SUPPLEMENTARY INFORMATION: On February 9, 2004, FSA published a proposed rule, Regulatory Streamlining of the Farm Service Agency's Direct Farm Loan Programs, in the **Federal Register** (69 FR 6055). The rule proposed to streamline regulations covering the direct Farm Loan Programs by reorganizing loan making and loan servicing policies and removing internal and administrative procedures. In addition, the rule proposed to move the direct loan regulations from Chapter XVIII of Title VII of the Code of Federal Regulations to Chapter VII of Title VII. Finally, the rule proposed to revise loan making and servicing policies within the confines of the existing statutory authority.

The Agency believes that the request for additional time to comment on the proposed rule is reasonable and will still allow the rulemaking to proceed in a timely manner. As a result of the reopening and extension, the comment period for the proposed rule will close on May 4, 2004.

Signed in Washington, DC, April 12, 2004.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 (part 71) to revise the Manchester, NH, Class C airspace area. The proposed action would change the hours of the airspace from continuous to specific dates and times established in advance by a NOTAM. The effective dates and times would coincide with the hours of operation of the Manchester ATCT. The planned revised operating hours of the Manchester ATCT are from 6:00 am to midnight local time, daily. When the Manchester ATCT is not operational, the Class C airspace area would revert to a Class E airspace area. The proposed action would not change the actual dimensions, configuration, or operating requirements of the Manchester Class C airspace area.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
