

which increases potential capacity alternatives and helps to facilitate the development of market centers. The changes to the reporting requirements were to provide greater reliability about capacity availability and price data that shippers need to make informed decisions in a competitive market as well as improve shipper's and FERC's availability to monitor marketplace behavior to detect, and remedy anticompetitive behavior.

In Order No. 582, the Commission created the Index of Customers filing requirement. Pipelines are required to identify all firm transportation services and contract demand for each customer for each rate schedule. Pipelines must file on the first business day of each calendar quarter and also post the information on their Internet Web sites. These filings include the following data

elements: shipper's name (full legal name), contract identifier, rate schedule, contract start date, contract end date, contract quantity, receipt points, delivery points, information on capacity held by rate zones to permit verification of reservation billing determinants, data to assess storage capacity and conjunctions restrictions if any (provisions that operate across multiple points or contracts and may limit a shipper's rights at a particular receipt or delivery point). The index contains fundamental data about the natural gas industry—how much of the pipeline's capacity, shippers have under contract. With this information, the Commission remains apprised of trends in the industry, the willingness of shippers to hold firm capacity, the average length of time capacity remains under contract, the proportion of capacity rolling over

under specific provisions. This information provides the Commission with the ability to analyze capacity held on pipelines and provides capacity information to the market which aids the capacity release system by enabling shippers to locate those holding capacity rights that shippers may want to acquire. The information filed with the Commission is mandatory. The Commission implements these filing requirements in the Code of Federal Regulations (CFR) under 18 CFR Part 284.12 and 13.

Action: The Commission is requesting reinstatement and a three-year approval of these reporting requirements, with no changes to the existing collection of data.

Burden Statement: Public reporting burden for this collection is estimated as:

Number of respondents annually	Number of responses per respondent *	Average burden hours per response	Total annual burden hours
(1)	(2)	(3)	(1)×(2)×(3)
100 (Index of Customers) 100	5.66 (6)	290.9 hours (3)	297,201 hours # (1,800 hours)

* Estimated total number of responses per year = 478.95.
Includes Index of Customers.

Estimated cost burden to respondents: 297,201 hours/2,080 hours per year × \$107,185 per year = \$15,315,139. The cost per respondent is equal to \$153,151.

The reporting burden includes the total time, effort, or financial resources expended to generate, maintain, retain, disclose, or provide the information including:

- (1) Reviewing instructions; (2) developing, acquiring, installing, and utilizing technology and systems for the purposes of collecting, validating, verifying, processing, maintaining, disclosing and providing information; (3) adjusting the existing ways to comply with any previously applicable instructions and requirements; (4) training personnel to respond to a collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting, or otherwise disclosing the information.

The estimate of cost for respondents is based upon salaries for professional and clerical support, as well as direct and indirect overhead costs. Direct costs include all costs directly attributable to providing this information, such as administrative costs and the cost for information technology. Indirect or overhead costs are costs incurred by an organization in support of its mission. These costs apply to activities which

benefit the whole organization rather than any one particular function or activity.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond.
