Notice of Intent to Repatriate Cultural Items: San Diego Archaeological Center, San Diego, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3005, of the intent to repatriate cultural items in the possession of the San Diego Archaeological Center, San Diego, CA, that meet the definition of unassociated funerary objects under 25 U.S.C. 3001.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003 (d)(3). The determinations within this notice are the sole responsibility of the museum,

institution, or Federal agency that has control of the cultural items. The National Park Service is not responsible for the determinations within this notice.

The 20 cultural items are 14 olivella shell beads, 3 natural quartz crystals, 1 ceramic pipe fragment, 1 rabbit bone bead fragment, and 1 fragment of incised shell.

The 20 cultural items objects were excavated from site CA-SDI-12809, located near Otay Ranch, 4 miles east of Chula Vista, CA. Site CA-SDI-12809 was first excavated by archeologist Dr. Charlotte McGowan from Southwestern Community College, Chula Vista, CA, in 1971. It is reported that inhumations were discovered at that time and were repatriated to the Campo Band of Diegueno Mission Indians of the Campo Indian Reservation, California. In 1993, California Department of Transportation, District 11 contracted Brian F. Mooney & Associates to excavate the site for construction of State Route 125, part of the SR 125-South Otay Valley Project. During the 1993 excavations, inhumations and artifacts were discovered at several locations. The archeology report states that the human remains were reinterred at that time "under the direction of a Native American observer." The artifacts from the 1993 collection were taken to the San Diego Archaeological Center on August 8, 2000. The unassociated funerary objects were discovered during the sorting and classifying of artifacts from CA-SDI-12809.

Archeological evidence, including artifacts typical of the late Prehistoric period (3500 B.P. to circa A.D. 1700) indicates that the site described above is Native American. Archeological and historical literature, and oral historical evidence presented during consultation, confirm that site CA-SDI-12809 is located within traditional and historical Kumeyaay territory. The site is thought to be Otai Village, a late Prehistoric-period Kumeyaay village abandoned during the Historic period. The cultural items described above are believed to be associated with known burials found at the site because of their proximity to the burials and their intensely burned condition. The cultural items are also typically associated with burial practices of the Kumeyaay.

Officials of the San Diego Archaeological Center have determined that, pursuant to 25 U.S.C. 3001 (3)(B), the cultural items described above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony and are
