

concerning toxics, and pollutants affecting taste and odor, in sewage and effluent still apply.⁴ This decision is consistent with other Agency's decisions involving organoleptic pollutants. In December 1992, EPA promulgated numeric criteria for priority toxic pollutants for fourteen states at 40 CFR part 131 (57 FR 60848). The CWA requires that states adopt water quality standards for toxic pollutants. EPA excluded from this rulemaking criteria that are based on taste and odor effects, not on toxic effects. EPA noted that the purpose of the rulemaking was to protect public health and aquatic life from toxicity, and organoleptic pollutants are not toxic (57 FR 60864). Similarly, in May 2000, EPA promulgated numeric criteria for priority toxic pollutants for California, also at 40 CFR part 131. This rulemaking also excluded criteria for organoleptic pollutants because they are not based on toxicity to humans or aquatic life (65 FR 31698).
