal

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Withdrawal of advance notice of proposed rulemaking (ANPRM).

SUMMARY: The Federal Motor Carrier Safety Administration (FMCSA) withdraws its October 22, 2001, advance notice of proposed rulemaking (ANPRM) concerning whether to extend the applicability of the Federal Motor Carrier Safety Regulations (FMCSRs) to all interstate school transportation operations (excluding home-to-school or school-to-home transportation) by local governmentally operated educational agencies. After reviewing the public comments on the ANPRM, the agency determined that no regulatory action is needed. Therefore, interstate school transportation operations by local governmentally operated educational agencies will continue to be exempt from all FMCSRs except the commercial driver's license regulations and the controlled substances and alcohol testing regulations.

DATES: The advance notice of proposed rulemaking published on October 22, 2001, at 66 FR 53373 is withdrawn as of March 24, 2004.

FOR FURTHER INFORMATION CONTACT: Mr. Philip J. Hanley, Jr., Office of Bus and Truck Standards and Operations, (202) 366–6811, Federal Motor Carrier Safety Administration, Department of Transportation, 400 Seventh Street, SW, Washington, DC 20590–0001.

SUPPLEMENTARY INFORMATION:

Background

On October 22, 2001, FMCSA issued an advance notice of proposed rulemaking (ANPRM) to gather information, data, and recommendations that would assist the agency in determining whether to make the Federal Motor Carrier Safety Regulations (FMCSRs) applicable to interstate school bus transportation by local governmentally operated educational agencies (LEAs). Sec. 4024 of the Transportation Equity Act for the 21st Century, Public Law 105–178, 112 Stat. 107 at 416, directed FMCSA to determine whether to apply the FMCSRs to interstate school transportation operations (excluding home-to-school or school-to-home transportation) conducted by LEAs. Generally, the term LEA means a public board of education or other public authority legally constituted to perform service functions for public elementary and secondary school districts in a city, county, or other political subdivision of a State. LEAs do not include private schools or public colleges and universities.

In the ANPRM, the agency proposed to determine whether Federal regulatory involvement in interstate school bus transportation operations by local educational agencies is necessary to enhance the safety of passengers and that of the general public. FMCSA also considered whether interstate transportation (other than home-to-school and school-to-home) by all governmental educational entities, such as public universities, should be subject to the FMCSRs. In addition, the agency considered holding educational agencies to the same standards that private schools and contractors are required to meet when operating interstate in other than home-to-school and school-to-home transportation. Examples of these standards include qualifications of drivers, hours of service, and maintenance of vehicles.

There are approximately 14,000 school districts (LEAs) in the United States that provide transportation to students. About two-thirds provide that service directly, and the remaining third hire a contractor(s) to provide the transportation service. These entities (LEAs and contractors) employ nearly 470,000 drivers, operate almost 460,000 school buses, and transport 23.5 million students 4.3 billion miles every year. It is estimated that less than 5 percent of all school bus trips are other than home-to-school, with less than 1 percent being interstate in nature. Virtually all school bus transportation that crosses State lines is for field trips and trips to school-sponsored sporting events, rather than being home-to-school transportation.

Although government operation of commercial motor vehicles (including school buses) has historically been exempt from the majority of the FMCSRs, drivers employed by governmental agencies, including LEAs, must comply with the commercial driver's license (CDL) requirements and drug and alcohol testing requirements. The LEA exemption originated in Sec. 206(f) of the Motor Carrier Safety Act of 1984 (Public Law 98–554, Title II; 98 Stat. 2833), which specifically required the Secretary to waive application of the regulations to school buses, unless the Secretary determined that such regulations are necessary for public safety.

Contractors hired by school districts must comply with all of the FMCSRs when providing transportation that is other than home-to-school and is interstate in nature. As with LEA bus drivers, contractor-employed school bus drivers must comply with the CDL and drug and alcohol testing requirements set forth in the FMCSRs regardless of whether the transportation is interstate or intrastate in nature.

The regulatory oversight of school bus operations has traditionally been a State function. While the States have adopted the FMCSRs or compatible regulations to meet the requirements of the Motor Carrier Safety Assistance Program (MCSAP) (49 CFR part 350), they normally apply the same exemptions for government operations. The routine inspection of school buses is a State function and not a MCSAP-reimbursable activity.

Most States have some driver physical qualification standards, vehicle maintenance and inspection standards, background investigation requirements, and training standards that apply to school bus operations (both LEA and contractor). Only a few States have hours-of-service or fatigue management standards for school bus operators. LEA-performed school bus transportation operations are subject to Sec. 7 of the Fair Labor Standards Act (FLSA) (29 U.S.C. 207), which requires overtime pay for work in excess of 40 hours per week. (However, Sec. 13(b)(1) of the FLSA exempts from the provisions of Sec. 7 any employee for whom the Secretary of Transportation has power to establish qualifications and maximum hours of service pursuant to the provisions of 49 U.S.C. 31502. *See* 29 CFR part 782. Thus, certain contractor-performed school bus transportation operations subject to the Secretary's jurisdiction are exempt from the overtime provisions of the FLSA.)

LEA-performed and contractor-performed school bus transportation operations are equally safe. The overall fatality rate for school buses is 0.2 per 100 million vehicle miles traveled (VMT), compared with 1.5 fatalities per 100 million VMT for passenger cars (1990–2000). The fatality rate for trucks is 2.5 per 100 million VMT (2000). In calendar year 2001, 129 people died in school bus-involved fatal crashes; 16 of those fatalities were bus occupants. From 1975 through 2001, the number of school bus occupant fatalities averaged 14 per year. All fatalities occurred during home-to-school operations. There has not been a single fatal crash involving an interstate school activity trip during the last 10 years.

Comments Received on the ANPRM

The ANPRM invited responses to specific questions that FMCSA considered relevant to its need to decide whether to make the FMCSRs applicable to interstate school bus transportation by local educational agencies. We received comments from six State governmental organizations, five organizations, a consulting group, five corporations, and 13 individuals. Few

commenters responded to FMCSA's specific questions. Most merely stated that they were either for or against LEAs being subject to the FMCSRs.

Beyond the information provided in the comments, FMCSA gleaned little specific data from the answers supplied. Some commenters stated that much of the information the agency requested was not readily obtainable, or that States do not maintain such information. The major points of the substantive responses are summarized below.

Summary of comments in favor of applying the Federal safety regulations to LEAs:

1. Many of the commenters simply stated that the Federal safety regulations should apply equally to all passenger-carrying vehicles, regardless of controlling entity. These commenters believe that if a contractor is subject to the safety regulations, then LEAs also should be subject to them. Commenters expressing this view included the National School Transportation Association, the Montana School Boards Association, the American Bus Association, the United Motorcoach Association, and Advocates for Highway and Auto Safety.

2. The United Motorcoach Association (UMA) expressed concern that there are no universal minimum standards applicable to every school bus operation, leaving safety decisions to each State or local district. Nonetheless, UMA acknowledged that ''We can cite no circumstances where school bus providers—either contracted or governmentally-owned—have demonstrated anything less than the highest standards of and attention to safety. Many States have implemented greater safety oversight on the school bus community than they have on the commercial operators.''

3. Several commenters, including the National School Transportation Association and the New Jersey Department of Transportation, noted that, among the FMCSRs, hours-of-service regulations are least likely to be replicated at the State level. These commenters envisioned potential safety benefits from applying the hours-of-service regulations to all interstate school transportation.

Summary of comments in opposition to applying the safety regulations to LEAs:

1. Since the current LEA exemption (at 49 U.S.C. 31136) applies to all government-owned and -operated vehicles, any proposal to apply the safety regulations to LEAs should include all government vehicles operated in interstate commerce. The governmental exemption has not compromised safety.

2. Virtually all commenters who opposed the proposed regulatory action agreed that most States impose vehicle inspection and maintenance requirements on all school buses, regardless of type of operation. The Colorado Department of Education stated that Colorado already has and is continuing to revise ''tough regulations for the safety of our children we transport, including when we transport these children into other states.'' Subjecting Colorado LEAs to the Federal safety regulations would introduce ''problems of overlapping regulations.''

3. There is a lack of specific data indicating that LEA pupil transportation is unsafe. The National Association of State Directors of Pupil Transportation Services reinforced the point by adding that any change to the FMCSRs should be based on data.

FMCSA Decision

FMSCA finds a lack of identifiable data indicating that this segment of transportation is unsafe. The evidence shows that not a single fatal crash in the past 10 years would have been avoided had this proposed rule change been in existence. Since the major source of safety benefits is potential fatal crashes avoided, FMCSA believes that the benefits of imposing the FMCSRs on all interstate school transportation operations would be extremely low. Even though the costs of compliance would be modest, potential benefits would not appear to outweigh those costs.

Further, Executive Order 13132, dated August 4, 1999, dealing with Federalism, states that ''the national government should be deferential to the States when taking action that affects the policymaking discretion of the States * * *.'' and ''[i]ntrusive Federal oversight of State administration is neither necessary nor desirable.'' A 1988 Federal Highway Administration final rule, ''Federal Motor Carrier Safety Regulations; General'' (53 FR 18042, May 19, 1988), invokes this principle with regard to school bus transportation operations. The rule's preamble states, at 53 FR 18043, that ''the transportation of school children and school personnel from home to school and back again involves problems which are common to the States, and which, in accordance with the President's Executive Order on Federalism (Executive Order 12612, October 26, 1987), can best be left to the individual States * * *.'' FMCSA has reached the same conclusion in this rulemaking proceeding.

Although FMCSA has decided not to pursue this regulatory action, the agency is committed to continuing to work with school bus associations and local school districts to maintain the safety of school bus transportation. We are working closely with two school bus associations to learn the extent to which school buses and school bus operations are regulated at the State level. We recently launched an outreach program, ''Moving Kids Safely,'' that provides guidance to school officials responsible for the transportation of school children. As an integral part of this program, FMCSA assists the school-system decision maker in selecting a safe transportation company and the appropriate type of vehicle for the trip.

For these reasons, FMCSA has decided not to extend the applicability of the FMCSRs to all interstate school transportation operations (excluding home-to-school or school-to-home transportation) by local governmentally operated educational agencies. The ANPRM of October 22, 2001 (66 FR 53373) is withdrawn.

Issued on: March 11, 2004.

Warren E. Hoemann,

Deputy Administrator.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. NHTSA 2004–17365]

RIN 2127–AG87

Federal Motor Vehicle Safety Standards; Lamps, Reflective Devices, and Associated Equipment

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of withdrawal of proposed rulemaking.

SUMMARY: This document withdraws a 1998 notice of proposed rulemaking (NPRM) that would have amended the Federal motor vehicle safety standard on lighting to reorganize the sections related to headlighting. The intention of the rulemaking was to remove inconsistencies and to facilitate easy reference to the standard, in an effort to improve its comprehensibility. We have decided to terminate the rulemaking for the administrative rewrite of headlighting requirements, due to other regulatory priorities and limited agency resources.

FOR FURTHER INFORMATION CONTACT: The following persons at the NHTSA, 400 Seventh Street, SW., Washington, DC 20590.

For non-legal issues, you may call Mr. Richard VanIderstine, Office of Crash Avoidance Standards (Telephone: 202–366–2720) (Fax: 202–366–7002).

For legal issues, you may call Mr. Eric Stas, Office of Chief Counsel (Telephone: 202–366–2992) (Fax: 202–366–3820).

SUPPLEMENTARY INFORMATION:

I. Background

Federal Motor Vehicle Safety Standard (FMVSS) No. 108, *Lamps, Reflective Devices, and Associated Equipment,* establishes performance requirements for lighting-related equipment on new motor vehicles, as well as their location. The standard also covers replacement lighting equipment. The present version of FMVSS No. 108 represents over 30 years of accumulated amendments to the standard and the incorporation of numerous industry consensus standards. Consequently, the standard is lengthy, and requirements concerning a particular lighting device are sometimes found at different places within the standard, with the result being a heavy demand for interpretation of the standard by vehicle and equipment manufacturers, inventors, vehicle owners, and State agencies.

In order to simplify FMVSS No. 108 for users, NHTSA published an NPRM on November 12, 1998 proposing to reorganize the headlighting requirements under the standard (*see* 63 FR 63258; *see also* 64 FR 6021 (February 8, 1999) (notice extending comment period)). The proposed amendments were not intended to change the requirements of the standard, except in a few minor instances that were clearly identified and discussed. The NPRM included a set of ''Drafting Guidelines'' which discussed the rubric for the proposed administrative simplification, including inclusion of relevant lighting requirements in the text of the standard (*i.e.*, minimizing incorporation by reference to outside standards), updating references to the most current version of the Society of Automotive Engineers (SAE) standard (whenever appropriate), elimination of past effective dates, and use of a single, consistent numbering scheme. A similar administrative rewrite for the non-headlighting provisions of FMVSS No. 108 was contemplated at a future point.

NHTSA received 13 comments on the 1998 NPRM. Most commenters were supportive of the agency's efforts to conduct an administrative rewrite of FMVSS No. 108's headlighting provisions, and numerous technical recommendations were provided.

II. Reason for Withdrawal

Our review of the public comments on the NPRM revealed that unexpected issues, substantive in character, would have to be addressed prior to publication of a final rule, and, as a result, significant additional analyses would be required. Consequently, completion of a final rule to simplify the headlighting provisions of FMVSS No. 108 would be more complicated and resource-intensive than previously anticipated. Although NHTSA continues to believe that an administrative rewrite of FMVSS No. 108 would be beneficial, we have concluded that, after a careful review of regulatory priorities, limited agency resources should be expended on other projects likely to produce a greater safety benefit.

The agency receives numerous congressional mandates and petitions for rulemaking from outside parties each year, so it is not possible to undertake all of the discretionary rulemaking activities that we identify. Accordingly, for the reasons discussed above, we are terminating this rulemaking activity at the present time and withdrawing the associated NPRM for a reorganization of the headlighting provisions of FMVSS No. 108.

Authority: 49 U.S.C. 322, 30111, 30115, 30117, and 30166; delegation of authority at 49 CFR 1.50.

Issued: March 19, 2004.

Stephen R. Kratzke,

Associate Administrator for Rulemaking.

DEPARTMENT OF AGRICULTURE

Farm Service Agency

Request for Revision and Extension of a Currently Approved Information Collection—Servicing of Real Estate Security for Farm Program Loans and Certain Note Only Cases

AGENCY: Farm Service Agency, USDA

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the intent of the Farm Service Agency (FSA) to request an extension of currently approved information collection for a regulation used in support of the FSA Farm Loan Programs (FLP). This renewal does not involve any revisions to the program rules.

DATES: Comments on this notice must be received on or before May 24, 2004 to be assured consideration.

FOR FURTHER INFORMATION CONTACT: Constance Rime, Senior Loan Officer, USDA, Farm Service Agency, Farm Loan Programs, Loan Servicing Division, 1400 Independence Avenue, SW., STOP 0523, Washington, DC 20250–0523; Telephone (202) 690–4012; Electronic mail: *constance_rime@wdc.usda.gov.*

SUPPLEMENTARY INFORMATION:

Title: Servicing of Real Estate Security for Farmer Program Loans and Certain Note-Only Cases.

OMB Control Number: 0560–0158.

Expiration Date: July 31, 2005.

Type of Request: Extension and Revision of a Currently Approved Information Collection.

Abstract: This regulation describes the policies and procedures for servicing real estate, leaseholds, and certain note-only security for FSA farm loans. The regulation promulgates provisions of sections 331 and 335 of the Consolidated Farm and Rural Development Act (Act) (7 U.S.C. 1981 and 1985). This information is required from a program benefit recipient or loan borrower who has requested action on security that has been mortgaged to the Agency.

The information to be collected from FSA borrowers will primarily be financial data not already on file, such as borrower asset values. This information is submitted by the borrower to the Agency and is used by the Agency officials to grant release from personal liability where security property is transferred to approved applicants who, under the agreement, assume the outstanding secured indebtedness. The Agency official may grant partial releases, subordination of mortgages, consent to leases of security and transfers of security property. All transactions granted are intended to accomplish the loan objective and to protect the Government's financial interest.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average .36 hours per response.

Respondents: Individuals or households, businesses or other for profit farming entities.

Estimated Number of Respondents: 24,213.

Estimated Number of Responses per Respondent: 1.2.

Estimated Total Annual Burden on Respondents: 10,553 hours.

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. These comments should be sent to the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 and to Constance Rime, Senior Loan Officer, USDA, FSA, Farm Loan Programs, Loan Servicing Division, 1400 Independence Avenue, SW., STOP 0523, Washington, DC 20250–0523.

Comments will be summarized and included in the request for OMB approval of the information collection. All comments will also become a matter of public record.

Signed in Washington, DC, on March 12, 2004.

James R. Little,

Administrator, Farm Service Agency.

[FR Doc. 04–6515 Filed 3–23–04; 8:45 am]

BILLING CODE 3410–05–P

DEPARTMENT OF AGRICULTURE

Forest Service

East Fredericktown Project, Mark Twain National Forest, Bollinger, Madison St. Francis, Ste. Genevieve Counties, MO

AGENCY: Forest Service, USDA.

ACTION: Revised Notice of Intent to prepare an Environmental Impact Statement.

SUMMARY: The Forest Service will prepare an environmental impact statement (EIS) to analyze and disclose the environmental effects of proposed land management activities and corresponding alternatives within the East Fredericktown project area. The East Fredericktown project area is located on National Forest System lands administered by the Potosi/Fredericktown Ranger District east of Fredericktown, Missouri. The legal description of the project area is: Township 32 North, Range 7 East, Sections 11–13; Township 32 North, Range 8 East, Sections 3, 6–11, 15, 18, 19, 21–23, 25, 26, 34–36; Township 33 North, Range 8 East, Sections 29, 30, 35; Township 34 North, Range 7 East, Sections 12, 36; Township 34 North Range 8 East, Sections 2–4, 9, 17, 19–21, 28–33; Township 35 North, Range 8 East, Sections 9, 11–14, 16, 19–30, 34–36; Township 35 North, Range 7 East, Section 24, Fifth Principal Meridian.

An EIS is being prepared for this project although years of experience have shown that the effects of implementing similar activities in the area are not significant. We do not feel that an EIS is required, however, due to

the increase in appeals and litigation and for wise fiscal efficiency, an EIS will be prepared for the East Fredericktown Project.

The purpose of this project is to implement land management activities that are consistent with the direction in the Mark Twain Land and Resource Management Plan (Forest Plan) and to respond to specific needs identified in the project area. The project-specific needs include: emphasizing the management of shortleaf pine in its natural range on sites where it is recognized as a dominant or characteristic member of the natural community and examining opportunities to minimize adverse impacts from insects and disease on forest vegetation. Other needs include wildlife habitat maintenance and improvement, recreation management, examining road system needs, cleanup of illegal dumps, and associated or connected actions.

DATES: An original Notice of Intent was published in the **Federal Register** on April 29, 2003. Comments concerning the proposed land management activities should have been received within 30 days following original publication date. The Forest Service expects to file a Draft EIS with the Environmental Protection Agency and make it available for public comment by December 2004.

ADDRESSES: Send written comments to: District Ranger, Potosi/Fredericktown Ranger, District, P.O. Box 188, Potosi, Missouri 63664. E-mail should be sent to: *comments-eastern-mark-twain-potosi@fs.fed.us.*

FOR FURTHER INFORMATION CONTACT: Tom McGuire, Project Leader/Integrated Resource Analyst, Potosi/Fredericktown Ranger District, P.O. Box 188, Posoti, Missouri 63664, phone (573) 438–5427.

SUPPLEMENTARY INFORMATION: This is a revised Notice of Intent for the prior notice promulgated in the **Federal Register**, Vol. 68, No. 82, pp. 22672–22673, on April 29, 2003. The scope of the project has not changed; therefore, this revised Notice of Intent does not initiate a second scoping period for this proposal. The Notice of Intent is being revised because the Draft EIS has been delayed more than six months. The original release date was expected to be September 2003; the new expected release date is December 2004, and the Final EIS is expected to be released in March 2005.

Estimated Dates for Filing

The draft EIS is expected to be filed with the Environmental Protection Agency and available for public review in December 2004. A 45-day comment period will follow publication of a Notice of Availability of the draft EIS in the **Federal Register**. Comments received on the draft EIS will be analyzed and considered in preparation of a final EIS, expected in March 2005. A Record of Decision (ROD) will also be issued at that time along with the publication of a Notice of Availability of the final EIS and ROD in the **Federal Register**.

Reviewers Obligation To Comment

The Forest Service believes it is important at this early stage to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of the draft EIS must structure their participation in the environmental review of the proposal in such a way that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC,* 435 U.S. 519, 513 (1978). Also, environmental objections that could be raised at the draft EIS stage but that are not raised until after completion of the final EIS may be waived or dismissed by the courts. *City of Angoon* v. *Hodel,* 803 F.2d 1016, 1022 (9th Cir, 1986), and *Wisconsin Heritages Inc.* v. *Harris,* 490 F. Supp. 1334, 1338 (E.D. Wis., 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period of the draft EIS in order that substantive comments and objections are available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final EIS. To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments should be as specific as possible. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Responsible Official

The responsible official for this environmental impact statement is Ronnie Raum, Forest Supervisor, Mark Twain National Forest.

Dated: March 15, 2004.

Katherine W. Stuart,

District Ranger, Potosi/Fredericktown Ranger District.

BILLING CODE 3410–11–M

DEPARTMENT OF AGRICULTURE

Forest Service

Catron County Resource Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Catron County Resource Advisory Committee (RAC) will meet in Reserve, New Mexico, on April 13, 2004, at 10 a.m. m.s.t. The purpose of the meeting is to evaluate submitted projects and select projects for recommendation to be funded under Title II of the Secure Rural Schools and Community Self-Determination Act (PL 106–393), also called the ''Payments to State Act.''

DATES: The meeting will be held April 13, 2004.

ADDRESSES: The meeting will be held at the Catron County Courtroom of the Catron County Court House, 101 Main Street, Reserve, New Mexico, 87830. Send written comments to Michael Gardner, Catron County Resource Advisory Committee, c/o Forest Service, USDA, 3005 E. Camino del Bosque, Silver City, New Mexico 88061–7863 or electronically to *mgardner01@fs.fed.us.*

FOR FURTHER INFORMATION CONTACT: Michael Gardner, Rural Community Assistant Staff, Gila National Forest, (505) 388–8212, or Janet Porter, Catron County RAC Chairperson, at (505) 533–6384 or *ctreasur@gilanet.com.*

SUPPLEMENTARY INFORMATION: The meeting is open to the public. Committee discussion is limited to Forest Service staff and Committee members unless provided for on the agenda. However, persons who wish to bring PL 106–393 related matters to the attention of the Committee may file written statements with the Committee Staff before or after the meeting. Public input sessions will be provided and individuals may address the committee at times provided on the agenda in the morning and afternoon. To be considered at the April 13, 2004, RAC meeting, the project proposals must be submitted to Michael Gardner or Janet Porter, Catron County RAC Chairperson, by April 6, 2004, to enable distribution to all RAC members. Send written comments to Michael Gardner at Forest Service, USDA, 3005 E. Camino del Bosque, Silver City, New Mexico 88061–7863, or to Janet Porter at P.O. Box 407, Reserve, NM 87830.

Dated: March 16, 2004.

Marcia R. Andre,

Forest Supervisor, Gila National Forest.

Rural Housing Service

Notice of Request for Extension of a Currently Approved Information Collection

AGENCY: Rural Housing Service (RHS), USDA.

ACTION: Proposed collection; Comments requested.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Rural Housing Service's intention to request an extension for a currently approved information collection in support of the program for 7 CFR Part 1944, subpart L, Tenant Grievance and Appeals Procedure.

DATES: Comments on this notice must be received by May 24, 2004 to be assured of consideration.

FOR FURTHER INFORMATION CONTACT: Janet Stouder, Deputy Director, Multi-Family Housing Portfolio Management Division, Rural Housing Service, STOP 0782, Room 1245, 1400 Independence Avenue, SW., Washington, DC 20250–0782, Telephone: 202–720–9728.

SUPPLEMENTARY INFORMATION:

Title: 7 CFR Part 1944, subpart L, Tenant Grievance and Appeals Procedure.

OMB Number: 0575–0046.

Expiration Date of Approval: October 31, 2004.

Type of Request: Extension of Currently Approved Information Collection.

Abstract: The regulation promulgates the procedures by which tenants, cooperative members, and applicants for occupancy may appeal adverse actions by owner/managers of multi-family housing projects financed by RHS. Such adverse actions include cases whereby tenants, cooperative members, or applicants have received written notice that assistance provided by RHS is being denied, substantially reduced or terminated.

Estimate of Burden: Public reporting burden for this information collection is estimated to average .41 hours per response.

Respondents: Individuals or households, state or local governments, small businesses or other for profit or non-profit organizations.

Estimated Number of Respondents: 200.

Estimated Number of Responses per Respondent: 1.

Estimated Number of Responses: 200.

Estimated Total Annual Burden on Respondents: 82 hours.

Copies of this information collection can be obtained from Renita Bolden, Regulations and Paperwork Management Branch, at (202) 692–0035.

Comments: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of RHS, including whether the information will have practical utility; (b) the accuracy of RHS's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. Comments may be sent to Renita Bolden, Regulations and Paperwork Management Branch, U.S. Department of Agriculture, Rural Development, STOP 0742, 1400 Independence Ave. SW., Washington, DC 20250. All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Dated: March 18, 2004.

Arthur A. Garcia,

Administrator, Rural Housing Service.

BILLING CODE 3410–XV–P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau.

Title: Current Population Survey, June 2004 Fertility Supplement.

Form Number(s): None.

Agency Approval Number: 0607–0610.

Type of Request: Reinstatement, with change.

Burden: 250 hours.

Number of Respondents: 30,000.

Avg Hours Per Response: 30 seconds.

Needs and Uses: The purpose of this request for review is to obtain the Office of Management and Budget (OMB) clearance for the Current Population Survey (CPS) June 2004 Fertility Supplement. This supplement continues the fertility data series that has been asked periodically since 1971. This supplement is sponsored by the U.S Census Bureau.

The fertility questions will be asked of females 15–44 years of age. The June 2004 Fertility Supplement, like the June 2002 Fertility Supplement, differs from 1998 and 1995 June supplements because it only includes fertility items. The 1998 supplement contained fertility and birth expectations items. The 1995 supplement contained fertility and marital history items.

The data collected from this supplement are used primarily by government and private analysts to project future population growth, to analyze childbearing patterns, and to assist policymakers in making decisions that are affected by changes in family size and composition. Past studies have documented profound changes to historical patterns that have occurred in fertility rates, family structures, premarital births, and the timing of the first birth. The CPS characteristics, such as family income, household relationships, and part- or full-time work status, when matched with fertility data, can produce estimates of potential needs families may have for governmental assistance: for example, aid to families with dependent children, child care, and maternal health care for single-parent households. The fertility data also assist researchers and analysts who explore such important issues as premarital childbearing and postponement of childbirth because of educational or occupational responsibilities and goals.

Affected Public: Individuals or households.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

Legal Authority: Title 13 U.S.C., Section 182.

OMB Desk Officer: Susan Schechter, (202) 395–5103.

Copies of the above information collection proposal can be obtained by calling or writing Diana Hynek, Departmental Paperwork Clearance Officer, (202)482–0266, Department of Commerce, room 6625, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at *dhynek@doc.gov*).

Written comments and recommendations for the proposed

information collection should be sent within 30 days of publication of this notice to Susan Schechter, OMB Desk Officer either by fax (202–395–7245) or e-mail (*susan_schechter@omb.eop.gov*).

Dated: March 19, 2004.

Madeleine Clayton,

Management Analyst, Office of the Chief Information Officer.

[FR Doc. 04–6600 Filed 3–23–04; 8:45 am]

BILLING CODE 3510–07–P

DEPARTMENT OF COMMERCE

Census Bureau

Age Search Service

ACTION: Proposed collection; comment request.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before May 24, 2004.

ADDRESSES: Direct all written comments to Diana Hynek, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6625, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at *DHynek@doc.gov*).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Mark Grice, Assistant Chief (Processing), United States Census Bureau, National Processing Center, Jeffersonville, Indiana, 47132, on (812) 218–3434.

SUPPLEMENTARY INFORMATION:

I. Abstract

Age Search is a service provided by the U.S. Census Bureau for persons who need official transcripts of personal data as proof of age for pensions, retirement plans, medicare, and social security. Transcripts are also used as proof of citizenship to obtain passports or to provide evidence of family relationship for rights of inheritance. The Age Search forms are used by the public in order to provide the Census Bureau with the necessary information to conduct a search of historical population decennial census records in order to provide the requested transcript. The Age Search service is self-supporting and is funded by the fees collected from the individuals requesting the service. Due to an increase in operating cost, an increase in the Age Search fee from $40 to $65 per case is requested. An additional charge of $20 per case for expedited requests requiring results within one day is also being proposed.

II. Method of Collection

The Form BC–600, Application for Search of Census Records, is a public use form that is submitted by applicants requesting information from the decennial census records. Applicants are requested to enclose appropriate fee by check or money order with the completed and signed Form BC–600 and return by mail to the U.S. Census Bureau, Personal Census Search Unit, in Jeffersonville, Indiana.

III. Data

OMB Number: 0607–0117.

Form Number: BC–600, BC–649(L), BC–658(L).

Type of Review: Revision of a currently approved collection.

Affected Public: Individuals or households.

Estimated Number of Respondents: 4,375 Total (BC–600—2,620; BC–649(L)—1,624; BC–658(L)—131).

Estimated Time Per Response: BC–600—12 minutes; BC–649(L)—6 minutes; BC–658(L)—6 minutes.

Estimated Total Annual Burden Hours: 699 hours.

Estimated Total Annual Cost: Due to an increase in operating cost, an increase in the Age Search fee from $40 to $65 per case is requested. An additional charge of $20 per case for expedited requests requiring results within one day is also being proposed.

Respondent's Obligation: Voluntary.

Legal Authority: Title 13, United States Code, section 8.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: March 19, 2004.

Madeleine Clayton,

Management Analyst, Office of the Chief Information Officer.

[FR Doc. 04–6601 Filed 3–23–04; 8:45 am]

BILLING CODE 3510–07–P

DEPARTMENT OF COMMERCE

Census Bureau

Survey of Plant Capacity Utilization

ACTION: Proposed collection; comment request.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before May 24, 2004.

ADDRESSES: Direct all written comments to Diana Hynek, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6625, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at *dhynek@doc.gov*).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Julius Smith Jr., Census Bureau, Room 2135, Building 4, Washington, DC 20233–6900, 301–763–4683 (or via the Internet at *julius.smith.jr@census.gov*).

SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau plans to extend the current OMB clearance for the Survey of Plant Capacity Utilization. The survey is conducted annually collecting data for fourth quarter operations. The survey collects, from manufacturing plants and publishers, the value of actual production and the value of production that could have been achieved if operating at ''full production'' and ''emergency production'' levels. The survey also collects data on work patterns by shift.

These data include hours in operation, production workers, and plant hours worked. The resulting estimates are used in measuring inflationary pressures, capital flows, production indexes and analyzing and forecasting economic and industrial trends. The survey results are primarily used by the Federal Reserve Board, Federal Emergency Management Agency, and the Department of Defense.

II. Method of Collection

The Census Bureau will use the mail out/mail back survey forms to collect the data. Companies will be asked to respond within 30 days of the initial mailing. This due date will be imprinted at the top of the form. Letters encouraging participation will be mailed to companies that have not responded by the designated time.

III. Data

OMB Number: 0607–0175.

Form Number: MQ–C1.

Type of Review: Regular.

Affected Public: Manufacturing and publishing plants.

Estimated Number of Respondents: 17,000.

Estimated Time Per Response: 2.25 hours.

Estimated Total Annual Burden Hours: 38,250.

Estimated Total Annual Cost: The estimated cost to the respondents is $627,683.

Respondents Obligation: Mandatory.

Legal Authority: Title 13, U.S. Code, section 182.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: March 19, 2004.

Madeleine Clayton,

Office of the Chief Information Officer.

BILLING CODE 3510–07–P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket 10–2004]

Proposed Foreign-Trade Zone—Southaven, MS; Application and Public Hearing

An application has been submitted to the Foreign-Trade Zones (FTZ) Board (the Board) by the Northern Mississippi FTZ, Inc., a Mississippi non-profit corporation, to establish a general-purpose foreign-trade zone in Southaven (DeSoto County), Mississippi. An application is currently pending with the Bureau of Customs and Border Protection to extend the Memphis, Tennessee, Customs port of entry boundary to include DeSoto County, Mississippi (see 69 FR 2092, 1/14/04). The FTZ application was submitted pursuant to the provisions of the FTZ Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on March 16, 2004. The applicant is authorized to make the proposal under Section 59–3–35 of the Mississippi Annotated Code.

The proposed zone consists of a 219-acre site located at the DeSoto Trade Center, located between Interstate 55 and U.S. Highway 51 south of Church Road, Southaven. The site is adjacent to the recently completed DeSoto County Civic Center and is owned by Mayfield/New York, Ltd., Hillwood Fund DTC 1, L.P., Mississippi Purchase Corporation and Hal Crenshaw.

The application indicates a need for zone services in the Southaven, Mississippi, area. Several firms have indicated an interest in using zone procedures for warehousing/distribution activities. Specific manufacturing approvals are not being sought at this time. Requests would be made to the Board on a case-by-case basis.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

As part of the investigation, the Commerce examiner will hold a public hearing on April 27, 2004, at 11 a.m, at the DeSoto County Civic Center, Board Conference Room, 4560 Venture Drive, Southaven, Mississippi 38671.

Public comment on the application is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at one of the following addresses:

1. Submissions via Express/Package Delivery Services: Foreign-Trade Zones Board, U.S. Department of Commerce, Franklin Court Building-Suite 4100W, 1099—14th Street NW, Washington, DC 20005; or

2. Submissions via the U.S. Postal Service: Foreign-Trade Zones Board, U.S. Department of Commerce, FCB—Suite 4100W, 1401 Constitution Avenue NW, Washington, DC 20230.

The closing period for their receipt is May 24, 2004. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period (to June 7, 2004).

A copy of the application and accompanying exhibits will be available for public inspection at the Office of the Foreign-Trade Zones Board's Executive Secretary at the first address listed above, and at the City Clerk's Office, 8700 Northwest Drive, Southaven, Mississippi 38671.

Dated: March 16, 2004.

Dennis Puccinelli,

Executive Secretary.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket 60–2003]

L'Oreal USA, Inc.—Application for Subzone Status; Amendment of Application

The application for subzone status at the L'Oreal USA, Inc. facilities in Middlesex, Somerset and Union Counties, New Jersey, submitted by the New Jersey Department of Commerce and Economic Development (68 FR 65245, 11/19/03), has been amended. The amendment removes a parcel from Site 4 and adds a parcel to Site 1. The proposed subzone now consists of 4 sites with 156 acres:

Site 1 (Clark Complex, 4 Parcels, 24.7 acres total) as follows:

—4.6 acres at 175–195 Terminal Avenue, Clark, Union County

—8.8 acres at 200–222 Terminal Avenue, Clark, Union County

—9 acres at 60, 70 Leonard Street, Metuchen, Middlesex County

—2.3 acres at 70 Distribution Boulevard, Middlesex County

Site 2 (Piscataway Complex, 3 Parcels, 32.8 acres total) as follows:

—16.5 acres at 81 New England Avenue, Piscataway, Middlesex County

—5.2 acres at 60 New England Avenue, Piscataway, Middlesex County

—11.1 acres at 80 Schoolhouse Road, Somerset, Somerset County

Site 3 (Franklin Complex, 2 Parcels, 42.2 acres total) as follows:

—34.7 acres at 100 Commerce Drive, Somerset, Somerset County

—7.5 acres at 10 Van Dyke Avenue, New Brunswick, Middlesex County

Site 4 (56.5 acres) Brunswick Complex, located at 77 Deans Rhode Hall Road, Monmouth Junction, Middlesex County.

The comment period for the case referenced above is being extended to April 23, 2004, to allow interested parties additional time in which to comment. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at one of the following addresses:

1. Submissions Via Express/Package Delivery Services: Foreign-Trade-Zones Board, U.S. Department of Commerce, Franklin Court Building—Suite 4100W, 1099 14th St. NW., Washington, DC 20005; or

2. Submissions Via the U.S. Postal Service: Foreign-Trade-Zones Board, U.S. Department of Commerce, FCB—Suite 4100W, 1401 Constitution Ave. NW., Washington, DC 20230.

Dated: March 12, 2004.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket 11–2004]

Foreign-Trade Zone 24—Pittston, Pennsylvania; Application for Expansion

An application has been submitted to the Foreign-Trade Zones (FTZ) Board (the Board) by the Eastern Distribution Center, Inc., grantee of Foreign-Trade Zone 24, requesting authority to expand FTZ 24-Site 1 and to include three additional sites in the Pittston, Pennsylvania, area, within the Wilkes-Barre/Scranton Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR part 400). It was formally filed on March 17, 2004.

FTZ 24 was approved on October 21, 1976 (Board Order 112, 41 FR 47288, 10/28/76). The zone project currently consists of a 42-acre site within the 265-acre Eastern Distribution Center, located midway between Scranton and Wilkes-Barre, adjacent to the Wilkes-Barre/Scranton International Airport. An application is pending with the FTZ Board to expand FTZ 24 to include a site at the Valley View Business Park/Jessup Small Business Center in the Boroughs of Jessup and Archbald, Pennsylvania (Proposed Site 2, Docket 9–2004).

The applicant is now requesting authority to expand existing Site 1 and to include three additional sites in the area: expand *Site 1* to include an additional parcel (29 acres) within the Grimes Industrial Park located east of Commerce Road and north of Sathers Road in Pittston Township (listed as Site 2B in the application); *Proposed Site 3* (232 acres)—industrial park located west of Interstate 81 and north of Oak Street in Pittston Township (listed as Site 2A in the application); *Proposed Site 4* (493 acres)—industrial park located along Interstate 476 south of O'Hara Industrial Park in Jenkins Township (listed as Site 1B in the application); and, *Proposed Site 5* (138 acres)—industrial park located north of Saylor Avenue and east of River Road in Jenkins Township (listed as Site 1A in the application). The property is owned by the Mericle Commercial Real Estate Services. No specific manufacturing authority is being requested at this time. Such requests would be made to the Board on a case-by-case basis.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment on the application is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at one of the addresses below:

1. *Submissions via Express/Package Delivery Services:* Foreign-Trade Zones Board, U.S. Department of Commerce, Franklin Court Building—Suite 4100W, 1099 14th Street, NW., Washington, DC 20005; or

2. *Submissions via the U.S. Postal Service:* Foreign-Trade Zones Board, U.S. Department of Commerce, FCB—Suite 4100W, 1401 Constitution Avenue NW., Washington, DC 20230.

The closing period for their receipt is May 24, 2004. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to June 7, 2004.

A copy of the application and accompanying exhibits will be available for public inspection at the Office of the Foreign-Trade Zones Board's Executive Secretary at the first address listed above, and at the Office of the Eastern Distribution Center, Inc., 1151 Oak Street, Pittston, PA 18640.

Dated: March 17, 2004.

Dennis Puccinelli,

Executive Secretary.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–580–816]

Corrosion-Resistant Carbon Steel Flat Products From Korea: Notice of Extension of Time Limit for the Preliminary Results of Antidumping Duty New Shipper Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of extension of time limit for the preliminary results of antidumping duty new shipper review.

EFFECTIVE DATE: March 24, 2004.

SUMMARY: The Department of Commerce (''the Department'') is extending the time limit for the preliminary results of the new shipper review of the antidumping duty order on corrosion-resistant carbon steel flat products (''CORE'') from Korea until no later than July 22, 2004. The new shipper review covers one producer/exporter, Hyundai Hysco (''Hysco''). The period of review is August 1, 2002, through July 31, 2003. This extension is made pursuant to section 751(a)(2)(B)(iv) of the Tariff Act of 1930, as amended.

FOR FURTHER INFORMATION CONTACT: Michael Ferrier or Paul Walker, AD/CVD Enforcement, Group III, Office 9, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington DC 20230; telephone: (202) 482–2667 and (202) 482–0413, respectively.

Background

On August 29, 2003, the Department received a timely request from Hysco in accordance with 19 CFR 351.214(c), for a new shipper review of the antidumping duty order on CORE from Korea, which has an August anniversary date. Hysco identified itself as a

producer/exporter of CORE and its subsidiary, Hyundai Pipe America (''HPA''), as its importer of CORE.

On October 3, 2003, the Department published a notice of initiation of a new shipper review of CORE from Korea covering the period August 1, 2002 through July 31, 2003. *See Corrosion-Resistant Carbon Steel Flat Products from Korea: Initiation of New Shipper Antidumping Duty Review,* 68 FR 57423 (October 3, 2003).

Extension of Time Limit for Final Results of New Shipper Review

Section 351.214(i)(1) of the Act provides that the Department will issue the preliminary results of a new shipper review within 180 days after the date the new shipper review was initiated. If the Department determines that a new shipper review is extraordinarily complicated, however, § 351.214(i)(2) of the Act allows the Department to extend the deadline for the preliminary results to up to 300 days after the date the new shipper review was initiated. The Department has determined that this case is extraordinarily complicated, and the preliminary results of this new shipper review cannot be completed within 180 days from the date on which the new shipper review was initiated. Specifically, the Department finds that this new shipper review is extraordinarily complicated because the Department is collecting and analyzing detailed data pertaining to multiple-stage production costs. In addition, the Department is analyzing home market sales of subject merchandise for further processing into non-subject merchandise and subsequent export, as well as issues related to scope exclusions of certain products.

Therefore, given the number and complexity of issues in this case, and in accordance with § 351.214(i)(2) of the Act, we are extending the time period for issuing the preliminary results of review by 120 days until July 22, 2004. The final results continue to be due 90 days after the publication of the preliminary results, unless otherwise extended.

Dated: March 18, 2004.

Joseph A. Spetrini,

Deputy Assistant Secretary for Import Administration, Group III.

International Trade Administration

[A–351–824]

Silicomanganese From Brazil: Final Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of final results of antidumping duty administrative review.

SUMMARY: On October 27, 2003, the Department of Commerce published the preliminary results of the administrative review of the antidumping duty order on silicomanganese from Brazil. The review covers exports of this merchandise to the United States by the collapsed parties, Sibra Eletro–Siderurgica Brasileira S.A. (SIBRA), Companhia Paulista de Ferro–Ligas (CPFL), and Urucum Mineracao (Urucum) (collectively ''SIBRA/CPFL/Urucum''), for the period December 1, 2001, through November 30, 2002. We gave interested parties an opportunity to comment on the preliminary results. Based on our analysis of the comments received, we have revised our calculations for these final results. The final weighted–average margin is listed below in the ''Final Results of Review'' section of this notice.

EFFECTIVE DATE: March 24, 2004.

FOR FURTHER INFORMATION CONTACT: Brian Ellman at (202) 482–4852 or Katja Kravetsky at (202) 482–0108, Office of AD/CVD Enforcement 3, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230.

SUPPLEMENTARY INFORMATION:

Background

On October 27, 2003, we published the preliminary results of review (see *Silicomanganese from Brazil: Preliminary Results of Antidumping Administrative Review*, 68 FR 61185). We invited parties to comment on the preliminary results of the review. On November 6, 2003, we received a request for a public hearing from Eramer Marietta (the petitioner). On December 5, 2003, the petitioner and SIBRA/CPFL filed case briefs. On December 12, 2003, both parties filed rebuttal briefs. The hearing took place on December 17, 2003. On February 23, 2004, the Department of Commerce (the Department) postponed the final results of this review until no later than March 16, 2004. See *Silicomanganese From Brazil: Extension of Time Limit for Final Results of Antidumping Duty Administrative Review*, 69 FR 9587 (March 1, 2004).

The Department has conducted this review in accordance with section 751(a) of the Tariff Act of 1930 (the Act).

Scope of Review

The merchandise covered by this review is silicomanganese. Silicomanganese, which is sometimes called ferrosilicon manganese, is a ferroalloy composed principally of manganese, silicon and iron, and normally contains much smaller proportions of minor elements, such as carbon, phosphorous and sulfur. Silicomanganese generally contains by weight not less than 4 percent iron, more than 30 percent manganese, more than 8 percent silicon, and not more than 3 percent phosphorous. All compositions, forms, and sizes of silicomanganese are included within the scope of this review, including silicomanganese slag, fines, and briquettes. Silicomanganese is used primarily in steel production as a source of both silicon and manganese.

Silicomanganese is currently classifiable under subheading 7202.30.0000 of the *Harmonized Tariff Schedule of the United States* (HTSUS). Some silicomanganese may also currently be classifiable under HTSUS subheading 7202.99.5040. This scope covers all silicomanganese, regardless of its tariff classification. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope remains dispositive.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs by parties to this administrative review are addressed in the ''Issues and Decision Memorandum'' from Susan Kuhbach, Acting Deputy Assistant Secretary, to Jeffrey May, Acting Assistant Secretary for Import Administration, dated March 16, 2004 (Decision Memorandum), which is hereby adopted by this notice. Attached to this notice as an appendix is a list of the issues that parties have raised and to which we have responded in the Decision Memorandum. Parties can find a complete discussion of all issues raised in this review and the corresponding recommendations in this public memorandum, which is on file in the Central Records Unit, Room B–099 of the main Department of Commerce building. In addition, a complete version of the Decision Memorandum can be accessed directly on the Internet

at *http://ia.ita.doc.gov/frn.* The paper copy and electronic version of the Decision Memorandum are identical in content.

Sales Below Cost in the Home Market

As discussed in detail in the preliminary results, the Department disregarded home–market below–cost sales that failed the cost test.

Changes Since the Preliminary Results

Based on our analysis of the comments received, we have made certain changes in the margin calculation. See ''Cost of Production and Constructed Value Calculation Adjustments for the Final Results'' from Robert Greger to Neal Halper, Director, Office of Accounting and ''Final Results Analysis Memorandum of SIBRA/CPFL/Urucum'' from Katja Kravetsky and Brian Ellman to the File, both dated March 16, 2004.

Final Results of Review

As a result of our review, we determine that the following weighted–average margin exists for the collapsed parties SIBRA, CPFL, and Urucum for the period December 1, 2001, through November 30, 2002:

Manufacturer/exporter	Weighted–average percentage margin
SIBRA/CPFL/Urucum ...	13.02

Duty Assessment and Cash Deposit Requirements

The Department will determine, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries. In accordance with 19 CFR 351.212(b)(1), we have calculated an importer–specific assessment rate. The Department will issue appropriate assessment instructions directly to CBP within 15 days of publication of these final results of review. Further, the following deposit requirements will be effective upon publication of the final results of this administrative review for all shipments of silicomanganese from Brazil entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results, as provided by section 751(a)(2)(C) of the Act: (1) The cash deposit rate for SIBRA/CPFL/Urucum will 13.02 percent; (2) for merchandise exported by producers or exporters that were previously reviewed or investigated, the cash deposit will continue to be the most recent rate published in the final determination or final results for which the producer or exporter received an individual rate; (3) if the exporter is not a firm covered in this review, a prior review, or the original less–than-fair–value (LTFV) investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the subject merchandise; and (4) if neither the exporter nor the manufacturer is a firm covered in this or any previous review, the cash deposit rate shall be 17.60 percent, the all–others rate established in the LTFV investigation. See *Notice of Final Determination of Sales at Less Than Fair Value: Silicomanganese from Brazil*, 59 FR 55432, (November 7, 1994). These deposit requirements shall remain in effect until publication of the final results of the next administrative review.

Notification of Interested Parties

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during the review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This notice also serves as a reminder to parties subject to administrative protective orders (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO as explained in the administrative protective order itself. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

These final results of administrative review and notice are issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: March 16, 2004.

Jeffrey May,

Acting Assistant Secretary for Import Administration.

[I.D. 031704A]

Endangered Species; Permit No. 1214

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Scientific research permit modification.

SUMMARY: Notice is hereby given that a request for modification of scientific research permit no. 1214 submitted by Jane Provancha, Dyn–2, Dynamac Corporation, Kennedy Space Center, FL, 32899 has been granted.

ADDRESSES: The amendment and related documents are available for review upon written request or by appointment in the following offices:

Permits, Conservation and Education Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301)713–2289, fax (301)713–0376;

Southeast Region, NMFS, 9721 Executive Center Drive North, St. Petersburg, FL 33702–2432; phone (727)570–5301; fax (727)570–5320.

FOR FURTHER INFORMATION CONTACT: Patrick Opay, (301)713–1401 or Ruth Johnson, (301)713–2289.

SUPPLEMENTARY INFORMATION: The requested amendment has been granted under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the provisions of 50 CFR 222.306 of the regulations governing the taking, importing, and exporting of endangered and threatened fish and wildlife (50 CFR 222–226).

The modification extends the expiration date of the Permit from March 31, 2004, to March 31, 2005, for

takes of green (*Chelonia mydas*) and loggerhead (*Caretta caretta*) sea turtles.

Issuance of this amendment, as required by the ESA was based on a finding that such permit: (1) Was applied for in good faith; (2) will not operate to the disadvantage of the threatened and endangered species which are the subject of this permit; and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: March 19, 2004.

SUPPLEMENTARY INFORMATION: The requested amendment has been granted under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the provisions of § 216.39 of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), the provisions of § 222.306 of the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222–226).

Issuance of this amendment, as required by the ESA was based on a finding that such permit: (1) Was applied for in good faith; (2) will not operate to the disadvantage of the endangered species which is the subject of this permit; and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: March 18, 2004.

Stephen L. Leathery,

Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–S

DEPARTMENT OF COMMERCE

Patent and Trademark Office

Submission for OMB Review; Comment Request

The United States Patent and Trademark Office (USPTO) has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: United States Patent and Trademark Office (USPTO).

Title: Practitioner Records Maintenance, Disclosure, and Discipline Before the United States Patent and Trademark Office (USPTO).

Form Number(s): None.

Agency Approval Number: 0651–0017.

Type of Request: Reinstatement, with change, of a previously approved collection for which approval has expired.

Burden: 8,334 hours annually.

Number of Respondents: 582 responses per year.

Avg. Hours Per Response: The USPTO estimates that practitioners spend 26 hours per year keeping and maintaining records concerning their client's cases. The USPTO estimates that practitioners seeking reinstatement to practice before the agency will spend 60 hours per year keeping and maintaining records showing their compliance with the suspension or exclusion orders. It is

estimated that it takes 2 hours to report a complaint/violation and that it takes 5 minutes (0.08 hours) to 4 hours, depending upon the nature of the complaint/violation, to respond and provide other information, as necessary. The estimated times will vary, depending upon the request. These estimates include the time to gather the necessary information; to prepare the complaint/violation, response or request; to maintain records; and to submit the requests or responses to the USPTO.

Needs and Uses: This information is required by 35 U.S.C. §§ 2(b)(2)(D) and 32, and administered by the USPTO through the USPTO Code of Professional Responsibility (37 CFR 10.20 to 10.112) and the Investigations and Disciplinary Proceedings rules (37 CFR 10.130 to 10.170). This information is used by the Director of the Office of Enrollment and Discipline (OED) to investigate and, where appropriate, prosecute for violations of the USPTO Code of Professional Responsibility. Registered practitioners are mandated to maintain proper documentation so that they can fully cooperate with an investigation in the event of a report of an alleged violation. The USPTO is submitting this collection in support of a proposed rulemaking, ''Changes to Representation of Others Before the United States Patent and Trademark Office'' (RIN 0651–AB55), which expands existing record keeping requirements. Under this proposed rulemaking, practitioners must keep copies of recordings of advertisements or communications disseminated in print or electronic media for two years after the last use of the advertisement, along with a record of when and where the advertisement was used. Additionally, practitioners who have been excluded or suspended from practice before the USPTO must keep and maintain records of their steps to comply with the suspension or exclusion order. These records serve as the practitioner's proof of compliance with the order.

Affected Public: Individuals or households; business or other for-profit; the Federal Government; and State, Local or Tribal Governments.

Frequency: On occasion.

Respondent's Obligation: Mandatory.

OMB Desk Officer: David Rostker, (202) 395–3897.

Copies of the above information collection proposal can be obtained by calling or writing Susan K. Brown, Records Officer, Office of the Chief Information Officer, Office of Data Architecture and Services, (703) 308–7400, U.S. Patent and Trademark Office, P.O. Box 1450, Alexandria, Virginia 22313, Attn: CPK 3 Suite 310, or by e-mail at *susan.brown@uspto.gov.*

Written comments and recommendations for the proposed information collection should be sent on or before April 23, 2004 to David Rostker, OMB Desk Officer, Room 10202, New Executive Office Building, Washington, DC 20503.

Dated: March 18, 2004.

Susan K. Brown,

Records Officer, USPTO, Office of Data Architecture and Services, Data Administration Division.

[FR Doc. 04–6526 Filed 3–23–04; 8:45 am]

BILLING CODE 3510–16–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Manual for Courts-Martial; Proposed Amendments

AGENCY: Joint Service Committee on Military Justice (JSC).

ACTION: Notice of Summary of Public Comment Received Regarding Proposed Amendments to the Manual for Court-Martial, United States (2002 ed.).

SUMMARY: The JSC is forwarding final proposed amendments to the Manual for Courts-Martial, United States (2002 ed.) (MCM) to the Department of Defense. The proposed changes, resulting from the JSC's 2003 annual review of the MCM, concern the rules of procedure applicable in trials by courts-martial. The proposed changes have not been coordinated within the Department of Defense under DoD Directive 5500.1, ''Preparation and Processing of Legislation, Executive Orders, Proclamations, and Reports and Comments Thereon,'' May 21, 1964, and do not constitute the official position of the Department of Defense, the Military Departments, or any other government agency.

This notice is provided in accordance with DoD Directive 5500.17, ''Role and Responsibilities of the Joint Service Committee (JSC) on Military Justice,'' May 3, 2003. This notice is intended only to improve the internal management of the Federal Government. It is not intended to create any right or benefit, substantive or procedural, enforceable at law by any party against the United States, its agencies, its officers, or any person.

In accordance with paragraph III.B.4 of the Internal Organization and Operating Procedures of the JSC, the committee also invites members of the public to suggest changes to the Manual for Courts-Martial in accordance with the described format.

ADDRESSES: Comments and materials received from the public are available for inspection or copying at the Office of the Judge Advocate General (Code 20), 716 Sicard St. SE., Suite 1000, Washington, DC 20374–5047, between 8 a.m. and 3:30 p.m., Monday through Friday, except Federal Holidays.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander James Carsten, Executive Secretary, Joint Service Committee on Military Justice, Office of the Judge Advocate General, 716 Sicard St., SE., Suite 1000, Washington, DC 20374–5047, (202) 685–7298, (202) 685–7714 fax.

SUPPLEMENTARY INFORMATION:

Background

On 15 August 2003, the JSC published a Notice of Proposed Amendments to the Manual for Courts-Martial and a Notice of Public Meeting to receive comment on its 2003 draft annual review of the Manual for Courts-Martial. On 1 October 2003, the public meeting was held. Eight individuals attended the public meeting. Five individuals provided oral comment. The JSC received two letters commenting on the proposed amendments.

Purpose

The proposed changes concern the rules of procedure applicable to trials by courts-martial. More specifically, the proposed changes: Amend Rules of Court-Martial and other provisions of the Manual to allow for military justice to be administered in a joint command environment, while maintaining the applicability of specific service regulations/limitations according to the specific regulations of the accused's service; amend the rule that allows for an accused to challenge on appeal the denial of a challenge for cause, when the member was peremptorily challenged off the panel and never took part in the deliberations of the case; clarify the death penalty factors for violations of the law of war; updating analysis sections in the M.R.E. to harmonize current case law; and replacing ''Department of Transportation'' with ''Department of Homeland Security.''

Discussion of Comments and Changes

In response to the request for public comment the JSC received oral and written comments. The JSC considered the public comments and is satisfied that the proposed amendments are appropriate to implement without additional modification. The JSC will

forward the public comments and the proposed amendments to the Department of Defense.

Summaries of the oral and written comments regarding the proposed substantive changes follow:

a. One comment noted that the amendments that maintained the applicability of service members' specific service regulations when they are subject to a court-martial or non-judicial punishment in a joint environment are appropriate. However, the comment also noted that the amendments were slightly ambiguous because no definitions are readily available for the terms ''combatant or joint commander,'' ''joint command,'' or ''joint task force''. Comment also noted that no clear rationale for the amendment is apparent on the face of the changes.

b. Certain comments argued that the proposed change to R.C.M. 912(f)(4) was improper. Comments indicated that the proposed change would lessen public confidence in the military justice system; reduced oversight of the military justice process; and are only being made in response to perceived adverse decisions of the various courts. Additionally, the rationale for the amendment that is modeled after similar provisions in Federal criminal procedures if not valid as the federal system has many more preemptory challenges than exist in the Military Justice System.

c. Certain comments opposed currently amending R.C.M. 1004(c)(10) because, as proposed, there is no rationale for the change provided on the face of the proposed amendments. It was noted that the amendment should be deferred until it can be explained and analyzed more thoroughly.

The JSC has considered these comments and has determined that the rulemaking process is adequate, satisfies statutory requirements, and provides sufficient opportunity for public participation. The JSC has determined that its proposed amendment to the R.C.M. 912 is proper and consistent with the rationale in the amended analysis. The change aligns courts-martial procedure more closely to federal practice and does not change the ability of defense counsel to exercise their peremptory challenge or raise on appeal those challenges for cause denied by the military judge, when the challenged member participated in the court-martial.

Proposed Amendments After Consideration of Public Comment Received

The proposed amendments to the Manual for Courts-Martial are as follows:

Amend the Discussion section of Part I (Preamble) by twice replacing the word ''Transportation'' with the words ''Homeland Security''.

Amend Discussion section following R.C.M. 103(19), Definition for 10 U.S.C. § 801(1) by replacing the phrase ''the General Counsel of the Department of Transportation with the phrase an official designated to serve as Judge Advocate General of the Coast Guard by the Secretary of Homeland Security.

[**Note:** The Secretary of Homeland Security has designated the Chief Counsel, U.S. Coast Guard, to serve as the Judge Advocate General of the Coast Guard.]''

Amend R.C.M. 201(e)(2)(B) by adding the word ''general'' before ''courts-martial'' and inserting the following at the end thereof: ''assigned or attached to a combatant command or joint command.''

Amend R.C.M. 201(e)(2)(C), inserting the phrase ''assigned or attached to a joint command or joint task force,'' immediately before the words ''under regulations which the superior command may prescribe.''

Amend the Analysis accompanying R.C.M. 201(e)(2) by inserting the following paragraph: ''200_ Amendment: Subsections (e)(2)(B) and (C) were revised to clarify that the reciprocal jurisdiction authority of joint commanders designated in either subsections (A), (B), or (C), is limited. This limitation is intended to preclude a joint commander from convening courts upon members who are not assigned or attached to a joint command.''

Amend R.C.M. 201(e)(3) by inserting the following immediately after the words ''armed force'': ''using the implementing regulations and procedures prescribed by the Secretary concerned of the military service of the accused,''

Amend the Analysis accompanying R.C.M. 201(e)(3) by inserting the following paragraph: ''200_ Amendment: This rule clarifies that when a service member is tried by a court-martial convened by a combatant or joint commander, the implementing regulations and procedures of the service to which the accused is a member shall apply.''

Amend R.C.N. 201(e)(4) by adding the words, '', member, or counsel'' after the words ''military judge.''

Amend the Analysis accompanying R.C.M. 201(e)(4) by inserting the following paragraph: ''200_ Amendment: Subsection (e)(4) was amended to clarify that members and counsel from different services may be detailed to a court-martial convened by a combatant or joint commander.''

Amend the Discussion following R.C.M. 201(e)(7)(B) by adding this sentence to the beginning of the Discussion: ''As to the authority to convene courts-martial, see R.C.M. 504.''

Amend R.C.M. 503(a)(3) by inserting an ''s'' to the word ''court'' of the term ''court-martial.''.

Amend R.C.M. 503(b)(3) by inserting '', a combatant command or joint command'' after the words ''A military judge from one armed force may be detailed to a court-martial convened in a different armed force.''

Amend the Analysis accompanying R.C.M. 503(b)(3) by inserting the following paragraph: ''200_ Amendment: Subsection (b)(3) was amended to clarify that a military judge from any service may be detailed to a court-martial convened by a combatant or joint commander.;''

Amend R.C.M. 503(c)(3) by inserting the phrase '', a combatant command or joint command'' after the words ''A person from one armed force may be detailed to serve as counsel in a court-martial in a different armed force.''

Amend the Analysis accompanying R.C.M. 503(c)(3) by inserting the following: ''200_ Amendment: Subsection (c)(3) was amended to clarify that counsel from any service may be detailed to a court-martial convened by a combatant or joint commander.''

Amend the R.C.M. 504(b)(2)(A) by inserting the following at the end thereof: ''A subordinate joint command or joint task force is ordinarily considered to be 'separate or detached.' ''

Amend R.C.M. 504(b)(2)(B) by inserting the following as a third element thereof: ''(iii) In a combatant command or joint command, by the officer exercising general court-martial jurisdiction over the command.''

Amend the Analysis accompanying R.C.M. 504(b)(2)(B) by inserting the following paragraph: ''200_ Amendment: Subsection (b)(2)(B) was amended to clarify those authorized to determine when a unit is 'separate or detached.' ''

Amend the Discussion following R.C.M. 907(b)(2)(B) by inserting, in the first sentence, the word ''either:'' before the words ''no limitation'', inserting the words ''; or child abuse offenses committed on or after 24 November 1998 for which a time limitation has been enacted that is based upon a child abuse victim reaching the age of 25'' after the words ''no limitation as to time'', and by inserting the words ''and (b)(2)'' after the words ''see Article 43(a)''.

Amend the Analysis accompanying R.C.M. 907(b)(2) by inserting the following paragraph: 200_ Amendment: The discussion was based upon the National Defense Authorization Act for Fiscal year 2004, Pub. L. No. 108–136, § 551, __Stat __(2003). the amendment to Art. 43, UCMJ creates a statute of limitations period that extends until a child-victim attains the age of 25 years for certain specified UCMJ and federal offenses committed on or after 24 November 1998. Due to Ex Post Facto considerations, allowance is required for those child abuse cases in which the five-year statute of limitations expired at the time the amendment to Article 43, UCMJ, became effective. See generally *Stogner* v. *California*, 123 S. Ct. 2446; 156 L. Ed. 2d 544; 2003 U.S. LEXIS 5011; 71 U.S.L.W. 4588; 2003 Cal. Daily Op. Service 5575; 2003 Daily Journal DAR 6989; 16 Fla. L. Weekly Fed. S 437. All child abuse offenses committed prior to that date would be subject to the previous five-year statute of limitations which would expire on the day prior to the effective date of the amendment—November 24, 2003. The referenced case permits unexpired periods to

be extended by the new statute, but does not allow the statute to renew an expired period.

Amend R.C.M. 912(f)(43) by deleting the entirety of the fifth sentence and inserting the following words immediately after the words ''When a challenge for cause has been denied'' in the fourth sentence: ''the successful use of a peremptory challenge by either party, excusing the challenged member from further participation in the court-martial, shall preclude further consideration of the challenge of that excused member upon later review. Further,''

Amend the Analysis to R.C.M. 912(f)(4) by inserting the following paragraph: ''200_ Amendment: This rule change is intended to conform military practice to federal practice and limit appellate litigation when the challenged panel member could have been peremptorily challenged or actually did not participate in the trial due to a peremptory challenge by either party. This amendment is consistent with the President's lawful authority to promulgate a rule that would result in placing before the accused the hard choice faced by defendants in federal district courts—to let the challenged juror sit on the case and challenge the ruling on appeal or to use a peremptory challenge to remove the juror and ensure an impartial jury. See United States v. Miles, 58 M.J. 192 (C.A.A.F. 2003); United States v. Wiesen 57 M.J. 172 (C.A.A.F. 2001), petition for reconsideration denied, 57 M.J. 48 (C.A.A.F. 2002); United States v. Armstrong, 54 M.J. 51 (C.A.A.F. 2000).

Amend R.C.M. 1004(c)(10) by deleting the words ''death is authorized under the law of war for the offense'' and replacing with the words ''the violation constitutes a grave breach of the law of war.''

Insert the following Discussion to accompany R.C.M. 1004(c)(10): ''Grave breaches of the laws and customs of war are defined by the 1949 Geneva Conventions and customary international law. For the definition of what may constitute a grave breach, see The First Geneva Convention, Aug. 12, 1949, art. 50, 6 U.S.T. 3114, T.I.A.S. 3362; The Second Geneva Convention, Aug. 12, 1949, art. 51, 6 U.S.T. 3217, T.I.A.S. 3363; The Third Geneva Convention, Aug. 12, 1949, art. 130, 6 U.S.T. 3316, T.I.A.S. 3364; and The Fourth Geneva Convention , Aug. 12, 1949, art. 147, 6 U.S.T. 3516, T.I.A.S. 3365.''

Amend the Analysis accompanying R.C.M. 1004(c)(10) by inserting the following paragraph: ''200_ Amendment. Subsection (c)(10) was amended to clarify which law of war violations may subject the accused to capital punishment.''

Amend R.C.M. 1301(a) by inserting the following after the second sentence: ''Summary courts-martial shall be conducted in accordance with the regulations of the military service to which the accused belongs.''

Amend the Analysis accompanying R.C.M. 1301(a) by inserting the following paragraph: ''200_ Amendment: Subsection (a) was amended to clarify that summary courts-martial convened by a combatant or joint commander are to be conducted in accordance with the implementing regulations and procedures of the service to which the accused is a member.''

Amend M.R.E. 317(b) replacing the word ''Transportation'' with the words ''Homeland Security/''

Amend the Analysis to M.R.E. 317(b) by replacing the word ''Transportation'' with the words ''Homeland Security.''

Amend the Analysis to M.R.E. 801(d)(1)(B) by substituting the following therefor: ''Rule 801(d)()1)(B) makes admissible on the merits a statement consistent with the in-court testimony of the witness and ''offered to rebut an express or implied charge against the declarant of recent fabrication or improper influence or motive.'' Unlike Rule 801(d)(1)(A), which addresses prior inconsistent statements given under oath, the earlier consistent statement need not have been made under oath or at any type of proceeding.

Rule 801(d)(1)(B) provides in pertinent part that a statement is not hearsay if the declarant testifies at the trial or hearing and is subject to cross-examination concerning the statement, and the statement is consistent with the declarant's testimony and is offered to rebut an express or implied charge against the declarant of recent fabrication or improper influence or motive. The court has interpreted the rule to require that a prior statement, admitted as substantive evidence, precede any motive to fabricate or improper influence that it is offered to rebut. United States v. Allison, 49 M.J. 54 (C.A.A.F. 1998). Where multiple motives to fabricate or multiple improper influences are asserted, the statement need not precede all such motives or inferences, but only the one it is offered to rebut. United States v. Faison, 49 M.J. 59 (C.A.A.F. 1998). This interpretation of the rule is consistent with the Supreme Court's decision in Tome v. United States, 513 U.S. 150 (1995).''

Delete the Analysis to M.R.E. 803(24).

Delete the Analysis to M.R.E. 804(b)(5).

Insert the following Analysis for M.R.E. 807: ''MRE 807 was adopted on 30 May 1998 without change from the Federal Rule and represents the residual exception to the hearsay rule formerly contained in MRE 803(24) and MRE 804(b)(5).

The Rule strikes a balance between the general policy behind the Rules of Evidence of permitting admission of probative and reliable evidence and the congressional intent that ''that the residual hearsay exceptions will be used very rarely, and only in exceptional circumstances.'' S. Rep. No. 1277, 93d Cong., 2d Sess., reprinted in 1974 U.S. Code Cong. & Admin. News 7051, 7066. MRE 807 represents the acceptance of the so-called ''catch-all'' or ''residual'' exception to the hearsay rule. Because of the Constitutional concerns associated with hearsay statements, the courts have created specific foundational requirements in order for residual hearsay to be admitted. See United States v. Haner, 49 M.J. 72 (C.A.A.F. 1998). These requirements are: necessity, materiality, reliability, and notice.

The necessity prong ''essentially creates a 'best evidence' requirement.'' United States v. Kelley, 45 M.J. 275 (C.A.A.F. 1996) (citing Larez v. City of Los Angeles, 946 F.2d 630, 644 (9th Cir. 1991)). Coupled with the rule's materiality requirement, necessity represents an important fact that is more than marginal or inconsequential and is in furtherance of the interests of justice and the general purposes of the rules of evidence. See United States v. Gonzalez, 2003 CCA Lexis 57 (A.F.Ct.Crim.App. 2003).

In order to fulfill the reliability condition, the proponent of the statement must demonstrate that the statement has particularized guarantees of trustworthiness as shown from the totality of the circumstances. Idaho v. Wright, 497 U.S. 805 (1990). The factors surrounding the taking of the statement and corroboration by other evidence should be examined to test the statement for trustworthiness. The Court of Appeals for the Armed Forces has held that the Supreme Court's prohibition against bolstering the indicia of reliability under a Sixth Amendment analysis does not apply to a residual hearsay analysis. Therefor, in addition to evidence of the circumstances surrounding the taking of the statement, extrinsic evidence can be considered. United States v. McGarth, 39 M.J. 158 (C.M.A. 1994).''

Amend Part IV, Punitive Articles, para. 16(c)(1)(a) by replacing the word ''Transportation'' with the words ''Homeland Security.''

Amend Part V, Nonjudicial Punishment Procedure, paragraph 1(h), by renaming existing paragraph 1(h) to 1(i) and inserting the following new paragraph 1(h): ''(h) Applicable standards. Unless otherwise provided, the service regulations and procedures of the servicemember shall apply.''

Amend the Analysis section of Part V, Nonjudicial Punishment Procedure, paragraph 1(h), by renaming it paragraph 1(i) and inserting the following as paragraph 1(h): ''200_ Amendment: Subsection (h) is new. This subsection was added to clarify that nonjudicial punishment proceedings conducted in a combatant or joint command are to be conducted in accordance with the implementing regulations and procedures of the service to which the accused is a member.''

Amend Part V, Nonjudicial Punishment Procedure, paragraph 2(a) by deleting ''Unless otherwise'' and replacing with ''As.''

Amend Part V, Nonjudicial Punishment Procedure, paragraph 2(a) by inserting the following after the second sentence: ''Commander includes a commander of a joint command.''

Amend Part V, Nonjudicial Punishment Procedure, paragraph 2(a) by inserting the phrase ''of a commander'' in the third sentence after the words ''the authority.''

Amend the Analysis accompanying Part V, Nonjudicial Punishment Procedure, paragraph 2 inserting the following paragraph: ''200_ Amendment: Subsection (2) was amended to clarify the authority of the commander of a joint command to impose nonjudicial punishment upon service members of the joint command.''

Amend Part V, Nonjudicial Punishment Procedures, paragraph 7(e), by replacing the word ''Transportation'' with the words ''Homeland Security.''

Delete Appendix 3.1.

Amend Appendix 21, Introduction, paragraph b (Supplementary Materials) by

replacing the word ''Transportation'' with the words ''Homeland Security.''

Amend the Introduction to Appendix 22 by inserting the following at the end of the first sentence: ''(the department under which the Coast Guard was operating at that time.)''

Amend the Introduction to Appendix 22 by replacing the word ''Transportation'' located at the second paragraph with the words ''Homeland Security.''

Dated: March 18, 2004.

L.M. Bynum,

Alternate OSD Federal Register, Liaison Officer, Department of Defense.

BILLING CODE 5001–06–M

DEPARTMENT OF DEFENSE

Defense Logistics Agency

Privacy Act of 1974; Computer Matching Program

AGENCY: Defense Manpower Data Center, Defense Logistics Agency, DoD.

ACTION: Notice of a computer matching program.

SUMMARY: Subsection (e)(12) of the Privacy Act of 1974, as amended (5 U.S.C. 552a), requires agencies to publish advanced notice of any proposed or revised computer matching program by the matching agency for public comment. The Department of Defense (DoD) as the matching agency under the Privacy Act, is hereby giving notice to the record subjects of a computer matching program between Social Security Administration (SSA) and the DoD that their records are being matched by computer.

The Social Security Act requires SSA to verify, with independent or collateral sources, information provided to SSA by recipients of SSI payments and beneficiaries of SVB benefits. The SSI and SVB recipient/beneficiary provides information about eligibility/entitlement factors and other relevant information. SSA obtains additional information as necessary before making any determinations of eligibility/payment or entitlement/benefit amounts or adjustments thereto. With respect to military retirement payments to SSI recipients and SVB beneficiaries who are retired members of the Uniformed Services or their survivors, SSA proposes to accomplish this task by computer matching with the DoD.

DATES: This proposed action will become effective April 23, 2004, and matching may commence unless changes to the matching program are required due to public comments or by Congressional or by Office of Management and Budget objections. Any public comment must be received before the effective date.

ADDRESSES: Any interested party may submit written comments to the Director, Defense Privacy Office, 1941 Jefferson Davis Highway, Suite 920, Arlington, VA 22202–4502.

FOR FURTHER INFORMATION CONTACT: Mr. Vahan Moushegian, Jr. at (703) 607–2943.

SUPPLEMENTARY INFORMATION: Pursuant to subsection (o) of the Privacy Act of 1974, as amended (5 U.S.C. 552a), the Defense manpower Data Center (DMDC) and SSA have concluded an agreement to conduct a computer matching program.

The parties to this agreement have determined that a computer matching program is the efficient, expeditious, and effective means of obtaining and processing the information needed by the SSA under the Social Security Act to verify the eligibility/entitlement of, and to verify payment benefit amounts for, certain SSI and SVB recipients/beneficiaries. Computer matching also will produce the required data to calculate and make any necessary adjustments of SSI payments and SVB benefits. The principal alternative to using a computer matching program would be to conduct a manual comparison of DoD payment records with a list of SSI and SVB recipients/beneficiaries. Conducting such a manual match would clearly impose a considerable administrative burden, constitute a greater intrusion on the individual's privacy, and would result in additional delay in the eventual SSI payment and SVB benefit or recovery of unauthorized or erroneous payments/benefits. Using the computer matching program, the information exchange between the parties can be accomplished within 30 days.

A copy of the computer matching agreement between SSA and DoD is available upon request. Requests should be submitted to the address caption above or to the Information Exchange and Matching, Office of Earnings and Information Exchange, Office of Income Security Programs, Office of Disability and Income Security Programs, Social Security Administration, 0075 RRCC, 6401 Security Boulevard, Baltimore, MD 21235.

Set forth below is the notice of the establishment of a computer matching program required by paragraph 6.c. of the Office of Management and Budget Guidelines on computer matching published on June 19, 1989, at 54 FR 2518.

The matching agreement, as required by 5 U.S.C. 552a(r) of the Privacy Act, and an advance copy of this notice was submitted on March 16, 2004, to the House Committee on Government Reform, the Senate Committee on Governmental Affairs, and the Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget pursuant to paragraph 4d of Appendix I to OMB Circular No. A–130, ''Federal Agency Responsibilities for Maintaining Records about Individuals,'' dated February 8, 1996 (February 20, 1996, 61 FR 6427).

Dated: March 18, 2004.

L.M. Bynum,

Alternate OSD Federal Register Liaison Office, Department of Defense.

Computer Matching Program Between the Social Security Administration and the Department of Defense for Verification of Social Security Supplemental Security Income Payments and Special Veterans Benefits

A. Participating Agencies: Participants in this computer matching program are the Social Security Administration (SSA) and the Defense Manpower Data Center (DMDC) of the Department of Defense (DoD). The SSA is the source agency, *i.e.,* the activity disclosing the records for the purpose of the match. The DMDC is the specific recipient activity or matching agency, *i.e.,* the agency that actually performs the computer matching.

B. Purpose of the Match: The Social Security Act requires SSA to verify, with independent or collateral sources, information provided to SSA by recipients of SSI payments and beneficiaries of SVB benefits. The SSI and SVB recipient/beneficiaries provides information about eligibility/entitlement factors and other relevant information. SSA obtains additional information as necessary before making any determinations of eligibility/payment or entitlement/benefit amounts or adjustments thereto. With respect to military retirement payments to SSI recipients and SVB beneficiaries who are retired members of the Uniformed Services or their survivors, SSA proposes to accomplish this task by computer matching with the DOD.

C. Authority for Conducting the Match: The legal authority for the matching program is contained in sections 1631(e)(1)(B),(f) and 806(b) of the Social Security Act (42 U.S.C. §§ 1383(e)(1)(B), (f) and 1006(b)).

D. Records to be Matched: The systems of records maintained by the respective agencies under the Privacy Act of 1974, as amended, from which records will be disclosed for the

purpose of this computer match are as follows:

1. SSA will use records from a system of records identified as 60–0103, entitled ''Supplemental Security Income Record and Special Veterans Benefits, SSA/OEEAS,'' last published in the **Federal Register** at 66 FR 11079, February 21, 2001.

2. DMDC will use records from a system of records identified as S322.10 DMDC, entitled ''Defense Manpower Data Center Data Base,'' last published in the **Federal Register** at 67 FR 78781, December 26, 2002.

E. Description of Computer Matching Program: SSA, as the source agency, will provide DMDC with an electronic file which contains the data elements. Upon receipt of the electronic file, DMDC, as the recipient agency, will perform a computer match using all nine digits of the SSN of the SSI/SVB file against a DMDC database which contains the data elements. The DMDC database consists of extracts of personnel and pay records of retired members of the uniformed services or their survivors. The ''hits'' or matches will be furnished to SSA. SSA is responsible for verifying and determining that the data on the DMDC electronic reply file are consistent with the SSA source file and resolving any discrepancies or inconsistencies on an individual basis. SSA will also be responsible for making final determinations as to eligibility for/entitlement to, or amount of payments/benefits, their continuation or needed adjustments, or any recovery of overpayments as a result of the match.

1. The electronic file provided by SSA will contain approximately 6.5 million records extracted from the SSR/SVB.

2. The electronic DMDC database contains records on approximately 2.3 million retired uniformed service members or their survivors.

F. Inclusive Dates of the Matching Program: This computer matching program is subject to public comment and review by Congress and the Office of Management and Budget. If the mandatory 30 day period for comment has expired and no comments are received and if no objections are raised by either Congress or the Office of Management and Budget within 40 days of being notified of the proposed match, the computer matching program becomes effective and the respective agencies may begin the exchange at a mutually agreeable time on a quarterly basis, shifting to a monthly basis, provided DoD consents, when and if the computer system work can be completed to effectuate the increased frequency. By agreement between SSA and DMDC, the matching program will be in effect for 18 months with an option to renew for 12 additional months unless one of the parties to the agreement advises the other by written request to terminate or modify the agreement.

G. Address for Receipt of Public Comments or Inquiries: Director, Defense Privacy Office, 1941 Jefferson Davis Highway, Suite 920, Arlington, VA 22202–4502. Telephone (703) 607–2943.

BILLING CODE 5001–06–M

DEPARTMENT OF DEFENSE

Defense Logistics Agency

Privacy Act of 1974; Computer Matching Program

AGENCY: Defense Manpower Data Center Defense Logistics Agency, DOD.

ACTION: Notice of a computer matching program.

SUMMARY: Subsection (e)(12) of the Privacy Act of 1974, as amended, (5 U.S.C. 552a) requires agencies to publish advance notice of any proposed or revised computer matching program by the matching agency under the Privacy Act, is hereby giving construction notice in lieu of direct notice to the record subjects of a computer matching program between the Department of the Treasury and DoD that their records are being matched by computer. The record subjects are delinquent debtors of the Bureau of the Public Debt, Department of the Treasury, who are current or former Federal employees receiving any Federal salary or benefit payments and who are indebted or delinquent in their repayment of debts to the United States Government under certain programs administered by the Public Debt.

DATES: This proposed action will become effective May 24, 2004 and matching may commence unless changes to the matching program are required due to public comments or by Congressional or by Office of Management and Budget objections. Any public comment must be received before the effective date.

ADDRESSES: Any interested party may submit written comments to the Director, Defense Privacy Office, 1941 Jefferson Davis Highway, Suite 920, Arlington, VA 22202–4502.

FOR FURTHER INFORMATION CONTACT: Mr. Vahan Moushegian, Jr. at (703) 607–2943.

SUPPLEMENTARY INFORMATION: Pursuant to subsection (o) of the Privacy Act of 1974, as amended (5 U.S.C. 552a), the Department of the Treasury and the Defense Manpower Data Center (DMDC) have concluded an agreement to conduct a computer matching program. The purupose of the match is to exchange personal data between the agencies for debt collection. The match will yield the identity and location of the debtors within the Federal Government so that the Bureau can pursue recoupment of the debt by voluntary payment or by administrative or salary offset procedures. Computer matching appeared to be the most efficient and effective manner to accomplish this task with the least amount of intrusion of personal privacy of the individuals concerned. It was therefore concluded and agreed upon that computer matching would be the best and least obtrusive manner and choice for accomplishing this requirement.

A copy of the computer matching agreement between the Department of the Treasury and DMDC is available to the public upon request. Requests should be submitted to the address caption above or to the Debt Collection Officer, Bureau of Public Debt, Hintgen Building, Room 114, PO Box 1328, Parkersburg, WV 26106–1328.

Set forth below is the notice of the establishment of the computer matching program required by paragraph 6.c. of the Office of Management and Budget Guidelines on computer matching published on June 19, 1989, at 54 FR 25818.

The matching agreement, as required by 5 U.S.C. 552a(r) of the Privacy Act, and an advance copy of this notice was submitted on March 16, 2004, to the House Committee on Government Reform, the Senate Committee on Governmental Affairs, and the Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget pursuant to paragraph 4d of Appendix I to OMB Circular No. A–130, 'Federal Agency Responsibilities for Maintaining Records about Individuals,' dated February 8, 1996 (February 20, 1996, 61 FR 6427).

Dated: March 18, 2004.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Computer Matching Program Between the Department of the Treasury/Bureau of Public Debt, and the Defense Manpower Data Center, Department of Defense for Debt Collection

A. Participating Agencies

Participants in this computer matching program are in the Bureau of Public Debt, Department of the Treasury and the Defense Manpower Data Center (DMDC), Department of Defense (DoD). The Bureau of Public Debt is the source agency, *i.e.,* the agency disclosing the records for the purpose of the match. DMDC is the specific recipient or matching agency, *i.e.,* the agency that actually performs the computer matching.

B. Purpose of the Match

The purpose of the match is to identify and locate any matched Federal personnel, employed, serving or retired, who owe delinquent debts to the Federal Government under certain programs administered by the Bureau of Public Debt. The Bureau will use this information to initiate independent collection of those debts under the provisions of the Debt Collection Act of 1982, as amended, when voluntary payment is not forthcoming. These collection efforts will include requests by Public Debt of the military service/employing agency in the case of military personnel (either active, reserve, or retired) and current non-postal civilian employees, and to the Office of Personnel Management in the case of retired non-postal civilian employees to apply administrative and/or salary offset procedures until such time as the obligation is paid in full.

C. Authority for Conducting the Match

The legal authority for conducting the matching program is contained in the Debt Collection Act of 1982 (Pub. L. 97–365), as amended by the Debt Collection Improvement Act of 1996 (Pub. L. 104–134, section 31001); 31 U.S.C. chapter 37, subchapter I (General) and subchapter II (Claims of the United States Government); 31 U.S.C. 3711, Collection and Compromise; 31 U.S.C. 3716, Administrative Offset; 5 U.S.C. 5514, Installment Deduction for Indebtedness (Salary Offset); 10 U.S.C. 135, Under Secretary of Defense (Comptroller); Section 101(1) of Executive order 12731; 31 CFR chapter IX, Federal Claims Collection Standards; 5 CFR 550.1101–550.1108 Collection by Offset from Indebted Government Employees (OPM); 31 CFR part 5, subparts B & D (Department of Treasury).

D. Records To Be Matched

The systems of records maintained by the respective agencies under the Privacy Act of 1974, as amended, from which records will be disclosed for the purpose of this computer match are as follows:

1. The Bureau of Public Debt will use personal data from the following records systems for the match:

a. Record system identified as Treasury/BPD.001, entitled ''Human Resources and Administrative Records,'' last published in the **Federal Register** at 66 FR 28222, May 22, 2001.

b. Record system identified as Treasury/BPD.002, entitled ''United States Savings-Type Securities,'' last published in the **Federal Register** at 66 FR 28224, May 22, 2001.

c. Record system identified as Treasury/BPD.003 entitled ''United States Securities (Other than Savings-Type Securities),'' last published in the **Federal Register** at 66 FR 28227, May 22, 2001.

d. Record system identified as Treasury/BPD.008, entitled ''Retail Treasury Securities Access Application,'' last published in the **Federal Register** at 66 FR 28235, May 22, 2001.

e. Record system identified as Treasury .001, entitled ''Treasury Personnel and Payroll System,'' last published in the **Federal Register** at 68 FR 38112, June 26, 2003.

f. Record system identified as Treasury .009, entitled ''Treasury Financial Management Systems,'' last published in the **Federal Register** at 67 FR 7473, February 19, 2002.

g. Record system identified as Treasury .010, entitled ''Telephone Call Detail Records,'' last published in the **Federal Register** at 63 FR 69741, December 17, 1998.

2. DOD will use personal data from the record system identified as S322.11 DMDC, entitled ''Federal Creditor Agency Debt Collection Database,'' last published in the **Federal Register** at 64 FR 42101, August 3, 1999.

E. Description of Computer Matching Program

The Bureau of Public Debt, as the source agency, will provide DMDC with an electronic file which contains the names of delinquent debtors in programs the Bureau administers. Upon receipt of the electronic file of debtor accounts, DMDC will perform a computer match using all nine digits of the SSN of the Bureau's file against a DMDC computer database. The DMC database, established under an interagency agreement between DOD, OPM, OMB and the Treasury Department consists of employment records of non-postal Federal employees and military members, both active and retired. The 'hits' or matches will be furnished to the Bureau. The Bureau is responsible for verifying and determining that the data on the DMDC reply tape file are consistent with the Bureau's source file and for resolving any discrepancies or inconsistencies on an individual basis. The Bureau will also be responsible for making final determinations as to positive identification, amount of indebtedness and recovery efforts as a result of the match.

The electronic file provided by the Bureau of Public Debt will contain data elements of the debtor's name, SSN, internal account numbers and the total amount owed for each debtor on approximately 4000 delinquent debtors. The electronic file provided by DMDC will contain an individual's name, SSN, military service or employing agency and current work or home address.

The DMDC computer database file contains approximately 5.78 million records of active duty and retired military members, including Reserve and Guard, and approximately 2.03 million records of active and retired non-postal Federal civilian employees.

F. Inclusive Dates of the Matching Program

This computer matching program is subject to review by the Office of Management and Budget and Congress. If the mandatory 30 day period for public comment has expired and if no objections are raised by either Congress or the Office of Management and Budget within 40 days of being notified of the proposed match, the computer matching program becomes effective and the respective agencies may begin the exchange of data at a mutually agreeable time on an annual basis. By agreement between the Department of the Treasury and DoD, the matching program will be in effect and continue for 18 months with an option to extend for 12 additional months unless one of the parties to the agreement advises the other by written request to terminate or modify the agreement.

G. Address for Receipt of Public Comments or Inquiries

Director, Defense Privacy Office, 1941 Jefferson Davis Highway, Suite 920,

Arlington, VA 22202–4502. Telephone (703) 607–2943.

BILLING CODE 5001–06–M

DEPARTMENT OF DEFENSE

Defense Logistics Agency

Privacy Act of 1974; Systems of Records

AGENCY: Defense Logistics Agency.

ACTION: Notice to alter a system of records.

SUMMARY: The Defense Logistics Agency proposes to alter a system of records notice in its inventory of record systems subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended.

The alteration to S322.50 DMDC adds two routine uses to permit the release of records to State and local child support enforcement agencies for purposes of providing information, consistent with the requirements of 29 U.S.C. 1169(a), 42 U.S.C. 666(a)(19), and E.O. 12953 and in response to a National Medical Support Notice (NMSN) (or equivalent notice if based upon the statutory authority for the NMSN), regarding the military status of identified individuals and whether, and for what period of time, the children of such individuals are or were eligible for DoD health care coverage; and to the Department of Health and Human Services (HHS) for purposes of providing information, consistent with the requirements of 42 U.S.C. 653 and in response to a HHS request, relating to whether, and for what period of time, the children of military personnel are or were covered by DoD health care coverage.

DATES: This action will be effective without further notice on April 23, 2004, unless comments are received that would result in a contrary determination.

ADDRESSES: Send comments to the Privacy Act Officer, Headquarters, Defense Logistics Agency, ATTN: DSS–B, 8725 John J. Kingman Road, Stop 6220, Fort Belvoir, VA 22060–6221.

FOR FURTHER INFORMATION CONTACT: Ms. Susan Salus at (703) 767–6183.

SUPPLEMENTARY INFORMATION: The Defense Logistics Agency notices for systems of records subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address above.

The proposed system report, as required by 5 U.S.C. 552a(r) of the Privacy Act of 1974, as amended, was submitted on March 16, 2004, to the House Committee on Government Reform, the Senate Committee on Governmental Affairs, and the Office of Management and Budget (OMB) pursuant to paragraph 4c of appendix I to OMB Circular No. A–130, Federal Agency Responsibilities for Maintaining Records About Individuals,' dated February 8, 1996 (February 20, 1996, 61 FR 6427).

March 18, 2004.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

SYSTEM NAME:

Defense Eligibility Records (February 25, 2004, 69 FR 8632).

CHANGES:

* * * * *

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Add two new paragraphs: To State and local child support enforcement agencies for purposes of providing information, consistent with the requirements of 29 U.S.C. 1169(a), 42 U.S.C. 666(a)(19), and E.O. 12953 and in response to a National Medical Support Notice (NMSN) (or equivalent notice if based upon the statutory authority for the NMSN), regarding the military status of identified individuals and whether, and for what period of time, the children of such individuals are or were eligible for DoD health care coverage.

Note: Information requested by the States is not disclosed when it would contravene U.S. National policy or security interests (42 U.S.C. 652(e)).

To the Department of Health and Human Services (HHS) for purposes of providing information, consistent with the requirements of 42 U.S.C. 653 and in response to a HHS request, regarding the military status of identified individuals and whether, and for what period of time, the children of such individuals are or were eligible for DoD health care coverage.

Note: Information requested by HHS is not disclosed when it would contravene U.S. National policy or security interests (42 U.S.C. 653(e)).

* * * * *

S322.50 DMDC

SYSTEM NAME:

Defense Eligibility Records.

SYSTEM LOCATION:

Primary location: Naval Postgraduate School Computer Center, Naval Postgraduate School, Monterey, CA 93943–5000.

Back-up location: Defense Manpower Data Center, DoD Center Monterey Bay, 40 Giggling Road, Seaside, CA 93955–6771.

Biometrics data is maintained at the Department of Defense Biometrics Fusion Center, 1600 Aviation Way, Bridgeport, WV 26330–9476.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Active duty Armed Forces and reserve personnel and their family members; retired Armed Forces personnel and their family members; 100 percent disabled veterans and their dependents or survivors; surviving family members of deceased active duty or retired personnel; active duty and retired Coast Guard personnel and their family members; active duty and retired Public Health Service personnel (Commissioned Corps) and their family members; active duty and retired National Oceanic and Atmospheric Administration employees (Commissioned Corps) and their family members; and State Department employees employed in a foreign country and their family members; civilian employees of the Department of Defense; contractors; and any other individuals entitled to care under the health care program or to other DoD benefits and privileges; providers and potential providers of health care; and any individual who submits a health care claim.

CATEGORIES OF RECORDS IN THE SYSTEM:

Computer files containing beneficiary's name, Service or Social Security Number, enrollment number, relationship of beneficiary to sponsor, residence address of beneficiary or sponsor, date of birth of beneficiary, sex of beneficiary, branch of Service of sponsor, dates of beginning and ending eligibility, number of family members of sponsor, primary unit duty location of sponsor, race and ethnic origin of beneficiary, occupation of sponsor, rank/pay grade of sponsor, disability documentation, Medicare eligibility and enrollment data, index fingerprints and photographs of beneficiaries, blood test results, dental care eligibility codes and dental x-rays.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, Departmental Regulations; 10 U.S.C. Chapters 53, 54, 55, 58, and 75; 10 U.S.C. 136; 31 U.S.C. 3512(c); 50 U.S.C. Chapter 23 (Internal Security); DoD Directive 1341.1, Defense Enrollment/Eligibility Reporting System; DoD Instruction 1341.2, DEERS Procedures; and E.O. 9397 (SSN).

PURPOSE(S):

The purpose of the system is to provide a database for determining eligibility to DoD entitlements and privileges; to support DoD health care management programs; to provide identification of deceased members; to record the issuance of DoD badges and identification cards; and to detect fraud and abuse of the benefit programs by claimants and providers to include appropriate collection actions arising out of any debts incurred as a consequence of such programs.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, these records or inforamtion contained therein may specifically be disclosed outside the DoD as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

To the Department of Health and Human Services; Department of Veterans Affairs; Department of Commerce; Department of Transportation for the conduct of health care studies, for the planning and allocation of medical facilities and providers, for support of the DEERS enrollment process, and to identify individuals not entitled to health care. The data provided includes Social Security Number, name, age, sex, residence and demographic parameters of each Department's enrollees and family members.

To the Social Security Administration (SSA) to perform computer data matching against the SSA Wage and Earnings Record file for the purpose of identifying employers of Department of Defense (DoD) benficiaries eligible for health care. This employer data will in turn be used to identify those employed beneficiaries who have employment-related group health insurance, to coordinate insurance benefits provided by DoD with those provided by the other insurance. This information will also be used to perform computer data matching against the SSA Master Beneficiary Record file for the purpose of identifying DoD beneficiaries eligible for health care who are enrolled in the Medicare Program, to coordinate insurance benefits provided by DoD with those provided by Medicare.

To other Federal agencies and State, local and territorial governments to identify fraud and abuse of the Federal agency's program and to identify debtors and collect debts and overpayment in the DoD health care programs.

To each of the fifty States and the District of Columbia for the purpose of conducting an on going computer matching program with state Medicaid agencies to determine the extent to which state Medicaid beneficiaries may be eligible for Uniformed Services health care benefits, including CHAMPUS, TRICARE, and to recover Medicaid monies from the CHAMPUS program.

To provide dental care providers assurance of treatment eligibility.

To Federal agencies and/or their contractors, in response to their requests, for purposes of authenticating the identity of individuals who, incident to the conduct of official DoD business, present the Common Access Card or similar identification as proof of identity to gain physical or logical access to government and contractor facilities, locations, networks, or systems.

To State and local child support enforcement agencies for purposes of providing information, consistent with the requirements of 29 U.S.C. 1169(a), 42 U.S.C. 666(a)(19), and E.O. 12953 and in response to a National Medical Support Notice (NMSN) (or equivalent notice if based upon the statutory authority for the NMSN), regarding the military status of identified individuals and whether, and for what period of time, the children of such individuals are or were eligible for DoD health care coverage.

Note: Information requested by the States is not disclosed when it would contravene U.S. national policy or security interests (42 U.S.C. 653(e)).

To the Department of Health and Human Services (HHS) for purposes of providing information, consistent with the requirements of 42 U.S.C. 653 and in response to a HHS request, regarding the military status of identified individuals and whether, and for what period of time, the children of such individuals are or were eligible for DoD health care coverage.

Note: Information requested by HHS is not disclosed when it would contravene U.S. national policy or security interests (42 U.S.C. 653(e)).

The DoD 'Blanket Routine Uses' published at the beginning of DLA's compilation of systems of records notices apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained on magnetic tapes and disks, and are housed in a controlled computer media library.

RETRIEVABILITY:

Records about individuals are retrieved by an algorithm which uses name, Social Security Number, date of birth, rank, and duty location as possible inputs. Retrievals are made on summary basis by geographic characteristics and location and demographic characteristics. Information about individuals will not be distinguishable in summary retrievals. Retrievals for the purposes of generating address lists for direct mail distribution may be made using selection criteria based on geographic and demographic keys.

SAFEGUARDS:

Computerized records are maintained in a controlled area accessible only to authorized personnel. Entry to these areas is restricted to those personnel with a valid requirement and authorization to enter. Physical entry is restricted by the use of locks, guards, and administrative procedures (*e.g.,* fire protection regulations).

Access to personal information is restricted to those who require the records in the performance of their official duties, and to the individuals who are the subjects of the record or their authorized representatives. Access to personal information is further restricted by the use of passwords, which are changed periodically.

RETENTION AND DISPOSAL:

Data is destroyed when superseded or when no longer needed for operational purposes, whichever is later.

SYSTEM MANAGER(S) AND ADDRESS:

Deputy Director, Defense Manpower Data Center, DoD Center, Monterey Bay, 400 Gigling Road, Seaside, CA 93955–6771.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether information about themselves is contained in this system should address written inquiries to the Privacy Act Officer, Headquarters, Defense Logistics Agency, DSS–B, 8725 John J. Kingman Road, Stop 6220, Fort Belvoir, VA 22060–6221.

Written requests for the information should contain full name and Social Security Number of individual and sponsor, date of birth, rank, and duty location.

For personal visits the individual should be able to provide full name and Social Security Number of individual and sponsor, date of birth, rank, and duty location. Identification should be corroborated with a driver's license or other positive identification.

RECORD ACCESS PROCEDURES:

Individuals seeking access to information about themselves contained in this system should address written inquiries to the Privacy Act Officer, Headquarters, Defense Logistics Agency, DSS–B, 8725 John J. Kingman Road, Stop 6220, 2533 Fort Belvoir, VA 22060–6221.

Written requests for the information should contain full name and Social Security Number of individual and sponsor, date of birth, rank, and duty location.

For personal visits the individual should be able to provide full name and Social Security Number of individual and sponsor, date of birth, rank, and duty location. Identification should be corroborated with a driver's license or other positive identification.

CONTESTING RECORD PROCEDURES:

The DLA rules for accessing records, for contesting contents and appealing initial agency determinations are contained in 32 CFR part 323, or may be obtained from the Privacy Act Officer, Headquarters, Defense Logistics Agency, ATTN: DSS–B, 8725 John J. Kingman Road, Stop 6220, Fort Belvoir, VA 22060–6221.

RECORD SOURCE CATEGORIES:

Individuals, personnel pay, and benefit systems of the military and civilian departments and agencies of the Defense Department, the Coast Guard, the Public Health Service, Department of Commerce, the National Oceanic and Atmospheric Administration, Department of Commerce, and other Federal agencies.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DEPARTMENT OF DEFENSE

Department of the Navy

Privacy Act of 1974; System of Records

AGENCY: Department of the Navy, DoD.

ACTION: Notice to amend a system of records.

SUMMARY: The Department of the Navy is amending a system of records notice in its existing inventory of records systems subject to the Privacy Act of 1974, (5 U.S.C. 552a), as amended.

DATES: This proposed action will be effective without further notice on April 23, 2004 unless comments are received which result in a contrary determination.

ADDRESSES: Send comments to Department of the Navy, PA/FOIA Policy Branch, Chief of Naval Operations, N09B10, 2000 Navy Pentagon, Washington, DC 20350–2000.

FOR FURTHER INFORMATION CONTACT: Mrs. Doris Lama at (202) 685–6545 or DSN 325–6545.

SUPPLEMENTARY INFORMATION: The Department of the Navy systems of records notices subject to the Privacy Act of 1974, (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address above.

The specific changes to the records systems being amended are set forth below followed by the notices, as amended, published in their entirety. The proposed amendments are not within the purview of subsection (r) of the Privacy Act of 1974, (5 U.S.C. 552a), as amended, which requires the submission of a new or altered system report.

Dated: March 18, 2004.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Organizational elements of the Department of the Navy. Official mailing addresses are published in the Standard Navy Distribution List that is available at *http://neds.nebt.daps.mil/sndl.htm.*

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Department of the Navy (DoN) military and civilian personnel, non-appropriated and foreign national civilian personnel, and DoD military personnel attached to DoN components, who are involved in accidents or occupational illnesses that result in lost time, government or private property damage or destruction, and personnel injury or death.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system contains a civilian/military indicator, event reference number, case or file number, unit identification code (UIC), activity name, major command code, last name, first name and middle initial, department, sex, age, job title, marital status and number of dependents, rank/rate/grade, Social Security Number, date of mishap/illness, time of mishap/illness, general location of mishap/illness, lost workday count, injury/illness type, Occupational Safety and Health Administration (OSHA) code, part(s) of body injured, mishap/illness type, object involved (injury source), process control number (job/activity at time of mishap), chemical involved, chemical comments, formal training involved; case type (fatality, lost time, no lost time, first aid), mishap class, date of death, short narrative, start date, sent date, and claims information. The database also contains causal, 72-hour profile, involved chemical, involved sharp items, drug factors, licenses and certifications, safety course, personal protective equipment, dive log, dive saturation, dive treatment, parachute jump, vehicle, and insertion/extraction/scaling technique information as is applicable to the type of mishap the individual is involved in.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 5013, Secretary of the Navy; 10 U.S.C. 5041, Headquarters, Marine Corps; E.O. 9397 (SSN); E.O. 12196, Occupational Safety and Health Programs for Federal Employees; DoD Instruction 6055.7, Accident Investigation, Reporting, and Record Keeping; OPNAVINST 5102.1 series, Mishap Investigation and Reporting; and MCO P5102.1B, Marine Corps Ground Mishap Investigation and Reporting Manual.

PURPOSE(S):

To collect information on injuries and occupational illnesses required of Federal governmental agencies by the Occupational Safety and Health Administration (OSHA). The summary data of occupational injuries or illnesses maintained in this system will be used for analytical purposes to improve the Department of the Navy's accident prevention policies, procedures, standards, and operations, as well as ensure internal data quality assurance.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, these records or information contained therein may specifically be disclosed outside the DoD as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

The DoD 'Blanket Routine Uses' that appear at the beginning of the navy's compilation of systems of records notices apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper and electronic records.

RETRIEVABILITY:

By individual's name, Social Security Number, location of the accident or illness, or date of mishap or illness.

SAFEGUARDS:

File cabinets and computer terminals are located in limited access areas and handled by personnel that are properly trained in working with automated Privacy Act systems of records. Computer terminals are password protected.

RETENTION AND DISPOSAL:

Naval Safety Center computerized records are maintained for 20 fiscal years following the end of the fiscal year to which they relate. All other records held outside of the Naval Safety Center are maintained for five years following the end of the fiscal year to which they relate and then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Policy Official: Commander, Naval Safety Center, 375 A Street, Norfolk, VA 23511–4399.

Record Holder: Organizational elements of the Department of the Navy. Official mailing addresses are published in the Standard Navy Distribution List that is available at *http://neds.nebt.daps.mil/sndl.htm.*

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether information about themselves is contained in this system should address written inquiries to the commanding Officer of the local activity where the mishap or injury occurred.

The request should contain full name, Social Security Number and address of the individual concerned and should be signed.

RECORD ACCESS PROCEDURES:

Individuals seeking access to information about themselves contained in this system should address written inquiries to the Commanding Officer of the local activity where the mishap or injury occurred.

The request should contain full name, Social Security Number and address of the individual concerned and should be signed.

CONTESTING RECORD PROCEDURES:

The Navy's rules for accessing records, and for contesting contents and appealing initial agency determinations are published in Secretary of the Navy Instruction 5211.5; 32 CFR part 701; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Safety Investigation Reports, departmental records such as personnel file excerpts, medical record excerpts, State and Federal records, and excerpts of police reports, witness statements and general correspondence.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

[FR Doc. 04–6491 Filed 3–23–04; 8:45 am]

BILLING CODE 5001–06–M

DEPARTMENT OF ENERGY

National Nuclear Security Administration

Notice of Availability of Solicitation

AGENCY: NNSA Service Center, Department of Energy.

ACTION: Notice of availability of solicitation—Energy Density and Laser-Matter Interaction Studies.

SUMMARY: The National Nuclear Security Administration (NNSA) Service Center, Albuquerque, NM, plans to conduct a technically competitive solicitation via electronic means for

basic research experiments in laser matter interaction studies at the National Laser User's Facility (NLUF) located at the University of Rochester Laboratory for Laser Energetics (UR/LLE). Universities or other higher education institutions, private sector not-for-profit organizations, and industry are invited to submit grant applications. The total amount of funding (project cost) is expected to be $1,000,000 for each Fiscal Years 2005 and 2006. Multiple awards are anticipated within the amount of funding available.

DATES: The solicitation will be available on IIPS on or about April 12, 2004. The solicitation number for this action is DE–SC52–04NA25436.

FOR FURTHER INFORMATION CONTACT: Erwin E. Fragua, Contract Specialist, NNSA/OBS, at (505) 845–6442 or by e-mail at *efragua@doeal.gov.*

SUPPLEMENTARY INFORMATION: The solicitation document contains all the information relative to this action for prospective applicants. The solicitation is being issued electronically through the Industry Interactive Procurement System (IIPS). The complete procedures for accessing the solicitation through IIPS are located at *http://e-center.doe.gov.* The actual work to be accomplished will be determined by the light-emitting diode (LED) experiments and diagnostics techniques will be evaluated through scientific peer review against predetermined, published and available criteria. NNSA will make final selection. The unique resources of the NLUF are available to scientists for state-of-the art experiments primarily in the area of laser-matter interaction and related plasma physics. Other areas such as spectroscopy of highly ionized atoms, laboratory astrophysics, fundamental physics, material science, and biology and chemistry will be considered on a secondary basis. The LLE was established in 1970 to investigate the interaction of high power lasers with matter. Available at the LLE for NLUF researchers is the OMEGA LASER, a 30kJ UV 60 beam laser system (at 0.35 um) suitable for direct-drive ICF implosions. This system is suitable for a variety of experiments including laser-plasma interactions and atomic spectroscopy. The NLUF program for FY 2005 and FY 2006 is to concentrate on experiments that can be done with the OMEGA laser at the University of Rochester and development of diagnostic techniques suitable for the OMEGA system. Measurements of the laser coupling, laser-plasma interactions, core temperature, and core density are needed to determine the characteristics of the target implosions. Diagnostic techniques could include either new instrumentation, development of analysis tools, or development of targets that are applicable for 30 kJ implosions.

Issued in Albuquerque, New Mexico, March 16, 2004.

Martha Youngblood,

Contracting Officer, Acquisition & Financial Assistance Department, NNSA Service Center.

[FR Doc. 04–6556 Filed 3–23–04; 8:45 am]

BILLING CODE 6450–01–P

ENVIRONMENTAL PROTECTION AGENCY

[OW–2003–0064, FRL–7639–7]

National Clean Water Act Recognition Awards: Availability of Application and Nomination Information

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: This notice announces the availability of application and nomination information for the U.S. EPA's 2004 Clean Water Act Recognition Awards. The awards recognize municipalities and industries for outstanding and innovative technological achievements in wastewater treatment and pollution abatement programs. Recognition is made for exceptional and noteworthy projects or programs in the following categories: operations and maintenance (O&M) at wastewater treatment facilities; biosolids management; pretreatment programs; storm water management; and combined sewer overflow (CSO) controls. The awards are intended to educate the public about the contributions wastewater treatment facilities make to clean water; to encourage public support for municipal and industrial efforts in effective wastewater management, biosolids management, and wet weather pollution control; and, to recognize communities that use innovative practices to meet CWA permitting requirements. Applicants must be in compliance with all applicable CWA requirements, or otherwise have a satisfactory record with respect to environmental quality.

DATES: Nominations are due to EPA headquarters no later than June 18, 2004.

ADDRESSES: Applications and nomination information can be contained from the EPA regional offices and our Web site at *http://www.epa.gov/owm/intnet.htm.*

FOR FURTHER INFORMATION CONTACT: Maria E. Campbell, Telephone: (202) 564–0628. Facsimile Number: (202) 501–2346. E-mail: *campbell.maria@epa.gov.* Also visit the Office of Wastewater Management's Web page at *http://www.epa.gov/owm.*

SUPPLEMENTARY INFORMATION: The CWA Recognition Awards are authorized by section 501(a) and (e) of the Clean Water Act, and 33 U.S.C. 1361(a) and (e). Applications and nominations for the national award must be recommended by EPA regions. EPA regulations are contained at 40 CFR part 105.

Dated: March 18, 2004.

James A. Hanlon,

Director, Office of Wastewater Management.

[FR Doc. 04–6567 Filed 3–23–04; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[OPP–2004–0071; FRL–7347–8]

FIFRA Scientific Advisory Panel; Notice of Public Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: There will be a 2–day meeting of the Federal Insecticide, Fungicide, and Rodenticide Act Scientific Advisory Panel (FIFRA SAP) to consider and review a model comparison: Dietary and aggregate exposure in Calendex, CARES, and Lifeline.

DATES: The meeting will be held on April 29 and 30, 2004, from 8:30 a.m. to approximately 5 p.m., eastern time.

Comments. For the deadlines for the submission of requests to present oral comments and the submission of written comments, see Unit I.E. of the **SUPPLEMENTARY INFORMATION**.

Nominations. Nominations of scientific experts to serve as ad hoc members of the FIFRA SAP for this meeting should be provided on or before April 5, 2004.

Special seating. Requests for special seating arrangements should be made at least 5 business days prior to the meeting.

ADDRESSES: The meeting will be held at the Holiday Inn Rosslyn at Key Bridge, 1900 North Fort Myer Drive, Arlington, VA 22209. The telephone number for the Holiday Inn Rosslyn at Key Bridge is (703) 807–2000.

Comments. Written comments may be submitted electronically (preferred), through hand delivery/courier, or by mail. Follow the detailed instructions as

provided in Unit I. of the **SUPPLEMENTARY INFORMATION**.

Nominations, requests to present oral comments, and Special seating. To submit nominations for ad hoc members of the FIFRA SAP for this meeting, requests for special seating arrangements, or requests to present oral comments, notify the DFO listed under **FOR FURTHER INFORMATION CONTACT**. To ensure proper receipt by EPA, your request must identify docket ID number OPP–2004–0071 in the subject line on the first page of your response.

FOR FURTHER INFORMATION CONTACT: Myrta Christian, Designated Federal Official (DFO), Office of Science Coordination and Policy (7201M), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (202) 564–8450; fax number: (202) 564–8382; e-mail addresses: *christian.myrta@epa.gov*.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general. This action may, however, be of interest to persons who are or may be required to conduct testing of chemical substances under the Federal Food, Drug, and Cosmetic Act (FFDCA), FIFRA, and the Food Quality Protection Act of 1996 (FQPA). Since other entities may also be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the DFO listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Copies of this Document and Other Related Information?

1. *Docket*. EPA has established an official public docket for this action under docket identification (ID) number OPP–2004–0071. The official public docket consists of the documents specifically referenced in this action, any public comments received, and other information related to this action. Although a part of the official docket, the public docket does not include Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. The official public docket is the collection of materials that is available for public viewing at the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA. This docket facility is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The docket telephone number is (703) 305–5805.

2. *Electronic access*. You may access this **Federal Register** document electronically through the EPA Internet under the ''**Federal Register**'' listings at *http://www.epa.gov/fedrgstr/*.

EPA's position paper, charge/questions to FIFRA SAP, FIFRA SAP composition (i.e., members and consultants for this meeting), and the meeting agenda will be available as soon as possible, but no later than early April 2004. In addition, the Agency may provide additional background documents as the materials become available. You may obtain electronic copies of these documents, and certain other related documents that might be available electronically, from the FIFRA SAP Internet Home Page at *http://www.epa.gov/scipoly/sap*.

An electronic version of the public docket is available through EPA's electronic public docket and comment system, EPA Dockets. You may use EPA Dockets at *http://www.epa.gov/edocket/* to submit or view public comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Once in the system, select ''search,'' then key in the appropriate docket ID number.

Certain types of information will not be placed in EPA Dockets. Information claimed as CBI and other information whose disclosure is restricted by statute, which is not included in the official public docket, will not be available for public viewing in EPA's electronic public docket. EPA's policy is that copyrighted material will not be placed in EPA's electronic public docket but will be available only in printed, paper form in the official public docket. To the extent feasible, publicly available docket materials will be made available in EPA's electronic public docket. When a document is selected from the index list in EPA Dockets, the system will identify whether the document is available for viewing in EPA's electronic public docket. Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the docket facility identified in Unit I.B.1. EPA intends to work towards providing electronic access to all of the publicly available docket materials through EPA's electronic public docket.

For public commenters, it is important to note that EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing in EPA's electronic public docket as EPA receives them and without change, unless the comment contains copyrighted material, CBI, or other information whose disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in EPA's electronic public docket. The entire printed comment, including the copyrighted material, will be available in the public docket.

Public comments submitted on computer disks that are mailed or delivered to the docket will be transferred to EPA's electronic public docket. Public comments in hard copy that are mailed or delivered to the docket will be scanned and placed in EPA's electronic public docket. Where practical, physical objects will be photographed, and the photograph will be placed in EPA's electronic public docket along with a brief description written by the docket staff.

C. How and to Whom Do I Submit Comments?

You may submit comments electronically (preferred), through hand delivery/courier, or by mail. To ensure proper receipt by EPA, identify the appropriate docket ID number in the subject line on the first page of your comment. Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked ''late.'' EPA is not required to consider these late comments. Do not use EPA Dockets or e-mail to submit CBI or information protected by statute.

1. *Electronically*. If you submit an electronic comment as prescribed in this unit, EPA recommends that you include your name, mailing address, and an e-mail address or other contact information in the body of your comment. Also include this contact information on the outside of any disk or CD ROM you submit, and in any cover letter accompanying the disk or CD ROM. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. EPA's policy is that EPA will not edit your comment, and any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket, and made available in EPA's electronic

public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

i. *EPA Dockets*. Your use of EPA's electronic public docket to submit comments to EPA electronically is EPA's preferred method for receiving comments. Go directly to EPA Dockets at *http://www.epa.gov/edocket/*, and follow the online instructions for submitting comments. Once in the system, select ''search,'' and then key in docket ID number OPP–2004–0071. The system is an ''anonymous access'' system, which means EPA will not know your identity, e-mail address, or other contact information unless you provide it in the body of your comment.

ii. *E-mail*. Comments may be sent by e-mail to *opp-docket@epa.gov*, Attention: Docket ID number OPP–2004–0071. In contrast to EPA's electronic public docket, EPA's e-mail system is not an ''anonymous access'' system. If you send an e-mail comment directly to the docket without going through EPA's electronic public docket, EPA's e-mail system automatically captures your e-mail address. E-mail addresses that are automatically captured by EPA's e-mail system are included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket.

iii. *Disk or CD ROM*. You may submit comments on a disk or CD ROM that you deliver as described in Unit I.C.2 or mail to the address provided in Unit I.C.3. These electronic submissions will be accepted in WordPerfect or ASCII file format. Avoid the use of special characters and any form of encryption.

2. *By hand delivery or courier*. Deliver your comments to: Public Information and Records Integrity Branch (PIRIB), Office of Pesticide Programs (OPP), Environmental Protection Agency, Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA, Attention: Docket ID number OPP–2004–0071. Such deliveries are only accepted during the docket's normal hours of operation as identified in Unit I.B.1.

3. *By mail*. Due to potential delays in EPA's receipt and processing of mail, respondents are strongly encouraged to submit comments either electronically or by hand delivery or courier. We cannot guarantee that comments sent via mail will be received prior to the close of the comment period. If mailed, please send your comments to: Public Information and Records Integrity Branch (PIRIB) (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001, Attention: Docket ID number OPP–2004–0071.

D. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.

2. Describe any assumptions that you used.

3. Provide copies of any technical information and/or data you used that support your views.

4. Provide specific examples to illustrate your concerns.

5. Make sure to submit your comments by the deadline in this document.

6. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

E. How May I Participate in this Meeting?

You may participate in this meeting by following the instructions in this unit. To ensure proper receipt by EPA, it is imperative that you identify docket ID number OPP–2004–0071 in the subject line on the first page of your request.

1. *Oral comments*. Oral comments presented at the meetings should not be repetitive of previously submitted oral or written comments. Although requests to present oral comments are accepted until the date of the meeting (unless otherwise stated), to the extent that time permits, interested persons may be permitted by the Chair of FIFRA SAP to present oral comments at the meeting. Each individual or group wishing to make brief oral comments to FIFRA SAP is strongly advised to submit their request to the DFO listed under **FOR FURTHER INFORMATION CONTACT** no later than noon, eastern time, April 22, 2004, in order to be included on the meeting agenda. The request should identify the name of the individual making the presentation, the organization (if any) the individual will represent, and any requirements for audiovisual equipment (e.g., overhead projector, 35 mm projector, and chalkboard). Oral comments before FIFRA SAP are limited to approximately 5 minutes unless prior arrangements have been made. In addition, each speaker should bring 30 copies of his or her comments and presentation slides for distribution to FIFRA SAP at the meeting.

2. *Written comments*. Although written comments are accepted until the date of the meeting (unless otherwise stated), the Agency encourages that written comments be submitted, using the instructions in Unit I., no later than noon, eastern time, April 15, 2004, to provide FIFRA SAP the time necessary to consider and review the written comments. There is no limit on the extent of written comments for consideration by FIFRA SAP. Persons wishing to submit written comments at the meeting should contact the DFO listed under **FOR FURTHER INFORMATION CONTACT** and submit 30 copies.

3. *Seating at the meeting*. Seating at the meeting will be on a first-come basis. Individuals requiring special accommodations at this meeting, including wheelchair access, should contact the DFO at least 5 business days prior to the meeting using the information under **FOR FURTHER INFORMATION CONTACT** so that appropriate arrangements can be made.

4. *Request for nominations to serve as ad hoc members of the FIFRA SAP for this meeting*. The FIFRA SAP staff routinely solicit the stakeholder community for nominations to serve as ad hoc members of the FIFRA SAP for each meeting. Any interested person or organization may nominate qualified individuals to serve on the FIFRA SAP for a specific meeting. No interested person shall be ineligible to serve by reason of their membership on any other advisory committee to a Federal department or Agency or their employment by a Federal department or Agency (except the EPA). Individuals nominated should have expertise in one or more of the following areas: Dietary exposure assessment, aggregate exposure models, and uncertainty analysis. Nominees should be scientists who have sufficient professional qualifications, including training and experience, to be capable of providing expert comments on the issues for this meeting. Nominees should be identified by name, occupation, position, address, and telephone number. Nominations should be provided to the DFO listed under **FOR FURTHER INFORMATION CONTACT** on or before April 5, 2004.

The criteria for selecting scientists to serve on the FIFRA SAP are that these persons be recognized scientists—experts in their fields; that they be as impartial and objective as possible; that they represent an array of backgrounds and perspectives (within their disciplines); have no financial conflict of interest; have not previously been involved with the scientific peer review of the issue(s) presented; and that they be available to participate fully in the

review, which will be conducted over a relatively short-time frame. Nominees will be asked to attend the public meetings and to participate in the discussion of key issues and assumptions at these meetings. Finally, they will be asked to review and to help finalize the meeting minutes.

If a FIFRA SAP nominee is considered to assist in a review by the FIFRA SAP for a particular session, the nominee is subject to the provisions of 5 CFR part 2634, Executive Branch Financial Disclosure, as supplemented by EPA in 5 CFR part 6401. As such, the FIFRA SAP nominee is required to submit a Confidential Financial Disclosure Form for Special Government Employees Serving on Federal Advisory Committees at the U.S. Environmental Protection Agency (EPA Form 3110–48 5–02) which shall fully disclose, among other financial interests, the nominee's employment, stocks, and bonds, and where applicable, sources of research support. EPA will evaluate the nominee's financial disclosure form to assess that there are no formal conflicts of interest before the nominee is considered to serve on the FIFRA SAP. Selected FIFRA SAP members will be hired as a Special Government Employee. The Agency will review all nominations. FIFRA SAP members participating at this meeting will be posted on the FIFRA SAP web site or may be obtained by contacting the PIRIB at the address or telephone number listed in Unit I.

II. Background

Purpose of the FIFRA SAP

Amendments to FIFRA enacted November 28, 1975 (7 U.S.C. 136w(d)), include a requirement under section 25(d) of FIFRA that notices of intent to cancel or reclassify pesticide regulations pursuant to section 6(b)(2) of FIFRA, as well as proposed and final forms of rulemaking pursuant to section 25(a) of FIFRA, be submitted to a SAP prior to being made public or issued to a registrant. In accordance with section 25(d) of FIFRA, the FIFRA SAP is to have an opportunity to comment on the health and environmental impact of such actions. The FIFRA SAP also shall make comments, evaluations, and recommendations for operating guidelines to improve the effectiveness and quality of analyses made by Agency scientists. Members are scientists who have sufficient professional qualifications, including training and experience, to be capable of providing expert comments as to the impact on health and the environment of regulatory actions under sections 6(b) and 25(a) of FIFRA. The Deputy Administrator appoints seven individuals to serve on the FIFRA SAP for staggered terms of 4 years, based on recommendations from the National Institutes of Health and the National Science Foundation.

Section 104 of FQPA (Public Law 104–170) established the FQPA Science Review Board (SRB). These scientists shall be available to the FIFRA SAP on an ad hoc basis to assist in reviews conducted by the FIFRA SAP.

B. Public Meeting

The FIFRA SAP will meet to consider and review a model comparison: Dietary and aggregate exposure in Calendex, CARES, and Lifeline. A major requirement of the FQPA is that exposures to pesticides across various pathways and routes (e.g., oral exposure through food and water, dermal exposure through turf uses) be appropriately combined such that an ''aggregate'' exposure assessment can be performed. Over the last several years, OPP has sponsored several presentations to the FIFRA Scientific Advisory Panel of three major pesticide exposure models which have this aggregation capability: Dietary Exposure Evaluation Model (DEEM)/Calendex, CARES, and Lifeline. These models all permit a time-based integration of both residential and dietary (food and water) exposures to pesticides. This is performed probabilistically such that aggregation (or combining) of residues across multiple routes is accounted for in an appropriate and realistic manner.

Past SAP sessions have involved presentations of these three models on separate occasions and resulted in valuable feedback and suggestions. The models have been significantly upgraded and improved, in part, as a result of these SAP comments. The purpose of this 2–day session is to present the three models jointly and compare exposure estimates and results generated by each of the three models using a common dataset for a hypothetical chemical. Pathways which will be considered are ingestion through food, ingestion through water, and dermal exposure through lawn treatments. In contrast to previous SAPs where the model developers were invited to make their presentations to the SAP, this SAP presentation will demonstrate the results of EPA's own model runs. A comparison/contrast regarding the methods by which the models consider and use the data will be considered. Resulting model outputs will be presented and discussed. The main focus of the presentation will be comparison of dietary exposures (food + water) as estimated by each of the three models, but a comparison of exposure through all three exposure routes considered jointly (food, water, and residential lawn use) in an an aggregate assessment will also be presented.

C. FIFRA SAP Meeting Minutes

The FIFRA SAP will prepare meeting minutes summarizing its recommendations to the Agency in approximately 60 days after the meeting. The meeting minutes will be posted on the FIFRA SAP web site or may be obtained by contacting the PIRIB at the address or telephone number listed in Unit I.

List of Subjects

Environmental protection, Pesticides and pests.

Dated: March 17, 2004.

Joseph J. Merenda Jr.,

Director, Office of Science Coordination and Policy.

BILLING CODE 6560–50–S

ENVIRONMENTAL PROTECTION AGENCY

[FRL–7639–6]

Science Advisory Board Staff Office; Notification of Upcoming Science Advisory Board Meetings

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The EPA Science Advisory Board (SAB) Staff Office announces two public teleconference call meetings and one public face-to-face meeting of the SAB's Drinking Water Committee (DWC). The DWC will review the Agency's Drinking Water Research Program Multi-Year Plan.

The SAB Staff Office also announces a public workshop of the SAB Committee on Valuing the Protection of Ecological Systems and Services. The workshop will focus on different approaches and methods for valuing the protection of ecological systems and services.

DATES: April 5, 2004. A public teleconference call meeting of the Drinking Water Committee (DWC) will be held from 1 p.m. to 3 p.m. (eastern time). The purpose of this call is to provide the DWC with an overview of the EPA Drinking Water Research Program Multi-Year Plan and its regulatory context (focus is on EPA Long-Term Goal #1—Research on Regulated Contaminants)

April 8, 2004. A public teleconference call meeting of the Drinking Water Committee (DWC) will be held from 1 p.m. to 3 p.m. (eastern time). The purpose of this call is to continue the overview of the EPA Drinking Water Research Program Multi-Year Plan and its regulatory context (focus is on Long-Term Goal #2—Research on Unregulated Contaminants and Innovative Approaches; and Long-Term Goal #3—Research on Distribution Systems and Source Water Protection).

April 13–14, 2004. A public workshop of the SAB Committee on Valuing the Protection of Ecological Systems and Services will be held from 9 a.m. to 5:30 p.m (eastern time) on April 13, 2004, and from 8:30 a.m. to 4 p.m. (eastern time) on April 14, 2004.

May 24–25, 2004. A public meeting of the Drinking Water Committee (DWC) to Review the EPA Drinking Water Research Program Multi-Year Plan. The meeting will begin at 8:30 a.m. and end no later than 5 p.m. (eastern time) each day.

ADDRESSES: Participation in the DWC teleconference meetings will be by teleconference only—a meeting room will not be used. The May 24–25, 2004 meeting of the DWC will be held in the Auditorium (Room C111C), U.S. EPA, Main Campus, 109 T.W. Alexander Drive, Research Triangle Park, NC 27709. The April 13–14, 2004 workshop of the Committee on Valuing the Protection of Ecological Systems and Services will be held at the Four Points Sheraton, 1201 K Street NW., Washington, DC 20005.

FOR FURTHER INFORMATION CONTACT: Members of the public who wish to obtain the call-in number and access code to participate in the DWC teleconference meetings may contact the EPA Science Advisory Board Staff at (202) 343–9999 by Friday, April 2, 2004, before the conference calls. Any member of the public wishing further information regarding the SAB or the DWC may contact Mr. A. Robert Flaak, Designated Federal Officer (DFO), U.S. EPA Science Advisory Board via phone (202–343–9988) or e-mail at *flaak.robert@epa.gov*, or Dr. Anthony Maciorowski, Associate Director for Science, U.S. EPA Science Advisory Board via phone (202–343–9983) or e-mail at *maciorowski.anthony@epa.gov*.

For information regarding the SAB Committee on Valuing the Protection of Ecological Systems and Services please contact Dr. Angela Nugent, DFO for the Committee. Dr. Nugent can be contacted via phone (202–343–9981) or e-mail: *nugent.angela@epa.gov*.

The SAB Mailing address is: U.S. EPA, Science Advisory Board (1400F), 1200 Pennsylvania Avenue, NW., Washington, DC 20460. General information about the SAB, as well as any updates concerning the meetings announced in this notice, may be found in the SAB Web site at *http://www.epa.gov/sab*.

SUPPLEMENTARY INFORMATION:

Background on the Drinking Water Committee Review: The Safe Drinking Water Act Amendments of 1996 direct EPA to conduct research to strengthen the scientific foundation for standards that limit public exposure to drinking water contaminants. The amendments contain specific requirements for research on waterborne pathogens, such as Cryptosporidium and Norwalk virus; disinfection byproducts; arsenic; and other harmful substances in drinking water. EPA is also directed to conduct studies to identify and characterize population groups, such as children, that may be at greater risk from exposure to contaminants in drinking water than is the general population.

EPA's multi-year plan for drinking water research establishes three long-term goals. Within the scope of this MYP, EPA will: (a) By 2010, develop scientifically sound data and approaches to assess and manage risks to human health posed by exposure to specific regulated waterborne pathogens and chemicals, including those addressed by the Arsenic Microbial/Disinfectant By-Product (M/DBP) Rules and Six-Year Review Rules. (b) By 2010, develop new data, innovative tools and improved technologies to support decision-making by the Office of Water on the Contaminant Candidate List and other regulatory issues, and implementation of rules by States, local authorities and water utilities. (c) By 2009, provide data, tools and technologies to support management decisions by EPA's Office of Water, State, local authorities and utilities to protect source water and the quality of water in the distribution system.

The DWC received an initial briefing on the DW–MYP at a meeting on December 10, 2003 which was announced in 68 FR 66095, published on November 25, 2003. The meeting agendas and charge to the DWC for this review will be posted on the SAB Web site (*http://www.epa.gov/sab*) prior to the meetings.

Availability of Review Material for the DWC Meetings: There is only one document that is the subject of the SAB review: EPA's Office of Research and Development's (ORD) Drinking Water Research Program Multi-Year Plan. This document is available electronically at the following URL address: *http://www.epa.gov/osp/myp.htm#dw*. For information and any questions pertaining to the review document, please contact Dr. Fred Hauchman, EPA–ORD, via telephone: (919) 541–3893; fax: 919–685–3247; or e-mail: *hauchman.fred@epa.gov*

Background on the SAB Committee on Valuing the Protection of Ecological Systems and Services: Background on the Committee and its charge was provided in 68 FR 11082, published on March 7, 2003. The purpose of the April 13–14, 2004 Workshop is for the Committee to discuss the desired characteristics and desired outcomes of knowledge, methodologies, practice, and research for valuing the protection of ecological systems and services. The Committee will hear presentations from several of its members and from scientists within and outside of the Agency on examples that illustrate the use of different major science-based approaches. The Committee will also discuss suggestions for its next steps in addressing its overall charge to assess Agency needs and the state of the art and science of valuing protection of ecological systems and services, and then to identify key areas for improving knowledge, methodologies, practice, and research. An agenda for the workshop will be posted on the SAB Web site (*http://www.epa.gov/sab*) prior to the meeting.

Procedures for Providing Public Comment: It is the policy of the EPA Science Advisory Board (SAB) Staff Office to accept written public comments of any length, and to accommodate oral public comments whenever possible. The EPA SAB Staff Office expects that public statements presented at the DWC meetings will not be repetitive of previously submitted oral or written statements. *Oral Comments:* In general, each individual or group requesting an oral presentation at a face-to-face meeting will be limited to a total time of ten minutes (unless otherwise indicated). For conference call meetings, opportunities for oral comment will usually be limited to no more than three minutes per speaker and no more than fifteen minutes total. Interested parties should contact the Designated Federal Official (DFO) in writing via e-mail at least one week prior to the meeting in order to be placed on the public speaker list for the meeting. Speakers should bring at least 35 copies of their comments and presentation slides for distribution to the participants and public at the meeting. *Written Comments:* Although written comments are accepted until the

date of the meeting (unless otherwise stated), written comments should be received in the SAB Staff Office at least one week prior to the meeting date so that the comments may be made available to the committee for their consideration. Comments should be supplied to the appropriate DFO at the address/contact information above in the following formats: one hard copy with original signature, and one electronic copy via e-mail (acceptable file format: Adobe Acrobat, WordPerfect, Word, or Rich Text files (in IBM–PC/Windows 95/98 format). Those providing written comments and who attend the meeting are also asked to bring 35 copies of their comments for public distribution.

Meeting Accommodations: Individuals requiring special accommodation to access these meetings, should contact the relevant DFO at least five business days prior to the meeting so that appropriate arrangements can be made.

Dated: March 18, 2004.

Vanessa T. Vu,

Director, EPA Science Advisory Board Staff Office.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[OPP–2004–0032; FRL–7348–9]

Formetanate Hydrochloride; Availability of Risk Assessment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the availability of documents that were developed as part of EPA's process for making pesticide reregistration eligibility decisions and tolerance reassessments consistent with the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended by the Food Quality Protection Act of 1996 (FQPA). These documents are the preliminary human health and environmental fate and effects risk assessments and related documents for formetanate hydrochloride. This notice also starts a 60–day public comment period for the risk assessment. Comments are to be limited to issues directly associated with the formetanate hydrochloride risk assessments or other documents placed in the docket. By allowing access and opportunity for comment on the risk assessments, EPA is seeking to strengthen stakeholder involvement and help ensure that our decisions under FQPA are transparent and based on the best available information. The tolerance reassessment process will ensure that the United States continues to have the safest and most abundant food supply. The Agency cautions that the risk assessments for formetanate hydrocloride are preliminary and that further refinements may be appropriate. Risk assessments reflect only the work and analysis conducted as of the time they were produced and it is appropriate that, as new information becomes available and/or additional analyses are performed, the conclusions they contain may change.

DATES: Comments, identified by the docket ID number OPP–2004–0032, must be received on or before May 24, 2004.

ADDRESSES: Comments may be submitted electronically, by mail, or through hand delivery/courier. Follow the detailed instructions as provided in Unit I. of the **SUPPLEMENTARY INFORMATION.**

FOR FURTHER INFORMATION CONTACT: Demson Fuller, Special Review and Reregistration Division (7208C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: (703) 308–8062; *e-mail address: fuller.demson@epa.gov.*

SUPPLEMENTARY INFORMATION

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general. This action may, however, be of interest to a wide range of stakeholders including environmental, human health, and agricultural advocates, pesticide users, and the public interested in the use of pesticides. Since other entities may also be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Copies of this Document and Other Related Information?

1. *Docket.* EPA has established an official public docket for this action under docket identification (ID) number OPP–2004–0032. The official public docket consists of the documents specifically referenced in this action, any public comments received, and other information related to this action. Although a part of the official docket, the public docket does not include Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. The official public docket is the collection of materials that is available for public viewing at the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA. This docket facility is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The docket telephone number is (703) 305–5805.

2. *Electronic access.* You may access this **Federal Register** document electronically through the EPA Internet under the ''**Federal Register**'' listings at *http://www.epa.gov/fedrgstr/.*

An electronic version of the public docket is available through EPA's electronic public docket and comment system, EPA Dockets. You may use EPA Dockets at *http://www.epa.gov/edocket/* to submit or view public comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Once in the system, select ''search,'' then key in the appropriate docket ID number.

Certain types of information will not be placed in the EPA Dockets. Information claimed as CBI and other information whose disclosure is restricted by statute, which is not included in the official public docket, will not be available for public viewing in EPA's electronic public docket. EPA's policy is that copyrighted material will not be placed in EPA's electronic public docket but will be available only in printed, paper form in the official public docket. To the extent feasible, publicly available docket materials will be made available in EPA's electronic public docket. When a document is selected from the index list in EPA Dockets, the system will identify whether the document is available for viewing in EPA's electronic public docket. Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the docket facility identified in Unit I.B.1. EPA intends to work towards providing electronic access to all of the publicly available docket materials through EPA's electronic public docket.

For public commenters, it is important to note that EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing in EPA's electronic public

docket as EPA receives them and without change, unless the comment contains copyrighted material, CBI, or other information whose disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in EPA's electronic public docket. The entire printed comment, including the copyrighted material, will be available in the public docket.

Public comments submitted on computer disks that are mailed or delivered to the docket will be transferred to EPA's electronic public docket. Public comments that are mailed or delivered to the Docket will be scanned and placed in EPA's electronic public docket. Where practical, physical objects will be photographed, and the photograph will be placed in EPA's electronic public docket along with a brief description written by the docket staff.

C. How and to Whom Do I Submit Comments?

You may submit comments electronically, by mail, or through hand delivery/courier. To ensure proper receipt by EPA, identify the appropriate docket ID number in the subject line on the first page of your comment. Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked ''late.'' EPA is not required to consider these late comments. If you wish to submit CBI or information that is otherwise protected by statute, please follow the instructions in Unit I.D. Do not use EPA Dockets or e-mail to submit CBI or information protected by statute.

1. *Electronically.* If you submit an electronic comment as prescribed in this unit, EPA recommends that you include your name, mailing address, and an e-mail address or other contact information in the body of your comment. Also include this contact information on the outside of any disk or CD ROM you submit, and in any cover letter accompanying the disk or CD ROM. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. EPA's policy is that EPA will not edit your comment, and any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

i. *EPA Dockets.* Your use of EPA's electronic public docket to submit comments to EPA electronically is EPA's preferred method for receiving comments. Go directly to EPA Dockets at *http://www.epa.gov/edocket/*, and follow the online instructions for submitting comments. Once in the system, select ''search,'' and then key in docket ID number OPP–2004–0032. The system is an ''anonymous access'' system, which means EPA will not know your identity, e-mail address, or other contact information unless you provide it in the body of your comment.

ii. *E-mail.* Comments may be sent by e-mail to *opp-docket@epa.gov*, Attention: Docket ID number OPP–2004–0032. In contrast to EPA's electronic public docket, EPA's e-mail system is not an ''anonymous access'' system. If you send an e-mail comment directly to the docket without going through EPA's electronic public docket, EPA's e-mail system automatically captures your e-mail address. E-mail addresses that are automatically captured by EPA's e-mail system are included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket.

iii. *Disk or CD ROM.* You may submit comments on a disk or CD ROM that you mail to the mailing address identified in Unit I.C.2. These electronic submissions will be accepted in WordPerfect or ASCII file format. Avoid the use of special characters and any form of encryption.

2. *By mail.* Send your comments to: Public Information and Records Integrity Branch (PIRIB) (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001, Attention: Docket ID number OPP–2004–0032.

3. *By hand delivery or courier.* Deliver your comments to: Public Information and Records Integrity Branch (PIRIB), Office of Pesticide Programs (OPP), Environmental Protection Agency, Rm. 119, Crystal Mall#2, 1921 Jefferson Davis Hwy., Arlington, VA, Attention: Docket ID number OPP–2004–0032. Such deliveries are only accepted during the docket's normal hours of operation as identified in Unit I.B.1.

D. How Should I Submit CBI to the Agency?

Do not submit information that you consider to be CBI electronically through EPA's electronic public docket or by e-mail. You may claim information that you submit to EPA as CBI by marking any part or all of that information as CBI (if you submit CBI on disk or CD ROM, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket and EPA's electronic public docket. If you submit the copy that does not contain CBI on disk or CD ROM, mark the outside of the disk or CD ROM clearly that it does not contain CBI. Information not marked as CBI will be included in the public docket and EPA's electronic public docket without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

E. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.

2. Describe any assumptions that you used.

3. Provide copies of any technical information and/or data you used that support your views.

4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.

5. Provide specific examples to illustrate your concerns.

6. Offer alternative ways to improve the notice.

7. Make sure to submit your comments by the deadline in this document.

8. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

II. What Action is the Agency Taking?

EPA is making available risk assessments that have been developed as part of the Agency's public participation process for making reregistration eligibility and tolerance reassessment decisions for the organophosphate and other pesticides consistent with FFDCA, as amended by

FQPA. The Agency's human health and environmental fate and effects risk assessments and other related documents for formetanate hydrochloride are available in the individual pesticide docket. As additional comments, reviews, and risk assessment modifications become available, these will also be docketed for formetanate hydrochloride.

The Agency cautions that the formetanate hydrochloride risk assessments are preliminary and that further refinements may be appropriate. Risk assessment documents reflect only the work and analysis conducted as of the time they were produced and it is appropriate that, as new information becomes available and/or additional analyses are performed, the conclusions they contain may change.

EPA is providing an opportunity, through this notice, for interested parties to provide written comments and input to the Agency on the risk assessments for the pesticide specified in this notice. Such comments and input could address, for example, the availability of additional data to further refine the risk assessments, such as percent crop treated information or submission of residue data from food processing studies, or could address the Agency's risk assessment methodologies and assumptions as applied to this specific chemical. Comments should be limited to issues raised within the risk assessment and associated documents. EPA will provide other opportunities for public comment on other science issues associated with the pesticide tolerance reassessment program. Failure to comment on any such issues as part of this opportunity will in no way prejudice or limit a commenter's opportunity to participate fully in later notice and comment processes. All comments should be submitted by May 24, 2004 using the methods in Unit I. of the **SUPPLEMENTARY INFORMATION**. Comments will become part of the Agency record for formetanate hydrochloride.

List of Subjects

Environmental protection, Chemicals, Pesticides and pests.

Dated: March 9, 2004.

Debra Edwards

Director, Special Review and Reregistration Division, Office of Pesticide Programs.

ENVIRONMENTAL PROTECTION AGENCY

[OPP–2004–0045; FRL–7347–2]

Fenpropathrin; Notice of Filing a Pesticide Petition to Establish a Tolerance for a Certain Pesticide Chemical in or on Food

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the initial filing of pesticide petitions proposing the establishment of regulations for residues of a certain pesticide chemical in or on various food commodities.

DATES: Comments, identified by docket ID number OPP–2004–0045, must be received on or before April 23, 2004.

ADDRESSES: Comments may be submitted electronically, by mail, or through hand delivery/courier. Follow the detailed instructions as provided in Unit I. of the **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Shaja R. Brothers, Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: (703) 308–3194; e-mail address: *brothers.shaja@epa.gov*.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected entities may include, but are not limited to:

- Crop production (NAICS 111)
- Animal production (NAICS 112)
- Food manufacturing (NAICS 311)
- Pesticide manufacturing (NAICS)

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Copies of this Document and Other Related Information?

1. *EPA Docket*. EPA has established an official public docket for this action under docket ID number OPP–2004–0045. The official public docket consists of the documents specifically referenced in this action, any public comments received, and other information related to this action. Although, a part of the official docket, the public docket does not include Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. The official public docket is the collection of materials that is available for public viewing at the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA. This docket facility is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The docket telephone number is (703) 305–5805.

2. *Electronic access*. You may access this **Federal Register** document electronically through the EPA Internet under the ''**Federal Register**'' listings at *http://www.epa.gov/fedrgstr/*.

An electronic version of the public docket is available through EPA's electronic public docket and comment system, EPA Dockets. You may use EPA Dockets at *http://www.epa.gov/edocket/* to submit or view public comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Although, not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the docket facility identified in Unit I.B.1. Once in the system, select ''search,'' then key in the appropriate docket ID number.

Certain types of information will not be placed in the EPA Dockets. Information claimed as CBI and other information whose disclosure is restricted by statute, which is not included in the official public docket, will not be available for public viewing in EPA's electronic public docket. EPA's policy is that copyrighted material will not be placed in EPA's electronic public docket but will be available only in printed, paper form in the official public docket. To the extent feasible, publicly available docket materials will be made available in EPA's electronic public docket. When a document is selected from the index list in EPA Dockets, the system will identify whether the document is available for viewing in EPA's electronic public docket.

Although, not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the docket facility identified in Unit I.B. EPA intends to work towards providing electronic access to all of the publicly available docket materials through EPA's electronic public docket.

For public commenters, it is important to note that EPA's policy is that public comments, whether submitted electronically or on paper, will be made available for public viewing in EPA's electronic public docket as EPA receives them and without change, unless the comment contains copyrighted material, CBI, or other information whose disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in EPA's electronic public docket. The entire printed comment, including the copyrighted material, will be available in the public docket.

Public comments submitted on computer disks that are mailed or delivered to the docket will be transferred to EPA's electronic public docket. Public comments that are mailed or delivered to the docket will be scanned and placed in EPA's electronic public docket. Where practical, physical objects will be photographed, and the photograph will be placed in EPA's electronic public docket along with a brief description written by the docket staff.

C. How and to Whom Do I Submit Comments?

You may submit comments electronically, by mail, or through hand delivery/courier. To ensure proper receipt by EPA, identify the appropriate docket ID number in the subject line on the first page of your comment. Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked ''late.'' EPA is not required to consider these late comments. If you wish to submit CBI or information that is otherwise protected by statute, please follow the instructions in Unit I.D. Do not use EPA Dockets or e-mail to submit CBI or information protected by statute.

1. *Electronically*. If you submit an electronic comment as prescribed in this unit, EPA recommends that you include your name, mailing address, and an e-mail address or other contact information in the body of your comment. Also, include this contact information on the outside of any disk or CD ROM you submit, and in any cover letter accompanying the disk or CD ROM. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. EPA's policy is that EPA will not edit your comment, and any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

i. *EPA Dockets*. Your use of EPA's electronic public docket to submit comments to EPA electronically is EPA's preferred method for receiving comments. Go directly to EPA Dockets at *http://www.epa.gov/edocket/*, and follow the online instructions for submitting comments. Once in the system, select ''search,'' and then key in docket ID number OPP–2004–0045. The system is an ''anonymous access'' system, which means EPA will not know your identity, e-mail address, or other contact information unless you provide it in the body of your comment.

ii. *E-mail*. Comments may be sent by e-mail to opp-docket@epa.gov, Attention: Docket ID number OPP–2004–0045. In contrast to EPA's electronic public docket, EPA's e-mail system is not an ''anonymous access'' system. If you send an e-mail comment directly to the docket without going through EPA's electronic public docket, EPA's e-mail system automatically captures your e-mail address. E-mail addresses that are automatically captured by EPA's e-mail system are included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket.

iii. *Disk or CD ROM*. You may submit comments on a disk or CD ROM that you mail to the mailing address identified in Unit I.C.2. These electronic submissions will be accepted in WordPerfect or ASCII file format. Avoid the use of special characters and any form of encryption.

2. *By mail*. Send your comments to: Public Information and Records Integrity Branch (PIRIB) (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001, Attention: Docket ID number OPP–2004–0045.

3. *By hand delivery or courier*. Deliver your comments to: Public Information and Records Integrity Branch (PIRIB), Office of Pesticide Programs (OPP), Environmental Protection Agency, Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA, Attention: Docket ID number OPP–2004–0045. Such deliveries are only accepted during the docket's normal hours of operation as identified in Unit I.B.1.

D. How Should I Submit CBI to the Agency?

Do not submit information that you consider to be CBI electronically through EPA's electronic public docket or by e-mail. You may claim information that you submit to EPA as CBI by marking any part or all of that information as CBI (if you submit CBI on disk or CD ROM, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket and EPA's electronic public docket. If you submit the copy that does not contain CBI on disk or CD ROM, mark the outside of the disk or CD ROM clearly that it does not contain CBI. Information not marked as CBI will be included in the public docket and EPA's electronic public docket without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

E. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.

2. Describe any assumptions that you used.

3. Provide copies of any technical information and/or data you used that support your views.

4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.

5. Provide specific examples to illustrate your concerns.

6. Make sure to submit your comments by the deadline in this notice.

7. To ensure proper receipt by EPA, be sure to identify the docket ID number

assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

II. What Action is the Agency Taking?

EPA has received a pesticide petition as follows proposing the establishment and/or amendment of regulations for residues of a certain pesticide chemical in or on various food commodities under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a. EPA has determined that this petition contains data or information regarding the elements set forth in FFDCA section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the petition. Additional data may be needed before EPA rules on the petition.

List of Subjects

Environmental protection, Agricultural commodities, Feed additives, Food additives, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: March 15, 2004.

Lois Rossi,

Director, Registration Division, Office of Pesticide Programs.

Summary of Petitions

The petitioner's summary of the pesticide petitions is printed below as required by FFDCA section 408(d)(3). The summary of the petitions was prepared by Interregional Research Project Number 4 (IR-4) and represents the view of the petitioner. The petition summary announces the availability of a description of the analytical methods available to EPA for the detection and measurement of the pesticide chemical residues or an explanation of why no such method is needed.

Interregional Research Project Number 4 (IR-4)

PP 1E6261, PP 1E6331, PP 1E6336, and PP 3E6588

EPA has received pesticide petitions (PP 1E6261, PP 1E6331, PP 1E6336, and PP 3E6588) from IR-4, 681 U.S. Highway #1 South, North Brunswick, NJ 08902–3390 proposing, pursuant to section 408(d) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(d), to amend 40 CFR 180.466, by establishing tolerances for residues of the insecticide fenpropathrin, alpha-cyano-3-phenoxybenzyl 2,2,3,3-tetramethylcyclopropanecarboxylate in or on the following raw agricultural commodities: Currant 3.0 parts per million (ppm) (PP 1E6261), vegetables, fruiting, group 08, except tomato at 1.0 ppm (PP 1E6331) pea, succulent at 0.02 ppm (PP 1E6336), and bushberry subgroup 13B, lingonberry, juneberry, and salal at 3.0 ppm (PP 3E6588). EPA has determined that the petitions contain data or information regarding the elements set forth in section 408(d)(2) of the FFDCA; however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the petitions. Additional data may be needed before EPA rules on the petitions. This notice includes a summary of the petitions prepared by Valent U.S.A. Corporation, P.O. Box 8025, Walnut Creek, CA 94596–8025.

A. Residue Chemistry

1. *Plant metabolism*. The plant metabolism of fenpropathrin has been studied in five different crop plant species: Cotton, apple, tomato, cabbage, and bean. Each of the studies involved foliar treatment of the plants under either greenhouse or field conditions. In all studies the total toxic residue is best defined as parent, fenpropathrin. The primary metabolic pathway for fenpropathrin in plants is similar to that in mammals. There are no qualitatively unique plant metabolites.

2. *Analytical method*. Adequate analytical methodology is available to detect and quantify fenpropathrin at residue levels in numerous matrices. The methods use solvent extraction and partition and/or column chromatography clean-up steps, followed by separation and quantitation using capillary gas liquid chromatography (GLC) with FID. The extraction efficiency has been validated using radiocarbon samples from the plant and animal metabolism studies. The enforcement methods have been validated at independent laboratories and by EPA. The limit of quantification (LOQ) for fenpropathrin in raw agricultural commodity samples is usually 0.01 ppm.

3. *Magnitude of residues*. Residue data has been submitted for vegetables, fruiting, group 08, except tomato; pea, succulent; bushberry subgroup 13B; lingonberry; juneberry; and salal. The requested tolerances are adequately supported.

B. Toxicological Profile

An assessment of the toxic effects caused by fenpropathrin is discussed in Unit III.A. and Unit III.B. of the **Federal Register** dated December 3, 1999 (64 FR 67905) (FRL–6392–6).

1. *Animal metabolism*. Four metabolites were found in the urine of rats dosed with alcohol labeled fenpropathrin. The major metabolites were the sulfate conjugate of 3-(4'-hydroxyphenoxy)benzoic acid and 3-phenoxybenzoic acid (22–44% and 3–9% of the administered dose, respectively). The major urinary metabolites of the acid-labeled fenpropathrin were TMPA-glucuronic acid and TMPA-CH2OH (11–26% and 6–10% of the administered dose, respectively). None of the parent chemical was found in urine.

The major elimination products in the feces included the parent chemical (13–34% of the administered dose) and four metabolites. The fecal metabolites (percentage of administered dose) included CH2OH-fenpropathrin (9-20%), 4'-OH-fenpropathrin (4–11%), COOH-fenpropathrin (2–7%), and 4'-OH-CH2OH-fenpropathrin (2–7%). There are no qualitatively unique plant metabolites. The primary aglycones are identical in both plants and animals; the only difference is in the nature of the conjugating moieties employed.

2. *Metabolite toxicology*. The metabolism and potential toxicity of the small amounts of terminal plant metabolites have been tested on mammals. Glucoside conjugates of 3-phenoxy-benzyl alcohol and 3-phenoxybenzoic acid, administered orally to rats, were absorbed as the corresponding aglycones following cleavage of the glycoside linkage in the gut. The free or reconjugated aglycones were rapidly and completely eliminated by normal metabolic pathways. The glucose conjugates of 3-phenoxybenzyl alcohol and 3-phenoxy-benzoic acid are less toxic to mice than the corresponding aglycones.

3. *Endocrine disruption*. No special studies to investigate the potential for estrogenic or other endocrine effects of fenpropathrin have been performed. However, as referenced above (see toxicological profile), a large and detailed toxicology data base exists for the compound including studies acceptable to the Agency in all required categories. These studies include evaluations of reproduction and reproductive toxicity and detailed pathology and histology of endocrine organs following repeated or long-term exposure. These studies are considered capable of revealing endocrine effects and no such effects were observed.

C. Aggregate Exposure

1. *Dietary exposure*. Chronic and acute dietary exposure analyses were performed for fenpropathrin using anticipated residues, and accounting for proportion of the crop treated. The crops included in the analyses are the

raw agricultural commodities cottonseed, currants, peanuts, strawberries, soybeans, lingonberry, juneberry, salal, and grapes, and the crop groupings succulent shelled pea (6B), head and stem brassica (5A), fruiting vegetables (8), cucurbit vegetables (9), citrus fruits (10), bushberry (13B) and pome fruits (11); processed products from these crops; and the resulting secondary residues in meat, milk, and eggs. Soybeans (and soybean products) were entered into the analyses using tolerance-level residues and 1% of the crop treated for chronic assessments, and 2% of the crop treated for acute assessments. Proportion of crop treated was assumed to be equal for all crops in a crop grouping.

i. *Food*—a. *Acute. Acute dietary exposure* was calculated for the U.S. population, females (13+), males (20+ years) and five children subgroups. At the 99.9th percentile of exposure, the acute population adjusted dose (aPAD) of 0.06 milligrams/kilogram body weight/day (mg/kg bwt/day) is not exceeded.

b. *Chronic. Chronic dietary exposure* was calculated for the U.S. population and 25 population subgroups. Chronic dietary exposure was at or below 0.6% of the chronic population adjusted dose (cPAD) of 0.025 mg/kg bwt/day, with apples being the commodity contributing the most to chronic exposure. Generally speaking, the Agency has no cause for concern if total residue contribution for published and proposed tolerances is less than 100% of the cPAD.

ii. *Drinking water.* Since fenpropathrin is applied outdoors to growing agricultural crops, the potential exists for fenpropathrin to reach ground water or surface water that may be used for drinking water. To further quantify exposure from drinking water, potential surface water and ground water concentrations for fenpropathrin were estimated using First Index Reservoir Screening Tool (FIRST) and Screening Concentration in Groundwater (SCI-GROW) modeling. Use on citrus, the most intense field use, was modeled. SCI-GROW modeling indicated that fenpropathrin would not be detected in ground water. FIRST modeling of potential surface water concentrations of fenpropathrin yielded annual average parts per billion (0.833 ppb) and peak day (1.030 ppb) concentrations. These estimated drinking water environmental concentrations (DWEC) can be used for chronic and acute exposures, respectively.

2. *Non-dietary exposure.* No endpoints of concern were identified by the Health Effects Division, Hazard Identification Assessment Review Committee for dermal or inhalation exposures of any duration. Thus, no risk assessment is needed.

D. Cumulative Effects

There are numerous other pesticidal compounds, pyrethroids and the natural pyrethrins, that are structurally related to fenpropathrin and may have similar effects on animals. In consideration of potential cumulative effects of fenpropathrin and other substances that may have a common mechanism of toxicity, there are currently no available data or other reliable information indicating that any toxic effects produced by fenpropathrin would be cumulative with those of other chemical compounds, or other pyrethroids. Thus, only the potential risks of fenpropathrin have been considered in this assessment of aggregate exposure and effects.

Valent will submit information for EPA to consider concerning potential cumulative effects of fenpropathrin consistent with the schedule established by EPA at 62 FR 42020 (August 4, 1997) (FRL–5734–6) and other EPA publications pursuant to the Food Quality Protection Act.

E. Safety Determination

1. *U.S. population*—i. *Acute.* The potential acute exposure from food to the U.S. population and various non-child/infant population subgroups provide values well below the aPAD. In a conservative policy, the Agency has no cause for concern if total acute exposure calculated for the 99.9th percentile is less than 100% of the aPAD. Acute DWLOC values are not exceeded by modeled DWEC values. It can be concluded that there is a reasonable certainty that no harm will result to the overall U.S. population and many non-child/infant subgroups from aggregate, acute exposure to fenpropathrin residues.

ii. *Chronic.* Using the dietary exposure assessment procedures, the calculated chronic dietary exposure resulting from residue exposure from existing and proposed uses of fenpropathrin is minimal. The estimated chronic dietary exposure from food for the overall U.S. population and many non-child/infant subgroups ranges from 0.6% (children 1–6 years old, 0.000155 mg/kg bwt/day) to 0.1% (several groups) of the cPAD. Generally, the Agency has no cause for concern if total residue contribution is less than 100% of the cPAD. Chronic drinking water levels of concern (DWLOC) values are not exceeded by modeled drinking water estimated concentration (DWEC) values. It can be concluded that there is a reasonable certainty that no harm will result to the overall U.S. population and many non-child/infant subgroups from aggregate, chronic dietary exposure to fenpropathrin residues.

2. *Infants and children.* The estimated chronic dietary exposure from food to infant and child subgroups ranges from 0.6% children 1–6 years old, 0.000155 mg/kg bwt/day to 0.1% nursing infants, 0.000026 mg/kg bwt/day of the cPAD. Generally, the Agency has no cause for concern if total residue contribution is less than 100% of the cPAD. Chronic DWLOC values are not exceeded by modeled DWEC values. It can be concluded that there is a reasonable certainty that no harm will result to infant and child subgroups of the U.S. population from aggregate, chronic exposure to fenpropathrin residues.

BILLING CODE 6560–50–S

ENVIRONMENTAL PROTECTION AGENCY

[OPP–2004–0095; FRL–7351–3]

Notice to Pesticide Retailers and State Agencies Regarding Washington Toxics Coalition et al. v. EPA Litigation

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Pursuant to a January 22, 2004 Court Order, EPA has developed a point of sale notification regarding urban use pesticide products containing any of seven active ingredients. As further directed by the January 22 Order, EPA is hereby notifying retailers of lawn and garden pesticides in urban areas of California, Oregon and Washington through which ''salmon supporting waters'' pass that they are to make the point of sale notification whenever pesticide products containing these active ingredients are sold. The notifications will be distributed to retailers in these urban areas on or before April 5, 2004, by defendant-intervenors in this case (numerous groups representing pesticide registrants, growers and other pesticide users). Unit III. of this Notice provides retailers with the names of the affected active ingredients, information regarding the urban areas where the notifications must be made, and information regarding how retailers can obtain the point of sale notification if they have not received notifications from defendant-intervenors by April 5, 2004. Finally, the court further directed EPA to produce and provide copies of

the point of sale notification to state pesticide agencies, state fish agencies and Land Grant University extension coordinators in the urban areas and to request that they, in turn, provide this information to certain Certified Applicators in California, Oregon and Washington. The notifications will be distributed to these parties by EPA on or before April 5, 2004. Until further judicial proceedings occur, EPA cannot determine the extent to which the Order will remain effective. If, however, the January 22, 2004 Order is stayed or modified, EPA intends to provide notice on its Web site (See Unit I.B.3. of the **SUPPLEMENTARY INFORMATION** for the Web site address).

FOR FURTHER INFORMATION CONTACT: Arty Williams, Field and External Affairs Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: 703–305–5239; fax number: 703–308–3259; e-mail address: *williams.arty@epa.gov*.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to certain pesticide product retailers and registrants, state pesticide agencies, state fish agencies and Land Grant University extension coordinators in California, Oregon and Washington. This notice may also be of particular interest to persons in California, Oregon and Washington who may wish to use a pesticide in urban areas of those states through which ''salmon supporting waters'' pass. The Court has defined ''salmon supporting waters'' in its January 22, 2004 Order, which is available at *www.epa.gov/espp*. Since other entities may also be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Copies of this Document and Other Related Information?

1. *Docket*. EPA has established an official public docket for this action under docket identification (ID) number OPP–2004–0095. The official public docket consists of the documents specifically referenced in this action, any public comments received, and other information related to this action. Although a part of the official docket, the public docket does not include Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. The official public docket is the collection of materials that is available for public viewing at the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA. This docket facility is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The docket telephone number is (703) 305–5805.

2. *Electronic access*. You may access this **Federal Register** document electronically through the EPA Internet under the ''**Federal Register**'' listings at *http://www.epa.gov/fedrgstr/*.

An electronic version of the public docket is available through EPA's electronic public docket and comment system, EPA Dockets. You may use EPA Dockets at *http://www.epa.gov/edocket/* to view public comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the docket facility identified in Unit I.B.1. Once in the system, select ''search,'' then key in the appropriate docket ID number.

3. *EPA Web site*. You may also find these documents on EPA's Endangered Species Web site at *www.epa.gov/espp*.

II. Background

On January 30, 2001, the Washington Toxics Coalition and a number of other public interest groups filed suit against the U.S. Environmental Protection Agency in the United States District Court for the Western District of Washington alleging that EPA had failed to consult with the National Marine Fisheries Service (NMFS) on whether certain pesticides posed jeopardy to 26 federally listed endangered and threatened Pacific salmon and steelhead (salmon evolutionarily significant units (ESUs)). Under the Endangered Species Act (ESA), EPA must ensure that its registration of a pesticide is not likely to jeopardize the continued existence of species listed as endangered and threatened, or to adversely modify habitat critical to those species' survival. In addition to the obligation to ensure that its actions do not jeopardize listed species, the Agency must consult, as appropriate, with the U.S. Fish and Wildlife Service (FWS) or NMFS if a pesticide's use may affect listed species or designated critical habitat for a listed species.

On January 22, 2004, the District Court issued an Order granting interim injunctive relief pending EPA's compliance with an earlier Order of the Court that directed EPA to make effects determinations and consult, as appropriate, with NMFS regarding the effects of pesticides containing any of 55 active ingredients on threatened and endangered Pacific salmon and steelhead. Because of EPA's review and effects determinations made to date on many of these pesticides, the January 22 Order applied only to 38 of these pesticides. The Order (with some exceptions) enjoins, vacates and sets aside EPA's authorization of use of these 38 pesticides within 20 yards of salmon supporting waters for ground applications and within 100 yards of salmon supporting waters for aerial applications, in California, Oregon and Washington, effectively establishing buffer zones around those waters. The Court also ordered EPA to notify a variety of entities in the affected states of this injunction, and of previous Orders issued by the Court in this case, and to instruct registrants and the affected states to inform certain persons who sell, distribute and use pesticides of the Order. In the **Federal Register** of February 17, 2004 (69 FR 7478) (FRL–7345–8), EPA provided the notification and instruction ordered by the Court. The Court also ordered EPA to develop and facilitate, on or before April 5, 2004, the availability of a point of sale notification in urban areas in the three states for certain products containing any of seven active ingredients. The Court Order further directed EPA to produce and provide copies of the point of sale notification to state pesticide agencies, state fish agencies and Land Grant University extension coordinators in the urban areas and to request that they, in turn, provide this information to certain Certified Applicators in California, Oregon and Washington.

III. What Action is EPA Taking Today?

A. Notifications in Compliance with the Court Order of January 22, 2004

1. As directed by the January 22, 2004 Order, EPA has developed a point of sale notification regarding pesticide products containing any of the following seven active ingredients:

- 2,4-D
- Carbaryl
- Diazinon
- Diuron
- Malathion
- Triclopyr BEE
- Trifluralin

2. As further directed by the Court, EPA is hereby notifying retailers of lawn

and garden pesticides in urban areas of California, Oregon and Washington through which ''salmon supporting waters'' pass that they are to make the point of sale notification whenever products containing these seven active ingredients are sold. The Court's Order also requires defendant-intervenors (groups representing pesticide manufacturers, growers and other pesticide users) to distribute the point of sale notifications to sales outlets in these urban areas on or before April 5, 2004.

The January 22 Order does not direct defendant-intervenors to distribute the point of sale notifications as ''labeling'' within the meaning of section 2(p) of FIFRA. To the extent, however, that intervenors or pesticide registrants wish to distribute the point of sale notification developed by EPA as labeling, EPA will exercise its enforcement discretion authority. This will allow defendant-intervenors to distribute the notifications for the duration of the Court's injunction without notifying EPA, without seeking or obtaining approval from EPA and without the need for establishment registration or reporting regarding the production of the notification. Further, EPA will not take enforcement actions on the basis of misbranding under FIFRA, solely with respect to the point of sale notification materials that may be attached to or accompany any of the subject pesticide products. Any labeling changes different from or in addition to the point of sale notification developed by EPA remain subject to FIFRA's labeling requirements and misbranding provisions, and the existing procedures of 40 CFR parts 152 and 167.

3. Through this Notice, EPA is requesting that state pesticide agencies, state fish agencies and Land Grant University extension coordinators in urban areas of California, Oregon and Washington, provide the point of sale notification to Certified Applicators certified in any category that would permit the applicator to apply pesticides in parks, golf courses and housing areas in the urban areas. EPA will provide to the state pesticide agencies, state fish agencies and Land Grant University extension pesticide coordinators in California, Oregon and Washington, copies of the point of sale notification on or before April 5, 2004.

B. Court's Definition of Urban Areas

The urban areas subject to the Order are defined by the Court as all urbanized areas in California, Oregon and Washington with populations of at least 50,000 people (as defined by the 2000 U.S. Census) within a federally listed salmon ESU. These areas are identified in exhibit 2 of the January 22, 2004 Order, which can be accessed on EPA's Web site at *www.epa.gov/espp*.

C. Time Period for Which These Requirements are in Effect

1. As explained in detail in the January 22, 2004 Order, the Order terminates automatically for a particular pesticide and salmon ESU upon the occurrence of one of the following: (i) Completion by EPA of its ESA section 7(a)(2) consultation obligation; (ii) the issuance by NMFS of a biological opinion; (iii) a finding by EPA made for ESA section 7 compliance purposes that the pesticide is ''not likely to adversely affect'' that particular salmon ESU, provided that NMFS has not rejected or affirmatively failed to concur in that ''not likely to adversely affect'' determination; or (iv) a finding by EPA made for ESA section 7 compliance purposes that the pesticide will have ''no effect'' on the particular salmon ESU. EPA's findings for particular pesticides and salmon ESUs as of the January 22, 2004 Order are set forth in exhibit 1 of that Order. As EPA makes additional effects determinations, or as NMFS moves ahead in its review of EPA's determinations, pesticide registrants, retailers and users should review EPA's Web site, as well as any additional information updating the Order, to ascertain the applicability of the Order, including the requirement to make point of sale notifications, in their area.

2. On February 17, 2004, CropLife America and other defendant-intervenors in the Washington Toxics Coalition case, appealed the Court's Order. If further judicial proceeding occur that may affect the Order, EPA intends to provide notice on its Web site at *www.epa.gov/espp*.

D. Obtaining Additional Copies of Point of Sale Notifications

1. Any sales outlet of lawn and garden pesticide products subject to the point of sale notification provisions in the January 22, 2004 Order, in these urban areas that have not received the point of sale notifications from defendant-intervenors by April 5, 2004, may obtain such materials from defendant-intervenors through the following Web site: *www.pestfacts.org*.

2. Any state pesticide agency, state fish agency, or Land Grant University extension coordinator subject to the request to distribute the point of sale notification to certain Certified Applicators who have not received the point of sale notifications from EPA by April 5, 2004, or who need additional copies of the point of sale notification, may obtain such materials by contacting the person indicated in this Notice under **FOR FURTHER INFORMATION CONTACT**.

E. What is the Agency's Authority for Taking this Action?

This action is taken pursuant to the January 22, 2004 Order of the Court in *Washington Toxics Coalition, et al.* v. *EPA*, CO1–0132 (W.D. WA).

Lees Former Impoundment Superfund Site; Notice of Proposed Settlement

AGENCY: Environmental Protection Agency.

ACTION: Notice of Proposed Settlement.

SUMMARY: Under Section 122(h) (1) of the Comprehensive Environmental Response Compensation and Liability Act, the Environmental Protection Agency has entered into a Settlement Agreement at the Lees Former Impoundment Superfund Site located in Bunnell, Flagler County, Florida, with Mr. George R. Lees, Laura D. Lees, and Lees Development Company. EPA will consider public comments on the Agreement until April 23, 2004. EPA may withdraw from or modify the Agreement should such comments disclose facts or considerations which indicate the Agreement is inappropriate, improper, or inadequate. Copies of the Agreement are available from: Ms. Paula V. Batchelor, US Environmental Protection Agency, Region 4, Superfund Enforcement and Information Management Branch, Waste Management Division, 61 Forsyth St., SW., Atlanta, Georgia 30303, (404) 562–8887, e-mail: *batchelor.paula@epa.gov.*

Written or e-mail comments may be submitted to Paula V. Batchelor at the above address within 30 days of the date of publication.

Dated: March 5, 2004.

FARM CREDIT SYSTEM INSURANCE CORPORATION

Sunshine Act Meeting

SUMMARY: Notice is hereby given of the quarterly meeting of the Farm Credit System Insurance Corporation Board (Board).

DATE AND TIME: The meeting of the Board will be held at the offices of the Farm Credit Administration in McLean, Virginia, on March 26, 2004, from 9 a.m. until such time as the Board concludes its business.

FOR FURTHER INFORMATION CONTACT: Jeanette C. Brinkley, Secretary to the Farm Credit System Insurance Corporation Board, (703) 883–4009, TTY (703) 883–4056.

ADDRESSES: Farm Credit System Insurance Corporation, 1501 Farm Credit Drive, McLean, Virginia 22102.

SUPPLEMENTARY INFORMATION: Parts of this meeting of the Board will be open to the public (limited space available), and parts will be closed to the public. In order to increase the accessibility to Board meetings, persons requiring assistance should make arrangements in advance. The matters to be considered at the meeting are:

Open Session

A. Approval of Minutes

—December 11, 2003 (Quarterly Meeting)

Closed Session

Report on System Performance and Insurance Risk.

Open Session

B. Business Reports

1. Financials.

2. Quarterly Report on Annual Performance Plan.

3. Report on Insured Obligations.

A. New Business

1. Review of Insurance Premium Rate Alternatives.

2. Presentation of 2003 Audit Results.

Closed Session

Executive Session.

Dated: March 22, 2004.

Jeanette C. Brinkley,

Secretary, Farm Credit System Insurance Corporation Board.

[FR Doc. 04–6689 Filed 3–22–04; 11:28 am]

BILLING CODE 6710–10–P

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collections Approved by Office of Management and Budget

March 17, 2004.

SUMMARY: The Federal Communications Commission (FCC) has received Office of Management and Budget (OMB) approval for the following public information collections pursuant to the Paperwork Reduction Act of 1995, Public Law 104–13. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid control number.

FOR FURTHER INFORMATION CONTACT: Paul J. Laurenzano, Federal Communications Commission, 445 12th Street, SW, Washington DC, 20554, (202) 418–1359 or via the Internet at *plaurenz@fcc.gov.*

SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060–1044.

OMB Approval date: 3/02/2004.

Expiration Date: 3/31/2007.

Title: Review of the Section 251 Unbundling Obligations of Incumbent Local Exchange Carriers CCDckt # 01–338, 96–98, 98–147, Report and Order and Order on Remand and Further NPRM.

Form No.: N/A.

Estimated Annual Burden: 2,369 responses; 74,120 total annual hours; 31–32 hours per respondent.

Needs and Uses: In the Report and Order on Remand and Further Notice of Proposed Rulemaking, issued in CC Dockets 01–338, 96–98, 98–147, the Commission adopts new rules to govern the availability of unbundled network elements to competitive local exchange carriers from incumbent local exchange carriers. The Commission amends its standard for determining which network elements must be provided on an unbundled basis and determines which network elements meet this standard. The Commission establishes eligibility criteria for certain combinations of unbundled network elements. The Commission allows state regulatory commissions to initiate proceedings to make additional determinations consistent with specific Commission guidance.

OMB Control No.: 3060–0513.

OMB Approval date: 3/02/2004.

Expiration Date: 3/31/2007.

Title: ARMIS Joint Cost Report.

Form No.: FCC 43–03.

Estimated Annual Burden: 85 responses; 4,250 total annual hours; 50 hours per respondent.

Needs and Uses: The Joint Cost Report is needed to administer our joint cost rules (Part 64) and to analyze data in order to prevent cross-subsidization of nonregulated operations by the regulated operations of Tier 1 carriers.

OMB Control No.: 3060–0496.

OMB Approval date: 3/02/2004.

Expiration Date: 3/31/2007.

Title: The ARMIS Operating Data Report.

Form No.: FCC 43–08.

Estimated Annual Burden: 55 responses; 7,645 total annual hours; 139 hours per respondent.

Needs and Uses: The Operating Data Report collects annual statistical data in a consistemt format that is essential for the Commission to monitor network growth, usage, and reliability.

OMB Control No.: 3060–0942.

OMB Approval date: 3/02/2004.

Expiration Date: 3/31/2007.

Title: In the Matter of Access Charge Reform, Price Cap Performance Review for Local Exchange Carriers, Low-Volume Long Distance Users, Federal-State Joint Board On Universal Service.

Form No.: N/A.

Estimated Annual Burden: 108 responses; 6,677 total annual hours; 61–62 hours per respondent.

Needs and Uses: The Report and Order implements the Coalition for Affordable Local and Long Distance Services (CALLS) Proposal, which resolves major outstanding issues concerning access charges; the pending NPRM to address implicit universal service support in access charges, the X-factor remand, the Low-Volume Long-Distance Users NOI, the pending NPRM on geographically deaveraging SLCs and the next scheduled price cap performance review.

Federal Communications Commission.

Marlene H. Dortch,

Secretary.

BILLING CODE 6712–01–P

FEDERAL HOUSING FINANCE BOARD

[No. 2004–N–6]

Federal Home Loan Bank Members Selected for Community Support Review

AGENCY: Federal Housing Finance Board.

ACTION: Notice.

SUMMARY: The Federal Housing Finance Board (Finance Board) is announcing the Federal Home Loan Bank (Bank) members it has selected for the 2004–05 first quarter review cycle under the Finance Board's community support requirements regulation. This notice also prescribes the deadline by which Bank members selected for review must submit Community Support Statements to the Finance Board.

DATES: Bank members selected for the 2004–05 first quarter review cycle under the Finance Board's community support requirements regulation must submit completed Community Support Statements to the Finance Board on or before June 1, 2004.

ADDRESSES: Bank members selected for the 2004–05 first quarter review cycle under the Finance Board's community support requirements regulation must submit completed Community Support Statements to the Finance Board either by regular mail at the Federal Housing Finance Board, Office of Supervision, Community Investment and Affordable Housing, 1777 F Street, NW., Washington, DC 20006, or by electronic mail at *fitzgeralde@fhfb.gov.*

FOR FURTHER INFORMATION CONTACT: Emma J. Fitzgerald, Program Analyst, Office of Supervision, Community Investment and Affordable Housing, by telephone at (202) 408–2874, by electronic mail at *fitzgeralde@fhfb.gov*, or by regular mail at the Federal Housing Finance Board, 1777 F Street, NW., Washington, DC 20006.

SUPPLEMENTARY INFORMATION:

I. Selection for Community Support Review

Section 10(g)(1) of the Federal Home Loan Bank Act (Bank Act) requires the Finance Board to promulgate regulations establishing standards of community investment or service Bank members must meet in order to maintain access to long-term advances. *See* 12 U.S.C. 1430(g)(1). The regulations promulgated by the Finance Board must take into account factors such as the Bank member's performance under the Community Reinvestment Act of 1977 (CRA), 12 U.S.C. 2901 *et seq.*, and record of lending to first-time homebuyers. *See* 12 U.S.C. 1430(g)(2). Pursuant to section 10(g) of the Bank Act, the Finance Board has promulgated a community support requirements regulation that establishes standards a Bank member must meet in order to maintain access to long-term advances, and review criteria the Finance Board must apply in evaluating a member's community support performance. *See* 12 CFR part 944. The regulation includes standards and criteria for the two statutory factors—CRA performance and record of lending to first-time homebuyers. 12 CFR 944.3. Only members subject to the CRA must meet the CRA standard. 12 CFR 944.3(b). All members, including those not subject to CRA, must meet the first-time homebuyer standard. 12 CFR 944.3(c).

Under the rule, the Finance Board selects approximately one-eighth of the members in each Bank district for community support review each calendar quarter. 12 CFR 944.2(a). The Finance Board will not review an institution's community support performance until it has been a Bank member for at least one year. Selection for review is not, nor should it be construed as, any indication of either the financial condition or the community support performance of the member.

Each Bank member selected for review must complete a Community Support Statement and submit it to the Finance Board by the June 1, 2004 deadline prescribed in this notice. 12 CFR 944.2(b)(1)(ii) and (c). On or before April 30, 2004, each Bank will notify the members in its district that have been selected for the 2004–05 first quarter community support review cycle that they must complete and submit to the Finance Board by the deadline a Community Support Statement. 12 CFR 944.2(b)(2)(i). The member's Bank will provide a blank Community Support Statement Form, which also is available on the Finance Board's Web site: *http://www.fhfb.gov.* Upon request, the member's Bank also will provide assistance in completing the Community Support Statement.

The Finance Board has selected the following members for the 2004–05 first quarter community support review cycle:

Member	City	State
Federal Home Loan Bank of Boston—District 1		
Valley Bank	Bristol	Connecticut
The Canaan National Bank	Canaan	Connecticut
Bankers' Bank Northeast	Glastonbury	Connecticut

II. Public Comments

To encourage the submission of public comments on the community support performance of Bank members, on or before April 30, 2004, each Bank will notify its Advisory Council and nonprofit housing developers, community groups, and other interested parties in its district of the members selected for community support review in the 2004–05 first quarter review cycle. 12 CFR 944.2(b)(2)(ii). In reviewing a member for community support compliance, the Finance Board will consider any public comments it has received concerning the member. 12 CFR 944.2(d). To ensure consideration by the Finance Board, comments concerning the community support performance of members selected for the 2004–05 first quarter review cycle must be delivered to the Finance Board on or before the April 30, 2004 deadline for submission of Community Support Statements.

Dated: March 18, 2004.

John Harry Jorgenson,

General Counsel.

BILLING CODE 6725–01–P

FEDERAL MARITIME COMMISSION

Notice of Agreements Filed

The Commission hereby gives notice of the filing of the following agreements under the Shipping Act of 1984. Interested parties can review or obtain copies of agreements at the Washington, DC offices of the Commission, 800 North Capitol Street, NW., Room 940. Interested parties may submit comments on an agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days of the date this notice appears in the **Federal Register.**

Agreement No.: 011786–002.

Title: Zim/Great Western Agreement.

Parties: Zim Israel Navigation Co., Ltd. and Great Western Steamship Company.

Synopsis: The amendment extends the term of the agreement through May 31, 2004.

Agreement No.: 011872.

Title: CSAV Group/CMA CGM Cross Space Charter, Sailing and Cooperative Working Agreement.

Parties: Compania Sud Americana de Vapores S.A., Companhia Libra de Navegacao, Montemar Maritima S.A., and CMA CGM, S.A.

Synopsis: The agreement would authorize the parties to share vessel space on their services between United States East Coast ports and ports in Argentina, Brazil, Paraguay, Uruguay, and Venezula.

Agreement No.: 011873.

Title: FOML/PONL Space Charter Agreement.

Parties: Fesco Ocean Management Limited and P&O Nedlloyd Limited.

Synopsis: The proposed agreement would authorize P&O to charter space to Fesco on an as-needed, as-available basis in the trade from United States ports to Busan, Korea.

Agreement No.: 200233–014.

Title: Packer Avenue Lease and Operating Agreement.

Parties: Philadelphia Regional Port Authority and Astro Holdings, Inc.

Synopsis: The modification makes adjustments in the lease terms occasioned by the installation of new cranes at the Parker Avenue Terminal.

By Order of the Federal Maritime Commission.

Dated: March 19, 2004.

Bryant L. VanBrakle,

Secretary.

BILLING CODE 6730–01–P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the

nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States. Additional information on all bank holding companies may be obtained from the National Information Center website at *http://www.ffiec.gov/nic/*.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 16, 2004.

A. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166–2034:

1. Central Bancompany, Jefferson City, Missouri; to acquire 100 percent of the voting shares of Community Bancs of Oklahoma, Inc., Tulsa, Oklahoma, and thereby indirectly acquire voting shares of Community Bank & Trust Company, Tulsa, Oklahoma.

2. Peoples Holding Company, Tupelo, Mississippi; to acquire 100 percent of the voting shares of Peoples Merger Corporation, Knoxville, Tennessee, and thereby indirectly acquire Renasant Bancshares, Inc., Germantown, Tennessee. and thereby indirectly acquire Renasant Bank, Germantown, Tennessee. In connection with this application, People Merger Corporation also has applied to become a bank holding company.

Board of Governors of the Federal Reserve System, March 18, 2004.

Robert deV. Frierson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Assistant Secretary for Planning and Evaluation; Medicare Program; Establishment of the Technical Review Panel on the Medicare Trustees Reports and Request for Nominations for Members

AGENCY: Assistant Secretary for Planning and Evaluation, HHS.

ACTION: Notice.

SUMMARY: This notice announces the establishment of the Technical Review Panel on the Medicare Trustees Reports and solicits nominations for members of the panel. The Medicare Board of Trustees has requested the Secretary of Health and Human Services (who is one of the Trustees) to establish a panel of technical experts to review the assumptions and methods underlying the Hospital Insurance (HI) and Supplementary Medical Insurance (SMI) Trust Fund annual reports. This notice also announces that on March 11, 2004 the Secretary signed the charter establishing the panel. The charter will terminate two years from the date the charter is signed, unless renewed by the Secretary.

EFFECTIVE DATE: Nominations for members will be considered if we receive them at the appropriate address, as provided below, before 5 p.m. on April 9, 2004.

ADDRESSES: Mail or deliver written nominations to the following address: Hubert H. Humphrey Building, Room 443–F.8, 200 Independence Avenue, SW., Washington, DC 20201. Because of staffing and resource limitations, we cannot accept nominations by facsimile (FAX) or email transmission.

FOR FURTHER INFORMATION CONTACT: Andrew Cosgrove, (202) 205–8681.

SUPPLEMENTARY INFORMATION:

I. Background

The Board of Trustees of the Medicare Trust Funds (the Hospital Insurance (HI) and Supplementary Medical Insurance (SMI) Trust Funds) report annually on the financial condition of the trust funds. The reports describe the trust funds' current and projected financial condition, within the next 10 years (the ''short term'') and indefinitely into the future (the ''long term''). The Medicare Board of Trustees has requested the Secretary of Health and Human Services (who is one of the Trustees) to establish a panel of technical experts to review the assumptions and methods underlying the HI and SMI annual reports. The panel will consist of up to 7 members, selected by the Secretary or a designee, and a Chair, *who is appointed by the Secretary or a designee.*

The panel will meet periodically throughout its existence, until it has completed its work. The work of the panel is technical in nature and will concentrate on the long term financing of the Medicare program. We will prepare the agenda for the panel's activities, which will set the items for discussion.

We are requesting nominations for members to serve on the panel. Panel members serve with compensation, and travel, meals, lodging, and related expenses will be reimbursed in accordance with standard government travel regulations. We have a special interest in ensuring that women, minorities, and the physically challenged are adequately represented on the panel and encourage nominations of qualified candidates from those groups.

II. Provisions of This Notice

A. Criteria for Nominees

Nominees should possess knowledge, experience, and expertise in areas such as the Medicare program, health economics, and actuarial science, or any other relevant expertise.

It is not necessary that any nominee possesses expertise in all of the areas listed, but each should have significant, relevant experience in at least one area. Members of the panel will serve for the entire duration of the panel.

Any interested person may nominate one or more qualified individuals. Self-nominations will also be accepted. Each nomination must include a letter of nomination, a curriculum vita of the nominee, and a statement from the

nominee that the nominee is willing to serve on the panel.

B. Signing of the charter

This notice announces the signing of the charter for the Technical Review Panel on the Medicare Trustees Reports. The charter was signed by the Secretary on March 11, 2004. The charter will terminate on March 11, 2006, unless renewed by the Secretary.

III. Copies of the Charter

You may obtain a copy of the Secretary's charter for the Technical Review Panel on Medicare Trustees Reports by submitting a request to Andrew Cosgrove, 200 Independence Ave., SW., Washington DC, 20201, (202) 205–8681 or contact Andrew Cosgrove via E-mail at *andrew.cosgrove@hhs.gov*.

Authority: 42 U.S.C. 217a; Section 222 of the Public Health Services Act, as amended.

Dated: March 18, 2004.

Michael J. O'Grady,

Assistant Secretary for Planning and Evaluation.

[FR Doc. 04–6599 Filed 3–23–04; 8:45 am]

BILLING CODE 4150–05–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Health Resources and Services Administration; CDC/HRSA Advisory Committee on HIV and STD Prevention and Treatment

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control and Prevention (CDC) and the Health Resources and Services Administration (HRSA) announce the following committee meeting.

Name: CDC/HRSA Advisory Committee on HIV and STD Prevention and Treatment.

Times and Dates: 8 a.m.–5 p.m., May 20, 2004. 8 a.m.–11:30 a.m., May 21, 2004.

*Place:*Sheraton Buckhead Hotel Atlanta, 3405 Lenox Road, Atlanta, Georgia.

Status: Open to the public, limited only by the space available. The meeting room will accommodate approximately 100 people.

Purpose: This Committee is charged with advising the Secretary; the Director, CDC; and the Administrator, HRSA, regarding activities related to prevention and control of HIV/AIDS and other STDs, the support of health care services to persons living with HIV/AIDS, and education of health professionals and the public about HIV/AIDS and other STDs. The Committee will support the Agencies' process of identifying and responding to the prevention and health service delivery needs of affected communities, and the needs of individuals living with or at risk for HIV and other STDs.

Matters To Be Discussed: Agenda items include issues pertaining to (1) Ryan White CARE Act Reauthorization (RWCA), (2) issues pertaining to syphilis and HIV prevention, and (3) CDC's Futures Initiative.

Agenda items are subject to change as priorities dictate.

Contact Person for More Information: Paulette Ford-Knights, Public Health Analyst, National Center for HIV, STD, and TB Prevention, 1600 Clifton Road, NE., Mailstop E–07, Atlanta, Georgia 30333. Telephone (404) 639–8008, fax (404) 639–3125, e-mail *pbf7@cdc.gov.*

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both CDC and the Agency for Toxic Substances and Disease Registry.

Dated: March 17, 2004.

Alvin Hall,

Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

[FR Doc. 04–6528 Filed 3–23–04; 8:45 am]

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

National Institute for Occupational Safety and Health; Meeting

The National Institute for Occupational Safety and Health (NIOSH) of the Centers for Disease Control and Prevention (CDC) announces the following meeting:

Name: Continued Discussions for Concepts of Powered Air-Purifying Respirator (PAPR) Standards Development Efforts Used for Respiratory Protection Against Chemical, Biological, Radiological, and Nuclear (CBRN) Agents.

Date and Time: 9 a.m.–5 p.m., May 4, 2004.

Place: Hilton Garden Inn, Pittsburgh/Southpointe, 1000 Corporate Drive, Canonsburg, Pennsylvania.

Status: This meeting is hosted by NIOSH and will be open to the public, limited only by the space available. The meeting room will accommodate approximately 175 people. Interested parties should make hotel reservations directly with the Hilton Garden Inn (724–743–5000/1–800–445–8667) before the cut-off date of April 20, 2004. Special group rates of $55 per night for Federal participants and $79 per night for non-federal participants have been negotiated for this meeting. The NIOSH/National Personal Protective Technology Laboratory (NPPTL) public meeting must be referenced to receive these special rates. Interested parties should confirm their attendance to this meeting by completing a registration form and forwarding it by e-mail (*npptlevents@cdc.gov*) or fax (304–285–4459) to the NPPTL Event Management Office. A registration form may be obtained from the NIOSH home page (*www.cdc.gov/niosh*) by selecting conferences and then the event.

An opportunity to make presentations regarding the discussions of concepts for standards and testing processes for PAPR standards suitable for respiratory protection against CBRN agents will be given. Requests to make such presentations at the public meeting should be made by e-mail to the NPPTL Event Management Office (*npptlevents@cdc.gov*). All requests to present should include the name, address, telephone number, relevant business affiliations of the presenter, a brief summary of the presentation, and the approximate time requested for the presentation. Oral presentations should be limited to 15 minutes.

After reviewing the requests for presentations, NPPTL Event

Management will notify each presenter of the approximate time that their presentation is scheduled to begin. If a participant is not present when their presentation is scheduled to begin, the remaining participants will be heard in order. At the conclusion of the meeting, an attempt will be made to allow presentations by any scheduled participants who missed their assigned times. Attendees who wish to speak but did not submit a request for the opportunity to make a presentation may be given this opportunity at the conclusion of the meeting, at the discretion of the presiding officer.

Comments on the topics presented in this notice and at the meeting should be mailed to the NIOSH Docket Office, Robert Taft Laboratories, M/S C34, 4676 Columbia Parkway, Cincinnati, Ohio 45226, Telephone (513) 533–8303, Fax (513) 533–8285. Comments may also be submitted by e-mail to *niocindocket@cdc.gov.* E-mail attachments should be formatted in Microsoft Word. Comments should be submitted to NIOSH no later than June 4, 2004, and should reference Docket Number NIOSH–010 in the subject heading.

Purpose: NIOSH will continue discussions of conceptual standards and testing processes for PAPR standards suitable for respiratory protection against CBRN agents. NIOSH also wishes to obtain comments from individuals regarding the tentative schedules and priorities for future CBRN respirator standards development efforts.

NIOSH, along with the U.S. Army Research, Development and Engineering Command (RDECOM, formerly SBCCOM) and the National Institute for Standards and Technology (NIST) will present information to attendees concerning the concept development for the PAPR CBRN standard. Participants will be given an opportunity to ask questions on these topics and to present individual comments for consideration. Interested participants may obtain a copy of the PAPR CBRN concept paper, as well as earlier versions of other concept papers used during the standard development effort, from the NIOSH NPPTL Web site, address: *http://www.cdc.gov/niosh/npptl.* The April 1, 2004, concept paper will be used as the basis

for discussion at the public meeting. During the October 16, 2003, public meeting, NIOSH indicated that subsequent future standards efforts following the completion of the PAPR CBRN standard would be in this sequence: Integrated self-contained breathing apparatus (SCBA)/PAPR, integrated SCBA/air-purifying respirators (APR), closed-circuit SCBA, and supplied air respirators. NIOSH wishes to obtain comments from individuals regarding this tentative priority order sequence to determine if it reflects the priorities of the stakeholder community's needs for respiratory protection. Recent acts of terrorism have created an urgent awareness of domestic security and preparedness issues. Municipal, State, and Federal responder groups, particularly these in locations considered potential targets, have been developing and modifying response and consequence management plans. Since the World Trade Center and anthrax incidents, most emergency response agencies have operated with a heightened appreciation of the potential scope and sustained resources requirements for coping with such events. The Federal Interagency Board for Equipment Standardization and Interoperability (IAB) has worked to identify personal protective equipment that is already available on the market for responders' use. The IAB has identified the development of standards or guidelines for respiratory protection equipment as a top priority. NIOSH, NIST, the National Fire Protection Association (NFPA), and the Occupational Safety and Health Administration have entered into a Memorandum of Understanding defining each agency or organization's role in developing, establishing, and enforcing standards or guidelines for responders' respiratory protective devices. NIST has initiated Interagency Agreements with NIOSH and RDECOM to aid in the development of appropriate protection standards or guidelines. NIOSH has the lead in developing standards or guidelines to test, evaluate, and approve respirators.

NIOSH, RDECOM, and NIST have hosted public meetings on April 17 and 18, 2001; June 18 and 19, 2002; October 16 and 17, 2002; April 29, 2003; June 25, 2003, and October 16, 2003, presenting their progress in assessing respiratory protection needs of responders to CBRN incidents. The methods or models for developing hazard and exposure estimates and the status in evaluating test methods and performance standards that may be applicable as future CBRN respirator standards or guidelines were discussed at these meetings.

Three NIOSH CBRN respirator standards and several NFPA standards for ensembles, SCBA and protective clothing were the first adopted by the U.S. Department of Homeland Security (DHS). On February 26, 2004, DHS adopted, as DHS standards, three NIOSH criteria for testing and certifying respirators for protection against CBRN exposures. NIOSH uses the criteria to test (1) SCBA for use by emergency responders against CBRN, (2) APR for use by emergency responders against CBRN exposures, and (3) escape respirators for protection against CBRN.

For Further Information Contact: NPPTL Event Management, 3610 Collins Ferry Road, P.O. Box 880, Morgantown, West Virginia 26507–0880, Telephone (304) 285–4750, Fax (304) 285–4459, e-mail *npptlevents@cdc.gov.*

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** Notices pertaining to announcements of meetings and other committee management activities, for both CDC and the Agency for Toxic Substances and Disease Registry.

Dated: March 18, 2004.

Alvin Hall,

Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

BILLING CODE 4163–19–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Circulatory System Devices Panel of the Medical Devices Advisory Committee; Notice of Meeting

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration (FDA). The meeting will be open to the public.

Name of Committee: Circulatory System Devices Panel of the Medical Devices Advisory Committee.

General Function of the Committee: To provide advice and recommendations to the agency on FDA's regulatory issues.

Date and Time: The meeting will be held on April 21, 2004, from 9 a.m. to 5 p.m.

Location: Gaithersburg Marriott Washingtonian Center, Ballroom Salons E, F, and G, 9751 Washingtonian Blvd., Gaithersburg, MD.

Contact Person: Geretta Wood, Center for Devices and Radiological Health (HFZ–450), Food and Drug Administration, 9200 Corporate Blvd., Rockville, MD 20850, 301–443–8320, ext. 143, or FDA Advisory Committee Information Line, 1–800–741–8138 (301–443–0572 in the Washington, DC area), code 3014512625. Please call the Information Line for up-to-date information on this meeting.

Agenda: The committee will discuss, make recommendations, and vote on a premarket approval application for a carotid stent indicated for use in the treatment of carotid artery disease in high-risk patients. Background information for the topics, including the agenda and questions for the committee, will be available to the public 1 business day before the meeting on the Internet at *http://www.fda.gov/cdrh/panelmtg.html*. Material for the April 21, 2004, session will be posted on April 20, 2004.

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Written submissions may be made to the contact person by April 12, 2004. Oral presentations from the public will be scheduled for approximately 30 minutes at the beginning of committee deliberations and for approximately 30 minutes near the end of the deliberations. Time allotted for each presentation may be limited. Those desiring to make formal oral presentations should notify the contact person before April 12, 2004, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation.

Persons attending FDA's advisory committee meetings are advised that the agency is not responsible for providing access to electrical outlets.

FDA welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with physical disabilities or special needs. If you require special accommodations due to a disability, please contact AnnMarie Williams, Conference Management Staff, at 301–594–1283, ext. 113, at least 7 days in advance of the meeting.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. app. 2).

Dated: March 17, 2004.

Peter J. Pitts,

Associate Commissioner for External Relations.

[FR Doc. 04–6485 Filed 3–23–04; 8:45 am]

BILLING CODE 4160–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Advisory Committee for Pharmaceutical Science; Notice of Meeting

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration

(FDA). The meeting will be open to the public.

Name of Committee: Advisory Committee for Pharmaceutical Science.

General Function of the Committee: To provide advice and recommendations to the agency on FDA's regulatory issues.

Date and Time: The meeting will be held on April 13 and 14, 2004, from 8:30 a.m. to 5 p.m.

Location: Center for Drug Evaluation and Research Advisory Committee Conference Room, rm. 1066, 5630 Fishers Lane, Rockville, MD.

Contact Person: Hilda Scharen or Kimberly Topper, Center for Drug Evaluation and Research (HFD–21), Food and Drug Administration, 5600 Fishers Lane (for express delivery, 5630 Fishers Lane, rm. 1093), Rockville, MD 20857, 301–827–7001, e-mail: *SCHARENH@cder.fda.gov* or *TOPPERK@cder.fda.gov*, or FDA Advisory Committee Information Line, 1–800–741–8138 (301–443–0572 in the Washington, DC area), code 3014512539. Please call the Information Line for up-to-date information on this meeting.

Agenda: On April 13, 2004, the committee will receive an update from the Clinical Pharmacology Subcommittee. The committee will also discuss and provide comments on the following topics: (1) A proposal for resolving the issues related to the parametric tolerance interval test for dose content uniformity for inhalation products, (2) the Process Analytical Technologies progress and next steps, and (3) process analytical technology for products in the Office of Biotechnology Products, Center for Drug Evaluation and Research and in the Center for Biologics Evaluation and Research. On April 14, 2004, the committee will discuss and provide comments on the following topics: (1) Bioequivalence testing/methods strategy for products exhibiting high variability and (2) bioinequivalence concepts and definition.

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Written submissions may be made to the contact person by April 6, 2004. Oral presentations from the public will be scheduled between approximately 1 p.m. and 2 p.m. on April 13, 2004, and 1 p.m. and 2 p.m. on April 14, 2004. Time allotted for each presentation may be limited. Those desiring to make formal oral presentations should notify the contact person before April 6, 2004, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation.

Persons attending FDA's advisory committee meetings are advised that the agency is not responsible for providing access to electrical outlets.

FDA welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with physical disabilities or special needs. If you require special accommodations due to a disability, please contact Hilda Scharen or Kimberly Topper at least 7 days in advance of the meeting.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. app. 2).

Dated: March 17, 2004.

Peter J. Pitts,

Associate Commissioner for External Relations.

National Institutes of Health

Government-Owned Inventions; Availability for Licensing

AGENCY: National Institutes of Health, Public Health Service, HHS.

ACTION: Notice.

SUMMARY: The inventions listed below are owned by an agency of the U.S. Government and are available for licensing in the U.S. in accordance with 35 U.S.C. 207 to achieve expeditious commercialization of results of federally-funded research and development. Foreign patent applications are filed on selected inventions to extend market coverage for companies and may also be available for licensing.

ADDRESSES: Licensing information and copies of the U.S. patent applications listed below may be obtained by writing to the indicated licensing contact at the Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, Maryland 20852–3804; telephone: (301) 496–7057; fax: (301) 402–0220. A signed Confidential Disclosure Agreement will be required to receive copies of the patent applications.

Cell-Based Assay of I-kappaB Kinase Activity

Richard Eric Davis *et al.* (NCI).

DHHS Reference No. E–109–2004/0—Research Tool.

Licensing Contact: Mojdeh Bahar; (301) 435–2950; *baharm@mail.nih.gov.*

The present invention is directed to a cell-based assay of I-kappaB Kinase (IKK) Activity, providing a facile probe for cellular assays of activity/activation and drug screening. IKK activation is essential to diseases including certain types of cancer and undesired immune responsiveness such as autoimmunity and transplant rejection. In the assay, cells of interest are engineered to express an easily-measured exogenous form of IkB, driven by a promoter that is relatively independent of Nuclear factor of Kappa-B (NFkB) activity. Since the rate of synthesis of the ''reporter'' from the IkB is stable, its level is then principally determined by its rate of degradation, and therefore correlates inversely with IKK activity.

The assay has been used to screen molecules for their IKK inhibitor activity, determine whether the toxicity of agents towards NFkB-dependent lines occurs via the inhibition of IKK, and to determine whether genetic manipulations such as overexpression, exogenous mutants, or RNA interference affect constitutive or inducible IKK activity or activation.

Available materials include retroviral plasmids encoding the reporter or controls, and cell lines stably infected with these plasmids and validated in the assay. These reporter cell lines have IKK activity that is either constitutively high or easily inducible through various pathways (TNF-alpha, CD40L, IL–1beta, etc.).

Specific Antibodies to the Lymphatic Endothelial Cell Specific Hyaluronic Acid Receptor, LYVE–1

Sam T. Hwang, Adela R. Cardones (NCI).

DHHS Reference No. E–107–2004/0—Research Tool.

Licensing Contact: Mojdeh Bahar; 301/435–2950; *baharm@mail.nih.gov.*

This invention is drawn to specific anti-sera to human LYVE–1. LYVE–1 is a lymphatic endothelial cell-specific transmembrane form of CD44 that may have a role in recruitment of immune cells and cancer cells to lymphatics. Following skin-immunization of 10 mice with cDNA encoding human LYVE–1, the inventors have developed specific anti-sera to human LYVE–1. The anti-sera work well for flow cytometry and fluorescence microscopy and recognize native LYVE–1 epitopes. The antibody would be useful to scientists studying the role of lymphatic vessels in immune diseases and cancer. It may also be useful for clinical

pathologists. Commercially available LYVE–1 antibodies have drawbacks as they do not work well for flow cytometry analysis or tissue staining.

Peptide Inhibitors of HIV–1 Integrase Useful for the Treatment of Retroviral Infection and HIV

Drs. Peter Roller, Christophe Marchand, Krysztof Krajewski, Vinay K. Pathak, Yijun Zhang, and Yves Pommier (NCI).

U.S. Provisional Application No. 60/534,378 filed 06 Jan 2004 (DHHS Reference No. E–039–2004/0–US–01).

Licensing Contact: Sally Hu; 301/435–5606; e-mail: *hus@od.nih.gov*.

The invention describes the discovery of short peptides, derived from the natural peptide named indolicidin that have an ability to inhibit HIV–1 integrase and exhibit antiviral activity. In particular, this invention shows that synthesized derivatives of the indolicidin peptides named RIN–25 exhibit a significant higher anti-viral and anti-integrase activity when compared to the parent compound named RIN–42. HIV–1 integrase has a good potential of being the next therapeutic target since HIV–1 integrase is essential for viral replication and there is no cellular equivalent. Thus, subject invention may be used in the development of therapeutics for the treatment of retroviral infections, such as AIDS, or other retroviral-related diseases (*i.e.*, cancer, immune disorders). In addition, these novel peptides described in this invention may also have particular value when used in combination treatments with other antiviral therapies directed at other viral targets, such as protease and reverse transcriptase.

Multipotent Postnatal Stem Cells From Human Periodontal Ligament and Uses Thereof

Dr. Songtao Shi *et al.* (NIDCR).

U.S. Provisional Application filed 20 Nov 2003 (DHHS Reference No. E–033–2004/0–US–01).

Licensing Contact: Marlene Shinn-Astor; (301) 435–4426; *shinnm@mail.nih.gov.*

It is estimated that over 40 percent of the adult population in the United States has periodontal disease in one form or another. Periodontal Disease is a chronic infection of the periodontal ligament (PDL) and the adjacent bone and cementum. The effects of Periodontal Disease range from simple gum inflammation to, in extreme cases, tooth loss.

The NIH announces a new technology wherein stem cells from the PDL have been isolated from adult human PDL. These cells are capable of forming cementum and PDL in immunocompromised mice. In cell culture, PDL stem cells differentiate into collagen fiber forming cells (fibroblasts), cementoblasts, and adipocytes. It is anticipated that these PDL stem cells will be useful for periodontal tissue regeneration to treat periodontal disease.

A Novel Interferon-Gamma-Inducible Secretoglobin

Anil B. Mukherjee *et al.* (NICHD).

U.S. Provisional Application No. 60/534,381 filed 06 Jan 2004 (DHHS Reference No. E–028–2004/0–US–01).

Licensing Contact: Michael Ambrose; (301) 594–6565; *ambrosem@mail.nih.gov.*

Interferons (IFNs) are a family of cytokines that are paramount in protecting the host from viral infections. The effects of the IFNs is mediated through interactions with specific cellular receptors, activation of second messenger systems effecting the expression of several antiviral and immunomodulatory proteins.

This invention describes a novel gene that is induced by IFN-gamma treatment of lymphoblast cells. This gene, termed IIS (IFN-inducible Secretoglobin), is a member of the uteroglobin (UG) superfamily and shares 30% amino acid identity with uteroglobin (UG), the founding member of the secretoglobin family of proteins. Data shows that IIS is expressed in virtually all tissues with highest levels found in lymph nodes, tonsils, lymphoblasts and ovary. IIS levels are also highly elevated in $CD8^+$ and $CD19^+$ cells. In further experiments, antisense-s-oligonucleotides to IIS are shown to prevent chemotactic migration and invasion of immune cells. Taken together, these data give insight into the immunological function of this novel IIS gene.

Method Evolved for Recognition of Thrombophilia (MERT)

Cigdem F. Dogulu *et al.* (NICHD).

DHHS Reference No. E–282–2003/0–US–01 filed 15 Jan 2004.

Licensing Contact: Fatima Sayyid; 301/435–4521; *sayyidf@mail.nih.gov.*

Venous thrombosis affects 1 per 1000 individuals annually and is one of the leading causes of mortality and morbidity resulting in approximately 300,000 hospitalizations and 50,000 fatalities per year in the United States alone.

Although venous thrombosis is one of the leading causes of morbidity and mortality in developed countries, it is an avoidable disease by the use of prophylactic treatment that is currently available. To avoid the development of venous thromboembolism, it is beneficial to estimate the individual thrombotic risk to develop stratification protocols for an individual risk-adapted prophylaxis.

This invention proposes methods to predict an individual's genetic susceptibility to venous thrombosis, as well as arrays and kits that can be used to practice such methods. The method includes screening for combinations of mutations and polymorphisms in venous thrombosis-related molecules such as factor V, prothrombin (factor II), fibrinogen, protein C, protein S, antithrombin III, angiotensin I-converting enzyme (ACE) and methylenetetrahydrofolate reductase (MTHFR) that allow one to predict the genetic susceptibility of an individual to developing venous thrombosis with high accuracy in several ethnic populations.

Stimulation or Inhibition of Gamma Delta T-Cells To Promote or Inhibit Bone Growth

Dr. Nona T. Colburn (NIAMS).

U.S. Provisional Application filed 07 Nov 2003 (DHHS Reference No. E–277–2003/0–US–01).

Licensing Contact: Marlene Shinn-Astor; (301) 435–4426; *shinnm@mail.nih.gov.*

Bone injury is a common occurrence that disables people from working and otherwise carrying on their daily lives and is an important health concern. When fracture healing does not go as intended, the ability of a bone to heal without a scar is lost. This can result in disfigurement, pain, and loss or impairment of bodily function. It has been shown that within the segment of the clinical population afflicted with non-healing fractures, a large number of these non-unions are a direct result of the patient's immune system status. Bone repair involves a series of phases, the first of which is the initial inflammatory phase controlled by the body's innate immune response. Of those first responder cells are the gamma delta T-cells that are capable of recognizing products of cell damage. This technology relates to the stimulation or inhibition of the gamma delta T-cells to modulate bone growth. It is anticipated that the manipulation of the gamma delta T-cell population will reduce the need to perform operations such as bone grafting which are currently used to treat non-unions.

Methods for Inhibiting HIV and Other Viral Infections by Modulating Ceramide Metabolism

Robert Blumenthal, Catherine M. Finnegan (NCI).

U.S. Provisional Application No. 60/528,411 filed 09 Dec 2003 (DHHS Reference No. E–265–2003/0–US–01).

Licensing Contact: Sally Hu; (301) 435–5606; *hus@mail.nih.gov.*

This invention provides methods of inhibiting or preventing HIV–1 infections by inducing either the de novo biosynthesis of ceramide, or by activating enzymes (e.g., sphingomyelinase) involved in the generation of ceramide at the plasma membrane, or by direct incorporation of exogenous ceramide into target cell membranes. The invention describes methods for administration of a retinamide compound, particularly an N–(aryl) retinamide compound such as N–(4–hydroxyphenyl) retinamide (4–HPR) resulting in increased plasma membrane ceramide levels, which results in the inhibition of HIV–1 infection in monocyte/macrophages by perturbing membrane organization. In addition, because of its low toxicity in non-tumor cells, 4–HPR and related compounds are particularly suitable for long-term preventative or therapeutic administration to subjects suffering from an HIV infection or who are at risk of contracting an HIV infection. Thus, this invention provides a novel means of treating or inhibiting HIV and other viral infections by administering a retinamide compound to a patient suffering from or susceptible to such a viral infection.

ELISA Assay of Serum Soluble CD22 To Assess Tumor Burden/Relapse in Subjects With Leukemia and Lymphoma

Robert Kreitman *et al.* (NCI).

PCT Application No. PCT/US03/16298 filed 20 May 2003 (DHHS Reference No. E–065–2002/0–PCT–02), with priority to 20 May 2002.

Licensing Contact: Jesse Kindra; (301) 435–5559; *kindraj@mail.nih.gov.*

Disclosed are methods of using previously unknown soluble forms of CD22 (sCD22) present in the serum of subjects with B-cell leukemias and lymphomas to assess tumor burden in the subjects. Also disclosed are methods of diagnosing or prognosing development or progression of a B-cell lymphoma or leukemia in a subject, including detecting sCD22 in a body fluid sample taken or derived from the subject, for instance, serum. In some embodiments, soluble CD22 levels are quantified. By way of example, the B-cell lymphoma or leukemia can be hairy cell leukemia, chronic lymphocytic leukemia, or non-Hodgkin's lymphoma. Soluble CD22 in some embodiments is detected by a specific binding agent, and optionally, the specific binding agent can be detectably labeled.

Also disclosed are methods of selecting a B-cell lymphoma or leukemia therapy that include detecting an increase or decrease in sCD22 levels in a subject compared to a control, and, if such increase or decrease is identified, selecting a treatment to prevent or reduce B-cell lymphoma or leukemia or to delay the onset of B-cell lymphoma or leukemia.

Other embodiments are kits for measuring a soluble CD22 level, which kits include a specific binding molecule that selectively binds to the CD22, e.g. an antibody or antibody fragment that selectively binds CD22.

Further disclosed methods are methods for screening for a compound useful in treating, reducing, or preventing B-cell lymphomas or leukemias, or development or progression of B-cell lymphomas or leukemias, which methods include determining if application of a test compound lowers soluble CD22 levels in a subject, and selecting a compound that so lowers sCD22 levels.

C–C Chemokines That Inhibit Retrovirus Infection

Paolo Lusso, Robert C. Gallo, Fiorenza Cocchi, Anthony L. De Vico, Alfredo Garzino-Demo (NCI).

PCT Application No. PCT/US96/18993 filed 27 Nov 1996 (DHHS Reference No. E–008–1996/0–PCT–02); U.S. Patent Application No. 09/077,614 filed 29 May 1998 (DHHS Reference No. E–008–1996/0–US–04) (with priority to 30 Nov 1995).

Licensing Contact: Sally Hu; (301) 435–5606; *hus@mail.nih.gov.*

This invention concerns three members of the human C–C chemokine family, RANTES, macrophage inflammatory protein 1alpha (MIP–1alpha) and macrophage inflammatory protein 1beta (MIP–1beta), which are produced and secreted by several cell types, including CD8-positive T lymphocytes, and which act in vitro as HIV suppressive factors. These factors and their respective genes may be used in the diagnosis, prognosis, treatment and prevention of AIDS and other retrovirus-induced diseases. The invention provides a therapeutic preparation, methods for therapeutic and prophylactic treatment of retroviral infection, and a method of prognosis for retroviral infection. The technology was reported in Science 270(8):1560–1561 (December 8, 1995).

Dated: March 18, 2004.

Steven M. Ferguson,

Director, Division of Technology Development and Transfer, Office of Technology Transfer, National Institutes of Health.

National Institute of Diabetes and Digestive and Kidney Diseases; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. appendix 2), notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Diabetes and Digestive and Kidney Diseases Special Emphasis Panel, Extramural Loan Repayment Program.

Date: April 13, 2004.

Time: 2 p.m. to 4 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Two Democracy Plaza, 6707 Democracy Boulevard, Bethesda, MD 20892 (Telephone Conference Call).

Contact Person: D.G. Patel, PhD, Scientific Review Administrator, Review Branch, DEA, NIDDK, National Institutes of Health, Room 747, 6707 Democracy Boulevard, Bethesda, MD 20892, (301) 594–7682, *pateldg@extra.niddk.nih.gov.*

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Prospective Grant of Exclusive License: Methods and Compositions for the Promotion of Hair Growth Utilizing Actin Binding Peptides

AGENCY: National Institutes of Health, Public Health Service, HHS.

ACTION: Notice.

SUMMARY: This is notice, in accordance with 35 U.S.C. 209(c)(1) and 37 CFR 404.7(a)(1)(i), that the National Institutes of Health, Department of Health and Human Services, is contemplating the grant of an exclusive patent license to practice the inventions embodied in U.S. Patent Application 60/351,386 (re-filed), PCT Patent Application No. PCT/US03/01973, filed January 22, 2003 [DHHS Ref. E–053–2002/0–PCT–02], entitled ''Methods and Compositions for the Promotion of Hair Growth Utilizing Actin Binding Peptides,'' to EGB Advisors, LLC, which is located in San Francisco, California. The patent rights in these inventions have been assigned to the United States of America.

The prospective exclusive license territory will be worldwide (with the exception of China, Hong Kong and Taiwan) and the field of use may be limited to the use of actin binding proteins for the development of a topical hydrogel treatment for alopecia to promote hair growth.

DATES: Only written comments and/or applications for a license which are received by the NIH Office of Technology Transfer on or before May 24, 2004, will be considered.

ADDRESSES: Requests for copies of the patent application, inquiries, comments, and other materials relating to the contemplated exclusive license should be directed to: Jesse S. Kindra, J.D., M.S., Technology Licensing Specialist, Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, MD 20852–3804; Telephone: (301) 435–5559; Facsimile: (301) 402–0220; E-mail: *kindraj@mail.nih.gov*.

SUPPLEMENTARY INFORMATION: The technology describes methods and compositions for treating a subject (human or animal) suffering from hair loss. More specifically, the technology relates to the discovery that actin binding peptides promote hair growth. In one example, the technology describes the exogenous delivery of a seven amino acid peptide of Thymosin-4 to promote hair growth.

The prospective exclusive license will be royalty bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless within sixty (60) days from the date of this published notice, the NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

Applications for a license in the field of use filed in response to this notice will be treated as objections to the grant of the contemplated exclusive license. Comments and objections submitted to this notice will not be made available for public inspection and, to the extent permitted by law, will not be released under the Freedom of Information Act, 5 U.S.C. 552.

Dated: March 7, 2004.

Steven M. Ferguson,

Director, Division of Technology Development and Transfer, Office of Technology Transfer, National Institutes of Health.

BILLING CODE 4140–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

National Toxicology Program (NTP); National Institute of Environmental Health Sciences (NIEHS); National Institutes of Health (NIH); NTP Interagency Center for the Evaluation of Alternative Toxicological Methods (NICEATM); Request for Public Comment on the Nomination for Ocular Toxicity Test Methods and Related Activities and Request for Data on Chemicals Evaluated by *In Vitro* or *In Vivo* Ocular Irritancy Test Methods

SUMMARY: On behalf of the Interagency Coordinating Committee on the Validation of Alternative Methods (ICCVAM), NICEATM requests (1) public comment on four test methods for ocular toxicity and related activities nominated to the ICCVAM by the U.S. Environmental Protection Agency (EPA), (2) public comment on ICCVAM's recommended actions for the nomination, and (3) data from completed studies on chemicals and products tested for ocular irritancy using *in vitro* and/or *in vivo* test methods. This data will be used to (1) evaluate the validation status of existing *in vitro* test methods for ocular irritancy/corrosion and (2) develop a list of substances with high quality *in vivo* data that can be considered as reference chemicals for future validation studies.

NICEATM welcomes data generated using standardized *in vitro* test methods used to identify severe, moderate, mild, or non-irritating substances. Test methods for identifying severe (irreversible) ocular irritation/corrosion for which data are sought include, but are not limited to the four methods nominated by the EPA: (1) The Bovine Corneal Opacity and Permeability (BCOP) test, (2) the Isolated Rabbit Eye (IRE) test or the Rabbit Enucleated Eye Test (REET), (3) the Isolated Chicken Eye (ICE) test or the Chicken Enucleated Eye Test (CEET), and (4) the Hen's Egg Test—Chorion Allantoic Membrane (HET–CAM). In addition, high quality data from standardized ocular irritancy test methods using rabbits (*e.g.*, EPA 1998; UN 2003) and *in vivo* data generated from procedures/protocols that might alleviate or reduce pain and suffering (*e.g.*, topical and systemic analgesics) in test animals are requested.

Background Information

The Scientific Advisory Committee on Alternative Toxicological Methods (SACATM) unanimously recommended at its meeting in August 2003 that NICEATM focus efforts on test methods for ocular irritancy and possibly hold a workshop and/or develop a background document on available methods. In October 2003, the EPA nominated the following activities to ICCVAM: (1) Evaluate the validation status of four *in vitro* ocular toxicity test methods: the BCOP, IRE or the REET, ICE or CEET, and HET–CAM, (2) identify and develop *in vivo* ocular toxicity reference data to support the validation of *in vitro* test methods, (3) explore ways of alleviating pain and suffering from current *in vivo* ocular toxicity testing, and (4) review the state of the science and the availability of *in vitro* test methods for assessing mild or moderate ocular irritants. ICCVAM endorsed the review of the methods as a high priority and recommended that NICEATM develop Background Review Documents for BCOP, IRE, ICE, and HET–CAM. ICCVAM also recommended that NICEATM convene an expert panel to independently review the validation status of these four methods and propose standardized protocols for these test methods.

As part of the nomination review process, the NICEATM invites public comments on the EPA nomination to ICCVAM and the ICCVAM's recommended actions. In addition, ICCVAM and NICEATM are collaborating with the European Center for the Validation of Alternative Methods (ECVAM) to evaluate the validation status of *in vitro* methods for assessing ocular irritation/corrosion. In response to the SACATM recommendation, the EPA nomination and ICCVAM's recommended actions, and the NICEATM/ICCVAM collaboration with ECVAM, NICEATM also requests the submission of data from completed studies on chemicals and products tested for ocular irritancy using *in vitro* and/or *in vivo* test methods. This data will be used to evaluate the validation status of existing *in vitro* test methods for ocular irritancy/corrosion and to develop a list of substances with high quality *in vivo* data that can be considered as reference chemicals for future validation studies. Information on the expert panel evaluation(s) will be announced in a future **Federal Register** notice.

Public Comment and Submission of Chemical and Protocol Information and Test Data

Public comment and data and other information submitted in response to this notice should be sent to NICEATM (Dr. William S. Stokes, Director, NICEATM, NIEHS, 79 T.W. Alexander Drive, P.O. Box 12233, MD EC–17, Research Triangle Park, NC 27709, (phone) 919–541–2384, (fax) 919–541–0947, *iccvam@niehs.nih.gov*) and received by May 24, 2004. Data and other information received by this date will be forwarded to the ICCVAM and the ICCVAM Ocular Toxicity Working Group (OTWG) for their consideration. Data and other information received after this date will be periodically compiled and added to the database maintained by NICEATM. All information submitted in response to this notice will be made publicly available upon request to NICEATM.

When submitting data or information on protocols, please reference this **Federal Register** notice and provide appropriate contact information (name, affiliation, mailing address, phone, fax, e-mail, and sponsoring organization, as applicable). NICEATM prefers data to be submitted as copies of pages from applicable study notebooks and/or study reports, if available. Each submission for a chemical should preferably include the following information, as appropriate:

- Common and trade name;
- Chemical Abstracts Service Registry Number (CASRN);
- Chemical and/or product class;
- Commercial source;
- *In vitro* test protocol used;
- Rabbit eye test protocol used;
- Human eye test protocol used;
- Individual animal/human or *in vitro* responses at each observation time (*i.e.*, raw data);
- The extent to which the study complies with national/international Good Laboratory Practice (GLP) guidelines;
- Date and testing organization.

Those persons submitting data on chemicals tested for ocular irritancy in rabbits are referred to the ICCVAM/NICEATM Web site (*http://iccvam.niehs.nih.gov/methods/eyeirrit.htm*) for an example of the type of experimental animal study information and data requested in this notice.

In Vitro Ocular Irritancy Chemical Tests: BCOP, HET–CAM, ICE, and IRE

NICEATM welcomes public comment on and the submission of data from the four *in vitro* test methods used to identify severe (irreversible) ocular irritation/corrosion nominated by the EPA: BCOP, HET–CAM, ICE, and IRE. This information will be used to evaluate the validation status of these test method protocols and to identify any additional development and/or validation that might be helpful in advancing the usefulness of the proposed test methods. ICCVAM anticipates recommending a standardized protocol for each of the four test methods. ICCVAM also will use existing data and protocols as the basis for development of proposed performance standards that structurally and functionally similar test methods should meet or exceed. Because test methods for identifying severe eye irritants/corrosives are of high priority, NICEATM especially requests data on chemicals identified by these four methods as severe irritants, although data on mildly irritating and non-irritating substances also are welcome.

Other _In Vitro_ Ocular Irritancy Methods

NICEATM also requests the submission of data and information for standardized *in vitro* ocular irritancy methods, other than the four identified above, and methods that might accurately identify non-irritating and mild to moderate irritants. Detailed test method protocols and other related information for these potential test methods should be submitted along with the data.

In Vivo Test Methods for Ocular Irritancy

NICEATM requests the submission of high quality *in vivo* data that might be used to identify appropriate reference chemicals for future validation studies of *in vitro* ocular irritancy test methods. This data would be used to construct a database of *in vivo* data to assess interlaboratory variability, as well as to support validation efforts. Data are sought from studies conducted to comply with Federal or other national/international testing requirements, but may not be publicly available because: (1) The data were submitted to regulatory authorities, but are proprietary and cannot be released to the public by regulatory authorities or (2) there is no requirement to submit the data to regulatory authorities. In addition to data from studies in animals, NICEATM also welcomes the submission of data from human studies, including any human post-marketing or occupational exposure/surveillance data that might be available.

Procedures for Reducing or Eliminating Pain and Suffering during _In Vivo_ Ocular Irritancy Testing

NICEATM requests the submission of information and data from *in vivo* methods, procedures, and/or strategies that may reduce or eliminate the pain and suffering associated with current *in vivo* eye irritation methods, such as those using topical or systemic analgesics.

Background Information on ICCVAM and NICEATM

ICCVAM is an interagency committee composed of representatives from 15 Federal regulatory and research agencies that use or generate toxicological information. ICCVAM promotes the development, validation, evaluation, and regulatory acceptance of toxicological test methods that improve agencies' ability to make decisions on health risks, while refining, reducing and replacing animal use wherever possible.

The ICCVAM Authorization Act of 2000 (Pub. L. 106–545, available at *http://iccvam.niehs.nih.gov/about/PL106545.htm*) establishes ICCVAM as a permanent interagency committee of the NIEHS under the NICEATM. NICEATM provides scientific support for ICCVAM and ICCVAM-related activities. NICEATM and ICCVAM work collaboratively to evaluate new and improved test methods applicable to the needs of Federal agencies. Additional information about ICCVAM and

NICEATM can be found at the following Web site: *http://iccvam.niehs.nih.gov.*

BILLING CODE 4140–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Funding Opportunity Title: Notice of Funding Availability (NOFA) for the Drug-Addiction-Treatment-Act-of-2000 (DATA) (Title XXXV of the Children's Health Act of 2000) Physician Clinical Support System (Short Title: DATA Physician Clinical Support System)

Announcement Type: Initial.

Funding Opportunity Number: TI 04–005.

Catalog of Federal Domestic Assistance (CFDA) Number: 93.243.

Due Date for Applications: June 2, 2004.

(**Note:** Letters from State Single Point of Contact (SPOC) in response to E.O. 12372 are due August 1, 2004.)

SUMMARY: The Substance Abuse and Mental Health Services Administration (SAMHSA), Center for Substance Abuse Treatment (CSAT), announces the availability of FY 2004 funds for the Drug-Addiction-Treatment-Act-of-2000 (DATA) (Title XXXV of the Children's Health Act of 2000) Physician Clinical Support System (Short Title: DATA Physician Clinical Support System). A synopsis of this funding opportunity, as well as many other Federal Government funding opportunities, is also available at the Internet site: *http://www.grants.gov.*

For complete instructions, potential applicants must obtain a copy of SAMHSA's standard Infrastructure Grants Program Announcement (INF–04 PA (MOD)), and the PHS 5161–1 (Rev. 7/00) application form before preparing and submitting an application. The INF–04 PA (MOD) describes the general program design and provides instructions for applying for all SAMHSA Infrastructure Grants, including the DATA Physician Clinical Support System. SAMHSA's Infrastructure Grants provide funds to increase the capacity of mental health and/or substance abuse service systems to support effective programs and services. Additional instructions and specific requirements for this funding opportunity are described below.

I. Funding Opportunity Description

Authority: Section 509 of the Public Health Service Act, as amended and subject to the availability of funds.

The purpose of the DATA Physician Clinical Support System cooperative agreement is to develop a coordinated, clinical support program for physicians who are treating addicted patients with buprenorphine products. The target participants for the clinical support system are primary care physicians, pain specialists, psychiatrists and other non-addiction medical practitioners, who are often reluctant to treat addicted patients and are not as familiar with opioid addiction treatment as addictions specialists are. However, addictions specialists will also be encouraged to participate in the DATA Physician Clinical Support System or to serve as mentors.

Applicants are expected to develop a coherent, well-designed program to assist physicians in developing the skills and confidence to treat addicted patients, thereby reducing resistance and barriers to the availability of treatment. By enlisting the assistance of professional medical groups and other organizations, the grantee will offer physicians the information and consultation they need to provide safe and effective buprenorphine treatment.

Applicants must select activities from the following list of infrastructure development activities, as appropriate to their proposed project:

- Provider/network development (*i.e.*, physician clinical support network/system development to inform physicians of established standards of care);
- Organizational/structural change (*e.g.*, to increase access to and efficiency of services);
- Development of the physician workforce;
- Development of interagency coordination mechanisms (between national professional medical organizations or related organizations); and
- Quality improvement efforts.

Applicants must demonstrate the ability to provide consultative services, telephone consultation, on-site training, observation of practice, and peer mentoring to physicians treating patients for opioid addiction. Applicants may propose other activities, such as conducting a limited number of regional meetings or online Web conferences to improve physician workforce performance.

Physician support activities must focus on the following content areas:

- Assessment and diagnosis using the *Diagnostic and Statistical Manual, Fourth Edition, Text Revision* (*DSM–IV–TR*);
- Induction, maintenance, and detoxification protocols;
- Strategies to avoid complications and treat them;
- Ancillary medications;
- Recommended visit and monitoring schedules;
- Special psychosocial strategies on motivating patients, setting limits, or implementing contingency plans;
- Medically supervised withdrawal and opioid withdrawal scales;
- Referrals to counseling, other ancillary services, or self-help groups;
- Diagnosis and treatment of psychiatric co-morbidities or co-occurring disorders, including, but not limited to, chronic pain, poly-substance abuse, hepatitis C and HIV disease;
- HIV screening, counseling, testing, and referrals;
- Referrals to higher levels of care;
- Special needs patients, including pregnant, adolescent, and elderly patients; and
- Important patient recovery indicators.

Background: The need for medication-assisted treatment for opioid addiction greatly exceeds the Nation's treatment capacity. To address this long-standing problem, the Drug Addiction Treatment Act of 2000 (DATA) was enacted to allow trained, qualified physicians to prescribe specifically approved narcotic medications for the treatment of opioid addiction in their offices or settings outside traditional opioid treatment programs.

The Food and Drug Administration approved two brand-name medications containing buprenorphine for this treatment in 2002. SAMHSA was assigned responsibility to assist with training physicians under DATA. Approximately 4,000 physicians have been trained and 2,500 are approved to prescribe these medications. Yet, the stigma of addiction tends to discourage primary care physicians from obtaining training and treating this population.

Also, the lack of physician experience, concerns over practical issues, and limited understanding of the appropriate role of medication in opioid treatment all appear to be factors in the slow adoption of this form of treatment intervention by the medical profession.

II. Award Information

1. *Estimated Funding Available/ Number of Awards:* It is expected that up to $500,000 will be available to fund one award in FY 2004. The maximum allowable award for this Category I—Small Infrastructure Grant Award is $500,000 in total costs (direct and indirect) per year for up to 3 years. Proposed budgets cannot exceed the allowable amount in any year of the proposed project. The actual amount available for the award may vary, depending on unanticipated program requirements and the number and quality of the applications received. Annual continuations will depend on the availability of funds, grantee progress in meeting program goals and objectives, and timely submission of required data and reports.

2. *Funding Instrument:* Cooperative Agreement.

Roles and Responsibilities of Federal Staff: Federal staff members will:

- Participate in the selection of physician and non-physician members of a steering committee that will plan, implement, and coordinate the support system;
- Assist the grantee to plan for health care infrastructure development;
- Help to establish measures of cost-effectiveness;
- Assist the grantee to meet quality improvement goals;
- Ensure that consultation services are provided to the regions of the country with the greatest need;
- Provide advice and assistance in developing the evaluation;
- Foster learning and collaboration and coordinate with other SAMHSA-funded activities, such as the DATA waiver program, the DATA evaluation, and Addiction Technology Transfer Centers (ATTCs); and
- Provide some of the on-site training, observation of practice, consultative services, peer mentoring, and other services envisioned under this program.

The Government Project Officer (GPO) will serve as a voting member of the steering committee, but will not chair the committee.

Roles and Responsibilities of Grantee: The grantee will be required to establish a steering committee to oversee the development of the Physician Clinical Support System and determine the direction of the project. Steering committee membership will be comprised of representatives from participating national professional medical organizations authorized by law to conduct DATA training, other stakeholders, and the GPO. The steering committee will be required to meet, at a minimum, yearly and confer by conference call quarterly to develop strategies to bring the project to fruition. The grantee is also expected to implement and evaluate the program in full cooperation with SAMSHA staff members and contractors. The grantee also will be required to:

- Comply with all aspects of the terms and conditions of the cooperative agreement (to be issued with the award);
- Participate in selecting a chairperson for the steering committee;
- Provide required reports, including those related to the Government Performance and Results Act (GPRA); and
- Respond to requests for information or data related to the program.

III. Eligibility Information

1. *Eligible Applicants:* Eligibility is limited to the national professional medical organizations authorized by DATA to carry out training. These are the American Society of Addiction Medicine, the American Academy of Addiction Psychiatry, the American Medical Association, the American Osteopathic Association, and the American Psychiatric Association. While any of these entities may apply individually, SAMHSA encourages a consortium comprised of all or several eligible organizations to apply. If a consortium is formed for this purpose, a single organization in the consortium must be the legal applicant, the recipient of the award, and the entity legally responsible for satisfying the grant requirements. If a consortium submits an application, the application must include a written agreement outlining the roles and responsibilities of each participating national professional medical organization. This agreement must be signed by an authorized official of each member of the consortium and attached to the application as a new Appendix 4, ''Roles and Responsibilities of Participating National Professional Medical Organizations.'' These eligibility criteria supersede the criteria specified in Section III–1 of the INF–04 PA (MOD).

2. Cost Sharing or Matching is not required.

3. *Other:* Applicants must also meet certain application formatting and submission requirements or the application will be screened out and will not be reviewed. These requirements are described in Section IV–2 below, as well as in the INF–04 PA (MOD).

IV. Application and Submission Information

1. *Address to Request Application Package:* Complete application kits may be obtained from the National Clearinghouse for Alcohol and Drug Information (NCADI) at 1–800–729–6686. When requesting an application kit for this program, the applicant must specify the funding opportunity title (DATA Physician Clinical Support System) and the funding opportunity number (TI 04–005). All information necessary to apply, including where to submit applications and application deadline instructions, is included in the application kit. The PHS 5161–1 application form is also available electronically via SAMHSA's World Wide Web Home Page: *http://www.samhsa.gov/* (Click on 'Grant Opportunities') and the INF–04 PA (MOD) is available electronically at *http://www.samhsa.gov/grants/2004/standard/Infrastructure/index.asp.*

When submitting an application, be sure to type ''TI 04–005, DATA Physician Clinical Support System'' in Item Number 10 on the face page of the application form. Also, SAMHSA applicants are required to provide a DUNS Number on the face page of the application. To obtain a DUNS Number, access the Dun and Bradstreet Web site at *http://www.dunandbradstreet.com* or call 1–866–705–5711.

2. *Content and Form of Application Submission:* Information including required documents, required application components, and application formatting requirements is available in the INF–04 PA (MOD) in Section IV–2.

Checklist for Formatting Requirements and Screenout Criteria for SAMHSA Grant Applications

SAMHSA's goal is to review all applications submitted for grant funding. However, this goal must be balanced against SAMHSA's obligation to ensure equitable treatment of applications. For this reason, SAMHSA has established certain formatting requirements for its applications. If you do not adhere to these requirements, your application will be screened out and returned to you without review.

☐ Use the PHS 5161–1 application.

☐ Applications must be received by the application deadline. Applications received after this date must have a proof of mailing date from the carrier dated at least 1 week prior to the due

date. Private metered postmarks are not acceptable as proof of timely mailing. Applications not received by the application deadline or not postmarked at least 1 week prior to the application deadline will not be reviewed.

☐ Information provided must be sufficient for review.

☐ Text must be legible.

• Type size in the Project Narrative cannot exceed an average of 15 characters per inch, as measured on the physical page. (Type size in charts, tables, graphs, and footnotes will not be considered in determining compliance.)

• Text in the Project Narrative cannot exceed 6 lines per vertical inch.

☐ Paper must be white paper and 8.5 inches by 11.0 inches in size.

☐ To ensure equity among applications, the amount of space allowed for the Project Narrative cannot be exceeded.

• Applications would meet this requirement by using all margins (left, right, top, bottom) of at least one inch each, and adhering to the page limit for the Project Narrative stated in the INF–04 PA (MOD).

• Should an application not conform to these margin or page limits, SAMHSA will use the following method to determine compliance: The total area of the Project Narrative (excluding margins, but including charts, tables, graphs and footnotes) cannot exceed 58.5 square inches multiplied by the page limit. This number represents the full page less margins, multiplied by the total number of allowed pages.

• Space will be measured on the physical page. Space left blank within the Project Narrative (excluding margins) is considered part of the Project Narrative, in determining compliance.

☐ The page limit for Appendices stated in the INF–04 PA (MOD) cannot be exceeded.

To facilitate review of your application, follow these additional guidelines. Failure to adhere to the following guidelines will not, in itself, result in your application being screened out and returned without review. However, the information provided in your application must be sufficient for review. Following these guidelines will help ensure your application is complete, and will help reviewers to consider your application.

☐ The 10 application components required for SAMHSA applications should be included. These are:

• Face Page (Standard Form 424, which is in PHS 5161–1)

• Abstract

• Table of Contents

• Budget Form (Standard Form 424A, which is in PHS 5161–1)

• Project Narrative and Supporting Documentation

• Appendices

• Assurances (Standard Form 424B, which is in PHS 5161–1)

• Certifications (a form in PHS 5161–1)

• Disclosure of Lobbying Activities (Standard Form LLL, which is in PHS 5161–1)

• Checklist (a form in PHS 5161–1)

☐ Applications should comply with the following requirements:

• Provisions relating to confidentiality, participant protection and the protection of human subjects, as indicated in the INF–04 PA (MOD).

• Budgetary limitations as indicated in Sections I, II, and IV–5 of the INF–04 PA (MOD).

• Documentation of nonprofit status as required in the PHS 5161–1.

☐ Pages should be typed single-spaced with one column per page.

☐ Pages should not have printing on both sides.

☐ Please use black ink, and number pages consecutively from beginning to end so that information can be located easily during review of the application. The cover page should be page 1, the abstract page should be page 2, and the table of contents page should be page 3. Appendices should be labeled and separated from the Project Narrative and budget section, and the pages should be numbered to continue the sequence.

☐ Send the original application and two copies to the mailing address in the funding announcement. Please do not use staples, paper clips, and fasteners. Nothing should be attached, stapled, folded, or pasted. Do not use heavy or lightweight paper, or any material that cannot be copied using automatic copying machines. Odd-sized and oversized attachments such as posters will not be copied or sent to reviewers. Do not include videotapes, audiotapes, or CD–ROMs.

3. *Submission Dates and Times:* Applications must be received by June 2, 2004. You will be notified by postal mail that your application has been received. Additional submission information is available in the INF–04 PA (MOD) in Section IV–3.

4. *Intergovernmental Review:* Because the DATA Physician Clinical Support System program is national in scope, applicants are not required to comply with the requirements of Executive Order 12372 or the Public Health System Impact Statement (PHSIS) as detailed in Section IV–4 of the INF–04 PA (MOD).

5. *Funding Restrictions:* Information concerning funding restrictions is available in the INF–04 PA (MOD) in Section IV–5. Funds for the DATA Physician Clinical Support System program may not be used for the following activities allowed in the INF 04–PA (MOD) in Section I–2:

• Needs assessment;

• Strategic planning;

• Financing/coordination of funding streams;

• Policy development to support needed service improvements (*e.g.*, rate-setting activities, establishment of standards of care, development/revision of credentialing, licensure, or accreditation requirements);

• Performance measurement development; or

• Data infrastructure/MIS development.

In addition, the grantee may not use funds for training physicians to qualify for the DATA waiver. SAMHSA already has adequate mechanisms in place to subsidize the 8-hour training that is required for some candidates to meet DATA qualification requirements.

V. Application Review Information

1. *Evaluation Criteria:* Applications will be reviewed against the Evaluation Criteria and requirements for the Project Narrative specified in the INF–04 PA (MOD). The following information describes the exceptions or limitations to the INF–04 PA (MOD) and provides special requirements that pertain only to the DATA Physician Clinical Support System program. Applicants for the DATA Physician Clinical Support System program are required to discuss the following requirements in their applications, in addition to the requirements specified in the INF–04 PA (MOD):

1.1 In ''Section A: Statement of Need'':

a. Applicants must address the issues/needs of the target population. The target population for this program is the population of persons with opioid addiction disorders. The catchment area is the Nation as a whole.

b. Applicants do not have to respond to the fourth bullet, which requires applicants to ''* * * show that identified needs are consistent with priorities of the State or county that has primary responsibility for the service delivery system.''

1.2 In ''Section B: Proposed Approach':

Applicants must describe how stakeholders and other organizations that choose to participate in the proposed project will collaborate with each other in implementing the DATA Physician Clinical Support System.

1.3 Applicants must provide ''Roles and Responsibilities of Participating

National Professional Medical Organizations,'' as a new Appendix 4 of the application rather than the Letter to the SSA as described in Section IV–2.2 in the INF–04 PA (MOD).

1.4 Applicants do not have to include Appendix 5, Copy of State or County Strategic Plan, as specified in the INF–04 PA (MOD) in their applications.

1.5 Performance Measurement: All SAMHSA grantees are required to collect and report certain data so that SAMHSA can meet its obligations under the Government Performance and Results Act (GPRA). The DATA Physician Clinical Support System grantee will be required to report on the following:

- Number of consultation events, training events, technical assistance events or contacts;
- Number of physicians participating in each event;
- Percentage of physicians satisfied with educational and support services offered; and
- Percentage of physicians who report that consultation or training events resulted in appropriate practice change(s).

Applicants must document their ability to collect and report on these measures in ''Section D: Evaluation and Data.'' The grantee will be required to use the relevant data collection instruments approved by OMB for collecting customer satisfaction data, *e.g.*, the CSAT Baseline Meeting Satisfaction Survey, the CSAT Follow-up Meeting Satisfaction Survey, the CSAT Baseline Training Satisfaction Survey, or the CSAT Follow-up Training Satisfaction Survey. These instruments are available at *http://www.csat-gpra.samhsa.gov/knowledge.cfm.* Hard copies of the instruments are available in the application kits distributed by SAMHSA's National Clearinghouse for Alcohol and Drug Information (NCADI). Training and technical assistance on data collection and entry will be provided by CSAT.

2. *Review and Selection Process:* Information about the review and selection process is available in the INF–04 PA (MOD) in Section V–2.

VI. Award Administration Information

Award administration information, including award notices, administrative and national policy requirements, and reporting requirements are available in the INF–04 PA (MOD) in Section VI. SAMHSA's standard terms and conditions are available at *http://www.samhsa.gov/grants/2004/useful_info.asp.*

VII. Agency Contact for Additional Information

For questions concerning program issues, contact: Raymond Hylton, RN, MSN, SAMHSA/Center for Substance Abuse Treatment, DPT, 5600 Fishers Lane, Rockwall II, Suite 618, Rockville, MD 20857; 301–443–6502; e-mail: *rhylton@samhsa.gov.*

For questions on grants management issues, contact: Kathleen Sample, SAMHSA/Division of Grants Management, 5600 Fishers Lane, Rockwall II, Suite 630, Rockville, MD 20857; (301) 443–9667; e-mail: *ksample@samhsa.gov.*

Daryl Kade,

Director, Office of Policy, Planning and Budget, Substance Abuse and Mental Health Services Administration.

[FR Doc. 04–6486 Filed 3–23–04; 8:45 am]

BILLING CODE 4162–20–P

DEPARTMENT OF HOMELAND SECURITY

Bureau of Citizenship and Immigration Services

Agency Information Collection Activities: Proposed Collection; Comment Request

Action: Notice of information collection under review: application for issuance or replacement of Northern Mariana Card.

The Department of Homeland Security, Bureau of Citizenship and Immigration Services (CIS), has submitted the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. The information collection was previously published in the **Federal Register** on January 13, 2004, at 69 FR 1990, allowing for a 60-day public comment period. No comments were received by the CIS on this proposed information collection.

The purpose of this notice is to allow an additional 30 days for public comments. Comments are encouraged and will be accepted until April 23, 2004. This process is conducted in accordance with 5 CFR 1320.10.

Written comments and/or suggestions regarding the items contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention: Department of Homeland Security Desk Officer, 725 17th Street, NW., Room 10235, Washington, DC 20530.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of this information collection:

(1) *Type of Information Collection:* Extension of currently approved collection.

(2) *Title of the Form/Collection:* Application for Issuance or Replacement of Northern Mariana Card.

(3) *Agency Form Number, if any, and the Applicable Component of the Department of Homeland Security Sponsoring the Collection:* Form I–777, Program and Regulation Development, Citizenship and Immigration Services.

(4) *Affected Public who will be Asked or Required to Respond, as well as a Brief Abstract: Primary:* Individuals or households. This information collection is used by applicants to apply for a Northern Mariana identification card if they received United States citizenship pursuant to Public Law 94–241 (Covenant to Establish a Commonwealth of the Northern Mariana Island).

(5) *An Estimate of the Total Number of Respondents and the Amount of Time Estimated for an Average Respondent to Respond:* 100 responses at 30 minutes (.50 hours) per response.

(6) An estimate of the total public burden (in hours) associated with the collection: 50 annual burden hours.

If you have additional comments, suggestions, or need a copy of the proposed information collection instrument with instructions, or additional information, please contact Richard A. Sloan 202–514–3291, Director, Regulations and Forms

Services Division, Bureau of Citizenship and Immigration Services, Room 4034, 425 I Street, NW., Washington, DC 20536. Additionally, comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time may also be directed to Mr. Richard A. Sloan.

If additional information is required contact: Mr. Steve Cooper, PRA Clearance Officer, Department of Homeland Security, Office of Chief Information Officer, Regional Office Building 3, 7th and D Streets, SW., Suite 4626–36, Washington, DC 20202.

Dated: March 18, 2004.

Richard A. Sloan,

Department Clearance Officer, Department of Homeland Security, Bureau of Citizenship and Immigration Services.

[FR Doc. 04–6514 Filed 3–23–04; 8:45 am]

BILLING CODE 4410–10–M

DEPARTMENT OF HOMELAND SECURITY

Citizenship and Immigration Services Bureau

Agency Information Collection Activities: Comments Request

ACTION: Request OMB emergency approval; application for status as temporary resident under section 245A of the Immigration and Nationality Act (Form I–687).

The Department of Homeland Security (DHS) and the U.S. Citizenship and Immigration Services (CIS) has submitted an emergency information collection request (ICR) utilizing emergency review procedures, to the Office of Management and Budget (OMB) for review and clearance in accordance with section 1320.13 (a)(1)(ii) and (a)(2)(iii) of the Paperwork Reduction Act of 1995. The DHS has determined that it cannot reasonably comply with the normal clearance procedures under this part because normal clearance procedures are reasonably likely to prevent or disrupt the collection of information. Therefor, immediate OMB approval has been requested. If granted, the emergency approval is only valid for 180 days. All comments and/or questions pertaining to this pending request for emergency approval must be directed to OMB, Office of Information and Regulatory Affairs, Attention: Ms. Karen Lee, Department of Homeland Security Desk Officer, 725-17th Street, NW., Suite 10235, Washington, DC 20503; 202–395–5806.

During the first 60 days of this same period, a regular review of this information collection is also being undertaken. During the regular period, the DHS requests written comments and suggestions from the public and affected agencies concerning this the information collection. Comments are encouraged and will be accepted until May 24, 2004. During 60-day regular review, all comments and suggestions, or questions regarding additional information, to include obtaining a copy of the information collection instrument with instructions, should be directed to Mr. Richard A. Sloan, 202–514–3291, Director, Regulations and Forms Services Division, Department of Homeland Security, Room 4034, 425 I Street, NW., Washington, DC 20536. Written comments and suggestions from the public and affected agencies concerning the proposed collection of information should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology *e.g.*, permitting electronic submission of responses.

Overview of this information collection:

(1) *Type of Information Collection:* Reinstatement with changes to a previously approved collection for which approval has expired.

(2) *Title of the Form/Collection:* Application for Status as Temporary Resident under Section 245A of the Immigration and Nationality Act.

(3) *Agency Form Number, if Any, and the Applicable Component of the Department of Homeland Security Sponsoring the Collection:* Form I–687. Bureau of Citizenship and Immigration Services.

(4) *Affected Public Who Will be Asked or Required to Respond, as Well as a Brief Abstract: Primary:* Individuals and households. The collection of information on Form I–687 is required to verify the applicant's eligibility for temporary status, and if the applicant is deemed eligible, to grant him or her the benefit sought.

(5) *An Estimate of the Total Number of Respondents and the Amount of Time Estimated for an Average Respondent to Respond:* 100,000 responses at 1 hour and 10 minutes (1 .16 hours) per response.

(6) *An Estimate of the Total Public Burden (in Hours) Associated with the Collection:* 116,000 annual burden hours.

If additional information is required contact: Mr. Steve Cooper, PRA Clearance Officer, Department of Homeland Security, Office of Chief Information Officer, Regional Office Building 3, 7th and D Streets, SW., Suite 4636–26, Washington, DC 20202.

Dated: March 18, 2004.

Richard A. Sloan,

Department Clearance Officer, Department of Homeland Security, Citizenship and Immigration Services.

BILLING CODE 4410–10–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Endangered Species Recovery Permit Applications

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of permit applications.

SUMMARY: The following applicants have applied for a scientific research permit to conduct certain activities with endangered species pursuant to section 10(a)(1)(A) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*). The U.S. Fish and Wildlife Service (''we'') solicits review and comment from local, State, and Federal agencies, and the public on the following permit requests.

DATES: Comments on these permit applications must be received on or before April 23, 2004.

ADDRESSES: Written data or comments should be submitted to the U.S. Fish and Wildlife Service, Chief, Endangered Species, Ecological Services, 911 NE. 11th Avenue, Portland, Oregon 97232–4181 (fax: 503–231–6243). Please refer to the respective permit number for each application when submitting comments. All comments received, including names and addresses, will become part of the official administrative record and may be made available to the public.

FOR FURTHER INFORMATION CONTACT: Documents and other information

submitted with these applications are available for review, subject to the requirements of the Privacy Act and Freedom of Information Act, by any party who submits a written request for a copy of such documents within 30 days of the date of publication of this notice to the address above (telephone: 503–231–2063). Please refer to the respective permit number for each application when requesting copies of documents.

SUPPLEMENTARY INFORMATION:

Permit No. TE–778195

Applicant: Helix Environmental Planning, Inc., La Mesa, California.

The permittee requests an amendment to take (harass by survey and monitor nests) the southwestern willow flycatcher (*Empidonax traillii extimus*) in conjunction with demographic studies throughout the range of the species in California for the purpose of enhancing its survival.

Permit No. TE–082916

Applicant: Kelly Garron, Fullerton, California.

The applicant requests a permit to take (harass by survey, capture, mark, release, and recapture) the Mohave tui chub (*Gila bicolor mohavensis*) in conjunction with population assessments in San Bernardino County, California, for the purpose of enhancing its survival.

Permit No. TE–016443

Applicant: Angeles National Forest, Arcadia, California.

The permittee requests an amendment to take (harass by survey) the mountain yellow-legged frog (*Rana mucosa*) in conjunction with demographic studies in Los Angeles, Ventura, and San Bernardino Counties, California, for the purpose of enhancing its survival.

Permit No. TE–815144

Applicant: Rosemary Thompson, Santa Barbara, California.

The permittee requests an amendment to take (harass by survey) the unarmored threespine stickleback (*Gasterosteus aculeatus williamsoni*) in conjunction with demographic studies in Santa Barbara County, California, for the purpose of enhancing its survival.

Permit No. TE–827493

Applicant: Brian Leatherman, Yorba Linda, California.

The permittee requests an amendment to take (monitor nests) the least Bell's vireo (*Vireo pusillus bellii*) in conjunction with demographic studies throughout the range of the species in California for the purpose of enhancing its survival.

Permit No. TE–082557

Applicant: Julie McGuigan, Los Osos, California.

The applicant requests a permit to take (harass by survey and capture) the Morro shoulderband snail (*Helminthoglypta walkeriana*) in conjunction with surveys in San Luis Obispo County, California, for the purpose of enhancing its survival.

Permit No. TE–083348

Applicant: San Bernardino County Department of Public Works, San Bernardino, California.

The applicant requests a permit to take (harass by survey) the southwestern willow flycatcher (*Empidonax traillii extimus*), take (monitor nests) the least Bell's vireo (*Vireo pusillus bellii*), and take (capture, handle, translocate, and release) the San Bernardino kangaroo rat (*Dipodomys merriami parvus*) in conjunction with demographic studies in San Bernardino County, California, for the purpose of enhancing their survival.

Permit No. TE–009015

Applicant: Jason Berkley, Diamond Bar, California.

The permittee requests an amendment to take (monitor nests) the least Bell's vireo (*Vireo pusillus bellii*) in conjunction with demographic studies throughout the range of the species in California for the purpose of enhancing its survival.

Permit No. TE–083783

Applicant: Debra Ayres, Davis, California.

The applicant requests a permit to remove/reduce to possession (collect plants and seeds) *Cordylanthus palmatus* (palmate-bracted bird's-beak) in conjunction with research in Yolo, Colusa, Alameda, Fresno, and Sacramento Counties, California, for the purpose of enhancing its survival.

Permit No. TE–082909

Applicant: Melanie S. Johnson, San Diego, California.

The applicant requests a permit to take (harass by survey) the Conservancy fairy shrimp (*Branchinecta conservatio*), the longhorn fairy shrimp (*Branchinecta longiantenna*), the Riverside fairy shrimp (*Streptocephalus wootoni*), the San Diego fairy shrimp (*Branchinecta sandiegonensis*), and the vernal pool tadpole shrimp (*Lepidurus packardi*) in conjunction with surveys throughout the range of each species in California for the purpose of enhancing their survival.

Permit No. TE–083473

Applicant: California Army National Guard, Camp Roberts, California.

The applicant requests a permit to take (harass by survey and capture) the Morro shoulderband snail (*Helminthoglypta walkeriana*) in conjunction with surveys in San Luis Obispo County, California, for the purpose of enhancing its survival.

We solicit public review and comment on each of these recovery permit applications.

Dated: March 9, 2004.

D. Kenneth McDermond,

Acting Manager, California/Nevada Operations Office, Region 1, U.S. Fish and Wildlife Service.

Endangered Species Recovery Permit Applications

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of permit applications.

SUMMARY: The following applicants have applied for a scientific research permit to conduct certain activities with endangered species pursuant to section 10(a)(1)(A) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*). The U.S. Fish and Wildlife Service (''we'') solicits review and comment from local, State, and Federal agencies, and the public on the following permit requests.

DATES: Comments on these permit applications must be received on or before April 23, 2004.

ADDRESSES: Written data or comments should be submitted to the U.S. Fish and Wildlife Service, Chief, Endangered Species, Ecological Services, 911 NE. 11th Avenue, Portland, Oregon 97232–4181 (fax: 503–231–6243). Please refer to the respective permit number for each application when submitting comments. All comments received, including names and addresses, will become part of the official administrative record and may be made available to the public.

FOR FURTHER INFORMATION CONTACT: Documents and other information submitted with these applications are available for review, subject to the requirements of the Privacy Act and Freedom of Information Act, by any party who submits a written request for

a copy of such documents within 30 days of the date of publication of this notice to the address above (telephone: 503–231–2063). Please refer to the respective permit number for each application when requesting copies of documents.

SUPPLEMENTARY INFORMATION:

Permit No. TE–068142

Applicant: The University of Hawaii, Honolulu, Hawaii.

The applicant requests a permit to take (collect) the Blackburn's sphinx moth (*Manduca blackburni*) in conjunction with captive propagation and genetic research throughout the range of the species for the purpose of enhancing its survival.

Permit No. TE–702631

Applicant: Regional Director, Region 1, U.S. Fish and Wildlife Service, Portland, Oregon.

The permittee requests an amendment to take the Rota bridled white eye (*Zosterops rotensis*) in conjunction with recovery efforts throughout the range of the species for the purpose of enhancing its propagation and survival.

Permit No. TE–082914

Applicant: David Bainbridge, Verona, Illinois.

The applicant requests a permit to purchase, in interstate commerce, one female and one male captive bred Hawaiian (=nene) goose (*Branta* [=*Nesochen*] *sandvicensis*) for the purpose of enhancing its survival. This notification covers activities conducted by the applicant over the next 5 years.

We solicit public review and comment on each of these recovery permit applications.

Dated: March 5, 2004.

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Receipt of Applications for Incidental Take Permits by 23 Applicants for Proposed Single Family and Duplex Residential Construction on the Fort Morgan Peninsula, Baldwin County, AL

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability of applications for incidental take permits, habitat conservation plans and environmental assessment.

SUMMARY: Mr. Doug Calhoun, Dr. Blaine Crum, D.F. Investments, Mr. Frank Ellis, Fort Morgan Beach House, Mr. Richard Garcia, Cindy and Charles Gordon, Mrs. Virginia Grace, Mr. John Gulas, Harris Building & Investment, Mr. Richard Marty, Mr. Greg Miller (1 Duplex), Mr. Greg Miller (4 Duplexes), Mr. Gerald Nasello, Mr. Ronald Jones, Ms. Sheila Rains, Mr. George Roberds, Mr. Walter Ruzec, Mr. Daniel Sizemore, Mr. Barry Stevens, Mr. Raymond Suggs, Mr. Raymond Waddell, and Mr. Brad Williamson have applied to the U.S. Fish and Wildlife Service (FWS) for incidental take permits (ITP) pursuant to section 10(a)(1)(B) of the Endangered Species Act of 1973 (16 U.S. C. 1531 *et seq.*), as amended (Act) for the take of the Alabama beach mouse (*Peromyscus polionotus ammobates*)(ABM). The proposed take would be incidental to the otherwise lawful activity of constructing 29 single family and duplex residences on the Fort Morgan Peninsula, Alabama.

The applicants have prepared Habitat Conservation Plans (HCP) in accordance with section 10(a)(2)(A) of the Act specifying, among other things, the impacts that are likely to result from the taking and the measures each Applicant will take to minimize and mitigate such impacts. A detailed description of the proposed minimization and mitigation measures is provided in the Applicant's HCPs, and our Environmental Assessment (EA).

The proposed action would involve approval of the HCPs if the statutory issuance criteria are satisfied. The draft EA considers the environmental impacts of the proposed projects on, including but not limited to, endangered and threatened species. A detailed description of the mitigation and minimization measures to address the effects of the project to the ABM and a discussion of the conservation measures taken to preclude take of sea turtles is provided in the Applicants' HCPs, and our Environmental Assessment.

DATES: Written comments on the ITP applications, HCPs, and EA should be sent to the Service's Regional Office (see **ADDRESSES**) and should be received on or before April 23, 2004.

ADDRESSES: Persons wishing to review the applications, HCPs, and EA may obtain an electronic copy on compact disk by writing the Service's Southeast Regional Office, Atlanta, Georgia, at the address below. Documents will also be available for public inspection by appointment during normal business hours at the Regional Office, 1875 Century Boulevard, Suite 200, Atlanta, Georgia 30345 (Attn: Endangered Species Permits), or the Daphne Ecological Services Field Office, 1208–B Main Street, Daphne, Alabama 36526. Written data or comments concerning the application or HCP should be submitted to the Regional Office. Please reference the ITP for 23 applicants for residential development, Batch I, in requests for the documents discussed herein.

FOR FURTHER INFORMATION CONTACT: Mr. Aaron Valenta, Regional HCP Coordinator (see **ADDRESSES** above), telephone: 404/679–4144, or Ms. Barbara Allen, Fish and Wildlife Service Biologist, Daphne Field Office (*see* **ADDRESS** above), telephone: 251/441–5873.

SUPPLEMENTARY INFORMATION:

Public Comments Solicited

We announce the availability of an EA and HCPs/Applications for Incidental Take. The EA is a combined assessment addressing the environmental impacts associated with these projects both individually and cumulatively. Copies of the EA and the individual HCPs may be obtained by making a request to the Regional Office (*see* **ADDRESSES**). Requests should be in writing. This notice advises the public that we have opened the comment period on the permit applications and the EA. The permit applications each include HCPs. This notice is provided pursuant to Section 10 of the Act and National Environmental Policy Act regulations (40 CFR 1506.6).

We specifically request information, views, and opinions from the public on the Federal action, including the identification of any other aspects of the human environment not already identified in our EA. Further, we specifically solicit information regarding the adequacy of the HCPs as measured against our ITP issuance criteria found in 50 CFR parts 13 and 17.

If you wish to comment, you may submit comments by any one of several methods. Please reference ITP for 23 applicants for residential development, Batch I, in such comments. You may mail comments to our Regional Office (*see* **ADDRESSES**). You may also comment via the Internet to *aaron_valenta@fws.gov.* Please submit comments over the Internet as an ASCII file avoiding the use of special characters and any form of encryption. Please also include your name and return mailing address in your Internet message. If you do not receive a confirmation from us that we have

received your internet message, contact us directly at either telephone number listed (*see* **FURTHER INFORMATION**).

Finally, you may hand deliver comments to either Service office listed (*see* **ADDRESSES**). Our practice is to make comments, including names and home addresses of respondents, available for public review during regular business hours. Individual respondents may request that we withhold their home address from the administrative record. We will honor such requests to the extent allowable by law. There may also be other circumstances in which we would withhold from the administrative record a respondent's identity, as allowable by law. If you wish us to withhold your name and address, you must state this prominently at the beginning of your comments. We will not, however, consider anonymous comments. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public inspection in their entirety.

Background

The EA considers the direct, indirect, and cumulative effects of the proposed incidental take and the measures that will be implemented to minimize and mitigate such impacts. The EA contains an analysis of three alternatives for each site, including: (1) No Action Alternative; (2) development with wholesale clearing, grading and formal landscaping; and (3) the Applicant's preferred alternative. Under Alternative 1, we would not issue the ITPs and no new construction would result. Alternative 2 would result in the construction of single family and duplex residences and the loss of 16.24 acres of ABM habitat. Alternative 3 would result in a loss of 2.72 acres consisting of the footprint of the residences and access driveways. Project effects are considered in the EA in terms of affected environment, environmental consequences, and cumulative effects to the human and natural environment.

The ABM is one of eight subspecies of the old field mouse restricted to coastal habitats. The Service estimates that ABM historically occupied approximately 45 km (28 mi) of shoreline and currently occupy approximately 37 kilometers (23 miles) of shoreline.

We believe that ABM utilize approximately 2,697 acres of lands which we have identified as ABM habitat. We have determined that these sites provide suitable habitat for ABM because they provide the following:

1. Cover or shelter;
2. food, water, air, light, minerals, or other nutritional or physiological requirements;
3. sites for breeding and rearing offspring.

Under the Preferred Alternative, project development will result in the loss of 2.72 acres of ABM habitat. Thus, this action will result in the loss of approximately 0.011 percent of the total estimated ABM habitat of 2,697 acres.

The EA considers the potential effects of the proposed projects on the ABM. Construction activities associated with site preparation, heavy equipment operations, and site alterations within habitat occupied by ABM may impact individual ABM by crushing or entombing them in their burrows, or by impairing essential breeding, feeding, or sheltering behaviors. The additional residences also increase the risk of competitors and predators of ABM such as house cats and non-native mice.

The EA considers the potential effects of the projects on nesting sea turtles. The green sea turtle has a circumglobal distribution and is found in tropical and sub-tropical waters. The Florida population of this species is federally listed as endangered; elsewhere the species is listed as threatened. Primary nesting beaches in the southeastern United States occur in a six-county area of east-central and southeastern Florida, where nesting activity ranges from approximately 350–2,300 nests annually. Our turtle nesting surveys of the Fort Morgan Peninsula, from Laguna Key west to Mobile Point, for the period 1994–2001 have not confirmed any green turtle nests, though some crawls were suspected in 1999 and 2000.

The loggerhead turtle is listed as a threatened species throughout its range. This species is circumglobal, preferring temperate and tropical waters. In the southeastern United States, 50,000 to 70,000 nests are deposited annually, about 90 percent of which occur in Florida. Most nesting in the Gulf outside of Florida appears to be in the Chandeleur Islands of Louisiana; Ship, Horn and Petit Bois Islands in Mississippi; and the Gulf-fronting sand beaches of Alabama. The Service's nesting surveys of the Fort Morgan Peninsula, from Laguna Key to Mobile Point, for the 2001 report included over 70 loggerhead turtle nests. During the 2002 nesting season, 63 nests were documented along the Alabama coast.

The Kemps ridley sea turtle is an endangered species throughout its range. Adults are found mainly in the Gulf of Mexico. Immature turtles can be found along the Atlantic coast as far north as Massachusetts and Canada. The species' historic range is tropical and temperate seas in the Atlantic Basin and in the Gulf of Mexico. Nesting occurs primarily in Tamaulipas, Mexico, but occasionally also in Texas and other southern states, including an occasional nest in North Carolina. In 1999, a Kemps ridley sea turtle nested on Bon Secour National Wildlife Refuge and another along the Gulf Islands National Seashore in Perdido Key, Florida. In 2001, two dead Kemps ridley sea turtle hatchlings were recovered, one on Bon Secour National Wildlife Refuge, and the second in Gulf Shores, Alabama.

Conservation measures, such as sea-turtle friendly lighting, removal of beach furniture from beaches during nesting season, and allowing volunteers to mark and monitor nests on each of the properties have been incorporated into each of the applicant's HCPs. These measures are expected to preclude any take of sea turtles.

Under section 9 of the Act and its implementing regulations, ''taking'' of endangered and threatened wildlife is prohibited. However, we, under limited circumstances, may issue permits to take such wildlife if the taking is incidental to and not the purpose of otherwise lawful activities. The Applicants have prepared HCPs which include measures for the long-term protection, management, and enhancement of ABM habitat as required for the incidental take permit application as part of the proposed project.

We will evaluate whether the issuance of the section 10(a)(1)(B) ITPs complies with section 7 of the Act by conducting an intra-Service section 7 consultation. The results of the biological opinion, in combination with the above findings, will be used in the final analysis to determine whether or not to issue the ITPs.

Dated: February 20, 2004.

J. Mitch King,

Acting Regional Director, Fish and Wildlife Service.

BILLING CODE 4310–55–U

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Draft Recovery Plan for the Newcomb's Snail (*Erinna newcombi*)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: The U.S. Fish and Wildlife Service (''we'') announces the

availability for public review of a draft recovery plan for the Newcomb's snail (*Erinna newcombi*). This aquatic snail is listed as threatened (65 FR 4162) and is endemic to the Hawaiian Island of Kaua'i.

DATE: Comments on the draft recovery plan must be received on or before May 24, 2004 to receive our consideration.

ADDRESSES: Copies of the draft recovery plan and supporting documents are available for inspection, by appointment, during normal business hours at the following locations: U.S. Fish and Wildlife Service, Pacific Islands Fish and Wildlife Office, 300 Ala Moana Boulevard, Room 3–122, Honolulu, Hawaii 96850 (telephone 808–792–9400) and Hawaii State Library, 478 S. King Street, Honolulu, Hawaii 96813. Requests for copies of the draft recovery plan and written comments and materials regarding this plan should be addressed to Gina Schultz, Acting Field Supervisor, Ecological Services, at the above Pacific Islands Fish and Wildlife Office address. An electronic copy of the draft recovery plan is also available at: *http://endangered.fws.gov/recovery/index.html#plans* (however, due to a temporary interruption in our Internet Service, access to our Website may not be possible).

FOR FURTHER INFORMATION CONTACT: Gordon Smith, Fish and Wildlife Biologist, at the above U.S. Fish and Wildlife Service address.

SUPPLEMENTARY INFORMATION:

Background

Recovery of endangered or threatened animals and plants is a primary goal of our endangered species program and the Endangered Species Act (Act) (16 U.S.C. 1531 *et seq.*). Recovery means improvement of the status of listed species to the point at which listing is no longer appropriate under the criteria set out in section 4(a)(1) of the Act. Recovery plans describe actions considered necessary for the conservation of the species, establish criteria for downlisting or delisting listed species, and estimate time and cost for implementing the measures needed for recovery.

The Act requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act requires that public notice and an opportunity for public review and comment be provided during recovery plan development. We will consider all information presented during the public comment period prior to approval of each new or revised recovery plan. Substantive technical comments may result in changes to the recovery plan. Substantive comments regarding recovery plan implementation may not necessarily result in changes to the recovery plan, but will be forwarded to appropriate Federal or other entities so that they can take these comments into account during the course of implementing recovery actions. Individual responses to comments will not be provided.

The Newcomb's snail is an aquatic snail and is known to occur at 10 small locations in streams and springs located in 6 watersheds found in the mountainous interior of the Hawaiian Island of Kaua'i. The Newcomb's snail is a freshwater snail belonging to the lymnaeid family. Adult Newcomb's snails are approximately 6 millimeters (0.25 inches) long, and 3 millimeters (0.12 inches) wide in size. Newcomb's snails feed on algae and other material growing on submerged rocks. Eggs are attached to underwater rocks or vegetation, and the entire life cycle is tied to the stream system in which the adults live. Populations of Newcomb's snail are currently found in small areas within the Kalalau, Lumaha'i, Hanalei, Waipahe'e-Kealia, Makaleha-kapa'a, and North Wailua stream systems on Kaua'i. The range of the snails is usually limited to a few square meters of a single side-channel or waterfall in a stream in which it is found. Historically, Newcomb's snail was also found in Hanakoa, Hanakapi'ai, and Wainiha Streams, but these populations are thought to be extirpated. The great majority of all known Newcomb's snails, perhaps over 90 percent, are thought to be located in the two populations at the small sites in Kalalau and Lumaha'i Streams. Three of the six watersheds containing sites where Newcomb's snails are found are under private ownership, and the remaining sites are located on State of Hawai'i lands.

Some of the historical decline of the snail may be attributed to habitat loss and degradation through water diversion and well drilling. In addition, predation by alien species, natural disasters, and habitat alteration are threats that imperil Newcomb's snails. Currently, Newcomb's snails face an increased likelihood of extinction from naturally-occurring events due to the small number of remaining populations and their limited distribution. Significant habitat destruction through reduction or elimination of stream or spring flow could destroy an entire population of Newcomb's snails, and natural disasters such as hurricanes or catastrophic landslides could also destroy vital habitat.

The overall objective of this draft recovery plan is to ensure the species' long-term conservation and eventual delisting. This recovery will be accomplished through a variety of recovery actions, including: (1) Establishing a baseline per population numbers; (2) research into the basic population biology and life history of the Newcomb's snail; (3) analysis and potential prevention of predation and other forms of negative interspecific interactions that may limit or reduce Newcomb's snail populations; (4) assurance of adequate stream and spring flows to protect known and potential Newcomb's snail habitat; (5) making recovery of Newcomb's snail a part of other landscape planning and conservation efforts, such as preservation of the structure and function of upland forests that maintain and regulate surface run-off to streams and act as areas of infiltration for ground water; (6) use of results of initial recovery efforts and research to periodically validate recovery objectives; and (7) development and implementation of a public outreach program for Newcomb's snail conservation.

The recovery criteria outlined in this draft recovery plan will provide for the maintenance of the majority of the genetic diversity of the Newcomb's snail, and will provide assurance that a single catastrophic event will not reduce populations of Newcomb's snails to the point where they are no longer viable. Delisting criteria for the Newcomb's snail are: (1) Abundance and population variability have been quantified, and an appropriate number of populations are stable or increasing in size due to natural reproduction for a minimum of 5 consecutive years; (2) populations are located in a minimum of eight separate watersheds that are geographically distributed throughout its range; (3) minimum flows are established for stream reaches where populations of Newcomb's snails are located; (4) non-native predators and competitors have been studied, their effects quantified, and appropriate control measures have been established; and (5) a post-delisting monitoring plan covering a minimum of eight watersheds has been completed and is ready for implementation.

Public Comments Solicited

We solicit written comments on the draft recovery plan as described. All comments received by the date specified above will be considered in developing a final recovery plan for this species.

Authority

The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: January 14, 2004.

Cynthia U. Barry,

Acting Regional Director, Region 1, U.S. Fish and Wildlife Service.

[FR Doc. 04–6575 Filed 3–23–04; 8:45 am]

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Replacement School Construction Priority List as of FY 2004

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: As required by statute, the Bureau of Indian Affairs is publishing the ''Replacement School Construction Priority List'' in the **Federal Register**. The current priority list, last published in the **Federal Register** on July 9 and July 18, 2003, is revised by the addition of newly prioritized schools. The Bureau will use this list to determine the order in which Congressional appropriations are requested to fund education replacement construction of core academic and/or dormitory facilities.

FOR FURTHER INFORMATION CONTACT: Questions regarding the Education Facilities Replacement Construction Priority List should be referred to Andrew Acoya, AIA, Office of Facilities Management and Construction, P.O. Box 1248, Albuquerque, New Mexico 87103, (505) 346–6508, Fax (505) 346–6542.

SUPPLEMENTARY INFORMATION: Publication of the Replacement School Construction Priority List (Priority List) in the **Federal Register** is required by 25 U.S.C. 2005(d). In addition, the Conference Report (Report 108–330) which accompanied the Fiscal Year 2004 appropriations for the Department of the Interior directed the Secretary of the Interior to submit a new Priority List to Congress: ''The managers direct that the Secretary submit a new priority list by February 15, 2004, containing a sufficient number of schools to continue the replacement school program through fiscal year 2007. The priority list should address the most critical needs based on the Bureau's facility management information system.''

The process used to develop the Priority List involved identification by the BIA of schools with critical health and safety concerns. This identification was conducted by the BIA's Office of Facilities Management and Construction (using the facilities management information system), the BIA's regional facilities program, and the Office of Indian Education Programs' facilities program. The BIA then selected, through a competitive bid process, an independent contractor experienced in facilities construction to conduct a site review of each of the identified schools' core academic and/or dormitory facility. The independent contractor then rated each school based on the following criteria, in order of priority: (1) Health and safety deficiencies, (2) environmental deficiencies, (3) accessibility for persons with disabilities, and (4) condition of existing utilities and site improvements. The Priority List includes 14 schools considered in most need of replacement of their core academic and/or dormitory facilities. Complete replacement of the entire school facility may not be necessary.

The BIA will begin the advance planning and design process for these schools to determine the scope and cost of each replacement project. This list will be more than sufficient to continue the replacement school construction program through FY 2007. Funding and scheduling for these projects is contingent on the budget process. In addition, any school placed on the Priority List is eligible for the Tribal School Construction Demonstration Program. Participation in this program would expedite the funding and scheduling for school replacement projects.

Under Section 1125(a)(5) of the No Child Left Behind Act (Pub. L. 107–110), the Secretary is required to conduct negotiated rulemaking regarding Indian school construction. This negotiated rulemaking may impact future replacement school construction priorities.

Schools placed on the previously published ''Education Facilities Construction Priority List as of FY 2003,'' published in the **Federal Register** on July 9, 2003 (68 FR 40996) and July 18, 2003 (68 FR 42815) that were not yet fully funded for construction are retained. In accordance with Congressional directives, the projects listed do not provide for the funding of new schools, grade level expansions, and charter schools.

This notice is published under authority delegated by the Secretary of the Interior to the Assistant Secretary for Indian Affairs in the Departmental Manual at 209 DM 8.

Replacement School Construction Priority List

1. Dilcon Community School
2. Porcupine Day School
3. Crown Point/T'iists'oozi'bi'olta Community School
4. Muckleshoot Tribal School
5. Dennehotso Boarding School
6. Circle of Life Survival School
7. Keams Canyon Elementary School
8. Rough Rock Community School
9. Crow Creek Elementary/Middle/High School
10. Kaibeto Boarding School
11. Blackfeet Dormitory
12. Beatrice Rafferty School
13. Little Singer Community School
14. Cove Day School

Dated: March 9, 2004.

Dave Anderson,

Assistant Secretary—Indian Affairs.

BILLING CODE 4310–XN–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NV–050–5853–ES; N–61839]

Notice of Realty Action: Lease/Conveyance for Recreation and Public Purposes

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of recreation and public purpose lease/conveyance.

DATES: Interested parties may submit comments regarding the proposed lease/conveyance for classification of the lands to the Field Manager, Las Vegas Field Office, Las Vegas, Nevada 89130 until May 10, 2004.

FOR FURTHER INFORMATION CONTACT: Robin Yoakum at (702) 515–5087.

SUMMARY: The City of Las Vegas is qualified under the Recreation and Public Purposes Act and has filed an application for these lands to be used as a public park. This land will serve citizens in the Northwest sector of the city, where much growth has occurred.

SUPPLEMENTARY INFORMATION: The following described public land in Las Vegas, Clark County, Nevada has been examined and found suitable for lease/conveyance for recreational or public purposes under the provisions of the Recreation and Public Purposes Act, as amended (43 U.S.C. 869 *et seq.*). The City of Las Vegas proposes to use the land for a public park.

Mount Diablo Meridian

T. 19S., R. 60E., Sec. 17
Government Lots, 18, 19, 20

Containing 62.08 acres, more or less.

The land is not required for any federal purpose. The lease/conveyance is consistent with current Bureau planning for this area and would be in the public interest. The lease/patent, when issued, will be subject to the provisions of the Recreation and Public Purposes Act and applicable regulations of the Secretary of the Interior, and will contain the following reservations to the United States:

1. A right-of-way thereon for ditches or canals constructed by the authority of the United States, Act of August 30, 1890 (43 U.S.C. 945).

2. All minerals shall be reserved to the United States, together with the right to prospect for, mine and remove such deposits from the same under applicable law and such regulations as the Secretary of the Interior may prescribe.

and will be subject to:

1. All valid and existing rights.

2. Those rights for public utility purposes which have been granted to Nevada Power Company by Permit No's. N–58721, N–73826, N–75274 and N–75820, Las Vegas Valley Water District by permit No. N–61329, Cox Communication by permit No. N–74001, Nevada Department of Transportation by permit No. NVCC–18138, Nevada Bell by permit No. NVCC–21488, FWHA by permit No. N–46063, Central Telephone by permit No. N–73808, and the City of Las Vegas by permit No's. N–73902 and N–76529–01 under the Federal Land Policy and Management Act of October 21, 1976 (FLPMA).

Detailed information concerning this action is available for review at the office of the Bureau of Land Management, Las Vegas Field Office, 4701 N. Torrey Pines Drive, Las Vegas, Nevada. On March 24, 2004, the above described land will be segregated from all other forms of appropriation under the public land laws, including the general mining laws, except for lease/conveyance under the Recreation and Public Purposes Act, leasing under the mineral leasing laws and disposals under the mineral material disposal laws.

Classification Comments: Interested parties may submit comments involving the suitability of the land for a public park. Comments on the classification are restricted to whether the land is physically suited for the proposal, whether the use will maximize the future use or uses of the land, whether the use is consistent with local planning and zoning, or if the use is consistent with State and Federal programs.

Application Comments: Interested parties may submit comments regarding the specific use proposed in the application and plan of development, whether the BLM followed proper administrative procedures in reaching the decision, or any other factor not directly related to the suitability of the land for a public park.

Any adverse comments will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In the absence of any adverse comments, these realty actions will become the final determination of the Department of the Interior. The classification of the land described in this Notice will become effective 60 days from the date of publication in the **Federal Register**. The lands will not be offered for lease/conveyance until after the classification becomes effective.

Dated: November 28, 2004.

Sharon DiPinto,

Acting Assistant Field Manager, Division of Lands, Las Vegas, NV.

[FR Doc. 04–6543 Filed 3–23–04; 8:45 am]

BILLING CODE 4310–HC–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[WY–921–1050–ET; WYW 144782]

Notice of Proposed Withdrawal and Opportunity for Public Meeting; Wyoming

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Secretary of the Interior proposes to withdraw certain federally owned public lands and reserved mineral interests to protect prehistoric petroglyphs and cultural resources in the Whoopup Canyon Area of Critical Environmental Concern, Weston County, Wyoming. To the extent specified below, this notice segregates from surface entry and mining for up to 2 years, the aforementioned lands and mineral interests.

DATE: Comments and requests for a public meeting must be received by June 22, 2004.

ADDRESS: Comments and meeting requests should be sent to the Bureau of Land Management, Wyoming State Director, P.O. Box 1828, Cheyenne, Wyoming 82003–1828.

FOR FURTHER INFORMATION CONTACT: Janet Booth, Bureau of Land Management (BLM) Wyoming State Office, (307) 775–6124.

SUPPLEMENTARY INFORMATION: The applicant is the Bureau of Land Management at the address stated above. The petition/application requests the Secretary of the Interior to withdraw for a period of 20 years and subject to valid existing rights, the following described federally owned public lands and reserved mineral interests from settlement, sale, location, or entry under the general land laws, including the mining laws, but not from mineral leasing, mineral material sales, or conveyances under Section 206 of the Federal Land Policy and Management Act of 1976, as amended:

Sixth Principal Meridian

T. 43 N., R. 60 W.,
Sec. 5, W½SW¼;
Sec. 6, SE¼NW¼;
Sec. 7, lot 4, SE¼SW¼;
Sec. 8, W½SW¼.
T. 44 N., R. 60 W.,
Sec. 19, SE¼SW¼, S½SE¼;
Sec. 20, S½SW¼;
Sec. 29, NW¼NW¼, SW¼SE¼;
Sec. 30, lots 3 and 4, N½NE¼, NE¼NW¼, SE¼SE¼;
Sec. 31, lots 1 to 4, inclusive, NE¼, E½W½;
Sec. 32, NE¼NE¼, S½NW¼;
Sec. 33, NW¼NW¼.

The area described contains approximately 1439.39 acres of federally owned surface and minerals in Weston County, Wyoming.

T. 43 N., R. 60 W.,
Sec. 6, lots 2, 4, 5, 6, 7, SW¼NE¼, E½SW¼;
Sec. 7, lots 1, 2, 3, W½E½, E½NW¼, NE¼SW¼;
Sec. 8, W½NW¼;
Sec. 18, E½NE¼, E½NW¼.
T. 44 N., R. 60 W.,
Sec. 29, NW¼NE¼, NE¼NW¼, S½NW¼, W½SW¼, SE¼SW¼;
Sec. 30, S½NE¼, SE¼NW¼, E½SW¼, W½SE¼, NE¼SE¼;
Sec. 31, SE¼SE¼;
Sec. 32, NW¼NE¼, NE¼NW¼, S½NE¼, N½SE¼;
Sec. 33, SW¼NW¼, NW¼SW¼.

The area described contains approximately 1919.51 acres of Federal reserved minerals underlying private surface in Weston County, Wyoming.

The BLM petition/application has been approved by the Assistant Secretary, Land and Minerals Management. Therefore, it constitutes a withdrawal proposal of the Secretary of the Interior. 43 CFR 2310.1–3(e).

The use of a right-of-way, interagency agreement, or cooperative agreement would not constrain non-discretionary uses that could irrevocably affect adversely the petroglyphs and cultural resources in the area.

There are no suitable alternative sites, since the lands described contain the resources that need protection.

No water rights will be needed to fulfill the purpose of the withdrawal.

Possible mineral deposits present in the above described land areas include

some leasable, locatable, and salable minerals. No critical or strategic minerals, as defined by the Secretary of the Interior, are present in these areas.

The purpose of the proposed withdrawal is to protect valuable prehistoric petroglyphs and associated cultural resources pending further study and development of appropriate, and possibly longer-term, actions.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the Wyoming State Director.

Comments, including names and street addresses of respondents, will be available for public review at the Newcastle Field Office, 1101 Washington Blvd., Newcastle, Wyoming, during regular business hours, 7:45 a.m. to 4:30 p.m., Monday through Friday, except holidays. Individual respondents may request confidentiality. If you wish to withhold your name or address from public review or from disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your comments. Such requests will be honored to the extent allowed by law. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public inspection in their entirety.

Notice is hereby given that an opportunity for a public meeting is afforded in connection with the proposed withdrawal. All interested persons who desire a public meeting for the purpose of being heard on the proposed withdrawal should submit a written request to the Wyoming State Director within 90 days from the date of publication of this notice. If the authorized officer determines that a public meeting will be held, a notice of the time and place will be published in the **Federal Register** at least 30 days before the scheduled date of the meeting.

This withdrawal proposal will be processed in accordance with the regulations set forth in 43 CFR 2300.

For a period of 2 years from the date of publication of this notice in the **Federal Register**, the land will be segregated as specified above unless the application is denied or cancelled or the withdrawal is approved prior to that date.

Licenses, permits, cooperative agreements, or discretionary land use authorizations of a temporary nature which will not significantly impact the values to be protected by the withdrawal may be allowed with the approval of an authorized officer of the BLM during the segregative period.

Melvin Schlagel,

Realty Officer.

BILLING CODE 4310–22–P

DEPARTMENT OF THE INTERIOR

Minerals Management Service

Agency Information Collection Activities: Submitted for Office of Management and Budget (OMB) Review; Comment Request

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of extension of an information collection (1010–0051).

SUMMARY: To comply with the Paperwork Reduction Act of 1995 (PRA), we are notifying the public that we have submitted to OMB an information collection request (ICR) to renew approval of the paperwork requirements in the regulations under 30 CFR 250, Subpart L, Oil and Gas Production Measurement, Surface Commingling, and Security.

DATES: Submit written comments by April 23, 2004.

ADDRESSES: You may submit comments either by fax (202) 395–6566 or e-mail (*OIRA_DOCKET@omb.eop.gov*) directly to the Office of Information and Regulatory Affairs, OMB, Attention: Desk Officer for the Department of the Interior (1010–0051). Mail or hand carry a copy of your comments to the Department of the Interior; Minerals Management Service; Attention: Rules Processing Team; Mail Stop 4024; 381 Elden Street; Herndon, Virginia 20170–4817. If you wish to e-mail your comments to MMS, the address is: *rules.comments@mms.gov.* Reference Information Collection 1010–0051 in your subject line and mark your message for return receipt. Include your name and return address in your message text.

FOR FURTHER INFORMATION CONTACT: Arlene Bajusz, Rules Processing Team, (703) 787–1600. You may also contact Arlene Bajusz to obtain a copy, at no cost, of the regulations that require the subject collection of information.

SUPPLEMENTARY INFORMATION:

Title: 30 CFR 250, Subpart L, Oil and Gas Production Measurement, Surface Commingling, and Security.

OMB Control Number: 1010–0051.

Abstract: The Outer Continental Shelf (OCS) Lands Act, as amended (43 U.S.C. 1331 *et seq.* and 43 U.S.C. 1801 *et seq.*), authorizes the Secretary of the Interior (Secretary) to preserve, protect, and develop oil and gas resources in the OCS. This must be in a manner that is consistent with the need to make such resources available to meet the Nation's energy needs as rapidly as possible; balance orderly energy-resources development with protection of the human, marine, and coastal environment; ensure the public a fair and equitable return on OCS resources; and preserve and maintain free enterprise competition. The Federal Oil and Gas Royalty Management Act of 1982 (30 U.S.C. 1701, *et seq.*) at section 1712(b)(2) prescribes that an operator will ''develop and comply with such minimum site security measures as the Secretary deems appropriate, to protect oil or gas produced or stored on a lease site or on the Outer Continental Shelf from theft.'' These authorities and responsibilities are among those delegated to MMS under which we issue regulations governing oil and gas and sulphur operations in the OCS. This information collection request addresses the regulations at 30 CFR Part 250, Subpart L, Oil and Gas Production Measurement, Surface Commingling, and Security, and the associated supplementary notices to lessees and operators intended to provide clarification, description, or explanation of these regulations.

MMS uses the information collected under Subpart L to ensure that the volumes of hydrocarbons produced are measured accurately and that royalties are paid on the proper volumes. Specifically, MMS needs the information to:

- Determine if measurement equipment is properly installed, provides accurate measurement of production on which royalty is due, and is operating properly;
- Obtain rates of production data in allocating the volumes of production measured at royalty sales meters, which can be examined during field inspections;
- Ascertain if all removals of oil and condensate from the lease are reported;
- Determine the amount of oil that was shipped when measurements are taken by gauging the tanks rather than being measured by a meter;
- Ensure that the sales location is secure and production cannot be removed without the volumes being recorded; and
- Review proving reports to verify that data on run tickets are calculated and reported accurately.

Responses are mandatory. No questions of a ''sensitive'' nature are asked. MMS will protect proprietary information according to 30 CFR 250.196 (Data and information to be made available to the public) and 30 CFR Part 252 (OCS Oil and Gas Information Program).

Frequency: The frequency varies by section, but is primarily monthly or on occasion.

Estimated Number and Description of Respondents: Approximately 130 Federal OCS oil and gas or sulphur lessees.

Estimated Reporting and Recordkeeping ''Hour'' Burden: The estimated annual ''hour'' burden for this information collection is a total of 7,433 hours. The following chart details the individual components and estimated hour burdens. In calculating the burdens, we assumed that respondents perform certain requirements in the normal course of their activities. We consider these to be usual and customary and took that into account in estimating the burden.

Citation 30 CFR 250 subpart L	Reporting or recordkeeping requirement	Hour burden (minutes)	Average No. annual responses	Annual burden hours
1202(a)(1), (b)(1)	Submit application for liquid hydrocarbon measurement procedures or changes.	8	120	960
1202(a)(4)	Copy & send pipeline (retrograde) condensate volumes upon request.	45	21	16
1202(c)(4)*	Copy & send all liquid hydrocarbon run tickets monthly.	1	23,800	397
1202(d)(4)	Request approval for proving on a schedule other than monthly.	1	25	25
1202(d)(5)*	Copy & submit liquid hydrocarbon royalty meter proving reports monthly & request waiver as needed.	2	9,835	328
1202(f)(2)*	Copy & submit mechanical-displacement prover & tank prover calibration reports.	10	102	17
1202(l)(2)*	Copy & submit royalty tank calibration charts before using for royalty measurement.	15	12	3
1202(l)(3)*	Copy & submit inventory tank calibration charts upon request.	15	4	1
1203(b)(1)	Submit application for gas measurement procedures or changes.	8	75	600
1203(b)(6), (8), (9)*	Copy & submit gas quality and volume statements monthly or as requested (most will be routine; few will take longer).	2 30	21,696 24	723 12
1203(c)(4)*	Copy & submit gas meter calibration reports upon request.	5	34	3
1203(e)(1)*	Copy & submit gas processing plant records upon request.	30	4	2
1203(f)(5)	Copy & submit measuring records of gas lost or used on lease upon request.	30	22	11
1204(a)(1)	Submit application for commingling of production or changes.	8	195	1,560
1204(a)(2)	Provide state production volumetric and/or fractional analysis data upon request.	1	1	1
1205(a)(2)	Post signs at royalty or inventory tank used in royalty determination process.	1	75	75
1205(a)(4)	Report security problems (telephone)	15	2	1
1200 thru 1205	General departure and alternative compliance requests not specifically covered elsewhere in Subpart L.	1	50	50
Subtotal—Reporting			56,098	4,785
1202(c)(1), (2) 1202(e)(4) 1202(h)(1), (2), (3), (4) 1202(i)(1)(iv), (2)(iii) 1202(j).	Record observed data, correction factors & net standard volume on royalty meter and rank run tickets. Record master meter calibration runs Record mechanical-displacement prover, master meter, or tank prover proof runs Record liquid hydrocarbon royalty meter malfunction and repair or adjustment on proving report; record unregistered production on run ticket List Cpl and Ctl factors on run rickets	Respondents record these items as part of normal business records & practices to verify accuracy of production measured for sale purposes		0
1202(e)(6)	Retain master meter calibration reports for 2 years.	1	1,170	20
1202(k)(5)	Retain liquid hydrocarbon allocation meter proving reports for 2 years.	1	10,850	181
1202(l)(3)	Retain liquid hydrocarbon inventory tank calibration charts for as long as tanks are in use.	5	110	9
1203(c)(4)	Retain calibration reports for 2 years	1	18,860	314

Citation 30 CFR 250 subpart L	Reporting or recordkeeping requirement	Hour burden (minutes)	Average No. annual responses	Annual burden hours
1203(f)(4)	Document & retain measurement records on gas lost or used on lease for 2 years at field location and minimum 7 years at location of respondent's choice.	1	4,030	67
1204(b)(3)	Retain well test data for 2 years	2	52,900	1,763
1205(b)(3), (4)	Retain seal number lists for 2 years	2	8,810	294
Subtotal—Recordkeeping: 130 Recordkeepers.				
Total Hour Burden			152,828	7,433

*Respondents gather this information as part of their normal business practices. MMS only requires copies of readily available documents. There is no burden for testing, meter reading, etc.

Estimated Reporting and Recordkeeping ''Non-Hour Cost'' Burden: We have identified no ''non-hour cost'' burdens associated with the collection of information.

Public Disclosure Statement: The PRA (44 U.S.C. 3501, *et seq.*) provides that an agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. Until OMB approves a collection of information, you are not obligated to respond.

Comments: Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3501, *et seq.*) requires each agency ''* * * to provide notice * * * and otherwise consult with members of the public and affected agencies concerning each proposed collection of information * * *.'' Agencies must specifically solicit comments to: (a) Evaluate whether the proposed collection of information is necessary for the agency to perform its duties, including whether the information is useful; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) enhance the quality, usefulness, and clarity of the information to be collected; and (d) minimize the burden on the respondents, including the use of automated collection techniques or other forms of information technology.

To comply with the public consultation process, on November 19, 2003, we published a **Federal Register** notice (68 FR 65305) announcing that we would submit this ICR to OMB for approval. The notice provided the required 60-day comment period. In addition, § 250.199 provides the OMB control number for the information collection requirements imposed by the 30 CFR 250 regulations. The regulation also informs the public that they may comment at any time on the collections of information and provides the address to which they should send comments. We have received no comments in response to these efforts.

If you wish to comment in response to this notice, you may send your comments to the offices listed under the **ADDRESSES** section of this notice. OMB has up to 60 days to approve or disapprove the information collection but may respond after 30 days. Therefore, to ensure maximum consideration, OMB should receive public comments by April 23, 2004.

Public Comment Policy: MMS's practice is to make comments, including names and home addresses of respondents, available for public review during regular business hours. If you wish your name and/or address to be withheld, you must state this prominently at the beginning of your comment. MMS will honor the request to the extent allowable by the law; however, anonymous comments will not be considered. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public inspection in their entirety.

MMS Federal Register Liaison Officer: Denise Johnson, (202) 208–3976.

Dated: March 1, 2004.

E.P. Danenberger,

Chief, Engineering and Operations Division.

INTERNATIONAL TRADE COMMISSION

[Inv. Nos. TA–131–29 and TA–2104–12]

U.S.-Thailand Free Trade Agreement: Advice Concerning the Probable Economic Effect of Providing Duty-Free Treatment for Imports

AGENCY: United States International Trade Commission.

ACTION: Revised hearing date and schedule.

EFFECTIVE DATE: March 18, 2004.

SUMMARY: The public hearing on this matter, scheduled for April 20, 2004, has been rescheduled to May 4, 2004. The public hearing will be held at the United States International Trade Commission Building, 500 E Street, SW., Washington, DC, at 9:30 a.m. on May 4, 2004. Requests to appear at the public hearing should be filed with the Secretary, no later than 5:15 p.m., April 16, 2004, in accordance with the requirements in the ''Submissions'' section below. Any prehearing briefs or statements should be filed no later than 5:15 p.m., April 20, 2004; the deadline for filing post-hearing briefs or statements is 5:15 p.m., May 11, 2004. Notice of institution of the investigation and an earlier scheduled hearing date were published in the **Federal Register** March 9, 2004 (69 FR 11042).

FOR FURTHER INFORMATION CONTACT: Information specific to these investigations may be obtained from Tracy Quilter (202–205–3437; *tracy.quilter@usitc.gov*) or Falan Yinug (202–205–2160; *falan.yinug@usitc.gov*), Office of Industries, United States International Trade Commission, Washington, DC, 20436. For information on the legal aspects of these investigations, contact William Gearhart of the Office of the General Counsel (202–205–3091; *william.gearhart@usitc.gov*). General information concerning the Commission may also be obtained by accessing its Internet server (*http://www.usitc.gov*).

Submissions: All written submissions including requests to appear at the hearing, statements, and briefs should be addressed to the Secretary, United States International Trade Commission, 500 E Street, SW., Washington, DC 20436. All written submissions must conform with the provisions of section 201.8 of the *Commission's Rules of Practice and Procedure* (19 CFR 201.8); any submissions that contain confidential business information must

also conform with the requirements of section 201.6 of the *Commission's Rules of Practice and Procedure* (19 CFR 201.6). Section 201.8 of the rules require that a signed original (or a copy designated as an original) and fourteen (14) copies of each document be filed. In the event that confidential treatment of the document is requested, at least four (4) additional copies must be filed, in which the confidential information must be deleted. Section 201.6 of the rules requires that the cover of the document and the individual pages be clearly marked as to whether they are the ''confidential'' or ''nonconfidential'' version, and that the confidential business information be clearly identified by means of brackets.

All written submissions, except for confidential business information, will be made available for inspection by interested parties. The Commission may include confidential business information submitted in the course of these investigations in the report it sends to the USTR. However, should the Commission publish a public version of this report, such confidential business information will not be published in a manner that would reveal the operations of the firm supplying the information.

The Commission's rules do not authorize filing submissions with the Secretary by facsimile or electronic means, except to the extent permitted by section 201.8 of the *Commission's Rules of Practice and Procedure* (19 CFR 201.8) (*see* Handbook for Electronic Filing Procedures, *ftp://ftp.usitc.gov/pub/reports/electronic_filing_handbook.pdf*). Persons with questions regarding electronic filing should contact the Secretary (202–205–2000 or *edis@usitc.gov*).

The public record for these investigations may be viewed on the Commission's electronic docket (EDIS) at *http://edis.usitc.gov.* Hearing-impaired individuals are advised that information on this matter can be obtained by contacting our TDD terminal on (202) 205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Secretary at 202–205–2000.

List of Subjects

Thailand, tariffs, and imports.

By order of the Commission.

Issued: March 18, 2004.

Marilyn R. Abbott,

Secretary to the Commission.

DEPARTMENT OF JUSTICE

Office of Justice Programs

Agency Information Collection Activities: Proposed Collection; Comments Requested

ACTION: 60-day notice of information collection under review: Semi-Annual Progress Report for Grants to Support Tribal Domestic Violence and Sexual Assault Coalitions Program.

The Department of Justice (DOJ), Office on Violence Against Women has submitted the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection is published to obtain comments from the public and affected agencies. Comments are encouraged and will be accepted for ''sixty days'' until May 24, 2004. This process is conducted in accordance with 5 CFR 1320.10.

If you have comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Cynthia J. Schwimer, Comptroller, Office of Justice Programs, U.S. Department of Justice, 810 Seventh Street NW., Washington, DC 20531.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

—Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Enhance the quality, utility, and clarity of the information to be collected; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* New Collection.

(2) *Title of the Form/Collection:* Semi-Annual Progress Report for the Grants to Support Tribal Domestic Violence and Sexual Assault Coalitions Program.

(3) *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* Form Number: None. U.S. Department of Justice, Office on Violence Against Women.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: The affected public includes the 14 grantees from the Grants to Support Tribal Domestic Violence and Sexual Assault Coalitions Program. Eligible grantees may include Indian tribal governments that will support the development and operation of new or existing nonprofit tribal domestic violence and sexual assault coalitions in Indian country. These grants provide

funds to develop and operate nonprofit tribal domestic violence and sexual assault coalitions in Indian country to address the unique issues that confront Indian victims. The Tribal Coalitions Program provides resources for organizing and supporting efforts to end violence against Indian women.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond/reply:* It is estimated that it will take the 14 respondents (grantees from the Tribal Coalitions Program) approximately one hour to complete a Semi-Annual Progress Report. The Semi-Annual Progress Report is divided into sections that pertain to the different types of activities that grantees may engage in with grant funds. Grantees must complete only those sections that are relevant to their activities.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total annual hour burden to complete the Semi-Annual Progress Report is 28 hours.

If additional information is required contact: Brenda E. Dyer, Department Deputy Clearance Officer, Policy and Planning Staff, Justice Management Division, Department of Justice, Patrick Henry Building, Suite 1600, 601 D Street NW., Washington, DC 20530.

Dated: March 18, 2004.

Brenda E. Dyer,

Department Deputy Clearance Officer, PRA, Department of Justice.

BILLING CODE 4410–18–P

DEPARTMENT OF JUSTICE

Office of Justice Programs

Agency Information Collection Activities: Proposed Collection; Comments Requested

ACTION: 60-day notice of information collection under review: Semi-Annual Progress Report for Rural Domestic Violence and Child Victimization Enforcement Grants Program.

The Department of Justice (DOJ), Office on Violence Against Women has submitted the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection is published to obtain comments from the public and affected agencies. Comments are encouraged and will be accepted for ''sixty days'' until May 24, 2004. This process is conducted in accordance with 5 CFR 1320.10.

If you have comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Cynthia J. Schwimer, Comptroller, Office of Justice Programs, U.S. Department of Justice, 810 Seventh Street NW., Washington, DC 20531.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

—Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Enhance the quality, utility, and clarity of the information to be collected; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Overview of This Information Collection

(1) Type of Information Collection: New Collection.

(2) Title of the Form/Collection: Semi-Annual Progress Report for the Rural Domestic Violence and Child Victimization Enforcement Grants Program.

(3) Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection: Form Number: None. U.S. Department of Justice, Office of Justice Programs.

(4) Affected public who will be asked or required to respond, as well as a brief abstract: Primary: The affected public includes the 165 grantees from the Rural Domestic Violence and Child Victimization Enforcement Grants Program. The Rural Domestic Violence and Child Victimization Enforcement Grant Program provides a unique opportunity for rural jurisdictions to address the needs of law enforcement, prosecution agencies, the courts, and nonprofit nongovernmental victim services agencies that respond to domestic violence, dating violence, and child abuse cases. Rural jurisdictions also are encouraged to create or enhance partnerships among criminal justice agencies, community organizations, health and social service providers, and child welfare agencies in order to implement prevention and education programs, as well as to develop innovative strategies to address the unique challenges of preventing and responding to domestic violence, dating violence, and child victimization in rural areas.

(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond/reply: It is estimated that it will take the 165 respondents (grantees from the Rural Domestic Violence and Child Victimization Enforcement Grants Program) approximately one hour to complete a Semi-Annual Progress Report. The Semi-Annual Progress Report is divided into sections that pertain to the different types of activities that grantees may engage in with grant funds. Grantees must complete only those sections that are relevant to their activities.

(6) An estimate of the total public burden (in hours) associated with the collection: The total annual hour burden to complete the Semi-Annual Progress Report is 330 hours.

If additional information is required contact: Brenda E. Dyer, Department Deputy Clearance Officer, Policy and Planning Staff, Justice Management Division, Department of Justice, Patrick Henry Building, Suite 1600, 601 D Street NW., Washington, DC 20530.

Dated: March 18, 2004.

Brenda E. Dyer,

Department Deputy Clearance Officer, PRA, Department of Justice.

Agency Information Collection Activities: Proposed Collection; Comments Requested

ACTION: 60-Day notice of information collection under review: Semi-Annual Progress Report for Education and Technical Assistance Grants to End Violence Against Women with Disabilities Program.

The Department of Justice (DOJ), Office on Violence Against Women has

submitted the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection is published to obtain comments from the public and affected agencies. Comments are encouraged and will be accepted for ''sixty days'' until May 24, 2004. This process is conducted in accordance with 5 CFR 1320.10.

If you have comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Cynthia J. Schwimer, Comptroller (202) 307–0623, Office of Justice Programs, U.S. Department of Justice, 810 Seventh Street NW., Washington, DC 20531.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
—Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
—Enhance the quality, utility, and clarity of the information to be collected; and
—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* New Collection.

(2) *Title of the Form/Collection:* Semi-Annual Progress Report for Education and Technical Assistance Grants to End Violence Against Women with Disabilities Program.

(3) *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* Form Number: None. U.S. Department of Justice, Office of Justice Programs.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: The affected public includes the 18 grantees from the Education and Technical Assistance Grants to End Violence Against Women with Disabilities Program. Eligible grantees may include states, units of local government, Indian tribal governments and non-governmental private entities. These grants provide funds for education and technical assistance in the form of training, consultations, and information to organizations and programs that provide services to individuals with disabilities and to domestic violence programs providing shelter or related assistance.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond/reply:* It is estimated that it will take the 18 respondents (grantees from the Education and Technical Assistance Grants to End Violence Against Women with Disabilities Program) approximately one hour to complete a Semi-Annual Progress Report. The Semi-Annual Progress Report is divided into sections that pertain to the different types of activities that grantees may engage in with grant funds. Grantees must complete only those sections that are relevant to their activities.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total annual hour burden to complete the Semi-Annual Progress Report is 36 hours.

If additional information is required contact: Brenda E. Dyer, Department Deputy Clearance Officer, Policy and Planing Staff, Justice Management Division, Department of Justice, Patrick Henry Building, Suite 1600, 601 D Street NW., Washington, DC 20530.

Dated: March 18, 2004.

BILLING CODE 4410–18–P

DEPARTMENT OF LABOR

Employee Benefits Security Administration

Prohibited Transaction Exemption 2004–05; [Exemption Application No. D–10957] et al.; Grant of Individual Exemptions; John Hancock Life Insurance Company

AGENCY: Employee Benefits Security Administration, Labor.

ACTION: Grant of individual exemptions.

SUMMARY: This document contains exemptions issued by the Department of Labor (the Department) from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1986 (the Code).

A notice was published in the **Federal Register** of the pendency before the Department of a proposal to grant such exemption. The notice set forth a summary of facts and representations contained in the application for exemption and referred interested persons to the application for a complete statement of the facts and representations. The application has been available for public inspection at the Department in Washington, D.C. The notice also invited interested persons to submit comments on the requested exemption to the Department. In addition the notice stated that any interested person might submit a written request that a public hearing be

held (where appropriate). The applicant has represented that it has complied with the requirements of the notification to interested persons. No requests for a hearing were received by the Department. Public comments were received by the Department as described in the granted exemption.

The notice of proposed exemption was issued and the exemption is being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978, 5 U.S.C. App. 1 (1996), transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

Statutory Findings

In accordance with section 408(a) of the Act and/or section 4975(c)(2) of the Code and the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990) and based upon the entire record, the Department makes the following findings:

(a) The exemption is administratively feasible;

(b) The exemption is in the interests of the plan and its participants and beneficiaries; and

(c) The exemption is protective of the rights of the participants and beneficiaries of the plan.

John Hancock Life Insurance Company, Located in Boston, Massachusetts; [Prohibited Transaction Exemption 2004–05 Application No. D–10957]

Exemption

The restrictions of section 406(b)(2) of the Act shall not apply to purchases and sales of farmland asset(s) (the Farmland Asset(s)), as defined in Condition 12(b), or entire farmland account(s) (the Entire Farmland Account(s)), as defined in Condition 12(n), between various account(s) (the Account(s)), as defined in Condition 12(a), that are managed by Hancock Natural Resource Group, Inc. (HNRG) or the affiliate(s) (the Affiliate(s)), as defined in Condition 12(e), of John Hancock Life Insurance Company (JHLIC).

Conditions and Definitions

This exemption is subject to the following conditions:

1. A plan or plans covered by the Act (the ERISA-Covered Plan(s)), as defined in Condition 12(c), may participate in a subject transaction only if each such plan has total assets in excess of $100 million.

2. At least 30 days prior to entering a subject transaction, each affected customer (the Customer(s)), as defined in Condition 12(l), invested in an Account participating in such transaction will be provided with information regarding the Farmland Asset(s) or the Entire Farmland Account involved and the terms of the transaction, including the purchase price and how the transaction would meet the goals and investment policies of each such affected Customer. Notice of any change in the purchase price will be provided to each affected Customer at least 30 days prior to the consummation of the transaction.

3. An independent fiduciary (an Independent Fiduciary), as defined in Condition 12(h), is appointed by JHLIC or an Affiliate as follows:

(a) One Independent Fiduciary is appointed to represent the Account(s) in which an ERISA-Covered Plan or ERISA-Covered Plans is/are invested, whether the Account(s) is/are the buyer(s) or the seller(s) in a subject transaction, where one side of such transaction involves one or more: (i) ERISA-Covered Plan(s), (ii) pooled separate account(s) (the Pooled Separate Account(s), as defined in Condition 12(k), in which an ERISA-Covered Plan or ERISA-Covered Plans invest, and/or (iii) other Account(s) holding ''plan assets'' subject to the Act [1] and the other side of such transaction involves one or more plan(s) or other customer(s) not covered by the Act (the Non-ERISA Plan(s) or Non-ERISA Customer(s), as defined in Condition 12(d)),

(b) One Independent Fiduciary is appointed to represent the buying account(s) (the Buying Account(s)), as defined in Condition 12(f), in a subject transaction, where such transaction is between two (2) or more: (i) ERISA-Covered Plans, (ii) Pooled Separate Accounts in which an ERISA-Covered Plan or ERISA-Covered Plans invest, and/or (iii) other Accounts holding ''plan assets'' subject to the Act, and the decision to liquidate the Farmland Asset(s) or Entire Farmland Account is the result of one or more ''triggering events,'' as described below. A ''triggering event'' will exist whenever:

(1) JHLIC or an Affiliate receives a direction from a Customer to liquidate such Customer's Entire Farmland Account, and the decision to liquidate such Entire Farmland Account is outside of the control of JHLIC and its Affiliates; or

(2) JHLIC or an Affiliate receives a request by a Customer to liquidate a specified Farmland Asset or Farmland Assets held in the Customer's Account, and the decision to liquidate the Farmland Asset(s) is outside of the control of JHLIC and its Affiliates; or

(3) a liquidation of all of the Farmland Assets held in a selling account(s) (the Selling Account(s)), as defined in Condition 12(g), or an Entire Farmland Account, or a particular Farmland Asset or Farmland Assets held by such Account(s) is required under the terms of the investment contract, insurance contract, or investment guidelines governing the Account(s), and the decision to select any particular Farmland Asset(s) to be sold or the decision to sell an Entire Farmland Account is outside of the control of JHLIC and its Affiliates; and

(c) One Independent Fiduciary is appointed to represent the Buying Account(s) and one Independent Fiduciary is appointed to represent the Selling Account(s) involved in a subject transaction:

(1) where such transaction is between two (2) or more: (i) ERISA-Covered Plans, (ii) Pooled Separate Accounts in which an ERISA-Covered Plan or ERISA-Covered Plans invest, and/or (iii) other Accounts holding ''plan assets'' subject to the Act, and there is no ''triggering event,'' as described above in Condition 3(b), or

(2) where such transaction is between two (2) or more: (i) ERISA-Covered Plans, (ii) Pooled Separate Accounts in which an ERISA-Covered Plan or ERISA-Covered Plans invest, and/or (iii) other Accounts holding ''plan assets'' subject to the Act, and one or more of the participants in such transaction is a Pooled Separate Account and/or other Account holding ''plan assets'' subject to the Act in which a John Hancock plan (the Hancock Plan(s)), as defined in Condition 12(m), participates.

4. With respect to each transaction requiring the participation of an Independent Fiduciary, as described in Condition 3, the purchase and sale of a Farmland Asset or Farmland Assets or an Entire Farmland Account shall not be consummated, unless the Independent Fiduciary determines that the transaction, including the price to be paid or received for each Farmland Asset or Entire Farmland Account, would be in the best interest of the particular Account(s) involved based on the investment policies and objectives of such Account(s).

5. Each Account which buys or sells a particular Farmland Asset or Farmland Assets or Entire Farmland Account pays no more than or receives no less than the fair market value of each Farmland Asset or Entire Farmland Account at the time of the transaction. For a Farmland Asset, fair market value

[1] *See* 29 CFR 2510.3–101 for the Department's definition of ''plan assets'' relating to plan investments.

shall be determined by a qualified, independent real estate appraiser experienced with the valuation of farmland properties similar to the type involved in the transaction, and may include customary closing adjustments, as described in Condition 12(o).

For an Entire Farmland Account, fair market value shall be determined by a qualified, independent entity experienced in the auditing and valuation of farmland accounts similar to the type involved in the transaction and the valuation of assets or liabilities other than Farmland Assets, including but not limited to assets such as short-term investments or accounts receivable from prior crop sales or leases, and liabilities such as investment or property management fees payable or property taxes payable, and may include customary closing adjustments, as described in Condition 12(o).

6. Each purchase or sale of a Farmland Asset or Farmland Assets or Entire Farmland Account between Accounts is a one-time cash transaction. A Buying Account may assume liabilities associated with an Entire Farmland Account, subject to valuation procedures described in Condition 5, above.

7. Each Account involved in the purchase or sale of a Farmland Asset or Farmland Assets or Entire Farmland Account pays no real estate commissions or brokerage fees relating to the transaction.

8. JHLIC or an Affiliate acts as a discretionary investment manager for the assets of the Account(s) involved in each transaction, provided that this condition will not fail to have been satisfied solely because the Customer retains the right to veto or approve the purchase or sale of a Farmland Asset or Farmland Assets or Entire Farmland Account.

9. An Account may not participate in a subject transaction, if the assets of any Hancock Plan or Hancock Plans in the Account exceed 20 percent (20%) of the total assets of the Account.

10. No purchase or sale transaction shall be designed to benefit the interests of one particular Account over another.

11. The general accounts of both JHLIC and John Hancock Variable Life Insurance Company (JHVLIC) (the General Accounts) shall not participate, directly or indirectly, in the subject transactions;

12. For purposes of this exemption:

(a) The term, ''Account(s),'' means a separate account or separate accounts (the Separate Account(s)), as defined in Condition 12(i), including Non-Pooled Separate Account(s), or Pooled Separate Account(s), as well as holding entities (Holding Entities), such as: (1) a partnership, corporation, trust, or any other form of entity established and maintained by JHLIC or an Affiliate and for which JHLIC or an Affiliate serves as general partner, investment manager, or adviser; or (2) a limited liability company or any other form of entity established by pension plan investors;

(b) the term, ''Farmland Asset(s),'' means a fee simple in farmland (and appurtenant rights), an interest in related equipment, a farmland lease, farm improvements, contractual agreements with respect to the production and harvesting of farm products, such as crop quotas, crop receivables, or delivery contracts, stock in farm cooperatives, and direct or indirect interest in entities holding such assets. With respect to any farmland lease: (i) the underlying fee simple must be owned by a person other than JHLIC or an Affiliate or any Account at the time of sale; and (ii) the entire lease originally acquired by the Selling Account must be sold to the Buying Account;

(c) the term, ''ERISA-Covered Plan(s),'' means an employee benefit plan or plans as defined under section 3(3) of the Act and not excluded from coverage under section 4 of the Act;

(d) the terms, ''Non-ERISA Plan(s)'' or ''Non-ERISA Customer(s),'' mean an entity or entities or investor(s) not covered by the provisions of Title I of the Act, such as a governmental plan, a university endowment fund, or other institutional investor, whose assets are managed in an Account for which JHLIC or an Affiliate acts as investment manager;

(e) the term, ''Affiliate(s),'' means any person(s) directly or indirectly through one or more intermediaries, controlling, controlled by, or under common control with such person;

(f) the term, ''Buying Account(s),'' means the Account(s) that seek(s) to purchase a Farmland Asset or Farmland Assets or an Entire Farmland Account from another Account;

(g) the term, ''Selling Account(s),'' means the Account(s) that seek(s) to sell a Farmland Asset or Farmland Assets or an Entire Farmland Account to another Account;

(h) the term, ''Independent Fiduciary,'' means a person or entity with authority to both review the appropriateness of a subject transaction for an Account, that is considered to hold ''plan assets'' subject to the fiduciary responsibility provisions of the Act, based on the investment policy established for that Account, and to negotiate the terms of the transaction, including the price to be paid for the Farmland Asset, the Farmland Assets, or the Entire Farmland Account. An individual or firm selected to serve as an Independent Fiduciary shall meet the following criteria:

(1) The individual or firm shall have no current employment relationship with JHLIC or an Affiliate, although a prior employment relationship would not disqualify the individual or firm;

(2) No individual or firm shall serve as an Independent Fiduciary during any year in which gross receipts received from business with JHLIC and its Affiliates for that year exceed five (5) percent of such individual's or firm's gross receipts from all sources for the prior year;

(3) The individual or firm must be an expert with respect to farmland valuations;

(4) The individual or firm must have the ability to access (itself or through persons engaged by it) appropriate farmland sales comparison data and make appropriate adjustments to the subject property, properties, or Account; and

(5) The individual or firm must not have a criminal record involving fraud, fiduciary standards, or securities laws violations.

(i) the term, ''Separate Account(s),'' means a segregated asset Account or Accounts which receive premiums or contributions from Customers, including employee benefit plans subject to the Act, in connection with group annuity contracts and funding agreements, with investments held in the name of JHLIC, but where the value of the contract or agreement to the Customer (contract holder) fluctuates with the value of the investment associated with such Account;

(j) the terms, ''Non-Pooled Separate Account(s)'' or ''Non-Pooled Account(s),'' mean a Separate Account or Separate Accounts established to back a single contract issued to one Customer, which may be an employee benefit plan subject to the Act;

(k) the terms, ''Pooled Separate Account(s),'' or ''Pooled Account(s),'' mean a Separate Account or Separate Accounts established to back a group of substantially identical contracts issued to a number of unrelated Customers, including employee benefit plans subject to the Act;

(l) the term, ''Customer(s),'' means a person or persons or entity or entities that act as the authorized representative for the investor in an Account involved in a purchase or sale of Farmland Assets or an Entire Farmland Account, that is independent of JHLIC and its Affiliates, provided, however, that for any Hancock Plan, as defined in Condition

12(m), below, a ''Customer'' shall mean the Plan Investment Advisory Committee of JHLIC;

(m) the term, ''Hancock Plan(s),'' means an employee benefit plan or employee benefit plans sponsored by JHLIC or an Affiliate which invest(s) in an Account;

(n) the term, ''Entire Farmland Account(s),'' means all the assets and liabilities of an Account or Accounts, as defined in Condition 12(a), including but not limited to the Farmland Assets in such Account or Accounts; and

(o) ''customary closing adjustments'' for purposes of this exemption are limited to the following: management fees, taxes, assessments, water rates, assignment of amounts under leases, recording taxes, survey costs, title review and title insurance costs and premiums, due diligence costs, escrow fees, licensing fees, fuel costs, equipment leases or contracts, reimbursements and adjustments for capital expenditures by the seller, crop adjustments, adjustments for documented expenses incurred by the seller during a growing period prior to closing, and agreement that a buyer may retain a certain amount of crops upon harvest, and the seller will receive all or part of the proceeds for any crops in excess of the amount retained by the buyer.

Written Comments

In the Notice of Proposed Exemption (the Notice), the Department of Labor (the Department) invited all interested persons to submit written comments and requests for a hearing on the proposed exemption within forty-five (45) days of the date of the publication of the Notice in the **Federal Register** on November 14, 2003. All comments and requests for a hearing were due by December 29, 2003.

During the comment period, the Department received no requests for a hearing. However, the Department did receive a comment letter from the applicant. In this regard, in a letter dated December 24, 2003, the applicant requested certain amendments to the conditions of the exemption, as proposed in the Notice, and various changes to the representations which according to the applicant should have been reflected in the Summary of Facts and Representations (the SFR) in the Notice, as published in the **Federal Register**.

The applicant's comments on the conditions of the exemption and on the representations in the SFR, and the Department's responses, thereto, are discussed in the numbered paragraphs below in an order that corresponds to the appearance of the relevant language in the Notice.

1. The applicant requests modification of Condition 11 of the exemption. Condition 11, as set forth in the Notice, at 68 FR 64645, column 2, lines 45–50, reads as follows:

> The general accounts (the General Accounts) of both JHLIC and John Hancock Variable Life Insurance Company (JHVLIC) shall not participate, directly or indirectly, in the subject transactions.

To make clear that references to ''General Accounts,'' in the exemption only include the general accounts of JHLIC and its affiliates, the applicant proposes that Condition 11 be revised as follows:

> The general accounts of both JHLIC and John Hancock Variable Life Insurance Company (JHVLIC) (the General Accounts) shall not participate, directly or indirectly, in the subject transactions.

The Department concurs with the applicant's request, and accordingly, has amended the language of Condition 11 in the exemption.

2. The applicant requests modification of Condition 12(a) of the exemption. Condition 12(a), as set forth in the Notice, at 68 FR 64645, column 2, lines 51–65, reads as follows:

> (a) the term, ''Account(s),'' means a separate account or separate accounts (the Separate Account(s)), as defined in Condition 12(i), including Non-Pooled Separate Account(s), or Pooled Separate Account(s), as well as holding entities (Holding Entities), such as a partnership, corporation, or trust for which JHLIC or an Affiliate serves as general partner, investment manager, or adviser **and include entities established or maintained by JHLIC, and limited liability companies established by pension plan investors** (emphasis added).

In the opinion of the applicant, it is unclear whether the phrase emphasized in the quotation above is intended by the Department as a further limitation on what may be defined as a Holding Entity. The applicant confirms that currently Holding Entities are limited to entities established by JHLIC and limited liability companies established by pension plan investors. However, the applicant believes it is not clear what purpose is served by limiting future use of the exemption to these entities, when pension plans may wish to establish partnerships or trusts that would qualify as Holding Entities under the exemption, but for the emphasized language. Accordingly, the applicant requests that the definition of ''Account(s),'' as published in Condition 12(a) of the Notice be modified to delete the phrase emphasized in the quotation above.

The Department concurs in part and disagrees in part. Specifically, the Department concurs with the applicant's request to delete the phrase, ''and include entities established or maintained by JHLIC, and limited liability companies established by pension plan investors,'' from the definition of ''Account(s),'' as set forth in Condition 12(a). However, the Department believes that the reference to Holding Entities should be limited. Accordingly, the definition of ''Account(s),'' as set forth in Condition 12(a), as set forth in the exemption had been amended to read as follows:

> (a) the term, ''Account(s),'' means a separate account or separate accounts (the Separate Account(s)), as defined in Condition 12(i), including Non-Pooled Separate Account(s), or Pooled Separate Account(s), as well as holding entities (Holding Entities), such as: (1) a partnership, corporation, trust, or any other form of entity established and maintained by JHLIC or an Affiliate and for which JHLIC or an Affiliate serves as general partner, investment manager, or adviser; or (2) a limited liability company or any other form of entity established by pension plan investors.

3. The applicant requests modification of Condition 12(d) of the exemption. Condition 12(d), as set forth in the Notice, at 68 FR 64645, column 3, lines 21–29, reads as follows:

> (d) the terms, ''Non-ERISA Plans'' or ''Non-ERISA Customers,'' mean entities or investors not covered by the provisions of Title I of the Act, such as a governmental plan, a university endowment fund, or other institutional investors, whose assets are managed in an Account for which JHLIC or an Affiliate acts as investment manager.

The applicant proposes that the terms, ''Non-ERISA Plans'' and ''Non-ERISA Customers,'' be changed to ''Non-ERISA Plan(s)'' and ''Non-ERISA Customer(s)'' in order to maintain consistency with the way singular and plural terms were treated in other provisions of the exemption.

The Department concurs with the applicant's request, and accordingly, has modified the language of Condition 12(d) in the exemption to read as follows:

> (d) the terms, ''Non-ERISA Plan(s)'' or ''Non-ERISA Customer(s),'' mean an entity or entities or investor(s) not covered by the provisions of Title I of the Act, such as a governmental plan, a university endowment fund, or other institutional investor, whose assets are managed in an Account for which JHLIC or an Affiliate acts as investment manager.

4. The applicant requests modification of Condition 12(o) of the exemption. Condition 12(o), as set forth in the Notice, at 68 FR 64646, column 2, lines 1–14, reads as follows:

(o) ''customary closing adjustments'' means adjustments that may arise where agricultural land bearing crops is sold prior to harvest and may involve an agreement between the buyer and seller that either: (1) the buyer reimburse the seller for documented expenses incurred during the growing period in the cultivation of such crops, up to the date of closing; or (2) the buyer retain a certain amount of the crops and the seller receive the proceeds for any crops in excess of the amount retained by the buyer.

The applicant confirms that this definition is consistent with the examples provided to the Department regarding the types of expenses that may be considered ''customary closing adjustments.'' However, the applicant believes that this definition of ''customary closing adjustments'' could be unnecessarily restrictive. For example, additional closing adjustments for management fees, real and personal property taxes, assignment of leases, and certain capital expenditures by the seller between an agreed-upon date and the date of closing are also ''customary.'' Accordingly, in their comment letter, dated December 24, 2003, the applicant requested that the term, ''customary closing adjustments,'' be defined as follows:

(o) ''customary closing adjustments'' means those mutually agreed upon adjustments to the consideration paid or received by a party made at closing that are customary or common in similar agricultural transactions, such as, but not limited to (1) adjustments for documented expenses incurred by the seller during a growing period prior to closing, or (2) agreement that a buyer may retain a certain amount of crops upon harvest, and the seller will receive all or part of the proceeds for any crops in excess of the amount retained by the buyer.

Subsequently, in response to the Department's concern that the requested amendment to the definition of ''customary closing adjustments'' did not specifically list such adjustments, the applicant, in a letter, dated March 4, 2004, proposed the following revised language for the definition:

(o) ''customary closing adjustments'' means those mutually agreed upon adjustments to the consideration paid or received by a party made at closing that are customary or common in similar agricultural transactions including management fees, taxes, assessments, water rates, assignment of amounts under leases, recording taxes, survey costs, title review and title insurance costs and premiums, due diligence costs, escrow fees, licensing fees, fuel costs, equipment leases or contracts, reimbursements and adjustments for capital expenditures by the seller, crop adjustments, adjustments for documented expenses incurred by the seller during a growing period prior to closing, and agreement that a buyer may retain a certain amount of crops upon harvest, and the seller will receive all or part of the proceeds for any crops in excess of the amount retained by the buyer.

The Department believes that the applicant's revisions to the definition of ''customary closing adjustments'' are too open-ended. In this regard, the Department believes that the definition of ''customary closing adjustments'' for purposes of the exemption should be limited to a list of potential adjustments clearly enumerated. Accordingly, the Department has determined that Condition 12(o) in the exemption should read as follows:

(o) ''customary closing adjustments'' for purposes of this exemption are limited to the following: management fees, taxes, assessments, water rates, assignment of amounts under leases, recording taxes, survey costs, title review and title insurance costs and premiums, due diligence costs, escrow fees, licensing fees, fuel costs, equipment leases or contracts, reimbursements and adjustments for capital expenditures by the seller, crop adjustments, adjustments for documented expenses incurred by the seller during a growing period prior to closing, and agreement that a buyer may retain a certain amount of crops upon harvest, and the seller will receive all or part of the proceeds for any crops in excess of the amount retained by the buyer.

5. The applicant requests a change to the language in the SFR, describing ''customary closing adjustments,'' as set forth in the Notice, at 68 FR 64648, column 3, lines 57–68 and at 68 FR 64649, column 1, lines 1–2. Specifically, the applicant requested that the description of ''customary closing adjustments,'' in the SFR conform to the applicant's requested modification of the language of Condition 12(o).

As the Department did not concur with the applicant's requested modification to the language of Condition 12(o), the Department does not agree to the change requested by the applicant to the description of ''customary closing adjustment,'' as set forth in the SFR, at 68 FR 64648, column 3, lines 57–68 and at 68 FR 64649, column 1, lines 1–2. It is the Department's view that, the definition of ''customary closing adjustments,'' as set forth in Condition 12(o) of this final exemption, should supercede the description of ''customary closing adjustments'' in the SFR, as set forth in the Notice.

6. The applicant requests that changes should have been made to the language in various locations in the SFR, as set forth in the Notice. Specifically, the applicant states that: (a) the word, ''Account(s),'' should have been used instead of the phrase, ''Farmland Separate Account(s),'' and (b) the word, ''Account's,'' should have been used instead of the phrase, ''Farmland Separate Account's,'' or the phrase, ''Farmland Account's,'' in the following locations:

a. in paragraph 7, 68 FR 64647, column 2, lines 7–8, 10–11, 36, 46–47, 51–52, 56–57, 57–58, and 61–62;

b. in paragraph 8, 68 FR 64647, column 3, lines 16–17, 25–26, 29–30, 32, 36, 42–43, 45, 48, 52, 57–58 and 64;

c. in paragraph 8, 68 FR 64648, column 1, lines 10–11, 11–12, and 23;

d. in paragraph 10, 68 FR 64648, column 1, lines 59–60;

e. in paragraph 12, 68 FR 64648, column 2, line 46;

f. in paragraph 18, 68 FR 64649, column 1, lines 64–65;

g. in paragraph 18, 68 FR 64649, column 2, lines 23–24; and

h. in paragraph 19, 68 FR 64649, column 2, line 55.

The Department concurs.

7. Paragraph 8 of the SFR contains a description of the operation of HAIG's investment queue procedures in the event that a Farmland Asset or Entire Farmland Account would be an appropriate investment for more than one Account. In this regard, paragraph 8 of the Notice, as set forth at 68 FR 64647, column 3, 51–55, reads:

In the event that two or more Farmland Separate Accounts have objectives and constraints that are sufficiently similar, HAIG implements its investment queue procedures.

The applicant notes that one condition of participation in the investment queue is that an investor have assets awaiting investment in farmland. Accordingly, the applicant proposes that the quotation, as set forth in the Notice, should have read as follows:

In the event that two or more Accounts have objectives and constraints that are sufficiently similar and have assets awaiting investment in farmland, HAIG implements its investment queue procedures.

The Department concurs.

8. The applicant points out a typographical error in the SFR, as set forth in the Notice. In this regard, it appears that the word, ''is,'' is missing, in paragraph 13 of the Notice, as set forth at 68 FR 64648, column 2, line 66. The applicant indicates that the word, ''is,'' should have been inserted before the word, ''between.''

The Department concurs. Accordingly, the SFR, as set forth in the Notice, at paragraph 13, 68 FR 64648, column 2, line 66, should have read as follows:

Where a transaction is between ERISA-Covered Plans and a triggering event has occurred, the fee for the services of the Independent Fiduciary will be charged as an

acquisition expense to the Buying Account(s).

9. In order to maintain consistency with the language in the rest of the Notice, the applicant requests that certain changes should have been made to the language of the SFR, as set forth in the Notice. Specifically, in paragraph 14, at 68 FR 64648, column 3, line 34, the reference to ''proposed transactions,'' should have referred instead to ''subject transactions.''

The Department concurs. Accordingly, the language in the SFR in paragraph 14 of the Notice, at 68 FR 64648, column 3, line 34, should have read as follows:

In this regard, participation in the subject transactions by ERISA-Covered Plans is limited to plans having total assets in excess of $100 million.

After giving full consideration to the entire record, including the written comments from the applicant, the Department has decided to grant the exemption, as described, amended, clarified, and concurred in above. In this regard, the comment letter submitted by the applicant to the Department has been included as part of the public record of the exemption application. The complete application file, including all supplemental submissions received by the Department, is made available for public inspection in the Public Documents Room of the Pension Welfare Benefits Administration, Room N–1513, U. S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the Notice of Proposed Exemption published on November 14, 2003, at 68 FR 64643.

Painters District Council No. 4 Apprenticeship, Upgrading & Retraining Trust Fund (the Plan) Located in Cheektowaga, New York [Prohibited Transaction Exemption No. 2004–06; [Application No. L–11190]

Exemption

The restrictions of section 406(a) of the Act shall not apply to a lease (the Lease) of certain space (the Leased Premises) in a building (the Building) owned by the Plan to Lipsitz, Green, Fahringer, Roll, Salisbury & Cambria, LLP (the Applicant), a party in interest with respect to the Plan. This exemption is conditioned upon the adherence to the material facts and representations described herein and upon the satisfaction of the following requirements:

(a) All terms and conditions of the Lease are at least as favorable to the Plan as those which the Plan could obtain in an arm's-length transaction with an unrelated party;

(b) The decision by the Plan to enter into the Lease will be made by the trustees of the Plan (the Trustees); and

(c) The fair market rental amount for the Lease will be determined by an independent, qualified appraiser as of the date of the commencement of the Lease; and

(d) After commencement of the Lease, an additional fair market rental appraisal of the Leased Premises will be performed by an independent, qualified appraiser every thirty months with the rental rate being adjusted accordingly.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption, refer to the Notice of Proposed Exemption published on December 17, 2003 at 68 FR 70310.

FOR FURTHER INFORMATION CONTACT: Khalif Ford of the Department, telephone (202) 693–8540 (this is not a toll-free number).

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) This exemption is supplemental to and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transactional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(3) The availability of this exemption is subject to the express condition that the material facts and representations contained in the application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 19th day of March, 2004.

Ivan Strasfeld,

Director of Exemption Determinations, Employee Benefits Security Administration, Department of Labor.

BILLING CODE 4510–29–P

DEPARTMENT OF LABOR

Employee Benefits Security Administration

[Application No. D–11132, et al.]

Proposed Exemptions; Landerholm, Memovich, Lansverk & Whitesides, P.S. 401(k) Profit Sharing Plan (the Plan)

AGENCY: Employee Benefits Security Administration, Labor

ACTION: Notice of Proposed Exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1986 (the Code).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemptions, unless otherwise stated in the Notice of Proposed Exemption, within 45 days from the date of publication of this **Federal Register** notice. Comments and requests for a hearing should state: (1) the name, address, and telephone number of the person making the comment or request, and (2) the nature of the person's interest in the exemption and the manner in which the person would be adversely affected by the exemption. A request for a hearing must also state the issues to be addressed and include a general description of the evidence to be presented at the hearing.

ADDRESSES: All written comments and requests for a hearing (at least three copies) should be sent to the Employee Benefits Security Administration (EBSA), Office of Exemption Determinations, Room N–5649, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210. Attention: Application No. _____, stated in each Notice of Proposed

Exemption. Interested persons are also invited to submit comments and/or hearing requests to EBSA via e-mail or FAX. Any such comments or requests should be sent either by e-mail to: *''moffitt.betty@dol.gov''*, or by FAX to (202) 219–0204 by the end of the scheduled comment period. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of the Employee Benefits Security Administration, U.S. Department of Labor, Room N–1513, 200 Constitution Avenue, NW., Washington, DC 20210.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the **Federal Register**. Such notice shall include a copy of the notice of proposed exemption as published in the **Federal Register** and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978, 5 U.S.C. app. 1 (1996), transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of proposed exemption are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

Landerholm, Memovich, Lansverk & Whitesides, P.S.; 401(k) Profit Sharing Plan (the Plan); Located in Vancouver, WA

[Application No. D–11132]

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990).[1]

Section I. Covered Transactions

If the exemption is granted, the restrictions of section 406(a) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (D) of the Code shall not apply, effective January 1, 1998, to the past acquisition by the Plan, through its real estate contract fund (the Fund), of real estate mortgage contracts (the Contracts) from American Equities, Inc. (AE), a party in interest with respect to the Plan.

In addition, if the exemption is granted, the restrictions of section 406(a) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (D) of the Code, shall not apply to the (1) future acquisition by the Plan, through the Fund, of additional Contracts from AE; (2) the sale by the Plan of any of the Contracts to AE; and (3) the exchange by the Plan of certain Contracts with AE for other AE contracts and/or cash.

Section II. General Conditions

This proposed exemption is conditioned upon adherence to the material facts and representations described herein and upon satisfaction of the following general conditions:

(a) Any acquisition, sale or exchange is approved in advance by the Plan's Trustees (the Trustees), who are independent of AE and the borrowers. Furthermore, the terms of each transaction between the Plan and AE involving the Contracts is not less favorable to the Plan than those terms generally available in an arm's length transaction between unrelated parties.

(b) The transactions are not a part of an agreement, arrangement or understanding designed to benefit AE.

(c) For purposes of an acquisition, sale or exchange, the cost of a Contract does not exceed its fair market value, as determined by the Plan's Trustees using an objective appraisal methodology, and the yield on all Contracts purchased, sold or exchanged exceeds the average yield of comparable mortgage contract loans by not less then 1%.

(d) The aggregate fees paid to AE for its activities as loan servicing agent for the Plan at all times do not exceed ''reasonable compensation'' within the meaning of section 408(b)(2) of the Act.

(e) No investment management, advisory, underwriting fees or sales commissions are paid by the Plan to AE or any of its affiliates with regard to the Plan's purchase, sale or exchange of a Contract.

(f) All Contracts acquired by the Plan satisfy the Trustees' selection criteria (the Selection Criteria). In this regard, at the time of the transaction:

(1) The loan to value ratio must be 75% or less;

(2) The ''Total Return'' on the Contract is at least 1.00% above the prevailing 30 year home mortgage rate;

(3) The purchaser of the property provides a clean payment history and a personal credit report of at least 12 months' duration;

(4) The property is in good condition with no defects discovered upon inspection;

(5) A clean title report is required; and

(6) A first position lien is obtained on the property.

(g) For prospective purchases or exchanges of Contracts by or between the Plan and AE,

(1) The Trustees engage an independent and unrelated consultant (the Independent Consultant), trained and experienced in real estate financing, to perform a written annual review of the Plan's Contract selection process to assure that—

(i) The selection process produces a yield to the Plan consistent with comparable market returns for first mortgage investments by direct federally insured lenders in the Trustees' market area;

(ii) The selection process permits only the purchase of Contracts which are not subordinated to other indebtedness; and

(iii) The selection process incorporates standards for loan to value ratio and borrower credit worthiness appropriate for qualified retirement plan investments; and

(2) No Contracts are purchased or exchanged in any year until the Independent Consultant's review has been issued, and the Independent Consultant has the authority to require that the Plan modify or replace the Selection Criteria utilized by the Plan as a condition to issuance of its review.

(h) The Trustees maintain for a period of six years, in a manner that is accessible for audit and examination, the records necessary to enable the persons, as described in (i) to determine whether the conditions of this proposed exemption have been met, except that—

(1) A prohibited transaction will not be considered to have occurred if, due to circumstances beyond the control of the Trustees, the records are lost or

[1] For purposes of this proposed exemption, references to specific provisions of title I of the Act, unless otherwise specified, refer also to corresponding provisions of the Code.

destroyed prior to the end of the six year period; and

(2) No party in interest, other than the Trustees, shall be subject to the civil penalty that may be assessed under section 502(i) of the Act, or to the taxes imposed by section 4975(a) and (b) of the Code, if the records are not maintained, or are not available for examination as required by paragraph (h).

(i) Except as provided in (i)(1)-(2) and notwithstanding any provisions of subsections (a)(2) and (b) of section 504 of the Act, the records referred to in paragraph (h) above shall be unconditionally available at their customary location for examination during normal business hours by—

(1) Any duly authorized employee or representative of the Department, the Internal Revenue Service, or the Securities and Exchange Commission;

(2) Any fiduciary of the Plan who has authority to acquire or dispose of any assets of the Plan, or any duly authorized employee or representative of such fiduciary; and

(3) Any participant or beneficiary of the Plans or duly authorized employee or representative of such participant or beneficiary.

EFFECTIVE DATE: If granted, this proposed exemption will be effective as of January 1, 1998 with respect to the Plan's past acquisition of the Contracts, and effective as of the date of publication of the final exemption in the **Federal Register** for future acquisitions, sales or exchanges of additional Contracts by the Plan.

Summary of Facts and Representations

1. The Plan is a defined contribution plan sponsored by Landerholm, Memovich, Lansverk & Whitesides, P.S. (Landerholm), a professional services corporation located in Vancouver, Washington. The Plan includes both 401(k) and profit sharing contributions.[2] Participant accounts are invested, at the participants' discretion, in one of 13 mutual funds available or in the Fund, a real estate fund holding mortgages, deeds of trust and real estate contracts.

The present Trustees of the Plan are Irwin C. Landerholm, T. Randall Grove, and Philip Janney, all of whom are current Landerholm shareholders. In addition to the current Trustees, the former Plan Trustees also requesting exemptive relief are Gregory J. Dennis, William C. Dudley, and Thomas B. Ericksen.[3]

2. The Trustees determined that establishing the Fund would provide Plan participants with lower risk, better stability and superior investment returns. Through maintenance of a pool of third party Contracts in the Fund, the Plan Trustees determined that the risks of other investment options could be balanced and the risk of loss in any single Contract would be moderated. All of the Contracts are ''whole'' Contracts that are held in the name of the Fund. The Contracts do not represent loans from direct, federally-insured lenders, and as a result, they normally trade at a discount to the current federally-insured lending rates. A participant electing to have a portion of his or her account invested in the Fund is essentially investing in an open-end fund. In other words, from a participant's perspective, the Fund includes both an undivided interest in all Contracts held by the Fund at the time an investment is made, as well as in each new Contract purchased as new participant funds become available and Contracts are retired or paid off.

3. For the Plan year 2002, the Plan's Form 5500 reported 71 currently active, retired, or separated participants and/or beneficiaries entitled to receive benefits. The Plan's total assets were reported at $6,265,141 as of July 25, 2003.

4. AE, which is located in Vancouver, Washington, is a company that is primarily engaged in the purchase and resale of real estate contracts, such as the subject Contracts described herein.[4] AE acquires contracts at a discount and sells them at less than the federally-insured lending rate on the secondary market. AE also services contracts sold, if retained by the purchasers. In 1982, AE was retained by the Trustees to present prospective Contracts that might be appropriate for the Fund. Each package prepared by AE included relevant documentation and performance history, as well as an independent appraisal by a knowledgeable realtor in the property's locale, of the underlying real estate securing the loans.

The Trustees reviewed the proposed AE Contracts using various selection criteria they had developed to evaluate the Contract's investment worthiness. In this regard (a) the loan to value ratio had to be 75% or less; (b) the ''Total Return'' on the Contract had to be at least 1.00% above the prevailing 30 year home mortgage rate; (c) the purchaser of the property had to provide a clean payment history and a personal credit report of at least 12 months' duration; (d) the property had to be in good condition with no defects discovered upon inspection; (e) a clean title report was required; and (f) a first position lien had to be obtained on the property. If the Contract was to be purchased by the Plan, it was required to pass all of the Selection Criteria. Since AE has no discretionary authority over the Plan's assets, the decision to invest in the Contracts rested solely with the Trustees. Moreover, the terms reflected arm's length dealings between the parties.

5. In developing the Selection Criteria, the Applicants state that the overall purpose was to ensure that selected Contracts met the Fund's investment strategy. To evaluate whether each factor had been met, Landerholm utilized the expertise of its real estate and investment and lending practice groups.[5] Once the screening

[2] The Applicants represent that although the Trustees have not sought to designate the Plan an ERISA section ''404 (c) plan,'' they state that the level of investment discretion participants can exercise under the Plan is consistent with section 404 (c) of the Act and the regulations promulgated thereunder. The Applicants explain that in the future, they intend to be fully compliant with section 404 (c) of the Act. Hence, every participant will have identical discretionary authority over his account and they may invest in any combination of the 13 mutual funds offered under the Plan or the Fund. The Applicants further explain that no charges or penalties will accrue as a result of any exercise by a participant of direction rights.

[3] For purposes of this proposed exemption, the current and former Trustees are collectively referred to herein as the Trustees. Also, Landerholm and the Trustees are collectively referred to herein as the Applicants.

[4] Prohibited Transaction Class Exemption (PTCE) 1982–87 (47 FR 21331, May 8, 1982) defines the term ''established mortgage lender'' as an organized business enterprise which has as one of its principal purposes in the normal course of business the origination of loans secured by real estate mortgages or deeds of trust and which has satisfied the qualification requirements of one of the following categories: (1) Approval by the Secretary of the Department of Housing and Urban Development for participation in any mortgage insurance program under the National Housing Act; (2) approval by the Federal National Mortgage Association (FNMA) or the Federal Home Loan Mortgage Corporation (FHLMC) as a qualified Seller/Servicer; or (3) a State agency or independent State authority empowered by State law to raise capital to provide financing for residential dwelling units.

In addition, PTCE 1982–87 defines the term ''recognized mortgage loan'' as any mortgage loan on a ''residential dwelling unit'' which, at the time of its origination, was eligible, through an established program, for purchase by the FNMA, the Government National Mortgage Association or the FHLMC.

The Applicants represent that, in their opinion, AE is not an ''established mortgage lender'' nor would any of the Contracts be characterized as ''recognized mortgage loans'' within the meaning of PTCE 1982–87 because AE does not have the requisite authority from state or federal regulatory agencies, as described in PTCE 1982–87, and the Contracts purchased and resold by AE do not originate from an established program, as described in PTCE 1982–87.

[5] The Applicants state that the Landerholm firm has a large and active real estate practice representing brokerage firms, developers, investors, lenders, and businesses in all matters pertaining to

Continued

process was completed and the Trustees agreed that certain Contracts were in the best interest of the Plan's investment strategy, the Plan purchased the Contracts on behalf of the Fund. Initially, Landerholm attempted to service the Contracts in-house, but it determined that it was more costly and cumbersome than to outsource the task. During this period, Landerholm bore the costs associated with servicing the Contracts. Subsequently, Landerholm decided that AE should be retained to service the Contracts and it would have no discretionary control over any of the Fund's assets with respect to default decisions and other determinations. AE began charging a service fee of $4 to $8 per month per Contract and an initial set-up fee of $50 per Contract.[6]

During the period between April 11, 1994, through October 19, 2001, the Plan acquired 26 Contracts on behalf of the Fund from AE. The maturity dates range from July 1, 2002, through September 27, 2020, according to an October 2001 spread sheet submitted by the Applicants. The Contracts consisted of a mortgage and several real estate contracts and deeds of trust. The Applicants state that as of December 31, 2002, which is the most recent date that financial information is available, the Fund had 21 participating individual accounts.

6. At the time the Contracts were purchased, the Plan paid AE fair market value for the Contracts. The purchase price was determined by adjusting the offered Contract's rate to that of the prevailing market rate. In this regard, the Trustees obtained the prevailing market rate by measuring each prospective Contract's yield (*i.e.*, the interest rate plus a discount) against the then current lending rates of independent local lending institutions (typically, First Independent Bank and U.S. Bank) all within the vicinity of Vancouver, Washington. In addition to ensuring that the rate of return was current through the time of purchase, the Trustees required each Contract to exceed the average yield of mortgage rates by no less than 1% in order that the Plan could capture a higher return.

The Applicants represent that this method for determining fair market value simulates rate adjustments that take place in the bond market that either result in a sale premium or a discount at the time of purchase. Moreover, the Applicants state that the 1% above prevailing average mortgage yields provided a further investment safeguard for the Fund. Finally, the Plan paid no fees or commissions to AE in connection with the Contract purchases.

7. Since the creation of the Fund, the Applicants represent that 51 Contracts have been retired, 26 Contracts are under current management, 2 have been foreclosed upon, and 3 have defaulted. The foreclosed Contracts resulted in the sale of the underlying real properties by the Plan to unrelated third party purchasers. Of the defaulted Contracts, 1 has been cured and 2 are in the process of being cured.[7]

Furthermore, no Contract has involved a borrower who is a party in interest with respect to the Plan. Within the past five years, the Applicants represent that the Fund has outperformed the mutual funds and has insulated the Plan from some of the market volatility to which traditional securities investments are susceptible. The Fund's annual return has ranged from 4.10% to 9.73%, whereas the mutual fund return has ranged from (−11.71%) to 24.94%.

According to the Applicants, at no time during the Fund's inception did the Trustees or Landerholm realize that having AE as Contract seller and service provider raised the issue of a possible prohibited transaction. The Applicants state that the Plan would have continued to acquire Contracts from AE had it not been for the Department's Seattle Regional Office (SRO) investigation into employee benefit plans holding mortgage notes.

8. On December 1, 2002, Landerholm entered into a tolling agreement (the Tolling Agreement) with the SRO as a result of the SRO's investigation of the Contracts held by the Plan. Pursuant to the Tolling Agreement, the SRO recommended that the Applicants seek exemptive relief from the Department with respect to the Plan's acquisition and holding of the Contracts.[8]

Accordingly, the Applicants request an administrative exemption from the Department in connection with the Plan's past acquisition of the Contracts from AE. In addition, the Applicants request prospective exemptive relief with respect to the Plan's future acquisition of additional Contracts from AE, the Plan's holding of such future Contracts, the sale of the Contracts to AE by the Plan, and the exchange by the Plan of such Contracts with AE for other Contracts and/or cash. If granted, the proposed exemption will be effective as of January 1, 1998, with respect to the Plan's past acquisitions and holding of the Contracts. The exemption will be prospective with respect to additional purchases of Contracts by the Plan from AE, the holding of such Contracts by the Plan and the Sale or exchange of the Contracts.

9. For prospective acquisitions of additional Contracts by the Plan from AE, the Trustees will follow the following guidelines:

- The terms of the transactions between the Plan and AE involving the Contracts must not be less favorable to the Plan than those terms generally available in an arm's length transaction between unrelated parties.
- The transactions are not a part of an agreement, arrangement or understanding designed to benefit AE.
- The cost of a Contract must not exceed its fair market value, as determined by the Trustees using an objective appraisal methodology, and the yield on all Contracts purchased must exceed the average yield of comparable mortgage contract loans by no less than 1%.
- The aggregate fees paid to AE for its activities as loan servicing agent for the Plan, have, and at all times, represent reasonable compensation for services necessary for the operation of the Plan in accordance with section 408(b)(2) of the Act.
- No investment management, advisory, underwriting fees or sales commissions must be paid by the Plan to AE or any of its affiliates with regard to the Plan's purchase of additional Contracts.
- All Contracts acquired by the Plan must satisfy the Trustees' Selection Criteria. In this regard, (1) the loan to value ratio must be 75% or less; (2) the ''Total Return'' on the Contract must be

the acquisition, development, financing, sale and leasing of real estate. Thus, the Applicants believe Landerholm possesses skill sufficient to determine the appropriate fair market value of the Contracts it acquires, sells or exchanges.

[6] Although the Applicants represent that the fees paid to AE for servicing the Contracts are reasonable compensation for services necessary for the operation of the Plan in accordance with section 408(b)(2) of the Act, the Department expresses no opinion herein on whether such compensation paid to AE in connection with its provision of services to the Plan satisfies the terms and conditions of section 408(b)(2) of the Act and the regulations promulgated thereunder.

[7] The Applicants state that curing refers to the process of removing whatever default exists in a Contract to make it current. For instance, if a Contract is 3 months in arrears, it will be cured if the borrower makes a payment to bring the loan current.

As of February 10, 2004, the Applicants represent that three Contracts were in default status. All three properties were eventually sold, with the proceeds going to the Plan to pay in full the Contract balances outstanding. Two of the Contract balances were paid in full on December 12, 2003. The property on the third Contract was sold and funds to pay the balance in full are forthcoming.

[8] Due to the Act's statute of limitations, the Department does not propose to extend retroactive relief for any of the purchases that took place between 1982 through 1997. Therefore, the retroactive exemption will apply to purchases of Contracts occurring after January 1, 1998.

at least 1.00% above the prevailing 30 year home mortgage rate; (3) the purchaser of the property must provide a clean payment history and a personal credit report of at least 12 months' duration; (4) the property must be in good condition with no defects discovered upon inspection; (5) a clean title report must be required; and (6) a first position lien must be obtained on the property.

• The Trustees maintain for a period of six years, in a manner that is accessible for audit and examination, the records necessary to enable (1) any duly authorized employee or representative of the Department, the Internal Revenue Service, or the Securities and Exchange Commission; (2) any fiduciary of the Plan who has authority to acquire or dispose of any assets of the Plan, or any duly authorized employee or representative of such fiduciary; and (3) any participant or beneficiary of the Plans or duly authorized employee or representative of such participant or beneficiary to determine whether the conditions of this proposed exemption have been met.

In addition, the Trustees will retain an Independent Consultant to perform an annual review of the Plan's current Selection Criteria to ensure that the selection process produces a yield to the Plan consistent with comparable market returns for first mortgage investments by independent, direct federally-insured lenders in Landerholm's market area. Such Independent Consultant will be a certified public accountant having substantial experience in real estate financing. The Independent Consultant will perform its annual review prior to the purchase of any further Contracts by the Plan. The Independent Consultant will have the authority to modify or replace the Plan's Selection Criteria to the extent the Independent Consultant believes such modification or replacement is necessary for the Plan's Selection Criteria to comply with Selection Criteria customarily employed in the purchase of Contracts within the Plan's market area. The Independent Consultant will also review the Plan's valuation methodology for the Contracts to ensure that the Plan's methodology will permit the purchase of Contracts only where the Plan's security interest is not subordinate to any other indebtedness, and where the credit worthiness of the borrower and the loan to value ratio of the underlying real estate held as security are appropriate for qualified retirement plan investments. This review of Plan methodology by the Independent Consultant will take place prior to the beginning of each Plan Year during which the Plan will purchase additional Contracts from AE.

10. The Applicants represent that at some point, it may become advisable to sell one or more of the Contracts, held by the Fund, to AE. Under such circumstances, the Applicants explain that a sale would favor the Plan by permitting the purchase of a more favorable Contract or providing the Fund with additional liquidity in order to make distributions or transfers between funds, as participants may elect. Therefore, the Applicants represent that any prospective sales of Contracts by the Plan to AE would include the same safeguards applicable to the prospective acquisitions by the Plan, as set forth in Representation 9 of the proposal. In addition, the Applicants state that such a sale by the Plan to AE would only be for cash.

11. The Applicants represent that since AE is one of the larger marketers of Contracts in the Southwestern Washington area, engaging in an exchange of existing Contracts with AE would be beneficial to the Plan. Such an exchange, the Applicants state, would occur where the Trustees have considered the Plan's liquidity needs and determined that it would be in the best interests of the Plan to dispose of a large Contract in exchange for a combination of cash and smaller Contracts from AE. The Applicants propose that an exchange transaction will be subject to all of the safeguards already required for prospective acquisitions, as described in Representation 9.

12. In addition, for each prospective sale or exchange transaction, the fair market value of a Contract will be determined by the Trustees using an objective appraisal methodology. Further, such transactions will be subject to the Selection Criteria described above, which will be reviewed and approved annually by the Independent Consultant, to ensure that the Plan receives neither less than fair market value or pays more than fair market value for a Contract sold or exchanged.

13. In summary, it is represented that the transactions have satisfied or will satisfy the statutory criteria for an exemption under section 408(a) of the Act because:

(a) Any acquisition, sale or exchange will be approved in advance by the Plan's Trustees, who are independent of AE and the borrowers. Furthermore, the terms of each transaction between the Plan and AE involving the Contracts have not been and will not be less favorable to the Plan than those terms generally available in an arm's length transaction.

(b) The transactions are not a part of an agreement, arrangement or understanding designed to benefit AE.

(c) For purposes of an acquisition, sale or exchange, the cost of a Contract has not exceeded and will not exceed its fair market value, and the yield on all Contracts have exceeded and will exceed the average yield of comparable mortgage contract loans.

(d) The aggregate fees paid to AE for its activities as loan servicing agent for the Plan have represented and will represent, at all times, reasonable compensation for services necessary for the operation of the Plan in accordance with section 408(b)(2) of the Act.

(e) No investment management, advisory, underwriting fees or sales commissions have been paid or will be paid by the Plan to AE in connection with the purchase, sale or exchange of a Contract.

(f) All Contracts acquired by the Plan have satisfied or will satisfy the Trustees' Selection Criteria.

(g) For prospective purchases or exchanges of Contracts by or between the Plan and AE, (1) the Trustees will engage an Independent Consultant.

(h) The Trustees have maintained and will maintain, at their customary location for examination during normal business hours, the records necessary to enable certain persons to determine whether the conditions of the exemption have been met.

Notice to Interested Persons

Notice of proposed exemption will be provided to all interested persons by first class mail within 10 days of publication of the notice of pendency in the **Federal Register**. Such notice shall include a copy of the notice of pendency, as published in the **Federal Register**, and supplemental statement, as required pursuant to 29 CFR 2570.43(b)(2), which shall inform interested persons of their right to comment on the proposed exemption. Comments are due within 40 days of the date of publication of the proposed exemption in the **Federal Register**.

DuPont Capital Asset Management Corporation (DCMC); Located in Wilmington, DE

[Application Nos. D–11157—D–11159]

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting an exemption under the authority of section 408(a) of the Act (or ERISA) and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, August 10, 1996).[9]

Section I. Covered Transactions

If the exemption is granted, the restrictions of sections 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to the in kind transfer of certain debt securities (the Debt Securities) that are held in the DuPont and Related Companies Defined Contribution Plan Master Trust (the Master Trust) in which the assets of the E.I. du Pont de Nemours and Company Savings and Investment Plan (the SIP), the DuPont Specialty Grains Savings Plan (the DSG Savings Plan), and the Thrift Plan for Employees of Sentinel Transportation Company (the Sentinel Thrift Plan; collectively, the DuPont Plans) invest, in exchange for units in a newly-established group trust (the Group Trust), where DCMC, a wholly owned subsidiary of E.I. duPont de Nemours and Company (DuPont), one of the sponsors of the DuPont Plans, acts as both a fiduciary for the Master Trust and the Group Trust.

Section II. Specific Conditions

This proposed exemption is subject to the following conditions:

(a) A fiduciary (the Independent Fiduciary), who is acting on behalf of the DuPont Plans, who is independent of and unrelated to DuPont and its subsidiaries, as defined in paragraph (e) of Section IV below, has the opportunity to review the proposed in kind transfer of the Debt Securities that are held in the Master Trust, to the Group Trust, in exchange for units in the Group Trust, and receives, in advance of the investment by the Master Trust in the Group Trust, full written disclosures concerning the Group Trust, which include, but are not limited to the following:

(1) A private offering memorandum describing the transaction;

(2) A table listing management fees, as negotiated under the applicable investment management agreements, and projected costs;

(3) A chart showing the effect of such fees and costs on an investment in the Group Trust for different amounts of Debt Securities managed in the Group Trust;

(4) A statement of the reasons why DCMC may consider such investment to be appropriate for the DuPont Plans;

(5) A statement on whether there are any limitations applicable to DCMC with respect to which assets of a DuPont Plan may be invested in the Group Trust and the nature of such limitations; and

(6) Copies of the proposed and final exemption.

(b) On the basis of the foregoing information, the Independent Fiduciary authorizes, in writing, the in kind transfer of the Debt Securities that are held on behalf of the DuPont Plans in the Master Trust to a series of subtrusts under the Group Trust, in exchange for units in the Group Trust. Such authorization is to be consistent with the responsibilities, obligations, and duties imposed on fiduciaries by part 4 of title I of the Act. Specifically, the Independent Fiduciary, before authorizing the transfer of assets by the DuPont Plans from the Master Trust to the Group Trust, determines that:

(1) The terms of the in kind transfer transaction, are fair to the participants in the DuPont Plans, and are comparable to, and no less favorable than, terms obtainable at arm's length between unaffiliated parties; and

(2) The in kind transfer transaction is in the best interest of the DuPont Plans and their participants and beneficiaries.

(c) No sales commissions, fees or other costs are paid by the DuPont Plans in connection with the in kind transfer transaction. Furthermore, no additional management fees are charged to the DuPont Plans by DCMC in the Group Trust.

(d) The in kind transfer transaction is a one-time transaction for the DuPont Plans, the transferred assets constitute a *pro rata* portion of all of the assets of the DuPont Plans that are held in the total return tier portion of the DuPont Stable Value Fund (the Fund) within the Master Trust prior to the transfer.

(e) The per unit value of the units representing interests in the subtrusts created under the Group Trust that are issued to each DuPont Plan have an aggregate value that is equal to the value of the Debt Securities transferred to the Group Trust on the date of the transfer, as determined in a single valuation performed in the same manner and at the close of business on the same day in accordance with Securities Exchange Commission Rule 17a–7 under the Investment Company Act of 1940 (the 1940 Act), as amended (Rule 17a–7), (using sources independent of DCMC), and the procedures established by the Master Trust to Rule 17a–7.

(f) Fair market value of the Debt Securities for which a current market price can be obtained is determined by reference to the last sale price for transactions reported in the consolidated transaction reporting system (the Consolidated System), a recognized securities exchange, or the National Association of Securities Dealers Automated Quotation System (the NASDAQ System). If there are no reported transactions or if the Debt Securities are not quoted in the NASDAQ System, fair market value is determined by taking the average of the highest current independent bid and lowest current independent ask prices as of the close of business as provided to the Master Trust's investment managers and the trustee of the Group Trust by three independent third-party commercial pricing sources. If a price is unavailable through such sources, the Master Trust's investment managers solicit bids from at least three independent dealers who stand ready to trade at such bids. All commercial pricing sources and dealers are pre-approved by the such investment managers. The fair market value of any illiquid debt securities is provided to the Independent Fiduciary by DCMC for review and approval of the methodology and the application of such methodology in valuing such Debt Securities.

(g) DCMC provides, within 30 days after the completion of the proposed transaction, a confirmation statement to the Independent Fiduciary containing the following information:

(1) The identity of each Debt Security that DCMC deemed suitable for transfer from the Master Trust to the Group Trust;

(2) The current market price of each Debt Security for purposes of the transfer, as determined on the date of such in kind transfer;

(3) The identity of each Debt Security that does not fall into at least one of the following categories: (i) A reported security; (ii) a security principally traded on an exchange; or (iii) a security quoted on the NASDAQ System;

(4) The identity of each pricing service or market maker consulted in determining the fair market value of the Debt Securities, and

[9] For purposes of this proposed exemption, references to specific provisions of the title I of Act, unless otherwise specified, refer also to the corresponding provisions of the Code.

(5) The aggregate dollar value of the Debt Securities that were held on behalf of the DuPont Plans in the Master Trust immediately before the in kind transfer, and the number of Group Trust units held by the Master Trust for the DuPont Plans immediately after the transfer (the related per unit value and the aggregate value).

(h) After the transfer of Debt Securities from the Master Trust to the Group Trust, the Independent Fiduciary performs a review verifying the pricing information supplied by the investment managers and the Group Trustee.

(i) The Debt Securities that are transferred from the Master Trust to the Group Trust are valued using the same methodology currently used by the Master Trust to value such securities. Similarly, the Group Trust uses the same valuation methodology.

(j) DCMC does not execute the in kind transfer transaction unless the Independent Fiduciary for the DuPont Plans consents to such in kind transfer in writing.

(k) DCMC does not execute the in kind transfer transaction unless the wrap contracts issued by certain unrelated banks and insurance companies to the Master Trust agree in advance to maintain the then-current book value for accounting purposes with respect to the assets transferred to the Group Trust. In addition, DCMC absorbs all costs associated with the commitments.

(l) Each of the DuPont Plan's dealings with the Master Trust, the Group Trust and DCMC is on a basis that is no less favorable to such Plan than dealings between the Group Trust and other holders of Group Trust units.

Section III. General Conditions

This proposed exemption is subject to the following general conditions:

(a) DCMC maintains for a period of six years the records necessary to enable the persons described below in paragraph (b) of this Section III to determine whether the conditions of this exemption have been met, except that (1) a prohibited transaction will not be considered to have occurred if, due to circumstances beyond the control of DCMC, the records are lost or destroyed prior to the end of the six year period, and (2) no party in interest other than DCMC shall be subject to the civil penalty that may be assessed under section 502(i) of the Act or to the taxes imposed by section 4975(a) and (b) of the Code if the records are not maintained or are not available for examination as required by paragraph (b) below.

(b)(1) Except as provided in paragraph (b)(2) of this Section III, and notwithstanding any provisions of sections 504(a)(2) and (b) of the Act, the records referred to in paragraph (a) are unconditionally available at their customary location for examination during normal business hours by:

(i) Any duly authorized employee or representative of the Department or the Internal Revenue Service;

(ii) The Independent Fiduciary described in paragraph (e) of Section IV; or

(iii) Any participant or beneficiary of the DuPont Plans or any duly authorized employee or representative of such participant or beneficiary.

(2) None of the persons described in paragraph (b)(1)(ii) and (iii) of this Section III shall be authorized to examine trade secrets of DCMC, or commercial or financial information which is privileged or confidential.

Section IV. Definitions

For the purposes of this proposed exemption,

(a) The term ''DCMC'' means DuPont Capital Management Corporation and any affiliate of DCMC, as defined below in Section IV(b).

(b) An ''affiliate'' of a person includes:

(1) Any person directly or indirectly through one or more intermediaries, controlling, controlled by, or under common control with the person;

(2) Any officer, director, employee, relative, or partner in any such person; and

(3) Any corporation or partnership of which such person is an officer, director, partner, or employee.

(c) The term ''control'' means the power to exercise a controlling influence over the management or policies of a person other than an individual.

(d) The term ''relative'' means a ''relative,'' as that term is defined in section 3(15) of the Act, (or a ''member of the family,'' as that term is defined in section 4975(e)(6) of the Code), or a brother, a sister, or a spouse of a brother or a sister.

(e) The term ''Independent Fiduciary'' means a fiduciary who is: (1) independent of and unrelated to DCMC and its affiliates, and (2) appointed to act on behalf of the Plan for all purposes related to, but not limited to, (A) the in kind transfer of the Debt Securities by the Master Trust to the Group Trust, (B) the Group Trust, in turn, transferring units equal in value to the assets of the Master Trust held in certain stable value funds. For purposes of this proposed exemption, a fiduciary will not be deemed to be independent of and unrelated to DCMC if: (1) Such fiduciary directly or indirectly controls, is controlled by or is under common control with DCMC; (2) such fiduciary directly or indirectly receives any compensation or other consideration in connection with any transaction described in this proposed exemption, except that an Independent Fiduciary may receive compensation for acting as an Independent Fiduciary from DCMC in connection with the transaction contemplated herein if the amount of payment of such compensation is not contingent upon or in any way affected by the Independent Fiduciary's ultimate decision; and (3) the annual gross revenue received by such fiduciary from DCMC and its affiliates during any year of its engagement, exceeds 5 percent (5%) of the Independent Fiduciary's annual gross revenue from all sources for its prior tax year.

(f) The term ''transferable securities'' means securities (1) for which market quotations are readily available (as determined under Rule 17a-7 of the 1940 Act) and (2) which are not: (i) Securities which, if distributed, would require registration under the Securities Exchange Act of 1933 (the 1933 Act); (ii) securities issued by entities in countries which (a) restrict or prohibit the holding of securities by non-nationals other than through qualified investment vehicles, such as the Mutual Funds, or (b) permit transfers of ownership of securities to be effected only by transactions conducted on a local stock exchange; (iii) certain portfolio positions (such as forward foreign currency contracts, futures, and options contracts, swap transactions, certificates of deposit and repurchase agreements) that, although they may be liquid and marketable, involve the assumption of contractual obligations, require special trading facilities or can only be traded with the counter-party to the transaction to effect a change in beneficial ownership; (iv) cash equivalents (such as certificates of deposit, commercial paper and repurchase agreements) which are not readily distributable; (v) other assets which are not readily distributable (including receivables and prepaid expenses), net of all liabilities (including accounts payable); and (vi) securities subject to ''stop transfer'' instructions or similar contractual restrictions on transfer. Notwithstanding the above, the term ''transferrable securities'' also includes securities that are considered private placements intended for large institutional investors, pursuant to Rule 144A under the 1933 Act, which are valued by the unrelated investments managers for the

DuPont Stable Value Fund (the Fund), or if applicable, by the Independent Fiduciary, which will confirm and approve all such valuations.

Summary of Facts and Representations

1. DCMC, a wholly owned subsidiary of DuPont, is a registered investment adviser under the Investment Advisers Act of 1940. DCMC is intended to qualify as an ''in house asset manager'' or ''INHAM'' [10] with respect to the DuPont Plans. DCMC acts as investment manager with respect to the Fund, which is offered as an investment option under each of the DuPont Plans. The assets of the Fund are held in the Master Trust. DCMC is responsible for managing the Fund, including certain underlying Debt Securities that, together with certain bank and insurance contracts, constitute a portion of the synthetic guaranteed investment contracts held by the Fund. However, DCMC directly manages approximately 20% of the Debt Securities, valued in excess of $3.5 billion, and it has appointed four outside investment managers to manage the remainder of the debt securities. DCMC receives no fees for its services to the DuPont Plans, but it does charge back to the DuPont Plans, a *pro rata* share of direct costs related to its management activities.

2. The DuPont Plans are tax-qualified, defined contribution plans described in section 401(a) of the Code. Each of the DuPont Plans offers a ''cash or deferred arrangement,'' matching contributions, and may also offer discretionary employer contributions. Each of the DuPont Plans offers a selection of investment options to participants in a manner intended to satisfy the requirements of an ERISA ''section 404(c) plan.'' [11] Several of the investment options offered to ERISA section 404(c) plans are common among the DuPont Plans, including the Fund. The common funds are pooled under the Master Trust while investment options that are unique to a DuPont Plan are held under a separate trust. The separate trusts and the Master Trust are exempt from taxation under the provisions of section 501(a) of the Code. As of January 31, 2004, the DuPont Plans covered approximately 68,000 participants and beneficiaries.[12] The fair market value of the DuPont Plans' assets as of January 31, 2004 exceeded $9.5 billion.

The Named Fiduciary of each DuPont Plan is responsible for the selection of investment options for such Plan and for the selection of investment advisers and managers.[13] Each DuPont Plan permits the Named Fiduciary to appoint investment managers and to delegate to an investment manager the authority to appoint additional investment managers. The Named Fiduciary of each DuPont Plan has delegated investment fiduciary authority with respect to investment in the Fund to the Vice President DuPont Capital Management (DCM), [14] who, in turn, has entered into an investment management agreement with DCMC to manage assets of the Fund and to appoint additional investment managers to manage assets of the Fund.

3. The Fund constitutes one of several investment options made available to participants in the DuPont Plans, and as of September 30, 2002, it represented more than 60% of total combined assets of such plans. The Fund is a ''stable value fund'' with an investment objective of providing a stable rate of return that exceeds the rate of return on money market funds with comparable risk. The Fund is also managed to accommodate daily participant-related liquidity needs as provided by the DuPont Plans. As such, the Fund is structured into two tiers (a) a ''liquidity tier,'' which holds cash and other marketable securities consisting of one or two short-term synthetic guaranteed investment contracts (synthetic GICs), which are backed by mutual or commingled bond funds, maturing guaranteed investment contracts (GICs), maturing separate account GICs, and or maturing synthetic GICs; and (b) a ''total return tier'' consisting entirely of synthetic GICs, which are managed on a total return basis with no established maturity date (known as ''evergreen synthetic GICs'').[15] The liquidity tier and the total return tier each comprise approximately 50% of the Fund's assets. The overall rate of return on the Fund represents a combination of the rates of return of each of the tiers.

4. The proposed Group Trust, which will be utilized for the total return tier of the Fund, will be a group trust described in Rev. Rul. 81–100. The Group Trustee, which has been selected by DCMC, will be State Street Bank & Trust (SSB), a subsidiary of State Street Corporation.[16] SSB will act as a directed trustee with respect to the Group Trust.[17]

5. Besides the DuPont Plans, the Investment Plan for Salaried Employees of CONSOL Energy, Inc. (the CONSOL Energy Plan) a defined contribution plan sponsored by CONSOL Energy, Inc. (CONSOL Energy), an employer who is not affiliated with DuPont but for which DCMC has been appointed as an investment manager, may participate in the establishment of the Group Trust. CONSOL Energy was previously a wholly owned business of DuPont. In connection with the divestiture of CONSOL Energy, assets were transferred to a stable value fund established under the CONSOL Energy Plan. As of September 30, 2003, the CONSOL Energy Plan had total assets of $917,209,067.07 and 5,560 participants. The Independent Fiduciary of the CONSOL Energy Plan appointed DCMC as an investment manager of the Plan's stable value fund and of the underlying Debt Securities in such fund. As with the Fund, DCMC has appointed four

[10] See Prohibited Transaction Class Exemption (PTCE) 96–23 (61 FR 15975, April 10, 1996) (the INHAM Exemption).

[11] *See* 29 CFR 2550.404c–1.

[12] As of January 31, 2004, the SIP covered approximately 66,866 participants and it had total assets in excess of $9.5 billion. As of January 31, 2004, the Sentinel Thrift Plan covered approximately 485 participants and it had total assets of approximately $22.1 million. As of January 31, 2004, the DSG Savings Plan covered approximately 91 participants and it had total assets of approximately $8.6 million. Generally, there is no overlap of participants.

[13] The Named Fiduciary for SIP is the Vice President of DuPont Capital Management; Named Fiduciary authority for the Sentinel Thrift Plan is divided between Sentinel Transportation, L.L.C. and an Employee Benefit Plans Board; and the Named Fiduciary for the DSG Savings Plan is Optimum Quality Grains, Inc.

[14] DCM is a division of DuPont, while DCMC is a wholly owned subsidiary of DuPont.

[15] Unlike traditional GICs which contain a contractual promise to pay a specified rate of interest over the life of the contract, a synthetic GIC consists of a discreet portfolio of debt securities and a ''wrap'' contract associated with the portfolio that guarantees a rate of return with respect to the portfolio over a crediting period. Wrap contracts are typically issued by banks and insurance companies. Synthetic GICs became an important component of stable value funds after the collapse of a few large GIC issuers in the early 1990's. Since the investing plan retains the portfolio of debt securities underlying the synthetic GIC, the potential loss to the plan is limited to the value of the wrap contracts.

[16] DCMC is not affiliated with any banks or insurance companies used as wrap providers for the Fund. State Street Global Advisors (SSGA), a division of SSC, and DCMC are 50–50 joint venture partners in Wilton Asset Management, a marketer of closed-end private equity funds, SSB has not issued wrap contracts to the DuPont Plans and it is not anticipated that SSB will issue wrap contracts to Plans that invest in the Group Trust. Furthermore, SSB will not have any role in the selection of the wrap issuers or investment managers.

[17] As Group Trustee, SSB will be entitled to receive the following fees relating to the Group Trust: asset-based fees, transaction fees, pooled accounting fees, performance reporting fees, securities lending fees, short-term investment fees, and reimbursement for audit, courier, communication and other applicable miscellaneous expenses. According to DCMC, these fees are statutorily exempt under section 408(b)(2) of the Act and the regulations promulgated thereunder. However, the Department expresses no opinion herein on whether such fees satisfy the requirements of section 408(b)(2) of the Act.

investment managers to assist in the management of the Debt Securities in the CONSOL Energy Plan's stable value fund.

DCMC has not secured any commitments from the CONSOL Energy Plan to participate in the Group Trust. However, it anticipates such Plan's investment. If the CONSOL Energy Plan does choose to participate in the Group Trust, DCMC does not believe there would be a violation of section 406(a)(1)(D) of the Act because the decision to invest in the Group Trust will be made by a fiduciary for the CONSOL Energy Plan who is independent of DuPont and its subsidiaries. DCMC states that the fact that it will realize a benefit incidental to the transaction does not cause the transaction to violate section 406(a)(1)(D) of the Act. Therefore, this exemption will apply only to the DuPont Plans currently investing in the Master Trust.

In addition, to the DuPont Plans and potentially, the CONSOL Energy Plan, tax-qualified plans of other unrelated employers will be allowed to participate in the Group Trust at a future date. However, DCMC will have no prior management responsibilities with respect to such plans.

6. Thus, the remaining parties to the proposed transaction will be the investment managers DCMC will appoint as fiduciaries to assist it in the management of Group Trust assets. DCMC will retain the discretion to appoint or remove any or all of such managers. In this regard, DCMC may appoint four unrelated managers who will manage approximately 20% each of the Debt Securities held in the Group Trust or retain the existing managers.

7. DCMC will propose to the Independent Fiduciary for the DuPont Plans, the establishment of the Group Trust to hold the Debt Securities which DCMC currently manages for the Fund. Specifically, the Independent Fiduciary, before authorizing the transfer of assets by the DuPont Plans from the Master Trust to the Group Trust, will determine that (a) the terms of the transaction, are fair to the participants in the DuPont Plans and are comparable to, and no less favorable than, terms obtainable at arm's length between unaffiliated parties; and (b) the transaction is in the best interest of the DuPont Plans, their participants and beneficiaries.

In addition, the Independent Fiduciary will receive written disclosures that will include, but will not be limited to, the following information: (a) A private offering memorandum describing the transaction; [18] (b) a table listing management fees, as negotiated under the applicable investment management agreements, and projected costs; (c) a chart showing the effect of such fees and costs on an investment in the Group Trust for different amounts of Debt Securities managed in the Group Trust; (d) a statement of the reasons why DCMC may consider such investment to be appropriate for the DuPont Plans; (e) a statement of whether there are any limitations applicable to DCMC with respect to which assets of a DuPont Plan may be invested in the Group Trust and the nature of such limitations; and (f) copies of the proposed and final exemption.

As stated above, DCMC will establish the Group Trust as a trust intended to qualify as tax-exempt under Rev. Rul. 81–100. DCMC will then, upon approval of the Independent Fiduciary, transfer the Debt Securities under DCMC's management into five separate funds or subtrusts established under the Group Trust for each investment manager of Debt Securities.[19] In exchange for the Debt Securities transferred to the Group Trust, the DuPont Plans will receive units in the Group Trust of equal value to the Debt Securities transferred to the Group Trust in a one-time transaction. The Debt Securities will have readily ascertainable market values.[20] The value of the units will be determined by dividing the total fair market value of the transferred Debt Securities on the day of transfer by the number of Group Trust units issued to the DuPont Plans. No sales commissions, fees or other costs will be paid by the DuPont Plans in connection with the in kind transfer transaction.

8. The wrap contracts held by the Master Trust will not be transferred to the Group Trust. Instead, DCMC will secure commitments from the banks and insurance companies which issued the wrap contracts to substitute the Group Trust units under the wrap contracts for the Debt Securities that are transferred to the Group Trust. DCMC will cover any additional costs associated with the wrap contract commitments. Under the terms of the agreement, the book value of the evergreen synthetic GICs as a whole after the substitution of Group Trust units will not be less than the book value of the evergreen synthetic GICs prior to the transfer of Debt Securities to the Group Trust.[21]

9. Accordingly, DCMC requests an administrative exemption from the Department in order to allow it to engage in the in kind transfer transaction. It is represented that the exchange of Debt Securities held by the Master Trust through the Fund for Group Trust units constitutes a prohibited transaction described in section 406(a) of the Act due to the ''sale or exchange'' of plan assets for Group Trust units. It is also represented that DCMC is a fiduciary of the DuPont Plans and will cause such plans to transfer Debt Securities to the Group Trust in exchange for Group Trust units. Further, DCMC will continue to manage the assets as investment manager of the Group Trust after the in kind transfer. Because DCMC is directing an exchange in which it is on both sides of the transaction, DCMC does not believe the INHAM Exemption applies to the contemplated transaction.

In addition, it is represented that the establishment of the Group Trust with Fund assets may result in a violation of section 406(b) of the Act because of the potential for increased management fees payable to DCMC in the future by unrelated plans willing to invest in the Group Trust. Although the applicant believes that the establishment of the Group Trust with assets of the DuPont Plans will likely result in a net decrease in fees and costs to the Plans over time, DCMC states that the expected future increase in asset values as assets accumulate and as unrelated plans contribute assets to the Group Trust may result in larger fees collected by DCMC

[18] The private offering memorandum will contain substantially the same information that would be included in a prospectus for a registered security. Moreover, the DuPont Plans will have an opportunity to request whatever additional information they may need for purposes of evaluating the offering.

[19] For the DuPont Plans, all of the Debt Securities held in the total return tier of the Fund will be transferred to the Group Trust.

[20] It is possible that an investment manager for the Fund may have purchased Debt Securities through a private placement offering. Such securities may either be ''144A private placements,'' which trade similarly to public securities or others that are not as readily tradable. The latter category of private placement is intended to be held to maturity or traded on a limited basis. The value of such securities will be determined by an unrelated Fund investment manager or if applicable, by the Independent Fiduciary on the transfer date based on credit quality, length to maturity and current interest rates. Based on values on September 30, 2002, less than 3.2% of the Group Trust is expected to be invested in such Debt Securities.

[21] According to AICPA Statement of Position 94–4, ''book value'' is defined as the measurement of value of stable value investments, including synthetic GICs. Generally, book value consists of the amount paid for the underlying portfolio of debt securities, plus the interest credited with respect to the portfolio under the terms of the wrap contract. The wrap contract specifies the types of securities including units of funds that can be wrapped. Since the wrap will apply to units after the transfer to the Group Trust, the applicant states that the wrap contract likely will require minor modification to continue book value treatment with respect to the units at the same levels that applied to the Debt Securities before the transfer to the Group Trust.

than DCMC would have collected if the Group Trust had not been established.

10. DCMC is also requesting that the exemption encompass DCMC's methodology for valuing Group Trust units utilized in PTCE 97–41 (62 FR 42830, August 8, 1997), but adapted to a non-bank context. In this regard, PTCE 97–41 provides a methodology for converting interests in bank-sponsored collective investment funds to mutual funds for which the bank acts as an investment adviser. Specifically, DCMC proposes valuing the exchanged Debt Securities on the transfer date in exchange for Group Trust units in a manner consistent with PTCE 97–41.[22]

Thus, fair market value will be determined by the average of the highest current independent bid and the lowest current independent offer as of the close of business as provided to the investment managers by three independent third-party commercial pricing sources. If a price is unavailable through such sources, the investment managers will solicit bids from at least three independent dealers who stand ready to trade at such bids. All commercial pricing sources and dealers will be pre-approved by the investment managers. The fair market value of any private placement Debt Securities that are not readily tradable will be provided by DCMC to the Independent Fiduciary for review and approval of the methodology and the application of such methodology in valuing such Debt Securities.[23]

In addition, as noted in Representation 8, DCMC will not make any transfer of Debt Securities to the Group Trust without the advance agreement of the wrap issuers to wrap the Group Trust units at a book value that is not less than the book value reported to the Fund by the wrap issuers prior to the transfer.[24] Also, DCMC will pay for any increase.

11. Thus, with respect to the in kind transfer transaction, Group Trust units will be valued by the Group Trustee based on the aggregate asset value of the Debt Securities held by the Group Trust as of the transfer date as determined in accordance with Rule 17a–7, divided by the number of units issued. The unit value, market value of exchanged securities and the number of units issued will be provided to the Independent Fiduciary of the DuPont Plans within 30 days of the transfer to the Group Trust.

In this regard, the confirmation statement will contain the following information:

(a) The identity of each Debt Security that DCMC deemed suitable for transfer from the Master Trust to the Group Trust; (b) the current market price of each Debt Security for purposes of the transfer as determined on the date of the in kind transfer; (c) the identity of each Debt Security that does not fall into at least one of the following categories: a reported security; a security principally traded on an exchange; or a security quoted on the NASDAQ System; (d) the identity of each pricing service or market maker which was consulted in determining the fair market value of the Debt Securities, and the aggregate dollar value of the Debt Securities that were held on behalf of the DuPont Plans in the Master Trust immediately before the in kind transfer transaction and the number of Group Trust units held by the Master Trust for the DuPont Plans immediately after the in kind transfer transaction (the related per unit value and the aggregate value).

12. Once the Group Trust is established, DCMC expects that plans of unrelated employers will invest therein. It is anticipated that most of the investing plans will do so to fund all or a portion of their stable value funds. However, some plans may invest solely to hold a diversified portfolio of debt securities without associating the Group Trust units with a wrap contract. Because the valuation of Group Trust units is not dependent on the existence of a wrap contract, the number of issued units will be determined on the day of the transfer of any Debt Securities by dividing the fair market value of the transferred Debt Securities by the unit value of the applicable funds in the Group Trust. If cash is transferred, the number of units issued will be the cash amount divided by unit value, as determined by the Group Trustee.

13. If the Group Trust is established as proposed, DCMC will not charge an investment management fee to the DuPont Plans, but it will continue to charge to the DuPont Plans a proportionate share of direct costs incurred by the subtrust under the Group Trust managed by DCMC.[25] In addition, DCMC or an affiliate will charge the DuPont Plans direct costs for investment management of the Group Trust, only after full disclosure of the Group Trust's fee arrangement to the Independent Fiduciary. The overall fee structure will be similar, if not less costly, to the DuPont Plans than the fee structure currently in effect.

It is anticipated that DCMC's (or an affiliate's) total reimbursed expenses attributable to the assets of the DuPont Plans in the Group Trust will not exceed (and maybe less) than the amount of such reimbursed expenses before the transfer of DuPont Plan's assets in the Master Trust to the Group Trust. The cost savings, are expected to result from the ability of DCMC to consolidate investment management decisions and resources over a larger portfolio as opposed to separate and smaller portfolios maintained under separate trusts. In addition, DCMC expects investment management fees, as a percentage of assets, will decline as the asset base increases in size.

14. In order to address the potential conflict caused by the establishment of the Group Trust with Fund assets, the DuPont Plans will retain an independent fiduciary to review the proposed establishment of the Group Trust. DuPont or DCMC will pay the Independent Fiduciary a flat fee in advance of its review of the proposed

[22] In this regard, the ''current market price'' for specific types of Debt Securities will be determined as follows:

(a) If the security is a ''reported security'' as the term is defined in Rule 11Aa3–1 under the 1934 Act, the last sale price with respect to such security reported in the Consolidated System on the Group Trust valuation date; or if there are no reported transactions in the Consolidated System that day, the average of the highest current independent bid and the lowest current independent offer for such security (reported pursuant to Rule 11Ac1–1 under the 1934 Act), as of the close of business on the Group Trust valuation date.

(b) If the security is not a reported security, and the principal market for such security is an exchange, then the last sale on such exchange on the Group Trust valuation date; or if there are no reported transactions on such exchange that day, the average of the highest current independent bid and lowest current independent offer on such exchange as of the close of business on the Group Trust valuation date.

(c) If the security is not a reported security and is quoted in the NASDAQ system, then the average of the highest current independent bid and lowest current independent offer reported on NASDAQ as of the close of business on the Group Trust valuation date.

(d) For all other securities, the average of the highest current independent bid and lowest current independent offer as of the close of business on the Group Trust valuation date, determined on the basis of reasonable inquiry. (For securities in this category, DCMC represents that it will obtain quotations from at least three sources which were either broker-dealers or pricing services independent of and unrelated to DCMC and, where more than one valid quotation was available, used the average of the quotations to value the securities, in conformance with interpretations by the SEC and practice under Rule 17a–7.)

[23] As stated previously, as of September 30, 2002, such securities comprise less than 3.2% of the expected value of the Group Trust.

[24] The ''wrap'' value will be the difference between the fair (or market) value of the underlying Debt Securities and the book (or contract) value of each synthetic GIC. According to DCMC, AICPA Statement of Position SOP 94–4 values stable value investment contract, at contract value. DCMC further states that all of the contracts contained in the Fund satisfy the requirement of SOP 94–4.

[25] Such costs will be allocated equally among subtrust units owned by the DuPont Plans.

transaction.[26] The fee is payable regardless of whether the proposed transaction is consummated. Prior to approving the transaction, the Independent Fiduciary will receive an offering memorandum for the proposed transaction and will be given access to Fund reports and transaction data in order to determine whether the proposed transaction is in the best interests of the participants of the DuPont Plans. Should the Independent Fiduciary approve the transaction and direct the exchange of Debt Securities for Group Trust units, the Independent Fiduciary will receive confirmation from DCMC of the transfer of Debt Securities from the Master Trust to the Group Trust. The Independent Fiduciary will also have the opportunity to confirm that the transfer was executed as described in the offering memorandum and to confirm and approve the proper valuations for the Debt Securities, including the private placements. The Independent Fiduciary, before authorizing the transfer of the DuPont Plans assets to the Group Trust, must determine that the terms of the transfer are fair to the participants in the DuPont Plans and comparable to and no less favorable than terms obtainable at arm's length between unaffiliated parties and that the transfer is in the best interest of the DuPont Plans and their participants and beneficiaries.

15. DCMC represents that U.S. Trust Company, N.A. (U.S. Trust) has confirmed its independence from DCMC and is qualified to serve as the Independent Fiduciary for the DuPont Plans with respect to the proposed in kind transfer transaction. U.S. Trust, in turn, represents that it understands and will accept the duties, responsibilities and liabilities in acting as a fiduciary under the Act for the Plan. U.S. Trust represents that as the Independent Fiduciary, it will be responsible for (a) analyzing, from an investment perspective, the fairness and reasonableness of the methodology used with respect to the in kind transfer transaction; and (b) giving its opinion as to the fairness and reasonableness of such methodology, as compared with a redemption for cash and subsequent reinvestment of such cash, based on such analysis. This determination and opinion are set forth in a written report dated December 17, 2003 (the Report). Specifically, in the Report, U.S. Trust concludes that—

(a) The in kind transfer transaction will likely avoid certain transaction costs otherwise incurred in a cash redemption;

(b) The Debt Securities associated with the proposed transaction will be calculated based on the Master Trust's respective statements of assets and liabilities, valued in accordance with the pricing procedures established by the Master Trust's Board of Trustees. In this regard, U.S. Trust has reviewed a sample spreadsheet developed by DCMC to calculate the exact number of Debt Securities to be transferred, and believes the information provided to be conceptually and mathematically correct;

(c) All Debt Securities held by the Master Trust will be ''qualifying'' securities;

(d) The proposed transaction will be in compliance with the Plan's investment guidelines;

(e) The methodology used to conduct the in kind transfer transaction will be comparable to, and no less favorable than, similar in kind transfer transactions reached at arm's length between unaffiliated parties.

U.S Trust represents that, if this proposed exemption is granted and the in kind transfer transaction is thereafter undertaken, it will be responsible for updating its findings and opinions to confirm whether such findings and opinions are applicable as of the anticipated date of such transaction. In this regard, U.S. Trust states that it will review the in kind transfer transaction and confirm in writing whether such transaction has been effectuated consistent with the required criteria and procedures set forth in the Report. In carrying out this duty, U.S. Trust represents that, if the proposed exemption is granted and the in kind transfer transaction occurs, it will conduct a post-exemption review, which will include (a) reviewing each DuPont Plan's current investment policy guidelines; (b) reviewing each DuPont Plan's investment portfolio and the Master Trust's assets as of the most recent common date for which such data is available; and (c) ascertaining whether the policies, procedures and controls established for effectuating the transfer remains unchanged. Moreover, U.S. Trust represents that it will conduct a post-transfer review to provide an additional safeguard to the Plan. In this regard, U.S. Trust will evaluate and test whether the in kind transfer transaction has been effectuated consistent with the required criteria and procedures and confirm this in writing. Consistent with this requirement, U.S. Trust represents that if the exemption is granted and the in kind transfer transaction occurs, it will update the findings and opinions as set forth in the Report so as to confirm whether they still apply as of the expected date of the transfer. U.S. Trust will provide its opinion that the methodologies for the proposed transaction is fair to the DuPont Plans and reasonable in all material respects. In addition, U.S. Trust will state that the proposed transaction is in the interest of the participants and beneficiaries of the DuPont Plans since the anticipated costs savings are likely to be material. Further, U.S. Trust will conclude that if the exemption is granted, and all other essential facts and circumstances of the in kind transfer transaction remains materially unchanged at the time DCMC seeks to effectuate the transaction, it will issue a favorable recommendation regarding the commencement of such effectuation.

16. The costs of applying for the exemption, establishing the Group Trust and preparing disclosure documents for review by the Independent Fiduciary will be borne by DuPont or DCMC and not by the DuPont Plans. Furthermore, DCMC will maintain for a period of six years in a manner that is accessible for audit and examinations, records necessary to enable certain persons, such as representatives from the Department, the Service, the Independent Fiduciary, or any participant or beneficiaries of the DuPont Plans to determine whether the conditions of the exemption have been met.

The exchange of Debt Securities by the Master Trust for units in the Group Trust will not result in any commissions being paid to DCMC or any of the investment managers appointed by the DuPont Plans. For the exchange of Debt Securities for Group Trust units, the Group Trustee will calculate the unit value based on the market value of the Debt Securities transferred so that the value of the units issued to the Fund is equal to the fair market value of the Debt Securities transferred. Statements indicating the fair market value at which the Debt Securities are exchanged, the number of units issued in connection with such exchange, and the calculation of unit value will be provided to the Independent Fiduciary.

17. In summary, it is represented that the proposed transaction will satisfy the statutory criteria for an exemption under section 408(a) of the Act for the following reasons:

(a) The in kind transfer transaction will be a one-time transaction, and for

[26] The fee may be a flat fee or hourly fee. If a flat fee, it will be paid in advance of the Independent Fiduciary's review. If an hourly fee, the fee will be estimated and substantially paid in advance to the Independent Fiduciary as a retainer. The purpose of the advance payment is to remvoe any appearance that the independent Fiduciary's fee is contingent on its recommendation to the DuPont Plans.

the DuPont Plans, the transferred assets will constitute a *pro rata* portion of all of the assets of the DuPont Plans that are held in the total return tier portion of the Fund, which comprises part of the Master Trust prior to the transfer.

(b) The DuPont Plans will pay no sales commissions, or other similar fees in connection with the in kind transfer transaction. Furthermore, no additional management fees will be charged to the DuPont Plans by DCMC in the Group Trust.

(c) The assets transferred to the Group Trust pursuant to the in kind transfer transaction will consist of Debt Securities which are deemed to be ''transferable securities.''

(d) Each DuPont Plan will receive a proportionate share of the transferable securities which will equal in value to the number of units in the Group Trust such plan will receive, as determined in a single valuation performed in the same manner in accordance with valuation procedures prescribed by Rule 17a–7 of the 1940 Act.

(e) Prior to the in kind transfer transaction, DCMC will provide to the Independent Fiduciary a full and detailed written disclosure of information regarding the transaction and, on the basis of the foregoing information, such Independent Fiduciary will provide written authorization for the transaction.

(f) The Independent Fiduciary will determine that (1) the terms of the in kind transfer transaction are fair to the participants in the DuPont Plans, and are comparable to, and no less favorable than, terms obtainable at arm's length between unaffiliated parties; and (2) the in kind transfer transaction is in the best interest of the DuPont Plans and their participants and beneficiaries.

(g) Not later than 30 days after the completion of an in kind transfer transaction, DCMC will provide to the Independent Fiduciary for the DuPont Plans, a written confirmation regarding such transaction.

(h) Subsequent to the in kind transfer transaction, the Independent Fiduciary will perform a post-transaction review which will include, among other things, a random sampling of the pricing information supplied by the Group Trustee.

(i) Each of the DuPont Plan's dealings with the Master Trust, the Group Trust and DCMC will be on a basis that is no less favorable to such Plan than dealings between the Group Trust and other holders of Group Trust units.

(j) The Debt Securities that are transferred from the Master Trust to the Group Trust will be valued using the same methodology currently used by the Master Trust to value such securities. Similarly, the Group Trust will use the same valuation methodology.

(k) DCMC will not execute the in kind transfer transaction unless the Independent Fiduciary for the DuPont Plans consents to such in kind transfer in writing.

(l) DCMC will not execute the in kind transfer transaction unless the wrap contracts issuers to the Master Trust agree in advance to maintain the then-current book value for accounting purposes with respect to the assets transferred to the Group Trust.

Notice to Interested Persons

DCMC represents that it will distribute, by either first class mail or by e-mail to DuPont Plan participants who have affirmatively elected to access their account statements electronically, a copy of the notice of proposed exemption (the Notice) within thirty (30) days of the date of such Notice is published in the **Federal Register**. The Notice will also be sent to the Named Fiduciaries and the Independent Fiduciary for the DuPont Plans. The Notice will include a copy of the proposed exemption, as published in the **Federal Register**, and a supplemental statement, as required pursuant to 29 CFR 2570.43(b)(2), which informs all interested persons of their right to comment on and/or request a hearing with respect to the proposed exemption. Comments and requests for a public hearing are due within sixty (60) days following the publication of the proposed exemption in the **Federal Register**.

[Exemption Application No. D–11185]

Proposed Exemption

I. Covered Transactions

The Department is considering granting an exemption under the authority of section 408 of the Act and section 4975 of the Code, and in accordance with the procedures set forth in 29 CFR part 2570, subpart B, 55 FR 32836, 32847 (August 10, 1990).[27] If the exemption is granted, the restrictions of sections 406(a)(1)(A) through(D), 406(b)(1), and 406(b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the proposed purchase by the Union of Needletrades, Industrial and Textile Employees (UNITE) and certain regional entities affiliated with and chartered by UNITE (the UNITE Affiliates) from the UNITE National Retirement Fund (the Pension Fund) of shares of perpetual cumulative convertible preferred stock (the Preferred Stock) representing fifteen percent (15%) of the outstanding equity interests in the ALICO Services Corporation (ASC), a wholly-owned entity of the Pension Fund; provided the conditions set forth in section II, below, are satisfied.

II. Conditions

Prior to entering into the transactions, (a) an independent, qualified fiduciary,(the Independent Fiduciary), as defined in section III(a), below, determines, on behalf of the Pension Fund, whether the Preferred Stock should be sold to UNITE and to the UNITE Affiliates; (b) the Independent Fiduciary approves of the terms underlying the Preferred Stock to be issued by ASC; (c) the Independent Fiduciary negotiates and approves of the terms of the sales of the Preferred Stock to UNITE and to the UNITE Affiliates; (d) the Independent Fiduciary monitors the terms of the transactions and ensures that ASC, UNITE, and the UNITE Affiliates comply with the approved terms of the sales of the Preferred Stock; (e) the Independent Fiduciary determines that the terms of the sales of the Preferred Stock are no less favorable to ASC than terms that would be offered to an unrelated third party under similar circumstances; (f) the Independent Fiduciary determines that the purchase price for the Preferred Stock paid by UNITE and by the UNITE Affiliates is no less than the fair market value of such Preferred Stock, as of the date each of the transactions is entered; (g) the Independent Fiduciary determines the fair market value of the Preferred Stock, as of the date each of the transactions is entered; (h) in determining the fair market value of the Preferred Stock, the Independent Fiduciary obtains an appraisal from an independent qualified appraiser selected by the Independent Fiduciary and ensures that the appraisal and the Independent Fiduciary's analysis of the appraisal are consistent with sound principles of valuation and the elements described in paragraph 8, in the Summary of Facts and Representations in this proposed exemption; and (i) the Pension Fund incurs no fees, commissions, or other charges or

[27] For purposes of this exemption, references to specific provisions of title I of the Act, unless otherwise specified, refer also to the corresponding provisions of the Code.

expenses as a result of its participation in the transactions other than the fees incurred in requesting this exemption and the fee payable to the Independent Fiduciary.

III. Definitions

For purposes of this exemption:

(a) the term, ''Independent Fiduciary,'' means an individual or firm which is independent of and unrelated to ASC, UNITE, the UNITE Affiliates, and any other party to the subject transactions (the Parties), and which has acknowledged and agreed that it is a fiduciary appointed to act on behalf of the Pension Fund for all purposes related to the subject transactions. For purposes of this exemption:

(1) A fiduciary will not be deemed to be independent of and unrelated to the Parties, if:

(i) such fiduciary directly or indirectly controls, is controlled by or is under common control with such Parties;

(ii) such fiduciary directly or indirectly receives any compensation or other consideration from such Parties in connection with the transactions described in this proposed exemption; except that an Independent Fiduciary may receive compensation for acting as an Independent Fiduciary in connection with the transactions contemplated herein, if the amount or payment of such compensation is not contingent upon or in any way affected by the Independent Fiduciary's ultimate decisions with regard to the subject transactions;

(2) No individual or firm shall serve as an Independent Fiduciary during any year in which annual gross revenues received from business with the Parties for that year exceeds five (5) percent of such individual's or firm's annual gross revenues from all sources for the prior tax year; and

(3) The individual or firm selected as an Independent Fiduciary must be qualified to serve as fiduciary and to carry out the duties responsibilities, as set forth herein.

Summary of Facts and Representations

1. The Pension Fund is a multiemployer pension plan jointly trusteed by individuals selected by UNITE and individuals selected by various employers who contribute to the plan (the Trustees). Certain Trustees of the Pension Fund are also officers of UNITE and directors of ASC. The Pension Fund provides pension benefits to workers covered by collective bargaining agreements in the cotton garment and other related unionized segments of the garment, textile, laundry, and allied industries. The Pension Fund is an ''employee pension benefit plan,'' as defined under section 3(2) of the Act. As of December 31, 2001, there were approximately 95,995 participants and beneficiaries in the Pension Fund. As of December 31, 2001, the approximate aggregate fair market value of the total assets of the Pension Fund was $577,684,500. Effective December 1, 2003, the name of the Pension Fund was changed from the UNITE National Cotton Retirement Fund to the Unite National Retirement Fund as a result of a merger with the ILGWU National Retirement Fund. It is represented that the merged fund has approximately $1.5 billion in assets.

2. ASC is a holding company organized under the laws of New York that is wholly-owned by the Pension Fund. The Trustees of the Pension Fund appoint the ASC Board of Directors (the Board). ASC wholly owns each of the following four (4) subsidiaries: (a) Amalgamated Life Insurance Company (ALICO); (b) Alicare Inc. (Alicare); (c) Alicare Medical Management, Inc. (AMM); and (d) UNITE Fund Administrators, Inc. (UFA) (collectively, the ASC Subsidiaries).

ALICO provides life, disability, and medigap insurance primarily to unions and union-sponsored trust funds. It also provides fully retrospectively rated group life insurance to various jointly administered funds.

Alicare is a full-service third-party fund administrator focusing on the market for such service among Taft-Hartley plans. Alicare also offers computer services, insurance brokerage and printing services. Alicare's services are delivered through its four (4) divisions: (a) Alicare, (b) Alicomp, (c) Aligraphics and (d) Amalgamated Agency.

AMM provides medical cost management services, including utilization management, comprehensive claims cost containment, and a 24 Hour Nurse HelpLine to provide health information and education to patients.

UFA, a not-for-profit tax-exempt enterprise, provides third-party administration for the Pension Fund and several other funds sponsored by UNITE and entities affiliated with UNITE (collectively, the Patron Funds).[28] The specific services provided by UFA include claims processing, distribution and preparation of plan documents, collections of contributions by employers and participants, record retention and reporting to government authorities.[29]

3. UNITE was formed in 1995 by the merger of two unions, the International Ladies Garment Workers Union (ILGWU) and the Amalgamated Clothing and Textile Workers Union (ACTWU). Under the merger agreement, UNITE is deemed a consolidation and continuation of ILGWU and ACTWU and their respective affiliates. Further, UNITE has several affiliated organizations, the UNITE Affiliates, which are chartered by UNITE. UNITE members work in the apparel and textile industries, industrial laundries, distribution and retail, auto parts and auto supply, and other industries in the United States and Canada.

4. The Pension Fund has requested an individual exemption in order that ASC may issue and sell shares of stock to UNITE and to certain UNITE Affiliates. As set forth in more detail below, it is represented that the proposed transactions will provide the Pension Fund: (i) With the ability to increase the value of its ownership interests in ASC by providing ASC with access to additional working capital, (ii) with the

[28] The Patron Funds for which UFA currently provides services include, but are not limited to: the Pension Fund; UNITE National Cotton Health Fund; Amalgamated Insurance Fund-Insurance Fund; Amalgamated Insurance Fund-Retirement Fund; Laundry & Dry Cleaning Workers Health Fund, UNITE; Laundry & Dry Cleaning Workers Pension Fund, UNITE; Amalgamated Washable Sportswear and Allied Industries Insurance Fund; Amalgamated Washable Clothing Sportswear and Allied Industries Retirement Fund; Amalgamated Retail Fund; Barney's Retail Employees Union Health Fund; ILGWU Death Benefit Fund; and UNITE Staff Retirement Plan, ACTWU Unit.

[29] The applicant has not requested, and the Department is not providing any relief, herein, for transactions involving the provision of services by UFA to the any of the Patron Funds, including the Pension Fund, nor is the Department providing relief for the decision by the fiduciaries of the such funds to retain UFA to provide such services. In the opinion of the applicant, prohibited transactions would not be an issue for the Pension Fund where: (1) the interested Pension Fund Trustees recuse themselves from any decision regarding the retention of UFA, *see*, Advisory Opinion 99–09A (AO 99–09A) issued on May 21, 1999, in a letter to Patricia A. Shlonsky, and (2) the services are provided to the Pension Fund by UFA in accordance with Section 408(b)(2) of the Act.

AO 99–09A states that a fiduciary may avoid engaging in an act described in section 406(b)(1) and 406(b)(2) by removing himself or herself from all consideration by the plan of whether or not to engage in such a transaction, and by not otherwise exercising, with respect to the transaction, any of the authority, control or responsibility which makes him or her a fiduciary, absent any arrangement, agreement or understanding with respect to who will ultimately provide the services in question.

Section 408(b)(2) of the Act provides a statutory exemption for ''contracting or making reasonable arrangements with a party in interest for office space, or legal, accounting, or other services necessary for the establishment or operation of the plan, if no more than reasonable compensation is paid therefor.'' The Department is offering no view, herein, as to the applicant's reliance on AO 99–09A and/or the statutory exemption, as set forth in section 408(b)(2) of the Act and 29 CFR 2550.408(b)(2) of the Department's regulations.

potential for increased profitability, and (iii) with the potential for new business opportunities.

At present, ASC has one class of outstanding equity in the form of common stock (the Common Stock), the entirety of which is held by the Pension Fund. There are currently 10,000 shares of ASC Common Stock outstanding. In connection with the proposed transactions, ASC proposes issuing a new class of shares, the Preferred Stock, to be purchased by UNITE and by the UNITE Affiliates for cash.[30] It is anticipated that UNITE will purchase shares of the Preferred Stock equal to approximately five percent (5%) of the outstanding equity of ASC, and that the UNITE Affiliates will purchase shares of Preferred Stock representing approximately ten percent (10%) of the outstanding equity of ASC.

5. The terms underlying the Preferred Stock will be determined by the issuer, ASC. However, the Independent Fiduciary has the discretion to accept or reject the terms of the Preferred Stock.

A fixed dividend rate of five percent (5%), declared annually, has been established for the Preferred Stock. It is represented that Preferred Stock dividends will only be paid when (1) there is surplus capital and (2) the Board declares a dividend. If there is not a surplus, the dividend cannot be paid under applicable corporate law. Further, the Board can exercise its discretion not to pay a dividend when there is a capital surplus. If dividends are not paid in a particular year, they accumulate. No dividends may be paid on the Common Stock until all accrued and unpaid dividends on the Preferred Stock are paid.

It is represented that the Board does not have the discretion to alter the five percent (5%) dividend rate, but such rate is subject to customary anti-dilution adjustments. For example, if the number of issued and outstanding shares of Preferred Stock is increased by a stock split from 100 to 200, the dividend rate paid with respect to each share would decrease to 2.5%.

ASC can redeem the Preferred Stock, on a *pro rata* basis at anytime it may lawfully do so.[31] In such event, and when the holder has not elected to convert the Preferred Stock into the Common Stock of ASC (if applicable) the holder of the Preferred Stock will receive an amount equal to the price paid for the Preferred Stock, plus any accrued but unpaid dividends. Written notice of such redemption shall be provided to the holders of Preferred Stock at least fifteen (15) days but no more than thirty (30) days prior to the date of redemption. At that date, all rights associated with the Preferred Stock, except the right to receive the redemption price shall cease. In the event of liquidation, the holders of Preferred Stock will be entitled to receive, on a *pro rata* basis, prior to the holders of the ASC Common Stock, an amount equal to the price paid for the Preferred Stock, plus any accrued but unpaid dividends.

The Preferred Stock will have no voting rights, except as required by section 804 of the New York Business Corporation Laws. Section 804 of the New York Business Corporation Laws provides that preferred shares of stock have voting power when a proposed charter amendment would: (a) Exclude or limit the shareholder's right to vote on any matter, except as such right may be limited by voting rights given to new shares then being authorized of any existing or new class or series; (b) reduce the par value of the shares (if they have par value); (c) change the shares of the class into a different number of shares; (d) change the class or series of the shares; (e) fix, change, or abolish the designation of the preferred, or any of the relative rights, preferences and limitation of any of the shares of the preferred, whether issued or unissued, including any provisions in respect to undeclared dividends, whether or not cumulative or accrued, or the redemption of any shares, or any sinking fund for the redemption or purchase of any shares, or any preemptive right to acquire shares or other securities; (f) provide that the shares may be converted into shares of any other class or into shares of any other series of the same class, or alter the terms or conditions upon which the shareholders' shares are convertible or change the shares issuable upon conversion of the shareholders' shares, if such action would adversely affect such shareholders, or (g) subordinate the rights of the preferred shares by authorizing shares having preferences that would be in any respect superior to the shareholders' rights.

The term of the Preferred Stock will be perpetual. After five (5) years, the Preferred Stock will be convertible at any time at the option of each holder, into shares of the ASC Common Stock on a one to one basis. This ratio may only be adjusted for customary anti-dilution purposes. The Board cannot otherwise adjust the conversion ratio. Further, each of the shares of Preferred Stock shall be automatically converted into ASC Common Stock upon the first sale under the Securities Act of 1933 of at least twenty-five percent (25%) of the total voting power of ASC. In the event of a conversion, the conversion price will be adjusted for certain dilutive issuances, splits, and combinations.[32]

If at any time following initial public offering, ASC proposes to register shares of the Common Stock with the Securities and Exchange Commission, the holders of the Preferred Stock will be allowed to include in such registration the shares of Common Stock into which their Preferred Stock are convertible (*i.e.*, the holders have ''piggy-back'' registration rights). In addition, the Preferred Stock (and the shares of Common Stock issued upon conversion of the Preferred Stock) will be subject to ''drag along'' and ''tag along'' rights. In this regard, if the Pension Fund sells its shares in ASC to an unrelated third party, the Pension Fund will be able to force UNITE and the UNITE Affiliates to also sell their Preferred Stock (and the shares of Common Stock issued upon conversion of the Preferred Stock) to the third party buyer, while UNITE and the UNITE Affiliates will be able to force the third party buyer to buy their Preferred Stock (and the shares of Common Stock issued upon conversion of the Preferred Stock), as part of the transaction.

UNITE will also have a right of first refusal in the event any of the UNITE Affiliates wishes to dispose of its Preferred Stock (and the shares of Common Stock issued upon conversion of the Preferred Stock). If UNITE fails to purchase such shares, then ASC and/or the Pension Fund shall have a right of first refusal to purchase the shares in question. Furthermore, if UNITE wishes to sell its Preferred Stock (and the shares of Common Stock issued upon conversion of the Preferred Stock), ASC

[30] It is represented that the decision was made to issue the Preferred Stock, rather than sell 15% of the Common Stock, because UNITE and the UNITE Affiliates generally invest in fixed income or fixed income-type investments that provide a set rate of return. UNITE and the UNITE Affiliates seek a fixed rate of return in order to generate cash from investments on an annual basis to ensure that union-related activities are adequately funded. As structured, the Preferred Stock will enable UNITE and the UNITE Affiliates to obtain an equity interest in ASC while simultaneously providing an income stream similar to that offered by a fixed income investment.

[31] The applicant has not requested, and the Department is not providing, herein, relief for the redemption or call by ASC of the Preferred Stock or the shares of Common Stock issued upon conversion of the Preferred Stock from UNITE or the UNITE Affiliates. See, discussion of potential future prohibited transactions in paragraph 12, herein.

[32] The applicant has not requested, and the Department is not providing relief, herein, with respect to the conversion of the Preferred Stock into Common Stock. *See*, discussion of potential future prohibited transactions in paragraph 12, herein.

and/or the Pension Fund will have a right of first refusal with respect to such shares.[33]

6. Absent an exemption, the proposed transactions would constitute sales of property between a plan and parties in interest, and transfers of assets from a plan to parties in interest in violation of section 406(a)(1)(A) and section 406(a)(1)(D) of the Act. Accordingly, the Pension Fund is seeking relief with respect to section 406(a)(1)(A) and 406(a)(1)(D) of the Act. Further, to the extent that UNITE and the UNITE Affiliates are disqualified persons, the proposed transactions would also violate sections 4975(c)(1)(A) and 4975(c)(1)(D) of the Code, for which relief is also requested.

The proposed transactions may also raise issues under section 406(b)(1) of the Act and section 4975(c)(1)(E) of the Code which provide that ''a fiduciary with respect to a plan shall not'(1) deal with the assets of the plan in his own interest or for his own account.'' Further, the proposed transactions may also raise issues under section 406(b)(2) of the Act, because certain Trustees of the Pension Fund are also officers of UNITE affiliated with UNITE and/or the UNITE Affiliates (the Overlapping Trustees) and directors of ASC. In this regard, the Overlapping Trustees could be viewed as acting on behalf of UNITE and the UNITE Affiliates, adverse parties to the Pension Fund, in connection with the proposed transactions. Because of the potential concerns that may be raised, the Pension Fund has also requested relief with respect to sections 406(b)(1) and 406(b)(2) of the Act and section 4975(c)(1)(E) of the Code.

7. For purposes of determining the fair market value of the Preferred Stock, ASC sought the opinion of Willamette Management Associates (WMA), an independent, qualified appraiser. WMA is experienced in that it has prepared valuations relating to ASC for approximately six (6) years. As described more fully in paragraph 8, below, it is represented that the Independent Fiduciary will review the valuation prepared by WMA in determining the per share price of the Preferred Stock, as well as any other appropriate documents, for the purpose of evaluating the proposed sales of the Preferred Stock to UNITE and to the UNITE Affiliates. The Independent Fiduciary is authorized to obtain another valuation if it believes that it would be in the interest of the Pension Fund.

WMA is independent in that the average percentage of WMA's annual income derived from work for the Pension Fund over the past six (6) year period is less than one percent (1%). Further, the Pension Fund and ASC represent that professional fees of WMA are not contingent upon the opinion expressed in the valuation report, and WMA represents that other than the services provided attendant to the valuation of ASC, neither it nor any of its employees has a present or intended financial interest in ASC.

In anticipation of the issuance of the Preferred Stock and the entry into the subject transactions, WMA prepared a valuation report, dated July 29, 2003, which offered WMA's preliminary opinion of the fair market value of ASC's equity, as of May 31, 2003. Specifically, WMA was asked to submit, as of a certain date, an opinion of: (1) The fair market value of an ownership interest in the Preferred Stock that is convertible into a one percent (1%) ownership interest in the outstanding Common Stock of ASC on a fully-diluted basis; and (2) the fair market value of an ownership interest in the Preferred Stock that is convertible into a fifteen percent (15%) ownership interest in the outstanding Common Stock of ASC on a fully-diluted basis. It is represented that WMA was asked to provide the fair market value of one percent (1%) of ASC's equity in case ASC elected to issue more or less than fifteen percent (15%) ownership interest in ASC's outstanding common shares (*e.g.* sell Preferred Stock convertible into a sixteen percent (16%) ownership interest in ASC's outstanding common shares). In a letter dated February 10, 2004, the applicant represented that it has been determined that ASC will sell Preferred Stock convertible into a fifteen percent (15%) interest in ASC's outstanding common shares.

After giving consideration to the historical and prospective operating characteristics of ASC, as well as the after-tax expected cash flows and earnings attributable to ASC, the current and forecasted capital structure of ASC, the risk/return relationship reflected for comparative companies having securities traded in the public market, the capital market and related industry macroeconomic evidence available, and other relevant factors, it is the opinion of WMA that the range of value for the equity of ASC is between $33 million and $38.4 million, as of May 31, 2003.

Based on values for ASC's equity with a low of $33 million and a high of $38.4 million, it is the opinion of WMA that 118 shares of the Preferred Stock, which is convertible into a one percent (1%) ownership interest in the outstanding Common Stock of ASC on a fully-diluted basis, would be valued at a low of approximately $536,000 and a high of approximately $624,000, respectively, as of May 31, 2003. Based on values for ASC's equity with a low of $33 million and a high of $38.4 million, it is the opinion of WMA that 1,765 shares of the Preferred Stock, which upon conversion, would be convertible into 1,765 shares of Common Stock, or fifteen percent (15%) of the total shares of ASC outstanding on a fully-diluted basis, would be valued in the aggregate, respectively, at a low of approximately $8,040,000 ($4,557 per share) and a high of approximately $9,360,000 ($5,303 per share), as of May 31, 2003. It is represented that the number of shares of Preferred Stock that are issued as part of the transaction will have no impact on the per share value of the Common Stock or the Preferred Stock for purposes of this transaction. It is represented that this is due to the fact that the number of shares will increase at the same rate as the value of the Preferred Stock. It is further represented that WMA's valuation of a one percent (1%) and a fifteen percent (15%) ownership interest in the outstanding Common Stock of ASC on a fully-diluted basis is based on WMA's understanding: (1) That there are currently 10,000 shares of Common Stock of ASC outstanding; (2) that ASC plans to issue 1,765 shares of Preferred Stock; and (3) that the terms of the Preferred Stock included a mandatory dividend of five percent (5%) into perpetuity.

It is represented that the final appraisal conducted by WMA in connection with the sale of the Preferred Stock will set a fixed price for the Preferred Stock. It is represented as possible that the price set by WMA could fall outside the range of values, discussed in the paragraphs above. However, in no event will the Pension Fund receive less than fair market value for the Preferred Stock.

8. It is represented that the determination of whether to sell the Preferred Stock, and the oversight and negotiations with respect to the terms of the sales of the Preferred Stock shall be the sole responsibility of Fiduciary Counselors, Inc. (formerly, Aon Fiduciary Counselors, Inc.) (hereinafter, Fiduciary Counselors), which has been

[33] The applicant has not requested, and the Department is not providing, herein, relief for the purchase by the Pension Fund and/or ASC, pursuant to a right of first refusal, of the Preferred Stock or the shares of Common Stock issued upon conversion of the Preferred Stock from UNITE or the UNITE Affiliates. The applicant may submit an application for exemption prior to engaging in such transaction.

retained by the Pension Fund to act as the Independent Fiduciary on its behalf. Specifically, in its capacity as Independent Fiduciary for the Pension Fund, Fiduciary Counselors shall: (1) Determine, on behalf of the Pension Fund, whether the Preferred Stock should be sold by ASC to UNITE and to the UNITE Affiliates; (2) approve of the terms underlying the Preferred Stock to be issued by ASC; (3) negotiate and approve the terms of the sales of such Preferred Stock to UNITE and to the UNITE Affiliates; (4) determine that the terms of the sales of Preferred Stock are no less favorable to ASC than would be offered to an unrelated third party under similar circumstances; and (5) determine that the purchase price for the Preferred Stock paid by UNITE and by the UNITE Affiliates is no less than the fair market value of such Preferred Stock on the date of the purchases.

In addition, in a letter agreement between the Pension Fund and Fiduciary Counselors, dated August 7, 2003, Fiduciary Counselors acknowledged that the services of a qualified independent appraiser must be utilized to determine the purchase price for the Preferred Stock. Fiduciary Counselors further acknowledged that the selection and continuing retention of the appraiser and the acceptance of the appraiser's valuation of the Preferred Stock are fiduciary decisions governed by the provisions of part 4 of title I of the Act. Fiduciary Counselors represents that it understands that in discharging its obligations under Section 404(a) of the Act, it must take steps calculated to obtain the most accurate valuation of the Preferred Stock available. Fiduciary Counselors recognizes that the obligation to act prudently requires, at a minimum that it conduct a thorough and analytical critique of the Preferred Stock valuation and that in conducting such verification, it must evaluate a number of factors relating to the accuracy and methodology of the valuation and the expertise of the independent qualified appraiser. In addition it is represented that Fiduciary Counselors may cause the Pension Fund to replace the appraiser if necessary.

It is represented that Nell Hennessy, Esq. (Ms. Hennessy), President of Fiduciary Counselors, shall be the lead individual from Fiduciary Counselors in the execution of the duties of the Independent Fiduciary set forth above. Further, under the terms of its agreement with the Pension Fund, Fiduciary Counselors is responsible for maintaining records with respect to the performance of its duties for a period of six (6) years from the date on which the proposed transactions close, or the date on which Fiduciary Counselors determines that ASC should not issue and sell the Preferred Stock, or the date on which UNITE and the UNITE Affiliates determine not to purchase the Preferred Stock from ASC.

Fiduciary Counselors has acknowledged and agreed that it is a fiduciary, under section 3(21) of the Act, with respect to any actions taken, pursuant to its agreement with the Pension Fund to serve as Independent Fiduciary. Further, Fiduciary Counselors has represented that it is independent of and unrelated to the parties to the proposed transactions.

9. It is represented that the proposed transactions are protective of the Pension Fund and of its participants and beneficiaries in that Fiduciary Counselors has been retained to serve as the Independent Fiduciary. Among other things, Fiduciary Counselors, as set forth above, will review and evaluate the terms of the Preferred Stock and the subject transactions. Fiduciary Counselors will also review and evaluate the independent appraisal of the fair market value of the Preferred Stock prepared by WMA, as well as any other relevant documents. Further, Fiduciary Counselors will make a determination as to whether the proposed sales satisfy the fiduciary requirements of prudence and loyalty.

In a letter to the Department, dated August 14, 2003, Ms. Hennessy set forth the preliminary conclusions of Fiduciary Counselors regarding the proposed transactions. Specifically, Fiduciary Counselors: (1) Determined, based on the terms of the transactions, including the tentative range for the fair market value of the Preferred Stock, that such stock should be sold to UNITE and to the UNITE Affiliates; (2) determined that the transactions, as structured would be in the interest of and would benefit the Pension Fund's participants and beneficiaries; (3) approved the proposed terms underlying the Preferred Stock, as set forth in the draft term sheet; (4) determined that such terms are consistent with what is ''market'' with respect to such securities; (5) reviewed the valuation provided by WMA; (6) determined that the transactions as structured are protective of the participants and beneficiaries of the Pension Fund; and (7) determined, on a preliminary basis, that ASC will receive no less than fair market value for the Preferred Stock. Ms. Hennessy further represented that Fiduciary Counselors is currently in the process of negotiating the terms of the sales with the representatives of UNITE and of the UNITE Affiliates, and will ensure that the terms of the sales are no less favorable to ASC than would be offered to an unrelated third party under similar circumstances. It is also represented that Fiduciary Counselors will ensure that at closing, the subject transactions will be conducted in compliance with the negotiated terms, including that ASC receives no less than the fair market value of the Preferred Stock and that the transactions remain prudent, in the interest of, and protective of the participants and beneficiaries of the Pension Fund. In connection with the foregoing, Ms. Hennessy represented that Fiduciary Counselors will provide a detailed report to the Department upon the closing of the transactions.

10. It is represented that the proposed transactions are feasible in that the sales of the Preferred Stock to UNITE and to the UNITE Affiliates will be one time occurrences for cash with no ongoing oversight requirements.

11. It is represented that the proposed transactions are in the interests of the Pension Fund, because the transactions will provide ASC with an infusion of capital from an outside source which could be used to invest in the continued growth of ASC and the development of new product lines and markets with the goal of further increasing the value of ASC. The proposed transactions will permit ASC to raise capital while ensuring that the Pension Fund retains control of ASC.

Furthermore, it is anticipated that the proposed transactions will increase the profitability of ASC. It is represented that the fact that UNITE and the UNITE Affiliates will own the Preferred Stock of ASC will enhance the standing of ASC with its existing trade union customers, leading to additional business opportunities with such clients. Furthermore, it is represented that the fact that UNITE and the UNITE Affiliates own the Preferred Stock of ASC could serve as an effective marketing tool for obtaining business from other trade unions or trade union sponsored groups that have not previously purchased products from ASC or that do not currently utilize the services provided by ASC.

12. The Department notes that it is providing no relief for any potential down-the-road prohibited transactions that may arise after the sale of the Preferred Stock, including any that may arise in connection with (a) decisions by the Trustees of the Pension Fund to vote the Common Stock of ASC in a manner which could advantage the Preferred Stockholders, and (b) any decisions made by or actions undertaken by the ASC Board with respect to the Preferred Stock.

With respect to decisions by the Trustees of the Pension Fund to vote the Common Stock of ASC when the vote concerns the Preferred Stock held by UNITE and the UNITE Affiliates, the applicant has agreed that Trustees affiliated with UNITE and/or the UNITE Affiliates would recuse themselves from any decision to vote the Common Stock of ASC when participation by such Trustees would give rise to conflicts of interest. The applicant does not believe that such recusal is prohibited under the Taft-Hartley Act or the Labor Management Relations Act. In this regard, the applicant represents that the Taft-Hartley Act merely requires equal representation of employees and employers in connection with the receipt of payments by a trust fund. The purpose of restricting employers from making payments to benefit funds was to avoid union control and abuse—not employer control.

Potential conflicts may also arise with respect to any decision by the directors of ASC to redeem the Preferred Stock and any decision to pay dividends with respect to such stock.

In the opinion of the applicant, the redemption or call of the Preferred Stock or the conversion of the Preferred Stock, among other transactions, would not be prohibited, because the transaction would take place between UNITE and/or the UNITE Affiliates, and ASC, rather than with the Pension Fund. In this regard, the applicant maintains that once the Preferred Stock has been sold to UNITE and to the UNITE Affiliates, ASC no longer constitutes a plan asset look-through vehicle with respect to the Pension Fund under the Department's regulations at 29 CFR 2510.3–101(h) (the Plan Asset Regulation).[34] Accordingly, the applicant maintains that Trustees who are members of the ASC Board would be acting as directors of an operating company and not as fiduciaries under the Act controlling assets of the Pension Fund when making decisions regarding the Preferred Stock. The applicant further maintains that members of the ASC Board would be subject to the mandates of the New York state corporate laws, including those applicable to related party transactions, in the exercise of their duties as directors of ASC.

As the Department noted in it's regulations at 29 CFR 2509.75–2:

if a transaction between a party in interest and a plan would be a prohibited transaction, then such a transaction between a party in interest and such corporation or partnership will ordinarily be a prohibited transaction if the plan may, by itself, require the corporation or partnership to engage in such transaction.

In any event, the Department is providing no relief herein, other than with respect to the sale of the Preferred Stock to UNITE and the UNITE Affiliates.

The applicant understands the concerns of the Department and has represented that conflicted directors of ASC will recuse themselves from participating in any decision or action involving the Preferred Stock. Thus, for example the ASC Directors affiliated with UNITE and/or the UNITE Affiliates would recuse themselves from any decision to issue dividends with respect to the Preferred Stock and any decision to redeem the Preferred Stock.

13. In summary, the applicant represents that the proposed transactions satisfy the statutory criteria of section 408(a) of the Act and section 4975 of the Code because: (a) Fiduciary Counselors will determine, on behalf of the Pension Fund, whether the Preferred Stock should be sold to UNITE and to the UNITE Affiliates; (b) Fiduciary Counselors will approve of the terms underlying the Preferred Stock to be issued by ASC; (c) Fiduciary Counselors will negotiate and approve the terms of the sales of the Preferred Stock to UNITE and to the UNITE Affiliates; (d) Fiduciary Counselors will monitor the terms of the transactions and ensure that ASC, UNITE, and the UNITE Affiliates comply with the approved terms; (e) Fiduciary Counselors will determine that the terms of the sales of Preferred Stock are no less favorable to ASC than would be offered to an unrelated third party under similar circumstances; (f) Fiduciary Counselors will determine that the purchase price for the Preferred Stock paid by UNITE and by the UNITE Affiliates is no less than the fair market value of such Preferred Stock, as of the date the transactions are entered; (g) Fiduciary Counselors will determine the fair market value of the Preferred Stock, as of the date each of the transactions is entered; (h) in determining the fair market value of the Preferred Stock, Fiduciary Counselors will obtain an appraisal from an independent qualified appraiser selected by it and ensure that the appraisal and Fiduciary Counselors's analysis of the appraisal are consistent with sound principles of valuation and the elements described in paragraph 8, in the Summary of Facts and Representations in this proposed exemption; and (i) the Pension Fund will incur no fees, commissions, or other charges or expenses as a result of its participation in the transactions, other than the fee payable to Fiduciary Counselors.

Notice to Interested Persons

Those persons who may be interested in the pendency of the requested exemption include all of the active participants and beneficiaries of the Pension Fund, the retirees receiving benefits from the Pension Fund, vested deferred participants and beneficiaries of the Pension Fund, the Trustees of the Pension Fund, all contributing employers to the Pension Fund, the members of the Board of ASC and the ASC Subsidiaries, UNITE, the UNITE Affiliates, and all locals, joint boards, and regional offices of UNITE who represent members who are participants in the Pension Fund. It is represented that these various classes of interested persons will be notified as follows.

All of the active participants and beneficiaries of the Pension Fund, the retirees receiving benefits from the Pension Fund, the Trustees of the Pension Fund, UNITE, and the members of the Board of ASC and the ASC Subsidiaries will be provided with a copy of the notice of pendency of this proposed exemption (the Notice), plus a copy of the supplemental statement (the Supplemental Statement), as required, pursuant to 29 CFR 2570.43(b)(2), which will advise such interested persons of their right to comment and to request a hearing. The Notice and the Supplemental Statement will be delivered by first class mail within fifteen (15) days of the publication of the Notice in the **Federal Register**.

In addition, a copy of the Notice and the Supplemental Statement will be provided, within fifteen (15) calendar days of the date of publication of the Notice in the **Federal Register**, to all locals, joint boards, and regional offices of UNITE who represent members who are participants in the Pension Fund and to contributing employers that employ members who are participants in the Pension Fund. The Pension Fund represents that immediately upon receipt of a copy of the Notice and Supplemental Statement such locals, joint boards, regional offices of UNITE, and contributing employers will post such Notice and the Supplemental Statement at those locations which are customarily used for notices regarding employee benefits matters and/or will post such Notice and Supplemental Statement at the union hall.

It is represented that for the purpose of sending the Notice and Supplemental

[34] The Plan Asset Regulation provides that where a plan ''owns all of the outstanding equity interests (other than director's qualifying shares) in an entity, its assets include those equity interests and all of the underlying assets of the entity.''

Statement by mail, current addresses maintained by the Pension Fund will be used.

All written comments and requests for a hearing must be received by the Department no later than forty-five (45) days from the date of the publication of the Notice in the **Federal Register**.

Pan-American Life Insurance Corporation (Pan-American); Located in New Orleans, LA

[Application No. D–11202]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act (or ERISA) and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, August 10, 1996).[35] If the exemption is granted, the restrictions of sections 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to the cash sale, on November 17, 2003, by certain defined contribution plans (the Plans), which invest in Separate Account V (the Account), a pooled separate account, whose assets are invested in units of the Dreyfus-Certus Stable Value Fund (the Fund), of Fund units, to Pan-American, the Account's investment manager and a fiduciary with respect to such Account.

This proposed exemption is subject to the following conditions:

(a) Prior to the transaction (the Transaction), a fiduciary (the Independent Fiduciary), acting on behalf of the Plans, who was independent of and unrelated to Pan-American and its subsidiaries, determined that the subject Transaction (1) was fair to the participants in the Plans investing in the Account; (2) was comparable to, and no less favorable than, terms obtainable at arm's length between unaffiliated parties; and (3) was in the best interest of the Plans investing in the Account and their participants and beneficiaries.

(b) The Independent Fiduciary monitored the Transaction on behalf of the Plans investing in the Account.

(c) Subsequent to the closing of the Transaction, the Independent Fiduciary performed a post-Transaction review, which included, among other things, a determination that the fair market value of the Plan's interests in the Account as of November 14, 2003, as determined by the Fund trustee, was accurate and consistent with the Fund's valuation method.

(d) No sales commissions, fees or other costs were paid by the Plans in connection with the Transaction.

(e) The sale was a one-time transaction for cash.

(f) The fair market value of the units was determined in good faith by The Dreyfus Trust Company (TDTC), an unrelated party, at the time of the Transaction.

EFFECTIVE DATE: If granted, this proposed exemption will be effective as of November 17, 2003.

Summary of Facts and Representations

1. Pan-American is a mutual life insurance company based in New Orleans, Louisiana and is subject to the supervision and examination of the Louisiana Commissioner of Insurance. Pan-American is licensed in 40 states and the District of Columbia, Puerto Rico and the Virgin Islands. The insurer has affiliates in Panama, Guatemala and Colombia, and branch offices in Ecuador, El Salvador and Honduras. As of December 31, 2002, Pan-American had total assets under management of approximately $2.3 billion. As of that date, Pan-American managed about $900 million in retirement plan assets for approximately 1,200 employee benefit plans, covering about 50,000 plan participants. The insurer's most recent A.M. Best rating is ''A−'' (Excellent).

2. Among the insurance products and services it offers, Pan-American and certain of its affiliates provide funding, asset management and other services for employee benefit plans, some of which are subject to the provisions of title I of the Act. In particular, Pan-American maintains pooled separate accounts in which Title I pension, profit sharing, and other plans invest. The assets of a separate account are established and maintained by Pan-American separate and apart from its general account. The income and realized gains or losses from the assets in the separate account are credited or charged against the account without regard to the other investment gains or losses of Pan-American. Under the terms of the Pan-American contracts, either an independent Plan fiduciary or a participant can direct the investment of contract values among the investment options offered by Pan-American, in separate accounts or subaccounts. Pan-American manages all or a portion of the assets of such separate accounts.

3. Among the separate accounts managed by Pan-American was Separate Account V, otherwise referred to herein as ''the Account.'' The Account was established by Pan-American on or about November 24, 1992, and it was available only to defined contribution retirement plans, many of which are subject to Title I of the Act. The purpose of the Account was to provide a stable value fund option as an investment alternative in a pooled vehicle for Title I Plans. The unit value of the Account was set at $10.00 when the first investment was made by a Plan in August 1995. The unit value was adjusted each Valuation Date (*i.e.*, each business day on which the Home Office of Pan-American was open to transact business and on which the New York Stock Exchange was open for unrestricted trading) to reflect the value of the assets of the Account, less any charges due Pan-American. The gross unit value of the Account on October 31, 2003 was $14.4934. The net unit value for the Account varied according to differences in the charge structures for different group annuity contracts attributed to Plans participating in the Account.

A Plan's participation in the Account was governed by the Separate Account V Rider appended to the contracts issued by Pan-American to a participating Plan. The Account was not registered under the Investment Company Act of 1940. For purposes of the Act, the assets of the Account were treated as ''plan assets'' within the meaning of 29 CFR 2510.3–101(h)(1)(iii).

Approximately, 417 small to mid-sized client Plans of Pan-American invested in the Account.[36] As of October 31, 2003, the Plans had approximately $75,517,418 invested in the Account and the Fund described herein. No Plan sponsored by Pan-American ever invested in the Account.

Accordingly, Pan-American was a party in interest with respect to such Plans, and a fiduciary with respect to the Account. Pan-American represents that neither it nor its affiliates had any discretionary authority over the decision to invest a Plan's assets in the Account. Instead, a Plan fiduciary or participant independent of Pan-American and its affiliates was

[35] For purposes of this proposed exemption, references to specific provisions of Title I of the Act, unless otherwise specified, refer also to the corresponding provisions of the Code.

[36] The smallest Plan invested in the Account had an interest valued at $29 and one participant while the largest Plan invested in the Account had an interest valued at over $3 million and 1,243 participants. For 2001, 2002 and 2003, the net cash flow into the Account was $17,785,258, $32,727,395 and $5,039,484, respectively.

responsible for such investment decisions.

4. The Account began investing in the Fund in August 1995. The Fund is a collective investment fund invested primarily in guaranteed investment contracts (GICs) and other similar instruments intended to achieve high current income and stability of principal. The Fund is designed for employee benefit plans, and for financial institutions acting as trustee, investment manager, custodian, or agent for one or more employee benefit plans as a convenient means of participating in a professionally managed, diversified portfolio consisting primarily of GICs and other stable value instruments.

Specifically, the Fund invests primarily in a diversified portfolio of GICs issued by insurance companies, bank investment contracts (BICs), corporate investment contracts, synthetic GICs(the wrap issuers of whom are not Pan-American), separate account GICs, floating rate GICs, repurchase agreements, and cash and cash equivalents, including money market instruments and certificates of deposit.

The trustee and portfolio manager of the Fund is TDTC, which has appointed Standish Mellon Asset Management Company LLC (Standish Mellon) as an investment advisor (prior to June 1, 2003, was doing business as Certus Asset Advisors). Both TDTC and Standish Mellon LLC are not affiliated with and are independent of Pan-American, which has no involvement in the operation or administration of the Fund. As of December 31, 2002, the Fund had total assets of $588,015,081.

5. Units in the Fund are valued each business day at fair value, as determined in good faith by TDTC. At the Fund's inception, and all the times thereafter, the Fund has maintained a unit value of $1.00. In other words, Fund units can never be worth more than $1.00. Income distributed from the Fund is applied to the purchase of additional Fund units. Thus, an investor is entitled to receive a return on the investment plus the $1.00 per unit value.[37] Units in the Fund are offered by TDTC for purchase or redemption on a continuous basis, except that TDTC reserves the right to defer redemptions for a period of time, generally not to exceed twelve months, as necessary for a fair and orderly liquidation of Fund assets. There is no secondary market for units in the Fund.

6. Pan-American determined to discontinue the sale of its group annuity contracts and to transfer its existing business to another carrier in a reinsurance transaction because it could not reach the critical asset level needed to attain profitability in the retirement plan market. In particular, with respect to the group annuity contracts previously issued by Pan-American and remaining in force (the Contracts), Pan-American entered into agreements to transfer such business to Securian Retirement Services (Securian), a business unit of Minnesota Life Insurance Company (Minnesota Life). The Contracts included all of the group annuity contracts with amounts allocated to the Account.

Minnesota Life provides financial security for individuals and businesses in the form of insurance, retirement plans and investments. The company serves over seven million people with nearly $350 billion of life insurance in force and $22 billion in assets under management. Minnesota Life's combined work force of 4,400 employees and representatives is located at its St. Paul headquarters and agencies and offices across the country.

Minnesota Life is highly rated by the major independent rating agencies (*e.g.*, A++ (Superior) by A.M. Best) that analyze the financial soundness and claims-paying ability of insurance companies. The Securian business unit of Minnesota Life currently manages assets of more than $5.7 billion for more than 2,700 plans and over 180,000 participants nationwide. Securian consistently receives superior service ratings in independent surveys of plan sponsors and was one of the first retirement plan providers to offer transactional services on line.

7. The insurance commissioners of Louisiana and Minnesota approved the reinsurance transaction (the Reinsurance Transaction) on October 17, 2003, and October 28, 2003, respectively. Pan-American closed both the subject Transaction and the Reinsurance Transaction on November 17, 2003. On that date, Securian took responsibility for the administration and operation of the Contracts. Subsequently, subject to the consent of the insurance commissioners in other jurisdictions, Securian agreed to co-insure the risks under the Contracts and, if the Plan owning the Contracts consented, to issue its own group annuity contracts in substitution for the Contracts.

In connection with the Reinsurance Transaction, Securian advised that it would not offer the Fund as an investment option for the Contracts nor a comparable stable value product.[38] Therefore, in accordance with industry practice, the Contracts provided, in pertinent part, that ''[i]f in the judgment of the Insurance Company it [became] necessary or desirable to terminate Separate Account V by reason of any federal or state statute, any judicial decision or any rule or regulation of any governmental authority, or because it [was] no longer commercially feasible, the Insurance Company [could] liquidate the assets credited to the contractholder in Separate Account V and transfer them at the contractholder's election, to the Deposit Fund or other separate accounts maintained under the Group Annuity Contract or to any alternative funding agency.''

In order to make all Plan monies immediately available for investment or reinvestment in the investment options to be offered by Securian, Pan-American requested that TDTC effect a redemption of the Account's interest in the Fund effective November 13, 2003, the original contemplated date of the Transaction. TDTC advised that it would not be able to fully redeem all of the Account's interests as of November 13, 2003, but, as allowed by the instruments governing the Fund, committed to redeeming $8,000,000 of the Account's interests in the Fund each month beginning November 2003, until such time as all interests are redeemed.

8. Pan-American believed that it was appropriate and in the best interest of the Plans and their participants and beneficiaries for the monies invested in the Account to be made available for Plan fiduciaries and participants for reinvestment in other options. Because there was no secondary market for units in the Fund, to the best of Pan-American's information and belief, there was no available unrelated purchaser for the Fund units held by the Account.

9. Therefore, on November 17, 2003, Pan-American purchased in the ordinary course of business, for its own account, the Fund units held by the Account, at a per unit value of $1.00, as

[37] The Plans investing in the Fund through the Account received a return on investment in the form of an increase or decrease in the number of units held. Pan-American did not issue any synthetic, stabilizing or other wrappers with respect to the Fund. The Fund was designed to provide the Account with stability of principal and high-current income through the assets it purchased, and the Fund did not separately provide a guarantee of principal, nor did Pan-American provide a guarantee of principal or earnings by issuing any wrappers with respect to the Fund. Although neither the value of the Fund's portfolio nor an investment in the Fund is insured or guaranteed, certain investments within the Fund, such as money market funds issued by banks, provided the Account with a guarantee of principal.

[38] It is represented that Securian would offer all of the Plans invested in the Account and Fund a fixed income investment option that is supported and guaranteed by Minnesota Life's general account.

determined by TDTC on November 14, 2003.[39] Pan-American acquired 55,010,750.23 units from the Account for cash.[40] (The redemption proceeds for the Fund units that are received over the following six to twelve months will be paid by TDTC to Pan-American.) Thus, the purchase price for the Transaction was at the full unit value on November 14, 2003, without any discount or other reduction for the deferral of the redemption of those Fund units.

Both the subject Transaction and the entire Reinsurance Transaction were completed on November 17, 2003. The Plans received their *pro rata* portion of cash based upon their ownership percentage in the Fund at the close of business on November 14, 2003. No commissions or other fees were paid by the Account in connection with the Transaction.[41]

In addition, the value of the interests of Plans and participants and beneficiaries in the Account on November 14, 2003, was exactly the same as it would have been had the Transaction not occurred. The cash in the Account resulting from the Transaction was immediately available to the Plans and their participants for reinvestment in the options then offered under the Contracts. Following the reinvestment of these monies at the direction of the Plans and their participants, the Account was terminated.

Accordingly, Pan-American requests an administrative exemption from the Department with respect to the Transaction. If granted, the exemption will be effective as of November 17, 2003.

10. U.S. Trust Company, National Association (U.S. Trust) agreed to act on behalf of the Plans investing in the Account as the Independent Fiduciary with respect to the Transaction. The Independent Fiduciary is a national banking association formed under the laws of the United States and authorized to exercise all fiduciary powers that may be exercised by state banks and trust companies under the laws of the State of Connecticut. The Independent Fiduciary, which is a wholly owned subsidiary of The Charles Schwab Corporation, has served as an independent fiduciary for employee benefit plans in connection with exemption requests from Department over the past fifteen years. The Independent Fiduciary has certified that it meets the following requirements:

- The Independent Fiduciary is not directly or indirectly, through one or more intermediaries, controlling, controlled by, or under common control with Pan-American, Minnesota Life, Securian, TDTC, or Standish Mellon.
- The Independent Fiduciary is not an officer, director, employee of, or partner in Pan-American, Minnesota Life, Securian, TDTC, or Standish Mellon.
- The Independent Fiduciary is not a corporation or partnership in which Pan-American, Minnesota Life, Securian, TDTC, or Standish Mellon has an ownership interest or is a partner.
- The Independent Fiduciary does not have an ownership interest in Pan-American, Minnesota Life, Securian, TDTC, or Standish Mellon or any of their affiliates (except for possibly *de minimis* holdings in Minnesota Life).
- The Independent Fiduciary was not a fiduciary with respect to the Account prior to its appointment as an independent fiduciary.
- The Independent Fiduciary has acknowledged in writing acceptance of fiduciary responsibility and has agreed not to participate in any decision with respect to any transaction in which it has an interest that might affect its best judgment as a fiduciary.
- The Independent Fiduciary has not received, for any fiscal year, from Pan-American, Minnesota Life, Securian, TDTC, or Standish Mellon or their affiliates (including amounts received for services provided by the Independent Fiduciary associated with the Transaction) gross income for that fiscal year that exceeds one percent of the Independent Fiduciary's annual gross income from all sources for such fiscal year.
- Lastly, neither the Independent Fiduciary nor any partnership or corporation of the Independent Fiduciary is an officer, director, or 10 percent or more partner or shareholder, will acquire any property from, sell any property to, or borrow funds from Pan-American, Minnesota Life, Securian, TDTC, or Standish Mellon during the period that the Independent Fiduciary serves as independent fiduciary of the Plans, and continuing for a period of six months after the Independent Fiduciary ceases to be an independent fiduciary of the Plans, or negotiate any such transaction during the period that the Independent Fiduciary serves as an independent fiduciary of the Plans.

11. Thus, the Independent Fiduciary is independent of and has no affiliation with Pan-American, Minnesota Life, Securian, TDTC, or Standish Mellon, and the fees paid to the Independent Fiduciary in connection with the Transaction will constitute less than one percent of its revenue for 2003. Furthermore, the Independent Fiduciary has acknowledged and accepted the duties, responsibilities of an Independent Fiduciary.

Prior to the closing of the Transaction, the Independent Fiduciary (a) Conducted a due diligence review of the Transaction; (b) determined whether the Transaction was in the interest and protective of the Plans and their participants and beneficiaries; (c) issued a written preliminary report to the Department; and (d) a final report to the Department within 30 days of the closing of the Transaction.

In making its determinations, the Independent Fiduciary was required to (a) Review the terms of the Transaction; (b) review the written procedures by which TDTC calculates the net asset value of the Fund; (c) conduct discussions, as necessary to make the determinations described above, with appropriate personnel of Pan-American, Standish Mellon, and/or TDTC; and (d) if the Transaction was effectuated, confirm in writing whether the Transaction was effectuated consistently with the required terms set forth in the exemption application, based on written representations that the Independent

[39] Based on its review of information provided by Pan-American and TDTC, the Independent Fiduciary concluded that the purchase of the Fund units by Pan-American was effectuated in a manner consistent with the required criteria and procedures set forth in its preliminary report and that the fair market value of the Plan's interest in the Account as of November 14, 2003, as determined by TDTC, was accurate and consistent with the Fund's valuation methodology.

[40] As noted in Representation 3, the Account had total assets in excess of $75 million as of October 31, 2003 invested in the Fund. However, the Account sold approximately $55 million in Fund units to Pan-American. The applicant explains that prior to the date of the Transaction and the Reinsurance Transaction, TDTC redeemed approximately 20,000,000 Fund units held by the Account at the request of certain Plan fiduciaries electing not to participate in the Reinsurance Transaction, thereby reducing the Account size.

[41] The applicant represents that the economic burdens and benefits of the Fund units in the future will accrue to the detriment or benefit of Pan-American rather than to the Plans. Because the Fund units were purchased at fair market value, the purchase price reflected the market's assessment of the opportunity for future gains in the value of the Fund, balanced against the risk of future loss in value. The purchase price was the fair market value of the units determined in the ordinary course of business by TDTC for that date. The purchase price, which was credited to the Account, and to the Plans, compensated the Plans for the transfer of the future risks and rewards of Fund ownership. As a result, the applicant does not believe that the Transaction, and in particular, the form and timing of the payment by Pan-American to the Plans for the Fund units, provided financial benefit to Pan-American for which the Plans were not being compensated.

Fiduciary would request from Pan-American and TDTC and a test of a sample of material aspects of the Transaction, deemed in the Independent Fiduciary's judgment to be representative.

In connection with its analysis of the Transaction, the Independent Fiduciary states that it reviewed and considered various documents, including, but not limited to, the Separate Account V Rider, the Optional Investment Contract, the Fund's product description brochure, the December 31, 2002 Annual Report of the Fund, and the exemption request. However, the Independent Fiduciary states that it did not make any independent investigation to verify the accuracy of such information, data, analyses and representations. Instead, the Independent Fiduciary represents that it relied upon information provided by Pan-American, which Pan-American deemed to be accurate.

In anticipation of the Transaction, the Independent Fiduciary notes that as of August 31, 2003, the Fund was valued at $643.2 million by TDTC, as based on a daily valuation of the Fund, and that the value of each unit was $1.00 per unit. The Independent Fiduciary states that investments in GICs and other similar investments were valued at their contract values, and would provide for benefit responsive withdrawals at contract value and daily dividends to Fund unitholders that would be automatically reinvested on a monthly basis. In reviewing the Account's July Fund statement, the Independent Fiduciary demonstrated the methodology implemented by TDTC in calculating the net asset value of the Account's interest in the Fund as follows:

Number of units Beginning of July	$77,442,676.88
Value of units	1.00
Account's Equity Beginning of July	77,442,676.88
Value of units acquired through Contributions (at $1.00 per unit)	4,238,607.63
Value of units acquired through Reinvestment of dividends (at $1.00 per unit)	260,589.89
Value of units withdrawn (at $1.00 per unit)	(2,720,669.48)
Account's Equity End of July	79,221,204.92

The Independent Fiduciary opined that the Transaction would be in the interest and protective of the Plans and their participants and beneficiaries because:

- Securian had determined not to continue the Fund as an investment alternative following the Transaction. Therefore, the Independent Fiduciary believed it imperative that the Account's interest in the Fund be redeemed.
- TDTC had the discretion to defer redemptions over an extended period of time and had chosen to do so.
- There was no secondary market for the Fund units and, to the best of Pan-American's knowledge, there was no available unrelated purchaser for the Fund units held by the Account.
- The fair market value of the Account's units in the Funds as of November 14, 2003, would be determined by TDTC in the same manner that the units were historically valued by TDTC.
- Pan-American would purchase the Account's units at the determined value for cash which would allow the Plans to reinvest the full amount of the proceeds immediately rather than extending the receipt of redemption proceeds over 6–12 months.
- The Plans would pay no fees or commissions associated with the Transaction.

Furthermore, the Independent Fiduciary believed the terms of the Transaction were no less favorable to the Account than the terms obtainable in an arm's length transaction with an unrelated party at the time of such Transaction.

Subsequent to the closing of the Transaction, the Independent Fiduciary performed a post-transaction review which included, among other things, a determination of whether the fair market value of the Plans' interests in the Account, as determined by TDTC, was accurate and consistent with TDTC's valuation methodology of the Fund. Based upon the results of such review, the Independent Fiduciary concluded that the purchase of Fund units by Pan-American was effectuated in a manner consistent with the required criteria and procedures set forth in its preliminary report, and that the value paid by Pan-American for the Plan's interests in the Account was accurate and consistent with the Fund's valuation methodology.

12. In summary, it is represented that the Transaction satisfied the statutory criteria for an exemption under section 408(a) of the Act for the following reasons:

(a) Prior to the Transaction, the Independent Fiduciary, acting on behalf of the Plans, determined that the subject Transaction (1) was fair to the participants in the Plans investing in the Account; (2) was comparable to and no less favorable than terms obtainable at arm's length between unaffiliated parties; and (3) was in the best interest of the Plans investing in the Account and their participants and beneficiaries.

(b) The Independent Fiduciary monitored the Transaction on behalf of the Plans investing in the Account.

(c) Subsequent to the closing of the Transaction, the Independent Fiduciary performed a post-Transaction review, which included, among other things, a determination that the fair market value of the Plan's interests in the Account as of November 14, 2003, as determined by TDTC, was accurate and consistent with the Fund's valuation method.

(d) No sales commissions, fees or other costs were paid by the Plans in connection with the Transaction.

(e) The sale was a one-time transaction for cash.

(f) The fair market value of the units was determined in good faith by TDTC, at the time of the Transaction.

Notice to Interested Persons

Pan-American represents that it will distribute, by first class mail, a copy of the notice of proposed exemption (the Notice) within five (5) days of the date of such Notice is published in the **Federal Register** to the independent fiduciaries of the Plans affected by the Transaction. The Notice will include a copy of the proposed exemption, as published in the **Federal Register**, and a supplemental statement, as required pursuant to 29 CFR 2570.43(b)(2), which informs all interested persons of their right to comment on and/or request a hearing with respect to the proposed exemption. Comments and requests for a public hearing are due within 35 days following the publication of the proposed exemption in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Mr. Arjumand A. Ansari of the Department at (202) 693–8566. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which, among other things, require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and

beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(b) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries, and protective of the rights of participants and beneficiaries of the plan;

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 19th day of March, 2004.

Ivan Strasfeld,

Director of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor.

BILLING CODE 4510–29–P

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–52,912]

Boise Cascade Corporation, Yakima, WA; Notice of Revised Determination on Reconsideration Regarding Eligibility To Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

By letter dated December 3, 2003, the Western Council of Industrial Workers, Local 2739, requested administrative reconsideration regarding the Department's Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance (ATAA), applicable to softwood dimensional lumber workers of the subject firm. The Notice of Affirmative Determination Regarding Application for Reconsideration was signed in February 10, 2004 and published in the **Federal Register** on February 25, 2004 (69 FR 8698).

The initial denial was based on the findings of no sales declines and minimal production declines during the period of employment declines at the subject company, no shift of production abroad, no subject company imports and that there was a shift of production to a domestic facility. The workers produce plywood and softwood dimensional lumber and are separately identifiable by product line.

In the request for reconsideration, the petitioner alleged that employment declines occurred at the subject facility and increased import of softwood dimension lumber.

An examination of new information and further review of existing information supplied by the company during the initial investigation reveals that the subject company did experience sales, production and employment declines during the relevant time period.

The Department conducted a survey of the subject company's major declining customers for the time periods 2001, 2002, and January-August 2003 regarding imports of softwood dimensional lumber. The sample survey represents a meaningful portion of total subject company sales. The survey revealed decreased subject company purchases and increased customer reliance on imported softwood dimensional lumber during the relevant time period.

The investigation also revealed that at least five percent of the workforce at the subject firm is at least fifty years of age and that the workers possess skills that are not easily transferable. Competitive conditions within the industry are adverse.

Conclusion

After careful consideration of the new facts obtained on reconsideration, it is concluded that increased imports of softwood dimensional lumber, contributed importantly to the decline in production and to the total or partial separation of workers at Boise Cascade Corporation, Yakima, Washington. In accordance with the provisions of the Act, I make the following revised determination:

Workers of Boise Cascade Corporation, Yakima, Washington, engaged in activity related to the production of softwood dimensional lumber, who became totally or partially separated from employment on or after September 4, 2002 through two years from the date of this certification, are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974, and are also eligible to apply for alternative trade adjustment assistance under section 246 of the Trade Act of 1974.

Signed in Washington, DC this 8th day of March 2004.

Elliott S. Kushner

Certifying Officer, Division of Trade Adjustment Assistance.

BILLING CODE 4510–30–P

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–52,128, TA–W–52,128A, and TA–W–52,128B]

Control Engineering Company, Pellston, MI; Control Engineering Company, Harbor Springs, MI; Control Engineering Company, Boyne City, MI; Notice of Negative Determination on Reconsideration

On December 8, 2003, the Department issued an Affirmative Determination Regarding Application for Reconsideration for the workers and former workers of the subject firm. The notice was published in the **Federal Register** on December 29, 2003 (68 FR 74972).

The Department initially denied TAA to workers of Control Engineering Company, Pellston, Harbor Springs, and Boyne City, Michigan because the ''contributed importantly'' group eligibility requirement of section 222(3) of the Trade Act of 1974, as amended, was not met. The ''contributed importantly'' test is generally demonstrated through a survey of customers of the workers' firm. The survey revealed that none of the respondents increased their purchases of imported automated material handling systems/AVG and sheet metal enclosures. The company did not import automated material handling systems/AVG and sheet metal enclosures in the relevant period, nor did they shift production to a foreign source.

In the request for reconsideration, the petitioners alleged that the basis for certification at an affiliated facility (Jervis B. Webb Company, New Hudson, Michigan, TA–W–41,440) was also a contributing factor in layoffs at the subject firm facilities in this investigation. In the case of workers at the New Hudson facility, workers were certified on the basis of a shift of

production to Canada. One of the petitioners directed the Department to a specific company official.

A conversation with this company official revealed that there was no production shifted from the Harbor Springs, Pellston or Boyne City facilities to Canada.

The petitioners also alleged that the Department had not followed through with specific customer bid information provided in the initial investigation. The petitioners also indicated that these potential customers had awarded contracts to companies that produced abroad, and that the subject firm was excluded from competition due to competitive imports.

The Department conducted a bid survey of customers based on specified dates in the relevant period. Results of this survey revealed that either the contracts were awarded to domestic firms or, in cases where the contracts were awarded to companies that manufactured abroad, the subject firm was not the most competitive domestic bidder.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, DC this 8th day of March, 2004.

Elliott S. Kushner,

Certifying Officer, Division of Trade Adjustment Assistance.

Eagle Picher, Inc., Hillsdale, MI; Eagle Picher, Inc., Jonesville, MI; Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273), and under section 246 of the Trade Act of 1974, as amended, the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance on November 21, 2003, applicable to workers of Eagle Picher, Inc., located in Hillsdale, Michigan. The notice was published in the **Federal Register** on December 29, 2003 (68 FR 74978).

On January 6, 2004, the Department amended the certification to include workers at the Jonesville, Michigan location of Eagle Picher, Inc. The notice of amendment was published in the **Federal Register** on January 28, 2004 (69 FR 4178).

At the request of the State Agency, the Department reviewed the certification for workers of the subject firm. The amendment failed to cite the eligibility for workers of Picher, Inc., in both Hillsdale and Jonesville, Michigan, to apply for transitional adjustment assistance.

The Department is again amending the certification to include eligibility for workers of the subject firm to apply for ATAA.

The amended notice applicable to TA–W–53,147 is hereby issued as follows:

All workers of Eagle Picher, Inc., Hillsdale, Michigan (TA–W–53,147), and Eagle Picher, Inc., Jonesville, Michigan (TA–W–53,147A), who became totally or partially separated from employment on or after September 26, 2002, through November 21, 2005, are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974, and are also eligible to apply for alternative trade adjustment assistance under section 246 of the Trade Act of 1974, as amended.

Signed in Washington, DC, this 9th day of March, 2004.

Linda G. Poole,

Certifying Officer, Division of Trade Adjustment Assistance.

[TA–W–53,145]

General Aluminum Manufacturing Co., Hudson Forge, Hudson, MI; Notice of Negative Determination Regarding Application for Reconsideration

By application of January 23, 2004, the International Union, United Automobile, Aerospace & Agricultural Implement Workers of America–UAW, requested administrative reconsideration of the Department's negative determination regarding eligibility to apply for Trade Adjustment Assistance (TAA), applicable to workers and former workers of the subject firm. The denial notice was signed on November 17, 2003, and published in the **Federal Register** on December 29, 2003 (68 FR 74977).

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) If in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

The petition for the workers of General Aluminum Manufacturing Co., Hudson Forge, Hudson, Michigan was denied because the ''contributed importantly'' group eligibility requirement of section 222 of the Trade Act of 1974, as amended, was not met. The ''contributed importantly'' test is generally demonstrated through a survey of customers of the workers' firm. The survey revealed that none of the respondents increased their purchases of exhaust manifolds and related automobile component parts. The company did not import exhaust manifolds and related automobile component parts, nor did the company shift production to a foreign source during the relevant period.

The union alleges that the subject firm is an upstream supplier for a trade-affected company. The petitioner states that Hudson Forge facility was a sister plant and an upstream supplier to Metalloy Corporation Machining Operations, Hudson, Michigan, workers of which were certified eligible for TAA on February 11, 2002. The union further alleges that the closing of the Metalloy Corporation Machining Operations resulted in Hudson Forge ceasing operations.

A company official was contacted in regard to these allegations. As a result, it was revealed that the subject firm supplied one part to the Metalloy Corporation Machining Operations, Hudson Michigan. In December of 2001, Metalloy Corporation Machining Operations, Hudson, Michigan shut down and moved its production to another General Aluminum Division in Fremont, Indiana, including the part manufactured by the subject firm. It was established that Metalloy Corporation Machining Operations, Hudson, Michigan ceased its production in December of 2001, which means that the subject firm did not supply components to this firm during the relevant period of this investigation. Furthermore, the review of the original investigation

revealed that the value of sales and production at the subject facility increased in 2002 compared with 2001. Therefore the closure of Metalloy Corporation Machining Operations, Hudson, Michigan did not have an impact on the subject firm's production and did not result in subject firm's loss of business.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed in Washington, DC this 8th day of March, 2004.

Elliott S. Kushner,

Certifying Officer, Division of Trade Adjustment Assistance.

DEPARTMENT OF LABOR

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 (''the Act'') and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Division of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Division of Trade Adjustment Assistance, at the address shown below, not later than April 5, 2004.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Division of Trade Adjustment Assistance, at the address shown below, not later than April 5, 2004.

The petitions filed in this case are available for inspection at the Office of the Director, Division of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, Room C–5311, 200 Constitution Avenue, NW., Washington, DC 20210.

Signed at Washington, DC this 18th day of March, 2004.

Timothy Sullivan,

Director, Division of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–53,537]

Pacific Rim Log Scaling Bureau, Lacey, WA; Notice of Negative Determination on Reconsideration

On February 13, 2004, the Department issued an Affirmative Determination Regarding Application for Reconsideration for the workers and former workers of the subject firm. The Department published the notice in the **Federal Register** on February 25, 2004 (69 FR 8701).

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) If in the opinion of the Certifying Officer, a mis-interpretation of facts or of the law justified reconsideration of the decision.

The TAA petition was filed on behalf of workers at Pacific Rim Log Scaling Bureau, Lacey, Washington. The petition was denied because the petitioning workers did not produce an article within the meaning of section 222 of the Act and are not service workers whose separations were caused importantly by a reduced demand for their services from a parent firm, a firm otherwise related to their firm by ownership or a firm related by control.

In the request for reconsideration, the petitioner does not refute the service designation but alleges that the subject firm is a ''collective'' consisting of timber companies, the workers ''actually work for timber companies that own the [b]ureau'' and the worker separations were caused by a reduced demand for services by ''collective'' members. The petitioner infers that the timber companies function as the subject firm's parent company and the subject firm should be certified because several of those companies are TAA certified.

The Department conducted an investigation to determine whether the worker separations were caused importantly by a reduced demand for their services from a parent firm, a firm otherwise related by ownership or a firm related by control.

The investigation revealed that the subject firm is a corporation without a parent company or any affiliates. A board of directors, consisting of 33 members, is elected by shareholders to manage the corporation. Although most of the subject firm's customers are shareholders, no individual timber company can have more than one person on the board of directors at any time. Furthermore, the main purpose of creating the subject firm was to promote fair competition among the timber companies. Thus, there is no firm controlling the subject firm.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed in Washington, DC, this 8th day of March, 2004.

Elliott S. Kushner,

Certifying Officer, Division of Trade Adjustment Assistance.

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–51,848]

WSW Company of Sharon, Inc., a Subsidiary of Wormser Company, Rebel Screeners, Inc., Sharon, TN; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on June 30, 2003, applicable to workers of WSW Company of Sharon, Inc., a subsidiary of Wormser Co., Rebel Screeners, Inc., Sharon, Tennessee. The notice was published in the **Federal Register** on July 22, 2003 (68 FR 43373).

At the request of the State agency, the Department reviewed the certification for workers of the subject firm. The workers produce children's apparel and are not separately identifiable by product line.

New findings show that there was a previous certification, TA-W–39,088, issued on December 7, 2001, for workers of WSW Company of Sharon, Inc., Sharon, Tennessee who were engaged in employment related to the production of children's apparel. That certification expired December 7, 2003. To avoid an overlap in worker group coverage, the certification is being amended to change the impact date from May 12, 2002, to December 8, 2003, for workers of the subject firm.

The amended notice applicable to TA–W–51,848 is hereby issued as follows:

All workers of WSW Company of Sharon, Inc., a subsidiary of Wormser Company, Rebel Screeners, Inc., Sharon, Tennessee, who became totally or partially separated from employment on or after December 8, 2003, through June 30, 2005, are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974.

Signed at Washington, DC this 6th day of March, 2004.

Linda G. Poole,

Certifying Officer, Division of Trade Adjustment Assistance.

BILLING CODE 4510–30–P

DEPARTMENT OF LABOR

Employment Standards Administration

Proposed Collection; Comment Request

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Employment Standards Administration is soliciting comments concerning the proposed collection: Office of Federal Contract Compliance Programs Recordkeeping and Reporting Requirements, Supply and Service. A copy of the proposed information collection request can be obtained by contacting the office listed below in the addresses section of this Notice.

DATES: Written comments must be submitted to the office listed in the addresses section below on or before May 24, 2004.

ADDRESSES: Ms. Hazel M. Bell, U.S. Department of Labor, 200 Constitution Ave., NW., Room S–3201, Washington, DC 20210, telephone (202) 693–0418, fax (202) 693–1451, E-mail *bell.hazel@dol.gov*. Please use only one method of transmission for comments (mail, fax, or E-mail).

SUPPLEMENTARY INFORMATION:

I. Background: The Office of Federal Contract Compliance Programs (OFCCP) is responsible for the administration of three equal opportunity programs prohibiting employment discrimination and requiring affirmative action. The OFCCP administers Executive Order 11246, as amended; Section 503 of the Rehabilitation Act of 1973, as amended; and the affirmative action provisions of the Vietnam Era Veterans' Readjustment Assistance Act of 1974, as amended (VEVRAA), 38 U.S.C. 4212. The regulations implementing the Executive Order program are found at 41 CFR Parts 60–1, 60–2, 60–3, 60–4, 60–20, 60–30, 60–40, and 60–50. The regulations implementing Section 503 are published at 41 CFR part 60–741. The regulations implementing VEVRAA are found at 41 CFR Part 60–250. The regulations require contractors to develop and maintain Affirmative Action Programs (AAP). OFCCP reviews these AAPs through its compliance evaluation process. The Supply and Service Scheduling Letter provides the contractor notice of its selection for a compliance evaluation and requests the submission of its Affirmative Action Programs and supporting documentation. The supporting documentation includes compensation data (Itemized Listing question number 11). OFCCP uses the Item 11 data purely to determine whether OFCCP should investigate a contractor's compensation practices further, as a means of targeting and allocating the agency's investigative resources. OFCCP is not using Item 11 data to make any kind of determination of whether a violation has occurred. OFCCP only determines that a violation has occurred based on careful investigation of a contractor's

compensation practices, which would require examination of much more detailed compensation and personnel data. With respect to assessing whether the contractor has engaged in systemic discrimination (*i.e.*, pattern or practice discrimination under a disparate treatment and/or disparate impact theory), OFCCP conducts multiple regression analyses and/or examines cohorts to assess whether there is a pattern of compensation disparities. In assessing whether to make a finding of systemic compensation discrimination, OFCCP looks not only at statistically-significant compensation disparities, but also at evidence of how the statistical pattern of pay disparities affects individual employees within the contractor's workplace, and other anecdotal evidence. OFCCP has found this approach effective in determining whether systemic compensation discrimination exists, convincing a contractor to conciliate based on OFCCP's findings, and creating a credible threat of enforcement litigation.

In light of this limited use of the Item 11 data, OFCCP concludes that the data, while clearly not sufficient to make a determination of a violation, is and has been effective in allowing OFCCP to allocate the agency's investigative resources. OFCCP's Division of Program Operations (DPO) conducted an internal study of compliance reviews closed at the desk audit stage. The DPO study found that indicators obtained from review of the Item 11 data were sufficient to target OFCCP's resources on cases in which additional data was required. The DPO study also found that OFCCP's review of the additional data in many cases warranted OFCCP's determination that an on-site review was unnecessary. For example, before deciding to pursue further investigation during an evaluation, OFCCP asked for more data in just over 50% of the cases. However, in a significant number of cases, nearly 50%, OFCCP determined that further review of compensation data was unwarranted based only on the Item 11 submission. OFCCP asked for more compensation data only if an examination of the Item 11 data indicated a potential problem that could be assessed through analysis of further data.

In addition to the internal DPO study, OFCCP developed and sent out a Compensation Questionnaire in response to the Office of Management and Budget's (OMB) previous Terms of Clearance. These Compensation Questionnaires were sent to Supply and Service contractors scheduled for compliance evaluations between July and September 2003. The Compensation Questionnaire solicited information about the burden hours associated with submitting compensation data to OFCCP during the initial desk audit stage of a compliance review. The Compensation Questionnaires were voluntary, and contractors were afforded 60 days to complete the questionnaire.

On October 31, 2003, OFCCP requested and received a 3-month extension from OMB on its Supply and Service authorization to allow for continued submission of the questionnaires and for OFCCP to analyze the responses. While OFCCP sent out 1,977 questionnaires, the agency received only 99 responses and 4 letters of non-response, for a response rate of approximately 5%, a somewhat disappointing result. Nonetheless, OFCCP's attempt to solicit comments directly from covered contractors obtained the following information:

1. On average, contractors took 28.35 staff hours to prepare and submit information to OFCCP in response to the Supply and Service Scheduling Letter.

2. Of those 28.35 staff hours, on average, contractors took 5.23 staff hours to submit compensation information to OFCCP.

3. 94.94% of respondents who stated a preference, preferred to submit compensation information as part of the desk audit rather than as part of the on-site review.

4. 86.46% of respondents maintain compensation data in electronic format; while 29.17% of respondents maintain compensation data manually (some contractors indicated both forms of data maintenance).

OFCCP has revised its burden hour estimates based on the comments received from the compensation questionnaire.

II. Review Focus: The Department of Labor is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submissions of responses.

III. Current Actions: OFCCP seeks a three-year extension to the approval of the Supply and Service Scheduling Letter. There is no change in the substance or method of collection since the last OMB approval. OFCCP has revised the burden hour estimates associated with the Supply and Service Scheduling letter based on the responses to the Compensation Questionnaire.

Type of Review: Extension.

Agency: Employment Standards Administration.

Title: OFCCP Recordkeeping and Reporting Requirements, Supply and Service—Scheduling Letter.

OMB Number: 1215–0072.

Affected Public: Business or other for-profit, Not-for-profit institutions.

Total Annual responses: 6,092 (FY03 data).

Frequency: Annually.

Average Time per response: 28.35 hours.

Estimated Total Burden Hours: 172,708.

Total Burden Cost (capital/startup): $0.

Total Burden Cost (operating/maintenance): $60,798.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated: March 18, 2004.

Bruce Bohanon,

Chief, Branch of Management Review and Internal Control, Division of Financial Management, Office of Management, Administration and Planning, Employment Standards Administration.

[FR Doc. 04–6552 Filed 3–23–04; 8:45 am]

BILLING CODE 4510–CM–P

NATIONAL MEDIATION BOARD

Notice of Proposed Information Collection Requests

AGENCY: National Mediation Board.

SUMMARY: The Chief Information Officer, Finance and Administration Department, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments on or before May 26, 2004.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of

1995 (U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Chief Information Officer, Finance and Administration Department, publishes that notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection contains the following: (1) Type of review requested, *e.g.* new, revision extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Record keeping burden. OMB invites public comment.

Currently, the National Mediation Board is soliciting comments concerning the new collection of information in the form of an Application for Alternative Dispute Resolution (ADR) Services and is interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the agency; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the agency enhance the quality, utility, and clarity of the information to be collected; and (5) how might the agency minimize the burden of this collection on the respondents, including through the use of information technology.

June D.W. King,

Chief Information Officer, Finance and Administration Department, National Mediation Board.

A. Application for ADR Services

Type of Review: New Collection.

Title: Application for ADR Services.

Frequency: On occasion.

Affected Public: Union Officials and Officials of Railroads and Airlines.

Reporting and Recordkeeping Hour Burden:

Responses: Estimate about 45 annually.

Burden Hours: 9.

Abstract: The Railway Labor Act, 45 U.S.C., 151 a. General Purposes, provides that the purposes of the Act are (1) to avoid any interruption to commerce or to the operation of any carrier engaged therein. * * * (4) to provide for the prompt and orderly settlement of all disputes concerning rates of pay, rules, or working conditions, and (5) to provide for the prompt and orderly settlement of all disputes growing out of grievances or out of the interpretation or application of agreements concerning rates of pay, rules, or working conditions.

In fulfilling its role to administer the Act, the National Mediation Board offers the parties to disputes mediation and arbitration services. On a voluntary basis, training programs in Alternative Dispute Resolution (ADR) and facilitation services are also available. These ADR programs are designed to enhance the bargaining and grievance handling skill level of the disputants and to assist the parties in the resolution of disputes. The impact of these ADR programs is that mediation and arbitration can be avoided entirely or the scope and number of issues brought to mediation or arbitration is significantly reduced.

This collection is necessary to confirm the voluntary participation of the parties in the ADR process. The information provided by the parties is used by the NMB to schedule the parties for ADR training and facilitation. Based on a recent survey of those who participated in the NMB's ADR Programs, 94.6% said they were satisfied with the ADR Programs and said they recommend the program for all negotiators. Collecting the brief information on the Application for ADR Services form allows the parties to voluntarily engage the services of the NMB in the orderly settlement of all disputes and fulfill the purposes of the Act.

Requests for copies of the proposed information collection request may be requested by sending an email to *leach@nmb.gov* or should be addressed to Grace Ann Leach, Sr. Project Manager, National Mediation Board, 1301 K Street NW., Suite 250 E, Washington, DC 20005, or faxed to 202–692–5081. Please specify the complete title of the information collection when making your request.

Comments regarding burden and/or the collection activity requirements should be directed to June D.W. King, Chief Information Officer, National Mediation Board, 1301 K Street NW., Suite 250 East, Washington DC 20005, or at 202–692–5010 or via email address *king@nmb.gov.* Individuals who use a telecommunications device for the deaf (TDD/TDY) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

NUCLEAR REGULATORY COMMISSION

Advisory Committee on the Medical Uses of Isotopes; Renewal Notice

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: This notice is to announce the renewal of the Advisory Committee on the Medical Uses of Isotopes (ACMUI) for a period of two years.

SUPPLEMENTARY INFORMATION: The U.S. Nuclear Regulatory Commission (NRC) has determined that the renewal of the charter for the Advisory Committee on the Medical Uses of Isotopes for the two year period commencing on March 18, 2004 is in the public interest, in connection with duties imposed on the Commission by law. This action is being taken in accordance with the Federal Advisory Committee Act, after consultation with the Committee Management Secretariat, General Services Administration.

The purpose of the ACMUI is to provide advice to NRC on policy and technical issues that arise in regulating the medical use of byproduct material for diagnosis and therapy. Responsibilities include providing guidance and comments on current and proposed NRC regulations and regulatory guidance concerning medical use; evaluating certain non-routine uses of byproduct material for medical use; and evaluating training and experience of proposed authorized users. The members are involved in preliminary discussions of major issues in determining the need for changes in NRC policy and regulation to ensure the continued safe use of byproduct material. Each member provides technical assistance in his/her specific area(s) of expertise, particularly with respect to emerging technologies. Members also provide guidance as to NRC's role in relation to the responsibilities of other Federal agencies as well as of various professional organizations and boards.

Members of this Committee have demonstrated professional qualifications and expertise in both scientific and non-scientific disciplines including nuclear medicine; nuclear cardiology; radiation therapy; medical physics; radiopharmacy; State medical regulation; patient's rights and care;

health care administration; medical research; medical dosimetry, and Food and Drug Administration regulation.

FOR FURTHER INFORMATION CONTACT: Angela Williamson, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555; Telephone (301) 415–5030.

Dated: March 18, 2004.

Andrew L. Bates,

Federal Advisory Committee, Management Officer.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Meeting Notice

In accordance with the purposes of Sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b), the Advisory Committee on Reactor Safeguards (ACRS) will hold a meeting on April 15–17, 2004, 11545 Rockville Pike, Rockville, Maryland. The date of this meeting was previously published in the **Federal Register** on Monday, November 21, 2003 (68 FR 65743).

Thursday, April 15, 2004, Conference Room T–2B3, Two White Flint North, Rockville, Maryland

8:30 a.m.–8:35 a.m.: Opening Remarks by the ACRS Chairman (Open)—The ACRS Chairman will make opening remarks regarding the conduct of the meeting.

8:35 a.m.–10 a.m.: Action Plan for Implementing the Phased Approach for Improving PRA Quality (Open)—The Committee will hear presentations by and hold discussions with representatives of the NRC staff regarding the staff's proposed action plan for implementing the phased approach for improving PRA quality.

10:15 a.m.–12:30 p.m.: SECY–04–0037, ''Issues Related to Proposed Rulemaking to Risk-Inform Requirements Related to Large Break LOCA Break Size and Plans for Rulemaking on LOCA with Coincident Loss-of-Offsite Power'' (Open)—The Committee will hear presentations by and hold discussions with representatives of the NRC staff regarding SECY–04–0037.

1:30 p.m.–3:30 p.m.: Options and Recommendations for Functional Performance Requirements and Criteria for the Containments of Non-LWRs (Open)—The Committee will hear presentations by and hold discussions with representatives of the NRC staff regarding proposed options and recommendations for functional performance requirements and criteria for the containments of non-light water reactors (LWRs).

3:45 p.m.–4:45 p.m.: Criteria for Evaluating the Effectiveness (Quality) of the NRC Research Programs (Open)—The Committee will discuss the final criteria for use by the ACRS in evaluating the effectiveness (quality) of the NRC research programs.

5 p.m.–6:30 p.m.: Preparation of ACRS Reports (Open)—The Committee will discuss proposed ACRS reports on matters considered during this meeting as well as proposed reports on Resolution of Certain Items Identified by the ACRS in NUREG–1740 Related to Differing Professional Opinion on Steam Generator Tube Integrity, and on Divergence in Regulatory Requirements Between U.S. and Several Other Countries.

Friday, April 16, 2004, Conference Room T–2B3, Two White Flint North, Rockville, Maryland

8:30 a.m.–8:35 a.m.: Opening Remarks by the ACRS Chairman (Open)—The ACRS Chairman will make opening remarks regarding the conduct of the meeting.

8:35 a.m.–10 a.m.: License Renewal Application for the R.E. Ginna Nuclear Power Plant (Open)—The Committee will hear presentations by and hold discussions with representatives of the NRC staff and Rochester Gas and Electric Company regarding the license renewal application for the R.E. Ginna Nuclear Power Plant and the associated final Safety Evaluation Report prepared by the NRC staff.

10:15 a.m.–12 noon: Proposed Generic Communication Regarding Pressurizer Dissimilar Metal Weld Cracking Issues (Open)—The Committee will hear presentations by and hold discussions with representatives of the NRC staff regarding the proposed NRC generic communication related to pressurizer dissimilar metal weld cracking issues.

1:15 p.m.–1:30 p.m.: Subcommittee Report on the Interim Review of the License Renewal Application for the Dresden and Quad Cities Nuclear Power Plants (Open)—The Committee will hear a report by and hold discussions with the Chairman of the ACRS Subcommittee on Plant License Renewal regarding the Subcommittee's review of the license renewal application for the Dresden and Quad Cities Nuclear Power Plants and the associated initial Safety Evaluation Report prepared by the NRC staff.

1:30 p.m.–1:45 p.m.: Subcommittee Report on Digital I&C System Matters (Open)—The Committee will hear a report by and hold discussions with the Chairman of the ACRS Subcommittee on Plant Operations regarding the Subcommittee's review of the digital instrumentation and control (I&C) system matters.

1:45 p.m.–2:30 p.m.: Future ACRS Activities/Report of the Planning and Procedures Subcommittee (Open)—The Committee will discuss the recommendations of the Planning and Procedures Subcommittee regarding items proposed for consideration by the full Committee during future meetings. Also, it will hear a report of the Planning and Procedures Subcommittee on matters related to the conduct of ACRS business, including anticipated workload and member assignments.

2:30 p.m.–2:45 p.m.: Reconciliation of ACRS Comments and Recommendations (Open)—The Committee will discuss the responses from the NRC Executive Director for Operations (EDO) to comments and recommendations included in recent ACRS reports and letters. The EDO responses are expected to be made available to the Committee prior to the meeting.

3 p.m.–4:30 p.m.: Preparation for Meeting with the NRC Commissioners (Open)—The Committee will discuss proposed topics for meeting with the NRC Commissioners, which is scheduled to be held between 1:30 and 3:30 p.m. on Thursday, May 6, 2004.

4:45 p.m.–7 p.m.: Preparation of ACRS Reports (Open)—The Committee will discuss proposed ACRS reports.

Saturday, April 17, 2004, Conference Room T–2B3, Two White Flint North, Rockville, Maryland

8:30 a.m.–12:30 p.m.: Preparation of ACRS Reports (Open)—The Committee will discuss proposed ACRS reports.

12:30 p.m.–1 p.m.: Miscellaneous (Open)—The Committee will discuss matters related to the conduct of Committee activities and matters and specific issues that were not completed during previous meetings, as time and availability of information permit.

Procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on October 16, 2003 (68 FR 59644). In accordance with those procedures, oral or written views may be presented by members of the public, including representatives of the nuclear industry. Electronic recordings will be permitted only during the open portions of the meeting. Persons desiring to make oral statements should notify the Cognizant ACRS staff named below five days before the meeting, if possible, so that

appropriate arrangements can be made to allow necessary time during the meeting for such statements. Use of still, motion picture, and television cameras during the meeting may be limited to selected portions of the meeting as determined by the Chairman. Information regarding the time to be set aside for this purpose may be obtained by contacting the Cognizant ACRS staff prior to the meeting. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the Cognizant ACRS staff if such rescheduling would result in major inconvenience.

Further information regarding topics to be discussed, whether the meeting has been canceled or rescheduled, as well as the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by contacting Mr. Sam Duraiswamy, Cognizant ACRS staff (301–415–7364), between 7:30 a.m. and 4:15 p.m., ET.

ACRS meeting agenda, meeting transcripts, and letter reports are available through the NRC Public Document Room at *pdr@nrc.gov,* or by calling the PDR at 1–800–397–4209, or from the Publicly Available Records System (PARS) component of NRC's document system (ADAMS) which is accessible from the NRC Web site at *http://www.nrc.gov/reading-rm/adams.html* or *http://www.nrc.gov/reading-rm/doc-collections/* (ACRS & ACNW Mtg schedules/agendas).

Videoteleconferencing service is available for observing open sessions of ACRS meetings. Those wishing to use this service for observing ACRS meetings should contact Mr. Theron Brown, ACRS Audio Visual Technician (301–415–8066), between 7:30 a.m. and 3:45 p.m., ET, at least 10 days before the meeting to ensure the availability of this service. Individuals or organizations requesting this service will be responsible for telephone line charges and for providing the equipment and facilities that they use to establish the videoteleconferencing link. The availability of videoteleconferencing services is not guaranteed.

Dated: March 18, 2004.

Andrew L. Bates,

Advisory Committee Management Officer.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards Joint Meeting of the ACRS Subcommittees on Reliability and Probabilistic Risk Assessment and on Plant Operations; Notice of Meeting

The ACRS Subcommittees on Reliability and Probabilistic Risk Assessment and on Plant Operations will hold a joint meeting on April 14, 2004, Room T–2B3, 11545 Rockville Pike, Rockville, Maryland.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Wednesday, April 14, 2004—8:30 a.m. Until 11:30 a.m.

The Subcommittees will discuss the results of the pilot program on the Mitigating Systems Performance Indicator (MSPI). The Subcommittees will hear presentations by and hold discussions with representatives of the NRC staff and other interested persons regarding this matter. The Subcommittees will gather information, analyze relevant issues and facts, and formulate proposed positions and actions, as appropriate, for deliberation by the full Committee.

Members of the public desiring to provide oral statements and/or written comments should notify the Designated Federal Official, Ms. Maggalean Weston (telephone: 301–415–3151) five days prior to the meeting, if possible, so that appropriate arrangements can be made. Electronic recordings will be permitted.

Further information regarding this meeting can be obtained by contacting the Designated Federal Official between 8 a.m. and 5:30 p.m. (e.t.). Persons planning to attend this meeting are urged to contact the above named individual at least two working days prior to the meeting to be advised of any potential changes to the agenda.

Dated: March 17, 2004.

Maggalean W. Weston,

Acting Associate Director for Technical Support, ACRS/ACNW.

BILLING CODE 7590–01–P

OFFICE OF PERSONNEL MANAGEMENT

Submission for OMB Review; Comment Request for Reclearance of a Revised Information Collection: RI 92–19

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–13, May 22, 1995), this notice announces that the Office of Personnel Management (OPM) has submitted to the Office of Management and Budget (OMB) a request for reclearance of a revised information collection. RI 92–19, Application for Deferred or Postponed Retirement: Federal Employees' Retirement System (FERS), is used by separated employees to apply for either a deferred or a postponed FERS annuity benefit.

Approximately 1,539 forms are completed annually. The form takes approximately 60 minutes to complete. The annual estimated burden is 1,539 hours.

For copies of this proposal, contact Mary Beth Smith-Toomey on (202) 606–8358, FAX (202) 418–3251 or via e-mail to *mbtoomy@opm.gov.* Please include a mailing address with your request.

DATES: Comments on the proposal should be received on or before April 23, 2004.

ADDRESSES: Send or deliver comments to—Ronald W. Melton, Chief, Operations Support Group, Retirement Services Program, U.S. Office of Personnel Management, 1900 E Street, NW., Room 3349, Washington, DC 20415–3540, and Joseph Lackey, OPM Desk Officer, Office of Information & Regulatory Affairs, Office of Management & Budget, New Executive Office Building, NW., Room 10235, Washington, DC 20503.

For Information Regarding Administrative Coordination—Contact: Cyrus S. Benson, Team Leader, Publications Team, Support Group, (202) 606–0623.

BILLING CODE 6325–38–P

SECURITIES AND EXCHANGE COMMISSION

Proposed Collection; Comment Request

Upon written request, copies available from: Securities and Exchange Commission, Office of Filings and Information Services, Washington, DC 20549

Extension: Rule 19d–3; SEC File No. 270–245; OMB Control No. 3235–0204

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') is soliciting comments on the collection of information summarized below. The Commission plans to submit this existing collection of information to the Office of Management and Budget for extension and approval.

Rule 19d–3 under the Securities Exchange Act of 1934 (the ''Exchange Act''), prescribes the form and content of applications to the Commission by persons desiring stays of final disciplinary sanctions and summary action of self-regulatory organizations (''SROs'') for which the Commission is the appropriate regulatory agency. The Commission uses the information provided in the application filed pursuant to Rule 19d–3 to review final actions taken by SROs including: (1) Disciplinary sanctions; (2) denials of membership, participation or association; and (3) prohibitions on or limitations of access to SRO services.

It is estimated that approximately 15 respondents will utilize this application procedure annually, with a total burden of 270 hours, for all respondents to complete all submissions. This figure is based upon past submissions. The staff estimates that the average number of hours necessary to comply with the requirements of Rule 19d–3 is 18 hours. The average cost per hour, to complete each submission, is approximately $101. Therefore, the total cost of compliance for all respondents is $27,270. (15 submissions × 18 hours × $101 per hour).

Written comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

Please direct your written comments to R. Corey Booth, Director/CIO, Office of Information Technology, Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549.

Dated: March 16, 2004.

J. Lynn Taylor,

Assistant Secretary.

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

Proposed Collection; Comment Request

Upon written request, copies available from: Securities and Exchange Commission, Office of Filings and Information Services, Washington, DC 20549.

Extension: Rule 19h–1; SEC File No. 270–0247; OMB Control No. 3235–0259.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') is soliciting comments on the collection of information summarized below. The Commission plans to submit this existing collection of information to the Office of Management and Budget for extension and approval.

Rule 19h–1 under the Securities Exchange Act of 1934 (the ''Exchange Act'') prescribes the form and content of notices and applications by self-regulatory organizations (''SROs'') regarding proposed admissions to, or continuances in, membership, participation or association with a member of any person subject to a statutory disqualification.

The Commission uses the information provided in the submissions filed pursuant to Rule 19h–1 to review decisions of SROs to permit the entry into or continuance in the securities business of persons who have committed serious misconduct. The filings submitted pursuant to the Rule also permit inclusion of an application to the Commission for consent to associate with a member of an SRO notwithstanding a Commission order barring such association.

The Commission reviews filings made pursuant to the Rule to ascertain whether it is in the public interest to permit the employment in the securities business of persons subject to statutory disqualification. The filings contain information that is essential to the staff's review and ultimate determination on whether an association or employment is in the public interest and consistent with investor protection.

It is estimated that approximately 5 respondents will make submissions pursuant to this rule annually, with a total burden of 200 hours, based upon past submissions. The staff estimates that the average number of hours necessary to complete a submission pursuant to Rule 19h–1 is 8 hours. The average cost per hour for completion of a submission is approximately $101. Therefore, the total cost of compliance for the respondents is $20,200. (25 responses × 8 hours per response × $101 per hour).

Written comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

Please direct your written comments to R. Corey Booth, Director/Chief Information Officer, Office of Information Technology, Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549.

Dated: March 16, 2004.

J. Lynn Taylor,

Assistant Secretary.

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

Proposed Collection; Comment Request

Upon written request, copies available from: Securities and Exchange Commission, Office of Filings and Information Services, Washington, DC 20549.

Extension: Rule 19d–1; SEC File No. 270–242; OMB Control No. 3235–0206.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') is soliciting comments on the collection of information summarized below. The Commission plans to submit this existing collection of information to the Office of Management and Budget (''OMB'') for extension and approval.

Rule 19d–1 (''Rule'') under the Securities Exchange Act of 1934 (the ''Exchange Act''), prescribes the form and content of notices to be filed with the Commission by self-regulatory organizations (''SROs'') for which the Commission is the appropriate regulatory agency concerning the following final SRO actions: (1) Disciplinary sanctions (including summary suspensions); (2) denials of membership, participation or association with a member; and (3) prohibitions or limitations on access to SRO services.

The Rule enables the Commission to obtain reports from the SROs containing information regarding SRO determinations to discipline members or associated persons of members, deny membership or participation or association with a member, and similar adjudicated findings. The Rule requires that such actions be promptly reported to the Commission. The Rule also requires that the reports and notices supply sufficient information regarding the background, factual basis and issues involved in the proceeding to enable the Commission (1) to determine whether the matter should be called up for review on the Commission's own motion and (2) to ascertain generally whether the SRO has adequately carried out its responsibilities under the Exchange Act.

It is estimated that 10 respondents will utilize this application procedure annually, with a total burden of 1,175 hours, based upon past submissions. This figure is based on 10 respondents, spending approximately 117.5 hours each. Each respondent submitted approximately 235 responses. The staff estimates that the average number of hours necessary to comply with the requirements of Rule 19d–1 for each submission is 0.5 hours. The average cost per hour, per each submission is approximately $101. Therefore, the total cost of compliance for all the respondents is $118,675. (10 respondents × 235 responses per respondent × .5 hrs per response × $101 per hour).

Written comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

Please direct your written comments to R. Corey Booth, Director/CIO, Office of Information Technology, Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549.

Dated: March 16, 2004.

J. Lynn Taylor,

Assistant Secretary.

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

Submission for OMB Review; Comment Request

Upon written request, copies available from: Securities and Exchange Commission, Office of Filings and Information Services, Washington, DC 20549.

Extension: Rule 87, SEC File No. 270–474, OMB Control No. 3235–0552.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501, *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget (''OMB'') a request for an extension of the previously approved collection of information discussed below.

Information relevant to Rule 87 (17 CFR 250.87) under the Public Utility Holding Company Act of 1935 (15 U.S.C. 79a *et seq.*) (''Act'') is required to be reported under Item 8 of Form U5–S. Item 8 of Form U5–S requires reporting of any recurring goods and service transactions in excess of $100,000 provided by an electric or gas utility to any associate company under Rule 87(a)(3). Item 8 of Form U5–S also requires reporting of any goods and service transactions in excess of $100,000 by any non-utility subsidiary to any associate company under Rule 87(b)(1). It is estimated that the total number of respondents is 200. The average number of responses per respondent is 1 response annually. The burden of responding is accounted for primarily through Form U5–S. To account for administrative time, the Commission estimates that the total annual reporting burden under rule 87 is 1 hour per respondent.

These estimates of average burden hours are made solely for the purposes of the Paperwork Reduction Act and are not derived from a comprehensive or even a representative survey or study of the costs of SEC rules and forms. There is no requirement to keep the information in the forms confidential because it is public information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid control number.

Please direct general comments regarding the above information to the following persons: (i) Desk officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503 or send an email to: *David_Rostker@omb.eop.gov;* and (ii) R. Corey Booth, Director/Chief Information Officer, Office of Information Technology, Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549. Comments must be submitted to OMB within 30 days of this notice.

Dated: March 16, 2004.

J. Lynn Taylor,

Assistant Secretary.

BILLING CODE 8010–01–U

SECURITIES AND EXCHANGE COMMISSION

Proposed Collection; Comment Request

Upon written request, copies available from: Securities and Exchange Commission, Office of Filings and Information Services, Washington, DC 20549.

Extension: Rule 23c–3, SEC File No. 270–373, OMB Control No. 3235–0422;

Form N–23c–3, SEC File No. 270–373, OMB Control No. 3235–0422.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 350l *et seq.*), the Securities

and Exchange Commission (the ''Commission'') is soliciting comments on the collections of information summarized below. The Commission plans to submit these existing collections of information to the Office of Management and Budget (''OMB'') for extension and approval.

Rule 23c–3 under the Investment Company Act of 1940 [17 CFR 270.23c–3] is entitled: ''Repurchase of Securities of Closed-End Companies.'' The rule permits certain closed-end investment companies (''closed-end funds'' or ''funds'') periodically to offer to repurchase from shareholders a limited number of shares at net asset value. The rule includes several reporting and recordkeeping requirements. The fund must send shareholders a notification that contains specified information each time the fund makes a repurchase offer (on a quarterly, semi-annual, or annual basis, or for certain funds, on a discretionary basis not more often than every two years). The fund also must file copies of the shareholder notification with the Commission (electronically through the Commission's Electronic Data Gathering, Analysis and Retrieval System (''EDGAR'')) attached to Form N–23c–3 [17 CFR 274.221], a cover sheet that provides limited information about the fund and the type of offer the fund is making.[1] The fund must describe in its annual report to shareholders the fund's policy concerning repurchase offers and the results of any repurchase offers made during the reporting period. The fund's board of directors must adopt written procedures designed to ensure that the fund's investment portfolio is sufficiently liquid to meet its repurchase obligations and other obligations under the rule. The board periodically must review the composition of the fund's portfolio and change the liquidity procedures as necessary. The fund also must file copies of advertisements and other sales literature with the Commission as if it were an open-end investment company subject to section 24 of the Investment Company Act [15 U.S.C. 80a–24] and the rules that implement section 24.[2]

The requirement that the fund send a notification to shareholders of each offer is intended to ensure that a fund provides material information to shareholders about the terms of each offer, which may differ from previous offers on such matters as the maximum amount of shares to be repurchased (the maximum repurchase amount may range from 5% to 25% of outstanding shares). The requirement that copies be sent to the Commission is intended to enable the Commission to monitor the fund's compliance with the notification requirement. The requirement that the shareholder notification be attached to Form N–23c–3 is intended to ensure that the fund provides basic information necessary for the Commission to process the notification and to monitor the fund's use of repurchase offers. The requirement that the fund describe its current policy on repurchase offers and the results of recent offers in the annual shareholder report is intended to provide shareholders current information about the fund's repurchase policies and its recent experience. The requirement that the board approve and review written procedures designed to maintain portfolio liquidity is intended to ensure that the fund has enough cash or liquid securities to meet its repurchase obligations, and that written procedures are available for review by shareholders and examination by the Commission. The requirement that the fund file advertisements and sales literature as if it were an open-end investment company is intended to facilitate the review of these materials by the Commission or the NASD to prevent incomplete, inaccurate, or misleading disclosure about the special characteristics of a closed-end fund that makes periodic repurchase offers.

Complying with the collection of information requirements of the rule is mandatory only for those funds that rely on the rule in order to repurchase shares of the fund. The information provided to the Commission on Form N–23c–3 will not be kept confidential.

Written comments are invited on: (a) Whether the collections of information are necessary for the proper performance of the functions of the Commission, including whether the information has practical utility; (b) the accuracy of the Commission's estimate of the burdens of the collections of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burdens of the collections of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

Please direct your written comments to R. Corey Booth, Director/Chief Information Officer, Office of Information Technology, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549.

Dated: March 16, 2004.

J. Lynn Taylor,

Assistant Secretary.

[FR Doc. 04–6511 Filed 3–23–04; 8:45 am]

BILLING CODE 8010–01–U

[1] Form N–23c–3 requires the fund to state its registration number, its full name and address, the date of the accompanying shareholder notification, and the type of offer being made (periodic, discretionary, or both).

[2] Rule 24b–3 under the Investment Company Act [17 CFR 270.24b–3], however, would generally exempt the fund from that requirement when the materials are filed instead with the National Association of Securities Dealers (''NASD''), as nearly always occurs under NASD procedures, which apply to the underwriter of every fund.

SECURITIES AND EXCHANGE COMMISSION

Submission for OMB Review; Comment Request

Upon written request, copies available from: Securities and Exchange Commission, Office of Filings and Information Services, Washington, DC 20549.

Extension: Rule 11Aa3–2, SEC File No. 270–439, OMB Control No. 3235–0500.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget a request for extension of the previously approved collection of information discussed below.

Rule 11Aa3–2 provides that self-regulatory organizations (SROs) may, acting jointly, file a national market system plan or may propose an amendment to an effective national market system plan by submitting the text of the plan or amendment to the Secretary of the Commission, together with a statement of the purpose of such plan or amendment and, to the extent applicable, the documents and information required by paragraphs (b)(4) and (5) of Rule 11Aa3–2.

The collection of information is designed to permit the Commission to achieve its statutory directive to facilitate the development of a national market system. The information is used to determine if a national market system plan, or an amendment thereto, should be approved and implemented.

The respondents to the collection of information are self-regulatory organizations (as defined by the Act), including national securities exchanges and national securities associations.

Ten respondents file an average total of thirteen responses per year, which corresponds to an estimated annual response burden of 433 hours.

Compliance with Rule 11Aa3–2 is required to obtain or retain the benefits provided to those SROs who, acting jointly, shall sponsor a national market system plan. Information received in response to Rule 11Aa3–2 shall not be kept confidential; the information collected is public information.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

Written comments regarding the above information should be directed to the following persons: (a) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503 or send an email to: *David_Rostker@omb.eop.gov;* and (b) R. Corey Booth, Director/Chief Information Officer, Office of Information Technology, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Comments must be submitted to the Office of Management and Budget within 30 days of this notice.

Dated: March 16, 2004.

J. Lynn Taylor,

Assistant Secretary.

[FR Doc. 04–6512 Filed 3–23–04; 8:45 am]

BILLING CODE 8010–01–U

SECURITIES AND EXCHANGE COMMISSION

Submission for OMB Review; Comment Request

Upon written request, copies available from: Securities and Exchange Commission, Office of Filings and Information Services, Washington, DC 20549.

Extension: Rule 55, SEC File No. 270–376, OMB Control No. 3235–0430.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget a request for extension of the previously approved collection of information discussed below.

Under rule 55 of the Act, a filing must be under section 33(c)(1) of the Act for a ''safe harbor'' for acquisitions of foreign utility companies by registered holding companies. The filing is made only for foreign utility companies that meet specific criteria. The 11 annual responses together will incur approximately 39,710 burden hours to comply with these requirements.

The estimate of average burden hours is made solely for the purposes of the Paperwork Reduction Act. The estimate is not derived from a comprehensive or even a representative survey or study of the costs of Commission rules and forms.

The Commission needs this information to determine if the registered holding companies and their subsidiaries (and, in certain instances, exempt holding companies) are in compliance with the Public Utility Holding Company Act of 1935. There is no requirement to keep the information confidential because it is public information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

Please direct general comments regarding the above information should be directed to the following persons: (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503 or send an email to: *David_Rostker@omb.eop.gov;* and (ii) R. Corey Booth, Director/Chief Information Officer, Office of Information Technology, Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549. Comments must be submitted to OMB within 30 days of this notice.

Dated: March 16, 2004.

J. Lynn Taylor,

Assistant Secretary.

BILLING CODE 8010–01–U

SECURITIES AND EXCHANGE COMMISSION

Submission for OMB Review; Comment Request

Upon written request, copies available from: Securities and Exchange Commission, Office of Filings and Information Services, Washington, DC 20549.

Extension: Form U–1—SEC File No. 270–128, OMB Control No. 3235–0125.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget a request for extension of the previously approved collection of information discussed below.

Under rule 20(c) of the Act, Form U–1 must be used by any person filing or amending an application or declaration under sections 6(b), 7, 9(c)(3), 10, 12(b), (c), (d), or (f) of the Act. The form must also be used for filings under any rule under other sections of the Act or which a form is not prescribed. The 111 annual responses together incur about 24,753 burden hours to comply with these requirements.

The estimate of average burden hours is made solely for the purposes of the even a representative survey or study of the costs of Commission rules and forms.

The Commission needs this information to determine if the registered holding companies and their subsidiaries (and, in certain instances, exempt holding companies) are in compliance with the Public Utility Holding Company Act of 1935. There is no requirement to keep the information confidential because it is public information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

Please direct general comments regarding the above information should be directed to the following persons: (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503 or send an email to: *David_Rostker@omb.eop.gov*; and (ii) R. Corey Booth, Director/Chief Information Officer, Office of Information Technology, Securities and Exchange Commission, 450 5th Street, NW, Washington, DC 20549. Comments must be submitted to OMB within 30 days of this notice.

Dated: March 16, 2004.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–49444; File No. PCAOB–2003–11]

Public Company Accounting Oversight Board; Notice of Filing of Proposed Technical Amendments to Interim Standards Rules

March 18, 2004.

Pursuant to section 107(b) of the Sarbanes-Oxley Act of 2002 (the ''Act''),

notice is hereby given that on December 23, 2003, the Public Company Accounting Oversight Board (the ''Board'' or the ''PCAOB'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule amendments described in Items I and II below, which items have been prepared by the Board. The Commission is publishing this notice to solicit comments on the proposed amendments from interested persons.

I. Board's Statement of the Terms of Substance of the Proposed Rule Changes

On December 17, 2003, the Board adopted technical amendments to interim standards rules. The portions of the rules that the Board has amended are set out below. Proposed new language is in *italics*; proposed deletions are in [brackets].

Text of the Proposed Rule Changes

Rules of the Board

* * * * *

Section 3. Professional Standards

Part 1—General Requirements

* * * * *

Rule 3200T. Interim Auditing Standards

In connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with generally accepted auditing standards, as described in the AICPA Auditing Standards Board's Statement of Auditing Standards No. 95, as in existence on April 16, 2003 (Codification of Statements on Auditing Standards, AU § 150 (AICPA 2002))*, to the extent not superseded or amended by the Board.*

* * * * *

Rule 3300T. Interim Attestation Standards

In connection with an engagement (i) described in the AICPA's Auditing Standards Board's Statement on Standards for Attestation Engagements No. 10 (Codification of Statements on Auditing Standards, AT § 101.01 (AICPA 2002)) and (ii) related to the preparation or issuance of audit reports for issuers, a registered public accounting firm, and its associated persons, shall comply with the AICPA Auditing Standards Board's Statements on Standards for Attestation Engagements, and related interpretations and Statements of Position, as in existence on April 16, 2003*, to the extent not superseded or amended by the Board.*

* * * * *

Rule 3400T. Interim Quality Control Standards

A registered public accounting firm, and its associated persons, shall comply with quality control standards, as described in—

(a) the AICPA's Auditing Standards Board's Statements on Quality Control Standards, as in existence on April 16, 2003 (AICPA Professional Standards, QC §§ 20–40 (AICPA 2002))*, to the extent not superseded or amended by the Board;* and

(b) the AICPA SEC Practice Section's Requirements of Membership (d), (f)(first sentence), (l), (m), (n)(1) and (o), as in existence on April 16, 2003 (AICPA SEC Practice Section Manual § 1000.08(d), (f), (j), (m), (n)(1) and (o))*, to the extent not superseded or amended by the Board.*

* * * * *

Rule 3500T. Interim Ethics Standards

In connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with ethics standards, as described in the AICPA's Code of Professional Conduct Rule 102, and interpretations and rulings thereunder, as in existence on April 16, 2003 (AICPA Professional Standards, ET §§ 102 and 191 (AICPA 2002))*, to the extent not superseded or amended by the Board.*

* * * * *

Rule 3600T. Interim Independence Standards

In connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with independence standards—

(a) [(1)] as described in the AICPA's Code of Professional Conduct Rule 101, and interpretations and rulings thereunder, as in existence on April 16, 2003 (AICPA Professional Standards, ET §§ 101 and 191 (AICPA 2002))*, to the extent not superseded or amended by the Board*; and

(b) [(2)] Standards Nos. 1, 2, and 3, and Interpretations 99–1, 00–1, and 00–2, of the Independence Standards Board*, to the extent not superseded or amended by the Board.*

* * * * *

II. Board's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Changes

In its filing with the Commission, the Board included statements concerning the purpose of, and basis for, the proposed rule and discussed any comments it received on the proposed rule. The text of these statements may be examined at the places specified in Item IV below. The Board has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Board's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Changes

(a) Purpose

On April 16, 2003, the Board adopted on an initial, transitional basis five temporary rules that refer to existing professional standards of auditing, attestation, quality control, ethics, and independence (known collectively as interim standards). These rules were approved by the Securities and Exchange Commission on April 25, 2003. (*See* SEC Rel. No. 33–8222). This proposal reflects that when the Board adopts a new auditing and related professional practice standard that addresses a subject matter also addressed in the interim standards, the affected portion of the interim standards will be superseded or amended. Therefore, the Board has approved adding the phrase ''to the extent not superseded or amended by the Board'' to each of the interim standards (PCAOB Rules 3200T, 3300T, 3400T, 3500T, and 3600T). In addition, the Board adopted a technical amendment to Rule 3600T, revising the numbering of the paragraphs from ''(1)'' and ''(2)'' to ''(a)'' and ''(b)''.

(b) Statutory Basis

The statutory basis for the proposed rule is Title I of the Act.

B. Board's Statement on Burden on Competition

The Board does not believe that the proposed rule will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule reflects that when the Board adopts a new auditing and related professional practice standard that addresses a subject matter that also is addressed in the interim standards, then the affected portion of the interim standards will be superseded or amended.

C. Board's Statement on Comments on the Proposed Rule Changes Received From Members, Participants or Others

The Board released the proposed rule for public comment in PCAOB Release No. 2003–022 (November 12, 2003). A copy of PCAOB Release No. 2003–022 and the comment letters received in response to the PCAOB's request for comment are available on the PCAOB's Web site at *http://www.pcaobus.org.* The Board received six written comments. Most of the commenters

explicitly indicated support for the technical amendments to the interim standards rules, and none indicated opposition to the technical amendments. Thus, the Board made no modifications to this proposed rule.

In addition, many commenters requested that the Board identify how proposed, as well as final, standards affect the existing interim standards. While it may not always be practicable to identify exactly which portions of existing standards have been superseded or amended by new Board standards, the Board recognizes the need to provide auditors with as much guidance and clarity as possible. As future standards are adopted or amended, the Board intends to identify, to the greatest extent possible, those interim standards that are amended or superseded by standards issued by the Board.

III. Date of Effectiveness of the Proposed Rule Changes and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Board consents the Commission will:

(a) by order approve such proposed rule changes; or

(b) institute proceedings to determine whether the proposed rule changes should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule changes are consistent with the Act. Comments may be submitted electronically or by paper. Electronic comments may be submitted by: (1) electronic form on the SEC Web site (*http://www.sec.gov*) or (2) e-mail to *rule-comments@sec.gov.* Mail paper comments in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549–0609. All submissions should refer to File No. PCAOB–2003–11; this file number should be included on the subject line if e-mail is used. To help us process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov*). Comments are also available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, NW, Washington, DC 20549. We do not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All comments should be submitted on or before April 14, 2004.

By the Commission.

J. Lynn Taylor,

Assistant Secretary.

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–49438; File No. SR–AMEX–2003–78]

Self-Regulatory Organizations; American Stock Exchange LLC; Order Approving a Proposed Rule Change Relating To Resolving Uncompared Options Transactions

March 17, 2004.

On August 27, 2003, the American Stock Exchange LLC (''Amex'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'').[1] Notice of the proposal was published in the **Federal Register** on January 13, 2004.[2] No comment letters were received. For the reasons discussed below, the Commission is approving the proposed rule change.

I. Description

Amex will amend Rule 970 (Comparison of Option Transactions Excluded From Clearance) to reflect new procedures for resolving uncompared transactions in its Intra-Day Comparison System for Options (''IDCO''). The new IDCO format will now be consistent with Amex Rule 731, which governs the process for resolving uncompared equity transactions and the use of the Intra-Day Comparison System for Equities (''IDCE''). Specifically, members must now reconcile their uncompared options transactions through Amex's electronic on-line comparison system and will no longer use or manually sign paper Rejected Options Transaction Notices. Each member will be responsible for reviewing its uncompared transactions displayed on the system terminal and make any necessary modifications to the data according to Amex guidelines. All uncompared transactions that remain uncompared in the system must be resolved no later than such time as Amex shall from time to time determines. For clarity and consistency, Amex will preserve the former Rule 970 language in the new Commentary to Rule 970.

II. Discussion

Section 6(b)(5) of the Act[3] requires, among other things, that the rules of a national securities exchange be designed to remove the impediments to and perfect the mechanism of a national market system. The Commission finds that Amex's proposed rule change is consistent with this obligation because the new IDCO procedures, by utilizing current data processing and communications technology, will automate and should accelerate the reconciliation process for uncompared options transactions. In turn, this should reduce the risks and inefficiencies inherent in the use of paper documents in the post-trade processing of options transactions.

III. Conclusion

On the basis of the foregoing, the Commission finds that the proposal is consistent with the requirements of the Act and in particular with the requirements of section 6(b)(5) of the Act[4] and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change (File No. SR–AMEX–2003–78) be, and hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[5]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–49440; File No. SR–Amex–2004–07]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change and Amendment No. 1 Thereto by the American Stock Exchange LLC Relating to ITS Trade-Throughs and Locked Markets

March 17, 2004.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 21, 2004, the American Stock Exchange LLC (''Amex'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange filed the proposal pursuant to section 19(b)(3)(A) of the Act,[3] and Rule 19b–4(f)(1)[4] thereunder, which renders the proposal effective upon filing with the Commission. On March 10, 2004, the Amex submitted Amendment No. 1 to the proposed rule change.[5] The Commission is publishing this notice to solicit comments on the proposed rule change, as amended, from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Amex Rule 236 (''Trade Through Rule''), which incorporates certain provisions of the Intermarket Trading System (''ITS'') Plan. Specifically, the Exchange seeks to add Commentary .01 to expressly recognize a long-standing interpretation of Amex Rule 236 that certain executions will not be considered trade-throughs if an ITS commitment to trade is sent contemporaneously with the execution to another market center to fully satisfy the other market's quote. In addition, the Exchange seeks to add Commentary .02 to expressly recognize another long-standing interpretation of Amex Rule 236 that certain quote disseminations will not be considered to have caused a locked market if an ITS commitment to trade is sent contemporaneously with the quote dissemination to another market center to fully satisfy the other market's quote. A complaint in either of these circumstances is not valid, even if the commitment cancels or expires, and even if there is more stock behind the quote in the other market.

The text of the proposed rule change is below. Proposed new language is in *italics.*

* * * * *

Trade Through Rule

Rule 236. (a) Definitions

(1) An ''Exchange trade-through'', as that term is used in this Rule, occurs whenever a member on the Exchange initiates the purchase on the Exchange of a security traded through ITS (an ''ITS Security'') at a price which is higher than the price at which the security is being offered (or initiates the sale on the Exchange of such a security at a price which is lower than the price at which the security is being bid for) at the time of the purchase (or sale) in another ITS participating market center as reflected by the offer (bid) then being displayed on the Exchange from such other market center. The member described in the foregoing sentence is referred to in this Rule as the ''member who initiated an Exchange trade-through''.

(2) A ''third participating market center trade-through'', as that term is used in this Rule, occurs whenever a member on the Exchange initiates the purchase of an ITS Security by sending a commitment to trade through the System and such commitment results in an execution at a price which is higher than the price at which the security is being offered (or initiates the sale of such a security by sending a commitment to trade through the System and such commitment results in an execution at a price which is lower than the price at which the security is being bid for) at the time of the purchase (or sale) in another ITS participating market center as reflected by the offer (bid) then being displayed on the Exchange from such other market center. The member described in the foregoing sentence is referred to in this Rule as the ''member who initiated a third participating market center trade-through''.

(3) A ''trade-through'', as that term is used in this Rule, means either an Exchange trade-through or a third participating market center trade-through.

(4) A ''locked market'', as that term is used in this Rule, occurs whenever the Exchange disseminates a bid (offer) for an ITS Security at a price that equals or exceeds (is less than) the price of the offer (bid) for the security then being displayed from another ITS participating market center (the ''locked offer (bid)''). This Rule refers to the bid (offer) that causes the locked market as the ''locking bid (offer)''.

(5) through (6) No Change

* * * * *

Commentary

.01 The terms ''Exchange trade-through'' and ''third participating market center trade-through'' do not include the situation where a member who initiates the purchase (sale) of an ITS Security, at a price which is higher (lower) than the price at which the security is being offered (bid) in another ITS participating market, sends contemporaneously through ITS to such ITS participating market a commitment to trade at such offer (bid) price or better and for at least the number of shares displayed with that market center's better-priced offer (bid). A trade-through complaint sent in these circumstances is not valid, even if the commitment sent in satisfaction cancels or expires, and even if there is more stock behind the quote in the other market.

.02 The term ''locked market'' does not include the situation where a member responsible for the dissemination of a bid (offer) for an ITS Security, at a price that equals or exceeds (is less than) the price of the offer (bid) for the security then being displayed from another ITS participating market, sends contemporaneously through ITS to such ITS participating market a commitment to trade at such offer (bid) price or better and for at least the number of shares displayed with that market center's offer (bid). A locked market complaint sent in these circumstances is not valid, even if the commitment sent in satisfaction cancels or expires, and even if there is more stock behind the quote in the other market.

* * * * *

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(1).

[5] *See* Letter from William C. Love, Jr., Associate General Counsel, Amex, to Nancy J. Sanow, Assistant Director, Division of Market Regulation, Commission, dated March 9, 2004 (''Amendment No. 1''). Amendment No. 1 replaced the original proposed rule change in its entirety.

forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to codify two long-standing interpretations of the Trade Through Rule. Commentary .01 codifies an interpretation relating to trade-throughs and Commentary .02 codifies an interpretation relating to locked markets.

The basic concept of the Trade Through Rule is that superior priced quotations in a security displayed from other Participant markets should be protected/satisfied if, in another Participant market, an execution in the security occurs at an inferior price (a trade-through). One of the remedies the Trade Through Rule provides is that, upon a valid complaint of a trade-through, a commitment to trade, at the price and for the number of shares in the disseminated quotation, must be sent to the other Participant market to fully satisfy such quotation. The interpretation in Commentary .01 being filed herewith has long recognized that superior quotations are fully protected/satisfied if an ITS commitment is sent to trade with a bid/offer that would otherwise appear to have been traded through. That is, a trade will not be considered a trade-through if an ITS commitment is sent contemporaneously from the Participant executing the trade for the purpose of being executed against the better-priced displayed bid or offer. A complaint is not valid even if a commitment cancels or expires or there is more stock behind the away quote. Furthermore, the interpretation recognizes the impracticality of having to wait for the other market to revise its quotation as a result of trading with a satisfying commitment before trading activity may occur in other markets.

The basic concept of the locked markets section of the Trade Through Rule is that an offer (bid) in a security displayed from other Participant markets should be protected/satisfied if, in another Participant market, a bid (offer) is disseminated at a price that equals or exceeds (is less than) the first quote, thereby causing a locked market. One of the remedies that the Trade Through Rule provides is that, upon a valid complaint of a quotation that is causing a locked market and is not immediately adjusted by the member responsible for the locking quotation, a commitment to trade, at the price and for the number of shares in the disseminated quotation, must be sent to the other Participant market to fully satisfy such quotation. The interpretation in Commentary .02 being filed herewith has long recognized that quotations are fully protected/satisfied if an ITS commitment is sent to trade with a bid/offer that would satisfy the quotation that would otherwise be deemed to be locked. That is, a trade will not be considered to have caused a locked market if an ITS commitment is sent contemporaneously from the Participant whose quotation would otherwise be deemed to have caused a locked market for the purpose of being executed against the quotation that would otherwise be deemed to be locked. A complaint is not valid even if a commitment cancels or expires or there is more stock behind the away quote. Furthermore, the interpretation recognizes the impracticality of having to wait for the other market to revise its quotation as a result of trading with a satisfying commitment before trading activity may occur in other markets.

2. Statutory Basis

The Amex believes the proposal is consistent with the requirements of the Act and the rules and regulations thereunder that are applicable to a national securities exchange, and, in particular, with the requirements of section 6(b) of the Act.[6] Specifically, the Amex believes the proposal is consistent with section 6(b)(5) of the Act,[7] in that it is designed to promote just and equitable principles of trade, to remove impediments to, and to perfect the mechanism of, a free and open market and a national market system, and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change constitutes a stated policy, practice or interpretation with respect to the meaning, administration, or enforcement of an existing rule, it has become effective pursuant to section 19(b)(3)(A) of the Act[8] and Rule 19b–4(f)(1) thereunder.[9] At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.[10]

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change, as amended, is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Comments may also be submitted electronically at the following e-mail address: *rule-comments@sec.gov.* All comment letters should refer to File No. SR–Amex–2004–07. This file number should be included on the subject line if e-mail is used. To help the Commission process and review comments more efficiently, comments should be sent in hardcopy or by e-mail but not by both methods. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the Amex. All submissions should refer to the File No. SR–Amex–2004–07 and should be submitted by April 14, 2004.

[6] 15 U.S.C. 78(f)(b).

[7] 15 U.S.C. 78f(b)(5).

[8] 15 U.S.C. 78s(b)(3)(A).

[9] 17 CFR 240.19b–4(f)(1).

[10] For purposes of calculating the 60-day abrogation period, the Commission considers the period to have commenced on March 10, 2004, the date Amendment No. 1 was filed by the Amex.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[11]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–49434; File No. SR–BSE–2004–10]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the Boston Stock Exchange, Inc. Relating to the Amendment of its Constitution to Permit the Separation of the Chairman and Chief Executive Officer Positions

March 17, 2004.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on March 2, 2004 the Boston Stock Exchange, Inc. (''BSE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by BSE. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange seeks to amend its Constitution to permit the separation of the Chairman and Chief Executive Officer roles. The proposed rule change is attached as Exhibit A hereto.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, BSE included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. BSE has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

[11] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The BSE proposes to amend its Constitution to permit the separation of the Chairman and Chief Executive Officer functions. The separation would not be mandatory, but would be an option to be utilized by the Exchange's Board of Governors (the ''Board'') as deemed necessary and/or prudent to enhance the governance of the Exchange. The separation would also allow for the disconnection and independence of the Exchange's regulatory function from the exchange's marketplace function.

The BSE is not proposing this constitutional change due to any internal issues arising from its current governance structure. Rather, the Exchange is seeking to be proactive in concert with changes occurring in the control mechanisms of other market centers, particularly the New York Stock Exchange (''NYSE''). For that reason, the BSE is seeking effectiveness of the changes proposed by its next Board meeting in April 2004. However, the BSE, as a regional exchange, does not propose all of the changes recently enacted by the NYSE, primarily due to the fact that the BSE's size alone would make such a governance structure unwieldy and unworkable. The changes the Exchange proposes, though, do seek to achieve the same overall result of the separation of the Exchange's regulatory and marketplace functions, as warranted.

Moreover, in order to maintain flexibility in its primary governing document, the Exchange is purposefully not constitutionally mandating the separation of the Chairman and Chief Executive Officer roles, but is providing for their separation in the event that the Board determines such a separation to be practical, in light of current internal or external events. Presently, the Chairman has determined, and the Board has concurred, that it is desirous of more flexibility within the Exchange's Constitution so that it will be able to separate the Chairman and Chief Executive Officer roles.

As envisioned, the separation of the Chairman and Chief Executive Officer of the Exchange would provide for the independence of the BSE's regulatory function from any potentially inappropriate linkage with the marketplace function. Yet, the regulatory function would retain sufficient proximity to the marketplace to assure the market sensitivity that is fundamental to effective regulation. If the Chairman and Chief Executive Officer of the Exchange are not the same person, then the present intention is that the Chairman, as an executive officer of the Exchange, would (1) preside over all meetings of the Board; (2) be responsible to the Board for the management of the BSE's regulatory affairs; (3) be responsible for the oversight of all exchange facilities,[3] subsidiaries, or other legal entities to which the Exchange is a party; and, (4) act as Board liaison to the Exchange's Chief Executive Officer and management. The Chief Executive Officer, according to present intention, would (1) be responsible for the management and administration of the affairs of the Exchange's marketplace functions; (2) not participate in executive sessions of the Board; and, (3) be subject to the authority of the Board.

The Exchange believes that the proposed governance architecture provides the best model for the BSE. It will permit the BSE, as a relatively small exchange, to resolve and manage conflicts of interest inherent in self-regulation while maintaining the marketplace proximity requisite for optimizing regulatory intervention in market mechanisms. Moreover, it will allow the Exchange to remain flexible in regard to its governance structure if and when future events may require a response.

2. Statutory Basis

The statutory basis for the proposed rule change is the requirement under section 6(b)(1) of the Act[4] that an exchange be organized and have the capacity to be able to carry out the purposes of the Act, the requirement under section 6(b)(3) of the Act[5] that the rules of an exchange assure a fair representation of its members in the selection of its directors and administration of its affairs, and the requirement under section 6(b)(5) of the Act[6] to have rules that are designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in

[3] Under the Act, ''the term 'facility' when used with respect to an exchange includes its premises, tangible or intangible property whether on the premises or not, any right to the use of such premises or property or any service thereof for the purpose of effecting or reporting a transaction to an exchange (including, among other things, any system of communication to or from the exchange, by ticker or otherwise, maintained by or with the consent of the exchange), and any right of the exchange to the use of any property or service.'' *See* 15 U.S.C. 78c(a)(2).

[4] 15 U.S.C. 78f(b)(1).

[5] 15 U.S.C. 78f(b)(3).

[6] 15 U.S.C. 78f(b)(5).

regulating securities transactions, to remove impediments to perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Comments may also be submitted electronically at the following e-mail address: *rule-comments@sec.gov*. All comment letters should refer to File No. SR–BSE–2004–10. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, comments should be sent in hardcopy or by e-mail but not by both methods. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the BSE.

All submissions should refer to file number SR–BSE–2004–10 and should be submitted by April 14, 2004.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[7]

Margaret H. McFarland,

Deputy Secretary.

EXHIBIT A

The text of the proposed rule change appears below. Proposed new language is in *italics.* Proposed deletions are in [brackets].

Boston Stock Exchange, Inc.

Constitution

Article I

no change

Article II

Secs. 1–2—no change
Sec. 3.

General Powers

The Board of Governors shall be vested with all powers necessary for the government of the Exchange, the regulation of business, *the administration of the regulatory functions of the Exchange* and the business conduct of its members, allied members, member firms and member corporations and the promotion of the welfare, objects and purposes of the Exchange. In the exercise of its powers it may adopt such rules, issue such orders and directions, and make such decisions, as it may deem appropriate.
Sec. 4–no change.
Sec. 5.

Procedural Powers

The Board of Governors shall determine the manner and form by which its proceedings shall be conducted. It shall designate committees and vote on whether to approve the appointments by the Chairman of members thereof, except with respect to the Nominating Committee, and it shall have original and supervisory jurisdiction over all matters referred to any such committees except the Nominating Committee. It shall appoint a Chairman for such term as the Board may fix and shall delegate, in addition to the powers expressly granted to him by this Constitution, such of its powers as it shall from time to time determine in order that the Chairman may [act as the Chief Executive Officer of the Exchange] *carry out his duties as specified by the Board to, among other things, effectively oversee the regulatory affairs of the Exchange.* It shall make rules with respect to the matters within its authority and may prescribe penalties for the violation of such rules, of any orders, directions or decisions of the Board, or of any provision of this Constitution where no penalty is otherwise specified.
Secs. 6–12 ''no change

Article III

Sec. 1.

Chairman—[Vice Chairman] Chief Executive Officer

The Chairman of the Board of Governors [shall] *may* be the Chief Executive Officer of the Exchange, responsible to the Board for the management of its business affairs. The Chairman shall be appointed by the Board of Governors to serve at its pleasure and for such compensation as it may from time to time fix. *The Board may, in its discretion, appoint a separate Chief Executive Officer of the Exchange. If the Board appoints a separate Chief Executive Officer, the Chairman shall also be an executive officer of the Exchange. The Chairman and Chief Executive Officer, whether the same or separate persons, shall have such duties and authority as shall be delegated to them by the Board from time to time, as the Board determines. If the Chairman is not the Chief Executive Officer, he shall act as liaison officer between the Board and the Chief Executive Officer.* [The Chairman shall not engage in any other business during his incumbency except with the approval of the Board. The Chairman shall, with the Vice Chairman, subject to the approval of the Board, appoint the members of and fill vacancies in all committees of the Exchange, except the Nominating Committee. The Chairman shall be a member, ex officio, of all committees of the Exchange except the Nominating Committee and the Audit Committee. On any appeal to the Board of Governors or any committee from a decision of the Chairman, the Chairman shall not participate in the appeal proceedings except as required by the Board or any such committee.]

The Chairman shall be the presiding officer of the Board of Governors, and shall preside at meetings of the Exchange. The Chairman [shall have such other duties or authority as may be delegated to him by the Board of Governors and] shall have the power to appoint, dismiss, and fix the compensation of all officers (except the *Chief Executive Officer and* Vice Chairman) and employees of the Exchange.

The Chairman shall not engage in any other business during his incumbency except with the approval of the Board. The Chairman shall, with the Vice Chairman, subject to the approval of the Board, appoint the members of and fill vacancies in all committees of the Exchange, except the Nominating Committee. The Chairman shall be a member, ex officio, of all committees of the Exchange except the Nominating Committee and the Audit Committee. On any appeal to the Board of Governors or any committee from a decision of the Chairman, the Chairman shall not participate in the appeal proceedings except as required by the Board or any such committee.

The Chairman of the Board after taking office shall not be a member of the Exchange

[7] 17 CFR 200.30–3(a)(12).

or a partner, officer, voting stockholder, or person associated with a member organization of the Exchange, or a broker or dealer, and if the Chairman holds such a position prior to the appointment, the Chairman shall terminate such position under conditions approved by the Board of Governors.

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–49437; File No. SR–CHX–2003–24]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change and Amendment No. 1 Thereto by the Chicago Stock Exchange, Incorporated Relating to the Definition of Primary Market

March 17, 2004.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August 14, 2003, the Chicago Stock Exchange, Incorporated (''CHX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. On January 29, 2004, the Exchange amended the proposed rule change.[3] The Commission is publishing this notice to solicit comments on the proposed rule change, as amended, from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend CHX Article XX, Rule 37(a)(3)(a), which governs execution of resting limit orders based on certain conditions in the primary market. Specifically, the proposed rule change would permit the Exchange's Rules Subcommittee to designate the primary market in each listed issue for purposes of determining limit order execution guarantees to be offered on the CHX.

The text of the proposed rule change, as amended, is below. Proposed new language is *italicized;* proposed deletions are in [brackets].

* * * * *

Rule 37

(a) Guaranteed Executions

* * * * *

(1)–(2) No change to text.

(3) Execution of Agency Limit Orders. Subject to Interpretation and Policy .10 (''Exempted Trade-Throughs''), all agency limit orders in Dual Trading System issues will be filled under the following circumstances:

(a) Exhaustion of primary market bid or offer. When the bid or offering at the limit price has been exhausted in the primary market (as *designated by the Rules Subcommittee pursuant to Interpretation and Policy .07* [defined in the CTA Plan]), agency limit orders will be executed in whole or in part, based on the rules of priority and precedence, on a share for share basis with trades executed at the limit price in the primary market.

* * * * *

Interpretations and Policies:

* * * * *

.07 [[Reserved for future use]] Unless otherwise authorized by the Exchange's Board of Governors, in designating the ''primary market'' for purposes of Rule 37(a)(3) of this Article XX, the Rules Subcommittee shall designate the initial listing market for a security as the primary market, unless that security is traded by either the New York Stock Exchange (''NYSE'') or the American Stock Exchange (''Amex''), in which case the primary market shall be the NYSE (for the securities it trades) or the Amex (for the securities it trades). If a security is traded on both the NYSE and the Amex, whichever exchange is the initial listing market shall be designated as the primary market. If the initial listing market is a market other than the NYSE or the AMEX, but is traded by both the NYSE and the AMEX, the primary market shall be the market with the largest trading volume in the subject security, calculated on a twelve-month rolling basis.

* * * * *

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The proposed rule change would amend CHX Article XX, Rule 37(a)(3)(a), which governs execution of resting limit orders based on certain conditions in the primary market. Specifically, the proposed rule change would permit the Exchange's Rules Subcommittee to designate the primary market in each listed issue for purposes of determining the limit order execution guarantees to be offered on the CHX.

For many years, the CHX has guaranteed limit order protection, *i.e.*, execution of limit orders at the limit price based on certain conditions in the primary market.[4] The current version of CHX Article XX, Rule 37(a)(3)(a) notes that the ''primary market'' is determined using the CTA Plan definition of that term. Under the CTA Plan, the primary market is the exchange where the greatest number of reportable transactions in a particular security have taken place during the preceding six-month period.[5] As described below, the Exchange no longer believes it is appropriate to base its limit order execution guarantees on that definition of a primary market.

The CHX believes that, as an initial matter, in today's increasingly fragmented markets, the existing definition could result in a constant re-designation of the primary market, as trading moves from venue to venue. Moreover, the definition may cause the Exchange to provide CHX limit order executions that are not desired by the Exchange's order-sending firms and the investors they serve. In many cases, customers may want their limit orders

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Letter from Kathleen Boege, Associate General Counsel, CHX, to Nancy Sanow, Assistant Director, Division of Market Regulation, Commission, dated January 28, 2004 (''Amendment No. 1''). Amendment No. 1 replaces and supersedes the CHX's original 19b–4 filing in its entirety.

[4] Under the current version of CHX Article XX, Rule 37(a)(3), all agency limit orders must be filled at the limit price when one of three conditions occurs: (i) when the bid or offer in the primary market has been exhausted, CHX agency limit orders are executed at the limit price up to the volume of subsequent prints in the primary market; (ii) when there is a price penetration in the primary market, agency limit orders that have resided in the CHX specialist's book for up to 15 seconds must be executed at the limit price; and (iii) when the issue is trading at the limit price on the primary market, CHX agency limit orders must be executed at the limit price unless it can be demonstrated that such orders would not have been executed at the limit price (or the broker and specialist agree to a specific volume-related or other criteria for requiring a fill).

[5] *See* Second Restatement of Plan Submitted to the Securities and Exchange Commission Pursuant to Rule 11A3–1 Under the Securities Exchange Act of 1934, as amended and restated (the ''CTA Plan''), at Section XI(a)(ii).

protected against the listing market for a security, not against another market that happens to have had the greatest number of transactions during a given time period. The CHX believes that at a minimum, continual re-designation of the primary market under the CTA Plan definition could prove extremely confusing to CHX order-sending firms and their customers. For these reasons, the Exchange believes that another definition of primary market is amply warranted.

Under the proposed change, the Exchange's Rules Subcommittee would be given the authority to define the primary market for listed securities for purposes of determining the limit order execution guarantees offered on the Exchange. As an initial matter, the Rules Subcommittee intends to designate the initial listing market for a security as the primary market, unless that security is traded by either the New York Stock Exchange, Inc. (''NYSE'') or the American Stock Exchange LLC (''Amex''); if the security is traded by one of those markets, then the primary market would be the NYSE (for the securities it trades) and the Amex (for the securities it trades). If a security is traded on both the NYSE and the Amex, whichever of the two is the initial listing market would be designated as the primary market.[6] If the initial listing market is a market other than the NYSE or the Amex, but is traded by both the NYSE and the Amex, the primary market shall be the market with the largest trading volume in the subject security, calculated on a twelve-month rolling basis. The Exchange believes that the designation guidelines outlined above will ensure that the Rules Subcommittee consistently designates a market that is a significant source of liquidity, to the benefit of customers whose orders are routed to the CHX.

The Exchange already uses a similar method of defining the scope of the limit order protections provided for Over-the-Counter (''OTC'') securities. Under a proposal approved last year, each CHX specialist in an OTC security has the authority, with the approval of the Exchange, to identify, on an issue-by-issue basis, the designated market against which he or she will protect limit orders.[7] Through this filing, the Exchange seeks to implement a similar program for determining the scope of the limit order protections given to listed securities.

2. Statutory Basis

The CHX believes the proposal, as amended, is consistent with the requirements of the Act and the rules and regulations thereunder that are applicable to a national securities exchange, and, in particular, with the requirements of section 6(b) of the Act.[8] The CHX believes the proposal, as amended, is consistent with section 6(b)(5) of the Act[9] in that it is designed to promote just and equitable principles of trade, to remove impediments, and to perfect the mechanism of, a free and open market and a national market system, and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any inappropriate burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the CHX consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change, as amended, is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Comments may also be submitted electronically at the following e-mail address: *rule-comments@sec.gov.* All comment letters should refer to File No. SR–CHX–2003–24. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, comments should be sent in hardcopy or by e-mail but not by both methods. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the CHX. All submissions should refer to File No. SR–CHX–2003–24, and should be submitted by April 14, 2004.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[10]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–P

[6] If the Rules Subcommittee identifies a different designation for all listed securities traded on the Exchange, the Exchange will notify its order-sending firms of those Exchange-wide changes and file those changes with the Commission as an interpretation of an existing rule pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(1) thereunder. If, however, the Rules Subcommittee responds to the fragmentation in the market by identifying different designated markets for different securities, the Exchange will file, pursuant to Rule 19b–4(f)(1) under the Act, a new interpretation confirming that the Rules Subcommittee has identified different designated markets in different securities for purposes of this voluntary functionality, but will not list all of those different designations.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–49442; File No. SR–ISE–2004–05]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the International Securities Exchange, Inc., Relating to Customized Market Data Reports (''ISEMine'')

March 17, 2004.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on March 4, 2004, the International Securities Exchange, Inc. (''ISE'' or ''Exchange'')

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The ISE proposes to amend its Schedule of Fees to establish fees for preparing customized market data reports for both members and non-members. The text of the proposed rule change is available at the ISE and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for its proposal and discussed any comments it received regarding the proposal. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to establish fees in connection with the preparation of customized market data reports for both members and non-members. The Exchange maintains databases that contain information relating to option contracts traded on the Exchange. This information is of interest to Exchange members and non-members (including academics) who seek statistical information on the options markets. Accordingly, the Exchange is proposing to provide members and non-members with the ability to ''mine'' this data through the use of customized market data reports. The Exchange refers to this service as ''ISEmine.''

The ISE is proposing to provide both an initial quarterly report and updates to those reports. The information included in the report will be ''data points'' selected by the subscriber. Data points consist of information based on ''sentiment data'' the ISE uses to calculate its ISE Sentiment Index and consists of aggregate cleared volume data, such as opening to buy, opening to sell, close to buy, close to sell. The ISE tracks this data through the information its members provide when opening and closing positions. ISEmine is a voluntary, optional service provided by the Exchange, meaning members and non-members are neither required nor otherwise obligated to purchase this service. Neither the data mined nor the reports produced will disclose the identity of any parties to any option contracts traded on the Exchange.

An ISEmine initial report will be a single file consisting of all requested data for a calendar quarter. After receiving such a report, a subscriber can request updates to the data contained in that report as frequently as it desires, such as quarterly, monthly, weekly or even daily. The ISE will not provide data more often than a daily basis. Accordingly, all ISEmine reports will consist of ''historical'' data that will not reflect current transactions in the market; rather, all ISEmine reports will be historical records of transactions from earlier that day or from previous days. This data service thus will not be competitive with real-time market data services a subscriber can receive through the Options Price Reporting Authority.

The Exchange is proposing fees for the use of ISEmine. Since the reports are customizable, the amount of the fee in each particular instance will be based on the number of data points selected by user, with the fees increasing depending on the number of data points included in the report. The fee for an initial report that includes data for a calendar quarter varies from $5,000 to $11,000, depending on the number of data points. For updates of such reports, the price varies from $7,500 to $12,000 per calendar quarter, again depending on the number of data points. The higher charge for updates reflects the fact that the initial report is provided on a one-time basis, while subscribers can receive multiple updates during the quarter, as often as daily.

The ISE has structured these fees to recover, in part, the costs of collecting, storing, extracting and processing this market data. The preparation of these reports will require significant programming efforts at the ISE to prepare these customized reports. Moreover, the updated reports will require a continuing processing effort by the ISE. The Exchange also is proposing to discount all stated fees by 25 percent for Exchange members. This discount recognizes that Exchange members pay transaction fees when trading on the exchange and it is the data from these transactions that forms the database from which the ISE prepares the ISEmine reports. Thus, the ISE believes that charging members the full fee would partially charge them twice for the same data. The ISE believes that the 25 percent discount properly avoids the double-charging issue. However, both members and non-members would pay the ISE's costs of shipping and handling the reports on a non-discounted basis.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the Act in general, and Section 6(b)(5) [3] in particular. The proposed rule change establishes fees for a voluntary, optional service provided by the Exchange. Neither members nor non-members are required to purchase this service. The service is intended to provide interested parties with statistical information about options transactions on the Exchange, thus providing an opportunity for greater transparency of options market information.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the ISE consents, the Commission will:

(A) by order approve the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and

[3] 15 U.S.C. 78(f)(b)(5).

arguments concerning the foregoing, including whether the proposal is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington DC 20549–0609. Comments may also be submitted electronically at the following e-mail address: *rule-comments@sec.gov*. All comment letters should refer to File No. SR–ISE–2004–05. This file number should be included on the subject line if e-mail is used. To help the Commission process and review comments more efficiently, comments should be sent in hardcopy or by e-mail but not by both methods. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room. Copies of such filings will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR–ISE–2004–05 and should be submitted by April 14, 2004.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[4]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–49439; File No. SR–NASD–2004–023]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change and Amendment No. 1 Thereto by National Association of Securities Dealers, Inc. To Amend Order Audit Trail System Rules Relating to Execution Reports

March 17, 2004.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on February 5, 2004, the National Association of Securities Dealers, Inc. (''NASD'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by NASD. On March 11, 2004, NASD filed Amendment No. 1 to the proposed rule change.[3] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

NASD is proposing to amend NASD Rule 6954(d) to require that members record and report the execution price and firm capacity in Order Audit Trail System (''OATS'') Execution Reports. The text of the proposed rule appears below. Proposed new text is in italics. Deleted text is in brackets.

* * * * *

NASD Systems and Programs

6950. Order Audit Trail System

6951. through 6953. No Changes.

6954. Recording of Order Information

(a) through (c) No Changes.

(d) Order Modifications, Cancellations, and Executions.

Order information required to be recorded under this Rule when an order is modified, canceled, or executed includes the following.

(1) and (2) No Change.

(3) When a Reporting Member executes an order, in whole or in part, the Reporting Member shall record:

(A) through (G) No Change.

(H) the date and time of execution, [and]

(I) *the execution price,*

(J) the capacity in which the member executed the transaction (e.g., agency, principal or riskless principal), and

(K) the national securities exchange or facility operated by a registered securities association where the trade was reported.

* * * * *

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. NASD has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

On March 6, 1998, the Commission approved NASD Rules 6950 through 6957 (''OATS Rules'').[4] NASD represents that OATS provides a substantially enhanced body of information regarding orders and transactions that NASD believes improves its ability to conduct surveillance and investigations of member firms for potential violations of NASD rules and the federal securities laws.

When the OATS Rules initially were adopted, it was determined that NASD would obtain execution price and firm capacity (*i.e.*, the capacity in which the member acted for purposes of the transaction, for example, on an agency, principal or riskless principal basis) information from trading information rather than from information submitted to OATS. At that time, the vast majority of trading in Nasdaq securities was reported through Nasdaq's Automated Confirmation Transaction Service (''ACT'').[5] Members are required to input order identifier information into ACT trade reports, and NASD systematically matches the ACT trade reports with corresponding OATS reports to obtain certain trade-related information including execution price and firm capacity. Similarly, members using the NASD Alternative Display Facility (''ADF'') Trade Reporting and Comparison Service (''TRACS'') are required to record OATS order identifier information in TRACS trade reports, which also is then matched with OATS information to obtain execution price and firm capacity.

NASD believes that recently, however, the ''ACT/TRACS matching'' process has become more and more limited, in part because a percentage of trades in Nasdaq securities are no longer reported to ACT or TRACS. Furthermore, NASD believes that if there are any errors in the linking

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* letter from Barbara Z. Sweeney, Senior Vice President and Corporate Secretary, NASD to Katherine A. England, Assistant Director, Division of Market Regulation, Commission, dated March 10, 2004 (''Amendment No. 1''). Amendment No. 1 replaces the proposed rule change in its entirety.

[4] *See* Securities Exchange Act Release No. 39729 (March 6, 1998), 63 FR 12559 (March 13, 1998) (SR–NASD–97–56).

[5] ACT is an automated system owned and operated by Nasdaq that captures transaction information on a real-time basis.

information provided to ACT, TRACS or OATS, the ACT/TRACS matching process is hindered.

In June 2002, NASD issued Notice to Members 02–31 soliciting comments from members and other interested parties on four proposed changes to the OATS rules, one of which was intended to address the potential gaps in the audit trail associated with the ACT/TRACS matching process. Commenters that provided substantive comments about the four proposals generally opposed the proposals. NASD represents that the commenters' primary concern was that service bureaus and member firms already have spent a significant amount of time and resources in complying with OATS. NASD represents that commenters indicated that current OATS reporting has reached a stage where it appears to be working well and commenters, therefore, opposed making any significant changes, particularly at a time when there currently are a number of other regulatory initiatives placing demands on members' technological resources.

In response to concerns raised by commenters, NASD now is proposing only a subset of one of the four proposals, which NASD views as the most critical to addressing potential gaps in the audit trail information currently collected by NASD. Specifically, NASD is proposing to amend the OATS Rules to require members to record and report two additional fields, execution price and firm capacity, as part of the OATS Execution Report. Because the proposed rule change adds two additional data elements that typically are accessible with the other information required in an OATS Execution Report, NASD does not believe that the proposed rule change will be overly burdensome to members. Furthermore, by having this data reported directly in the OATS Execution Report, NASD believes that it will not have to rely on accessing or matching the trade report to obtain these two data elements.

2. Statutory Basis

NASD believes that the proposed rule change is consistent with the provisions of section 15A(b)(6) of the Act,[6] which requires, among other things, that NASD's rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest. NASD also believes that the proposed rule change will enhance OATS information and will improve NASD's ability to conduct surveillance and investigations relating to compliance with NASD and other applicable rules.

B. Self-Regulatory Organization's Statement on Burden on Competition

NASD does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

NASD published for comment in Notice to Members 02–31 (June 2002) (''Notice'') four proposals to the OATS Rules. The comment period expired on July 10, 2002. Ten comment letters were received in response to the Notice.[7] Copies of the Notice and the comment letters have been provided to the Commission. Of the 10 letters, three were in favor of the proposed rule change and seven were opposed to the proposed rule change. The majority of the commenters expressed concern that the proposed rule change was unnecessarily burdensome.

The Notice requested comment on four proposals, which would require that members: (1) Record and report execution price, capacity, ACT control number and a special circumstances indicator as part of their OATS Execution Reports, but would rescind the requirement that members record and report an identical order identifier (referred to as the branch/sequence number) on the OATS Execution Report and the related ACT trade report (''Execution Report Proposal''); (2) report the execution time rather than prior reference price (''.PRP'') time or allocation time in OATS Execution Reports; (3) record and report for OATS purposes the route of the proprietary order if they comply with the SEC Limit Order Display Rule by routing a proprietary order in place of a customer order to another market, electronic communications networks (''ECN'') or market maker; and (4) provide the trading desk receipt time via a Desk Report in addition to the electronic system time reported as their order receipt time on New Order Reports in those instances when those times differ by more than one second.

The proposed rule change is two components of the Execution Report Proposal described above. NASD believes that it is important to note that the proposed rule change does not require the recording and reporting of the ACT control number as required under the Execution Report Proposal, which several commenters indicated would be the most burdensome component of that proposal. A general description of the comments is described in the Purpose section.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which NASD consents, the Commission will:

(A) by order approve such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Comments may also be submitted electronically at the following e-mail address: *rule-comments@sec.gov*. All comment letters should refer to File No. SR-NASD–2004–023. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, comments should be sent in hardcopy or by e-mail but not by both methods. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the

[6] 15 U.S.C. 78*o*–3(b)(6).

[7] Comment letters were received from Allen J. Thomas, Vice President, Manager of Trade Processing, A.G. Edwards & Sons, Inc.; Andrea Psoras; Thomas Murphy, Vice President, Bishop, Rosen & Co., Inc.; Kevin M. Foley, Bloomberg Tradebook LLC; W. BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–49443; File No. SR–NYSE–2004–15]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the New York Stock Exchange, Inc. Relating to a Pilot Program To Review Minimum Numerical Continued Listing Standards

March 18, 2004.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on March 16, 2004, the New York Stock Exchange, Inc. (''NYSE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in items I, II, and III below, which Items have been prepared by the Exchange. The Exchange filed the proposal pursuant to section 19(b)(3)(A) of the Act[3] and Rule 19b–4(f)(6) thereunder,[4] which renders the proposal effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The NYSE is proposing to suspend its current six-month pilot program relating to section 802.01B of the Exchange's *Listed Company Manual* (the ''Manual'') regarding the minimum numerical continued listing standards. Proposed new language is in *italics,* and proposed deletions are in [brackets].

* * * * *

Listed Company Manual

* * * * *

802.00 Continued Listing

* * * * *

802.01 Continued Listing Criteria

The Exchange would normally give consideration to delisting a security either a domestic or non-U.S. issuer when:

* * * * *

802.01B Numerical Criteria for Capital or Common Stock

A company that falls below the criteria applicable to it is subject to the procedures outlined in Paras. 802.02 and 802.03.

[(I) A company that qualified to list under the Earnings Test set out in Para. 102.01C(I) or in Para. 103.01B(I) will be considered to be below compliance standards if:

(i) average global market capitalization over a consecutive 30 trading-day period is less than $75,000,000 and, at the same time, total stockholders' equity is less than $75,000,000 (C); or

(ii) average global market capitalization over a consecutive 30 trading-day period is less than $25,000,000.

(II) A company that qualified to list under the Valuation/Revenue with Cash Flow Test set out in Para. 102.01C(II)(a) or Para. 103.01B(II)(a) will be considered to be below compliance standards if:

(i) Average global market capitalization over a consecutive 30 trading-day period is less than $250,000,000 and, at the same time, total revenues are less than $20,000,000 over the last 12 months (unless the company qualifies as an original listing under one of the other original listing standards) (D) ; or

(ii) Average global market capitalization over a consecutive 30 trading-day period is less than $75,000,000.

(III) A company that qualified to list under the Pure Valuation/Revenue Test set out in Para. 102.01C(II)(b) or Para. 103.01B(II)(b) will be considered to be below compliance standards if:

(i) average global market capitalization over a consecutive 30 trading-day period is less than $375,000,000 and, at the same time, total revenues are less than $15,000,000 over the last 12 months (unless the company qualifies as an original listing under one of the other original listing standards) (D); or

(ii) average global market capitalization over a consecutive 30 trading-day period is less than $100,000,000.

(IV) A company that qualified to list under the Affiliated Company Test set out in Para. 102.01C(III) or Para. 103.01B(III) is not subject to any continued numerical standards unless:

(i) the listed company's parent/affiliated company ceases to control the listed company, or

(ii) the listed company's parent/affiliated company itself falls below the continued listing standards described to the parent/affiliated company.

In such case, the listed company that qualified to list under the Affiliated Company Test will be considered to be below compliance standards at any time that:

(i) average global market capitalization over a consecutive 30 trading-day period is less than $75,000,000 and, at the same time, total stockholders' equity is less than $75,000,000 (C); or

(ii) average global market capitalization over a consecutive 30 trading-day period is less than $25,000,000.

* * * * *

When applying the market capitalization test in any of the above four standards, the Exchange will generally look to the total common stock outstanding (excluding treasury shares) as well as any common stock that would be issued upon conversion of another outstanding equity security. The Exchange deems these securities to be reflected in market value to such an extent that the security is a ''substantial equivalent'' of common stock. In this regard, the Exchange will only consider securities (1) publicly traded (or quoted), or (2) convertible into a publicly traded (or quoted) security. For partnerships, the Exchange will analyze the creation of the current capital structure to determine whether it is appropriate to include other publicly-traded securities in the calculation.

Funds, REITs and Limited Partnerships will be subject to immediate suspension and delisting procedures if the average market capitalization of the entity over 30 consecutive trading days is below $25,000,000. In addition, a Fund is subject to immediate suspension and delisting if it ceases to maintain its closed-end status. A REIT is subject to immediate suspension and delisting if it fails to maintain its REIT status (unless the resultant entity qualifies for an original listing as a corporation).

[8] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(6).

The Exchange will notify the Fund, REIT or limited partnership if the average market capitalization falls below $35,000,000 and will advise the Fund, REIT or limited partnership of the delisting standard. Funds, REITs and limited partnerships are not subject to the procedures outlined in Paras. 802.02 and 802.03.

Bonds will be subject to immediate suspension and delisting procedures if:

(i) the aggregate market value or principal amount of publicly-held bonds is less than $1,000,000, or

(ii) the issuer is not able to meet its obligations on the listed debt securities.

Bonds are not subject to the procedures outlined in Paras. 802.02 and 802.03. Preferred Stock, Guaranteed Railroad Stock and Similar Issues will be subject to immediate suspension and delisting procedures if:

(i) the aggregate market value of publicly-held shares is less than $2,000,000, or

(ii) the number of publicly-held shares is less than 100,000.

These types of securities are not subject to the procedures outlined in Paras. 802.02 and 802.03.

(C) In order to be considered in conformity with continued listing standards pursuant to Paras. 802.02 and 802.03, a company that is determined to be below compliance under this continued listing criterion must do one of the following:

(i) reestablish both its market capitalization and its stockholders' equity to the $75,000,000 level, or

(ii) achieve average global market capitalization over a consecutive 30 trading-day period of at least $150,000,000, or

(iii) achieve average global market capitalization over a consecutive 30 trading-day period of $90,000,000, with either (x) stockholders' equity of at least $60,000,000, or (y) an increase in stockholders' equity of at least $60,000,000 since the company was notified by the Exchange that it was below continued listing standards.

(D) In order to be deemed in conformity with continued listing standards pursuant to Paras. 802.02 and 802.03, a company that is determined to be below compliance under this continued listing criterion must either:

(i) reestablish both its market capitalization and its revenues to the applicable amounts, or

(ii) qualify as an original listing under any of the original listing standards.]

(i) Average global market capitalization over a consecutive 30 trading-day period is less than $50,000,000 and total stockholders' equity is less than $50,000,000 (C); or

(ii) Average global market capitalization over a consecutive 30 trading-day period is less than $15,000,000; or

(iii) For companies that qualified for original listing under the ''global market capitalization'' standard:

Average global market capitalization over a consecutive 30 trading-day period is less than $500,000,000 and total revenues are less than $20,000,000 over the last 12 months (unless the resultant entity qualifies as an original listing under one of the other original listing standards) (D); or

Average global market capitalization over a consecutive 30 trading-day period is less than $100,000,000.

When applying the market capitalization test in any of the above three standards, the Exchange will generally look to the total common stock outstanding (excluding treasury shares) as well as any common stock that would be issued upon conversion of another outstanding equity security. The Exchange deems these securities to be reflected in market value to such an extent that the security is a ''substantial equivalent'' of common stock. In this regard, the Exchange will only consider securities (1) publicly traded (or quoted), or (2) convertible into a publicly traded (or quoted) security. For partnerships, the Exchange will analyze the creation of the current capital structure to determine whether it is appropriate to include other publicly-traded securities in the calculation.

Affiliated Companies—Will not be subject to the $50,000,000 average global market capitalization and stockholders' equity test unless the parent/affiliated company no longer controls the entity or such parent/affiliated company itself falls below the continued listing standards described in this section.

Funds, REITs and Limited Partnerships—will be subject to immediate suspension and delisting procedures if (1) the average market capitalization over 30 consecutive trading days is below $15,000,000 or (2) in the case of a Fund, it ceases to maintain its closed-end status, and in the case of a REIT, it fails to maintain its REIT status (unless the resultant entity qualifies for an original listing as a corporation). The Exchange will notify the fund, REIT or limited partnership if the average market capitalization falls below $25,000,000 and advise the Fund, REIT or limited partnership of the delisting standard. Funds, REITs and limited partnerships are not subject to the procedures outlined in Paras. 802.02 and 802.03.

Bonds—

- *The aggregate market value or principal amount of publicly-held bonds is less than $1,000,000.*
- *The issuer is not able to meet its obligations on the listed debt securities. Preferred Stock, Guaranteed Railroad Stock and Similar Issues.*
- *Aggregate market value of publicly-held shares is less than $2,000,000.*

Publicly-held shares is less than 100,000.

(C) To be considered in conformity with continued listing standards pursuant to Paras. 802.02 and 802.03 a company that is determined to be below this continued listing criterion must do one of the following:

(i) Reestablish both its market capitalization and its stockholders' equity to the $50,000,000 level, or

(ii) Achieve average global market capitalization over a consecutive 30 trading-day period of at least $100,000,000, or

(iii) Achieve average global market capitalization over a consecutive 30 trading-day period of $60,000,000, with either (x) stockholders' equity of at least $40,000,000, or (y) an increase in stockholders' equity of at least $40,000,000 since the company was notified by the Exchange that it was below continued listing standards.

(D) A company that is determined to be below this continued listing criterion must reestablish both its market capitalization and its revenues to be considered in conformity with continued listing standards pursuant to paras. 802.02 and 802.03.

* * * * *

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NYSE included statements concerning the purpose of, and the basis for, the proposed rule change, as amended, and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in item IV below. The Amex has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

On January 29, 2004, the Commission approved a pilot program amending certain of the minimum numerical standards for the listing and continued

listing of equity securities on the Exchange (''Pilot Program'').[5] At that time, the Exchange believed that the impact of the Pilot Program would be to strengthen certain aspects of the minimum original and continued listing standards, while modestly easing its market-cap/revenue test to enable the NYSE to list somewhat younger companies that still meet substantial quantitative thresholds over their operating history.

The Exchange is proposing to suspend the portion of the Pilot Program relating to the numerical continued listing standards set out in section 802.01B of the Manual. Under the previous requirements, section 802.01B applied to companies that fell below any of the following criteria: (i) Average global market capitalization over a consecutive 30 trading-day period is less than $50,000,000 and total stockholders' equity is less than $50,000,000; (ii) average global market capitalization over a consecutive 30 trading-day period is less than $15,000,000; or (iii) for companies that qualified for original listing under the ''global market capitalization'' standard (a) average global market capitalization over a consecutive 30 trading-day period is less than $500,000,000 and total revenues are less than $20,000,000 over the last 12 months (unless the resultant entity qualifies as an original listing under one of the other original listing standards), or (b) average global market capitalization over a consecutive 30 trading-day period is less than $100,000,000.

Under the Pilot Program, companies that are listed under the Section 102.01C(I) ''Earnings Test'' are considered to be below compliance if (a) average global market capitalization over a consecutive 30 trading-day period is less than $75,000,000 and, at the same time, total stockholders' equity is less than $75,000,000; or (b) average global market capitalization over a consecutive 30 trading-day period is less than $25,000,000.

A company that qualifies to list under the section 102.01C(II)(a) ''Valuation/Revenue with Cash Flow Test'' is considered to be below compliance standards if (a) average global market capitalization over a consecutive 30 trading-day period is less than $250,000,000 and, at the same time, total revenues are less than $20,000,000 over the last 12 months (unless the company qualifies as an original listing under one of the other original listing standards); or (b) average global market capitalization over a consecutive 30 trading-day period is less than $75,000,000.

A company that qualifies to list under the section 102.01C(II)(b) ''Pure Valuation/Revenue Test'' is considered to be below compliance standards if (a) average global market capitalization over a consecutive 30 trading-day period is less than $375,000,000 and, at the same time, total revenues are less than $15,000,000 over the last 12 months (unless the resultant entity qualifies as an original listing under one of the other original listing standards); or (b) average global market capitalization over a consecutive 30 trading-day period is less than $100,000,000.

Under the Pilot Program, companies that fall below the foregoing minimum standards are permitted a period of time to return to compliance, in accordance with the procedures specified in sections 802.02 and 802.03 of the Manual. As a general matter, companies must reestablish the level of market capitalization (and, if applicable, shareholder's equity) specified in the continued listing standard that the company fell below. However, the previous requirements of section 802.01B(I) that a company reestablish both its market capitalization and its stockholders' equity to the $50,000,000 level provided several alternatives, specifying that to return to conformity, a company must do one of the following: (a) Reestablish both its market capitalization and its stockholders' equity to the $50,000,000 level; (b) achieve average global market capitalization over a consecutive 30 trading-day period of at least $100,000,000; or (c) achieve average global market capitalization over a consecutive 30 trading-day period of $60,000,000, with either (x) stockholders' equity of at least $40,000,000 or (y) an increase in stockholders' equity of at least $40,000,000 since the company was notified by the Exchange that it was below continued listing standards. Under the Pilot Program, companies are required to (a) reestablish both its market capitalization and its stockholders' equity to the $75,000,000 level; (b) achieve average global market capitalization over a consecutive 30 trading-day period of at least $150,000,000; or (c) achieve average global market capitalization over a consecutive 30 trading-day period of $90,000,000, with either (x) stockholders' equity of at least $60,000,000 or (y) an increase in stockholders' equity of at least $60,000,000 since the company was notified by the Exchange that it was below continued listing standards.

The Pilot Program provides a transition period for companies that were below compliance under the previous standards at the time the Pilot Program was approved, granting them an opportunity to present an additional business plan advising the Exchange of definitive action the company has taken, or is taking, that would bring the company into conformity zilot Program requirements within a further 12 months from the end of their previous plan. No transition period was provided, however, for companies that were in compliance under the previous standards but not in compliance with the Pilot Program standards at the time the Pilot Program was approved.

The Exchange had requested, and the Pilot Program was approved, by the Commission on an accelerated basis. The Exchange represents that there was no opportunity for listed companies to review and comment on the Pilot Program requirements prior to the date compliance was required. A number of the listed companies that found themselves not in compliance with the Pilot Program standards as of the date of approval have expressed significant dismay at the automatic application of the new standards with no public notice. The Exchange is aware that the Commission has received two comment letters expressing this sentiment,[6] in addition to the numerous oral communications by companies directed to the Exchange staff. In order to address these concerns, the Exchange proposes to suspend the portions of the Pilot Program relating to section 802.01B. The Exchange intends, instead, later to file a proposed rule change to adopt the requirements of the Pilot Program relating to 802.01B with the Commission for public comment on a non-accelerated timeframe.[7]

The Pilot Program, however, will continue without change with respect to Sections 102.01C and 103.01B. The Exchange will also continue the Pilot Program's non-substantive change to the language of section 802.01C.

[5] *See* Securities Exchange Act Release No. 49154 (January 29, 2004), 69 FR 5633 (February 5, 2004) (SR–NYSE–2003–43). The Pilot Program was scheduled to expire on July 29, 2004.

[6] *See* Letters to Jonathan G. Katz, Secretary, Commission, from W. Randy Eaddy, Kilpatrick Stockton L.L.P., dated March 11, 2004, and Kenneth A. Hoogstra, von Briesen & Roper, s.c., dated February 25, 2004.

[7] If the NYSE plans to implement the Pilot Program as initially proposed in SR–NYSE–2003–43 on a permanent basis, the Commission expects the NYSE to file all aspects of the Pilot Program (which include the Pilot Program's revisions to the NYSE initial and continued listing standards) for full notice and comment pursuant to section 19(b) of the Act.

2. Statutory Basis

The Exchange believes that the proposed rule change, as amended, is consistent with section 6(b) of the Act,[8] in general, and the provisions of section 6(b)(5) of the Act,[9] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change, as amended, will impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change, as amended.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change, as amended, does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest, it has become effective pursuant to section 19(b)(3)(A) of the Act [10] and Rule 19b–4(f)(6) [11] thereunder.[12] At any time within 60 days of the filing of the proposed rule change, as amended, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

The NYSE has requested that the Commission waive the five-day pre-filing notice and the 30-day operative delay. The Commission believes that waiving the five-day pre-filing notice and the 30-day operative delay is consistent with the protection of investors and the public interest. Waiver of the operative date will allow the Exchange to suspend immediately its effective Pilot Program relating to minimum continued numerical listing standards for qualification of domestic and international companies. The Commission notes that suspension of the Pilot Program for minimum continued numerical listing standards would alleviate the concerns of commenters who believed that they were given inadequate notice of the effectiveness of the Pilot Program.[13] For these reasons, the Commission designates the proposal to be effective and operative upon filing with the Commission.[14]

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Comments may also be submitted electronically at the following e-mail address: *rule-comments@sec.gov.* All comment letters should refer to File No. SR-NYSE–2004–15. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, comments should be sent in hardcopy or by e-mail but not by both methods. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR–NYSE–2004–15 and should be submitted by April 14, 2004.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[15]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–49436; File No. SR–OCC–2004–01]

Self-Regulatory Organizations; The Options Clearing Corporation; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Related to Clearing Fees for Securities Option Contracts

March 17, 2004.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] notice is hereby given that on February 23, 2004, The Options Clearing Corporation (''OCC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change described in Items I, II, and III below, which items have been prepared primarily by OCC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested parties.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The purpose of the proposed rule change is to reduce certain clearing fees for securities option contracts, effective April 1, 2004.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, OCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. OCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of these statements.[2]

[1] 15 U.S.C. 78s(b)(1).

[2] The Commission has modified the text of the summaries prepared by OCC.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The principal purpose of this rule change is to reduce OCC's clearing fees for securities option contracts, effective April 1, 2004, as follows:

Contracts per trade	Current per contract per trade fee	April 1, 2004 contract per trade fee
0–500	$0.09	$0.0825
501–1,000	0.07	0.0675
1,001–2,000	0.06	0.0575
> 2,000	110.00 (capped)	110.00 (capped)

In addition to the foregoing, OCC will expand what is considered to be a ''market maker scratch trade.'' Currently, OCC considers market maker scratch trades to be the same day purchase and sale of identical option contracts in the same quantity and price by a market maker on a single exchange. Such trades are subject to a reduced clearing fee of $.02 per contract in recognition of a market maker's obligation to continuously maintain a fair and orderly market, which often may result in near simultaneous breakeven purchase and sale transactions. Effective April 1, 2004, OCC will no longer require that the condition that the purchase and sale transactions take place on a single exchange in order to be treated as a market maker scratch trade. As a result of this change, a greater number of contracts will be eligible for clearance at the $.02 per contract rate.

OCC believes that the foregoing changes will financially benefit clearing members without adversely affecting OCC's ability to meet its expenses and maintain an acceptable level of retained earnings.

(B) Self-Regulatory Organization's Statement on Burden on Competition

OCC does not believe that the proposed rule change would impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were not and are not intended to be solicited with respect to the proposed rule change, and none have been received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective upon filing pursuant to Section 19(b)(3)(A)(ii) of the Act [3] and Rule 19b–4(f)(2)[4] thereunder because the proposed rule establishes or changes a due, fee, or other charge. At any time within sixty days of the filing of such rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549–0609. Comments may also be submitted electronically at the following e-mail address: *rule-comments@sec.gov*. All comment letters should refer to File No. SR–OCC–2004–01. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, comments should be sent in either hardcopy or by e-mail but not by both methods. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW, Washington, DC 20549–0609. Copies of such filing also will be available for inspection and copying at the principal office of OCC and on OCC's Web site at *http://www.optionsclearing.com*. All submissions should refer to File No. SR–OCC–2004–01 and should be submitted by April 14, 2004.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[5]

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA 2004–16921]

Insurance Cost Information Regulation

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of availability.

SUMMARY: This notice announces publication by NHTSA of the 2004 text and data for the annual insurance cost information booklet that all car dealers must make available to prospective purchasers, pursuant to 49 CFR 582.4. This information is intended to assist prospective purchasers in comparing differences in passenger vehicle collision loss experience that could affect auto insurance costs.

ADDRESSES: Interested persons may obtain a copy of this booklet by contacting the U.S. Department of Transportation, Docket Management, Room PL–401, 400 Seventh Street, SW., Washington, DC 20590. [Docket hours are from 10 a.m. to 5 p.m.].

FOR FURTHER INFORMATION CONTACT: Ms. Rosalind Proctor, Chief, Consumer Standards Division, NHTSA, 400

Seventh Street SW., Washington, DC 20590 (202–366–0846).

SUPPLEMENTARY INFORMATION: Pursuant to section 201(e) of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C. 1941(e), on March 5, 1993, 58 FR 12545, the National Highway Traffic Safety Administration (NHTSA) amended 49 CFR part 582, *Insurance Cost Information Regulation,* to require all dealers of automobiles to distribute to prospective customers information that compares differences in insurance costs of different makes and models of passenger cars based on differences in damage susceptibility. On March 17, 1994, NHTSA denied a petition submitted by the National Automobile Dealers Association (NADA) for NHTSA to reconsider part 582 insofar as it requires all automobile dealers to prepare the requisite number of copies for distribution of the insurance cost information to prospective purchasers. 59 FR 13630.

On March 24, 1995, NHTSA published a final rule to amend part 582 in a number of respects. 60 FR 15509. These changes included wording clarifications and a change in the availability date of the booklet.

Pursuant to 49 CFR 582.4, all automobile dealers are required to make available to prospective purchasers booklets that include this comparative information as well as certain mandatory explanatory text that is set out in section 582.5. Early each year, NHTSA publishes the annual **Federal Register** document updating the Highway Loss Data Institute's (HLDI) December Insurance Collision Report. Booklets reflecting the updated data must be available for distribution to prospective purchasers without charge within 30 days from the date of the **Federal Register**.

NHTSA is mailing a copy of the 2004 booklet to each dealer on the mailing list that the Department of Energy uses to distribute the ''Gas Mileage Guide.'' Dealers will have the responsibility of reproducing a sufficient number of copies of the booklet to assure that they are available for retention by prospective purchasers by April 23, 2004. Dealers who do not receive a copy of the booklet within 15 days of the date of this notice should contact Ms. Rosalind Proctor of NHTSA's Office of International Policy, Fuel Economy and Consumer Programs (202) 366–0846 to receive a copy of the booklet and to be added to the mailing list. Dealers may also obtain a copy of the booklet through the NHTSA web page at: *http://www.nhtsa.dot.gov/cars/problems/studies/InsCost.*

(49 U.S.C. 32302; delegation of authority at 49 CFR 1.50(f).)

Issued on: March 16, 2004.

Stephen R. Kratzke,

Associate Administrator for Rulemaking.

BILLING CODE 4910–59–P

U.S. Department of Transportation
National Highway Traffic Safety Administration

The Administrator

400 Seventh St., S.W.
Washington, D.C. 20590

MAR 1 2004

Dear Vehicle Dealer:

All vehicle dealers are required to make available to prospective purchasers information regarding comparative insurance costs for different makes and models of passenger cars, utility vehicles, light trucks, and vans pursuant to Title 49 of the Code of Federal Regulations, Part 582, *Insurance Cost Information Regulation*. This action responds to the mandate of Title II of the Motor Vehicle Information and Cost Savings Act and fulfills the agreed conditions for the settlement of the lawsuit between the agency and Consumers Union.

Enclosed please find **one** copy of the February 2004 Relative Collision Insurance Cost Information Booklet. Each dealer will be responsible for ***reproducing and maintaining a sufficient number of copies of this booklet*** to ensure that they are available for retention by prospective purchasers. These booklets must be made available no later than **March 30, 2004**. Please make certain that all salespersons at your dealership are aware that copies of this booklet are being displayed in your showroom.

To ensure consumer awareness of the availability of this booklet, dealers may choose to follow procedures similar to those they use for displaying the Environmental Protection Agency "Gas Mileage Guide," or may utilize wall posters or other media displays in the dealership to announce that the information is available.

This booklet can also be downloaded and printed from the National Highway Traffic Safety Administration website at: www/nhtsa.dot.gov/cars/problems/studies/inscost.

Sincerely yours,

Jeffrey W. Runge, M.D.

SAFETY BELTS SAVE LIVES

COMPARISON OF DIFFERENCES IN INSURANCE COSTS FOR PASSENGER CARS, STATION WAGONS/PASSENGER VANS, PICKUPS AND UTILITY VEHICLES ON THE BASIS OF DAMAGE SUSCEPTIBILITY

MARCH 2004

FEBRUARY 2004

COMPARISON OF DIFFERENCES IN INSURANCE COSTS FOR PASSENGER CARS, STATION WAGONS/PASSENGER VANS, PICKUPS, AND UTILITY VEHICLES ON THE BASIS OF DAMAGE SUSCEPTIBILITY

The National Highway Traffic Safety Administration (NHTSA) has provided the information in this booklet in compliance with Federal law as an aid to consumers considering the purchase of a new vehicle. The booklet compares differences in insurance costs for different makes and models of passenger cars, station wagons/passenger vans, pickups, and utility vehicles on the basis of damage susceptibility. However, it does not indicate a vehicle's relative safety.

The following table contains the best available information regarding the effect of damage susceptibility on insurance premiums. It was taken from data compiled by the Highway Loss Data Institute (HLDI) in its December 2003 Insurance Collision Report, and reflects the collision loss experience of passenger cars, utility vehicles, light trucks, and vans sold in the United States in terms of the average loss payment per insured vehicle year for model years 2001-2003. NHTSA has not verified the data in this table.

The table presents vehicles' collision loss experience in relative terms, with 100 representing the average for all passenger vehicles. **Thus, a rating of 122 reflects a collision loss experience that is 22 percent higher (worse) than average while a rating of 96 reflects a collision loss experience that is 4 percent lower (better) than average.** The table is not relevant for models that have been substantially redesigned for 2004, and it does not include information about models without enough claim experience.

Although many insurance companies use the HLDI information to adjust the "base rate" for the collision portion of their insurance premiums, the amount of any such adjustment is usually small. It is unlikely that your total premium will vary more than ten percent depending upon the collision loss experience of a particular vehicle. If you do not purchase collision coverage or your insurance company does not use the HLDI information, your premium will not vary at all in relation to these rankings.

In addition, different insurance companies often charge different premiums for the same driver and vehicle. Therefore, you should contact insurance companies or their agents directly to determine the actual premium that you will be charged for insuring a particular vehicle.

PLEASE NOTE: In setting insurance premiums, insurance companies mainly rely on factors that are not directly related to the vehicle itself (except for its value). Rather, they mainly consider driver characteristics (such as age, gender, marital status, and driving record), the geographic area in which the vehicle is driven, how many miles are traveled, and how the vehicle is used. Therefore, to obtain complete information about insurance premiums, you should contact insurance companies or their agents directly.

Insurance companies do not generally adjust their premiums on the basis of data reflecting the crashworthiness of different vehicles. However, some companies adjust their premiums for personal injury protection and medical payment coverage if the insured vehicle has features that are likely to improve its crashworthiness, such as air bags.

Test data relating to vehicle crashworthiness are available from NHTSA's New Car Assessment Program (NCAP). NCAP test results demonstrate relative frontal and side crash protection in new vehicles. Information on vehicles that NHTSA has tested in the NCAP program can be obtained by calling the agency's toll-free Auto Safety Hotline at (888) 327-4236 and through the NHTSA Web Page at www.nhtsa.dot.gov.

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[STB Ex Parte No. 290 (Sub No. 5) (2004–2)]

Quarterly Rail Cost Adjustment Factor

AGENCY: Surface Transportation Board.

ACTION: Approval of rail cost adjustment factor.

SUMMARY: The Board has approved the second quarter 2004 rail cost adjustment factor (RCAF) and cost index filed by the Association of American Railroads. The second quarter 2004 RCAF (Unadjusted) is 1.033. The second quarter 2004 RCAF (Adjusted) is 0.518. The second quarter 2004 RCAF–5 is 0.493.

EFFECTIVE DATE: April 1, 2004.

FOR FURTHER INFORMATION CONTACT: Mac Frampton, (202) 565–1541 Federal Information Relay Service (FIRS) for the hearing impaired: 1–800–877–8339.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Board's decision. To purchase a copy of the full decision, call ASAP Document Solutions at (301) 577–2600. [Assistance for the hearing impaired is available through FIRS: 1–800–877–8339.]

This action will not significantly affect either the quality of the human environment or energy conservation.

Pursuant to 5 U.S.C. 605(b), we conclude that our action will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act.

Decided: March 15, 2004.

By the Board, Chairman Nober.

Vernon A. Williams,

Secretary.

Publication of State Plans Pursuant to the Help America Vote Act

AGENCY: U.S. Election Assistance Commission (EAC).

ACTION: Notice.

SUMMARY: Pursuant to Section 255(b) of the Help America Vote Act(HAVA), Pub. L. 107–252, the U.S. Election Assistance Commission (EAC) hereby causes to be published in the **Federal Register** the election plans submitted by the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, and the United StatesVirgin Islands.

DATES: This notice is effective March 24, 2004.

FOR FURTHER INFORMATION CONTACT: Bryan Whitener at (202) 694–1095.

Submit Comments: Any comments regarding the plans published herewith should be made in writing to the chief election official of the individual States at the address listed in the **SUPPLEMENTARY INFORMATION** section.

SUPPLEMENTARY INFORMATION: The Commission wishes to acknowledge the great effort that went into the development of the State plans and encourages public comment. The Commission notes that plans published herein include only those that meet the notice and comment requirements of Sec. 256 of HAVA. The Commission also notes that States, Territories and the District of Columbia (the jurisdiction) may change or update their plans from time to time pursuant to Section 254 (a)(11),(12),(13) of HAVA. Those commenting on these plans should contact the chief State election official of their respective State, Territory or the District of Columbia listed in the **SUPPLEMENTARY INFORMATION** section, to determine if their jurisdiction has or is in the process of making changes in their plans pursuant to Section 254.

Upon the expiration of 45 days from March 24, 2004, any State, Territory or the District of Columbia whose plan is published herein will be eligible to file a statement of certification under Sec. 253 of HAVA. The statement of certification must confirm that the jurisdiction is in compliance with the requirements referred to in Section 253(b) of HAVA. The statement of certification must be provided to the Election Assistance Commission in order for the jurisdiction to receive a requirements payment under Subtitle D of Title II of HAVA.

The members of the U.S. Election Assistance Commission are: DeForest B. Soaries, Jr., Chairman; Gracia M. Hillman, Vice-Chair; Paul S. DeGregorio, Commissioner; and Ray Martinez, III, Commissioner.

Chief State Election Officials

Alabama

Nancy Worley, Secretary of State, Alabama State Capitol, Room S–105, 600 Dexter Avenue, Montgomery, AL 36104, 334/242–7205, FAX 334/242–4993, E-mail: *sos@sos.al.gov.*

Alaska

Loren Lehman, Lieutenant Governor, State of Alaska, State Capitol, Rm 315, 120 4th Street, Juneau, AK 99801, 907/465–3520, FAX 907/465–5400, E-mail: *Loren_Lehman@gov.state.ak.us.*

American Samoa

Soliai T. Fuimaono, Chief Election Officer, Election Office, PO Box 3970, Pago Pago, AS 96799, 0–11–684/633–2522, FAX 0–11–684/633–7116, E-mail: *Aselect@samoatelco.com.*

Arizona

Jan Brewer, Secretary of State, State Capitol, West Wing, 7th Floor, 1700 W Washington, Phoenix AZ 85007–2808, 602/542–4285, FAX 602/542–1575, E-mail: *sosadmin@sos.state.az.us.*

Arkansas

Charlie Daniels, Secretary of State, 256 State Capitol Bldg., Little Rock AR 72201, 501/682–1010, FAX 501/682–3510, E-mail: *ElectionsEmail@sosmail.state.ar.us.*

California

Kevin Shelley, Secretary of State, 1500 11th St, Sacramento CA 95814–2974, 916/653–7244, FAX 916/653–4620, E-mail: *constituentaffairs@ss.ca.gov.*

Colorado

Donetta Davidson, Secretary of State, 1560 Broadway, Ste. 200, Denver CO 80202, 303/894–2212, FAX 303/894–2389, E-mail: *sosadmin1@state.co.us.*

Connecticut

Susan Bysiewicz, Secretary of the State, State Capitol, Rm 104, 210 Capitol Avenue, Hartford CT 06106, 860/509–6200, FAX 860/509–6209,E-mail: *Susan.Bysiewicz@po.state.ct.us.*

Delaware

INTRODUCTION

On October 29, 2003, President Bush signed into law the Help America Vote Act of 2002. Perhaps the most sweeping elections legislation since the Voting Rights Act of 1965, the Help America Vote Act (HAVA) seeks to increase public confidence in the accuracy of our elections and to make voting more accessible to our citizens.

The Help America Vote Act contains two sets of federal mandates:

By the end of this year (2003), Alabama must:

- Combine all local voter registration lists into a single state list made available to local officials through an interactive computer network.
- Require that voters who register by mail show identification before voting in their next federal election.
- Create a system of provisional voting where an individual's eligibility to vote must be verified before his or her ballot is counted when the person's name is not on the precinct's list, or when they do not have an ID but are required to show one, or when their vote is challenged by the inspector of the polling place.
- Provide a single state office for military and overseas voters to contact in order to get
- applications for voter registration or absentee voting; and
- Offer voters greater information about the voting process and how to file a complaint.

By the end of 2005, Alabama must:

- Replace mechanical lever voting machines in Bullock county;
- Replace or modify voting machines in Mobile, Montgomery and DeKalb counties;
- Replace centralized ballot counting systems in nine (9) counties; and
- Place a modern computerized direct record voting machine in each precinct in the state capable of permitting persons with disabilities to vote without assistance and which facilitates voting in an alternative language (e.g., Spanish) for those counties whose voting age population exceeds 5% in that language group.

The Help America Vote Act promises significant federal funds to states in order to assist the states in meeting the Act's federal mandates. In order to qualify for this funding, each state must provide a five percent (5%) match of state money and must complete a State Plan to be filed with the federal government.

I wish to express my gratitude to the diverse group of citizens who worked diligently to provide the recommendations which helped to create this plan. Despite coming from differing backgrounds with respect to race, age, gender, political affiliations, and careers, this group was surprisingly unified in their conclusions.

The work is not finished, however, until we have heard from the public. I look forward to learning about your suggestions and concerns. In the end, we will find that what we have accomplished will be a lasting change to the infrastructure of conducting elections in Alabama. I am convinced this will be a fitting beginning to our efforts to restore public confidence in the elections process.

Nancy L. Worley
Secretary of State

Section 1 - Federal Mandates in Title III and Other Activities

How the State will use the requirements payments to meet the requirements of Title III, and, if applicable under Section 251(a)(2), to carry out other activities to improve the administration of elections.

The total amount of federal funding available as requirements payments under Section 254 of HAVA to Alabama is uncertain. Congress has not appropriated funds beyond Federal Fiscal Year 3 (FFY 3). The initial appropriation provides an estimated 12,807,000 in requirements payments. HAVA requires the state to match this payment by appropriating an amount equal to 5% of the total spent. In order to match the initial federal payment, the state must appropriate $640,350 in the current fiscal year.

The FFY 3 appropriation by Congress was substantially less than what was projected within HAVA. This has created uncertainty with respect to the commitment of Congress to fully fund HAVA in the second and third years of implementation. This plan must nonetheless presume full funding by Congress.

HAVA establishes a number of requirements that all states must meet whether or not federal funds are accepted. The specific choices on the methods of complying with these requirements is left to the discretion of the state. (See HAVA Section 305.) A brief description of the requirements and how Alabama will meet the requirements is set out below.

Voting Systems Standards Requirements - HAVA Section 301 (a)
Deadline for Compliance: January 1, 2006; no waiver permitted.

HAVA establishes standards for voting systems. The deadline for meeting these standards is January 1, 2006. Each voting system used in an election for Federal office shall meet the following requirements:

- In general, the voting system shall:
  - Permit the voter to verify in a private and independent manner the votes selected by the voter on the ballot before the ballot is cast and counted;
  - Provide the voter with the opportunity in a private and independent manner to change the ballot or correct any error before the ballot is cast and counted including the opportunity to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error; and
  - If the voter selects votes for more than one candidate for a single office:
    - notify the voter that the voter has selected more than one candidate for a single office on the ballot;
    - notify the voter before the ballot is cast and counted of the effect of casting multiple votes for the office; and
    - provide the voter with the opportunity to correct the ballot before the ballot is cast and counted.

A State or jurisdiction that uses a paper ballot voting system, a punch card voting system, or a central count voting system (including mail-in absentee ballots and mail-in ballots), may meet these requirements by establishing a voter education program specific to that voting system that notifies each voter of the effect of casting multiple votes for an office; and providing the voter with instructions on how to correct the ballot before it is cast and counted (including instructions on how to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error).

The voting system shall ensure that any notification preserves the privacy of the voter and the confidentiality of the ballot.

- The voting system shall produce a record with an audit capacity for the system. The record shall be a permanent paper record with a manual audit capacity. The voting system shall provide the voter with an opportunity to change the ballot or correct any error before the permanent paper record is produced. The paper record produced shall be available as an official record for any recount conducted with respect to any election in which the system is used.
- The voting system shall be accessible for individuals with disabilities, including nonvisual accessibility for the blind and visually impaired, in a manner that provides the same opportunity for access and participation, including privacy and independence as for other voters. This requirement can be satisfied through the use of at least one direct recording electronic voting system or other voting system equipped for individuals with disabilities at each polling place.
- The voting system shall provide alternative language accessibility pursuant to the requirements of the Voting Rights Act of 1965.
- The error rate of the voting system in counting ballots (determined by taking into account only those errors which are attributable to the voting system and not attributable to an act of the voter) shall comply with the error rate standards established under the voting systems standards issued by the Federal Election Commission.
- Each State shall adopt uniform and nondiscriminatory standards that define what constitutes a vote and what will be counted as a vote for each category of voting system used in the State.

Of Alabama's 67 counties, 53 counties use precinct-level tabulation optical scan voting systems, 10 counties use central count tabulation systems for optical scan voting systems, 3 counties use direct record equipment voting systems and 1 county uses lever voting machines. Alabama has not used punch card voting systems.

The optical scan voting system meets the general requirements on privacy and independence. It also meets the audit capacity requirements. Alabama anticipates adopting a uniform style of voting by use of precinct-level tabulation optical scan voting systems supplemented by one (1) direct record voting system at each precinct deemed necessary for compliance with HAVA's provisions for persons with disabilities and for alternative language capabilities. The direct record system is also seen as offering privacy to those citizens who have difficulty reading but who are not visually impaired.

As a consequence, Alabama anticipates replacing voting systems in 14 of 67 counties and providing one (1) direct record voting system in each precinct. This can only be accomplished with full funding of HAVA by Congress.

While Alabama is presently exempt from the alternative language requirements of the Voting Rights Act of 1965, Alabama anticipates achieving compliance with those requirements by January 1, 2006. At present, 4 of Alabama's 67 counties have populations of Hispanic people which exceeds 5% of that county's voting age population. Full funding of HAVA is essential to Alabama's ability to reach out to this growing sector of our citizenry.

Since 2001, the Alabama statutes governing the Alabama Electronic Voting Committee require any electronic voting system to be qualified against the voting systems standards established by the Federal Election Commission before it can be used in the state. The qualification must be done by an independent testing laboratory approved by the National Association of State Election Directors (NASED).

In order to promote public confidence in the accuracy of Alabama's voting equipment, the Alabama Electronic Voting Committee will be requiring systems in use in Alabama that were approved prior to 2001 also have a certification on file by a NASED-approved independent testing laboratory that the system complies with voting system standards established by the Federal Elections Commission. The Alabama Secretary of State will also seek state legislation which requires recertification upon any material change in the voting system standards established by the Federal Elections Commission.

Historically, Alabama has conducted its own testing of the accuracy of electronic voting equipment and will continue to do so as a supplement to the findings of the independent testing laboratories approved by NASED.

Currently uniform standards of what constitutes a vote are established by administrative rule of the Alabama Electronic Voting Committee. ALABAMA ADMINISTRATIVE CODE Rule 307-X-1-.17. A review of whether to modify this rule pursuant to HAVA is under way.

Provisional Voting Requirements - HAVA Section 302 (a)
Deadline for Compliance: January 1, 2004; no waiver permitted.

HAVA requires a state to provide an individual the opportunity to vote a provisional ballot if the individual asserts that he is registered, but the person's name does not appear on the list of qualified voters or when an election official asserts that the individual is not eligible to vote. The individual must complete a written affirmation that he is a registered voter in the jurisdiction and eligible to vote in that election. The individual is then permitted to vote a provisional ballot. The provisional ballot is not counted unless it is verified that the individual is a registered voter in the jurisdiction and eligible to vote in that election.

Historically, Alabama has operated under a similar system of "challenged ballots" wherein the vote is counted on election day but made identifiable so that the election count may be modified in an election contest.

Alabama replaces "challenged ballots" with provisional balloting through Act 2003-313 which is pending preclearance by the U.S. Department of Justice. This legislation would provide a three day period after a primary election and a seven day period in all other federal, state and county elections to verify provisional ballots. It will be the role of the Board of Registrars in each county to verify provisional ballots and to certify their verification of the provisional ballots to the Judge of Probate. The Judge of Probate, the Sheriff and the Circuit Court Clerk will have the responsibility of counting the provisional ballots and reporting those returns as though from an individual precinct within the county – similar to the manner in which absentee ballots are reported in Alabama.

Voting Information Requirements - HAVA Section 302 (b)
Deadline for Compliance: January 1, 2004; no waiver permitted.

HAVA requires that specific information be posted at each polling place on election day. The required information is:

- A sample version of the ballot that will be used for that election;
- Information regarding the date of the election and the hours during which polling places will be open;
- Instructions on how to vote, including how to cast a vote and how to cast a provisional ballot;
- Instructions for mail-in registrants and first-time voters;

- General information on voting rights under applicable Federal and State laws, including information on the right of an individual to cast a provisional ballot and instructions on how to contact the appropriate officials if these rights are alleged to have been violated; and
- General information on Federal and State laws regarding prohibitions on acts of fraud and misrepresentation.

Alabama's current law does not fully encompass these requirements but each of these requirements is addressed in Act 2003-313 which is pending preclearance by the U.S. Department of Justice. Act 2003-313 further provides that three sets of these instructions will be posted at each polling place in various locations specifically convenient to voters.

Voters Allowed to Vote After the Polls Close Pursuant to a Court Order - HAVA Section 302 (c)

Deadline for Compliance: January 1, 2004; no waiver permitted.

HAVA requires that any individual who votes after the polls close pursuant to a court order shall vote a provisional ballot. The ballot shall be separated and kept apart from other provisional ballots.

Act 2003-313, which is pending preclearance by the U.S. Department of Justice, addresses this requirement.

Computerized Statewide Voter Registration List Requirements - HAVA Section 303 (a)

Deadline for Compliance: January 1, 2004; State can submit a certification stating "good cause" that will extend the deadline for compliance to January 1, 2006.

HAVA requires the state, acting through the chief State election official, to implement, in a uniform and nondiscriminatory manner, a single, uniform, official, centralized, interactive computerized statewide voter registration list defined, maintained, and administered at the State level that contains the name and registration information of every legally registered voter in the State and assigns a unique identifier to each legally registered voter in the State. The chief State election official is also responsible for defining, administering and maintaining the statewide list of registered voters. HAVA requires the computerized list to have the following attributes:

- The computerized list shall serve as the single system for storing and managing the official list of registered voters throughout the State.
- The computerized list contains the name and registration information of every legally registered voter in the State.
- Under the computerized list, a unique identifier is assigned to each legally registered voter in the State.

- The computerized list shall be coordinated with other agency databases within the State.
- Any election official in the State, including any local election official, may obtain immediate electronic access to the information contained in the computerized list.
- All voter registration information obtained by any local election official in the State shall be electronically entered into the computerized list on an expedited basis at the time the information is provided to the local official.
- The chief State election official shall provide such support as may be required so that local election officials are able to electronically enter voter registration information into the computerized list on an expedited basis.
- The computerized list shall serve as the official voter registration list for the conduct of all elections for Federal office in the State.

Under current law, each county in Alabama has at least two official lists of registered voters – one maintained by the Board of Registrars for that county and one maintained by the Judge of Probate from which each precinct's list of qualified voters is produced. In addition, Alabama has a statewide computer file of registered voters which serves to assist each county in updating their records. The statewide computer file is maintained by the Office of Voter Registration which operates independently of the chief State election official – the Secretary of State. Due to a lack of adequate funding, the statewide computer file has become obsolete according to Alabama's Chief Information Officer.

In order to comply with the voter ID and provisional balloting provisions of HAVA, which may not be waived beyond January 1, 2004, Alabama will implement the state voter registration system under the authority of the enabling legislation, Act 2003-313, which is pending preclearance by the U.S. Department of Justice. The State Plan Committee found that establishing an official centralized state voter registration list with interactive links to other state agencies is the most economical and effective method to comply with HAVA's voter ID and provisional balloting requirements.

The State Plan Committee also recommended that lines of responsibility be clearly established in order to comply with HAVA. HAVA mandates that the state act through its chief State election official in managing a single statewide voter registration list. Act 2003-313 consolidates the Office of Voter Registration into the office of the chief State election official (the Secretary of State in Alabama) and will codify the federal requirements into Alabama law. In order to comply with HAVA's requirement that the list be defined, administered and maintained at the state level, Act 2003-313 provides that the Secretary of State may remove a member of a county's Board of Registrars for cause in order to create accountability in a system dependent on maintenance of the state voter registration system by county-level registrars. Due to the obsolete condition of the existing statewide voter file and admissions by Alabama's Chief Information Officer that state agencies have historically been overcharged for computer services by the Alabama Department of Finance, the Alabama Secretary of State is

submitting requests for proposals to various prospective vendors for computer-related services associated with establishing and maintaining the statewide voter registration list. The Alabama Secretary of State expects to get proposals to evaluate from several vendors and from the Information Systems Division of the Alabama Department of Finance and will cooperate with the Department of Finance in the implementation of the system. The proposals will assist the Secretary of State in defining the computerized statewide voter registration list in accordance with HAVA Section 303(a) and with Act 2003-313, which is pending preclearance by the U.S. Department of Justice.

The Alabama Secretary of State is committed to achieving the most economical, reliable and effective system for the statewide voter registration list and will evaluate proposals and define the computerized state voter registration list only in that context. The system in Alabama will provide redundant PC servers managed by the Office of the Secretary of State with direct interactive connection to county boards of registrars and will provide multiple report functions to county Judges of Probate and Circuit Court Clerks in a format helpful to them in administering their election responsibilities. In addition Circuit Court Clerks will use the system to account for military and overseas absentee reporting requirements imposed on Alabama by HAVA. Pursuant to a recommendation of the State Plan Committee, Alabama is studying the feasibility of optical image scanning of voter registration applications of various types as part of its system. The statewide voter registration list system will also have direct interactive access to the Alabama Department of Public Safety (drivers license database and Social Security Administration); the Alabama Administrative Office of Courts (felony records and records showing reinstatement of voting rights for ex-felons) and the Alabama Department of Public Health (death records). Access to voter registration information on the statewide voter registration list system by individuals, entities and agencies will be limited to that access required by state law in order to protect the privacy of voter registration information in accordance with Section 17-4-122, CODE OF ALABAMA.

Requirements for Voters Who Register by Mail - HAVA Section 303 (b)
Deadline for Compliance: January 1, 2004; no waiver permitted.

HAVA requires an individual who registers by mail and who has never voted in the state before registering by mail to provide specific identification before being permitted to vote. The identification specified in HAVA includes a current and valid photo identification or a current utility bill, bank statement, government check, paycheck or other government document that shows the name and address of the voter. Act 2003-313, which is pending preclearance by the

U.S. Department of Justice, adopts HAVA's exception to the voter identification requirement where a driver's license number or last four digits of a social security number given by the applicant enables the registrars to verify the identity of the applicant via the computer link with the driver's license database of the Alabama Department of Public Safety. If the registrars

are unable to identify the applicant in advance, they will note through the computerized state voter registration list that the registered voter must provide identification at the next federal election. Should that individual fail to provide the required identification, the individual must vote on a provisional ballot.

An absentee voter, subject to this requirement may provide a copy of the identification as part of the absentee voting process. Local election officials will have to track first-time voters and secure the required identification. This can be done after the voter registers and before election day.

Act 2003-313, which is pending preclearance by the U.S. Department of Justice, adopts the HAVA voter identification requirements. As noted previously, the State Plan Committee has recommended prompt implementation of the statewide voter registration list system, with interactive links to the drivers license database of the Alabama Department of Public Safety, to assist boards of registrars in identification of mail-in registrants as a way of reducing the number of voters required to produce identification and consequently reducing the number of provisional ballots in the 2004 elections.

Section 2 - Distribution of Requirements Payments

How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in Section 1 of the State Plan, including a description of the criteria to be used to determine the eligibility of such units or entities for receiving the payment; and the methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under Section 8 of the State Plan.

Alabama does not plan to distribute any of the requirements payments to local governments in Fiscal Year 2003.

Subject to future guidance from the Alabama legislature, Alabama anticipates making distribution of requirements payments to county governments principally for the purpose of purchasing voting equipment necessary to comply with HAVA.

The State Plan Committee recommended that counties be required to certify a means of effort establishing that county election expenditures would not fall below the amount expended in the fiscal year immediately preceding the November, 2000 election and that the county would reimburse the State Help America Vote fund for monies returned to the federal government as a result of an audit exception showing the county has mis-spent a distribution of requirements payments.

County governments seeking a distribution of the requirements payment shall apply with the Secretary of State. The application must show performance goals and measures relating to compliance with HAVA and itemize how the local distribution of requirements payments will be spent in support of those performance goals and measures.

Section 3 – Voter Education, Election Official Education and Training, and Pollworker Training

How the State will provide for programs for voter education, election official education and training, and pollworker training which will assist the State in meeting the requirements of Title III.

Training of election officials and voter education is the foundation of the election system. Trained election officials and informed voters are crucial resources in ensuring the integrity of the entire electoral process. The process of training and education will be enhanced by HAVA funding to assure that uniform and standardized procedures are implemented within each locality.

Currently, training programs in the State are localized at the county level. The Secretary of State distributes a training video and Pollworker Guides to the local election officials. These officials are responsible for how the information is disseminated to the pollworkers and to the public. The Secretary of State, in cooperation with local election officials, and with input from advocacy groups, will enhance the existing system by providing regular training to local election officials. HAVA funds will be used to provide uniform and standardized training programs, to produce and distribute training materials, and to establish other training resources.

The Secretary of State will include additional training on the HAVA requirements in the election officials training program. The Secretary of State will include material in the Pollworker Guide that addresses sensitivity training and the use of the voting machines.

The successful implementation of HAVA will require comprehensive election official training programs and public education. The Secretary of State will work with advocates for persons with disabilities to devise an outreach and education program to train voters on the new voting machines. The Secretary of State and local election officials will use public service announcements in the major media markets in the state as a forum to conduct voter education. Improved website and other free access systems for voters to obtain voter registration and election information will be utilized. The website will include information on, or links to, local websites with information on polling place hours and location.

The Secretary of State will place an increased emphasis on the recruitment of pollworkers. The State Plan Committee recommended the enactment of legislation that will raise the pay for pollworkers and will provide pay for attending training sessions. The Secretary of State will also involve civic and service organizations in pollworker recruitment, will recruit college students to become pollworkers, and will use the media and the Secretary of State website in recruiting pollworkers.

Information posted on election day at the polling locations will include a sample version of the ballot, information on the date of the election, the hours of the polling place, instructions on provisional ballots, instructions for mail-in registrants voting for the first time, and general information on voter rights. These instructions will also be available on the Secretary of State website.

Section 4 - Voting System Guidelines

How the State will adopt voting system guidelines and processes which are consistent with the requirements of Section 301.

Alabama's current statutes provide for voting system guidelines and processes to be established by administrative rules adopted by the Alabama Electronic Voting Committee made pursuant to the Alabama Administrative Procedures Act. See Chapter 307-X-1, ALABAMA ADMINISTRATIVE CODE; Chapter 17-24, CODE OF ALABAMA; and Chapter 41-22, CODE OF ALABAMA.

Alabama requires that each electronic voting system used in the state must be approved by the Alabama Electronic Voting Committee and must be certified by an Independent Testing Authority designated by the National Association of State Election Directors (NASED) that the system complies with voting systems standards established by the Federal Elections Commission.

Act 2003-313, which is pending preclearance by the U.S. Department of Justice, requires compliance with Section 301 by January 1, 2006.

Section 5 – HAVA Election Fund Management

How the State will establish a separate Election fund for purposes of administering the State's activities under this part, including information on fund management.

The Secretary of State has established a state "Help America Vote Act" fund to receive the federal and state money for the purpose of complying with HAVA. This fund is separate and distinct from all other funds within the office. All disbursements from the fund will require the approval of the Secretary of State. The Secretary of State will work with the State Comptroller and the Executive Budget Office to ensure that all mandated fiscal controls and policies are put into effect.

Section 6 – Alabama's HAVA Budget

The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on the costs of the activities required to be carried out to meet the requirements of Title III: the position of the requirements payment which will be used to carry out other activities.

The total amount of federal funding available to Alabama under HAVA is uncertain.

Congress has not appropriated funds beyond Federal Fiscal Year 2003. Funds have been appropriated under HAVA Title I for activities to improve the administration of elections and replacement of lever voting machines. The Secretary of State plans to use funds to reimburse the agency for staff training costs associated with HAVA and agency costs associated with the preparation of the State Plan.

Estimated HAVA-Related Receipts

Federal Fiscal Year	Total Federal Funds	Alabama Federal Share	5% State Match Requirement
Early Payments (Title I Funds)	**$650, 000, 000 (Appropriated)**	**$5,000,000**	**$0**
2003 (Title II Funds)	$833, 000, 000 (Appropriated)	$12,807,000	$640,350
2004 (Title II Funds)	$1,000,000,000 (Authorized)	$16,404,000	$820,000
2005 (Title II Funds)	$600, 000, 000 (Authorized)	$9,843,000	$492,132
Total	$2, 564, 000, 000	$44,054,000	$1,952,682

Estimated HAVA-Related Expenditures

Statewide Voter Registration System	$12,000,000
Direct Record Voting Machines for Persons with Disabilities/Others	$11,000,000
Upgrade Other Voting Machines to HAVA Standards	$12,000,000
Voter Education and Outreach	$2,500,000
Election Official Training	$2,500,000
Military and Overseas Balloting	$334,000
Provisional Balloting	$333,000

Voter ID for Mail-in Registrants	$333,000
Complaint Review Process	$1,000,000
Improvement of Election Administration	$2,000,000
TOTAL	$44,000,000

If no additional federal funding is appropriated, Alabama will not be able to fund the requirements mandated by HAVA. Alabama must also appropriate the required 5% spending match. Legislation has been approved that will fund this 5% match.

Alabama is assuming that the costs of complying with HAVA will not end after federal appropriations have ceased. The Secretary of State plans to hold the HAVA election fund any unspent federal funds remaining after all HAVA requirements have been met and using the interest earned from these funds to pay on-going maintenance and program costs at the state and local levels.

The duration for the budget is based on HAVA deadlines and projected funding. The State is concerned, however, that beyond the three years of federal funding, the ongoing costs of operating and maintaining the statewide voter registration list and the new voting equipment will be considerably higher than current local budget for these efforts and any unspent money in the Elections Fund. The operation and maintenance of the new infrastructure will be a financial burden when HAVA funding is no longer available.

Section 7 - Maintenance of Alabama's Effort in Funding Elections

How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.

Alabama will maintain the level of state budgeting for election requirements at the same or greater level as the state spent in the fiscal year ending before the November 2000 election. In the fiscal year ending September 30, 2000, the state spent no funds on activities related to HAVA requirements. The state election-related budget consisted of the following line items:

"125. Secretary of State
(A) Administrative Support Services Program
(1) State General Fund $753,056
(3) Electronic Voting Fund $5,000
Conditional Appropriation:
Section 5. Page 103, Line 17 Secretary of State $84,977

"142 Voter Registration Identification Program
(A) Special Services Program $566,140
Conditional Appropriation: Section 5, Page 103, Line 8..... $41,316

"2D OTHER:
"6. Distribution of Public Documents:
(A) Administrative Support Services Program, Estimated $305,206
"8. Election Expenses:
(A) Special Services Program, Estimated $4,500,000
(B) Training of Election Officials..... $72,694
"28. Registration of Voters Special Services Program, Estimated $2,800,000
TOTAL..... $9,128,389

Any payments to local government will be conditioned on a continuing maintenance of effort to ensure that federal funds do not replace existing local expenditures on election administration.

Section 8 – HAVA Performance Goals and Measures

How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.

The State's goal is to achieve election reform and compliance with HAVA requirements through the successful implementation of the programs outlined in the State Plan. The Secretary of State and local election officials are responsible for ensuring the success in meeting each performance goal and objective.

The Secretary of State will establish performance objectives and measurement processes to monitor the progress under the State Plan. This will provide measurable management objectives. The performance goals and measurements will provide a high-level view of a project's progress towards achieving compliance with HAVA requirements. The Secretary of State will measure critical areas of each project.

The Secretary of State will continuously monitor and, at a minimum, audit semi-annually the performance of each initiative that is funded by requirements payments in three areas: financial controls, compliance with standards, and program results.
Concurrent with the public comment period of the State Plan, the Secretary of State will be developing performance goals and measurements required by HAVA. This process includes input already obtained from the State Plan Committee and will also include input from local election officials and public comments received pertaining to this Plan. Performance goals and measurements will be established for the following elements of the State Plan.

Performance Topics

1. Statewide Voter Registration List
2. Voter Education and Outreach
3. Training of Election Officials
4. Military and Overseas Ballot Process
5. Provisional Voting
6. Voting Accessibility
7. Complaint Review Procedure

The Secretary of State will ensure that the State and any recipient of payments under HAVA maintain records in accordance with the record-keeping requirements of the Act and all such records will be available for audit. This will include Quality Assurance Reviews.

Section 9 - Creating Alabama's Administrative Complaint Procedure

A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under Section 402.

Act 2003-313, which is pending preclearance by the U.S. Department of Justice, establishes an administrative complaint procedure requirement in order to comply with HAVA Section 402. The legislation authorizes the Secretary of State to promulgate detailed procedures by rule pursuant to the Alabama Administrative Procedures Act.
As recommended by the State Planning Committee, complaints will be on a form prescribed by the Secretary of State and submitted either to the Probate Judge of the county or directly to the Secretary of State. Complaints submitted at the local level will be forwarded to the Secretary of State for review.

The Secretary of State will determine whether the complaint relates to a local matter or a matter requiring resolution at the state level. If local in nature, the complaint will be submitted to the county Judge of Probate who will convene a meeting of the county appointing board (Probate Judge, Sheriff and Circuit Court Clerk) to evaluate and make a disposition of the complaint on behalf of the state. Such evaluations may include a hearing on the record upon request of the complainant.

If the matter is to be resolved at the state-level, the Secretary of State shall evaluate the merits of the complaint with the assistance of the Secretary of State's Elections Division. Requested hearings will be conducted by a hearings officer on the record appointed by the Secretary of State.

Whether resolved locally or at the state-level, complaints shall be reviewed, resolved and appealed pursuant to the Alabama Administrative Procedures Act. If not resolved within 90 days after receipt of the complaint, the complainant may then obtain arbitration pursuant to the Rules of the American Arbitration Association. Should arbitration fail to resolve the matter within 150 days after the complaint was originally filed, the complainant may then pursue their remedy through litigation under the terms of the Alabama Administrative Procedures Act.

Section 10 – Use of Title I Payments

If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

The State of Alabama has received payments under HAVA Title I. The Secretary of State plans to use the Section 101 payments to reimburse the agency for staff training costs associated with HAVA and agency costs associated with the preparation of the State Plan. In addition, these funds will be used for activities to meet the following requirements:

- Statewide voter registration list
- Voter education and outreach
- Training of election officials
- Military and overseas ballot process
- Provisional voting
- Voter ID for mail registrants voting for the first time
- Complaint review procedure

The State has also applied for Section 102 payments to be used as reimbursement for the acquisition of electronic voting systems that replace lever voting machines used at the November 2000 election. The one county that uses lever voting machines has not purchased replacement equipment that complies with HAVA Section 301.

The Secretary of State will evaluate new voting systems for HAVA Section 301 and disability access compliance and develop an implementation and acquisition plan for compliant voting systems. Section 102 payments will be part of the acquisition funds that apply to the voting equipment purchased for the qualifying county.

Section 11 – State Plan Management

How the State will conduct ongoing management of the plan.

Act 2003-313, which is pending preclearance by the U.S. Department of Justice, establishes a committee of 20 individuals to assist the Secretary of State in the development of the State Plan. This committee will reflect the racial diversity of the state and will consist of the following members:

- The Judge of Probate in the most populous county;
- The Judge of Probate in the second most populous county;
- Three local elections officials to be appointed by the Secretary of State, one of whom shall be recommended by the Sheriffs' Association and one of whom shall be recommended by the Circuit Clerks Association;
- Five individuals representing the interests of the electorate to be appointed by the Secretary of State, one of whom shall represent the political party with the highest number of votes in the last Presidential election, recommended by the chair of the party; one of whom shall represent the political party with the second highest number of votes in the last Presidential election, recommended by the chair of the party; and one of whom shall represent an organization serving as an advocate for the rights of individuals with disabilities;
- Three private citizens, representing the public at large, to be appointed by the Governor;
- Five members of the state House of Representatives to be appointed by the Speaker of the House of Representatives and two members of the state Senate to be appointed by the President of the Senate.

This committee will have the power and the duty to advise the Secretary of State on the further development of the State Plan and to make recommendations on all aspects of the State Plan. The committee will continue to meet and revise and refine the State Plan to reflect goals of HAVA and respond to legislative and executive direction. The State Plan will be reviewed in January of each year, or more frequently upon the discretion of the Secretary of State, in order to incorporate changes that reflect the State's progress in implementing HAVA and addressing new election-related challenges.

The State will not make any material change in the administration of the plan unless the change is developed and published in the Federal Register in accordance with HAVA Section 255 in the same manner as the original State Plan. Any modifications to this State Plan will be subject to public notice and comment in accordance with HAVA Section 256. The revised State

Plan will take effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register.

Section 12 – Changes to State Plan from Previous Fiscal Year

In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State Plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year.

This State Plan is the Preliminary State Plan required under the Help America Vote Act of 2002 (HAVA). This section will be updated in the next fiscal year, reflecting changes to the State Plan, as well as a summary of the 2003 success.

Section 13 – State Plan Committee

A description of the committee which participated in the development of the State Plan in accordance with HAVA Section 255 and the procedures followed by the committee.

The State Plan Committee was appointed in April 2003 by Secretary of State Nancy L. Worley, Alabama's chief election official (§17-4-250, Code of Alabama). The committee consists of 36 Alabama citizens from throughout the state. There are 19 local elections officials, including the chief election official from Jefferson and Mobile counties. The committee has five representatives of groups of individuals with disabilities and one representative of groups of individuals who speak an alternative language. A list of the committee members are attached to the State Plan as Appendix 1.

The committee held meetings May 7, May 12, and May 21, 2003. These meetings were held in Montgomery, Clanton, and Prattville. The committee reviewed the Help American Vote Act (Public Law 107-252) and provided comments to the Secretary of State. These comments were incorporated into Recommendations from the Committee for inclusion into the State.

Appendix 1 – State Plan Committee Members

Tim Baer
Executive Director, Republican Party

Robert Bates
Circuit Court Clerk, Cullman County

Mike Bolin
Judge of Probate, Jefferson County

Betsy Burkhalter
Pollworker, Talladega County

Lauren Carr
Alabama Disabilities Advocacy Program

Joan Carter
American Association of Retired Persons

T.C. Coley
County Commissioner, Tallapoosa County

Marty Connors
Chairman, Republican Party

Reuben Cook
Alabama Disabilities Advocacy Program

Catherine Crosby
Close-up Foundation

Gayle Crume
Persons with Disability Representative

Barbara Crozier
Governor's Office on Disability

Don Davis
Judge of Probate, Mobile County

Karey DeShazo
Ms. Crume's Assistant

Stephen Goodwin
Deputy Sheriff, Calhoun County

Alba Hernandez
Democratic Hispanic Caucus

Ricky Hill
Elections Supervisor, Jefferson County

Earlean Issac
Judge of Probate, Greene County

T. Michael Jones
Alabama Federation of the Blind

Walta Mae Kennie
County Administrator, Perry County

Joe McEarchern
Chief Probate Court Clerk, Mobile County

Myra McKinney
Elections Clerk, Jefferson County

Jerry Morris
Alabama Education Association

Chad Nichols
Governor's Representative

Anne Permaloff
League of Women Voters

Paul Pinyan
Alabama Farmers Federation

Redding Pitt
Chairman, Democratic Party

Guin Robinson
Mayor, Pell City

Les Sellers
Registrar, Coosa County

Buddy Smith
Registrar, Dale County

Jane Smith
Circuit Clerk, Madison County

Frankie Stone
Registrar, Etowah County

Gloria Strickland
Clerk, Jefferson County

Donald Watkins, Jr.
Youth Representative

Susan Wilson
Circuit Court Clerk, Mobile County

Wallace Wyatt, Jr.
Judge of Probate, St. Clair County

July 21, 2003

"When it comes to election reform and advanced election technology, Alaska is one of the forerunners in this country. We have a few changes to make to our election laws, our voter registration and database, election equipment and accessibility, but I expect that Alaska will be able to make a clean transition into compliance with the federal act."

Lieutenant Governor Loren Leman, State of Alaska

State of Alaska
Division of Elections
Preliminary State Plan

ALASKA STATE PLAN INTRODUCTION

The Lieutenant Governor of Alaska is responsible for the overall direction of the Division of Elections. The Lieutenant Governor appoints a director and under the Director of Elections, the Division is responsible for implementing, planning, and conducting all statewide and federal elections as well as all voter registration activities and maintenance of Alaska's voter registration database.

The Division is divided into four election regions managed by election supervisors. The election supervisors are responsible for voter registration and election management activities for the state house districts in their region, as designated by the director.

Alaska Statute Title 15 and Alaska Administrative Code Title 6 govern the election process in the State of Alaska. Alaska falls under Section 5 of the Voting Rights Act of 1965 which requires U.S. Department of Justice preclearance for any substantive change in the electoral process that directly affects the voter.

The Division of Elections maintains a statewide electronic voter registration database, implemented in 1985, referred to as the Voter Registration and Election Management System (VREMS). Each election office has real-time access to VREMS for viewing and updating data information. The Division processes all voter registration applications in VREMS and assigns each applicant a unique voter registration number. Immediately upon entering information in the system, any state election office can view the information processed. Although Alaska has a statewide voter registration database, the mainframe system is antiquated, costly to maintain, and needs to be replaced.

Alaska has more than 459,000 registered voters. The voting age population is 436,215. Alaska attributes its inflated registration rolls to the fact that Alaska Statute Title 15 allows a person who is temporarily out of state to remain registered in Alaska if that person has the "intent" to return. Because of Alaska's Permanent Fund Dividend program benefits, many Alaskans maintain their residency in Alaska even though they may relocate outside the state. Another contributing factor to inflated voter rolls has been the prohibition in the National Voter Registration Act (NVRA) from "purging" or "inactivating" a voter registration record due to lack of voting. From 1995 through 1998 the only reason Alaska was allowed to remove voters from the statewide voter list was because of death, felony conviction, or a voter registered in another state and Alaska was notified. In 1999, Alaska was able to obtain preclearance from the U.S. Department of Justice to annually conduct list maintenance on the statewide voter registration database following NVRA requirements.

Voter registration is available in each state election office and other numerous locations throughout the State of Alaska. The Director of Elections has appointed as voter registration agencies all Division of Motor Vehicles offices, Public Assistance offices, Armed Forces

Recruitment offices, Municipal Clerks' offices, and various offices that provide services to persons with disabilities. In addition to the registration agencies, voter registration is available in most libraries throughout the State, village council offices, schools, the University of Alaska, and through individually appointed voter registrars. The Division of Elections has also made voter registration applications available on the Division's web site for easy access.

Individuals may register to vote in person, by mail, or by fax machine. Voters must be registered to vote at least 30 days prior to an election. If a voter's registration application is incomplete, the Division notifies the voter and provides the voter an opportunity to properly complete the application. The only exception to the registration deadline is during presidential elections. A voter may register and vote for president on the same day.

Alaska has 40 state house districts and 20 state senate districts. Within these districts there are 446 precincts, each with a designated polling place. Following is a breakdown of voter turnout during the past several general elections:

1996 = 59.1%
1998 = 50.11%
2000 = 60.77%
2002 = 50.53%

Alaska has 159 rural communities with precincts that are isolated from connecting road systems and the only way to physically reach these communities is by airplane or boat. Of the 446 precincts in Alaska, 118 have 100 or fewer registered voters.

In 1998, the Division of Elections replaced all punch-card voting systems used in statewide and federal elections with an optical-scan voting system. Since that time, Alaska has expanded the use of the optical-scan voting system throughout the State. Alaska uses a combination of hand counting and optical-scan ballot tabulators to count ballots throughout the State. There are 163 hand-count precincts and 283 optical-scan precincts. Alaska uses a uniform paper ballot in each precinct regardless of how the ballots are tallied. All absentee, questioned, and special needs ballots voted in Alaska's primary and general elections are counted using the optical-scan ballot tabulators. Currently, there are no precincts in Alaska utilizing direct recording electronic (DRE) voting systems.

There are several alternative voting methods available to Alaska voters who are unable to vote at their assigned polling place. For many voters in remote areas of Alaska the only voting method available is by absentee ballot.

Absentee By Mail – any qualified voter in Alaska may apply to receive an absentee ballot by mail. Alaska statute requires a ballot application to be completed each election year.

Absentee Voting In Person – any qualified voter may vote through an absentee voting official beginning 15 days prior to election day. Alaska has numerous absentee locations available throughout the State. An absentee voting location may have ballots available to voters for a single, multiple, or all 40 house districts.

Absentee Voting by Fax – beginning 15 days prior to election day, any qualified voter may apply for a fax ballot. The ballot is faxed to the voter and the voter may either return the voted ballot by fax or by mail.

Special Needs Voting – if a voter is unable to vote at his or her assigned polling place due to age, illness, or disability, the voter may assign a personal representative to deliver the ballot and other voting material.

Questioned (Provisional) Voting – is available for any voter who does not have identification or is not personally known by the election official, or whose name does not appear on the precinct register at the polling place where the voter is attempting to vote. Questioned (provisional) ballots are delivered to a regional election office for verification of eligibility before being counted.

Each ballot cast using one of the alternative voting methods is sealed inside a secrecy sleeve and the sleeve placed inside an envelope. The outside of the envelope provides for voter information: name, address, identifier, and signature. The voter's ballot envelope is reviewed, the data is entered into VREMS, and the envelope is assigned a sequence number. At the time the ballot envelope is reviewed, VREMS will search other voting activity for the same election and will report if the voter has voted more than once.

In addition to conducting all statewide and federal elections, the Division of Elections is responsible for conducting rural school board, coastal resource area, liquor option, incorporation and consolidation elections in areas of the State that are not incorporated into municipal governments. Although the Division is not responsible for conducting local municipal elections such as borough assembly or city council, the Division provides voter registration, lists of eligible voters, and precinct registers for municipal elections. The Division also assists municipalities by providing for the use of the Division's polling place and ballot counting equipment for local elections.

Although Alaska has already implemented a statewide voter registration database and has replaced all punch-card voting systems, there are several improvements needed to meet the specific requirements of HAVA. Alaska needs to upgrade its voter registration database, implement the use of DRE units, implement new statutory requirements, redesign all versions of its voter registration form and other pertinent election forms and expand training efforts. Statutory changes required for compliance with HAVA passed the Legislature unanimously and were signed into law by the Governor in 2003.

The Alaska State Plan is organized as specified in HAVA, section 254, providing a description of current election procedures used in Alaska and outlining how Alaska will meet the new requirements mandated by HAVA.

Section 1. Title III Requirements and Other Activities

How the State of Alaska will use the requirements payment to meet the requirements of title III, and, if applicable under section 251 (a)(2), to carry out other activities to improve the administration of elections.

1. A Section 301(a), Voting Systems Standards Requirements

The State of Alaska transitioned from a punch-card voting system to an optical-scan voting system in 1998. Currently the State uses two types of voting systems in its 446 established polling locations: a hand-count paper-ballot system is used in 163 precincts, and an optical-scan (Accu-Vote OS 2000) paper-ballot system is used in 283 precincts. Since that time, the State has transitioned an additional 13 communities from hand count to optical scan. The State will continue to expand the use of the optical-scan voting system in hand-count precincts to improve the overall administration of elections.

At the time the State transitioned to an optical-scan voting system, it also transitioned its absentee ballot counting to optical scan.

In 2002, the State enacted legislation requiring that new voting systems purchased allow voters with disabilities to use the systems privately and independently. With the passage of HAVA, the State is required to purchase DRE units for each established polling location. The Division has requested and received a capital appropriation for FY '04 to purchase 55 Accu-Vote Touch Screen (TS) voting units for use in the 2004 elections.

The voting system will be utilized in absentee voting stations located in each of the regional election offices and test sites throughout the State. This will allow for the implementation and testing of the voting system for compatibility with the State's current optical-scan voting system, and properly address any concerns and/or problems prior to implementing the use of the Accu-Vote TS voting units in every precinct in the State.

Once the State is confident that the TS voting system purchased is able to support the needs of the voting community, statewide implementation will be pursued. The State will purchase each Accu-Vote TS unit, complete with a combination carrying case/booth. The carrying case/booth will provide a stable voting platform and a secure container, which will adequately handle the stress of shipping the TS units through the United States Postal Service to remote polling locations. Implementing the use of TS units in each polling location throughout the State will require substantial funding.

An extensive training program will be required for Division of Elections staff. The vendor, as part of the contract, will be providing training and technical support.

Public outreach/training will be required to familiarize the disabled community with the new voting system. Division employees and election officials will also receive awareness training to recognize the special needs of people with disabilities. Alaskans will be informed of the availability of these systems in each polling location. Additionally, the Division will need to coordinate with agencies that provide services for the disabled community to ensure that clients are knowledgeable in the use of the new voting system.

Maintenance

The State will need to provide additional storage facilities for the TS units. Heated and accessible storage facilities will be required for the four regional offices as well as some of the communities that will have multiple units stored at their locations. Funding will be required to accommodate the additional storage requirements.

The State will budget for increased costs associated with shipping election materials to polling locations. Currently the State mails election materials (ballots, supplies, etc.) to 239 of its remote polling locations. In addition to these election materials, at least one TS unit will be shipped to each remote polling location. The cost increase related to the shipment of TS units will be extensive, as it will require mailing an additional 23 pounds (the approximate weight of a TS unit) to each polling location. After the election cycle a majority of the units will be shipped back to regional offices for maintenance and storage. This will be an increase of approximately $35.00 per unit shipped.

The State will establish a maintenance program to ensure the TS units receive required maintenance. This will permit the Division of Elections to conduct periodic maintenance and identify potential problems, make necessary adjustments to the unit, or send the unit to the vendor for more extensive maintenance or repair. The maintenance program may require contractual staffing at some levels to ensure all maintenance requirements are met.

1. B Section 302, Provisional Voting and Voting Information Requirements

The State currently has a provisional voting process established. In Alaska, this process is referred to as "Questioned Voting."

State law requires any voter who votes at a polling location where his or her name does not appear on the precinct register or the voter does not have identification and is not personally known by the election official to vote a questioned ballot.

The State will implement a free-access system to provide voter information. This system will allow the voter to determine if his or her questioned ballot was counted and, if not counted, why the vote or a portion of the vote did not count.

The State will develop two free-access systems, as outlined below:

a. The State currently utilizes an interactive toll-free telephone system that allows voters to determine their assigned polling place based on their current voter registration record. Additionally, voters can determine their party affiliation during the Primary election. The State will expand its current telephone system to allow voters to verify if their vote was counted and if not, why the vote did not count. This system will interface with the voter registration and election management system to access the data specific to the voter.

b. The State currently utilizes its web site on a limited interactive basis that allows voters to check the status of their absentee ballot application. The State will improve its current web site to allow more interaction and enable voters to log-in and verify if their vote was counted and if not, why the vote did not count. This system will interface with the voter registration and election management system to access the data specific to the voter.

Currently, the Division sends a letter to each voter whose vote was not counted or was only partially counted. The Division will continue this practice in addition to the systems outlined above.

The State will develop informational posters and flyers that inform voters at the polling location when voting a questioned ballot is required and the method established to vote a questioned ballot.

Voting Information

The Division of Election, under current State law, is required to mail an *Official Elections Pamphlet (OEP)* to each registered household prior to the General election.

Current State law requires full public notice of an election. This public notice is achieved through newspaper advertisements and posting notices in communities that do not have general circulation of newspapers. Other methods of informing voters include radio advertisements, public service announcements, direct mailings, and information posted on the Division of Elections web site. In addition, there are sample ballots, posters, information flyers and instructions posted in polling locations.

The State will create new media formats that address voting rights under applicable federal and state laws. These formats will provide information on federal and state laws regarding acts of fraud and misrepresentations as well as what to do should voters allege their rights have been violated as required by HAVA.

The State will modify registration, questioned voting, and absentee voting forms as well as other election materials to meet the requirements of HAVA. This will require adapting a significant number of the current forms in use and reprinting these forms on a statewide level. Funding will be required to meet these requirements.

1. C Section 303, Computerized Statewide Voter Registration List Requirements and Requirements for Voters Who Register By Mail

Alaska has a statewide voter registration and election management system (VREMS) in use; however, this is not a fully interactive system. VREMS is an antiquated system, maintained in Natural language and is on a mainframe. As technology has advanced, it has become difficult to find programmers knowledgeable in Natural programming.

A new voter registration and election management system must be implemented to effectively serve the voters of the State. This system must meet new technology requirements and allow for better management capabilities. In previous years, Division of Elections employees looked at systems that were being developed; however, at the time there were no systems that would support a statewide system with real time updates. However, as technological advances occur the State will pursue systems that supports real time updates. There are several methods available to replace the current system:

a. Assess systems that are currently used in other states to determine if there is a system that meets the needs of the State.

b. Assess systems that are being developed or modified to determine if there is a system that meets the needs of the State.

c. Research available database programs to determine if developing a voter registration and election management system would meet the needs of the State.

The State will have to maintain VREMS at its current level and modify the system to meet the requirements of section 303 of HAVA. The State is currently modifying VREMS to track those voters who are initial registrants and register by mail, as well as the additional voter identifying information required by HAVA.

The State will develop a procedure that allows the Division of Elections to match identifying information provided by a first-time, by-mail registrant on his or her registration application to information established in either the Division of Motor Vehicles or the Permanent Fund Dividend Division databases. Funding will be required to permit these agency databases to interact with VREMS and provide the required information.

Section 2. Alaska's Distribution of Requirements Payment

How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of --

(A) The criteria to be used to determine the eligibility of such units or entities for receiving the payment; and

(B) The methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8).

(A) In Alaska, federal elections are conducted by the State of Alaska, Division of Elections. As a result, there will be no distribution of requirements payments to local governments or entities.

The Division serves Alaskans through four regional offices located in Juneau, Anchorage, Fairbanks, and Nome. Funds necessary for improving the elections' system, voter registration, voter access and education, outreach, and training will be managed by the Division of Elections to ensure that regional needs are met and the State is in compliance with the Act.

The criteria foundation will be weighted in terms of achieving compliance, maximizing improvements to all aspects of the election process, and responsible use of available funds. The Division will use standard financial reporting and accounting procedures to track expenditure of authorized funds.

(B) The Division will monitor the funds in accordance with the statewide performance measures adopted under section 254 (a)(8). The Division will centrally manage the distribution of all funds appropriated to the Election Fund, including but not limited to the requirements payments. Priorities and timelines will be incorporated into the budgeting process so that Alaska will implement mandates and improvements in a wise and timely manner.

The State of Alaska is audited annually by the Division of Legislative Audit. The Statewide Single Audit is conducted in accordance with auditing standards generally accepted in the United States of America; Government Auditing Standards, issued by the Comptroller General of the United States; and compliance with the Federal Single Audit Act Amendments of 1996 and the related Circular A-133 issued by the U.S. Office of Management and Budget.

Section 3. Voter Education, Election Official Education and Training, and Poll Worker Training

How the State of Alaska will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of title III.

Voter Education and Outreach

Voter education and outreach efforts in Alaska vary depending on the type of election and level of changes affecting voters. All outreach efforts for statewide and federal elections are coordinated by the Director's office and include numerous public notices, newspaper and radio advertising, public service announcements, direct mail, the production of a quarterly newsletter and other publications (such as brochures), speeches and presentations, and continuous direct contact with the statewide media.

Prior to the General election, each registered household in Alaska receives an *Official Election Pamphlet (OEP)*. Alaska is one of only four states that require, by statute, the production of voter pamphlets with candidate-related information for distribution to the public. The Division of Elections produces a regionally specific guide for each of the four election regions. The *OEP* contains information about candidates appearing on the ballot (including photographs), information about the retention of judges (including photographs), information about ballot measures (including statements of support and opposition), sample ballots, polling place information, absentee and alternate voting information, voter assistance information, and election district maps.

In addition to printed materials, the Division's web site provides a vast array of information on voter registration, election issues, results and history. Alaska currently provides a toll-free telephone system for voters to obtain their polling place location. To meet the requirements of HAVA, this system will be expanded to allow voters to obtain other types of registration and election information.

When new voting systems or election laws are implemented, Alaska increases its outreach efforts. For example, when Alaska instituted an optical-scan voting system in 1998, demonstrations of the new system were conducted as an education tool and a multi-faceted outreach plan was executed. Prior to implementing a new, complex primary election system in 2002, Alaska instituted a well-funded, comprehensive outreach plan aimed at educating voters specifically about primary ballot choices.

Alaska is able to enhance its efforts through positive relationships with the press. Division staff performs radio and television interviews and responds to questions from the print media on a daily basis beginning several months before a statewide election.

Alaska recognizes the need to enhance its outreach and communications program to better educate the voting public. In addition to the public notices required by Alaska statute and the use of additional communication tools, Alaska needs to implement an outreach plan that includes:

- Interactive statewide database.
- Free-access system for voters to obtain voter registration and election information.
- Improved web site.
- Increased delivery of election information through the Rural Alaska Television network.
- Coordinated voter education and awareness efforts with Alaska Native organizations and community groups, including groups providing services to individuals with disabilities.
- Targeted voter education efforts to address the needs of the disabled community and individuals with alternative language considerations.
- Coordinated public outreach/training with organizations assisting the disabled community on use of the new voting systems.
- Improved and increased public notices, public service announcements, and posters used in the polling places.
- Division employees and election officials will receive awareness training to recognize the special needs of people with disabilities.

Election Official Training

Election officials are critical to an efficient, secure, and reliable election process. In Alaska, the regional election supervisors are responsible for providing a comprehensive training program to election officials in their respective regions prior to statewide and federal elections. Training needs are determined by the election supervisors and are community-based and targeted towards the following election officials:

- Precinct election boards
- Absentee voting officials
- Accu-Vote coordinators
- Accu-Vote troubleshooters
- Absentee ballot review boards
- Questioned ballot review boards
- Regional Accu-Vote boards

Improving and implementing statewide training resources and procedures is an ongoing process each election year. Working as a team, the four election supervisors develop uniform training

materials that are coordinated with election official handbooks and distributed with election day ballots and supplies. All training materials and handbooks are created for the type of ballot counting utilized: hand count or optical scan. The inclusion of TS voting units will require new materials to be developed. Training sessions are generally presented in a paper-based format. At this time, there is little use of technology in training presentations.

Alaska faces many unique challenges when providing election official training, especially for polling place officials. Due to the State's vast size and the large number of precincts that are not connected by a road system, our training programs are categorized into two groups: urban and rural.

In order to train precinct polling place officials in rural Alaska, election supervisors and their assistants spend several months prior to an election traveling in small bush planes, ferries and boats to Alaskan communities to conduct training. Due to limited flights scheduled to these remote communities, chartered flights are often required and only one community can be trained per day. This requires training election officials so far in advance of the election that training materials may not be finalized. In addition, election officials may not have been appointed or agreed to serve in all precincts, and those who do receive training may not retain the procedures at the time of the election.

Urban-based training in Alaska is generally conducted closer to the election day. However, travel is required to some communities and these officials are trained 30 – 45 days prior to the election. In our urban areas, training sessions for precinct election boards are usually conducted with multiple election boards present. In some areas, training is presented using a PowerPoint presentation.

With the many challenges Alaska faces to properly train election officials, handbooks for the various types of officials are critical to their ability to conduct their duties correctly. The handbooks must be developed in such a way that if an election official has not received training, the official would be able to clearly understand and implement procedures.

In an effort to ensure all election officials have the training and resources available to allow them to successfully conduct elections, Alaska will develop a systematic approach to training that includes:

- Developing a regional and community-needs comprehensive training plan. This will include acquiring necessary resources for improving training methods and utilizing training coordinators in an effort to bring the rural based training closer to election day.
- Improving training and election day materials and handbooks so they are flexible to accommodate updates and changes, are effective in the trainee's retention of information, and take into consideration the wide variety of skill levels within the training audience.

- Researching and/or implementing training delivery options such as videos, interactive web-based training, and conference style training.
- Recognizing the differences between urban and rural training, and coordinating training needs, methods, and approaches with various Alaska Native organizations to obtain input and guidance on delivering training to individuals with diverse cultural backgrounds.

Section 4. Voting System Guidelines and Processes

How the State of Alaska will adopt voting system guidelines and processes which are consistent with the requirements of Section 301.

The State currently meets most of the voting system requirements required under HAVA as outlined in the attached matrix. The State has procedures established for conducting recounts on a statewide level, as well as state house and state senate levels. The State has a procedure established for system certification. As the State implements a new voting system, we will maintain the current procedure and create new procedures, guidelines and processes as necessary. New processes and guidelines may take the form of internal procedures, regulations or changes to State law.

To attain compliance, the State must provide DRE units to every polling location and has passed legislation that defines what constitutes a vote.

State of Alaska
Division of Elections
Preliminary State Plan

Requirements	Status of Alaska's Current Voting Systems (Meets, partially meets or does not meet)	Planned Action
Section 301. VOTING SYSTEM STANDARDS		
(a) REQUIREMENTS - Each voting system used in an election for federal office shall meet the following requirements (1) IN GENERAL (A)Except as provided in subparagraph (B), the voting system (including any lever voting system, optical-scanning voting system, or direct recording electronic system) shall--		
(i) Permit the voter to verify (in a private and independent manner) the votes selected by the voter on the ballot before ballot is cast and counted;	Meets requirements.	No action necessary.
(ii) Provide the voter with the opportunity (in a private and independent manner) to change the ballot or correct error before the ballot is cast and counted (including the opportunity to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error); and	Meets requirements.	No action necessary.
(iii) if the voter selects votes for more than one candidate for a single office - (I) notify the voter that the voter has selected more than one candidate for a single office on the ballot; (II) notify the voter before the ballot is cast and counted of the effect of casting multiple votes for the office; and (III) provide the voter with the opportunity to correct the ballot before the ballot is cast and counted.	Meets requirements.	No action necessary.
(B) A State or jurisdiction that uses a paper ballot voting system, a punch-card voting system, or a central count voting system (including mail-in absentee ballots and mail-in ballots) may meet the requirements of subparagraph (A)(iii) by--		

Requirements	Status of Alaska's Current Voting Systems (Meets, partially meets or does not meet)	Planned Action
(i) establishing a voter education program specific to that voting system that notifies each voter of the effect of casting multiple votes for an office; and	Meets requirements.	No action necessary.
(ii) providing the voter with instructions on how to correct the ballot before it is cast and counted (including instructions on how to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error.	Meets requirements.	No action necessary.
(C) The voting system shall ensure that any notification required under this paragraph preserves the privacy of the voter and the confidentiality of the ballot.	Meets requirements.	No action necessary.
(2) AUDIT CAPACITY -		
(A) IN GENERAL - The voting system shall produce a record with an audit capacity for such system.	Meets requirements.	No action necessary.
(B) MANUAL AUDIT CAPACITY -		
(i) the voting system shall produce a permanent paper record with a manual audit capacity for such system.	Meets requirements.	No action necessary.
(ii) the voting system shall provide the voter with an opportunity to change the ballot or correct any error before the permanent paper record is produced.	Meets requirements.	No action necessary.
(iii) the paper record produced under subparagraph (A) shall be available as an official record for any recount conducted with respect to any election in which the system is used.	Partially meets requirements.	Will need to develop procedures for conducting recounts using the Accu-Vote TS voting units.
(3) ACCESSIBILITY FOR INDIVIDUALS WITH DISABILITIES - The voting system shall--		

Requirements	Status of Alaska's Current Voting Systems (Meets, partially meets or does not meet)	Planned Action
(A) be accessible for individuals with disabilities, including non-visual accessibility for the blind and visually impaired, in a manner that provides the same opportunity for access and participation (including privacy and independence) as for other voters;	Does not meet.	The State will meet this requirement upon installation of a TS unit in each polling location and updating accessibility studies.
(B) satisfy the requirement of subparagraph (A) through the use of at least one direct recording electronic voting system or other voting system equipped for individuals with disabilities at each polling place; and	Does not meet.	The State will purchase TS units with funding provided under HAVA.
(C) if purchased with funds made available under title II on or after January 1, 2007, meet the voting system standards for disability access (as outlined in this paragraph).	Not applicable.	
(4) ALTERNATIVE LANGUAGE ACCESSIBILITY - The voting system shall provide alternative language accessibility pursuant to the requirements of Section 203 of the Voting Rights Act of 1965 (42 U.S.C. 1973aa-1a).	Meets requirements.	No action necessary.
(5) ERROR RATES - The error rate of the voting system in counting ballots (determined by taking into account only those errors which are attributable to the voting system and not attributable to an act of the voter) shall comply with the error rate standards established under section 3.2.1 of the voting systems standards issued by the Federal Election Commission which are in effect on the date of the enactment of this Act.	Meets requirements.	No action necessary.
(6) UNIFORM DEFINITION OF WHAT CONSTITUTES A VOTE - Each State shall adopt uniform and nondiscriminatory standards that define what constitutes a vote and what will be counted as a vote for each category of voting systems used in the State.	Legislation was passed in 2003 to meet the requirements of the Act.	The law will be submitted to DOJ for preclearance.

Section 5. Alaska's HAVA Election Fund

How the State will establish an election fund described in subsection (b) for purposes of administering the State's activities under this part, including information on fund management.

In accordance with State law and in coordination with the Department of Administration, Division of Finance, and the Department of Revenue, Division of Treasury, the Division of Elections will establish an election fund within the State's treasury whose appropriations are accounted for separately within the State accounting system. This fund will contain both federal and general funds. Accounting structures will be in place to ensure federal fund receipts and expenditures are tracked separately from the general funds portion relating to the 5% State match required under HAVA. The election fund will consist of the following amounts:

a. Amounts appropriated or otherwise made available by the State for carrying out the activities for which the requirements payment is made to the State under this part.

b. The requirements payment made to the State under this part.

c. Such other amounts as may be appropriated under law.

d. Interest earned on deposits of the fund.

The Governor's Finance Officer and the Division of Elections' Administrative Officer will work with the Department of Administration, Division of Finance to ensure compliance with all mandated fiscal controls and policies.

Section 6. Alaska's Budget for Implementing HAVA

The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on--

(A) the costs of the activities required to be carried out to meet the requirements of title III;

(B) the portion of the requirements payment which will be used to carry out activities to meet such requirements; and

(C) the portion of the requirements payment which will be used to carry out other activities.

There are two major forms of election reform funding: ***election reform payments*** and ***requirements payments***. While the *election reform payments* for federal FY '03 are fully funded at $650 million, it is important to note that the *requirements payment* amount appropriated for federal FY '03, $830 million, is significantly less than the $1.4 billion authorized. The federal funds for FY '04 are based on current information regarding the President's proposed budget for HAVA. FY '05 funds reflect the authorizations as described in section 257 (a) of HAVA.

Payments authorized under title I of HAVA for *election reform payments* include three components: *administration of elections*, *payments to replace punch card and lever voting machines* and *the small state minimum.* Alaska's portion of federal funds for FY '03 under title I section 101, the "Early Payment," is for improving the administration of elections and is determined by the *"small state minimum"* of $5 million (*see additional notes 1*).

The requirements payments available to Alaska through federal FY '05 are calculated by multiplying the total available amount of federal funding in that year by 1/2 of 1 percent. These payments require a 5% State match for all funds spent in each fiscal year. However, the State may draw down funds each fiscal year without providing the match if the State's election plan accounts for the 5% funds in future use. The State's requirements payment is calculated as the 5% State match portion plus Alaska's requirements payment portion. To determine the 5% State match based on the federal requirements payment, multiply Alaska's requirements payment portion by .0526 (5 divided by 95).

Table 6.1 outlines the portion of funds available according to the FFIS report dated March 5, 2003 and the authorization stated in section 257 (a) of HAVA for FY05.

Table 6.1

Federal Fiscal Year	Available Federal Funds	Alaska's Requirement Payment Portion	5% State Match Requirement
(§101) Early Payment	$650,000.0 (appropriated)	$5,000.0	None
(§252, 257) 2003	$830,000.0 (appropriated)	$4,150.0	218.3
(§252, 257) 2004	$490,000.0 (President's budget authorized $1,000.0)	$2,450.0	128.9
(§252, 257) 2005	$600,000.0	$3,000.0	158.0
Total	$2,570,000.0	$14,600.0	505.2

Alaska's budget in Table 6.2 is based on the levels of funding as shown in Table 6.1 and represents the cost of implementing requirements of title III and "other" activities as specified in title I of HAVA through calendar year 2005. Costs associated with the maintenance and operations of implementing these requirements are also reflected in the budget. It is important to note that the maintenance and operation costs associated with these requirements will have an impact on the State's budget in future years when federal funding is no longer available.

Table 6.2

HAVA Requirements	Estimated Total Cost	Source of Funding			Implementation Period
Title III Requirements		§ 101	§ 252 & 257	State 5% Match	
(§301) Voting System	$4,500.0		$4,263.3	$225.0	FY2003 to FY2006
(§302) Provisional Voting and voting information requirements	$550.0		$521.0	$27.50	FY2003 to FY2004
(§303) Computerized statewide voter registration list requirements and requirements for voters who register by mail.	$7,000.0	$2,805.0	$3,974.0	$210.0	FY2003 to FY2004
"Other" activities					
(§254 (3)) Voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of title III.	$1,250.0	$1,250.0			FY2003 to FY2006
(§402) Establish a State-based *HAVA* administrative complaint procedures to remedy grievances	$80.0	$80.0			
(§704) Improvements to military absentee voting program	$25.0	$15.0	$09.5	$.500	
(§101) Management of State Plan	$300.0	$100.0	$189.5	$10.0	FY2003 to FY2005
(§101 (1)(H))Technology planning/improvements	$400.0	$250.0	$142.1	$07.5	FY2003 to FY2006
(§101 (1)(H)) Polling place accessibility	$1,000.0	$500.0	$473.7	$25.0	FY2003 to FY2006
TOTALS	**$15,105.0**	**$5,000.0**	**$9,600.0**	**$505.5**	

Additional notes for title III requirements:

(1) Voting System - Alaska purchased an optical-scan voting system in 1998 to replace its punch-card voting system. Alaska has 446 voting precincts. 64 percent of the precincts are equipped with optical scan and 36 percent are hand count. The estimated $4.5 million will be used to implement the HAVA compliant DRE voting system and to purchase additional optical-scan units for a portion of Alaska's precincts. Installation, training and maintenance costs are included in this figure.

Alaska purchased its statewide optical-scan voting system, which replaced the punch-card voting system, prior to November 2000; therefore, Alaska is not eligible to seek reimbursement under the *payments to replace punch card and lever voting* component for these expenditures. However, outside of HAVA, there is a separate appropriation which includes $15 million in funds to states who purchased optical-scan voting systems prior to the 2000 election. So far only five states, which include Alaska, are eligible for compensation from the $15 million fund. Alaska's portion may be used as reimbursement to the State's general fund for the cost of purchasing the optical-scan voting system for a approximately $1.1 million.

(2) *Provisional Voting* - A type of provisional voting (questioned voting) has been available to voters in Alaska since the early 1980s. There will be minimal changes needed in order to meet the provisional voting requirements of the Act.

(3) *Computerized Statewide Voter Registration System* - Currently Alaska has a mainframe based statewide Voter Registration and Election Management System (VREMS) that has been in place for 17 years and is antiquated. This is no longer cost effective for the State to maintain due to the "Natural" language it is written in and the complexity of the program. The State will use the estimated $7.5 million in funds to research and purchase a statewide voter registration and election management system that is conducive to the State's administration of elections and is cost effective to maintain and improve.

The estimated costs associated with implementing the requirements in HAVA are based on the funding information available at the time that this plan was written. The budget will be revised appropriately to reflect the most current information available regarding federal funding, according to changes that may be made in the implementation schedule.

Section 7. Maintenance of Effort

How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.

In accordance with HAVA section 254 (a)(7), Alaska will maintain the same level of expenditures on similar activities funded by the requirements payment that was spent in the fiscal year ending prior to November 2000. Alaska's expenditures for these activities totaled $537,500.

The Division of Elections administers all state and federal elections. These elections occur in an even calendar year. The Division receives an increment to the annual operating budget in an odd fiscal year beginning July 1 in order to conduct primary and general elections. This increment provides for the expenditures associated with election officials, polling place recruitment, temporary employees, ballot printing and distribution, election supplies, election day support, and other costs associated with conducting an election.

Other expenditures in an even-numbered calendar year are spent in preparation of election activities that occur after July 1. These activities include election official training, voter education, advertising, information technology support, and the purchasing of equipment and supplies. The maintenance of effort for the State's FY '00 represents a portion of the total operating budget that is appropriated to carry out election administrative activities in an even fiscal year.

The State Legislature appropriated adequate funding in Election's FY '04 1.7 million-dollar budget to maintain the level of expenditures related to our Maintenance of Effort.

Section 8. HAVA Performance Goals and Measures

How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.

The Division of Elections will establish performance goals in conjunction with the Alaska State Legislature during the deliberation of the annual operating budget. The "Missions and Measures" process undertaken by the Legislature in concurrence with the consideration of the annual operating budget has been established as a respected means for developing performance measures that accurately quantify program success.

The Director of the Division of Elections, as the "chief State election official" under section 253(e), is responsible for coordination of the State's responsibilities under this Act. As a result, the Director is ultimately responsible for ensuring that each performance goal is met. In addition, the Legislature will be monitoring the Division's efforts through the annual preparation of the State's operating budget.

Plan Elements	Official	Time frame
Voting Systems §301	Director of Elections	To be implemented by January 1, 2006
Provisional Voting §302	Director of Elections	To be implemented by January 1, 2004
Voter Registration §303(a)	Director of Elections	§303(a) is implemented
§303(b)		§303(b) to be implemented by January 1, 2004
Other Activities §101 (b)(1), §251 (b)(2)		
Technical Infrastructure		TBD by DOE
Free-Access System		TBD by DOE
Education and Training §254(a)(3)	Regional Supervisors	TBD by DOE
Budget and Fiscal Controls §254(a)(2) §254(a)(6) §254(a)(7) §254(a)(10)	Administrative Officer	TBD by DOE
Complaint Procedures §254(a)(9) §402	Director of Elections in conjunction with Department of Law	To be implemented by January 1, 2004

Section 9. State-based Administrative Complaint Procedure

A description of the uniform, nondiscriminatory State-based administrative complaint procedure in effect under section 402.

The State of Alaska, Division of Elections has developed administrative regulations to establish the required complaint procedure. These regulations will constitute a new article that will be part of the Division's administrative regulations set out at Title 6 of the Alaska Administrative Code.

These regulations satisfy the requirements of HAVA section 402 by providing a uniform and nondiscriminatory complaint procedure. Under these procedures, any person who believes there has been a violation of HAVA title III may file a complaint. The complaint must in writing, sworn, and notarized. At the complainant's request, there will be a hearing on the record. If the State finds a violation, it shall provide an appropriate remedy. If there is no violation, the complaint will be dismissed and the results will be published. The State will make a final determination on a complaint within 90 days, and if the State cannot meet this deadline, the complaint will proceed under alternative dispute resolution procedures.

The Division is now in the process of adopting these administrative regulations, and anticipates that the regulations will be in effect by the required deadline.

Section 10. Effect of Title I Payments

If the State received any payment under title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

Under section 103, Guaranteed Minimum Payment, Alaska received the minimum payment of $5 million and has established an Election Fund.

Any activities carried out under the Plan will be aimed at improving the administration of elections for federal office and the election process as a whole.

Upon receipt of title I monies, it is the intent of the Division of Elections to use the funds for one or more of the following:

- **Developing the State plan for requirements payments to be submitted under part 1 of subtitle D of title II.**

  While an outside contractor was not hired to produce the State Plan in order to minimize costs, the Division is tracking costs associated with the related process.

- **Educating voters concerning voting procedures, voting rights, and voting technology.**

  A preliminary investment is needed to increase voter outreach through voter education, public service announcements, and community events. Modifications to the Division's forms web site, free-access systems, and training materials used by voters are necessary to comply with the Act.

- **Training election officials, poll workers, and election volunteers.**

  The Division will begin to develop improved training systems with the goal of training more election officials closer to an election. The challenge will be to train so many people with diverse physical, social and cultural differences across a vast area in a limited time frame.

- **Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.**

  Improvements will need to be made to VREMS, the Division's voter database, in order to comply with title III while planning for the purchase and implementation of a new voter registration and election management system.

- **Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.**

  The Division will begin updating and modifying polling place accessibility studies. Develop a detailed plan, with the assistance of the State Americans with Disabilities Act (ADA) Coordinator to reassess current polling place locations for increased accessibility. Increased outreach to remote areas of Alaska may require an initial investment of these monies.

- **Establishing free access systems for voters to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.**

  The Division currently uses an interactive toll-free telephone system for voters to verify their polling location and party affiliation. Improving this current system or creating a new free access system to expand the options available to voters will be made through available funding provided under this Act.

State of Alaska
Division of Elections
Preliminary State Plan

Section 11. Alaska's HAVA State Plan Management

How the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change—

(A) is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;

(B) is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and

(C) takes effect only after the expiration of the 30-day period that begins on the date the change is published in the Federal Register in accordance with subparagraph (A).

The Director of the Division of Elections, as the "chief State election official" under section 253(e), is responsible for coordination of the State's responsibilities under this Act. As a result, the Director is ultimately responsible for the ongoing management of the Plan.

The State Plan will be an essential component in the Division's continuing efforts to improve accessibility and accountability in the election process. Alaska has already implemented many aspects of HAVA, and the Division sees the ongoing management of the State Plan as a continuation of the State's commitment to election reform. Each element will be managed for achieving compliance, maximizing improvements to all aspects of the election process, and responsible use of available funds.

The State understands and agrees to comply with HAVA requirements related to ongoing management of the State Plan. More specifically, the State agrees that it may not make any material change in the administration of the State Plan unless the change:

(A) is developed and published in the Federal Register in accordance with HAVA section 255 in the same manner as the State Plan;
(B) is subject to public notice and comment in accordance with HAVA section 256 in the same manner as the State Plan; and
(C) takes effect only after the expiration of the 30-day period that begins on the date the change is published in the Federal Register in accordance with subparagraph.

Section 12. Changes to State Plan from Previous Fiscal Year

In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year.

This is Alaska's 2003 State Plan, and is the State's initial plan. As a result, there are no changes or successes to report related to the implementation of HAVA.

Section 13. State Plan Development and Committee

A description of the committee that participated in the development of the State Plan in accordance with section 255 and the procedures followed by the committee under such section and section 256.

The draft of Alaska's State Plan was created by the Division of Elections with the legal guidance of the State's Attorney General's Office. It was distributed to members of the State Plan Committee for discussion and input.

Two public meetings were conducted on March 26 and April 10, 2003. These meetings of the State Plan Committee were held telephonically. The meetings were noticed in accordance with Alaska's public notice requirements.

The preliminary version of the State Plan was made available for public inspection and comment for 30 days (April 28 through May 28, 2003) and public comments were taken into account when final preparations of the Plan were made in accordance with section 256 of the Act.

Additionally, a statewide teleconference was advertised and conducted in order to afford the public an opportunity to provide comment to the Division of Elections on May 23, 2003.

The State Plan Committee members were selected to reflect a cross section of election stakeholders throughout the State, in accordance with section 255 of the Act.

The Lieutenant Governor named the following Alaskans to serve on the State Plan Committee:

Laura Glaiser, Director of the Division of Elections, who will chair the Committee and is ultimately responsible for the development and implementation of the State Plan

Pam Crowe, Region I Election Supervisor, Division of Elections

Doug Pryor, Region II Acting Election Supervisor, Division of Elections

Mona Lisa Drexler, Fairbanks North Star Borough Municipal Clerk

Katy Suiter, City of Ketchikan Municipal Clerk

Jim Beck, Executive Director, Access Alaska

Lynne Koral, President, Alaska Independent Blind

Joanne Baker, Member, Anchorage League of Women Voters

Major Tim Nelson, Elmendorf Installation Voting Officer

Gene Therriault, Senate President, Alaska State Legislature

Donny Olson, State Senator, Alaska State Legislature

John B. Coghill, House Majority Leader, Alaska State Legislature

Mary Kapsner, State House Representative, Alaska State Legislature

Tara Sweeney, Rural Affairs Assistant to the Governor

Sarah Felix, Assistant Attorney General, State of Alaska

Mario Lim, Representative from the Alternative Language Community

TERRITORY OF AMERICAN SAMOA

Preliminary State Plan

As required by Public Law 107-252
Help America Vote Act 2002, Section 253(b)

Soliai T. Fuimaono
Chief Election Officer
P. O. Box 3970
Pago Pago, American Samoa 96799

January 30, 2004

INTRODUCTION BY THE CHIEF ELECTION OFFICER

Section 253(b) of the Help America Vote Act of 2002 (HAVA) requires each State and Territory to develop a long-range plan for implementing HAVA. The Act significantly reforms the election process for federal elections, and American Samoa welcomes the opportunity to be a part of the process.

I am pleased to report that American Samoa currently complies with most of the requirements of HAVA. This Preliminary State Plan serves as the framework for continuing progress in election reform, and achieving full compliance with those portions of HAVA for which American Samoa is not yet in compliance.

This Preliminary State Plan will be updated on an annual basis. The Election Office, through its in-house HAVA Coordinator, and the State Plan Committee, will continue their efforts to fulfill the intent of HAVA.

Soliai T. Fuimaono
Chief Election Officer

I. INTRODUCTION

The Help America Vote Act (HAVA) was signed into law on October 29, 2002 by the President of the United States. HAVA requires each State and Territory to develop a comprehensive plan for implementing mandates aimed at improving the conduct of elections.

Each plan must address the following:

* Provide for disabled voters the opportunity to vote independently through the use of at least one (1) Direct Recording Electronic (DRE) voting system in each polling place.

* Implement a system of provisional voting.

* Provide a complaints process where voters are entitled to a public hearing after filing a valid notarized complaint.

* Establish a statewide voter registration system.

* Establish a toll free number for voters to call to receive pertinent voting information.

The following State Plan for the Territory of American Samoa was developed in accordance with Section 254 of HAVA and under the direction of the Chief Election Officer. America Samoa's plan establishes a framework for the Territory to continue progress that was already in place before HAVA, and to achieve compliance with HAVA.

Because HAVA may have a profound impact on some aspects of the voting process in our Territory, we anticipate that this Plan will require updating and refining over the upcoming years to address changes and developing requirements.

II. BACKDROP FOR AMERICAN SAMOA'S STATE PLAN

Pursuant to American Samoa Code Annotated (ASCA), Title 6, the Chief Election Officer is responsible for the supervision of all elections in the Territory. American Samoa has had and continues to have a territory-wide, uniform, and standardized election system – something HAVA mandates each State and Territory to have. All services are provided in a uniform and nondiscriminatory manner.

A. Overview

The Territory of American Samoa consists of seven islands, six (6) of which are inhabited: the main island of Tutuila, the island of Aunu'u, the Manu'a islands of Ta'u, Ofu and Olosega, and Swains Island. The population on each island (based on the American Samoa Statistical Yearbook 2000) is as follows:

Tutuila	55,400
Aunu'u	476
Ta'u	873
Ofu	289
Olosega	216
Swains	37

B. Election Contests

The following election contests are concurrently held: federal election contests and territorial elections. These elections are held in even numbered years.

Federal Contests:

Delegate to the U.S. House of Representatives (1 seat)

Territory-wide Contests:

Governor (1 seat)
Lieutenant Governor (1 seat)
Representatives (20 seats)

Ballot issues include amendments to the Revised Constitution of American Samoa.

C. Voter Registration

Voter registration from 1994 to 2002 were (numbers based on General Elections):

2002	14,778
2000	15,598
1998	14,526
1996	14,498
1994	11,138

D. Voter Turnout

Voter turnout numbers from 1994 to 2002 were (numbers based on General Elections):

2002	10,394
2000	12,080
1998	9,415
1996	11,088
1994	10,236

E. Polling Stations

In 2002, there were forty-five (45) polling stations territory-wide. In 2004, the Election Office does not anticipate a change in the total number of polling stations.

The number of registered voters assigned to a polling station in 2002 ranged from 87 to 1,307.

F. Vote Counting

American Samoa has had and continues to have a uniform, standard, and territory-wide election system, something HAVA mandates each State and Territory to have.

American Samoa uses paper ballots, which are counted manually at each polling station upon the close of polls. Paper ballots are used in every polling place, as well as at the absentee walk-in polling place (early voting site) located at the central Election Office. The processing and tabulation of the absentee mail ballots are handled by the staff at the central Election Office. The consolidation and distribution of election results are carried out at the central Election Office.

G. Absentee Walk-In Polling Place (Early Voting Site)

Absentee voting commences when the candidates are certified, and the ballots are printed. An absentee walk-in polling place is maintained at the central Election Office for early voting. The site opens upon commencement of absentee voting and closes at 4:30 p.m. on the day prior to the election.

H. Polling Station Officials

Territory-wide training of approximately 250 polling station officials begins in early October and continues through November of an election year. The Election Office conducts all training sessions. Close to one-third (a) of polling station officials from a previous election are usually hired back to conduct subsequent elections.

American Samoa's State Plan as presented herein is limited to the extent local appropriations are made available and based on the assumption that adequate federal funding will be appropriated. American Samoa intends to fully comply with HAVA; however, if adequate federal funding is not made available, the manner in which the funds are dedicated may be altered from the information contained in this State Plan.

III. STATE PLAN REQUIRED ELEMENTS (HAVA §254)

From start to finish, American Samoa's election system is built around the standards of accuracy, transparency, security, accountability, integrity and replicability. These standards serve as the bases for the development and implementation of this State Plan.

A. Title III Requirements and Other Activities

Section 254(a)(1) requires a description of how the State will use the requirements payment to meet the requirements of Title III, and, if applicable under §251(b)(2), to carry out other activities to improve the administration of elections. Title III requires the establishment of certain voting system standards, provisional voting, public posting of voting information, a computerized statewide voter registration list, and voter registration application modifications.

1. Voting System Standards Requirements

Section 301(a) establishes several voting system standards which must be met by January 1, 2006. Under this section, no waiver of the requirements is permitted.

HAVA requires each voting system to:

* Permit voters to verify whom they voted for and make changes to their vote in a private, secret, and independent manner;
* Notify voters if they have overvoted, what happens in instances of an overvote, and provide the opportunity to correct the ballot;
* Ensure that any notification to the voter maintains the privacy, secrecy, and independence of the voter's ballot;
* Produce a permanent paper record with manual audit capacity;

* Be accessible for the disabled through the use of at least one (1) Direct Recording Electronic (DRE) voting system placed at each polling place;

* Provide alternative language accessibility pursuant to §203 of the Voting Rights Act of 1965;

* Comply with error rates in effect by the Federal Elections Commission (FEC); and

* Have a definition of what constitutes a vote and what will be counted.

Since American Samoa began conducting gubernatorial elections in 1977, it has had uniform and standard procedures territory-wide. Pursuant to ASCA, the Chief Election Officer is responsible for supervising all elections in American Samoa. Procedures have been developed and implemented territory-wide which address all operational areas of elections.

American Samoa uses a single, uniform, territory-wide voting system. Presently, paper ballots are used in every polling place (as well as the early voting site, and for absentee mail ballots). All ballots have instructions printed thereon in both English and Samoan. The voter is informed to vote for a single candidate for a single office. The voter is able to view his choice before casting a ballot. Furthermore, ASCA allows a voter to obtain a replacement ballot by returning the ballot that was completed in error.

Upon the close of polls, all ballots are manually counted and the results tabulated at each polling station. All candidates or their designees, observers, voters, the media and any interested person may witness the public counting of the ballots. This practice aids in the efficiency and security of the Election Office's administration of elections. The results of each polling station are forwarded to the central Election Office, where Election Office staff verify the tabulations before announcing the results live on territory-wide television.

ASCA currently allows a physically disabled or visually impaired or illiterate voter, who is unable to mark his ballot, to be assisted by two election officials, or a person of the voter's choice, in the marking of a ballot. To satisfy the HAVA requirement that "any voter may have the opportunity to vote independently," American Samoa intends to allow individuals with disabilities access to the polling places by instituting a

voter system equipped for such individuals. The Election Office will work closely with the Office of Protection and Advocacy for the Disabled to identify the voter system that best suits American Samoa voters' needs.

Additionally, American Samoa will conduct voter education to educate individuals on what constitutes a vote, the effect of casting multiple votes for an office, and the procedure for correcting an error through the issuance of a replacement ballot.

Requirements payment will also be used for maintaining, modifying, and improving the voting system in American Samoa to ensure compliance with HAVA §301(a) standards.

2. Provisional Voting and Voting Information Requirements

Section 302 requires the establishment of provisional voting and the posting of voting information at polling places by January 1, 2004. Under this section, no waiver is permitted.

HAVA identifies voters who may vote using a provisional ballot. They are as follows: 1) a voter who declares that he or she is a registered voter in the jurisdiction and is eligible to vote in an election for Federal office, but whose name does not appear on the official list of registered voters at the polling place; or a voter who the election official assert is not eligible to vote; or a voter who registered by mail and is a first-time voter in the jurisdiction but who appears at the polling place without proper identification; and 2) a voter who votes in an election for federal office pursuant to a federal or state court order or any other order extending the time established for closing the polls.

While there is no local law that permits provisional voting, ASCA provides a challenge process to ensure that registered voters who appear at the polling place but are not in the register of voters, may resolve their voter registration problems. Polling station officials are trained to contact the central Election Office to search the voter registration database to determine if the individual is registered to vote. Any voter who is not found in the voter registration system is allowed to cast a "challenged" ballot. Determination reached in this process may be appealed to a Board of Registration, and, ultimately, the High Court of American Samoa.

American Samoa will comply with the requirements of HAVA as outlined in § 302. Voters will be notified by polling station officials that they may vote a provisional ballot. Voters will complete an affidavit in which the individuals affirm under penalty of perjury that they are registered in the

jurisdiction in which the individual desires to vote and is eligible to vote in that election.

Voters will be provided "free access" to learn if their ballots have been counted. In addition, any voter whose ballot is not counted will be provided a reason for that action. All responses to provisional voters will be confidential.

In addition to provisional voting requirements, § 302 of HAVA mandates that a sample ballot and other voting information be posted at the polling place on election Day. The Election Office will design the materials to be posted. Requirements payment will be used to develop, print and post this information.

3. Computerized Territory-wide Voter Registration List and Requirements for Voters Who Register by Mail

Section 303 requires the establishment of a computerized statewide voter registration list, first time voters who register by mail to provide identification when they cast their ballots, and changes to be made to the voter application by January 1, 2004. A waiver is permitted to extend compliance with §303(a) to January 1,2006.

Presently the guidelines for voter registration (process, context, and parameters) are set forth in ASCA. Procedures and policies are set by the Election Office.

American Samoa's existing voter registration system is a "single, uniform, official, centralized" computerized territory-wide voter register as required by HAVA. American Samoa's voter registration system has always been centralized and has been maintained by the Chief Election Officer. The Election Office staff conduct all registrations by obtaining necessary documents for eligibility (i.e. certified copy of birth certification, U.S. passport, photo ID, etc.), and by maintaining copies of such eligible documents on file. The Election Office staff is responsible for inputting the data and for maintaining the computerized register of voters.

Upon registration, voters are issued Voter Registration Cards (VRC) to serve as identification at the polls. A VRC contains a photograph of the registered voter, the voter's name, the voter's unique Voter Registration Number (VRN), the district where the voter is entitled to vote, as well as other pertinent information. In it's efforts to prevent counterfeit VRCs, the Election Office has purchased a new digital camera and accompanying software to produce VRCs that will replace the laminated VRCs currently

issued to registered voters.

Registration is conducted throughout the year by Election Office staff. Besides maintaining office hours at the central location, Election Office staff also conduct registration in villages throughout the islands. Election Office staff also visit high schools in the months of April and May as part of the effort to register eligible graduating seniors before they leave American Samoa for college or the military.

American Samoa currently accepts the Federal Post Card Application (FPCA) for purposes of mail-in registration and requests for absentee ballot. Upon receipt of a FPCA for registration, the Election Office staff conducts a verification of eligibility process (i.e. U.S. citizenship, residency, etc.) before the individual is registered as a voter. In addition, the Election Office will design mail-in voter registration and other forms. These will be posted on the Election Office's website to allow off-island individuals to download the forms, complete them and send them to the Election Office.

4. Minimum Requirements

American Samoa understands that the requirements in HAVA Title III are minimum requirements and that American Samoa may establish election technology and administration requirements that are more stringent. Any more stringent requirement that American Samoa imposes will comply with Title III requirements, as well as the laws described in HAVA § 906.

5. Methods of Implementation Left to the Discretion of the Territory of American Samoa

American Samoa chose various means to comply with the requirements of HAVA Title III. Specific details on the implementation methodology chosen can be found in the foregoing sections 1 through 3 above.

6. Adoption of Voluntary Guidance by Commission

Once the federal Election Assistance Commission (EAC) has issued its voluntary recommendations with respect to Title III, American Samoa will consider that guidance in updating the State Plan. American Samoa will incorporate those recommendations deemed appropriate into subsequent versions of the State Plan.

7. Process for Adoption

American Samoa will stay aware of the progress of the EAC on developing the Title III recommendations. If appropriate, American Samoa will provide feedback during the public comment period after recommendations are published in the Federal Register and participate in public hearings regarding the recommendations.

8. Other Activities to Improve the Administration of Elections [§ 251 (b)(2)]

a. Development of Staff

Staff at the Election Office does not readily have access to continuing professional education and contact with other election administrators in the U.S. American Samoa would be well served by encouraging their professional development through continuing professional education.

Requirements payments will be used to support training and professional certification.

b. Section 261 Payments to States and Units of Local Government To Assure Access for Individuals with Disabilities

The Election Office, in conjunction with the Office of Protection and Advocacy for the Disabled (OPAD), has applied for a grant pursuant to §261 of HAVA. The plan calls for the following:

* Ensure that all polling places are accessible.

* Provide territory-wide training to voters with full range of disabilities, and utilizing trainers with disabilities, to embrace privacy and independence in the voting process.

* Develop and implement training curricula and educational materials for election officials and polling station officials.

* Provide individuals with the full range of disabilities with information about the accessibility of the polling places.

It is proposed that requirements payments will be used to provide a project coordinator for program development, implementation, and territory-wide coordination of this project. As detailed in section K of this State Plan, this same individual will have other HAVA-related responsibilities.

Requirements payments will also be used for equipment, materials, and supplies to assure accessibility to the polling place for individuals with disabilities.

[See Attachment A]

B. Distribution of Requirements Payments & Eligibility for Distribution

Section 254(a) (2) requires a description of how the State or Territory will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State or Territory for carrying out the activities described in § 254(a)(1), including a description of:

-the criteria to be used to determine the eligibility of such units or entities for receiving payment; and

-the methods to be used by the State or Territory to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under §254(a)(8).

All elections and related activities in American Samoa are conducted by the Election Office. No units of local government or any other entity are authorized to conduct elections within the Territory. Therefore, the Election Office will be managing and monitoring the performance of activities funded by the requirements payments. The Election Office will also be accountable for all expenditures, funding levels, program controls, and outcomes. All applicable local and procurement laws regarding the use of the requirements payments will be followed.

C. Voter Education, Election Official and Poll Worker Training

Section 254(a)(3) requires a description of how the State or Territory will provide for programs for voter education, election official education and training, and poll worker training which will assist the State or Territory in meeting the requirements of Title III.

The Election Office intends to improve on its existing voter education program. Currently, the voter education program consists of passive information in the form of FACTSHEETS (hard copy and electronically on the website), brochures, and public service announcements (PSA). Besides information about the candidates

and the issues, voters also need information on the process of registration and voting. Information given at the polls represents the very last step in an education process that begins with civic education in the schools.

A voter education program will be developed to inform citizens:

* how to register to vote and confirm their registration status;

* where and when to vote;

* how to cast a valid ballot; and

* their rights as voters.

The Election Office will embark on a more active outreach program, but still retain the FACTSHEETS and brochures. This would be accomplished by informational programs on the local television station, participation in high school civic classes, and newspaper publication of upcoming election events and dates. In addition, the Election Office will use civic and advocacy groups, community organizations, candidates, the media, and election officials to educate the voters.

Requirements payments will be used for the purposes of materials development and outreach activities.

D. Voting System Guidelines and Process

Section 254(a)(4) requires a description of how the State will adopt voting system guidelines and processes which are consistent with the requirements of § 301.

Section 301 requires each voting system to:

* Permit voters to verify whom they voted for and make changes to their vote in a private, secret, and independent manner;

* Notify voters if they have overvoted, what happens in instances of an overvote, and provide the opportunity to correct the ballot;

* Ensure that any notification to the voter maintains the privacy, secrecy, and independence of the voter's ballot;

* Produce a permanent paper record with manual audit capacity;

* Be accessible for the disabled through the use of at least one (1) Direct Recording Electronic (DRE) voting system placed at each polling place;

* Provide alternative language accessibility pursuant to §203 of the Voting Rights Act of 1965;

* Comply with error rates in effect by the Federal Elections Commission (FEC); and

* Have a definition of what constitutes a vote and what will be counted.

ASCA specifies the voting system (i.e. paper ballots) and the manner in which the votes must be counted and certified. Except for DRE voting system, the statutes are consistent with the requirements of § 301. The Election Office also complies with the High Court of American Samoa's decision on what constitutes a vote.

E. American Samoa's HAVA Fund Management

Section 254(a)(5) requires a description of how the State or Territory will establish a fund described in subsection (b) for purposes of administering the State's or Territory's activities under this part, including information on fund management.

At the request of the Election Office, the Department of Treasury has created an account into which Section 101 funds were deposited. The same arrangement will be requested for requirement payments that are received. The 5% match will also be deposited into this latter account. Unspent federal funds in this latter account will be set aside in the Section 101 fund for payment of long-term costs of complying with HAVA.

The Election Office will work with the Office of Planning and Budget, and the Department of Treasury to follow and enforce all mandated fiscal controls and policies.

F. American Samoa's HAVA Budget

Section 254(a)(6) requires the State's or Territory's budget for activities under this part, based on the State's or Territory's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on:

-the costs of the activities required to be carried out to meet the requirements of Title III;

-the portion of the requirements payment which will be used to carry out activities to meet such requirements; and

-the portion of the requirements payment which will be used to carry out other activities.

The attached table outlines American Samoa's budget for the use of federal funding for HAVA activities. The figures in the table are based upon the annual amounts authorized for appropriation under § 257 of HAVA, and pursuant to the allocation formula delineated in § 252. The table will be modified according to the actual amounts appropriated by Congress and received by American Samoa.

[See Attachment B]

G. Maintenance of Effort

Section 254(a)(7) requires a showing of how the State or Territory, in using the requirements payment, will maintain the expenditures of the State or Territory for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State or Territory for the fiscal year ending prior to November 2000.

Consistent with HAVA § 254(a)(7), in using any requirements payment, American Samoa will maintain expenditures for activities funded by the payment at a level equal to or greater than the level of such expenditures in FY 2000 – a total of $250,000.

H. HAVA Performance Goals and Measures

Section 254(a)(8) requires a description of how the State or Territory will adopt performance goals and measures that will be used by it to determine its success and the success of units of local government in the State or Territory in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State or Territory will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.

American Samoa will establish performance goals and will institute a process to measure progress toward the achievement of these goals. This process will provide the structure and continued measurable targets for accomplishment.

As detailed in section K of this State Plan, the Election Office will establish a position and hire an individual to oversee continuous management of the State Plan. The individual will be responsible for developing and monitoring a uniform performance evaluation process. In measuring progress, original goals and objectives need to be revisited, and adjustments need to be made where

appropriate.

I. State/Territory-Based Administrative Complaint Procedures

Section 254(a)(9) requires a description of the uniform, nondiscriminatory State/Territory-based administrative complaint procedures in effect under § 402. Deadline for compliance: Prior to certification of State Plan, but no later than January 1, 2004; no waiver permitted.

American Samoa has developed administrative regulations to establish the required procedure to address complaints revolving around election issues. The nature of the complaints will be restricted to suspected violations of HAVA Title III and therefore pertain to the processes of voter registration, voting and election reporting. These regulations constitute a new chapter that are part of the administrative regulations governing elections, contained in Title 3 of the American Samoa Administrative Code.

These regulations satisfy the requirements of HAVA §402 by providing a uniform and nondiscriminatory complaint procedure. Under these procedures, any person who believes that there has been a violation of HAVA Title III may file a complaint. The complaint must be in writing, sworn and notarized. At the complainant's request, there will be a hearing on the record.

If there is a finding that a violation occurred or is occurring, an appropriate remedy shall be provided. Appropriate remedy will not include financial payments to complainants or civil penalties for election officials, even if it is determined that a violation of Title III has occurred. Remedies may include written findings that a violation of Title III has occurred, strategies for insuring that the violation does not re-occur, and, if it appears that the complaint is systemic, possible actions by the Election Office to eliminate or prevent future incidences.

If there is no violation, the complaint will be dismissed and the results will be published. A final determination on a complaint must be made within 90 days, and if this deadline can not be met, the complaint will proceed under alternative dispute resolution procedures.

The administrative regulations were adopted pursuant to the Administrative Procedures Act, ASCA §4.1001 et seq.

Requirements funding will be used for the hearings requirement of this section.

J. Effect of Title I Payments

Section 254(a)(10) requires, if the State or Territory received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

The Territory of American Samoa has thus far received $1,000,000.00 in Title I payments.

1. §101 – Payments for activities to improve administration of elections.

American Samoa received $1,000,000.00 under §101. These funds will be used for activities to meet the following requirements:

-To maintain the voting and vote counting system.

-To supplement voter education efforts.

-Unspent federal funds will be set aside (in the account set up by Treasury) for payment of long-term costs of complying with HAVA.

2. §102 – Replacement of punch card or lever voting machines.

American Samoa did not apply for, and therefore did not receive, funding under §102.

K. American Samoa's HAVA State Plan Management

Section 254(a)(11) requires a description of how the State or Territory will conduct ongoing management of the plan, except that the State or Territory may not make any material change in the administration of the plan unless the change:

-is developed and published in the Federal Register in accordance with §255 in the same manner as the State Plan;

-is subject to public notice and comment in accordance with §256 in the same manner as the State Plan; and

-takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register.

The success of future elections will depend on sound and responsible management of the State Plan. Due to the complexity of HAVA and the potential variety of projects it encompasses, American Samoa will establish a position and hire an individual to oversee all HAVA-related activities. This individual will conduct ongoing management of the State Plan, including project planning (for all HAVA-related and other election reform projects) and establishing and implementing program management standards (i.e. performance measures, review and approval processes, issue/risk management, etc.). This same individual will also be responsible for other election functions, including: budget and fiscal, personnel, office support functions, and HAVA accounting requirements.

L. Changes to State Plan from Previous Fiscal Year

Section 254(a)(12) requires, in the case of a State or Territory with a state plan in effect during the previous fiscal year, a description of how the plan reflects changes from the state plan for the previous fiscal year and how the State or Territory succeeded in carrying out the state plan for such previous fiscal year.

This FY 2003-2004 State Plan is American Samoa's inaugural plan under HAVA. This section will be updated in the FY 2004-2005 State Plan, reflecting any changes to the Plan, as well as a summary of 2003-2004 successes.

M. State Plan Development and Committee

Section 254(a)(13) requires a description of the committee which participated in the development of the state plan in accordance with §255, and the procedures followed by the committee under §§255 and 256.

American Samoa's State Plan development committee consists of individuals who are familiar with the election process in American Samoa. They are:

-Director, Office of Protection and Advocacy for the Disabled

-Legal Counsel to the Governor

-Deputy Chief Election Officer

-President, American Samoa Bar Association

A preliminary plan was drafted under the direction of the Chief Election Officer. The committee reviewed and then distributed the preliminary draft to the public to receive input and feedback. The statements received were taken into consideration in finalizing this Plan.

The committee intends to meet at least twice a year to review any supplements and/or modifications to this State Plan that the HAVA coordinator (who is identified in the foregoing section K) develops.

III. Background

American Samoa is an unincorporated territory of United States administered by the Department of Interior. Composed of five main islands (and two atolls), American Samoa covers an area of 77 square miles and lies 2,3000 miles southwest of Hawaii. Located in the South Pacific, it is the only U.S. possession south of the equator.

The official population census in April 2000 was listed as 57,300. The mid-year estimate for the same year was 57,700. The annual population growth rate calculated from 1990 and 2000 was 2.0 percent. The population is very young. The median age of the local population remains 21.3 years. By citizenship, sixty-five percent of the residents are American Samoans.

IV. Overview of Voting Trends

There are 17 voting districts for the five main islands that comprise American Samoa. The very remote Swains Island is 200 miles away from the main island of Tutuila. The Thompson family owns it and have eight registered voters. Forty-two villages are represented in the 17 voting districts. In the last twenty years since American Samoans have been voting for the Governor and other elected officials, voters have expressed their desire to vote by turning out in large numbers to polling places. The highest voter turnout was 91.9 percent in 1994. The lowest voter turnout was 64.8 percent in 1998. The median voter turnout in elections is 82 percent. The U.S. state and national averages for voter turnout has been far below American Samoa's!

In the last general election of November 7, 2000, the Official Roll of Registered Voters listed 15,598 voters. Over 52 percent of registered voters were women. Most of them (52 percent) were between the ages of 18 to 34 years. Over 12,000 or 77 percent of the registered voters turned out to vote in the 2000 General Election. Three districts had the highest voter turnout; Tualauta (2,428 registered voters) had a voter turnout of 88 percent. Manu'a District #2 had an 83 percent voter turnout and Ituau District had an 81 percent voter turnout.

In the area of disabilities in American Samoa, it is unknown as to the numbers of voters with disabilities or **potential voters** with disabilities. An assessment has never been conducted.

However, what is known is that The Report of the 1995 Population Housing and Expenditure Survey (Department of Commerce, January 1998) places persons 5 years and over with disability at 2 percent of the population. According to the National Center of Disability (1995), physically challenged individuals represent 4 percent of the territory's population. This national estimate will be utilized in planning and resource allocation.

The Help American Vote Act (HAVA), signed by President George W. Bush, stands to benefit a large number of persons with disabilities in the territory.

V. Description of what applicant intends to do in each of the 4 categories

Project Overview

The American Samoa Election Office under the leadership of Mr. Soliai T. Fuimaono, State Election Commissioner, will administer the accessibility project. The project proposes to be a collaboration between the government agencies of the Election Office and the American Samoa Office of Protection and Advocacy for the Disabled (OPAD). Additional project support will be received from other government agencies, disability service providers and disability consumer groups such as the Office of Protection and Advocacy advisory councils.

The Election Office proposes to subcontract the grant to the Office of Protection and Advocacy for the Disabled (OPAD) to carry out the major activities under the grant. The OPAD office will also serve as a consultant to the Election Office on disability issues.

This partnership provides an excellent way to assure that grant funds are used in the best manner possible to meet the needs of disabled voters and potential disabled voters in the territory.

VI. Overview of Proposed Voting Activities

#1	**Make polling places, including the path of travel, entrances, and exits and voting areas of each polling facility, accessible to individuals with the full range of disabilities.**	
	Activity	**Agency Responsible**
	ξ Conduct pre-project meeting and planning to determine government agencies and key stakeholders to seek input, advice and cooperation on project.	EO (Election Office) OPAD (Office of Protection & Advocacy for the Disabled)
	ξ Meet with the Office of Samoan Affairs and the local village mayors to outline a plan for conducting a district assessment of accessible polling places.	EO, OPAD
	ξ Conduct village and district assessment of polling places.	EO, OPAD
	ξ Work with village mayors to determine polling places needing assistance in making the polling places accessible with ramps.	EO, OPAD
	ξ Develop a work plan and timetable for achieving accessible polling places.	EO, OPAD
	ξ Begin accessibility construction and completion of identified district polling places.	EO, OPAD

Overview of Proposed Voting Activities (continued)

#2	**Provide the same opportunity for access and participation (including privacy and independence) to individuals with the full range of disabilities as for other voters**	
	Activities	**Agency Responsible**
ξ	Meet with disability consumer groups, disability service providers to seek input on needed voting aids, Assistive technology, access and participation in the polling places.	OPAD
ξ	Develop a work plan and timetable, based on community input received, for implementing accessibility at the polling places.	OPAD
ξ	Conduct research to determine workable solutions to achieving accessible polling places for voters with a full range of disabilities.	OPAD
ξ	Research local legislation to determine areas of law that can be proposed or strengthened to ensure equal access and participation of voters and potential voters with disabilities.	OPAD
ξ	Work with the Governor's Office and the American Samoa Legislature to propose needed legislature that will ensure equal opportunity and access to voting for people with disabilities.	OPAD

Overview of Proposed Voting Activities (continued)

#3	**Train election officials, poll workers, and election volunteers on how best to promote the access and participation of individuals with the full range of disabilities in elections for Federal Office.**	
	Activities	**Agency Responsible**
ξ	Develop Etiquette Disability Training curriculum for election officials, poll workers and election volunteers to promote the access of participation of voters with a full range of disabilities.	OPAD
ξ	Develop bilingual videos or PowerPoint training presentations	OPAD
ξ	Develop manuals to supplement the PowerPoint presentation and focus on the importance of a secret vote and allowing equal access and participation.	OPAD
ξ	Determine timetable for implementing the training	OPAD
ξ	Research local legislation to incorporate laws mandating disability-training attendance for all election officials, poll workers and election volunteers.	OPAD

Overview of Proposed Voting Activities (continued)

#4	**Provide individuals with the full range of disabilities with information about the accessibility of polling places.**	
	Activities	**Agency Responsible**
ξ	Conduct assessment of types of information available about accessibility in polling places.	OPAD
ξ	Develop information on accessibility in polling places in various media, including brochures and newsletters, to assure access to the information for individuals with a full range of disabilities.	OPAD
ξ	Develop information, in various formats for voters and potential voters with a variety and full range of disabilities.	OPAD

VII. Proposed Funding to be Allocated per Categories:

	Categories of Mandated Activities	Proposed Allocation for Funding
#1	Make polling places, including the path of travel, entrances, and exits and voting areas of each polling facility, accessible to individuals with the full range of disabilities.	$ 45,000
#2	Provide the same opportunity for access and participation (including privacy and independence) to individuals with the full range of disabilities as for other voters.	$ 15,000
#3	Train election officials, poll workers, and election volunteers on how best to promote the access and participation of individuals with the full range of disabilities in elections for Federal Office.	$ 25,000
#4	Provide individuals with the full range of disabilities with information about the accessibility of polling places.	$ 15,000
	TOTAL	**$ 100,000**

JAN BREWER
SECRETARY OF STATE
STATE OF ARIZONA

The Help America Vote Act of 2002 (HAVA) is civil rights legislation to ensure voters are treated equally across the United States of America. I am proud to say that here in the State of Arizona, many of the federal election reforms brought by HAVA are already addressed in our own state law and procedures.

HAVA will significantly change our state election process as we replace punch card voting systems in 9 counties, add new DRE (touch screen) equipment to every precinct in the state, and implement new statewide systems to address voter registration, grievance process and provisional balloting. All these are daunting new tasks which bring powerful new responsibilities. I truly believe it will take a yeoman-like effort to ensure each new requirement is implemented correctly. As Arizona Secretary of State, it is with great pleasure I present the 2003 Preliminary State Plan for election reform.

This Arizona Preliminary State Plan identifies the priorities and specific steps our state will take to address election reform and bring Arizona into compliance with HAVA. The Plan was developed in conjunction with the State Planning Committee and was adopted unanimously from the group of state officials, legislative representatives, local officials, party representatives and individuals with special interests in improving access to the disabled.

Although HAVA increases responsibility for election administration at the State level in order to establish consistency across the state, the Secretary of State acknowledges that the county recorders and election officials are charged with the conduct of elections and are critical to the elections process. As we move forward, the Secretary of State will continue to encourage coordination, cooperation, and collaboration between the local officials on innovations and technology as we mutually share in a successful new election process.

Within this Preliminary State Plan, Arizona encourages election accessibility for individuals with disabilities and those with alternative language considerations. Arizona has already taken significant steps to improve polling place accessibility and is in the process of implementing an accessible, uniform statewide voting system. We will continue to strive toward accessibility throughout all aspects of the elections process.

In presenting this new plan, let me point out it is a living, breathing document in which we will need to update and refine as necessary over time, to reflect effective election reform. Overall, Arizona is in a good position relative to meeting the HAVA requirements. I welcome the challenges of HAVA and look forward to receiving appropriate financial support from the federal government as we continue our efforts to lead the nation in election reform.

JAN BREWER
SECRETARY OF STATE
STATE OF ARIZONA

Help America Vote Act of 2002 (HAVA)
State Plan

PRESS RELEASE
January 31, 2003

Sec. of State Jan Brewer Announces State Planning Committee on Election Reform

New Committee Will Formulate New Process for Arizona Voter Registration & Elections

PHOENIX -- Secretary of State Jan Brewer announced the creation of Arizona's State Planning Committee in an effort to improve administration of elections, educate voters, and upgrade statewide voting systems and technology. This action comes on the heels of Congress and President Bush passing the "Help America Vote Act of 2002" which specifically mandates strategic planning for elections by each state.

"The federal government requires our state to undertake comprehensive election reform," said Secretary Brewer. "The first step is to put forward a quality group of people from throughout this state to help develop a workable system for all of Arizona voters."

This new Committee will put forward recommendations on how to create a new statewide and uniform voter registration database, maintain new and existing voting systems, provide accessible voting devices for the disabled, and increase voter education and training for the new systems.

Stated Secretary Brewer, "My first priority with this Committee is to get a centralized voter registration system that will help update our voter rolls, and then we need to do away with punch card voting systems." Added Brewer, "Arizonan's deserve to have their votes counted accurately."

All fifty states must submit a state plan that delivers compliance with the new federal requirements. The plan must also be sent on to the federal government in order to receive any federal funding aid. Secretary Brewer's new State Planning Committee meetings will be open to the public. The Committee has a diverse group of appointees including representatives from: 10 counties, all recognized state parties, several statewide election experts, visually impaired groups, African-American, Hispanic, Native American, disability groups, computer technology, and campaign and voter outreach experts.

"I have assembled a group of 'can-do' people that can handle the complexities we confront in developing this plan," said Secretary Brewer, "the challenge is enormous, but is one we can accomplish by working together."

Help America Vote Act of 2002

Public Law 107-252 – October 29, 2002

(HAVA)

SEC. 254. STATE PLAN.
(a) IN GENERAL.—The State plan shall contain a description of each of the following:

State Plan # (1)

How the State will use the requirements payment to meet the requirements of title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

State Plan # (2)

How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of—

A) The criteria to be used to determine the eligibility of such units or entities for receiving the payment; and

B) The methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8).

State Plan # (3)

How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of title III.

State Plan # (4)

How the State will adopt voting system guidelines and processes which are consistent with the requirements of section 301.

State Plan # (5)

How the State will establish a fund described in subsection (b) for purposes of administering the State's activities under this part, including information on fund management.

State Capitol: Election Services Department
1700 W. Washington Street, 7th Floor
Phoenix, Arizona 85007-2888
Telephone (602) 542-8683 Fax (602) 542-6172

JAN BREWER
SECRETARY OF STATE
STATE OF ARIZONA

Help America Vote Act of 2002 (HAVA)
State Plan

State Plan # (6)

The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on —

A) The costs of the activities required to be carried out to meet the requirements of title III;

B) The portion of the requirements payment which will be used to carry out activities to meet such requirements; and

C) The portion of the requirements payment which will be used to carry out other activities.

State Plan # (7)

How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.

State Plan # (8)

How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.

State Plan # (9)

A description of the uniform, nondiscriminatory Statebased administrative complaint procedures in effect under section 402.

State Plan # (10)

If the State received any payment under title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

State Capitol: Election Services Department
1700 W. Washington Street, 7th Floor
Phoenix, Arizona 85007-2888
Telephone (602) 542-8683 Fax (602) 542-6172

State Plan # (11)

How the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change —

A) Is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;

B) Is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and

C) Takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).

State Plan # (12)

In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year.

State Plan # (13)

A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the committee under such section and section 256.

State Capitol: Election Services Department

JAN BREWER
SECRETARY OF STATE
STATE OF ARIZONA

Help America Vote Act of 2002 (HAVA)
State Plan

Section 1

Sec 254. (a) IN GENERAL - The State plan shall contain a description of each of the following:

(1) How the State will use the requirements payment to meet the requirements of title *III (equipment and administration)*, and, if applicable under section 251 (a)(2), to carry out other activities to improve the administration of elections.

Recommended Language:

The Help America Vote Act of 2002 (HAVA), public law 107-252, establishes minimum election administration standards for states that affect the offices of the secretary of state, county recorders and county election officials. HAVA provides election reform across the nation and brings uniformity to state elections, HAVA will enable each voter an opportunity to cast their ballot. It specifically requires the state of Arizona to:

- Create a new uniform statewide voter registration system;
- Certify new and existing voting systems according to national standards;
- Replace all punch card voting devices used by counties for elections;
- Improve voting device accessibility, to include physical and language accessibility;
- Maintain uniform election procedures and certification of election officials and poll workers;
- Increase voter education for new voting systems; and,
- Establish a statewide complaint system for a uniform, nondiscriminatory response to grievances.

The state of Arizona is in a relatively good position to implement the requirements of HAVA. Many standards or activities required in HAVA are already in place and being successfully executed. Uniformity across Arizona is achieved through state statute and the state election procedures manual covering the topics surrounding elections: voter qualification; voting system certification; what constitutes a vote; election official and poll worker training; alternative language requirements; uniform provisional ballots procedures (previously "ballots to be verified"); procedures for military (or "absentee") ballots; and tabulating and reporting. The state has consistently followed the National Voter Registration Act of 1993 and therefore already has sound procedures for voter registration and maintenance of the voter registration rolls.

For those minor statutory and regulatory changes required, the secretary of state has submitted legislation and has begun the revision process of the state election procedures manual to bring terminology and procedures into conformance with HAVA.

State Capitol: Election Services Department
1700 W. Washington Street, 7th Floor
Phoenix, Arizona 85007-2888
Telephone (602) 542-8683 Fax (602) 542-6172

5/15/03

HAVA provides funding to the state of Arizona for the implementation of election reform, a total of $51,764,959 (Sections 252 and 257) and $6.9 million as early monies (Section 101). In order to qualify for funding, the state must:

- meet the requirements of Title III, including the bullet points above;
- provide the same maintenance of effort for election operations as in the budget year prior to the 2000 general election; and
- provide matching funds of five percent of the federal dollars, calculated at $2.5 million.

The state has certified it will meet the budgeting requirements, and in addition, has determined the counties must also meet the same maintenance of effort as experienced in the 2000 general election. The state will establish the state election fund, in which monies from HAVA will be deposited and appropriately disbursed. Many of the expenditures affect county operations, so eligibility to receive funds will be determined by compliance with state statute, the election procedures manual, and the statewide efforts regarding elections. This state plan, as prescribed in HAVA, describes actions that will be taken to address the election procedures reform, voter registration reform, voter registration system centralization, and voting systems buyout.

Subject to the complete funding allocated in HAVA, the state will embark on parallel statewide efforts to be consistent with HAVA requirements:

- Arizona – Adios Chad is a statewide contract effort to facilitate replacement of voting systems in counties where punch card systems were used in the 2000 General Elections. The procurement effort will also include the voting accessibility standards for disabilities for the remaining counties.

- Voter Registration Arizona (VRAZ) will also be a priority of the secretary of state to implement a statewide voter registration system. Working with the county recorders and state election officials, the state will define functional requirements, roles and responsibilities of carrying out the functions of voter registration to enhance the operations of each of these offices, with the voter as the primary benefactor of the resulting system.

- 877 THE VOTE is the secretary of state's current toll-free election information line. This system will be expanded to implement the initial call-in element of a statewide grievance tracking system. The statewide grievance tracking system will allow for the comprehensive coordination of response by the secretary of state, (and as designees: the county recorders, county and state election officials) and the state attorney general with the initial grievance handled by phone call and escalating to a written process when needed.

- Accessibility, whether physical disability or a language barrier, is widely addressed in state law and the state election procedures manual and is largely maintained under the current efforts of the secretary of state and county officials. However, given the intent of HAVA

State Capitol: Election Services Department

JAN BREWER
SECRETARY OF STATE
STATE OF ARIZONA

Help America Vote Act of 2002 (HAVA)
State Plan

to further enhance accessibility, the state will engage statewide efforts to ensure accessibility to voter registration, voting systems, voting information, voting locations and all processes directly connected to the election process. This will include disbursements to counties to improve physical accessibility of polling locations, language accessibility requirements beyond the current efforts, and expansion to voting education through public service announcements and coordinated statewide efforts.

- To meet these efforts, the secretary of state will incur administrative costs associated with the coordination, planning, operations and reporting on these programs. In addition, the secretary of state will need to expand its voting system certification efforts and election official certification, as well as expanding the state election procedures manual to include uniform guidelines for all training relative to election processes. These costs, along with portions of infrastructure and support systems, will be funded through the state election fund.

To ensure that HAVA reform is sustained, the state will also extend current reporting requirements to gauge performance of the state and county officials. These reports will not only provide public inspection of election process performance, but will also be the foundation to determine future modifications required in law or the state election procedures manual. While the state election fund consists of federal funds, the secretary of state will maintain this state plan to reflect the state's direction and preparedness to fulfill the requirements of HAVA.

State Capitol: Election Services Department

Phoenix, Arizona 85007-2888
Telephone (602) 542-8683 Fax (602) 542-6172

Section 2

Sec 254. (a) IN GENERAL - The State plan shall contain a description of each of the following:

(2) How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of -

(A) the criteria to be used to determine the eligibility of such units or entities for receiving the payment; and
(B) the methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8).

Recommended Language

To maintain uniformity of voting equipment purchases and the other expenditures, the state will develop a statewide Request For Proposal (RFP) for satisfying the requirements of the Help America Vote Act of 2002 (HAVA). The commitments under Title III will be based on federal and state funds deposited in the state election fund. The state will administer the resulting contracts and the disbursements consistent with state budget plan described in subsection 6 of Section 254 (a).

Funds will be distributed based on availability and set to the priorities established in this state plan. County voter registration statistics at the time of the 2002 General Election will be taken into consideration for any proportionate distribution of funds to counties for which they qualify under the various elements of distribution. Counties will submit their county budgets that contain the 2002 election cycle maintenance of effort to establish baseline amounts for efforts already in practice. All expenditures beyond the maintenance of effort will be coordinated with statewide efforts to be eligible for reimbursement of such efforts.

The explicit distribution method and eligibility for each element of distribution is described in section 6. In general, the distribution of funds to counties will be in accordance with Memorandums of Understanding (MOU). The MOU will be the contract between the state and the county to enable payment from the state election fund, and therefore all service levels or compliances required by the MOU will dictate disbursement. Upon receipt and validation of documentation of compliance with the MOU, the state will issue disbursements from the state election fund. Any commitment of funds from the state election fund shall not exceed the proportions identified in this plan beyond one half of one percent of the state election fund. The state may revise the state plan, using the procedures identified in section 11, to adjust the proportions at any time.

State Capitol: Election Services Department
1700 W. Washington Street, 7th Floor
Phoenix, Arizona 85007-2888
Telephone (602) 542-8683 Fax (602) 542-6172

JAN BREWER
SECRETARY OF STATE
STATE OF ARIZONA

Help America Vote Act of 2002 (HAVA)
State Plan

The state will require, as part of the MOU, that counties use established accounting practices for all aspects of project management to monitor the implementation of the elements in section 6. Project management and time schedules for these efforts will be conducted by the secretary of state in coordination with the county recorders and county election officials. Compliance with the terms of any applicable MOU and with the project management and time schedules established for each element in Section 6 will establish eligibility to receive payments from the state election fund. Any portions not in compliance, or not completed on the time schedule will delay payments until such time the county has complied with the necessary requirements. Failure to comply with the MOU for more than six months may release the state election fund from commitment to provide such funds associated with that element. Failure to comply with any portion of Title III will result in the county being liable for all previously disbursed funds to that county from the state election fund. If a county has failed to comply on an effort that prohibits other counties, or the state, to proceed with the time schedule of that same effort, the secretary of state may postpone all other payments to that county until such time of compliance.

The performance measures detailed in section 8 of this state plan will be used to evaluate participation and effectiveness of disbursements. Monitoring performance measures will be completed biennially during the compilation of the reports required by the state election procedures manual. The reports will be filed with the secretary of state and will include specific data to disclose the successes and failures of each county's performance as it relates to the implementation of HAVA.

The ongoing maintenance of the centralized voter registration database requires a well-coordinated interaction of the county officials who register voters, state officials who manage the central voter registration database, county officials who manage elections and state officials who oversee elections. This creates an incentive for the state election fund to be an ongoing fund to handle cross-jurisdictional expenses in managing voter registration and elections.

State Capitol: Election Services Department

5/15/03

Section 3

Sec 254. STATE PLAN (a) IN GENERAL - The State plan shall contain a description of each of the following:

(3) How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III.

Recommended Language

Poll workers and elections officers will be kept abreast of changes in law, including new laws and to maintain uniformity, the secretary of state will offer continuing education programs to election officials. The state already has adopted laws that address these programs.

1. Pursuant to Arizona Revised Statutes § 16-427, voters are given instruction on the use of voting machines.
2. Pursuant to Arizona Revised Statutes § 16-406, voting equipment is on public display at different times and places.
3. Pursuant to Arizona Revised Statutes § 16-407, election officers participate in an election officer education, training and certification program.
4. Pursuant to Arizona Revised Statutes § 16-532, poll workers are required to attend instructional programs "Instruction of election board inspectors and judges; certificate of qualification; optional training; instruction of counting center election officials".
5. Pursuant to Arizona Revised Statutes §§ 16-444 and 16-452, Arizona has adopted uniform definitions of election terms.
6. Pursuant to Arizona Revised Statutes § 19-123, the state mails the publicity pamphlet for ballot measures to every household that contains a registered voter. The publicity pamphlet will include a section for voter education.

The secretary of state may use public service announcements via the public broadcasting system in the two major markets in the state, Phoenix and Tucson, as a forum to conduct voter education and poll worker training education.

The secretary of state will include additional training in the election officer certification training program on the requirements under the Help America Vote Act of 2002 (HAVA). The secretary of state will include material in the procedures manual for implementing poll worker training and public display of voting systems. The secretary of state will continue to include election terminology in the procedures manual.

The secretary of state will further adopt voter education guidelines, which shall inform voters that if they fail to cast a vote for a candidate or issue, the voter will not be notified of the undervote.

State Capitol: Election Services Department

JAN BREWER
SECRETARY OF STATE
STATE OF ARIZONA

Help America Vote Act of 2002 (HAVA)
State Plan

Section 4

Sec 254. (a) IN GENERAL - The State plan shall contain a description of each of the following:

(4) How the State will adopt voting system guidelines and processes which are consistent with the requirements of section 301.

Recommended Language

- The secretary of state will adopt voting systems guidelines and processes consistent with the Voting Systems Standards identified in section 301.
- Pursuant to Arizona Revised Statutes § 16-446, specifications for electronic voting systems shall provide for voting secrecy, prevention of over votes, prevent duplicate voting, and count accurately every vote cast.
- Pursuant to Arizona Revised Statutes § 16-442, the secretary of state shall appoint a three member committee to investigate and test electronic voting equipment and tabulating devices and shall recommend final adoption of approved systems. The committee appointed by the secretary of state will review standards set by the Standards Board and make recommendations to the secretary of state based on tabulating systems meeting the standards and standards set by the Federal Election Commission.
    - Part of Senate Bill 1145 (the Help America Vote Act of 2002 bill) sponsored by Senator Marilyn Jarrett addresses the secretary of state's three member committee and the specific requirement for certifying voting systems according to the federal voting system guidelines.
- The committee will also review and decertify systems that no longer meet the Voting Systems Standards. All approved electronic voting systems and tabulating devices will carry required ITA and NASED certification.

Pursuant to Arizona Revised Statutes § 16-452, the secretary of state defines what constitutes a vote and a voting system through the state procedures manual for voting processes and equipment.

- Pursuant to Arizona Revised Statutes § 16-449, the secretary of state shall perform logic and accuracy tests before state and federal elections and will have the automatic tabulating equipment and programs tested to ensure correct vote count cast for all offices.

State Capitol: Election Services Department

5/15/03

Section 5

Sec. 254 (a) IN GENERAL - The State plan shall contain a description of each of the following:

(5) How the State will establish a fund described in subsection (b) (Elections Fund) for purposes of administering the State's activities under this part, including information on fund management.

Recommended Language

Senator Marilyn Jarrett and Representative John Huppenthal introduced Senate Bill 1075 and House Bill 2197 on behalf of the secretary of state (see attached copies of Bills.) The State Planning Committee supports the attached Senate Bill 1075 and House Bill 2197. The Bills establish the Elections Fund to implement the Help America Vote Act of 2002 (HAVA). The Secretary of state shall be the single signing authority for administration of said funds, in compliance with HAVA. There is no appropriation identified with this legislation. These bills simply create the mechanism to receive money.

State Capitol: Election Services Department
1700 W. Washington Street, 7th Floor
Phoenix, Arizona 85007-2888
Telephone (602) 542-8683 Fax (602) 542-6172

JAN BREWER
SECRETARY OF STATE
STATE OF ARIZONA

Help America Vote Act of 2002 (HAVA)
State Plan

Section 6

Sec. 254 (a) IN GENERAL - The State plan shall contain a description of each of the following:

The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on -

- **(A) the costs of the activities required to be carried out to meet the requirements of title III;**
- **(B) the portion of the requirements payment which will be used to carry out activities to meet such requirements; and**
- **(C) the portion of the requirements payment which will be used to carry out other activities.**

Recommended Language

The state of Arizona's proposed budget appropriation, subject to full federal funding of the Help America Vote Act of 2002 (HAVA), includes the appropriations to fund programs to conform to the requirements of Title III. In order to fairly distribute the funds, the secretary of state will use the county statistics at the time of the 2002 General Election to determine:

- Population counts;
- Voter Registration counts;
- Precinct counts;
- Poll worker counts;
- Election official counts; and
- Maintenance of effort of the county.

A. Voting Accessibility - "Arizona - Adios Chad"

With requirement to replace voting systems in counties where punch card systems were used in the 2000 general election in order to receive federal funds under HAVA, Arizona has initiated the Arizona – Adios Chad Program to facilitate punch card buyout. There are still nine counties in the state that will require new voting systems. The secretary of state will lead a statewide procurement effort to acquire these systems. The scope of Adios Chad will be the replacement of these voting systems, in which the secretary of state will work with county election officials to ensure that all needs are met, including but not limited to:

- device acquisition;
- system maintenance;
- election preparation services; and
- election tabulation services.

State Capitol: Election Services Department
1700 W. Washington Street, 7th Floor
Phoenix, Arizona 85007-2888
Telephone (602) 542-8683 Fax (602) 542-6172

5/15/03

The secretary of state will act as contract administrator to maximize the purchasing power. The counties will own, operate, and work with the vendor to maintain the new voting systems and retain control of election services at the county level. Those counties requiring voting system replacement will notify the state of their intent to participate in Adios Chad. Eligibility to participate in complete voting system replacement and receive funds from the state election fund will require participating counties to:

- have operated punch card systems in the 2000 general election;
- still have punch card systems; and
- agree to use the state contract to purchase replacement systems.

Adios Chad will also facilitate the ability for counties not operating punch cards in the 2002 General Election to purchase addendum Direct Recording Electronic (DRE) devices or other voting system equipped for individuals with disabilities at each polling place to meet the accessibility requirements of Title III. Eligibility to participate in addendum voting system device acquisition and receive funds from the state election fund will require participating counties:

- do not require complete voting system replacement;
- require accessibility devices in polling places; and
- have presented to the secretary of state a plan outlining accessibility compliance.

For counties that require complete voting system replacement and do not purchase the voting system replacement from the coordinated state contract, the county will be able to purchase addendum devices from the state contract but will not be eligible for funds from the state election fund. For counties that require reimbursement for voting systems that meet the voting systems standards and were purchased for use in the 2002 general election, those counties will receive reimbursement equivalent to the dollar per voter established for a complete replacement county subject to the statewide contract, but will not exceed the contract established by the county for the acquisition of the devices and will be payable upon availability of Title III funds.
Subject to complete federal funding for HAVA, Adios Chad will be funded for the acquisition and additional maintenance of effort to operate replacement voting systems over the punch card systems to address punch card buyout at a rate of 28.50 percent of the state election fund (16.16 percent for acquisition and 12.34 percent for operational). Adios Chad will also be funded for the acquisition and additional maintenance of effort to operate voting systems to address system accessibility requirements of Title III at a rate of 27.64 percent of the state election fund (20.49 percent for acquisition and 7.15 percent for operational).

B. Language Accessibility
The State Plan does not appropriate any additional state election funds for language accessibility because language accessibility is already a responsibility, and included in the maintenance of efforts, of the secretary of state, county recorders and county election officials according to the

State Capitol: Election Services Department
1700 W. Washington Street, 7th Floor
Phoenix, Arizona 85007-2888

JAN BREWER
SECRETARY OF STATE
STATE OF ARIZONA

Help America Vote Act of 2002 (HAVA)
State Plan

Voting Rights Act of 1965. Devices will be evaluated for adaptability for alternative language accessibility.

C. Physical Accessibility
HAVA provides for use of monies to improve physical accessibility to polling places. Since polling places are private locations, with a few exceptions such as the county recorder's office, only a small portion of the state election fund will be appropriated to counties for physical accessibility improvement. The secretary of state may appropriate per precinct to reimburse counties to improve physical accessibility to polling locations. The request by a county to receive these funds from the state election fund is upon the conditional approval by the secretary of state:

- The county certifies to the secretary of state the costs incurred to improve physical accessibility after January 1, 2003;
- The secretary of state has sufficient funds in the state election fund; and
- Full funding from the federal government is appropriated to the state election fund.

Subject to complete federal funding of HAVA, funding for improving physical accessibility to polling places will receive no more than 0.58 percent of the state election fund.

D. Provisional Balloting
Provisional Balloting is already a responsibility, and included in the maintenance of effort, of the county election officials in conjunction with the county recorders as prescribed in law and the state election procedures manual. However, the requirement to build a free access system for the voter to determine the status of their provisional ballot is a new requirement. At this time, the secretary of state envisions the function of provisional ballot status to be built into the grievance phone system and statewide voter registration system due to the similarities in function and expectations. Monies to incorporate provisional balloting status have been included in those services, however, because many jurisdictions will be changing voting technology, there are deemed to be costs associated with provisional balloting above the current maintenance of effort for these jurisdictions to provide that service. Subject to complete federal funding of HAVA, provisional balloting reimbursement shall be funded at a rate of 0.45 percent of the state election fund. Allocation of funds to the county will be determined by the number of registered voters in the county.

E. Voter Education
Voter Education is already a responsibility, and included in the maintenance of effort, of the secretary of state, county recorders and county election officials as prescribed in the state election procedures manual. Because many jurisdictions will be changing voting technology, there are deemed to be costs associated with voter education above the current maintenance of effort for these jurisdictions. Subject to complete federal funding of HAVA, additional voter education will be funded at a rate of 3.65 percent of the state election fund. Allocation of funds to the county will be determined by the number of registered voters in the county.

State Capitol: Election Services Department
1700 W. Washington Street, 7th Floor
Phoenix, Arizona 85007-2888
Telephone (602) 542-8683 Fax (602) 542-6172

5/15/03

F. Voter Registration Arizona (VRAZ)
The secretary of state will implement a statewide voter registration system to comply with HAVA Title III. Working with county recorders and state election officials, the state will define functional requirements, roles and responsibilities of carrying out the functions of voter registration within the principles:

- secretary of state shall acquire, maintain and support the statewide system;
- counties will remain responsible for the operations of voter registration, including but not limited to: maintaining voter registration information, borders and boundaries of jurisdictions, poll resource management, local registration list information, and candidate registration for local contests;
- counties will remain responsible for furnishing lists, reports, and other printing requirements, however the state may enter into a statewide contract vehicle to maximize purchasing power;
- the official voter registration list will remain under the central control of the secretary of state;
- the counties will be responsible for voter registration operations, printing responsibilities, and common infrastructure requirements for supporting statewide system;
- the counties and the state will maintain the statewide system through maintenance of effort appropriations;
- the system will include provisional ballot status report functions to the voter.

Subject to complete federal funding of HAVA, the VRAZ program will be funded for acquisition and additional maintenance efforts for maintaining the VRAZ system at a rate of 24.71 percent of the state election fund (9.01 percent for acquisition and 15.7 percent for operational).

G. Grievance System
The secretary of state will implement a statewide grievance tracking system to comply with HAVA Title IV in order to qualify for Title III funding. Working with the county recorders, state election officials, state attorney general, the state will define functional requirements, roles and responsibilities of grievance procedures as defined in Section 9 of the State Plan. Subject to complete federal funding of HAVA, the Grievance System will be funded for acquisition and additional maintenance efforts for maintaining the system at a rate of 2.37 percent of the state election fund (1.12 percent for acquisition and 1.25 percent for operational).

H. Administration costs
To fulfill the requirements of Title III, the secretary of state will have to provide for the coordination, planning, operations and reporting on these programs. Subject to complete federal funding of HAVA, the secretary of state will use funds to administer the implementation of HAVA above the current maintenance effort for elections at a rate of 5.03 percent of the state election fund (.28 percent for initial administration costs and 4.75 percent for operational).

SECRETARY OF STATE
STATE OF ARIZONA

Help America Vote Act of 2002 (HAVA)
State Plan

I. Poll Worker Training
Poll worker training is already a responsibility, and included in the maintenance of effort by county election officials as prescribed by state law. Many jurisdictions will be changing voting technology, there will be costs associated with poll worker training above the current maintenance of effort for these jurisdictions. Subject to complete federal funding of HAVA, additional poll worker training will be funded at a rate of 3.49 percent of the state election fund.

J. Election Official Training
Election official training is already a responsibility, and included in the maintenance of effort, for the secretary of state as prescribed in Arizona Revised Statutes § 16-407. Due to changes in voting technology, there will be costs associated with election official training above the current maintenance of effort. Subject to complete federal funding of the Help America Vote Act of 2002, additional election official training will be funded at a rate of .17 percent of the state election fund.

K. Telecommunications
Implementation of VRAZ, the provisional ballot system and the statewide grievance tracking system requires the design, purchase, installation, and maintenance of a telecommunications infrastructure. Subject to complete federal funding of HAVA, this communication system and the costs associated with the system will be funded at a rate of 3.41 percent of the state election fund.

Section 7

Sec. 254 (a) IN GENERAL - The State plan shall contain a description of each of the following:

(7) How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.

Recommended Language

The secretary of state will not use the requirements money to maintain the expenditures previously incurred by the state. Funds will be appropriated in the 2004-2005 state of Arizona fiscal budget to carry out the Federal Election. The requirements payments will not be used to fund the following:

- Travel to conduct logic and accuracy tests
- Printing, labeling and postage of sample ballots
- Production and mailing of publicity pamphlets

The secretary of state and counties shall continue to provide maintenance of effort in providing election and voter education as required in the Help America Vote Act of 2002 (HAVA).

JAN BREWER
SECRETARY OF STATE
STATE OF ARIZONA

Help America Vote Act of 2002 (HAVA)
State Plan

Section 8

Sec. 254 (a) IN GENERAL - The State plan shall contain a description of each of the following:

(8) How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.

Recommended Language

The secretary of state is responsible for ensuring the success in meeting each performance goal. Each county's voter registration and election office also have a substantial responsibility in meeting performance goals in that the counties will monitor performance measures and will report to the state on a biennial basis. The performance goals and measurement guidelines will be included in the state's election procedures manual.

The secretary of state and the counties will create a report to enhance the National Voter Registration Act of 1993 reporting requirements. The report will include specific data to disclose the successes and failures of their jurisdiction as it relates to the implementation of the Help America Vote Act of 2002 (HAVA). The report will be completed on a biennial basis, to be filed with the secretary of state no later than March 31 of each year following a general election. The secretary of state will compile the data in the reports and create a statewide report on the programs. The report will include an indication of whether each county met the performance goals.

5/15/03

JAN BREWER
SECRETARY OF STATE
STATE OF ARIZONA

Performance Goal 1: Elimination of punch card voting machines.
Eliminating punch card voting machines require two things once the appropriate funds are available: 1) development by the secretary of state of a statewide Request for Proposal (RFP) to contract for replacement voting systems with successful award of contracts, and 2) requisition and use by counties of alternative voting systems under the contracts. The measure of success for both elements is the successful replacement of all punch card voting machines by the 2004 Federal election.

Performance measure 1.a	Number of counties using punch card voting machines in the 2004 Federal election
Timetable	January 1, 2003 to Federal election 2004
Description of the criteria used to measure performance	Ten Arizona counties had qualifying precincts in the 2000 Federal election according to HAVA descriptions of replacement voting systems.
Process used to develop the criteria	Success of meeting the performance goal will be based upon the number of punch card voting systems still in use by the Federal election 2004.
Description of official to be held responsible for ensuring each performance goal is met	While each county board of supervisors is responsible for implementing the replacement voting system in their county, the secretary of state is leading the statewide effort for replacement and is therefore ultimately responsible for meeting this performance measure.

Performance Goal 2: Voting Accessibility
Improving voting accessibility, as required by HAVA, which shall include accessibility for individuals with disabilities and alternative language accessibility as determined in Title III, Section 301 of HAVA, will be accomplished by the secretary of state and county election officials in two steps once the appropriate funds are available: 1) development by the secretary of state of a statewide Request for Proposal (RFP) to contract for addendum voting system devices with successful award of contracts, and 2) requisition and use by counties of addendum voting system devices under the contracts. The measure of success for both elements is the successful acquisition and deployment of accessible voting machines by the 2006 Federal election.

Performance measure 2.a	Compliance of counties using voting accessible compliant devices in the 2006 Federal election
Timetable	January 1, 2003 to Federal election 2006
Description of the criteria used to measure performance	All 15 Arizona counties will require alternative voting accessibility devices in the 2006 Federal election according to HAVA.
Process used to develop the criteria	Success of meeting the performance goal will be based upon the number of counties using voting accessible devices weighted by the voting registration in the Federal election 2006.
Description of official to be held responsible for ensuring each performance goal is met	While each county election official is responsible for implementing the voting system in their county, the secretary of state is leading the statewide effort for acquisition and is therefore ultimately responsible for meeting this performance measure.

State Capitol: Election Services Department
1700 W. Washington Street, 7th Floor
Phoenix, Arizona 85007-2888
Telephone (602) 542-8683 Fax (602) 542-6172

JAN BREWER
SECRETARY OF STATE
STATE OF ARIZONA

Help America Vote Act of 2002 (HAVA)
State Plan

Performance Goal 3: Centralized Statewide Voter Registration System
The state will have a centralized statewide voter registration database operational by January 1, 2004. The development of the central statewide voter registration system will be known as Voter Registration Arizona (VRAZ) and extends the current secretary of state program from duplicate match registrations between counties to online voter registration and updates via online driver license renewal and address changes. Goal is to meet the requirements of HAVA, but also enhance the activities of the county recorders, county election officials and the experience of the voter.

Performance measure 3.a	Ratio of the counties with procedures in place to update the centralized voter registration database multiplied by the registration of the county over the total voter registration population of the state, using the scale: 0 – Not updating 25 – updating on weekly batch mode 80 – updating on daily batch mode 95 – updating upon new information (batch mode) 98 – updating real-time 100 – using VRAZ for all voter registration processing
Timetable	January 1, 2003 to Federal election, 2004
Description of the criteria used to measure performance	Participation is measured on the scale of interaction, whereas a county that does not participate causes the score to be significantly low. Higher degrees of interaction result in higher scores on performance.
Process used to develop the criteria	Success of VRAZ will be dependent first upon the successful capture, migration and standardization of voter registration information into the central voter registration database as a percentage of the voting population affected by the implementation.
Description of official to be held responsible for ensuring each performance goal is met	The secretary of state is responsible for implementing the statewide voter registration system and coordinating the efforts of all 15 county recorders to meet this performance measure.

Performance measure 3.b	Percentage of usage is the voting population of the counties using VRAZ over all voter registration counts, multiplied by the following scale: 0 – Not using VRAZ 50 – updating in batch mode 90 – updating real-time 100 – using VRAZ for all voter registration processing
Timetable	January 1, 2003 to January 1, 2006
Description of the criteria used to measure performance	Participation is measured on the scale of migrating to replacement voter registration system VRAZ with minimal performance for degrees of interaction in place of using VRAZ.
Process used to develop the criteria	Success of VRAZ will be dependent ultimately upon the successful replacement of all voter registration systems in the state by a single, statewide, uniform user interface.
Description of official to be held responsible for ensuring each performance goal is met	The secretary of state is responsible for implementing the statewide voter registration system and coordinating the efforts of all 15 county recorders to meet this performance measure.

State Capitol: Election Services Department
1700 W. Washington Street, 7th Floor
Phoenix, Arizona 85007-2888
Telephone (602) 542-8683 Fax (602) 542-6172

5/15/03

Performance measure 3.c	Percentage of provisional ballots counted to voter registration.
Timetable	January 1, 2003 to January 1, 2006
Description of the criteria used to measure performance	Number of provisional ballots cast and counted over the total voting population as reported by the county election official and collected in the statewide provisional ballot status system.
Process used to develop the criteria	Provisional ballots are primarily used when the voter is not present on the precinct roster. Success of VRAZ will be evident as the number of people with incorrect addresses in the voter registration information decreases, which should correspond to the number of provisional ballots that are actually counted (meaning the ballot was cast and the county verified that the voter is qualified and therefore the ballot is also counted).
Description of official to be held responsible for ensuring each performance goal is met	The secretary of state is responsible for implementing the statewide voter registration system and the statewide provisional ballot status system while coordinating the efforts of all fifteen county recorders and county election officials to meet this performance measure.

Performance Goal 4: Statewide Grievance System

The secretary of state will implement a statewide grievance tracking system. Working with the county recorders, state election officials, state attorney general, the secretary of state will define functional requirements, roles and responsibilities of grievance procedures and build these procedures on the current voter information call center system. The system will allow for the centralized call center system to forward grievance calls to counties when appropriate. Measurement of successes of the statewide grievance system will be the availability and performance of the system, as well as, the experience for the voter.

Performance measure 4.a	With respect to the voter registration of each county, the following information will be collected to subjectively measure performance: • Number of complaints received • Number of complaints resolved o Number of complaints resolved in 30 days or less o Number complaints resolved in 60 days o Number of complaints resolved in 90 days • Number of complaints unresolved • Description of reason complaint is left unresolved
Timetable	December 31, 2003 and biennially thereafter
Description of the criteria used to measure performance	The secretary of state will review the total number of complaints received and resolved. Success of the program may be determined by percentage of resolution of all complaints.
Process used to develop the criteria	A formal complaint process will be setup by the 2004 Federal election. Counties will report their success in transitioning to a statewide system to the secretary of state who will analyze them, add the state's success and report the state's overall status in transitioning to a statewide system. To measure performance, data will be provided covering the number of complaints received, the number of complaints resolved and the timeframe for resolution of complaints.
Description of official to be held responsible for ensuring each performance goal is met	The secretary of state is responsible for ensuring each performance goal is met, with the assistance and cooperation of each county recorder and county election official.

State Capitol: Election Services Department
1700 W. Washington Street, 7th Floor
Phoenix, Arizona 85007-2888
Telephone (602) 542-8683 Fax (602) 542-6172

JAN BREWER
SECRETARY OF STATE
STATE OF ARIZONA

Help America Vote Act of 2002 (HAVA)
State Plan

Performance measure 4.b	Percentage of usage is the voting population of the counties using grievance system for all voter registration processing multiplied by the scale of usage: 0 – Not using grievance system 100 – using grievance system for all grievance processing in a timely manner over the voting population of the state.
Timetable	December 31, 2003 and biennially thereafter
Description of the criteria used to measure performance	The secretary of state will review the percentage of availability to the percentage of compliance usage of the grievance system for determining success in implementation.
Process used to develop the criteria	Availability is the success factor in whether the implementation of the grievance system has been successful.
Description of official to be held responsible for ensuring each performance goal is met	The secretary of state is responsible for ensuring each performance goal is met, with the assistance and cooperation of each county recorder and county election official.

Performance Goal 5: Provisional Ballots

There are many requirements for provisional balloting in HAVA that need measuring: provisional ballot uniform processing, verification, and status availability. While the secretary of state has already addressed ballots to be verified (to be re-named provisional ballots) in statute and in the state election procedures manual, the measurement of success is the compliance with those procedures. In addition, the secretary of state's centralized voter registration system will be designed to allow counties to verify provisional ballot status such that the voter may check the status of their provisional ballot. The goal is to have the uniform procedures in place, have each county in compliance and have the statewide system reporting back status of the provisional ballots.

Performance measure 5.a	With respect to the voter registration of each county, the following information will be collected to measure compliance performance: • The number of provisional ballots in each precinct • The number of voters in each precinct • The number of provisional ballots that were verified and counted in each precinct • The number of provisional ballots not counted in each precinct and the reason for not counting • Whether each voter was notified of the status of their ballot • Whether the uniform procedures were followed for determining whether a provisional ballot is counted or not counted
Timetable	December 31, 2004 and biennially thereafter
Description of the criteria used to measure performance	The data in the report will provide specific information relating to how many provisional ballots are voted and provide a means for verifying the procedures for establishing whether the ballots are counted. HAVA requires uniform procedures for checking and verifying provisional ballots, the data in the report will provide specific information for the secretary of state to determine the success of implementation.
Process used to develop the criteria	The secretary of state will review the state election procedures manual and make any changes needed for provisional balloting.

State Capitol: Election Services Department
1700 W. Washington Street, 7th Floor
Phoenix, Arizona 85007-2888
Telephone (602) 542-8683 Fax (602) 542-6172

Description of official to be held responsible for ensuring each performance goal is met	County election officials are responsible for provisional ballot verification and compliance to procedures established by the state election procedures manual. Therefore the secretary of state is responsible for establishing the procedures, compliance requirements, reporting requirements and ultimately the success of this performance measure.

Performance Goal 6: Physical Accessibility

One of the primary goals of HAVA is to improve the voting process. Improving physical accessibility is a performance goal that will change election cycle to election cycle, as most physical accessibility issues tend to be at the polling places which are acquired on private property. This goal is to monitor and uniformly address physical accessibility in the polling place.

The secretary of state will encourage private-public partnerships to enhance the voting participation of all voters with disabilities in coordination with the Help America Vote Foundation established by HAVA. Though activities are beyond the scope of this state plan, activities of such groups may be incorporated into performance reporting to compliment physical accessibility goals.

Performance measure 6.a	County will report the number of polling places that are 100 percent accessible pursuant to guidelines in the state election procedures manual and the voter registration for those polling places. For those polling places that are not in compliance, list the voter registration count, reason for non-compliance, and the steps taken to bring polling place into compliance.
Timetable	January 1, 2004 to December 31, 2004, biennially thereafter.
Description of the criteria used to measure performance	Counties will complete an inspection of all polling places and determine the accessibility for each polling place. Accessibility requirements for polling places will be included in the state election procedures manual.
Process used to develop the criteria	Counties currently inspect all polling places for physical accessibility. Beginning with the 2004 federal election, the inspection results will be added to the report that counties file with the secretary of state certifying their election results and process. Success will be measured by compliance with the state election procedure manual sections on physical accessibility. Report on accessibility from counties to include data from on-site inspections of polling places and number of polling places that are accessible, and the voter registration that polling place serves. Counties will provide a report on the number of precincts that are physically accessible and describe measures taken to bring inaccessible polling places into compliance.
Description of official to be held responsible for ensuring each performance goal is met	County election officials are responsible for inspecting and reporting on physical accessibility, however the secretary of state is responsible for establishing the accessibility requirements, reporting requirements and ultimately the success of this performance measure.

Performance Goal 7: Alternative Language Accessibility

The goal of providing useful and ample language accessibility has always been in compliance with the Voting Rights Act of 1965. Measuring the success of language accessibility is complicated. Those requiring alternative languages are represented in percentages based on census figures, which then are applied to voter participation for rating effective voter participation. Voter participation has variables that dictate turnout, such as: weather, uncontested races, and controversial ballot measures. The secretary of state views the entire election process, from voter registration to casting the ballot as a potential language accessibility issue to the voter, so success will be determined by the subjective inspection of many factors revolving around the voter.

The secretary of state will encourage private-public partnerships to enhance the voting participation of all voters with disabilities in coordination with the Help America Vote Foundation established by HAVA. Though activities are beyond the scope of this state plan, activities of such groups may be incorporated into performance reporting to compliment alternative language accessibility goals.

State Capitol: Election Services Department
1700 W. Washington Street, 7th Floor
Phoenix, Arizona 85007-2888
Telephone (602) 542-8683 Fax (602) 542-6172

JAN BREWER
SECRETARY OF STATE
STATE OF ARIZONA

Help America Vote Act of 2002 (HAVA)
State Plan

Performance measure 7.a	With respect to the voter registration of each county, the following information will be collected to subjectively measure performance: • Voter turnout • Alternative language accessibility for publicity pamphlets o Number of languages required o Number of languages provided • Alternative language accessibility for ballots o Number of languages required o Number of languages provided • Alternative language accessibility for voter registration forms o Number of languages required o Number of languages provided • Alternative language accessibility for voter outreach materials o Number of languages required o Number of languages provided
Timetable	Federal election 2004 and biennially thereafter
Description of the criteria used to measure performance	Counties will provide the state a report of alternate language capabilities with reference to ballots, publicity pamphlets, voter registration forms and voter education materials. The report will include data on the alternative language accessibility provided for ballots, publicity pamphlets, voter registration forms and voter outreach. The data provided will allow the secretary of state to determine if the uniform procedures for providing alternative language accessibility has been successful
Process used to develop the criteria	The state and counties already provide language accessibility. By the 2004 Federal election, the state election procedures manual be reviewed by the secretary of state for any additional requirements to be included regarding language accessibility.
Description of official to be held responsible for ensuring each performance goal is met	The secretary of state is responsible for ensuring each performance goal is met, with the assistance and cooperation of each county recorder and county election official.

Performance Goal 8: Voter Education

The goal of providing useful and ample voter education has always been in the mission statement of the secretary of state, county recorders, and the county election officials. Measuring the success of voter education, however, is more complicated than just measuring voter participation. Variables that dictate voter participation range from weather, uncontested races, and controversial ballot measures, causing highly subjective results. The secretary of state views the entire election process, from voter registration to casting the ballot, as an education of the voter, so success will be determined by the subjective inspection of many factors revolving around the voter.

State Capitol: Election Services Department
1700 W. Washington Street, 7th Floor
Phoenix, Arizona 85007-2888
Telephone (602) 542-8683 Fax (602) 542-6172

5/15/03

Performance measure 8.a	With respect to the voter registration of each county, the following information will be collected to measure performance: • Voter turnout • The number of early ballots requested • The number of early ballots voted • The number of provisional ballots voted • Number of public service announcements • Number of seminars providing voter education • Number of locations where voting equipment is on public display • Compliance with the state election procedures manual for voter information and voter outreach • Length of time voting systems are on public display • Number of voter education and voter outreach initiatives, including: o Description o Estimated costs o Participation • A comparison of voter turnout in a federal election with the voter turnout in the immediately preceding four-year cycle
Timetable	January 1, 2004 and biennially thereafter
Description of the criteria used to measure performance	The information will summarize the voter outreach and voter education methods employed by each county and state.
Process used to develop the criteria	The state and counties already provide voter education. By the 2004 Federal election, additional steps will be taken to ensure voter knowledge of changes in voter registration and voting caused by this act. These steps will be incorporated into the state election procedures manual. The counties will include details of their efforts in the report they file with the secretary of state certifying their election results and process. Success will be county compliance with the state election procedures manual sections on voter education.
Description of official to be held responsible for ensuring each performance goal is met	The secretary of state and the county recorders and election officials are all responsible for ensuring the success of voter education; however, the secretary of state is responsible for the success of all statewide coordinated efforts for voter education.

Performance measure 8.b	With respect to the responsibilities for voter education set forth in the state election procedures manual, the following information will be collected from the grievance system to measure performance: • Number of complaints • Number of complaints dismissed • Nature of complaints dismissed • Number of complaints resulting in action • Nature of complaints resulting in action • Number of complaints unresolved • Nature of complaints unresolved
Timetable	January 1, 2004 and biennially thereafter

State Capitol: Election Services Department
1700 W. Washington Street, 7th Floor
Phoenix, Arizona 85007-2888
Telephone (602) 542-8683 Fax (602) 542-6172

JAN BREWER
SECRETARY OF STATE
STATE OF ARIZONA

Help America Vote Act of 2002 (HAVA)
State Plan

Description of the criteria used to measure performance	The information will provide a measurement of performance regarding voter outreach and voter education with respect to county and state.
Process used to develop the criteria	The state and counties already provide voter education. By the 2004 Federal election, the grievance system will be in place and provide feedback to the voter outreach and voter education efforts of the counties and state. These results will be reviewed for additional requirements to be incorporated into the state election procedures manual.
Description of official to be held responsible for ensuring each performance goal is met	The secretary of state and the county recorders and election officials are all responsible for ensuring the success of voter education; however, the secretary of state is responsible for the success of the state elections procedures manual for providing adequate guidance for uniform voter outreach and voter education.

Performance Goal 9: Poll worker training.
Ample poll worker training results in positive experiences and smooth elections for voters and the state of Arizona. The performance goal to measure poll working training in respect to HAVA, as well as realization of existing training efforts, will be dependent upon the compliance of poll worker training within the counties.

Performance measure 9.a	With respect to the voter registration of each county, the following information will be collected to measure poll worker training performance: • The number of board workers trained in each county • For each polling place, the description of the types of board workers trained o Number of Inspectors, Marshals, Judges and Clerks trained in each precinct o Number of "premium" board workers pursuant to A. R. S. § 16-532 (D) and (E) trained in each precinct • The number of provisional ballots voted
Timetable	January 1, 2003 to Federal election 2004, biennially thereafter.
Description of the criteria used to measure performance	Analyzing the number of board workers trained in each county and comparing the data to the number of provisional ballots will allow the secretary of state to determine whether the uniform board worker training implemented is successful. If it is determined that the uniform board worker training is not successful, new training methods will be incorporated in the state election procedures manual before the next election cycle.
Process used to develop the criteria	The state and counties already provide poll worker training. By the 2004 Federal election, additional steps will be taken to ensure poll worker knowledge of changes in voter registration and voting under HAVA. Uniform poll worker training criteria will be incorporated into the state election procedures manual. The counties will include details of their efforts in the report they file with the secretary of state certifying their election results and process. Success is dependent upon the training with respect to the voter registration serviced at the polls.
Description of official to be held responsible for ensuring each performance goal is met	County election officials are responsible for poll worker training and reporting, however the secretary of state is responsible for establishing the guidelines, requirements for polling places, reporting requirements and ultimately the success of this performance measure.

Performance Goal 10: Election Official Training
Ample election official training results in positive experiences and smooth elections for voters and the state of Arizona. The performance goal to measure election official training in respect to HAVA, as well as realization of existing certification efforts, will be dependent upon the ratio of compliance of trained election officials to voter registration within the counties.

State Capitol: Election Services Department
1700 W. Washington Street, 7th Floor
Phoenix, Arizona 85007-2888
Telephone (602) 542-8683 Fax (602) 542-6172

5/15/03

Performance measure 10.a	With respect to the voter registration of each county, the following information will be collected to measure election official training performance: • The number of people trained in each recorders / voter registration office o The total number of employees in the recorders / voter registration office • The number of people trained in each county election office o The total number of employees in the election office • The total number of people in each county that are certified for the first time • The total number of people in each county that have completed re-certification requirements
Timetable	December 31, 2003 and biennially thereafter
Description of the criteria used to measure performance	Pursuant to Arizona Revised Statutes, the secretary of state completes a report on or before December 31 of each year of a general election detailing the achievements and problems of the previous two-year period and specifies the expected education and training for the following two-year period. The report that is completed and filed with the president of the senate and the speaker of the house of representatives will include details measuring the success of the program as it relates to instruction covered under HAVA.
Process used to develop the criteria	The state and counties already provide election official training. By the 2004 Federal election, additional steps will be taken to ensure election official knowledge of changes in voter registration and voting as it relates to HAVA. Essentially, presence of certified election officials as a ratio to voter registration gives us a baseline for compliance.
Description of official to be held responsible for ensuring each performance goal is met	The secretary of state is responsible for election official training and reporting, as well as the responsibility of establishing the guidelines, requirements for certification, reporting requirements and ultimately the success of this performance measure.

State Capitol: Election Services Department
1700 W. Washington Street, 7th Floor
Phoenix, Arizona 85007-2888
Telephone (602) 542-8683 Fax (602) 542-6172

JAN BREWER
SECRETARY OF STATE
STATE OF ARIZONA

Help America Vote Act of 2002 (HAVA)
State Plan

Section 9

Sec. 254 (a) IN GENERAL - The State plan shall contain a description of each of the following:

(9) A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402.

Recommended Language

The complaint system will be an extension of the secretary of state's office general election information line and implementation will be subject to funding.

The secretary of state will develop a unified statewide complaint system for the tracking, management and conduction of hearings to address complaints revolving around election issues. The unified statewide system will provide secure online access and phone call center access for complaint processing to the secretary of state and their designee, county recorders and county election officials. The system will also provide secure online review of the complaint by the submitter. The nature of the complaints contained within the system will be treated as suspected violations of the Help America Vote Act of 2002 (HAVA), Title III and therefore pertain to the processes of voter registration, voting and election reporting. Since multiple jurisdictions from the county, state and possibly localities will be working in coordination to resolve the complaints, the Administrative Procedure Act does not apply to this system.

When an issue arises on the general information line that is deemed a voting rights violation by the secretary of state or their designee addressed in Title III of HAVA and is requested further attention by the caller, the caller will be given a tracking number and directed to complete a complaints form, notarize the form, and send it back via facsimile and postal services. Upon receiving the formal complaint, the secretary of state's office shall assign the complaint tracking number and begin the resolution process which will include, but is not limited to:

- initial contact with the complainant indicating the complaint has been received and current status;
- if the complaint is transmitted via facsimile, it will be logged until the original notarized paper complaint is received. In the case the paper is not received, the secretary of state may postpone action until such time the original notarized paper arrives;
- the secretary of state, or their designee, will decide the resolution of the complaint. They may use mail, email, facsimile or other messaging service to correspond such information with the complainant;

State Capitol: Election Services Department
1700 W. Washington Street, 7th Floor
Phoenix, Arizona 85007-2888
Telephone (602) 542-8683 Fax (602) 542-6172

5/15/03

- in the event the complaint is of similar nature with other pending complaints, the secretary of state may consolidate complaints into a new tracking number and notify the complainants of the changed status;
- in the event that a hearing is requested, the secretary of state or their designees, may use conferencing, tele-conferencing and/or other electronic forums to address the issue with the parties involved. The complainant must agree to one of these options;
- upon final disposition of the complaint, the secretary of state will report the complaint, findings and disposition in writing to the complainant;
- If a remedy is required to address the final disposition of the complaint, the secretary of state, or their designee, shall notify the complainant at such time the remedy is applied.

All complaints shall be addressed by the secretary of state or their designee, within 90 days of receiving the complaint unless the secretary of state determines a longer period is required for resolution and the complainant agrees to the extension.

If the complaint is not resolved within the 90 days after reception of the complaint, or extension of the expiration as agreed upon with the complainant, the complainant may seek alternative dispute resolution.

Upon request of alternative dispute resolution, the secretary of state will refer the complaint to the attorney general's office, and/or the Department of Justice, depending on the nature of the violation or complaint for resolution.

The unified complaint system shall contain for each formal complaint, at minimum:

- name and address of the complainant;
- date and nature of complaint;
- relevant records and minutes; and
- disposition of the complaint

A record of the complaint will exist for a minimum of one federal election following the current federal election cycle.

State Capitol: Election Services Department
1700 W. Washington Street, 7th Floor
Phoenix, Arizona 85007-2888
Telephone (602) 542-8683 Fax (602) 542-6172

JAN BREWER
SECRETARY OF STATE
STATE OF ARIZONA

Help America Vote Act of 2002 (HAVA)
State Plan

Section 10

Sec. 254 (a) IN GENERAL - The State plan shall contain a description of each of the following:

(10) If the State received any payment under title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

Recommended Language

Pursuant to the Act and in anticipation of receiving full funding for Title I, money will be distributed to provide for punch card replacement for each county that was using a punch card voting system in the 2000 general election. Section 6 details how the federal funds will be spent to meet the requirements of Section 301 of the Help America Vote Act of 2002 (HAVA).

Arizona has initiated the "Arizona – Adios Chad" Program to facilitate punch card buyout. There are nine counties in the state that will require new voting systems. The secretary of state will lead a statewide procurement effort to acquire these systems. The scope of Adios Chad will be the replacement of voting systems, in which the secretary of state will work with county election officials to ensure that all needs are met, including but not limited to:

- device acquisition;
- system maintenance;
- election preparation services; and
- election tabulation services.

The secretary of state will act as contract administrator to maximize the purchasing power. The counties will own, operate, and work with the vendor to maintain the new voting systems and retain control of election services at the county level.

The secretary of state will implement a statewide voter registration system to comply with the HAVA Title III. Working with the county recorders and state election officials, the state will define functional requirements, and roles and responsibilities of carrying out the functions of voter registration. The system will serve as the single, uniform, official, centralized, interactive computerized statewide voter registration list defined, maintained, and administered at the state level. This is a priority of the state's activities that is second only to the removal of all punch card systems. Should any Title I funds remain after the replacement of punch card systems, those funds will be allocated as described in the section 6.

The committee recommends that any remaining funds will be used for the other programs described in Title I section 101 (b) (1) in accordance with the priorities established by this committee. Section 6 of the State Plan details how the funds will be allocated.

State Capitol: Election Services Department
1700 W. Washington Street, 7th Floor
Phoenix, Arizona 85007-2888
Telephone (602) 542-8683 Fax (602) 542-6172

5/15/03

Section 11

Sec. 254 (a) IN GENERAL - The State plan shall contain a description of each of the following:

(11) How the State will conduct ongoing management of the plan except that the State may not make any material change in the administration of the plan unless the change

- **(A) is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;**
- **(B) is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and**
- **(C) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).**

Recommended Language

- Pursuant to Arizona Revised Statutes § 16-452 the secretary of state "...prescribes rules to achieve and maintain the maximum degree of correctness, impartiality, uniformity and efficiency on the procedures for early voting and voting, and of producing, distributing, collecting, counting tabulating and storing ballots." Many of the provisions of the Help America Vote Act of 2002 (HAVA) are addressed by the statutes and secretary of state procedures.

- The secretary of state shall conduct annual meetings with county recorders and elections officials to review standards and assess the goals and objectives of the HAVA State Plan.

- If the secretary of state determines the State Plan requires material change, the secretary of state shall:
  1. propose the recommended changes within 60 days of the annual meeting;
  2. allow for public comment not less than 30 days; and
  3. submit to the Department of Justice for pre-clearance;
  4. publish in the federal register upon submitting the revised plan to the Election Assistance Commission.

5/15/03

Section 13

Sec. 254 (a) IN GENERAL - The State plan shall contain a description of each of the following:

(13) A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the committee under such section and section 256.

Recommended Language

Pursuant to Section 255, on January 31, 2003, the chief state election official, Janice K. Brewer, Arizona Secretary of State, appointed a citizen advisory committee to help in the development of the State Plan (see press release page 4). The citizen advisory committee was named the Arizona State Planning Committee. Secretary of State Jan Brewer invited Governor Janet Napolitano to select two members for the committee, the President of the Arizona State Senate, Honorable Ken Bennett and Speaker of the House, Jake Flake, each also nominated one member. Pursuant to Section 255 of the Help America Vote Act of 2002 (HAVA), the committee included the chief state election official, the election officials from the two most populous jurisdictions, other local election officials, stake holders and citizens. Secretary Brewer made committee appointments which included a cross-section of people from throughout Arizona, including representation of groups of individuals with disabilities and minority representation.

On February 5, 2003, the secretary of state established the website at www.hava.sos.state.az.us as an open forum for public review and comment of the State Planning Committee meeting agendas, minutes of meetings, and all back-up material for the State Plan. This information was available for public inspection at all times during the duration of time the public meetings were held.

The State Planning Committee held open, public meetings in compliance with the *Open Meeting Laws of the State of Arizona* on February 7, 14, 21, and 28, March 7 and 14, 2003. Following the March 14, 2003 State Planning Committee Meeting, the "preliminary" State Plan will be posted on the secretary of state's website and made available for public review and comment for a period of 30 days. The secretary of state will announce through a statewide press release after March 14, 2003 the locations where the preliminary State Plan is available for public review and comment. Various media outlets will be requested to publish the preliminary State Plan and/or announce its availability as a public service announcement.

Arkansas Secretary of State

Implementation Plan for the Help America Vote Act (HAVA)

Charlie Daniels
Arkansas Secretary of State
Room 256 State Capitol
Little Rock, AR 72201
501-682-1010

Introduction

As Secretary of State, it is my pleasure to present Arkansas's draft plan for implementation of the Help America Vote Act. As required by Public Law 107-252, this document represents a long-range plan for implementation of various election improvements in the state.

The Help America Vote Act represents a significant shift in the administration of elections to the state level and mandates improvements in almost every area of the election process—from voter registration to equipment used at the polls.

Arkansas considers the mandates of HAVA an opportunity to build on a successful system of elections. Much thought was given early in the planning process to involve local election officials and other members of the election community in strategic direction as well as implementation of HAVA mandates. As a result of many months of communication and planning, we have arrived at a plan that we feel is in the best interest of Arkansas's voting public.

The Arkansas General Assembly passed Acts 994 and 995 to put the state in compliance with the provisions of Public Law 107-252. A committee of stakeholders met to discuss various elements of these acts and the broad requirements of HAVA. During the planning process, the committee discussed various options available to meet HAVA mandates contingent on the level of federal funding available over the next three years. As a result, this plan envisions either an ultimate, comprehensive implementation of HAVA's full intent, or a more conservative implementation approach to meet basic mandated guidelines should funding fail to meet authorized levels.

As chief election official, it is my pledge to work with the local election officials and other state election officials to make HAVA's goals a reality in this state. The State Board of Election Commissioners, county election commissions, county clerks, and county election coordinators will each have a role in implementing various provisions of this plan. The state will provide communication, education, and leadership, as well as support, to each of these entities to ensure full compliance with HAVA in Arkansas.

The State of Arkansas looks forward to this exciting and historic opportunity to affect significant improvements to the elections process.

Charlie Daniels
Arkansas Secretary of State

Use of Requirements Payments

(1) How the State will use the requirements payments to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Title III contains the following requirements:

I. VOTING SYSTEMS STANDARDS

General Requirements

HAVA requires the states to have in place by January 1, 2006, voting systems that meet the standards set out in Section 302 of the Act. Voting systems include punch card equipment, lever voting machines, optical scan machines, direct read electronic voting devices (DRE's) and paper ballots counted by hand. HAVA does not ban any type of voting system presently in use, but the standards set out in Section 302 are most easily met by DRE's.

HAVA requires that any voting system in use after January 1, 2006 must:

1. Permit the voter to verify the vote before the ballot is cast and counted;
2. Provide the voter with an opportunity to change the ballot or correct an error, including the opportunity for a replacement ballot in paper ballot counties;
3. Privately notify the voter of an overvote, the effect of an overvote, and an opportunity to correct the overvote.

Audit Requirements

In addition, each voting system must produce a permanent paper record for audit purposes that is capable of manual audit, and the voting system must allow the voter to change a vote before the paper record is finalized.

Accessibility Requirements

The state must also ensure that its voting systems are accessible for individuals with disabilities "in a manner that provides the same opportunity for access and participation ... as for other voters." Section 301(a)(3)(A).

Some counties may be required to offer Spanish language accessibility.

Other Requirements

Finally, voting equipment used in the state must comply with the error rate standards set by the Federal Election Commission that were in effect on October 29, 2002. The state must also have a uniform and nondiscriminatory definition for what constitutes a vote.

How the State will use the requirements payments to meet the requirements of Title III relating to voting systems standards.

The Title III requirements are most easily and efficiently met by direct read electronic (DRE) voting machines. Only five counties currently use DRE's in Arkansas, and whether the machines in some of those counties meet the requirements of Title III has not yet been determined. An additional 46 counties in Arkansas use optical scan ballots that are tabulated in a central location. Three counties use optical scan ballots that are tabulated at the polling sites, and 8 counties use paper ballots that are counted by hand. The 13 counties that use lever machines or punch card systems will have those systems replaced with DRE's using Title I funds.

Arkansas's preference with regard to compliance with Title III voting system requirements is to use requirements payments, local funds (if necessary) and state funds (if possible) to purchase uniform, Title III compliant voting systems for each county in the state. Preferably, these voting systems would be DRE's of the same brand and model throughout the state.

There is a great deal of uncertainty, though as to the availability of sufficient federal, state and local funds to meet this goal. Also, it may require legislation to mandate the use of uniform systems. Alternatively, then, the State may use requirements payments to purchase at least one DRE for each polling site in those counties to meet accessibility requirements. If the necessary funding or legislation is not in place to implement a uniform electronic voting system, the State may use requirements payments to establish a voter education program for those counties with paper ballots counted by hand and central tabulation equipment.

II. PROVISIONAL VOTING

HAVA requires that when a voter goes to a polling place and the voter's name does not appear on the precinct list, the following procedure is required:

1. The poll worker notifies the voter that the voter may cast a provisional ballot;
2. The voter may cast a provisional ballot if the voter executes a written affirmation before the poll worker that the voter is a registered voter at that place and is eligible to vote in that election;

3. The poll worker provides written information to the voter that the voter can find out whether the vote was counted by accessing a toll-free telephone number, receiving a postage-paid mailer, or internet website and, if not counted, the reason the availability of which information is limited to the voter;
4. The provisional ballot and the affirmation are then transmitted to the election commission for determination of the eligibility of the voter;
5. The election commission makes its determination and transmits information regarding the provisional ballot to The Secretary of State's office.

How the State will use the requirements payments to meet the requirements of Title III relating to provisional voting.

Act 994 of 2003 implements these requirements. Arkansas will use requirements payments to provide information and training to local election officials regarding this change and to establish a confidential free access system using either a toll-free telephone number, the internet, postage-paid mailer or all of the above, depending on funds available.

III. VOTING INFORMATION

On Election Day, the following information must be posted at each polling site:

1. Sample ballots for that polling place;
2. The date and hours the polls will be open;
3. Instructions on how to vote, including how to cast a provisional ballot;
4. Instructions for first time voters who registered by mail;
5. General information on voting rights under applicable federal and state law, including information about provisional ballots and how to contact an appropriate official if a voters rights are alleged to have been violated;
6. General information on voter fraud laws.

How the State will use the requirements payments to meet the requirements of Title III relating to voting information.

Act 995 of 2003 provides for implementation of this requirement. The State will provide information and training to voters and election officials regarding the information to be posted at the polling sites. The State may provide posters with the information required in items 5 and 6 above, depending upon the availability of funds.

IV. STATEWIDE VOTER REGISTRATION LIST

The Secretary of State currently maintains a statewide voter registration list. HAVA requires certain characteristics and procedures regarding such a list that will result in substantial changes in the way the state maintains and operates the list.

Arkansas is ahead of many states, in that all the counties utilize the same voter registration software. However, the process by which the sharing of this information via the Internet between the counties, The Secretary of State's office and the Department of Motor Vehicles lacks many of the features required under HAVA.

Currently, The Secretary of State's office retains a copy of the voter registration database for every county. The original voter registration database is housed and maintained at each individual county. The Secretary of State's office retrieves data from the counties and updates it's file each weekend. The current system of file transfers is achieved through a 56kbs phone line connection. This system is extremely slow and requires constant maintenance and supervision. Manual intervention is often necessary to intervene in the electronic transmission of data to achieve a successful transfer of this information. The Secretary of State's Office utilizes 16 phone lines for connections with the counties and of course, the phone bills are quite costly for this process.

The Department of Motor Vehicles (DMV) transfers a file to Department if Information Services (DIS) containing voter registrations each evening. The Secretary of State's office then retrieves the file from DIS, sorts it by county and transfers the information to the appropriate counties. This process is also very difficult to manage and maintain the integrity of the transmissions due to network connectivity problems. In order to ensure complete reception of voter registrations via this method, the use of a manual record is used as a backup system. This requires the DMV to send The Secretary of State's office a daily log of registrations. The log is mailed to each county on a weekly basis.

HAVA requires that The Secretary of State's office "implement, in a uniform and nondiscriminatory manner, a *single*, uniform, official, centralized, interactive, computerized statewide voter registration list, defined, maintained and administered *at the State level*." (emphasis supplied) The list must contain the name of every registered voter and a "unique identifier" for each voter. In effect, every voter will have a unique number.

Presumably, for new voters, that "unique identifier" will be either their drivers' license number or the last four digits of their social security number (or, if they have neither of those, a random number assigned by the state). This is because each new voter will be required to list their driver's license number or, if they do not have a driver's license, the last four digits of their social security number on their application for registration. If new registrants have neither, a number will be assigned.

HAVA stresses that:

1. The statewide list "shall serve as the *single system* for storing and managing the *official* list of registered voters throughout the state." (emphasis supplied);
2. The statewide list must be coordinated with other agency databases within the state;
3. *Any* election official must have immediate electronic access to the list;
4. Registration information obtained by local officials must be electronically entered into the computerized list on an expedited basis, and The Secretary of State's office must provide support for this.

Under these new requirements, the Voter Registration List will now be centralized at The Secretary of State's office. The counties will continue to function in the same capacity; however, they will be logged into the Internet and have access to one large database containing all 75 counties, rather than being able to only view their own county's data. This new configuration will provide a faster and more dependable connection to the new centralized database. In addition, it will allow the Arkansas County Clerks access to the entire statewide file to check for duplicate registrants. The new system will allow access to the system using any computer, provided the user has an account and a password.

HAVA requires that list maintenance – the addition and removal of names from the list - must be performed in accordance with existing federal laws, and such procedures must ensure the names of all eligible voters appear on the list; only voters that are not eligible to vote are removed from the list. Duplicate names are also eliminated from the list. Information regarding deceased registrants will be obtained from the Department of Health and an additional connection with the Arkansas Crime Information Center will also be utilized to obtain information regarding persons convicted of a felony from which that person has not been pardoned or discharged. HAVA also requires that The Secretary of State's office and county clerks provide security for the system.

Additionally, The Secretary of State's office must enter into an agreement with the Department of Motor Vehicles (DMV) to match information in the statewide list to the DMV information. The transmission of data with the new system will be transferred from the DMV to The Secretary of State's office and the counties will then have the ability to search and download their respective county's DMV transmission whenever they prefer. This should alleviate many of the problems the Secretary of State's office has incurred in having to "drop" the information into the county file. It further requires that the DMV enter into an agreement with the Social Security Administration to help with the match of those numbers.

How the State will use the requirements payments to meet the requirements of Title III relating to the statewide voter registration list.

Act 995 of 2003 implements the requirements of the new uniform, centralized statewide voter registration system as defined by HAVA. The State will both extend and revise the current software and hardware contract agreements to implement these changes, or enter into a new agreement with a voter registration system provider to affect the necessary changes noted above.

V. FIRST TIME VOTERS WHO REGISTER BY MAIL

A large percentage of Arkansas voters register to vote by mail. HAVA requires an individual who is voting in person at a polling site for the first time after registering by mail to present a photo id or other, specified identification. If a first-time voter casts an absentee ballot by mail for the first time, the voter must include a copy of such identification with the absentee ballot application. A voter who fails to provide such identification may vote a provisional ballot.

A voter is exempt from the identification requirement stated above if the voter provided a copy of the identification with the voter's registration application, or if the voter listed on the application the voter's drivers license number or last four digits of the voter's Social Security number.

County Clerks must be prepared to accept and retain copies of the voter's identification papers or applicable numbers beginning January 1, 2003.

How the State will use the requirements payments to meet the requirements of Title III relating to first time voters who register by mail.

Acts 994 and 995 of 2003 implement this HAVA requirement. Arkansas will use requirements payments to provide information and training to voters and election officials regarding this requirement.

VI. VOTER REGISTRATION FORM

HAVA requires that by January 1, 2004, the voter registration form for those voters who register by mail shall include the following:

1. The question, "Are you a citizen of the United States of America?";
2. The question, "Will you be 18 years of age on or before Election Day?";

3. A statement that if the individual is submitting the form by mail and is registering for the first time, the identification requirements set out above must be submitted with the application in order to avoid additional identification requirements upon voting the first time.

HAVA also requires the county clerk to notify the applicant if any of this information is omitted and allow the applicant time to complete the application in a timely manner.

How the State will use the requirements payments to meet the requirements of Title III relating to the voter registration form.

Act 995 of 2003 implements this HAVA requirement. Arkansas will use requirements payments to provide information and training to voters and election officials regarding this requirement, and, if funds are available, to print new forms.

Distribution & Monitoring of Requirements Payments

(2) How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph 1, including a description of –

(A) The criteria to be used to determine the eligibility of such units or entities for receiving the payment;

(B) The methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph 8.

If sufficient funds are appropriated to allow the purchase of a uniform voting system (DRE), and if legislation is enacted to require the counties to use such a system, the State will use its purchasing power to enter into a contract with a vendor (or vendors) to purchase the equipment necessary to implement a system. The counties will then purchase the equipment through the State contract with requirement payment funds and any state and/or local funds available.

If it is determined that sufficient funds are not available, or if there is no legislation passed by the Arkansas General Assembly to implement a uniform system, then the State, through The Secretary of State's office, will implement a program to purchase other types of voting equipment, or provide voter education, as described in paragraph 1 so as to comply with the requirements of Title III.

The counties' access to requirements payments funding would be by grant application based on one, some or all of the following factors:

1. The amount of federal funds available;
2. The amount of state funds appropriated for such purchases
3. The number of ballot styles;
4. The number of registered voters;
5. Voter turnout;
6. The number of polling places;
7. Other demographic and geographic factors.

Other factors may also be considered. The exact formula for distribution cannot be known until the total amount of federal funding is determined. The Secretary of State will compile data and present a recommended funding formula to the committee as soon as possible after the relevant facts are known.

If sufficient funds are available, The Secretary of State's office may also implement a grant program to assist the counties in election official training, voter education, election day posting and other activities related to Title III compliance. If any funds are available after compliance is assured, The Secretary of State's office will invest in Geographical

Information Systems (GIS) programs and other programs to improve the administration of elections in the various counties.

Requirements payments are paid into the election fund and the funds therein are appropriated to The Secretary of State's office. The Division of Legislative Audit (**www.legaudit.state.ar.us**) audits the expenditure of funds appropriated by the State and will audit expenditures made by the counties with respect to any grants to the counties of requirement payments. The Secretary of State's office will also employ four election coordinators whose responsibilities will include the monitoring of these expenditures. Each election coordinator will monitor and assist the counties of each of the state's four congressional districts. The Secretary of State's office will make periodic reports to this committee regarding local expenditures of requirements payments.

The accounting software utilized by The Secretary of State's office allows for tracking and monitoring of program expenses incurred by the State under HAVA. The Secretary of State's office shall provide these accounting records for audit purposes.

Voter Education and Training

(3) How the State will provide for programs for voter education, election official education, and poll worker training which will assist the State in meeting the requirements of Title III.

The Secretary of State's Office, in the past, has published several voter education guides and produced a video/symposium called Talkback...Vote. Currently, all voter registration materials are being updated and new voter education and outreach programs are being developed. These new programs are targeted toward the following stakeholders:

A. All Arkansas citizens;
B. Arkansas citizens who are registered to vote;
C. Arkansas citizens who are or will become eligible to vote;
D. First time voters.

The Secretary of State's office is designing bilingual informational materials to be utilized in voting seminars, by public and private organizations, in high school and college symposiums and that will also be available on The Secretary of State's website. This information will include the following:

A. Voting Instructions (bilingual)
   1) How to register to vote;
   2) How to vote;
   3) How to use the new voting equipment;
   4) How a provisional ballot may be cast and confirmed;
   5) Polling site locations;
   6) Voting Rights.
B. Interactive Website
   1) Polling Site lookup;
   2) Registration verification;
   3) Election Official and Poll Worker Training via PowerPoint presentation.
C. Public Service Announcements.
D. Participation in the National Student/Parent Mock Election Program. Arkansas has participated in this event since 1996 and will continue to enhance this program. This event is scheduled for October 2004.

The Secretary of State's office will update its publications and programs to provide information relevant to the requirements of HAVA.

The State Board of Election Commissioners office provides election and poll worker training as mandated in Arkansas Code Annotated 7-4-107(b)(1)(b). Each county election commission must designate one poll worker per polling site who has attended training coordinated by the State Board. *See Arkansas Code Annotated 7-4-109(f)(1).*

Election official training programs will be enhanced by the addition of the four election coordinators and other personnel in the Secretary of State's office who will assist the State Board in broadening its educational program and increase the use of all forms of media to educate and inform the citizens of Arkansas.

Voting System Requirements

E. How the State will adopt voting system guidelines and processes, which are consistent with the requirements of section 301.

Title III compliant DRE's will be purchased and deployed to each polling site to ensure that there is at least one accessible voting system at each poll. Additionally, The Secretary of State's office will develop a formula to ensure that requirements payment funds will be made available only for the purchase and implementation of election systems that meet Title III requirements. Guidelines will be developed by the State Board of Election Commissioners office in the form of rules and regulations to ensure voting system guidelines and processes that are consistent with the requirements of section 301. Any legislation introduced regarding the implementation of voting systems will include the requirement that the requirements of section 301 be followed. The Secretary of State and State Board of Election Commissioners offices will continue to survey the counties and review polling sites to ensure access. Any legislation that mandates a uniform statewide voting system should define that system as consistent with the voting system guidelines required by HAVA.

The State Board of Election Commissioners office has established procedures for what constitutes a vote on each of the systems currently employed in Arkansas, and will continue to do so for any future system introduced.

Establishment of Election Fund

Section 254

(a)(5) How the State will establish a fund described in subsection (b) for purposes of administering the State's activities under this part, including information on fund management.

The Arkansas Secretary of State's office has established an election fund that will track all of the accounting activity pertaining to Public Law 107-252, in accordance with Title IX requirements. The accounting software utilized for budgetary management allows The Secretary of State's office to keep records with respect to the payments and expenditures related to HAVA that are consistent with sound accounting principles. Cost centers within the established fund allow the capability to track accounting activity within specific categories of the election fund, including the production of records which fully disclose the amount and disposition by the recipient of the HAVA funds, the total or partial costs of related projects, and such other records as will facilitate an effective audit.

The Secretary of State's office will manage the election fund and provide accessibility to records for auditing purposes. Both federal and state monies will be deposited into the election fund to satisfy the requirements of Public Law 107-252 with regard to expenditures of federal monies and the 5% state match on those expenses. Expenditures made from any cost center within the election fund shall be used solely for the purposes of implementing the Help America Vote Act. No expenditures may be made without an appropriation, which the state has secured contingent upon receipt of grants and payments specified under the act.

Budget

(6) The State's proposed budget for activities under this part, based on the State's best estimates of the cost of such activities and the amount of funds to be made available, including specific information on—

- *a. The costs of the activities required to be carried out to meet the requirements of title III;*
- *b. The portion of the requirements payment which will be used to carry out activities to meet such requirements;*
- *c. The portion of the requirements payment, which will be used to carry out other activities.*

The Help America Vote Act initially authorized $3.8 billion dollars for implementation of election improvement mandates. The final appropriation for fiscal year 2003 stood at $667 million below authorization levels. The President's budget for fiscal year 2004 also represents half of the $1 billion originally authorized. Arkansas, like other states, stands to receive just over half of the Title III requirements payments estimated for 2003.

Given the uncertainty of the budget situation and forthcoming requirements payments over the next three years, the proposed budget for HAVA depends largely on variable factors. For example, the state's goal is to pursue a uniform, electronic voting system for all 75 counties. However, should appropriations continue to fall short of levels authorized under the act, the state may choose to provide a voter education program in lieu of purchasing electronic equipment.

The table below lists funding scenarios for Arkansas under Title III of HAVA.

Fiscal Year	*Authorized Versus Appropriated/Proposed*	*Arkansas's Share*
2003	$1.5 B vs. $833 M	$7.9-$14.2 M
2004	$1 B vs. $500 M	$4.7-$9.5 M
2005	$600 M	$5.7
Total		$18.3-$29.4

The following budget represents a range of funding levels. The first level represents the spending contingent on full funding of HAVA; the second level represents mandated spending, supplemented by state and local government, should HAVA fail to receive 100% of the authorized funding level.

Cost Estimate Level A	*Cost Estimate Level B*	*Federal Share*	*State Match*	*Percentage of Requirements Payments Needed*
Installation of Uniform Electronic Voting System—All voters have access to DRE system. Cost: $20 Million (After Title 1 Early Out)	Replacement of Punch Card & Lever Machines, One DRE Per Poll, and Voter Education Program for other jurisdictions Cost: $12 Million (After Title 1 Early Out)	Level A $19 M Level B $11.4	Level A $1 M Level B $600 K	65.5-63.3%
Statewide Voter Registration List—HAVA Compliant with Improved Connectivity for local users and Improved Addressing System Cost: $5M (After Title 1)	Statewide Voter Registration List—HAVA Compliant Cost: $3 M (After Title 1)	Level A $4.7 M Level B $2.85 M	Level A $250 K Level B $150 K	16.4-15.8%
Provisional Voting—Education Program, Support to Counties, Free Access by Phone, Mail or Internet	Provisional Voting—Free Access System with local jurisdictions administering	Level A $47.5 K Level B $23.7 K	Level A $2500 Level B $1250	Less than 1%
Training & Education for all poll workers & volunteers.	Training & Education for Election Officials Only.	Level A $3.32 M Level B $2.37 M	Level A $175 K Level B $125 K	11.5-13.2%
Administrative Complaint Procedures	No Option.	Level A $76 K Level B $38 K	Level A $4 K Level B $2 K	Less than 1%
Voting Information to be published in consistent format-- coordinated and provided by State.	Basic voting information provided by State with format, publication, and distribution responsibility of local jurisdictions.	Level A $47.5 Level B $28.5	Level A $2500 Level B $1500	Less than 1%
Program Management & Support, including research projects to improve data quality, connectivity, budgetary management, and performance measurement.	Program Management by State, with some involvement by partnering agencies/research institutions.	Level A $1.52 M Level B $1.23 M	Level A $80 K Level B $65 K	5.2-6.9%

Maintenance of Effort

Section 254

(a)(7) How the State, in using the requirements payment, will maintain the expenditures of the state for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the state for the fiscal year ending prior to November 2000.

Both the State of Arkansas and local jurisdictions bear fiscal responsibility for the administration of elections in the state. Public Law 107-252 designates federal funds for the use of improving the administration of elections, not to supplant activities already budgeted for the administration of elections. The State will continue to fund the administration of elections at an amount not less than the aggregate of those expenditures during the fiscal year 2000.

Performance Goals & Measures

(8) How the State will adopt performance goals and measures that will be used by the State to determine its success in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the state will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.

Overview

HAVA requires the various states to adopt performance goals and measures that will gauge the effectiveness of any programs or policies funded by federal dollars. Election improvement mandates outlined in the Act span an enforcement timeline of three years. In addition to any other reporting required by HAVA with regard to use of federal payments, the state will also provide a complete performance evaluation report during 2006.

Process Used to Develop Performance Measurement Criteria

The Secretary of State and the Secretary of State's advisory committee, made up of local election officials, will define these performance goals and measures for programs implemented at both state and local levels. Generally, these goals and measures shall be defined to the local election officials charged with administering HAVA programs, and the local election officials shall share responsibility for monitoring and evaluating the success of the elements of the plan in their jurisdictions. The State will partner, if necessary, with research institutions in the state with proven experience in performance evaluation of governmental entities to ensure consistent format and instructions for reporting.

Suggested performance goals and measures outlined within the state plan may be revised to include more specific instruments of measurement as the implementation of HAVA continues in the State.

State Plan Element (Performance Goal)	*Implementation Timetable*	*Suggested Criteria For Measuring Performance*	*Official Responsible*
Replacement of Punch Card & Lever Voting Systems	May, 2004	Number of jurisdictions converting to electronic systems.	Secretary of State & County Election Commissions.
Installation of one DRE per polling site for individuals with disabilities	November 2004-January 2006	Number of polling sites compliant.	Secretary of State & County Election Commissions.
Statewide Voting System compliant with §301	January 1, 2006	Number of jurisdictions compliant. Other factors included in evaluating performance of all voting system elements to include training programs, voter education, tabulation/reporting time, voter satisfaction.	Secretary of State & County Election Commissions.
Provisional Voting	January 1, 2004	Number of provisional ballots cast and operation of free access system.	Secretary of State & County Election Commissions.
Voting Information	January 1, 2004	Quality, quantity, effectiveness of information posted.	Secretary of State & County Clerks.
Statewide Voter Registration List	January 1, 2004 (or January 1, 2006 in event of a waiver).	Conversion from a uniform, locally maintained system to a centralized statewide system shared in 75 jurisdictions. Effectiveness of data-sharing with partnering state agencies and accuracy of data and reports.	Secretary of State & County Clerks.
Voter Education & Training	Immediate & Ongoing	Success of voter education programs, turnout, number of complaints, surveys.	Secretary of State, County Clerks, and County Election Commissions.
Poll Worker Training	January 2004-ongoing	Number and type of training programs provided, number of poll workers trained.	Secretary of State and State Board of Election Commissioners.
Administrative Complaint Process	July 15, 2003	Number of complaints received, processed, and resolved.	State Board of Election Commissioners.
Accessibility of Polling Sites	January 1, 2004—January 2006	Number of polling sites ADA compliant, number improved by modification, number out of compliance.	Secretary of State and State Board of Election Commissioners.

Administrative Complaint Procedures

Section 254
(a)(9) A description of the uniform, non-discriminatory state-based administrative complaint procedures in effect under section 402.

The Arkansas State Board of Election Commissioners is statutorily charged with the review, and if necessary the investigation, of all citizen complaints regarding violations of election and voter registration laws under Arkansas Code 7-4-101. In Act 994 of 2003, the Arkansas General Assembly added the following language requiring the State Board of Election Commissioners to:

(10)(A) Formulate, adopt, and promulgate all necessary rules and regulations to establish uniform and nondiscriminatory administrative complaint procedures consistent with the requirements of Title IV of the federal Help America Vote Act.
(B) The cost of compliance with Title IV of the federal Help America Vote Act shall be paid from the fund established to comply with the federal Help America Vote Act.

The proposed regulations provide that complaints regarding violations of any of the provisions set forth in Title III of Public Law 107-252 shall be filed with the State Board of Election Commissioners office. Complaints shall be written, notarized, signed and sworn by the person filing the complaint. The Board shall provide a hearing upon request by the complainant, and shall complete its investigation no later than 90 days after the filing of the complaint. If the Board cannot resolve the complaint within 90 days of the filing, the complaint shall be referred to an arbitration panel composed of three persons selected by the Board and the complainant, with the third member selected by the two designated members.

Description of Early-Out Payments

Section 254
(a)(10) If the state received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

The Early-Out payments described in Title I, Section 101 are targeted specifically for election administration improvements and replacement of punch card and lever voting equipment. It is the intent of the Office of the Secretary of State to utilize the fund provided under this section for these two areas of activity.

Section 101

Under Title I, Section 101 Arkansas expects to receive $3,920,108.62 based on the formula presented.

Section 101 designates the allocation of funds for improvement in the overall administration of elections in Arkansas. In general, payments made under this title may be used for any of the following purposes:

1) Complying with Title III requirements;
2) Improving the administration of elections for federal office;
3) Educating voters concerning voting procedures, rights, and technology;
4) Training election officials, poll workers, and volunteers;
5) Developing the state plan for implementation of Public Law 107-252;
6) Improving, acquiring, leasing, modifying, or replacing voting systems consistent with Title III;
7) Improving the accessibility and quantity of polling places;
8) Establishing a toll-free hotline for voter information.

Budget for Section 101 HAVA funds		
Total Section 101 Available	$3,900,000	
Title III Requirements (Voter Registration List)	$1,950,000	50%
Voter Education & Training	$585,000	15%
R&D for State Plan--Administrative Costs	$292,500	7.5%
Voting System Replacement	$975,000	25%
Polling Site Accessibility	$97,500	2.5%

Each of the above election administration goals represents a series of activities intended to institute assistance and education for Arkansas's electorate, ensure compliance with voting system technology standards, and improve the state's voter registration list.

Section 102

Title I, Section 102 targets the replacement of punch card and lever voting machines. In Arkansas, fifteen counties were eligible for payments under Section 102.

County	*Type of System*	*Maximum Payment*
Arkansas	**Punch Card**	**$64,000**
Baxter	**Punch Card**	**$164,000**
Benton	**Punch Card**	**$332,000**
Hot Spring	**Punch Card**	**$132,000**

Mississippi	Punch Card	$288,000
Saline	Punch Card	$276,000
White	Punch Card	$356,000
Boone	Lever	$108,000
Desha	Lever	$84,000
Faulkner	Lever	$188,000
Jefferson	Lever	$804,000
Marion	Lever	$64,000
Searcy	Lever	$76,000
**Columbia*	Lever	$72,000
**Union*	Lever	$212,000
Total		$3,220,000

*Columbia and Union counties currently employ DRE voting equipment, but used lever machines during the November 2000 General Election. These counties qualify for payment under Section 102 for reimbursement.

In compliance with Section 102, Arkansas will commit to 100% replacement of punch card and lever machine voting systems in the state. Installation of a uniform voting system statewide will begin with full deployment of compliant voting system technology as required by HAVA in the thirteen jurisdictions listed above. The state's contract with a provider of certified voting systems will include a minimum payment equal to Section 102 monies received. Supplemental funding for this phase of implementation is anticipated. These additional monies may be sought from Section 101 funds, Title III requirements payments, the participating jurisdictions, or any combination thereof. These monies will be utilized to implement Phase I of improving, acquiring, and replacing voting systems and technology for casting and counting votes in Arkansas.

The expenditure and the application of Section 101 and Section 102 funds will include the strict adherence to the following laws:

A. The Voting Rights Act of 1965;
B. The Voting Accessibility for the Elderly and Handicapped Act;
C. The Uniformed and Overseas Citizens Absentee Voting Act;
D. The National Voter Registration Act of 1993;
E. The Americans with Disabilities Act of 1990;
F. The Rehabilitation Act of 1973;
G. The Help America Vote Act of 2002.

Ongoing Plan Management

(11) How the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change—

a. Is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;
b. Is subject to public notice and comment in accordance with section 256 in the same manner as the State plan;
c. Takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).

The state will provide ongoing management of all elements of the plan. No material changes in the plan shall be made unless the state complies with the requirements listed in subsections a, b, and c above.

Yearly Changes in Plan

(12) In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal and of how the State succeeded in carrying out the State plan for such previous fiscal year.

This is the first year in which the State of Arkansas is submitting an implementation plan for HAVA. Subsequent plans will note any changes in this plan, as well as describe the success of the state in implementation efforts.

Description of the Committee

Section 254
(a)(13) A description of the committee which participated in the development of the state plan in accordance with section 255 and the procedures followed by the committee under such section and section 256.

The Secretary of State appointed the Help America Vote Act (HAVA) Strategic Planning Committee in April of 2003. The committee, comprised of the chief election officials from Arkansas's two most populous counties and other stakeholders and citizens, met as required by Public Law 107-252 to provide review and comment on the state plan. Members of the committee and the constituencies represented are as follows:

First Name	Last Name	Organization
Leta	*Anthony-Carthan*	AR. Institute. On African-American. Affairs
Helen	*Bradley*	Jefferson County Clerk
John Logan	*Burrow*	Washington Co. Election Commissioner
Carolyn	*Cook*	Drew County Clerk

Vivian	*Flowers*	Arkansas Legislative Black Caucus
Jonathan	*Greer*	Association of AR Counties
Patti	*Hill*	Crawford County Clerk
Jim	*Hudson*	DHS Division of Blind Services
Susan	*Inman*	Pulaski County Election Coordinator
Stephanie	*Johnson*	League of Women Voters
Willie L.	*Jones*	Public Member, Mississippi County
Randy	*Martin*	Public Member, Pulaski County
Donna	*Massey*	ACORN
Vincent	*McKinney*	Disability Rights Center
Melinda	*Mulford*	Boone County Clerk
Mike	*Munns*	DFA Office of Driver Services
Lucretia	*Norris*	Office of the Governor
Ron	*Oliver*	Chairman, Democratic Party of Arkansas
Ann Burton-	*Portis*	Mississippi County Election Commissioner
Karen	*Prichard*	Washington County Clerk
Marty	*Ryall*	Chairman, Republican Party of Arkansas
Jesus	*Sanchez*	AFL-CIO & Hispanic Arkansans
Ron	*Sheffield*	Attorney, Public Member, Pulaski County
Mary Lou	*Slinkard*	Benton County Clerk
Carolyn	*Staley*	Pulaski County Clerk
Susie	*Stormes*	Director, State Board of Election Commissioners
Doris	*Tate*	Sebastian County Clerk
Janet	*Tweedle*	Monroe County Clerk
Brit	*Williford*	Ouachita County Clerk
John C.	*Wyvil*	AR. Rehabilitation Services

[i] Percentage of federal dollars needed represents data based on cost *estimates* for implementing the various HAVA mandates. These estimates assume the 5% state match.

[ii] Performance measures listed in the plan should be considered as examples for shaping the performance measurement process in Arkansas. More specific goals and measures will be defined as the state receives information on variable factors such as funding and participating local jurisdictions.

EXECUTIVE SUMMARY
September 2003

Democracy in America is at a crossroads. Voter confidence in the voting process was shattered by the Florida experience in November 2000. Voter participation in the November 2002 General Election nationally was estimated to be a disappointing 39.9 percent. [1] (See Endnotes) So many citizens today feel disconnected from the voting process.

In response to the crises in voter confidence and participation, the Congress passed and the President signed the Help America Vote Act of 2002 ("HAVA") in October of 2002. This federal law borrows much from California's steps to restore voter confidence and facilitate participation, including modernizing voting equipment. California led this effort with the Shelley-Hertzberg Voting Modernization Bond Act of 2002, Proposition 41, adopted by the voters in March of 2002.

California, however, has its own electoral crisis, as evidenced by the shockingly-low turnout of some 36 percent of our eligible citizens at the polls last November. As Secretary of State, I have no higher priorities than restoring voter confidence in the integrity of the voting process and increasing the participation of informed voters. To further these objectives, I appointed a 24-member Advisory Committee, made up of a diverse, cross-section of Californians, to assist me in drafting a plan for voting in the 21st Century.

The Committee held five public hearings — in Los Angeles, San Diego, San Francisco, Fresno and Sacramento. We heard from more than 250 Californians who shared their ideas with us about how to make the voting process more user-friendly and more secure and how best to implement the provisions of HAVA given the unique characteristics of our state in terms of size and diversity.

On June 17, 2003, I made available for public inspection and comment my Preliminary Plan, publishing notice to that effect. Thereafter, I issued a news release requesting inspection and comment, posted a copy of the Preliminary Plan in English and in Spanish on my official website and sent copies to interested individuals and organizations. The Preliminary Plan remained on public display until after July 17, 2003. I received 53 written comments regarding the Preliminary Plan.

The public testimony and input from the members of the Advisory Committee were very helpful in drafting my Preliminary Plan. In preparing my Final Plan, I have carefully considered the public testimony and the input from the members of the Advisory Committee and I have considered the additional comments of the public and the members of the Advisory Committee in response to my Preliminary Plan. The Final Plan[2] reflects this input and comments.

"My Vote Counts" is a comprehensive road map to restoring voter confidence, a prerequisite to increased participation. "My Vote Counts" details how California will implement HAVA as part of our continuing challenge to make our voting process fairer, more accessible and more secure. Every eligible citizen must be able to say "My Vote Counts" and know it's true. My plan calls for:

Modernizing voting equipment. Punch card voting machines will be replaced.

- Making all polling places accessible to individuals with disabilities or with alternative language needs. Every polling place will have at least one touch screen voting device.
- Enhancing California's provisional voting process. Provisional voters will be able to determine whether their votes were counted.
- Augmenting the information provided to voters. Voters will receive more information at their polling places and elsewhere.
- Improving California's statewide voter registration database.
- Expanding California's efforts to inform eligible citizens about the voting process. A greater effort will be made to reach eligible citizens, including young people, about voting.
- Increasing the education and training of elections officials and poll workers. Elections officials, including poll workers, will receive more education and training.
- Improving California's complaint procedure. California's existing complaint procedure regarding alleged elections law violations will be formalized and made more accessible.

Funding for the plan is based on funds authorized by HAVA and Proposition 41. At this point, the exact cost of implementation is impossible to pinpoint. Variables include the amount of money appropriated by Congress in subsequent years and the methods of implementation determined to be the most cost-effective. All expenditures will be subject to tough state and federal audit procedures.

I am determined to make "My Vote Counts" the defining phrase that captures the essence of voting in California.

KEVIN SHELLEY
Secretary of State

INTRODUCTION

California is defined by its superlatives, first among the states in population, economic energy and rich cultural, ethnic and language diversity. For generations it has been a magnet, attracting adventurers, risk takers and dreamers from around the world who have come to its valleys, mountains and seashores in search of a better life for themselves and for their children. And for many, the state's motto, Eureka — "I found it" — says it all. Indeed, many have found and continue to find California to be the land of opportunity.

California's electoral system reflects the state's unique size and diversity. It boasts a voting age population of some 21,588,461,[2] giving California 53 seats in the House of Representatives and more than 10 percent of the seats in the Electoral College. Federal elections are conducted by the state's 58 counties under the direction of the California Secretary of State, who serves as the state's Chief Elections Officer.[3] California's most populous county, Los Angeles, is the country's largest voting jurisdiction with a voting age population of 5,541,908 while its smallest county, Alpine, contains only 919 of voting age.[4]

The task of conducting error-free elections in California is staggering, made particularly challenging because of an array of circumstances that characterize California and reforms designed to further the opportunity for citizen participation in the political process. These include:

Precinct Numbers

- California has some 25,000 precincts. Staffing these polling places for statewide elections requires more than reliable, trained poll workers in conveniently-located, disability-accessible sites.

- Recruiting and training sufficient poll workers, and locating appropriate polling places are continuing challenges for California elections officials.

Elections Materials

For each statewide federal election, California sends each household containing a registered voter a California Ballot Pamphlet with information regarding state ballot measures, statewide candidates, qualified political parties and other matters. In addition, each voter receives from local elections officials a sample ballot, a local ballot pamphlet, and other information. Additional elections materials are available on election official websites and at polling places. The tasks of preparing and providing the materials are staggering and reviewing the materials can be overwhelming to some voters.

Ballot Complexity

California is known for its ballot complexity. California ballots are often long, due to the numerous ballot measures and candidate races presented to voters, as well as the large

number of political parties qualified to participate in California elections. The complexity of the ballot has a direct impact on voter turnout, complicating efforts to encourage citizen participation at the polls.

Thousands of Different Ballot Types

In statewide primary elections, California elections officials must configure more than 60,000 different ballot types. Accordingly, the risks of providing the incorrect ballot type to a voter are high.

Geography

California has some of the most urban and most rural areas in the country. Densely populated areas such as San Francisco bear little resemblance to the wide open expanses of Modoc County or the forests of Trinity County or the deserts of San Bernardino County, the largest county geographically in the country. Election processes reflect that geographic diversity, challenging elections officials and voters alike.

Voting Systems

As of December 24, 2002, there were 19 companies whose 23 voting systems were certified for use in California. These included three basic categories of systems: Optical Scan, DRE/Touchscreen, and Punch Card. A county is free to use any certified system, leading to widespread diversity among counties and even within counties, which often use one system in polling places and another to count absentee ballots. The array of available systems complicates the training of poll workers, makes educating voters and the media difficult and often con-fuses voters who move from one county to another.

Early Voting

Californians may start voting by mail and in person at various elections offices 29 days before an election. This early voting reduces the timeframe elections officials have to prepare for an election, has a direct impact on campaign strategy and creates additional choices for voters in terms of the timing of their voting.

Political Parties

Currently, California has seven political parties qualified to participate in primary elections. California's closed primary means that party-specific ballots must be prepared in primary elections for the voters registered with each party. Voters who have declined to affiliate with a political party have the option to vote in primary elections only for measures and non-partisan candidates, or to request a ballot to participate in the nomination process for a particular political party.

Provisional Ballots

Since the 1980's, California law has permitted a voter whose eligibility to vote cannot be immediately established at a polling place to cast a provisional ballot. At the 2002 General Election, some provisional ballots were cast. It is estimated that only 60 percent of those ballots were ultimately counted. Provisional voting permits the

handling of disputes after Election Day but it also increases the need for additional training of poll workers, greater education of voters with respect to the provisional voting process, and may delay reporting the outcome of elections.

Vote-by-Mail

Increasingly voters are casting their ballots by mail rather than voting in person. At the November 2002 General Election, more than 27 percent of voters cast ballots by mail, compared to less than three percent of the voters in 1962. A recent law[5] allowing voters to become "permanent absentee voters" means that more and more voters are choosing to permanently vote from home. Voting by mail advances the timeline for elections officials to prepare for an election, often requires a different vote tabulating system from that used to tabulate votes cast in person, and sometimes delays announcing the outcome of elections since many vote-by-mail ballots are processed after election day. These issues especially affect overseas and military voters who, under California law, are entitled to special absentee voter status and can initiate a request for a ballot 60 days before an election.

Language Diversity

In order to ensure that all citizens can participate in the electoral process and pursuant to Federal law, election materials are produced and oral assistance is provided in a variety of languages. For example, Los Angeles County provides ballots, sample ballots, and other materials, as well as oral assistance in seven languages: English, Chinese, Japanese, Korean, Spanish, Tagalog and Vietnamese. Some jurisdictions, in response to local need, provide written and oral assistance in other languages. This adds to the challenges of conducting an error-free election.

> *"HAVA can and should and will be implemented in California as a continuing step in making the electoral process fairer, more accessible, and more secure so that every eligible citizen can say 'My Vote Counts' and know it to be true."*
>
> *— California Secretary of State Kevin Shelley*

With challenges, however, come opportunities. California has been a leader in reforming the electoral system. In fact, many of the provisions in the federal Help America Vote Act of 2002 — HAVA[6] — are already a matter of law, regulation or procedure in California. For example:

- California provided for registration-by-mail in 1975 and vote-by-mail on demand in 1978;
- California provided for permanent absentee balloting in 2000;
- Californians adopted Proposition 41 in the March 2002 Primary Election, designed to partially fund the replacement of prescored punch card voting machines in California;

- California has a statewide voter registration database, known as Calvoter;
- California permits ballots to be corrected or replaced before being cast;
- Provisional ballots have been used in California since the 198os;
- A statewide complaint procedure for making allegations about violations of elections laws is in place, including a toll-free telephone number, 1-800-345-VOTE, for making complaints;
- Extensive efforts are made to accommodate citizens from the disability and minority language communities.

And yet, much more needs to be done, as revealed by the turnout of voting age population of less than 37 percent at the last statewide election in November 2002. Restoring confidence in the integrity of the electoral system is critical if we are to bring voters back to the polls. Properly implemented, HAVA can be a cornerstone of California's efforts to reconnect citizens to the electoral process. On the other hand, as one prominent commentator pointed out during a recent public hearing on election reform, we must not let HAVA become the Hurt America Vote Act.

Indeed, HAVA can and should and will be implemented in California as a continuing step in making the electoral process fairer, more accessible, and more secure so that every eligible citizen can say "My Vote Counts" and know it to be true.

Properly implemented, HAVA can further efforts to reform the way elections are held in California and bring us one step closer to the day when:

- Every eligible citizen, including those with physical disabilities and limited or no comfort with the English language, can vote privately, securely and independently at the polls, at home, at shopping malls and other public places on or before Election Day;
- Every election official and poll worker is thoroughly trained and committed to ensuring that every eligible citizen is treated with respect and courtesy, and can vote easily and securely;
- Every eligible voter receives written and oral information about candidates, measures and the voting process in simple, accurate terms and in languages they can under-stand;
- Voters are informed of their rights prior to voting, when they vote and after they vote;
- Voter registration is available on-line;

- Voting machines are easy to use and flawlessly capture and report voter intent;
- Young voters are engaged in the electoral process as voters, poll workers, and interested citizens, with education regarding the voting process beginning at an early age;
- Any eligible voter can cast a properly-formatted ballot in any precinct anywhere in the state or other appropriate jurisdiction on Election Day;
- Overseas and military voters can vote conveniently and safely wherever they might be;
- No eligible citizen is turned away at a polling place on Election Day without being able to vote an actual or provisional ballot;
- Election Day registration is available to those who do not register prior to the election;
- Internet and/or telephone voting becomes safe and routine.

HAVA, properly implemented, is an opportunity for instituting further reform in California. It is time to seize the moment — and California will, leveraging HAVA not only to restore confidence in the integrity of the voting process, but also to increase voter participation. "My Vote Counts" must be more than a slogan. It must be a defining phrase that captures the very essence of voting in California.

OVERVIEW

The California State Plan was developed by the California State Plan Advisory Committee ("Committee"), a diverse, twenty-four member body appointed by Secretary of State Kevin Shelley, in accordance with Section 255(a) of HAVA. Brief biographies of the members of the California State Plan Advisory Committee begin on page 37.

The Committee held public hearings in Monterey Park (Los Angeles County), San Diego, San Francisco, Fresno and Sacramento. The hearings were publicized in advance by mailing notices to nearly 4,000 interested persons and organizations, by publishing notice in the Los Angeles Times, San Diego Union-Tribune, San Francisco Chronicle, Sacramento Bee, Fresno Bee, and La Opinion — in Spanish, by posting notices in seven different languages on the Secretary of State's website, and by telephoning and e-mailing interested persons.

The hearings were transcribed, videotaped, audio-recorded, and documented by minutes and synopses. At one or more hearings interpreters were available in Chinese (Mandarin and Cantonese), Japanese, Korean, Tagalog, Spanish and Vietnamese. At one or more hearings, audio headsets were avail-able for the hearing and/or visually impaired. All public proceedings were signed in American Sign Language. All hearings were held in facilities in compliance with the Americans with Disabilities Act.

More than 250 oral or written comments were received by the Members of the Committee regarding election reform and HAVA implementation at the public hearings or by mail, fax, e-mail or hand delivery. (Members of the public were able to provide input by sending e-mail to hava@ss.ca.gov.) The comments received were taken into account by the Members of the Committee.[7] The Members, thereafter, met in Sacramento on May 27, 2003, and discussed the implementation of HAVA in California. At that meeting, and subsequent to that meeting, the Members of the Committee made recommendations to the Secretary of State regarding the content of the State Plan. These recommendations were considered in drafting the Preliminary California State Plan.

On June 17, 2003, the Preliminary State Plan was made available for public inspection at the Secretary of State's office in Sacramento and a notice was published to that effect. Thereafter, it was made available for public inspection at Regional Offices of the Secretary of State located in Fresno, Los Angeles, San Diego and San Francisco. A news release was issued announcing that the Preliminary Plan was available for public inspection and comment until July 17, 2003. Copies were posted in English and Spanish on the Secretary of State's official website (www.ss.ca.gov). Copies of the Preliminary State Plan were sent to interested persons and organizations. Comments regarding the Preliminary State Plan were received by mail, hand delivery, fax, and e-mail.[8] All comments were considered. Revisions of the Preliminary Plan were made in response to the comments. The Secretary of State hereby submits the California State Plan for publication in the Federal Register for 45 days.

Section 254(a) requires the State Plan to include a description of each of thirteen elements. Each of the thirteen elements is treated as a "section" of the California State Plan, as set forth in the following pages

SECTION ONE: COMPLIANCE WITH REQUIREMENTS OF TITLE III

Section 254(a)(1), page 72[9]

How the state will use the requirements payment to meet the requirements of Title III[10], and, if applicable under Section 251(a)(2), to carry out other activities to improve the administration of elections.

Title III, commencing with Section 301 (page 96), sets forth "Uniform and Non-Discriminatory Election Technology and Administration Requirements."

Below is a summary of the requirements of Title III of HAVA and how California will use the requirements payment to comply with that federal law. It should be noted that, pursuant to Section 305 (page 124), the specific choices on the methods of complying with the requirements of Title III are left to the discretion of the State.

A. Voting Systems Standards
Section 301(a), pages 96-102
Federal Law
HAVA requires that each voting system used in a federal election on or after January 1, 2006, meet each of the following requirements.

Balloting errors
The voting system must permit the voter to verify privately and independently the votes selected before casting a ballot and must permit the voter privately and independently to change or correct a ballot before it is cast, including receiving a replacement ballot.

Note that the requirement that a voting system permit the voter to verify the votes selected before casting a ballot may not be defined in a manner that makes it impossible for a paper ballot voting system to meet the new requirements of HAVA.

Voter notice on overvoting and correction
The voting system must:

- Notify the voter of an overvote (casting votes for more candidates than allowed);
- Notify the voter of the effect of overvoting (i.e. the vote for that office will not be counted);
- Provide the voter with the opportunity to correct the ballot, if he or she has overvoted.

Paper-based voting systems compliance
Paper-based voting systems, including absentee balloting systems, may meet the above requirements with:

- Voting-system specific voter education programs notifying the voter of the effect of overvoting;
- Instructions on how to correct a ballot before it is cast, including instructions on obtaining a replacement ballot; and
- System designs that preserve voter confidentiality.

Voting system audit requirements (pages 98-99)
The voting system must:

- Produce a record with an audit capacity. The paper record produced shall be available as an official record for purposes of a recount;
- Produce a permanent paper record with a manual audit capacity;
- Allow the voter to correct any error before the permanent paper record is produced.

Accessibility for individuals with disabilities (page 99)
The voting system must be accessible to voters with disabilities, including voters with visual impairment, in a manner that pro-vides the same opportunity for access and participation, including privacy and independence, as for other voters.

The above requirement is met by providing at least one DRE voting unit, or other voting system equipped for individuals with disabilities at each polling place.

All voting systems purchased with Title II funding after January 1, 2007, shall comply with these requirements.

Alternative language accessibility (page 99)
The voting system must meet all requirements of alternative language access of Section 203 of the Voting Rights Act of 1965 (42 USC 1973aa-1a).

Error rates (page 100)
The voting system must meet FEC guidelines (Section for voting system error rates — errors attributable only to system errors, and not an act of the voter — in effect at the time of HAVA's enactment (October 29, 2002).

Definition of vote (page 100)
Each state shall adopt uniform and nondiscriminatory standards that define what constitutes a vote and what will be counted as a vote for each category of voting system used in the State.

HAVA Compliance With Voting Systems Standards
In consultation with local elections officials and other interested parties, including an advisory committee constituted for those purposes by the Secretary of State, and after considering any voluntary guidelines adopted by the Commission pursuant to Subtitle B of Title III, California will, through the regulatory, legislative, voting system certification and decerification processes, or otherwise, comply with HAVA, including the replacement of voting systems that do not comply. In order to help restore the integrity of the voting process, increase the opportunity for all eligible citizens to participate in that process, and to comply with HAVA, the State, under the direction of the Secretary of State, as Chief Elections Officer,[11] will, in conjunction with the consultation referred to above, in part:

- Support, promote and encourage the use of direct recording electronic (DRE/touchscreen) voting systems, at polling places in California, and optical scan systems that are used for tabulating vote-by-mail ballots, that are compatible with alternative voting methods such as ranked ballot and cumulative voting;
- Expeditiously certify new DRE voting systems that are compliant with state and federal laws;

- Through the existing Voting Systems Panel, which makes recommendations to the Secretary on certification and decertification of voting systems, develop voting system standards and system audit requirements as required in HAVA and institute an ongoing process to manage changes to these standards and ensure uniform application of the standards for each voting system;

- Develop and distribute voter education materials as appropriate to meet the requirements of Section 301(a)(1)(B) of HAVA;

- With the assistance of an advisory committee constituted for such purposes by the Secretary of State, ensure compliance with the accessibility and privacy requirements for individuals with disabilities, including ensuring that at least one DRE/touchscreen voting system is used in each California polling place pursuant to Section 301(a)(3)(B) and, with respect to in-person voting, that the voting system itself be located in a polling place that is accessible to voters with disabilities. Compliance efforts shall include monitoring polling places to determine accessibility and education of elections officials, poll workers, and voters with respect to the rights of all voters, including voters with disabilities. The Secretary of State shall consider, through established processes, decertifying paper-based systems, with respect to in-person voting, that are difficult to operate, which are prone to error with respect to voters with disabilities, or which do not provide equal access to the ballot. The Secretary of State shall consider, in consultation with local elections officials and other interested parties, including an advisory committee constituted for those purposes by the Secretary of State, establishing a deadline for requiring that all in-person voting systems be accessible notwithstanding Section 301(a)(3)(B) (permitting compliance with accessibility requirements with only one DRE voting system at each polling place);

- Continue to ensure that all voting systems provide alternative language accessibility pursuant to the requirements of the Voting Rights Act of 1965. The Secretary of State shall consider, through established processes, decertifying paper-based systems, with respect to in-person voting, that are difficult to operate, which are prone to error with respect to voters with language assistance needs, or which do not provide equal access to the ballot;

- Consider, through established processes, decertifying systems and refusing to certify systems that cannot accommodate alternative voting systems, such as ranked bal-lots and cumulative voting systems, in a manner in which voters can easily understand;

- Regularly evaluate voting systems to assess error rates, reliability and accuracy factors, accessibility to voters with disabilities, language assistance needs and literacy needs, and ability to accommodate alternative voting systems; work with local elections officials to share information and make improvements;

- Develop, by regulation and/or by statute, a uniform and nondiscriminatory definition of what constitutes a vote and what will be counted for each voting system.

B. Provisional Voting
Section 302, pages 102-104
Federal Law
Section 302(a) (page 102) requires that "provisional voting" be permitted in federal elections on or after January 1, 2004. Under HAVA, if a voter's name does not appear on the official list, or the elections official asserts the voter is ineligible, the voter is entitled to cast a provisional ballot as follows:

- Elections officials at polling place notify voters of the pro-visional ballot option;

- Voter executes written affirmation stating that he or she is a registered voter in the jurisdiction and that he or she is eligible to vote;

- The voted ballot or written affirmation information is promptly transmitted to appropriate state or local elections official for verification;

- If the information is verified, the ballot shall be counted;

- At the time the voter casts the ballot, the voter shall be provided with information about the existence of a free access system (e.g. secure, confidential telephonic or Internet-based system) that restricts access to information on individual ballots, so that only the voter who casts the ballot may determine her or his individual ballot status;

- State or local officials shall establish the free access system.

HAVA also requires (Section 302(c), page 106) that voters who cast ballots after the normal poll closing as a result of a Federal or state order, vote by provisional ballot that is segregated from regular provisional ballots.

HAVA Compliance With Provisional Ballot Requirements
In consultation with local elections officials and other interested parties, including an advisory committee constituted for those purposes by the Secretary of State, and after considering any voluntary guidelines adopted by the Commission pursuant to Subtitle B of Title III, California will, through the regulatory or legislative processes, or otherwise, comply with HAVA, including its provisional ballot requirements. In order to help restore the integrity of the voting process, increase the opportunity for all eligible citizens to participate in that process, and to comply with HAVA, the State, under the direction of the Secretary of State, as Chief Elections Officer,[12] will, in conjunction with the consultation referred to above, in part:

- Develop uniform information and procedures on provisional voting, and voting generally, as required by HAVA, and take steps to ensure that elections officials, poll workers and voters thoroughly understand provisional ballot rights and procedures;
- Ensure that the provisional voting system is designed so that individuals with disabilities can participate in the process as independently as possible;
- To the extent permitted by law, develop procedures allowing voters to cast a provisional ballot at the polling place upon signing a statement affirming the required information, without providing additional identifying documents;
- To the extent permitted by law, develop procedures whereby the information obtained to acquire a provisional ballot is sufficient to register the applicant to vote, if otherwise eligible, in future elections should it be determined that the person is not eligible to vote in the precinct for which the provisional ballot is sought or cast;
- Develop procedures whereby a provisional ballot is counted provided that there is compliance with the verification procedures set forth in California Elections Code section 14310, or other applicable section or sections of State law;
- Explore alternative methods of signature comparisons for establishing voter identity where signature change, physical disability or other circumstances prevent the signature from being used appropriately for verification;
- Consider sponsoring legislation amending California Elections Code section 14310, or other appropriate section or sections, to comply with the written affirmation procedures set forth in HAVA section 302(a);
- Consider sponsoring legislation amending California Elections Code section 14310(c)(4), or other appropriate sections, whereby a person's provisional ballot is counted with respect to those candidates and measures for which the person is entitled to vote even if the provisional ballot is cast in the incorrect precinct or using the incorrect ballot type for that person;
- Consider sponsoring legislation changing the name of "provisional ballot" to a less pejorative terminology;
- Create, or oversee the creation of, in conjunction with local elections officials, a secure and confidential free access system for a provisional voter to determine if his or her vote was counted, and, if it was not counted, the reason it was not counted or develop procedures whereby every person who casts a provisional ballot is notified as to the status of that ballot in terms of whether it was counted or not counted, and if not counted, why it was not counted.
- Develop procedures for complying with the requirements that ballots cast after the close of the polls pursuant to a court order be provisional and be segregated;
- Ensure compliance with Section 203 of the Voting Rights Act (42 U.S.C. § 1973aa-1a).

C. Voter Information Requirements
Section 302(b), pages 104-106
Federal law
Section 302(b) (pages 104-105) requires that, with respect to federal elections held on or after January 1, 2004, elections officials post specified voting information at each polling place on Election Day, including:

- A sample ballot for that election;
- The election date and polling place hours;
- Voting instructions, including provisional voting instructions;
- Mail-in registrant and first-time voter instructions;
- General voting rights information, including the right to cast a provisional ballot and instructions on how to contact appropriate officials regarding allegations of violations;
- General information on legal prohibitions on fraud and misrepresentation.

HAVA Compliance With Voting Information Requirements
In consultation with local elections officials and other interested parties, including an advisory committee constituted for those purposes by the Secretary of State, and after considering any voluntary guidelines adopted by the Commission pursuant to Subtitle B of Title III, California will, through the regulatory or legislative processes, or otherwise, comply with HAVA. In order to help restore the integrity of the voting process, increase the opportunity for all eligible citizens to participate in that process, and to comply with HAVA, the State, under the direction of the Secretary of State, as Chief Elections Officer[13] will, in conjunction with the consultation referred to above, in part, consider developing voting information in appropriate languages for posting at polling places and other appropriate places, and for printing in appropriate community-based and other publications, including specific information, such as the right:

- To replace a spoiled ballot;
- Not to show identification in those circumstances where identification is not required as a matter of law;
- To receive assistance from others in specified circumstances;

- To bring a minor child into the voting booth in specified circumstances;
- To turn in an absentee ballot into any polling place in the county;
- To take time off from work without loss of pay in certain circumstances;
- To vote a provisional ballot in certain circumstances, and to find out whether the vote was counted and, if not, why not;
- To have sensitive personal information protected from illegal access and use.

The State will also, in part, ensure that the information posted at polling places by local elections officials includes all of the information required to be posted by HAVA and ensure that all information provided at polling places be accessible to the widest possible audience, including persons with disabilities, language assistance needs, and limited literacy skills.

D. Statewide Voter Registration Database Requirements
Section 303, pages 106-111
Federal law
Section 303 (page 106) requires that the Secretary of State, as Chief Elections Officer, implement, in a uniform and nondiscriminatory manner, by January 1, 2004,[14] a single, uniform, official, centralized, interactive computerized statewide voter registration list defined, maintained, and administered at the State level that contains the name and registration information of every legally registered voter in the State and assigns a unique identifier to each such voter. The computerized list shall:

- Be the official voter registration list for federal elections;
- Serve as the single system for storing and managing the official list;
- Contain the name and registration information of every registered voter;
- Contain a unique identifier (DL number, partial SS number, or assigned number) for each voter;
- Be coordinated with other state databases (Corrections, Health Services, DMV, other state social service agencies and Social Security);
- Provide immediate, electronic access by any elections official in the state;
- Allow for electronically entering data by any local elections official on an expedited basis;
- Be supported by the State.

Maintenance of the official list shall be performed on a regular basis as follows:

- Voters names shall be removed in accordance with NVRA (42 U.S.C. § 1973gg, Section 8, (a)(4), (c)(2), (d) and (e);
- Ineligible voters shall be removed in accordance with NVRA for felony status (42 U.S.C. § 1973gg, 6(a)(3)(B)); for death (6(a)(4)(A)); or in accordance with state law;
- Each registered voter's name shall appear on the list;
- Only ineligible voters or voters not registered shall be removed from the list;
- Duplicate names shall be removed from the list;
- Other reasonable efforts to remove ineligible voters, consistent with the NVRA (42 U.S.C. § 1973gg, et. seq.) that ensure eligible voters are not removed in error, including removing registrants who have not responded to a notice and who have not voted in two consecutive general elections for federal office shall be removed from the official list of eligible voters, except that no registrant shall be removed solely by reason of failure to vote.

HAVA Compliance With Statewide Database Requirements
In consultation with local elections officials and other interested parties, including an advisory committee constituted for those purposes by the Secretary of State, and after considering any voluntary guidelines adopted by the Commission pursuant to Subtitle B of Title III, California will, through the regulatory or legislative processes, or otherwise, comply with HAVA. In order to help restore the integrity of the voting process, increase the opportunity for all eligible citizens to participate in that process, and to comply with HAVA, the State, under the direction of the Secretary of State, as Chief Elections Officer,[15] will, in conjunction with the consultation referred to above, in part, as soon as is reasonably possible, either modify California's current state-wide database (Calvoter) so that it complies with HAVA or establish a new statewide database that complies with HAVA, but in either case, shall:

- Develop, operate, and implement a process to continuously support and improve a secure statewide voter registration database that is a single, uniform, centralized, interactive system that is defined, maintained, and administered at the state level;
- Develop a database system that will interface with the State Department of Corrections to coordinate records on felony status of voters; with the State Department of Health Services to coordinate records on the death of voters; with the State Department of Motor Vehicles to verify driver's license, California identification card and social security number information; and, when practical,

with other appropriate databases such as those involving the disability, public assistance, student and other communities;

- Develop a database system that will provide local elections officials with immediate access to the voter registration information;
- Develop to the extent possible a database system designed so that state employees and others with visual disabilities can use it with as much ease and accuracy as possible and which is tested by individuals with visual disabilities as early as possible in the development process;
- Develop a database system that will serve as the official voter registration list for federal elections;
- Develop a database system that provides for the removal of individuals who are clearly ineligible to vote, in accordance with all state and federal laws, while ensuring that eligible voters are not erroneously removed from the registration list;
- Develop guidelines and procedures to ensure that the matching of information about individuals in the data-bases used to verify voter information is conducted in a uniform manner, as carefully and as accurately as possible, particularly in cases where it may initially appear that a voter appears to be ineligible;
- Develop guidelines and procedures addressing all federal and state requirements regarding the notification of voters whom the State is considering removing from the list of eligible voters;
- Develop a program for training the personnel responsible for the maintenance of the statewide voter registration database which incorporates the following procedures and emphasizes: (1) the need for accuracy in the verification of voter information before voters are removed as eligible voters from the registration list, and (2) the importance of complying with federal and state notification requirements;
- Consider sponsoring legislation for a comprehensive mechanism to notify an individual with respect to changes in status or failure in registration, or proposed purging of the individual from the database as an eligible voter and affording the individual a reasonable opportunity to present clarifying or correcting information;
- Provide ongoing technical assistance to local elections officials regarding the statewide database;
- Ensure that the database and the information contained therein are not subject to improper use;

- Institute uniform safeguards for the protection of the confidentiality and privacy of information obtained about voters in the database system and those databases with which the voter registration database interfaces;
- Ensure compliance with Section 203 of the Voting Rights Act (42 U.S.C. § 1973aa-1a).

E. Requirements For Verification of Voter Registration Information
Section 303, pages 111-117
Federal Law

Section 303(a)(5) (page 111), beginning January 1, 2004, or January 1, 2006, 16 mandates specific requirements with respect to an application for voter registration for a federal election.

Such application may not be accepted or processed unless it includes the driver's license number of an applicant who has been issued a current, valid driver's license; or, if a valid driver's license has not been issued the last four digits of an applicant's social security number.

However, if an applicant has not been issued a current, valid driver's license or a social security number, then the State shall issue a unique identifying number.

To the extent the State has a computerized list, this unique identifying number shall be the number assigned to the applicant for purposes of the computerized list.

The State shall determine whether the information pro-vided by the applicant — driver's license number or partial social security number (the last four digits) — is sufficient to meet the requirements of HAVA.

The Secretary of State shall enter into a cooperative agreement with the Department of Motor Vehicles, and the Department of Motor Vehicles shall enter into an agreement with the Commissioner of Social Security, to verify the accuracy of the information provided by the voter registration applicant, specifically:

- The applicant's name — first name and forename or surname;
- The applicant's date of birth;
- The applicant's social security number;
- Whether such records show the applicant is deceased.

Nothing shall be construed to require provision of applicable information under exceptional circumstances, e.g. personal safety or interference with an investigation.

HAVA Compliance With Requirements for Verification of Voter Registration Information

In consultation with local elections officials and other interested parties, including an advisory committee constituted for those purposes by the Secretary of State, and after considering any voluntary guidelines adopted by the Commission pursuant to Subtitle B of Title III, California will, through the regulatory or legislative processes, or otherwise, comply with HAVA. In order to help restore the integrity of the voting process, increase the opportunity for all eligible citizens to participate in that process, and to comply with HAVA, the State, under the direction of the Secretary of State, as Chief Elections Officer,[17] will, in con-junction with the consultation referred to above, ensure that the State complies with HAVA's requirements with respect to the requirements for verification of voter registration information with respect to federal elections. In complying with these requirements, the Secretary of State will, in part:

- Deem an applicant's state identification card number issued by the California Department of Motor Vehicles to meet the requirements of a driver's license number;
- To the extent permitted by law, establish a procedure for and rules requiring local elections officials to provide any person whose voter registration application is not accepted with written notice and an opportunity to correct errors or provide missing information;
- Clarify, in legislation or otherwise, to local elections officials and voters how to appropriately complete the voter registration forms.

F. Special Requirements for Certain Voters

Who Register By Mail

Section 303, pages 117-124

Federal law

Beginning January 1, 2004 (page 124), the State shall, in a uniform and nondiscriminatory manner, require proof of residence from a registered voter for purposes of casting a ballot in a federal election, if the voter registered to vote in a jurisdiction by mail on or after January 1, 2003, and has not previously voted in an election for federal office in the State, or has not voted in an election for federal office in the jurisdiction and the jurisdiction is located in a State that does not have a HAVA-compliant statewide voter registration computerized list.

If the voter meets these conditions, and he or she votes in person at a polling location, the voter shall, in order to vote, present to the appropriate elections official a current and valid photo identification or a copy of one of the following that shows the name and address of the voter:

- A current utility bill;
- A bank statement;

- A government check;
- A government paycheck;
- A government document.

If the voter meets these conditions and he or she votes by mail — absentee ballot — the voter shall, in order to vote, submit with his or her ballot to the appropriate elections official a copy of a copy of one of the following that shows the name and address of the voter:

- A current utility bill;
- A bank statement;
- A government check;
- A government paycheck;
- A government document.

Any voter subject to these requirements who votes in person and who does not provide proof of residence as required shall be provided a provisional ballot.

Any voter subject to these requirements who votes by mail — absentee ballot — and who does not provide proof of residence as required shall have their ballot treated as a provisional ballot.

Exceptions

Section 303(b)(3), page 119

The requirements for first-time voters to provide proof of residence shall not apply when any of the following apply:

1. The voter registers under Section 6 of the NVRA (42 U.S.C. § 1973gg—4) and submits as part of the voter registration a copy of a current and valid photo identification or a copy of one of the following showing the name and address of the voter:
    a. A current utility bill;
    b. A bank statement;
    c. A government check;
    d. A government paycheck;
    e. A government document.

2. The voter registers under Section 6 of the NVRA (42 U.S.C. § 1973gg—4) and submits as part of the registration (subject to state verification of the information, including the applicant's name and birth date) a driver's license number, or at least the last four digits of their social security number.

3. The voter is entitled to vote by absentee ballot under the Uniformed and Overseas Citizens Absentee Voting Act (42 U.S.C. § 1973ff—1 et seq.).

4. The voter is entitled to vote other than in person by Section 3(b)(2)(B)(ii) of the Voting Accessibility for the Elderly and Handicapped Act (42 U.S.C. § 1973ee—1).

5. The voter is entitled under federal law to vote other than in person.

HAVA Compliance With Special Requirements For Certain Voters Who Register By Mail

In consultation with local elections officials and other interested parties, including an advisory committee constituted for those purposes by the Secretary of State, and after considering any voluntary guidelines adopted by the Commission pursuant to Subtitle B of Title III, California will, through the regulatory or legislative processes, or otherwise, comply with HAVA. In order to help restore the integrity of the voting process, increase the opportunity for all eligible citizens to participate in that process, and to comply with HAVA, the State, under the direction of the Secretary of State, as Chief Elections Officer,[18] will, in conjunction with the consultation referred to above, comply with HAVA's requirements with respect to special requirements for certain voters who register by mail. In implementing these provisions, California will, in part:

- Ensure that elections officials, poll workers and voters understand clearly which voters are subject to the identification requirements; understand the procedures for soliciting, reviewing and processing identification, and advise individuals of their right to cast a provisional ballot when appropriate;

- Apply the identification requirements only to those who meet the specific criteria set forth in Section 303(b)(1), namely those who register by mail on or after January 1, 2003, and who have not previously voted in an election for federal office in the jurisdiction;[19]

- Define "register by mail" for purposes of Section 303 of HAVA to mean a voter registration card received by an elections official with a postmark indicating that it has been mailed by the registrant to the elections official;

- As soon as possible, whether or not the Commission has promulgated voluntary guidelines, clarify for voters, local elections official, and poll workers, in a uniform and nondiscriminatory way, which forms of identification are acceptable to be used as valid identification as permitted under Section 303(b)(2)(A), construing

such provisions of law broadly to permit the use of the identification to satisfy the requirements of HAVA, such clarification being incorporated herein by reference as if set forth in detail;

- Monitor the application of the identification provisions, including utilization of a hotline for the reporting of alleged illegal application of identification requirements;

- Ensure compliance with Section 203 of the Voting Rights Act (42 U.S.C. § 1973aa-1a).

G. Mail-in Registration Form Requirements

Section 303(b)(4), pages 121-122

Federal law

The voter registration form developed under Section 6 of the NVRA (42 U.S.C. § 1973gg-4) must include:

- The questions are you a citizen of the United States of America and will you be 18 years of age on or before election day;

- The statement: "If you checked 'no' in response to either of these questions, do not complete this form;"

- A statement informing the applicant that if the form is submitted by mail and the voter is registering for the first time, that additional information (a copy of documents for proof of residence; or a driver's license number or partial social security number) must be provided to avoid additional proof of residence requirements at the time of voting.

If an applicant fails to answer the question: "Are you a citizen of the United States of America?" the registrar shall notify the applicant of the failure to complete the form and provide an opportunity to the applicant to complete the form in a timely manner.

HAVA Compliance With Mail-in Registration Form Requirements

In consultation with local elections officials and other interested parties, including an advisory committee constituted for those purposes by the Secretary of State, and after considering any voluntary guidelines adopted by the Commission pursuant to Subtitle B of Title III, California will, through the regulatory or legislative processes, or otherwise, comply with HAVA. In order to help restore the integrity of the voting process, increase the opportunity for all eligible citizens to participate in that process, and to comply with HAVA, the State, under the direction of the Secretary of State, as Chief Elections Officer,[20] will, in conjunction with the consultation referred to above, develop uniform and nondiscriminatory procedures to meet the requirements of Section 303(b)(4) of HAVA.

H. Use of Requirements Payment for Other Than Complying With Title III
Section 251(b) (pages 65-66) permits the use of requirements payments only for complying with Title III, except that a State may use a requirements payment to carry out other activities to improve the administration of elections, if the state certifies that it has implemented the requirements of Title III or the amount expended with respect to such other activities does not exceed an amount equal to the minimum payment amount applicable to the State under Section 252(c), page 68 (one-half of one percent of the total amount appropriated for requirements payments for the year).

HAVA Compliance With Use of Requirements
Payment for Other Than Complying With Title III
In consultation with local elections officials and other interested parties, including an advisory committee constituted for those purposes by the Secretary of State, and after considering any voluntary guidelines adopted by the Commission pursuant to Subtitle B of Title III, California will, through the regulatory or legislative processes, or otherwise, comply with HAVA. In order to help restore the integrity of the voting process, increase the opportunity for all eligible citizens to participate in that process, and to comply with HAVA, the State, under the direction of the Secretary of State, as Chief Elections Officer,[21] will, in conjunction with the consultation referred to above, determine how any funds available pursuant to Section 251(b) (pages 65-66) should be spent in order to improve the administration of elections for federal office in California.

SECTION TWO: DISTRIBUTION OF REQUIREMENTS PAYMENT
Section 254(a)(2), pages 72-73
How the state will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the state for carrying out the activities described in element (section) number one, including a description of: the criteria to be used to determine the eligibility of such units or entities for receiving the payment; and the methods to be used by the state to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under element (section) number eight.

The requirements payment available under HAVA shall be used for the purposes described in Section 1 above, including as provided in Section 251(b)(2), or as otherwise authorized by HAVA.

The Secretary of State, as Chief Elections Officer, will, in consultation with local elections officials and other interested parties, and after considering any voluntary guidelines adopted by the Commission pursuant to Subtitle B of Title III, establish a procedure for distributing and monitoring payments to local governments and other entities. To assist in this regard, the Secretary of State will appoint an Advisory Committee, com-posed of local elections officials and other individuals and representatives of organizations, to advise and make recommendations regarding the distribution of funds. After considering the advice and recommendations of the Advisory Committee, the Secretary of State shall:

- Establish the procedure, including an application forms and process, for receiving funds;
- Establish criteria for the distribution of funds, including identification of the types of individuals and entities eligible to receive funds;
- Establish specific performance goals and measures to monitor the use of those funds, requiring periodic reports and accounting to the Secretary of State to ensure the funds are being spent in accordance with Title III and the application for funds, and to ensure that programs are meeting the performance goals and measures adopted by the Secretary of State;
- By general press release, by posting on the Internet, by communication to interested parties, and other appropriate methods, make the application for funds, the performance goals and measures, and other information regarding the procedure for the distribution of funds, publicly available.

SECTION THREE: VOTER EDUCATION, ELECTION OFFICIAL TRAINING, AND POLL WORKER TRAINING
Section 254(a)(3), page 73
How the state will provide for programs for voter education, elections official education and training, and poll worker training which will assist the state in meeting the requirements of Title III.

The Secretary of State, as Chief Elections Officer, in consultation with local elections officials and other interested par-ties, and after considering any voluntary guidelines adopted by the Commission pursuant to Subtitle B of Title III, shall:

1. Establish an outreach and education program in the Office of the Secretary of State to educate local elections officials and voters, and to do the following:
    a. To assist in meeting the goals and requirements of Title III;
    b. To serve as a "clearinghouse" for the coordination of voter education;
    c. To work with and to encourage elections officials to work with community-based, employee-based, cam-pus-based and similar organizations to educate elections officials and voters;
    d. To produce and place public service announcements relative to poll worker recruitment and voter education, including announcements targeted to and accessible to individuals with disabilities;

e. To produce and distribute, and arrange for the distribution of, materials appropriate for older voters, voters with disabilities, language assistance needs, and low literacy, regarding the mechanics of participating in the voting process;

f. To design, post and distribute websites, and website templates, regarding the voting process, taking steps to ensure that they are accessible to individuals with disabilities;

g. To target younger voters and those not yet old enough to vote regarding the importance of and the mechanics of participating in the voting process;

h. To educate all eligible citizens, including those no longer in prison or on parole for the conviction of a felony, as to the procedures relative to voting;

i. To work with federal, state and local governmental agencies, including the California Department of Motor Vehicles, to streamline the procedures to facilitate voter registration and voter participation;

j. To develop procedures for informing individuals whose attempted efforts to register to vote or to vote are defective, and to provide for the correction of such deficiencies;

k. To solicit private funding for outreach and education purposes;

l. To explore ways to minimize the changing of polling place locations that confuse voters;

m. To explore proposals that may facilitate the opportunity to participate in the voting process, including Election Day registration, weekend voting, and Election Day Holiday voting;

n. To consider promoting early voting and neighborhood voting centers;

o. To take all other appropriate action to educate elections officials and voters regarding the voting process;

2. Through the process for distribution of funds, provide funds to county elections officials and other entities, including community-based, employee-based, campus-based, and similar organizations, to assist in voter education, elections official education and training, and poll worker training;

3. Consider establishing, in conjunction with local elections officials, an "Election Academy" or similar institution to provide training, education and certification to elections officials and poll workers;

4. Consider establishing, in conjunction with local elections officials, an on-line, interactive training seminar to train, educate and certify elections officials and poll workers while ensuring that such seminar is accessible to the widest possible audience, including bilingual poll workers and poll workers with disabilities;

5. Consider producing and distributing, in conjunction with local elections officials and community-based, employee-based, campus-based, and similar organizations, in appropriate languages, printed materials, websites, website templates, and video on DVD or other appropriate media, providing training to elections officials and poll workers and educating voters on how to participate in the elections process, including, but not limited to, voter guides targeted to older voters and voters with disabilities, including low literacy, and minority language voters;

6. Consider enhancing the existing toll-free telephone number and Secretary of State website to provide additional information to citizens on how to participate in the elections process and ensure that there are sufficient staff and resources to make the toll-free number and the website easily accessible to persons with disabilities and persons with language assistance needs;

7. Work with local elections officials to establish community-based, employee-based, campus-based or similar programs to train and educate poll workers concerning voting equipment and other election procedures that will be included in funding distributed for outreach and education purposes. The criteria to qualify for these grants shall include demonstrated expertise in voter training and education, and poll worker recruitment activities;

8. Establish procedures and criteria for individuals and organizations to apply for grants to assist in training and education activities, including identification and recruitment of minority language poll workers and poll workers with disabilities. The criteria to qualify for these grants must include demonstrated expertise and experience in voter training and education, and poll worker recruitment activities. The grant program must also include evaluation measures to assess the effectiveness of funded programs;

9. Develop for posting in polling places, on the Internet, and elsewhere, materials in appropriate languages containing useful information regarding the election process and how to participate in it. The Secretary of State shall ensure that such materials are accessible to the widest possible audience, including persons with disabilities, language assistance needs, and limited literacy skills;

10. Ensure that any training provided to poll workers cover at least the following topics:

a. The proper operation and maintenance of voting systems and technology;

b. The rights of voters to cast provisional ballots, the proper processing and counting of those ballots, and how provisional voters can determine whether their votes were counted and, if not, why not;

c. The non-discriminatory application of HAVA's identification requirements for certain voters who register by mail;

d. Identifying and assisting voters with disabilities, including psychiatric disabilities, in order that such voters can participate fully in the voting process independently and privately;

e. The rights of minority language voters in jurisdictions covered under Section 203 of the Voting Rights Act of 1965 to receive language assistance at the polling place;

11. Encourage voter education efforts conducted in connection with the foregoing activities to cover at least the following topics:

a. Information on how to register to vote;

b. Information on how voters can determine the location of their polling places and hours of voting;

c. Information on alternative voting on Election Day, such as absentee ballots and early voting;

d. The proper use of voting systems and technology;

e. The rights of voters to cast provisional ballots and how provisional voters can determine whether their votes were counted and, if not, why not;

f. The rights of minority language voters in jurisdictions covered under Section 203 of the Voting Rights Act of 1965 to receive language assistance at the polling place;

g. The availability of the complaint procedure and toll-free numbers described in this State Plan;

12. Form an advisory committee with a diverse member-ship, including individuals with disabilities, to assess the Secretary of State's existing outreach programs, including but not limited to: the College Guide, Voter Registration Week's Education Day, Vote America, the C.I.VI.C.S. program, the Shake the State website, and Student/Parents Mock Elections. The advisory commit-tee shall determine the effectiveness of these programs in encouraging young people to register to vote

and participate in elections. The advisory committee should also suggest modifications to existing programs and articulate any need for new programs. The Secretary of State shall direct sufficient resources towards strengthening existing effective programs and establishing ones that will be the most effective in addressing the low participation rates amongst people ages 18-24.

SECTION FOUR: VOTING SYSTEMS GUIDELINES AND PROCESSES
Section 254(a)(4), page 73
How the state will adopt voting system guidelines and processes which are consistent with the requirements of Section 301.

The Secretary of State, under existing state law, certifies voting systems and equipment, and the procedures for their use, through a Voting Systems Panel. The Secretary of State also decertifies voting systems and equipment, and the procedures for their use. No voting system may be used for any election without being certified.

The Secretary of State, through existing processes, after considering any voluntary guidelines adopted by the Commission pursuant to Subtitle B of Title III, will certify and decertify voting systems, and the procedures for their use, to ensure that all voting systems and the procedures for their use comply with the requirements of Section 301 and other provisions of HAVA.

SECTION FIVE: HAVA FUND MANAGEMENT
Section 254(a)(5), page 73
How the state will establish a fund described in Section (b) for purposes of administering the state's activities under this Part, including information on fund management.

The Secretary of State has administratively established three separate Election Funds within its statutorily-established Federal Trust Fund, including the procedures for its management. Each sub account within the Federal Trust Fund will serve as the repository for Title I-Section 101, Title I-Section 102 and Title II funds.

The Secretary of State's fiscal, accounting, and budgeting offices will have overall responsibility, under the direction of the Secretary of State, for the administration of this fund.

The administration of the fund will meet all requirements of federal and state law for fiscal management.

SECTION SIX: BUDGET
Section 254(a)(6), pages 73-74
The state's proposed budget for activities under this Part (Part 1 of Subtitle D of Title II), based on the state's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on:

- The costs of the activities required to be carried out to meet the requirements of Title III;
- The portion of the requirements payment which will be used to carry out activities to meet such requirements; and
- The portion of the requirements payment which will be used to carry out other activities.

Budgetary issues cannot be resolved until the amount of funds available is determined, the voluntary guidelines (Subtitle B of Title III, page 125 et seq.) promulgated by the Commission can be considered, and the costs of actual implementation are ascertained. When the amount of funds is determined, the guidelines are promulgated, and the implementation costs can be ascertained, the detailed budget will be configured by the Secretary of State, in conjunction with local elections, other public officials and interested individuals and organizations. Certain dynamics and parameters for the budget, however, are set forth below.

Proposed Budget
The Secretary of State, as the Chief Elections Officer of California as described in Section 253(e), will adopt policies and procedures to ensure that all funds received, including interest earned on those funds, with the exception of funds identified in Sections 251(b)(2)(A) and (B) from Title II allocations, will be used to accomplish the requirements of Title III.

The Secretary of State will identify its "maintenance of effort" level for each of the requirements in Title III and will not use HAVA funds to supplant activities already funded.

The State has authorized $200 million in general obligation bonds to finance the modernizing of voting equipment. The counties can use these funds for the purchase and installation of accessible voting equipment. These funds satisfy the matching fund requirement of Section 253(b)(5).

No funds received pursuant to Title II will be used for purposes of litigation or payment of judgment.

The Secretary of State, as the Chief Elections Officer of California as defined in Section 253(e), will administer the Election Fund described in Section 254(b) of the Act.

Specific Budget Components Relative To Title III
The Secretary of State, in administering the Election Fund, will provide funding for the following specific requirements of Title III:

Voting Systems Standards
The Secretary of State will allocate funds to meet the requirements of Section 301. This may include allocation of funds to local administrators, according to allocation criteria developed by the Secretary of State.

The level of funds required to meet these requirements depends on several variables that must be determined by research and analysis.

As one example, there is significant potential variability in cost of voting systems. This variability depends on the technology selected (DRE versus optical scan, precinct-based versus centralized systems, etc.) and this selection is at the option of local election officials. In addition, the cost depends on the functional requirements of those systems, and local decisions as to whether to purchase one DRE per polling place or to convert all voting equipment to DREs. As a third example, the number of polling places required to be equipped with new voting equipment won't be known with precision until further communication with local elections officials.

If federal standards or state standards are adopted that require retrofitting of existing equipment, funds may also be necessary for this purpose.

The Secretary of State shall establish a procedure to determine which local election jurisdictions require or request funds to meet the requirement of Section 301(a)(3) for at least one accessible voting system in each polling place. There are approximately 25,000 precincts in the State of California.

The Secretary of State shall ensure that all voting equipment meets the provisions of Section 301, including, but not necessarily limited to: (1) permitting voters to verify and correct their ballots prior to casting the ballot; (2) providing notice of the fact and effect of overvotes and permitting voters an opportunity to correct an overvote before the ballot is cast; (3) producing a permanent paper record with a manual audit capacity; (4) providing a uniform definition of a vote cast on any voting systems; (5) ensuring accessibility to persons with disabilities; (6) ensuring accessibility for language minorities as required by the Voting Rights Act of 1965, as amended; and (7) meeting the "error rate" guidelines adopted by the Federal Election Commission.

Preliminarily, the cost of this component is estimated to be between $42.6 million and $70 million but actual costs may be less than or more than these parameters. In any case, this component shall be the priority in allocating funds.

Provisional Voting
California law specifies procedures for provisional voting that generally comply with the requirements of Section 302. However, funds will be disbursed by the Secretary of State from the Election Fund to ensure that all notices required by HAVA are developed and included at each polling place. In addition, the Secretary of State will, in cooperation with local elections officials, define a "free access" system (or systems) to permit voters

to determine if their provisional ballots were counted and if not, why not. Alternatively, the state may take a proactive approach and advise provisional voters of the status of their ballots and, if they were not counted, why not. The funds necessary for this "free access" system or a proactive program will depend on the design of the system (Internet, telephone, etc.), who operates and manages the system (one state system, or 58 local systems), and the volume of inquiries made by voters for the required information or the volume of notices provided to provisional voters.

Preliminarily, the cost of this component is estimated to be between $1 million and $3 million but actual costs may be less or more than these parameters, with continuing ongoing costs.

Voting Information
HAVA requires that certain information be provided to voters at the polling place. This information shall include a sample ballot, the date and hours of voting, how to vote, how to vote a provisional ballot, procedures for first-time registrants required to provide identification in order to vote, a listing of the rights of voters, and general information on other laws and protections for voters.

The Secretary of State will ensure that the necessary materials are developed, distributed, and provided at all polling places.

Preliminarily, the cost of this component is estimated to be between $100,000 and $300,000 but actual costs may be less or more than these parameters.

Statewide Database
The Secretary of State shall develop a single, uniform, official, centralized, and interactive database of registered voters that is defined, maintained, and administered at the state level. The database shall be the official list of voters for federal elections.

The development of this system will likely require, to be consistent with state law, the initiation of a feasibility study and analysis to determine the functional requirements of the statewide database. This analysis will determine the amount of funds to be allocated to this requirement.

This analysis will include a determination of the costs and issues related to providing the "immediate electronic access" to elections officials required by Section 303(a)(1)(A)(v).

The analysis will also provide information on potential costs for other state agencies to meet the requirement of HAVA. This will include, but not be limited to: (1) establishing a connection with the Department of Motor Vehicles to facilitate the verification of driver's license number and social security number; (2) establishing a connection with the Department of Corrections to determine felony status; and (3) establishing a connection with the Department of Health to obtain information regarding per-sons who have deceased.

In addition, once the system is defined, the Secretary of State will determine the ongoing maintenance, support, security requirements, and the costs associated with these requirements, to comply with appropriate sections of HAVA, including Sections 303(a)(1)(A), 303(a)(1)(A)(vii), and 303(a)(3).

Preliminarily, the cost of the statewide database is estimated to be between $8 million and $40 million but actual costs may be less or more than these parameters, with substantial ongoing costs.

Requirements for Voters Who Register by Mail
The Secretary of State will develop procedures for the uniform implementation of the requirements of Section 303(b).

Preliminarily, the cost of this component is estimated to be between $100,000 and $300,000 but actual costs may be less or more than these parameters.

Voter Education
Section 254(a) requires that the State Plan include a description of how Title II funds will be used to educate voters to assist in meeting the requirements of Title III. The changes and new procedures required by HAVA represent the most significant change in voting in a lifetime, and communicating these changes to voters will be critical to the success of the reforms in the election process.

The Secretary of State will allocate substantial funds to the education of voters concerning voter registration, voting, new voting equipment, voter rights, and other appropriate subjects.

These funds will provide for educational efforts in the minority language and disability communities. The Secretary of State will make a special effort to inform and educate young voters as they begin their careers as voters.

In addition to funds expended by the Secretary of State, funds may be allocated to elections officials, individuals, organizations, and others for educational purposes. Funding allocation will be in accordance with criteria established by the Secretary of State.

Outreach methods may include: printed materials, radio and television announcements, mailings, newsletters, door-to-door canvassing, organizing community groups and utilizing their networks to extend into the community, or other means to effectively reach the target audience.

Preliminarily, the cost of this component is estimated to be between $15 million and $45 million but actual costs may be less or more than these parameters.

Elections Official Education
Section 254(a) requires that the State Plan include a description of how Title II funds will be used to educate elections officials. Elections officials are the administrators of the HAVA reforms and their expertise and ongoing education are critical to successful elections.

The Secretary of State will develop a plan for an Election Academy to train prospective elections officials and to provide ongoing training of current officials. The funding required for this Election Academy will depend on the curriculum and pro-gram design.

Preliminarily, the cost of this component is estimated to be between $15 million and $45 million but actual costs may be less or more than these parameters, with continued ongoing costs.

Poll Worker Education
Section 254(a) requires that the State Plan include a description of how Title II funds will be used to educate poll workers. Poll workers are on the front line of elections.

The Secretary of State will expend and allocate funds to assist local elections officials in programs to train poll workers. These programs will include, among other topics, instruction on the proper operation of voting equipment, applicable federal and state laws, the specific needs of minority language and disabled voters, voting provisionally in accordance with the HAVA, procedures for voters who register for the first time by mail, and the rights of voters.

Preliminarily, the cost of this component is estimated to be between $15 million and $45 million but actual costs may be less or more than these parameters, with continued ongoing costs.

The Portion of the Requirements Payment That Will Be Used To Carry Out Other Activities
Complaint Procedure
Title IV, Section 402, pages 126-128
The Secretary of State has established a complaint procedure that meets the requirements of Section 402. The funds necessary for administering this procedure will depend on the type and the number of complaints received and processed. Funding for administering the procedure is likely to come from the requirements payment.

Preliminarily, the cost of this component is estimated to be between $100,000 and $300,000 but actual costs may be less or more than these parameters, with continued ongoing costs.

Voting Rights Of Military And Overseas Citizens
Title VII, Section 702, pages 145-146
HAVA amends Section 102 of the Uniformed and Overseas Citizens Absentee Voting Act

(42 U.S.C. 1973ff-1) to add a requirement that each State designate a single office which shall be responsible for providing information regarding voter registration procedures and absentee ballot procedures to be used by absent uniformed services voters and overseas voters with respect to Federal elections. Reports are required after regularly-scheduled general elections for Federal office

Preliminarily, the cost of this component is estimated to be between $100,000 and $300,000 but actual costs may be less than or more than these parameters.

Summary of Costs and Portions Used to Carry Out Activities
Based on an estimated requirements payment for California of $97.1 million for FY 2003, 22 the best estimate of the distribution is shown on the chart below.*

HAVA MANDATE	COST ESTIMATE	PORTION OF PAYMENT
Voting System Standards – Title III, Section 301(a)	$42.6 million – $70 million	43.87%
Provisional Voting – Title III, Section 302(a)	$1 million – $3 million	1.03%
Voter Information Posting – Title III, Section 302(b)	$100,000 - $300,000	.1%
Statewide Database – Title III, Section 303(a)	$8 million – $40 million	8.24%
Verification of Voter Registration Information – Title III, Section 303(a)(5)	$100,000 - $300,000	.1%
Requirements for Certain Voters Who Register by Mail – Title III, Section 303(b)	$100,000 - $300,000	.1%
Mail-In Registration Form Requirements – Title III, Section 303(b)(4)	$0	0%
Voter Education – Title III	$15 million – $45 million	15.45%
Elections Official Education – Title III	$15 million – $45 million	15.45%
Poll Worker Education – Title III	$15 million – $45 million	15.45%
Complaint Procedure (Other Activities) – Title IV, Section 402	$100,000 - $300,000	.1%
Voting Rights of Military and Overseas Citizens (Other Activities) – Title VII, Section 702	$100,000 - $300,000	.1%
TOTAL	**$97,100,000 – $249,500,000**	**100% of $97,100,000**

*Note that continued ongoing costs are not included and that the costs and portions indicated are subject to change based on the variables indicated earlier. Such anticipated changes, unknown at this time, are deemed to be included in this Plan as if set forth in detail. Note, also, that the "Portion of Payment" indicated above is based on the minimum "Cost Estimate" which may not be the true cost as ultimately determined.

SECTION SEVEN: MAINTENANCE OF EFFORT
Section 254(a)(7), page 74
How the state, in using the requirements payment, will maintain the expenditures of the state for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the state for the fiscal year ending prior to November 2000.

The Secretary of State, through the state's budgetary processes and the distributions of the requirements payment, will ensure that the expenditures of the state for activities funded by the payment will be maintained at a level that is not less than the level of such expenditures maintained by the state for the 1999-2000 Fiscal Year.

SECTION EIGHT: PERFORMANCE GOALS AND MEASURES
Section 254(a)(8), page 74
How the state will adopt performance goals and measures that will be used by the state to determine its success and the success of units of local government in the state carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the state will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.

The Secretary of State, as Chief Elections Officer, in consultation with local elections officials and other interested par-ties, and after considering any voluntary guidelines adopted by the Commission pursuant to Subtitle B of Title III, shall:

- Develop performance goals and measures, with timetables, descriptions of criteria, the process used to develop the criteria, and identification of accountable officials, to determine the effectiveness of all programs and efforts receiving HAVA funds;
- Monitor, through consultations with local elections officials and interested individuals and organizations, the performance of the state, units of local government and other entities with respect to reaching goals and each and every provision of HAVA.

SECTION NINE: STATE-BASED ADMINISTRATIVE COMPLAINT PROCEDURES
Section 254(a)(9), page 74
A description of the uniform, nondiscriminatory state-based administrative complaint procedures in effect under Section 402.

Section 402 (pages 126-128) requires the state to establish and maintain a state-based administrative com-plaint procedure that:

- Is uniform and nondiscriminatory;
- Allows any person who believes that there is a violation of any provision of Title III to file a complaint;
- Requires that the complaint be in writing and be notarized;
- Permits consolidation of complaints;

- Requires that there be a hearing on the record if the complainant requests such;
- Requires an appropriate remedy be provided if the State determines that there is a violation of Title III;
- Provides that the complaint be dismissed and that the results be published if it is determined that there is no violation;
- Requires a final determination be made within 90 days from the date the complaint is filed unless the complainant consents to a longer period for making such a determination;
- Provides that alternative dispute resolution procedures be established for resolving the complaint within 60 days if the State fails to meet the 90 day deadline set forth above.

Under existing procedures, any person may complain to the Secretary of State, as Chief Elections Officer, that elections laws or procedures have been violated, are being violated or are about to occur. A toll-free telephone number for this purpose is provided and is widely disseminated. Complaints may also be submitted to the Secretary of State in writing. All credible allegations are investigated by one or more units of the Office of the Secretary of State, often in conjunction with local elections officials and other state officials.

The Secretary of State, after consulting with local elections officials and interested individuals and organizations, has established a uniform, nondiscriminatory state-based administrative complaint procedure in compliance with Section 402 of HAVA. The procedure provides individuals with a meaningful, expedited means of voicing a complaint concerning the implementation of Title III of HAVA and an appropriate remedy if a violation has occurred. The procedure addresses the accessibility needs of minority language voters and individuals with disabilities.

The complaint procedure in effect authorizes any individual residing in the State of California to file a written complaint with the Secretary of State alleging that Title III has been violated, is being violated or is about to be violated. Pursuant to HAVA, the complaint must be notarized. (The Complainant must sign the complaint after being sworn by a notary public.) The complaint may be filed on a form prescribed and made available by the Secretary of State or on any other form that meets the specified requirements. Forms prescribed by the Secretary of State are required to be translated into appropriate languages. The Secretary of State will seek the assistance of an advisory committee to make the complaint procedure accessible to individuals with disabilities. The complaint may be filed in person at any office of the Secretary of State or mailed to Secretary of State, Elections Division, HAVA Complaint, 1500 11th Street, Sacramento, CA 95814. The complaint must be filed within 60 days after the occurrence of the alleged violation or within 90 days after the Complainant becomes aware of the

alleged violation, whichever is later. The Secretary of State may consolidate complaints when appropriate. The Complainant may request a hearing on the record. The Secretary of State determines whether the hearing is oral or is based on written testimony. A final determination must be made within 90 days of filing the complaint. An appropriate remedy must be provided if a violation is found. In any case, the determination shall be in writing and must be posted on the Secretary of State's website, unless such posting might compromise a criminal investigation or other enforcement action. If a determination is not made within 90 days, then the complaint is referred to a neutral Hearing Officer who must make a determination within 60 days of the initial 90-day deadline. The determination must be posted on the Secretary of State's website, unless such posting might com-promise a criminal investigation or other enforcement action.

SECTION TEN: EFFECT OF TITLE 1 PAYMENTS
Section 254(a)(10), page 75
If the state received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

A total of $84 million has been received, pursuant to HAVA Title I. Payments received pursuant to HAVA Section 101 have been used or will be used in accordance with HAVA Section 101(b)(1) (A)-(H) and Section 101(c). Funds received pursuant to HAVA Section 102 will be used, in accordance with Section 102(a)(2) to replace punch card voting systems in counties that used such systems in the 2000 General Election. The Title I funds, therefore, will supplement the requirements payment received pursuant to Title II.

SECTION ELEVEN: HAVA STATE PLAN MANAGEMENT
Section 254(a)(11), page 75
How the state will conduct ongoing management of the plan, except that a state may not make any material change in the administration of the plan unless the plan is appropriately noticed and published in the Federal Register.

The Secretary of State, as Chief Elections Officer, shall provide ongoing monitoring and oversight of compliance with the requirements of HAVA. To facilitate such, the Secretary of State shall require that:

- Any official or other entity receiving any funds under HAVA will be required to make ongoing reports on progress of implementation;
- Funds be awarded on a schedule or other basis that requires proof of satisfactory completion of one phase of a project before funds for the next phase are distributed;

- Local elections officials and interested individuals and organizations, including the Members of the California State Plan Advisory Committee involved in the development of this Plan, be consulted on a continuing basis with respect to management of the State Plan and any perceived problems with its implementation and/or the need for material change;
- No material change be made in the administration of the State Plan prior to appropriate notice and publication in the Federal Register.

SECTION TWELVE: CHANGES TO STATE PLAN FROM PREVIOUS FISCAL YEAR
Section 254(a)(12), page 75
In the case of a state with a State Plan in effect under this Subtitle during the previous fiscal year, a description of how the Plan reflects changes from the State Plan for the previous fiscal year and of how the state succeeded in carrying out the State Plan for such previous fiscal year.
(Not applicable. This is the first year of the California State Plan.)

SECTION THIRTEEN: STATE PLAN DEVELOPMENT COMMITTEE
Section 254(a)(13), page 76
A description of the committee which participated in the development of the State Plan in accordance with Section 255 and the procedures followed by the committee under such Section and Section 256.

As discussed above in the Overview, this Plan was developed through a committee of twenty-four individuals representing a cross-section of Californians. As required by Section 255(a), the individuals included the chief elections officials of the two most populous jurisdictions conducting federal elections in California (Los Angeles and Orange Counties), other local elections officials, stake holders, including representatives of groups of individuals with disabilities, and other persons. The list of the members and biographical information begins on page 37.

The Committee, as discussed in the Overview, held five public hearings inviting and receiving comment from the public. The Committee thereafter met in Sacramento and the Members made recommendations to the Secretary of State with respect to the content of the Preliminary State Plan. Those recommendations, as well as the comments received from the public, were considered by the Secretary of State in drafting the Preliminary State Plan.

After the Preliminary Plan was made available for inspection and comment, additional comments were submitted by members of the public and by members of the Advisory Committee. These comments were carefully considered by the Secretary of State in preparing the California State Plan.

For a discussion of the procedures followed by the Committee in developing the State Plan, see the Overview on page 6.

COMMITTEE MEMBERS

Rob McKay, Chair
McKay Foundation
Mr. McKay is the President of the McKay Foundation, a family foundation that awards grants to community groups working for social and economic justice. He is also the managing partner of the McKay Investment Group, which provides venture capital for early-stage technology and consumer product companies. He is well-known in California for his work in promoting participation in the voting process. He was the proponent of Proposition 52 on the November 2002 ballot, a bi-partisan measure to establish Election Day Voter Registration in California.

R. Michael Alvarez
Professor of Political Science, Caltech
Caltech/MIT Voting Technology Project
R. Michael Alvarez has taught political science at Caltech since December 1992. He received his B.A. in political science in 1986 from Carleton College; he received his M.A. and Ph.D. from Duke University in 1990 and 1992, respectively. He has focused most of his research and teaching on the study of electoral politics in the United States. Professor Alvarez is co-director of the Caltech/MIT Voting Technology Project, researching technological solutions to electoral problems. He is a Principal Investigator for the Secure Electronic Registration and Voting Experiment (SERVE), which is studying Internet voting for overseas civilians and military personnel through a contract with the Department of Defense. Alvarez has just completed a new book project with Thad Hall on the feasibility of Internet voting called "Point, Click and Vote."

Harley Augustino
Coalition for a Living Wage
Harley Augustino is the Field Organizer for the Coalition for a Living Wage, a labor-community coalition in Santa Barbara that advocates for economic justice policies while building the power and leadership of low-income residents. A graduate of UCSB, he has led several campus and community-based voter registration and participation efforts. He co-founded the Isla Vista Tenants' Union in 1998, and was elected to a four-year term as a Director of the Isla Vista Recreation and Park District in 2000.

Robert Balgenorth
State Building and Construction Trades Council
Robert Balgenorth is President of the State Building and Construction Trades Council of California, AFL-CIO since 1993. The Council, which represents more than 200 building trades local unions and regional councils, works to improve the economic condition, health and job safety of approximately 400,000 working men and women in the state's construction industry. In 1999, he was appointed to the Governor's Commission on Building for the 21st Century of which he serves as co-chair for the Facilities and Finance Committees. In 2002, he was appointed to the Workforce Investment Board and to the California Transportation Commission where he serves as Vice-Chair.

Ardis Bazyn
California Council of the Blind
Ardis Bazyn is currently Treasurer of the American Council of the Blind based in Washington, D.C.; Secretary for the California Council of the Blind; First Vice President of Independent Visually Impaired Entrepreneurs and Board Member of Randolph Sheppard Vendors of America. She is a motivational speaker, coach and writer with Bazyn Communications. She has published numerous articles and Books. In 2001, she compiled a booklet for Blind Students of California, "A Guide to a Successful College Experience." She has owned several businesses and has been active in a variety of business and consumer organizations.

Miguel Contreras
Los Angeles County Federation of Labor AFL-CIO
Miguel Contreras is the Executive Secretary-Treasurer of the Los Angeles County Federation of Labor, AFL-CIO. He is the first Latino elected leader of the 107-year-old Federation of 350 affiliated unions representing more than 750,000 members. He serves on the Boards of the L.A. Convention and Visitors Bureau, United Way of Los Angeles, Los Angeles Airport Commission, and the California Narcotic Addicts Evaluation Authority. He has been listed in Hispanic Business Magazine's "100 Most Influential Hispanics" for the past three years.

Francisco Estrada
Mexican American Legal Defense and Educational Fund (MALDEF)
Francisco Estrada is a Senior Policy Analyst in the Sacramento office of the Mexican American Legal Defense and Educational Fund (MALDEF) working on educational and land use issues. He represents MALDEF on the Steering Committee of the California Futures Network. Before his employment at MALDEF, he was a long-time staff member to Congressman Bob Filner. At the local and federal government level, he has worked on a number of issues including water, wastewater, transportation infrastructure projects, immigration, energy, and environmental protection.

Kathay Feng
Asian Pacific American Legal Center (APALC)
Kathay Feng is the Program Director of the Voting Rights Unit at the Asian Pacific American Legal Center. She has worked in a variety of civil rights areas including voting rights and redistricting, hate crimes, police accountability, and anti-discrimination. She is currently involved in APALC's efforts to build a statewide network of advocates on key policy issues such as voting rights, language rights and consumer rights. Ms. Feng serves, or has served, on the Asian Pacific Policy & Planning Council, the California Secretary of State's Advisory Committee on Voter Participation and Out-reach, LA County Human Relations Commission, LAPD Police Chief's API Forum, the Asian Pacific American Police Advisory Council, Organization of Chinese Americans, and the National Asian Pacific American Women's Forum's Los Angeles Board.

Rosalind Gold
National Association of Latino Elected and Appointed Officials (NALEO) Educational Fund
Rosalind Gold serves as Senior Director of Policy, Research and Advocacy with the NALEO Educational Fund, where she has worked for over a decade on policy analysis and research for the naturalization and Latino political empowerment efforts of the organization. Her areas of expertise include election reform, the decennial Census and the restructuring of the nation's immigration bureaucracy. She received her J.D. from Harvard Law School and her B.A. from Pomona College in Claremont, California.

Margaret Jakobson
Protection & Advocacy, Inc. (PAI)
Margaret Jakobson has worked for California Protection and Advocacy, Inc. (PAI) for six-teen years. She was a staff attorney serving clients with developmental disabilities for six years and then an attorney serving clients with physical, mental and sensory disabilities. Her specialties include special education issues, developmental disabilities service system eligibility, and Americans with Disabilities Act litigation, including public transit litigation. She became the managing attorney in the Oakland regional office in 1999 and held that position until her move to San Diego in 2001. In San Diego she set up a new PAI regional office, is the managing attorney of that office, and specializes in special education, Americans with Disabilities Act litigation, transportation law, voting rights and other service and civil rights advocacy for people with disabilities.

Cyndi Jones
Exploding Myths, Inc.
Cyndi Jones is President of Exploding Myths, Inc. She draws on over 40 years of experience as an advocate for disability rights. As publisher, she promoted the growth of MAINSTREAM Magazine from a four page local newsletter to an award-winning glossy national magazine serving people with disabilities. She has served on many national panels on media and disability issues, including the New Directions for News conference at the Freedom Forum on underrepresented groups in the media in 1993.

Laura Kerr
California State Student Association
Laura Kerr is the Director of Governmental Relations for the California State Student Association. She has been actively involved in statewide student advocacy and higher education policy since 1998. She is the registered lobbyist for the association and closely monitors the public policy developments, personalities, and institutions that affect CSU students and shape higher education politics in California. In this capacity, she coordinates the association's voter registration, voter education and get-out-the-vote campaigns and is the staff liaison to the California Youth Vote Coalition. She graduated from Humboldt State University in 2001.

Geoffrey Kors
Equality California (EQCA)
Geoffrey Kors is the Executive Director of Equality California (EQCA), California's lesbian, gay, bisexual and transgender lobbying organization. Equality California was formerly known as California Alliance for Pride and Equality (CAPE). Mr. Kors is a graduate of Stanford Law School and has been active in the LGBT community for twenty years. Prior to joining EQCA, he was a partner in the law firm Wotman, Kors & Clouiter, LLP where he primarily handled gay rights matters. He has served as Director of both the Gay and Lesbian Rights and AIDS and Civil Liberties Projects of the ACLU of Illinois and as Chief of Staff to San Francisco Supervisor Leslie Katz. Mr. Kors originated San Francisco's Equal Benefits Ordinance which is now the basis of AB 17, a bill in the California Assembly.

Cynthia McClain-Hill
National Association of Women Business Owners (NAWBO)
Cynthia McClain-Hill is founder and principal of the law firm McClain-Hill Associates in Los Angeles. The law firm specializes in Land Use, Planning and Environmental Law, Public and Administrative Law and public policy development and advocacy. She currently serves on the Board of Directors of the National Health Foundation, is President Elect of the National Association of Women Business Owners-Los Angeles, a member of the UCLA Foundation Board of Councilors, and supports a host of charitable organizations aimed at enhancing opportunities for women and minorities. Ms. McClain-Hill has previously served the State of California as a member of the California Fair Political Practices Commission and now serves as the Governor of California's appointee to the California Coastal Commission.

Conny McCormack
Los Angeles County Registrar-Recorder/County Clerk
Conny McCormack is the Registrar-Recorder/County Clerk of Los Angeles County. As Registrar of Voters, she is responsible for conducting elections for the largest electoral jurisdiction in the U.S., with over 4 million registered voters and 5,000 voting precincts. She conducts federal, state and county elections and, via contract, conducts or supports local elections for 88 cities, 100 school districts and 149 special districts. Prior to becoming Registrar of Voters in Los Angeles, she served as Registrar of Voters for San Diego County from 1987 to 1994 and was Elections Administrator in Dallas County, Texas, from 1981-1987. Additionally, she has served as an international elections consultant in five countries.

Eliseo Medina
Organization of Los Angeles Workers (OLAW)
Eliseo Medina is International Executive Vice President of Service Employees International Union (SEIU) based in Los Angeles. He has helped to make SEIU the fastest-growing union on the West Coast and the largest union in California and the nation. In 1996, he made history when he was elected as the first Mexican-American to

a top leadership post at the million member SEIU. He has helped strengthen ties between the Catholic Church and the labor movement to work on common concerns such as immigrant worker rights and access to health care.

Vigo G. (Chip) Nielsen, Jr.
Nielsen, Merksamer, Parrinelo, Mueller & Naylor, LLP
Chip Nielsen is a prominent specialist in federal and California campaign, initiative, lobbying, conflict of interest and non-profit laws. His firm represents clients in campaign, lobbying and gift laws in all 50 states. He is Co-chair and Co-editor of Practicing Law Institute's annual seminar and case book on "Corporate Political Activities," (1978-Present). He serves on the Advisory Board, Institute of Governmental Studies, University of California, Berkeley, (1993-Present). He has served as Legal Counsel to Governor Pete Wilson Committee (1989-1999); Senator Pete Wilson Committee (1981-1991); Art Agnos for San Francisco Mayor (1987-1991); George Moscone for San Francisco Mayor (1975-1978).

Art Pulaski
California Labor Federation, AFL-CIO
Art Pulaski is the Executive Secretary Treasurer of the California Labor Federation, AFL-CIO. During his tenure in office, the rank and file members in the Federation have doubled. As President of "We Do the Work," he helped craft the successful, nationally televised PBS series. He serves on the boards of the Council for Economic and Environmental Balance, the Labor Project for Working Families, State Workforce Investment Board, Governor's Commission on Building for the 21st Century and Potomac Board of Governors.

Ann Reed
President, California Association of Clerks and Elections Officials and the Shasta County Registrar of Voters
Ann Reed is currently President of the California Association of Clerks and Elections Officials. She is the elected Shasta County Clerk/Registrar of Voters, having first been elected in 1982. Prior to her election, she had been the Assistant County Clerk/Recorder of Voters since 1978, and had worked in the office since 1963.

Steve Rodermund
Orange County Registrar of Voters
Steve Rodermund is the Orange County Registrar of Voters. Orange County is California's second most populous county with million registered voters, requiring language support in English, Chinese, Korean, Spanish, and Vietnamese. Orange County is currently replacing its punch card voting system with the Hart DRE system, with countywide implementation in March 2004. Mr. Rodermund retired from the military in 1992. Since then he has served in various positions with the Orange County Transportation Authority and in Orange County's County Executive Office.

Arturo Rodriguez
United Farm Workers of America, AFL-CIO
Arturo Rodriguez is the President of United Farm Workers of America, AFL-CIO. As President, he is carrying on the work of the union founded by Cesar Chavez, who died in 1993. Mr. Rodriguez succeeded Mr. Chavez to the presidency. He has been active with the union and its mission since 1969. In 1995, he was elected to the AFL-CIO's governing Executive Council.

Marion Taylor
League of Women Voters of California
Marion Taylor is Government Director for the League of Women Voters of California. A member of the League of Women Voters since 1968, she has been active in the League's Voters Service work, particularly making presentations on pros and cons of statewide ballot measures and moderating candidate forums. She contributes information to Smart Voter, the League's online guide which provides access to a ballot customized for a particular address and integrates information from elections officials, candidates, newspapers, and nonpartisan websites. She was a librarian at the University of California at Santa Cruz for 25 years.

Ted Wang
Chinese for Affirmative Action (CAA)
Ted Wang is the Policy Director for Chinese for Affirmative Action (CAA), where he overseas advocacy on civil rights issues affecting Asian Americans and supervises job training for low-wage workers. Mr. Wang has drafted a number of immigrant and civil rights laws and policies at both the state and local levels in California, litigated cases under the federal Voting Rights Act and National Voter Registration Act, and helped develop local plans to implement the language assistance requirements of Section 203 of the VRA, as well as procedures for allowing eligible prisoners to vote in San Francisco county jails. Prior to joining CAA, Mr. Wang was staff attorney with the Lawyers' Committee for Civil Rights of the San Francisco Bay Area.

Dr. Geraldine Washington
National Association for the Advancement of Colored People (NAACP)
Dr. Geraldine Washington is President of the Los Angeles NAACP. She has served as NAACP Branch President and Vice President, President and Vice President for Women In NAACP and Win Coordinator for Region I, which consists of nine western states, Japan, Germany and Korea. She serves on the Los Angeles County EEOC Advisory Council, Media Image Coalition (Human Relations Sub-Committee), and African American Jewish Leadership Connection.

State of Colorado

Help America Vote
State Plan

In Accordance with Public Law 107-252, §253(b)

"This Help America Vote State Plan is the exciting beginning of Colorado's voting future. As the State's election process evolves into the 21st century, HAVA 2002 will be the first among many stepping-stones to a future that melds integrity with accessibility, self-determination and independence." --- Secretary of State Donetta Davidson

Submitted July 15, 2003

The mission of the Department of State is to serve the public by performing constitutional and statutory duties of collecting, securing, and communicating information, ensuring the integrity of elections, and enhancing commerce.

STATE OF COLORADO
Department of State
Civic Center Plaza
1560 Broadway, Suite 200
Denver, CO 80202-5169

Donetta Davidson
Secretary of State

May 29, 2003

My Fellow Coloradoans,

Colorado is pleased to report on its implementation of the Help America Vote Act of 2002. Not since the Voting Rights Act of 1965 has there been such sweeping change in federal election law. It is both a challenge and a privilege to be involved in the implementation of a project of this magnitude. We look on this report as a living document that, once drafted, will evolve into a working plan of action. Through its implementation, this plan will empower Colorado voters to voice their electoral preference in an environment that ensures the independence and integrity of their vote.

Through the Help America Vote Act of 2002, Congress provided State Election Officials with a planning formula, responsibility, authority and funding for the implementation of that act. The success of this formula requires cooperation and support from our General Assembly and the active participation of community stakeholders in the planning process. Our General Assembly recognized the immediate impact of the Help America Vote Act of 2002 and passed our enabling legislation before they adjourned the 2003 legislative session. We are grateful to our 90 stakeholders who have met diligently and regularly to assist us with the creation of this plan and our implementation strategy.

The following pages are just the beginning of Colorado's voting future. As Colorado's election process evolves into the 21st century, the Help America Vote Act of 2002 will be a first among many stepping-stones to a future that melds integrity with accessibility and self-determination.

Donetta Davidson

Executive Summary

Colorado is fortunate to have over 90 citizens participating in shaping its electoral future. These participants serve on various subcommittees that provide input to the State Planning Committee. The State Planning Committee serves in an advisory capacity to the Secretary of State. The subcommittees are designed to cover specific requirements of the Help America Vote Act of 2002[1] (HAVA 2002) initiative.

Colorado is currently in a strong position to honor many of the HAVA requirements. Provisional voting was adopted by the State in 2000. In 2002, Colorado expanded the voting rights of active military personnel serving overseas. In 2003, Colorado expanded the law further to extend to all absent uniformed services electors, their spouses and children, and all overseas citizens, their spouses and children. Finally, in 2003, Colorado passed H.B. 03-1356, also known as the Colorado Help America Vote Act. This bill addressed the remaining HAVA requirements that Colorado needed to address.

Colorado will use the requirements payments to address the requirements identified under Title III. These requirements include, but not limited to:

- Voting standards, including auditing, accessibility, error rates and uniform definitions.
- Provisional voting and voting information
- Statewide voter registration system, including mail registration
- Other activities to improve the administration of elections

The Secretary of State will centrally manage activities funded by requirements payments. The Secretary of State will be accountable for all expenditures, funding levels, program controls and outcomes. In order to ensure a uniform and non-discriminatory approach, all affected stakeholders must have input into the process. The Secretary of State will work with local election officials to create a needs assessment instrument and determine the appropriate level of support for local activities.

The Secretary of State will reach out to its electorate, election staff and local election officials with an effective program of election education and outreach. Through a curriculum of election law, process and Election Day administration the Office of the Secretary of State will provide local election officials and their staff members with a certification program that can be completed within a two-year period. In addition, marketing techniques currently under review include not only more effective ways of recruiting judges from the political parties but also investigating ways to engage the private sector, higher education, community groups, Ad Councils and service organizations.

With regard to voting guidelines and processes, all voting systems in Colorado either already meet or will meet the error rate standards established under Section 3.2.1 of the Voting Systems Standards issued by the Federal Elections Commission. Colorado will also ensure that at least one Direct Recording Electronic voting system that meets the standards for accessibility for voters with special needs is in each polling place in the State. In addition, Colorado will require each county to have its integrated voting system tested and certified as meeting the requirements of HAVA 2002 and state election code.

In addressing fund management, H.B. 03-1356 established the "Federal Elections Assistance Fund". All federal funds received by the State pursuant to HAVA 2002 will be deposited into this Fund, along with state and county monies appropriated for the purpose of meeting the State's 5% match requirement. The Fund will be administered by the Secretary of State in accordance with the financial controls and accounting standards required by Colorado and federal law.

The Office of the Secretary of State estimates that Colorado may receive between $43 million and $53 million of federal funding over the next three years. Currently, Colorado estimates costs to address all the requirements of HAVA 2002 to range from $48 million to $67 million.

The State will maintain state expenditures for activities funded by the requirements payment at a level at or above the expenditure level that existed prior to the receipt of federal funds. Colorado's HAVA enabling legislation establishes requirements that exceed the maintenance of effort required by HAVA 2002.

Colorado understands that accurate measurement and tracking of performance goals is paramount in achieving a successful implementation of P.L. 107-252. Performance goals provide a high-level view of a project's direction. The State's goal is to achieve election reform and compliance with HAVA requirements through the successful implementation of the programs outlined in Section 8 of the State Plan.

Uniform and nondiscriminatory complaint procedures are an important aspect of HAVA 2002. The Secretary of State will develop a unified statewide complaint system process for tracking and managing suspected violations of Title III of P.L. 107-252. The State will address the complaint procedures by breaking down the tasks into the following sections:

- Submission Process
- Review Process
- Alternative Dispute Resolution
- Forms
- Manuals
- Resolution Process
- HAVA Timelines

In addressing Title I of HAVA 2002, Colorado estimates receipt of approximately $7.1 million. These funds will be split between activities listed in §101, totaling $4.9 million, and §102, totaling $2.2 million.

Colorado will use the State Plan as the basis for managing the activities necessary for the implementation of HAVA requirements. The Secretary of State, with guidance from the HAVA Steering Committee, will be responsible for the management and implementation of the State Plan. In addition, Colorado will conduct plan management at four levels: Secretary of State, State HAVA Steering Committee, State HAVA Committee and Project Managers. The implementation schedule of this plan ranges from January 1st, 2003 to January 1st, 2006.

Administrative Complaint Procedures Subcommittee

This subcommittee is comprised of various stakeholders representing county clerk and recorders, county elections staff, the Colorado Civil Rights Commission, the Colorado General Assembly, the political parties, the State Attorney General's Office and the Office of the Secretary of State.

The overall goals and topics of discussion for this subcommittee are as follows:

- Setting Up the Submission Process;
- Setting Up the Review Process;
- Alternative Dispute Resolution;
- Forms;
- Manuals;
- Resolution Process; and
- HAVA Timelines.

Military and Overseas Citizens Subcommittee

This subcommittee is comprised of various stakeholders representing county clerk and recorders, county elections and I.T. staff, the United States Armed Forces, the Office of the Governor, the Colorado General Assembly, the State Department of Military Affairs, and the Office of the Secretary of State.

The overall goals and topics of discussion for this subcommittee are as follows:

- Effective Communication Lines Between the Armed Forces and Election Officials
  - State
  - Local;
- Address Changes;
- Education Materials;
- Use of Media in Process;
- Registration and Absentee Application;
- Different Methods of Voting
  - Blank Ballot
  - Fax
  - Absentee; and
- Working With Federal Voter Assistance Program When Possible.

Voting Accessibility and Outreach Subcommittee

This subcommittee is comprised of various stakeholders representing county clerk and recorders, county elections staff, County Commissioners, the Colorado General Assembly, the Hispanic/Latino community, public interest groups, the minor political parties, the National Federation for the Blind, the Colorado Cross-Disability Coalition and the Office of the Secretary of State.

The overall goals and topics of discussion for this subcommittee are as follows:

- Accessibility in the Polling Place
  - Permanent
  - Temporary;
- Polling Place Accessibility Survey;
- One Direct Recording Electronic (DRE) for Each Polling Location;
- Multi-State Compact
  - How to Handle Training and Support for Small Counties; and
- Bilingual Issues
  - Training Materials
  - Communications.

Computer/Systems Training Subcommittee

This subcommittee is comprised of various stakeholders representing county clerk and recorders, county elections and I.T. staff, the State Department of Revenue, and the Office of the Secretary of State.

The overall goals and topics of discussion for this subcommittee are as follows:

- Training of Staff
  - Clerical
  - Technical
  - Driver's License
  - Social Service;
- Training Materials/Format; and
- Training on Computer
  - Needs Analysis Survey.

Equipment Needs Assessment Subcommittee

This subcommittee is comprised of various stakeholders representing county clerk and recorders, county elections and I.T. staff, the Colorado General Assembly, and the Office of the Secretary of State.

The overall goals and topics for discussion for this subcommittee are as follows:

- Survey and Forms;
- Space;
- Type of Equipment; and
- Branches.

Equipment Service Subcommittee

This subcommittee is comprised of various stakeholders representing county clerk and recorders, county elections and I.T. staff, County Commissioners, the Colorado General Assembly, and the Office of the Secretary of State.

The overall goals and topics of discussion for this subcommittee are as follows:

- Needs of State;
- Survey of Resources – In the Field
  - Local Entities
  - State Vendors; and
- Maintenance.

Current Elections Environment in Colorado

Prior to the adoption of P.L. No. 107-252, also known as the Help America Vote Act of 2002, Colorado had in place many of the provisions required by the Act. Provisional voting was adopted by the State of Colorado in 2001, prior to the 2002 General Election. Since the adoption of the federal act, Colorado passed several bills bringing the state into compliance with the requirements of the federal act.

In 2002, Colorado adopted H.B. 02-1307, also known as the Blue Ribbon Election Bill. This act provided for provisional ballots for any voter who claimed to be properly registered but whose qualification to vote could not be immediately established. This act also allowed individuals who applied for an absentee ballot to vote a provisional ballot at the polling place if they chose not to vote the absentee ballot. In 2003, Colorado adopted H.B. 03-1006 that removed the option to vote a provisional ballot for those electors who had applied for an absentee ballot. It also required each county clerk and recorder and designated election official to create a system to allow voters of provisional ballots to determine whether their ballots were counted.

In 2002, Colorado expanded the voting rights of active military personnel serving overseas by allowing a ballot to be faxed to the active military voter and the voted ballot faxed back to the designated election official. In 2003, Colorado expanded the law further to extend this voting option to all absent uniformed services electors, their spouses and children, and all overseas citizens, their spouses and children with the adoption of H.B. 03-1271. This bill also does the following:

- Designates the Office of the Secretary of State as the designated office responsible for providing information on voter registration and absentee ballot procedures to be used by absent uniformed services electors, nonresident overseas electors, and resident overseas electors who wish to register to vote or vote in any jurisdiction in Colorado;
- Directs the Secretary of State to cooperate with the voting assistance officer of any unit of the armed forces to assist with voter registration and absentee ballot applications; and
- Prohibits a designated or coordinated election official from refusing to accept or process any otherwise valid absentee ballot submitted by an absent uniformed services elector during a year on the grounds that the elector submitted the application before the first date on which the designated or coordinated election official otherwise accepts or processes such applications for that year.

In 2003, Colorado adopted H.B. 03-1356, also known as the Colorado Help America Vote Act. This bill designated the Secretary of State as the chief state election officer within the meaning of HAVA 2002 and granted to the secretary the power of coordinating the responsibilities of the State of Colorado under HAVA 2002. The act authorizes the secretary to establish a uniform administrative complaint procedure to remedy grievances arising under Title III of HAVA 2002. It created a federal elections assistance fund in the state treasury and specifies that the Secretary of State administer the fund. The act creates a permanent funding mechanism that specifies the sources and types of moneys to be deposited into the fund, and requires that any moneys received by the state from the federal government pursuant to HAVA 2002 to be used by the state only for the purposes specified by the provisions of HAVA 2002. In addition, the act provides for a continuous appropriation of all moneys in the fund.

State Planning Committees

A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the committee under such section 255 and section 256.
-- HAVA §254 (a)(13)

Colorado is fortunate to have a very active group of over 90 citizens interested in shaping its electoral future including both members of the U.S. Senate. Members of the election, legislative, information technology (I.T.), political, legal, minority, accessibility and military communities met both the Secretary of State and Elections Director calls to action with enthusiasm. They were also fortunate to enlist members from the media and educational communities. Stakeholders from within state government are also present at the planning table to assure a smooth transition for the implementation of the statewide voter registration system.

The State HAVA Committee serves in an advisory capacity to the Secretary of State. Each member of the main committee serves on a working subcommittee. Each subcommittee is chaired by county election officials, which provide the group with invaluable experience and expertise with election statutes and processes.

The State HAVA Committee began its work on March 28, 2003. This committee has met monthly to discuss and review general implementation issues as they relate to their communities. Members spent two days in April at facilitated workshops to acquaint themselves with the details and work in groups to discuss funding, grants and "worst case scenario" issues relating to federal and state budgets and mandated procedures.

The goals of the State HAVA Committee reach far beyond making recommendations for the initial development of the State Plan. The Office of the Secretary of State and the members of the State HAVA Committee realize that the HAVA State Plan is a "living document" that will evolve as time passes. With that in mind, the State Committee will continue to meet on a regular basis to evaluate the progress in implementing the plan and discuss new ideas for future plans.

State Planning Subcommittees

The work of the subcommittees may extend over a period of two or three years as the implementation unfolds. Just as the HAVA State Plan is an evolving report, the implementation of HAVA will grow and evolve. As they are implemented, procedures and processes will be reviewed and revised for maximum efficiency.

There are nine subcommittees that have been divided into three major categories: Education and Outreach, Community Outreach, and Technology Needs Analysis. Each subcommittee has a suggested list of goals from the Secretary of State to guide them. Some of the subcommittees have found that once into the subject, additional goals suggest themselves. The following is a list of the subcommittees with a description and goals for each.

Poll Workers/Junior Judges/Colleges Subcommittee

This subcommittee is comprised of various stakeholders representing county clerk and recorders, high school education, College/University level education, adult education, the Colorado General Assembly, public interest groups, and the Office of the Secretary of State.

The overall goals and topics of discussion for this subcommittee are as follows:

- Outreach to students;
- Recruitment of election judges in high schools and colleges;
- Development of training manuals and materials
  - For students
  - For election judges;
- Format of training materials; and
- Advertising Council/Literacy Council Advisory.

Voters/Public/Media Subcommittee

This subcommittee is comprised of various stakeholders representing county clerk and recorders, County Commissioners, public interest groups, the League of Women Voters, the local news media, the Hispanic/Latino community, and the Office of the Secretary of State.

The overall goals and topics of discussion for this subcommittee are as follows:

- Outreach to Public;
- Outreach to Voters;
- Outreach to Media; and
- Use of Media-Multiple formats
  - Print
  - Broadcast
  - Internet.

County Clerk/Elections Staff Training Subcommittee

This subcommittee is comprised of various stakeholders representing county clerk and recorders, county elections staff, County Commissioners, political parties, and the Office of the Secretary of State.

The overall goals and topics of discussion for this subcommittee are as follows:

- How Often to Train;
- Accredited for Hours;
- Format of Training;
- Training Materials;
- Consistency of Training; and
- Teaching old dogs new tricks.

The Colorado Help America Vote Act also provides for the following:

- Authorizes the secretary to direct that moneys in the secretary of state cash fund be appropriated for carrying out the activities for which federal payments are being made in an amount equal to 5% of the total amount to be spent for such activities;
- Requires each eligible elector to be asked for his or her driver's license number in addition to the last 4 digits of the elector's social security number. If an individual has not been issued a current and valid driver's license or a social security number, the state will assign the applicant a unique identification number to serve as identification of the applicant for voter registration purposes; and
- Requires the secretary to implement, in a uniform and nondiscriminatory manner, a single, uniform, official, centralized, interactive, computerized statewide voter registration system, defined, maintained and administered at the state level. Like most states, Colorado has a centralized voter registration master list; however, it is currently maintained and administered at the county level. The act also authorizes the secretary to electronically cancel the registration of deceased persons and persons convicted of a felony. Colorado does not require the formal restoration of voting rights of felons who have served their sentence as a prerequisite to register to vote; those rights are automatically restored at that time, thus allowing such an individual to register to vote.

In 2002, Colorado adopted H.B. 02-1307, as stated previously, which provided for the sharing of information between the State and Department of Revenue in the collection of information on residence addresses and signatures, including the driver's license database, motor vehicle registration database, motorists insurance database and the state income tax information systems. The adoption of H.B. 03-1356 in 2003 also addresses the following:

- Requires the secretary and the executive director of the Department of Revenue to match information in the database of the centralized statewide registration system with information in the database of the motor vehicle business group to the extent required to enable each department to verify the accuracy of the information provided on applications for voter registration in conformity with the requirements of HAVA 2002;
- Requires the executive director of the department of revenue to enter into an agreement with the federal commissioner of social security for the purpose of verifying applicable information in accordance with the requirements of HAVA 2002. It further requires the secretary to implement adequate technological security measures to prevent the unauthorized access to the computerized statewide voter registration list;
- Requires the questions: "Are you a citizen of the United States?" and "Will you be 18 years or older on Election Day?" with boxes for the applicant to indicate his or her responses to these questions on the voter registration form. It also requires the form to include a statement informing the applicant that, if the form is submitted by mail and the applicant is registering to vote for the first time, the appropriate information required is to be submitted with the mail-in registration form to avoid the additional identification requirements for applicants voting for the first time. If the applicant fails to answer on the mail registration form the question relating to American citizenship, the election official is to notify the applicant of the failure. In addition, the election official is to provide the applicant with an opportunity to complete the form in a timely manner to allow for completion of the registration form prior to the next election for federal office; and
- Allows any new voter who desires to cast his or her ballot in person, by absentee ballot, or mail ballot, but does not satisfy these identification requirements to cast a provisional ballot. In addition, it also requires the designated election official to include with a mail or an absentee ballot written instructions to enable a first-time voter to comply with the requirements for new voters intending to cast a mail or absentee ballot. Finally, the bill directs state and local election officials to implement the requirements applicable to new voters in a uniform and nondiscriminatory manner.

Colorado has created a Colorado Help America Vote Act Committee. The make-up of this committee will be outlined elsewhere in this State Plan. The state has also created subcommittees that are responsible for assessment and inventory matters relating to the statewide voter registration system and accessibility of our polling places:

- The Computer/Systems Training subcommittee will conduct an assessment of our county clerk offices to determine basic computer training issues with county election personnel.
- The Equipment Needs Assessment subcommittee will conduct an assessment survey to see what computer and related equipment is currently in the county clerk election divisions.
- The Equipment and Service Subcommittee will conduct a survey of Colorado counties to see what relationship the county clerks' offices will have with the Secretary of State in terms of ownership, maintenance and service of hardware related to the statewide voter registration system.
- The Accessibility/Outreach subcommittee has devised an accessibility survey for each of the polling places in Colorado for accessibility for voters with special needs including physical and language needs.

Prior to the adoption of P.L. 107-252, Colorado was on the forefront of states allowing provisional ballots, extending of voting opportunities for military personnel and overseas citizens, and providing for the exchange of information between the Office of the Secretary of State and the Department of revenue on driver's license address and signature information. With the adoption of H.B. 03-1006, H.B. 03-1356 and H.B. 03-1271, Colorado's election laws remain some of the most progressive in the United States. Furthermore, these acts bring the state into compliance with the requirements of the federal act.

Section 1 - Use of Requirements Payments for Title III

How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(b)(2), to carry out other activities to improve the administration of elections. --HAVA §254 (a)(1)

Colorado plans to use the requirements payments to address the following requirements identified under Title III:

- §301 Voting Systems Standards
- §302 Provisional Voting and Voting Information Requirements
- §303 Computerized Statewide Voter Registration List Requirements and Requirements for Voters Who Register by Mail
- §304 Minimum Requirements
- §305 Methods of Implementation Left to Discretion of State
- §311 Adoption of Voluntary Guidance by Commission
- §312 Process for Adoption
- §251(b) (2) – Other Activities

§301 Voting Systems Standards

Deadline for compliance: 01/01/06

Audit Capacity

All integrated voting systems in the State of Colorado will be required to go through a re-certification process by the State. All such integrated systems shall meet the manual audit requirements set out in Section 301(2), including a permanent paper record with a manual audit capacity, an opportunity for the voter to change the ballot or correct any error before the permanent paper record is produced and the availability of the paper record as an official record for any recount conducted with respect to any election in which the integrated system is used.

Accessibility

In an effort to improve voter accessibility in the State of Colorado, the Secretary of State has established the Voting Accessibility and Outreach Subcommittee. This subcommittee meets frequently to assess Colorado's current accessibility issues and recommend improvements to the Secretary of State's Planning Committee. This subcommittee is working hard with the Secretary of State to ensure that every requirement of the Help America Vote Act of 2002 is met and every polling place in the State of Colorado is fully accessible to voters with disabilities, the elderly, and voters with language or literacy barriers.

The Voting Accessibility and Outreach Subcommittee has developed the following mission statement that outlines both principles and goals of voting accessibility in the State of Colorado:

All voters are entitled to the right of full participation in elections and the political process and to the privilege of casting their votes privately and independently.

Polling places and the voting process will be accessible to all voters, including voters with physical or mental disabilities and voters with language and literacy barriers. People with such disabilities or barriers who are knowledgeable about accessibility issues should be included in determining the accessibility of polling places, access to the voting process, and training and procedures for accessibility. No eligible voter will be denied the right to vote because he or she has a physical or mental disability or because he or she has a language or literacy barrier. A combination of technology and creative problem solving should work together to ensure private and independent access to the electoral process for all voters.

Election judges will receive training in voting accessibility including common courtesies and procedures for accommodating the needs for all voters.

State and local election officials should implement outreach programs to inform voters about the availability of accessible polling places and voting equipment, and should provide individuals with information in an accessible format to inform voters about the use of accessible equipment.

Information provided about candidates or other election matters that is made available to the general public in print, electronically, or by other means should be provided in alternative formats accessible to people with disabilities and to people with language or literacy barriers. Voter registration shall be conducted in a uniform and non-discriminatory manner.

The first step in this process has been the development of Colorado's new polling place accessibility survey. The Accessibility and Outreach Subcommittee has developed a survey to be used by local election officials to assess each and every polling place within their respective jurisdiction.

The Secretary of State and the Colorado Association of County Clerk and Recorders will coordinate with the Colorado Cross-Disability Coalition and other disability advocacy groups to have disabled voters assist with the accessibility surveys in each polling place. This will ensure that an accessible polling place is defined by the people it affects and not just by able-bodied county employees. Once the surveys have been conducted, county clerks can evaluate their current polling places for possible improvements and search out new polling places that are also accessible.

To satisfy the requirements payments under Title 3 of the Help America Vote Act, the Voting Accessibility and Outreach Subcommittee is also focusing on four distinct categories:

- The placement of at least one DRE voting machine per polling place.
- The development and posting of signs in each polling place to assist voters with special needs.

- The development and distribution of forms to assist all voters and election judges in the voting process.

DRE Voting Equipment

The State of Colorado will ensure that there is at least one DRE in every polling place by the required deadline. The voting system standards outlined in Section 4 of this State Plan will be used in the assessment and selection of the DREs. Members of the disability community, senior citizens, and voters with language or literacy barriers will be asked to assist in the testing and state certification of these machines.

Signs for Visually Impaired Voters

As recommended by the Voting Accessibility and Outreach subcommittee, all polling place signs required by Section 302 (b) of HAVA 2002 will be also presented in large font for those voters with special visual needs.

Forms to Assist All Voters and Election Judges

The Accessibility and Outreach Subcommittee is also working with the Secretary of State to develop forms that will assist voters in the polling place, and assist the election judges as well. All forms used in the polling place will be designed and approved by the Office of the Secretary of State to ensure that the voting experience is uniform and consistent throughout the state. The Voting Accessibility and Outreach subcommittee is also working with the Pollworker Education and Junior Judge and Student Recruitment Subcommittee to develop forms and signs to be posted in the polling place, as well as new training techniques for the election judges to educate them on accessibility issues.

Alternative Language Accessibility

All of the forms produced by the Office of the Secretary of State will be printed in English and Spanish and distributed to every county. In addition, the State of Colorado has several counties containing large populations of Native American citizens. These citizens speak the native languages, which are not written languages. The Office of the Secretary of State will work with Native American citizens to record audiotapes that will contain the same information as any posted signs, forms, and ballot styles. Audiotapes may also be used to assist voters with literacy barriers. The Accessibility and Outreach Subcommittee is currently developing plans for the implementation of these audio materials.

Error Rates

Colorado will require each integrated voting system to be re-certified by the state. The re-certification will ensure that all integrated systems meet the error rates standards established under Section 3.2.1 of the Voting Systems Standards issued by the Federal Election Commission.

Uniform Definition of What Constitutes a Vote

In August 2002, the State of Colorado formally adopted Rule 27, Rules Concerning Uniform Ballot Counting Standards. These rules outline those criteria that constitute a vote for each type of voting system in use in the State of Colorado. For a detailed description, please refer to Section 4 - Voting System Guidelines and Processes.

§302 Provisional Voting and Voting Information Requirements

Deadline for compliance: 01/01/04

HAVA 2002 requires provisional voting procedures in all states to ensure that no voter, who desires to vote, is disenfranchised. Provisional ballots were put into use by the State of Colorado prior to the passage of HAVA 2002. In 2002, the State of Colorado addressed this important issue—the Colorado General Assembly enacted provisional voting legislation (codified at §1-9-301, et seq., Colorado Revised Statutes). In response to the passage of HAVA 2002, the General Assembly of Colorado passed conforming legislation in 2003. The State will meet the requirements by January 1, 2004. The following table (Table-1.1) provides information on provisional voting in Colorado.

Table-1.1

PROVISIONAL VOTING REQUIREMENTS	CURRENTLY MET	CHANGE REQUIRED	COMMENTS
(1) Notify individuals they may cast a provisional ballot.	X		§1-9-301, C.R.S.
(2) Permitted to cast a provisional ballot upon the execution of a written affirmation stating the individual is—	X		§1-9-304.5, C.R.S.
(A) A registered voter in the jurisdiction			
(B) Eligible to vote in that election.			
(3) An election official shall transmit a ballot to an appropriate official for verification.	X		§1-9-303, C.R.S.
(4) If the election official determines the individual is eligible the provisional ballot shall be counted.	X		§1-9-303, C.R.S.
(5) Individual who cast a provisional ballot will be able to ascertain	X		§1-9-306, C.R.S., State will implement by January 1, 2004.
(A) Whether the vote was counted, or			
(B) The reason the vote was not counted.			
(6) Establish a free access system that allows			§1-9-306, C.R.S. State will implement by January 1, 2004.
(A) Individuals who cast a provisional ballot to discover whether the ballot was counted.	X		
(B) If the vote was not counted, the reason the vote was not counted.			
(C) Access to the information shall be restricted to the individual.			
(7) Voters who vote after the polls close (after the scheduled voting time)			§1-1.5-104, C.R.S. No statutory provision; however, the Secretary of State is statutorily authorized to exercise
(A) As a result of a Federal or State court order or any other order extending the time for established			

PROVISIONAL VOTING REQUIREMENTS	CURRENTLY MET	CHANGE REQUIRED	COMMENTS
for closing the polls in effect 10 days before the date of that election (B) Vote only by casting a provisional vote.	X		such powers and perform such duties as reasonably necessary to ensure that the State is compliant with all requirements of HAVA 2002. State will implement by January 1, 2004.

§303 Computerized Statewide Voter Registration List Requirements and Requirements for Voters Who Register by Mail

Deadline for compliance: 01/01/04, waiver to 01/01/06 available

Currently, Colorado does not have a uniform statewide voter registration system. Prior to the adoption of H.B. 03-1356, each county was allowed by statute to purchase and maintain its own voter registration system. Each county, on a monthly basis, provides the Secretary of State with a master list of voters for the county. The master lists of all sixty-four (64) counties are then combined to create a statewide master voter registration list. With the passage of H.B. 03-1356, a uniform, official, centralized, interactive, computerized statewide voter registration system that is defined, maintained and administered at the state level will be implemented by the mandated deadline.

In compliance with HAVA 2002, Colorado will use the Requirements Payments from Title III to launch a focused initiative to implement a statewide voter registration system. This project will reside in the Office of the Secretary of State. The Project Manager will report directly to the Secretary of State. A Project Management Office (PMO) will be created to ensure disciplined oversight of all aspects of the project. Experienced resources with technical skills, leadership skills and subject matter experts will staff the PMO.

A detailed master project work plan will be developed to manage and track tasks, milestones, timeframes and resources throughout the entire life cycle of the project.

Through an extensive analysis, needs assessment, and requirements definition, Colorado will determine the best strategy to implement this system. The baseline HAVA requirements, from Section 303, are listed below in Table-1.2, along with the status of each as it applies to Colorado. Requirements Payments will be used to address all of these requirements, in addition to requirements that are identified throughout the process.

Table-1.2

P.L. 107-252 SECTION	REQUIREMENT
IMPLEMENTATION	
§ 303 (a)(1)(B)(i)	The computerized list shall serve as the single system for storing and managing the official list of registered voters throughout the State
§ 303 (a)(1)(B)(ii)	The computerized list contains the name and registration information of every legally registered voter in the State
§ 303 (a)(1)(B)(iii)	Under the computerized list, a unique identifier is assigned to each legally registered voter in the State.
§ 303 (a)(1)(B)(iv)	The computerized list shall be coordinated with other agency databases within the State.
§ 303 (a)(1)(B)(v)	Any election official in the State, including any local election official, may obtain immediate electronic access to the information contained in the computerized list. *For Colorado, "Local election official" means county election official.*
§ 303 (a)(1)(B)(vi)	All voter registration information obtained by any local election official in the State shall be electronically entered into the computerized list on an expedited basis at the time the information is provided to the local official.
§ 303 (a)(1)(B)(vii)	The chief State election official shall provide such support as may be required so that local election officials are able to enter information as described in clause (vi).
§ 303 (a)(1)(B)(viii)	The computerized list shall serve as the official voter registration list for the conduct of all elections for Federal office in the State.
COMPUTERIZED LIST MAINTENANCE	
§ 303 (a)(2)(A)(i)	If an individual is to be removed from the computerized list, such individual shall be removed in accordance with the provisions of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg et seq.), including subsections (a)(4), (c)(2), (d), and (e) of section 8 of such Act (42 U.S.C. 1973gg–6).
§ 303 (a)(2)(A)(ii)	For purposes of removing names of ineligible voters from the official list of eligible voters— (I) under section 8(a)(3)(B) of such Act (42 U.S.C. 1973gg–6(a)(3)(B)), the State shall coordinate the computerized list with State agency records on felony status; and (II) by reason of the death of the registrant under section 8(a)(4)(A) of such Act (42 U.S.C. 1973gg–6(a)(4)(A)), the State shall coordinate the computerized list with State agency records on death.
§ 303 (a)(2)(A)(iii)	Notwithstanding the preceding provisions of this subparagraph, if a State is described in section 4(b) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg–2(b)), that State shall remove the names of ineligible voters from the computerized list in accordance with State law.
§ 303 (a)(2)(B)(i)	the name of each registered voter appears in the computerized list
§ 303 (a)(2)(B)(ii)	only voters who are not registered or who are not eligible to vote are removed from the computerized list
§ 303 (a)(2)(B)(iii)	duplicate names are eliminated from the computerized list
TECHNOLOGICAL SECURITY OF COMPUTERIZED LIST	
§ 303 (a)(3)	The appropriate State or local official shall provide adequate technological security measures to prevent the unauthorized access to the computerized list established under this section.
MINIMUM STANDARD FOR ACCURACY OF STATE VOTER REGISTRATION RECORDS	

P.L. 107-252 SECTION	REQUIREMENT
§ 303 (a)(4)(A)	A system of file maintenance that makes a reasonable effort to remove registrants who are ineligible to vote from the official list of eligible voters. Under such system, consistent with the National Voter Registration Act of 1993 (42 U.S.C. 1973gg et seq.), registrants who have not responded to a notice and who have not voted in 2 consecutive general elections for Federal office shall be removed from the official list of eligible voters, except that no registrant may be removed solely by reason of a failure to vote.
§ 303 (a)(4)(B)	Safeguards to ensure that eligible voters are not removed in error from the official list of eligible voters.
VERIFICATION OF VOTER REGISTRATION INFORMATION	
§ 303 (a)(5)(A)(i)	Except as provided in clause (ii), notwithstanding any other provision of law, an application for voter registration for an election for Federal office may not be accepted or processed by a State unless the application includes— (I) in the case of an applicant who has been issued a current and valid driver's license, the applicant's driver's license number; or (II) in the case of any other applicant (other than an applicant to whom clause (ii) applies), the last 4 digits of the applicant's social security number.
§ 303 (a)(5)(A)(ii)	If an applicant for voter registration for an election for Federal office has not been issued a current and valid driver's license or a social security number, the State shall assign the applicant a number, which will serve to identify the applicant for voter registration purposes. To the extent that the State has a computerized list in effect under this subsection and the list assigns unique identifying numbers to registrants, the number assigned under this clause shall be the unique identifying number assigned under the list.
§ 303 (a)(5)(A)(iii)	The State shall determine whether the information provided by an individual is sufficient to meet the requirements of this subparagraph, in accordance with State law.
§ 303 (a)(5)(B)(i)	The chief State election official and the official responsible for the State motor vehicle authority of a State shall enter into an agreement to match information in the database of the statewide voter registration system with information in the database of the motor vehicle authority to the extent required to enable each such official to verify the accuracy of the information provided on applications for voter registration.
§ 303 (a)(5)(B)(ii)	The official responsible for the State motor vehicle authority shall enter into an agreement with the Commissioner of Social Security under section 205(r)(8) of the Social Security Act (as added by subparagraph (C)).
§ 303 (a)(5)(C)(i)	The Commissioner of Social Security shall, upon the request of the official responsible for a State driver's license agency pursuant to the Help America Vote Act of 2002— "(i) enter into an agreement with such official for the purpose of verifying applicable information, so long as the requirements of subparagraphs (A) and (B) of paragraph (3) are met; and "(ii) include in such agreement safeguards to assure the maintenance of the confidentiality of any applicable information disclosed and procedures to permit such agency to use the applicable information for the purpose of maintaining its records. "(B) Information provided pursuant to an agreement under this paragraph shall be provided at such time, in such place, and in such manner as the Commissioner determines appropriate. "(C) The Commissioner shall develop methods to verify the accuracy of information provided by the agency with respect to applications for voter registration, for whom the last 4 digits of a social security number are provided instead of a driver's license number.
OTHER REQUIREMENTS BEYOND HAVA 2002	
N/A	Establish a county user group to help derive the registration management requirements for the new system
N/A	Conversion strategy / design from current county systems to new statewide system

The overall estimated timeframe to implement this system is presented in Table-1.3.

Table-1.3

MILESTONE	ESTIMATED TIME FRAME
Assessment and Inventory	07/01/03 – 09/30/03
Analysis	07/01/03 – 10/31/03
Request for Information (RFI)	07/01/03 – 09/01/03
Requirements Definition	07/01/03 – 10/31/03
Request for Proposal (RFP) / Request for Bid (RFB) (as applicable)	10/15/03 – 11/30/03
Award	12/01/03 – 12/31/03
Design	01/01/04 – 03/31/04
Develop / Customize	03/01/04 – 12/31/04
Test	07/01/04 – 02/28/05
Implement	03/01/05 – 04/30/05
Statewide Rollout	04/15/05 – 08/01/05
Post Implement Review	05/01/05 – 12/31/05
Operations and Maintenance	03/01/05 - ongoing

Mail Registration System

With the adoption of H.B. 03-1356, Colorado statutes now mirror the requirements for voters who register by mail found in P.L. 107-252. Counties began tracking registrants on January 1, 2003 who registered by mail. Information will be forwarded to these registrants informing them of the need to provide a driver's license number, or the identification number issued by the Department of Revenue, and the last 4 digits of the social security number. Because Colorado did not have a computerized statewide voter registration system at the time of passage of HAVA

2002, first time voters who register by mail will be required to present (where voting in person) or submitting with the ballot (where voting by mail) a current and valid photo identification as defined by §1-1-104 (19.5), Colorado Revised Statutes, or a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter.

Voter registration forms have been revised to reflect the new requirements regarding the citizenship of the applicant and the age of the applicant. An extensive voter education campaign will be conducted through a cooperative effort between the state and the counties to inform voters that if they did not provide this information when registering, the information will be required when they go to vote or when they return their absentee or mail ballot. Colorado has met the January 1, 2003 deadline for tracking and will meet the January 1, 2004 deadline for notifying individuals who registered to vote on or after January 1, 2003 of the new identification requirements.

§304 Minimum Requirements

Section 304 of HAVA 2002 mandates that the requirements of Title III are minimum standards and that the state may establish election technology and administration requirements that are more strict than HAVA 2002 as long as the state requirements are not inconsistent with federal law. The laws and rules of the state of Colorado will fully comply with all HAVA requirements and with the relevant laws listed in HAVA 2002 §906.

§305 Methods of Implementation Left to Discretion of State

The State understands that the choice of methods used to comply with HAVA 2002 is left to the discretion of the State. Colorado recognizes this responsibility and will impose disciplined practices to ensure a successful program

§311 Adoption of Voluntary Guidance by Commission

Once the federal Election Assistance Commission (EAC) has issued its voluntary recommendations with respect to Title III, the State will consider that guidance in updating the State Plan. The State will incorporate those recommendations deemed appropriate into subsequent versions of the State Plan.

§312 Process for Adoption

The State will be vigilant of the progress of the EAC on developing the Title III recommendations. If appropriate, the State will provide feedback during the public comment period after the recommendations are published in the Federal Register and participate in public hearings regarding the recommendations.

§251(b) (2) – Other Activities

Pending fund availability and all Title III requirements having been met, the State intends to use requirements payments to fund other activities to improve the administration of elections, including, but not limited to:

- establishing a polling place accessibility program to ensure that all polling places in the state are and continue to be Americans with Disabilities Act (ADA) compliant;
- providing necessary assistance to persons with limited proficiency in the English language;
- engaging in a variety of voter education and outreach activities including public service announcements, voting machine demonstrations, mass mailings and other related media avenues;
- providing election official and election judge training initiatives; and
- establishing election judge recruitment programs.

The State currently does not have the personnel, resources and technical capacity required to fully achieve HAVA 2002 compliance. Ongoing operations and maintenance of the new requirements cannot be supported within current State and local technical infrastructure and resources. The State anticipates the need for additional technology and elections personnel in the Office of the Secretary of State to ensure continued compliance with HAVA 2002. The State may use requirements payments to fund these positions.

Once Colorado has addressed all of the Title III requirements, an analysis will be performed to identify the best use of remaining funds to improve the administration of elections for Federal office.

Section 2 – Distribution and Monitoring of Requirements Payments

How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph (1) including a description of --

(A) the criteria to be used to determine the eligibility of such units or entities for receiving the payment; and

(B) the methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8).

-- HAVA §254 (a)(2)

The Secretary of State will centrally manage activities funded by requirements payments. The Secretary of State will be accountable for all expenditures, funding levels, program controls and outcomes. The Colorado Help America Vote Act [2] grants broad authority to the Secretary of State. The Secretary may exercise such powers and perform such duties as reasonably necessary to ensure that the state is compliant with all requirements pursuant to HAVA 2002 to be eligible on a timely basis for all federal funds made available to the state under HAVA 2002, including, without limitation, the power and duty to:

- develop and require education and training programs and related services for state, county, and local election officials involved in the conduct of elections[3]; and
- promulgate rules in accordance with the state administrative procedures act as the Secretary finds necessary for the proper administration, implementation, and enforcement of HAVA 2002 and of the state HAVA laws.[4]

Implementation of a comprehensive overhaul of the election process requires consensus building from the residence of the voter to the polling place to the statehouse. Seamless implementation of federal HAVA requirements at the local polling place and integration into the statutory election guidelines and timelines requires teamwork with stakeholders—state and local partners in government and in the voter outreach programs. In order to ensure a uniform and non-discriminatory approach, all affected stakeholders must have input into the process. It vests ownership and buy-in to the process. That is why the Secretary of State of Colorado has created the State HAVA Committee, made up of elected official, local election administrators, representatives from the counties and municipalities, and voter outreach programs. The State HAVA Committee has assigned subcommittees different tasks that promote not only education of the requirements of HAVA 2002, but also an environment of openness that allows the affected parties to arrive at their own solutions. The tapping of these resources assists with the collection of data and the assessment of needs of the local election officials and their private partners in the voting process. In addition, this data is critical in the buyout of election equipment and the needs for DREs.

The Secretary of State will work with local election officials to create a needs assessment instrument and determine the appropriate level of support for local activities. Monitoring and systems audits are the performance measurements of both the monetary requirements and functionality of the HAVA implementation. To that end the Office of the Secretary of State plans to include members of the election community, local governing bodies and state and local auditors in both the financial and data systems analysis in a review panel to ensure not only financial compliance but also system compatibility. The criteria for evaluation and determination of eligibility will include, but will not be limited to the following:

- a detailed written narrative that includes problem statement and data, goal statement, provision of HAVA 2002 for which funding for compliance is sought, project activities and objectives, timelines for implementation, and an itemized request for funding;
- the expenditure of funds falls within the parameters of HAVA 2002 (purpose/goals and methodology);
- the priority of the project as it relates to the requirements and timelines established by HAVA 2002;
