Further, the Second Report and Order clarified various administrative matters involved in implementing the bidding credit. The Commission believes that the lack of basic telecommunications services puts affected tribal communities at a social and economic disadvantage. Needs and Uses: Section 9 of the Communications Act of 1934, as amended, authorized the FCC to assess and collect annual regulatory fees to recover costs incurred in carrying out its enforcement, policy and rulemaking activities and its user information services. Common carrier licensees and permittees who provide interstate telephone operator services must pay those fees. These regulatory fees are based upon a percentage of the carrier's interstate revenues. The information is necessary to determine how much each carrier's interstate revenues are available to the carrier by extraction from another OMB collection, Telecommunications Reporting Worksheet, FCC Form 499–A (OMB Control Number 3060–0855). The

requested FCC Form 159-W is intended to provide a convenient format for documenting the extracted interstate revenue information (which is already populated on the form) and complete/verify the simple calculation of the fee amount due. The information will be used by the Commission to determine if a party has properly calculated the amount if it's regulatory fee due. The Commission is revising this information collection to expand the scope of respondents, *i.e.*, wireless, cellular and mobile service providers. Only the necessary fee information will be populated on the FCC 159-W as it pertains to the particular service provider. The service providers will be requested to verify the data or correct it.

OMB Control Number: 3060-0972.

Total Annual Cost: \$45,000.

Needs and Uses: The Commission modified the reporting requirements associated with the Interstate Common Line Support mechanism in order to reduce the burdens associated with the requirements and increase the accuracy of data reported. The Commission will use the information collected to determine whether and to what extent non-price cap or rate-of-return carriers providing the data are eligible to receive universal service support. The Commission will use the tariff data to make sure that rates are just and reasonable, as required by section 201(b) of the Act.

OMB Control Number: 3060-0978.

Needs and Uses: This collection of information is needed to ensure persons with hearing and speech disabilities using text telephone (TTY) devices will be able to make 911 emergency calls over digital wireless systems. The Commission will use the information in the quarterly TTY reports to keep track of the carriers' progress in complying with E911 TTY requirements and also to monitor the progress technology is making towards compatibility with TTY devices.
