What Could Happen as a Result of This Review?

If we find that there is new information concerning the bull trout indicating a change in classification may be warranted, we may propose a new rule that could do one of the following: (a) Reclassify the species from threatened to endangered; or (b) remove the species from the List. If we determine that a change in classification is not warranted, the bull trout will remain on the List under its current status.

Public Solicitation of New Information

We request any new information concerning the status of the bull trout, see ''What information is considered in the review?'' heading for specific criteria. Information submitted should be supported by documentation such as maps, bibliographic references, methods used to gather and analyze the data, and/or copies of any pertinent publications, reports, or letters by knowledgeable sources.
