

human environment. Because the proposed regulatory action would not result in significant adverse environmental impacts, FSA concluded that the preparation of a FONSI was appropriate, and therefore, an environmental impact statement is not required.

The basis for the conclusion is supported by the following findings. Cumulative impacts are expected to be minor as implementation of the proposed regulatory action will mainly result in FSA continuing to provide farm ownership, operating and emergency loans and loan servicing actions to farmers and ranchers. Each loan request will be reviewed on a site-specific basis to determine the potential impacts to the human environment.
