Discussion

The Regulatory Review Working Group's subject of travel time relates to problem of Towing Vessel Masters and Pilots having to drive or ride long distances to their vessels, then being required to get underway soon after arrival. In many instances, this travel time could be up to 4 to 10 hours or more, and the officer is then faced with a watch of at least 6 hours. Some consider this practice as work without sufficient rest.

The Maritime Security Working Group's subject of security plans involves studying the development, approval process, and implementation history of the newly required plans. They will attempt to identify any problems or deficiencies in the processes, develop methods of notifying the Coast Guard of their existence, and ascertain any best practices that have come to light.

Procedural

The meetings are open to the public. Please note that the meetings may close early if all business is finished. At the Chair's discretion, members of the public may make oral presentations

during the meeting. If you would like to make an oral presentation at the meeting, please notify the Assistant Executive Director no later than April 26, 2004. Written material for distribution at the meeting should reach the Coast Guard no later than April 23, 2004.
