**SUPPLEMENTARY INFORMATION:**

**Background**

O'Hare, the world's busiest airport in terms of aircraft operations in 2003, functions as both a gateway for international passengers and as a key component in the domestic network of the national air transportation system. In its domestic role, O'Hare is unique in that it serves as the nation's only dual major airline hub (for both United and American Airlines) and, due to its geographic location, serves as a logical connecting point for significant passenger flows across the United States. However, increasing traffic has resulted in record level delays at O'Hare, particularly during IFR or inclement weather conditions, placing O'Hare last in on-time performance among the 31 busiest U.S. airports. Since the mid-70's, the installation of Category II/III capability has been examined for the potential to benefit arrival and departure capabilities during poor weather conditions. The FAA's Proposed Action will allow existing scheduled operations to occur during IFR weather conditions, thereby reducing cancellations and delays benefiting the entire National Airspace System.

**Meeting Procedures**

(a) Persons wishing to speak at the meeting are asked to limit their comments to five minutes. This could be extended depending on the number of person wishing to speak.

(b) Persons wishing to make oral presentations will be required to identify themselves for the record.

(c) Proceedings of the meeting will be documented and recorded.

(d) Any person who wishes to submit a position paper or other written comments for the record may do so.

(e) The sessions may be adjourned at any time if persons present have had an opportunity to speak.

(f) This meeting is designed for listening carefully to public statements. As such, there will be no rebuttal from persons facilitating the meeting.

Issued in Des Plaines, Illinois April 7, 2004.
