

49 U.S.C. 5334(g)(1) Determinations

The Secretary may authorize a transfer for a public purpose other than mass transportation only if the Secretary decides:

(A) The asset will remain in public use for at least 5 years after the date the asset should be used;

(B) there is no purpose eligible for assistance under this chapter for which the asset should be used;

(C) the overall benefit of allowing the transfer is greater than the interest of the government in liquidation and return of the financial interest of the government in the asset, after considering fair market value and other factors, and

(D) through an appropriate screening or survey process, that there is no interest in acquiring the asset for government use if the asset is a facility or land.

Federal Interest in Acquiring Land or Facility

This document implements the requirements of 49 U.S.C. 5334(g)(1)(D) of the Federal Transit Laws. Accordingly, FTA hereby provides notice of the availability of the assets further described below. Any Federal agency interested in acquiring the asset should promptly notify the FTA. If no Federal agency is interested in acquiring the asset, FTA will make certain that the other requirements specified in 49 U.S.C. 5334(g)(1)(a) through (c) are met before permitting the asset to be transferred.

Additional Description of Land or Facility

The property is located at 335 Coosa Street, Montgomery, Alabama and contains approximately 0.35 acres of land and a building. The property was originally built as a silo complex at least 50 years ago. In 1991, the complex was renovated to serve as an Amtrak station. Since Amtrak ceased operations along the railroad in 1994, the building has only seen occasional use as office space.

The lot is rectangular measuring 215 feet by 68.5 feet containing 15,050 square feet, or approximately 0.35 acres, and is zoned M1, heavy industry. The lot is between the CSX railroad tracks that carry over 50 trains per day and the Alabama River. Vehicular access to the lot is restricted to a road that crosses the CSX railroad. The lot has also been improved with walkways, driveways, fencing, and a playground.

The building is configured as eight connected cylindrical towers of reinforced concrete approximately 100 feet in height. The building has a metal roof that leaks substantially and needs

extensive repair. Water has damaged the ceilings and many ceiling tiles need to be replaced. Door and window openings are sawed into the reinforced concrete silo structure. The first floor of the building is heated and air-conditioned. On the first floor there is an office area including men's and women's bathrooms containing approximately 1,952 square feet. The area above the first floor is unimproved empty space.
