Agricultural Marketing Service

Title: Cotton Classification and Market News Service.

OMB Control Number: 0581-0009.

Summary of Collection: The Cotton Statistics and Estimates Act, 7 U.S. Code 471-476, authorizes the Secretary of Agriculture to collect and publish annually statistics or estimates concerning the grades and staple lengths of stocks of cotton. In addition, Agricultural Marketing Service (AMS) collects, authenticates, publishes, and distributes timely information of the market supply, demand, location, and market prices for cotton (7 U.S.C. 473B). This information is needed and used by all segments of the cotton industry.

Need and Use of the Information: AMS will collect information on the quality of cotton in the carryover stocks along with the size or volume of the carryover. Growers use this information in making decisions relative to marketing their present crop and planning for the next one; cotton merchants use the information in marketing decisions; and the mills that provide the data also use the combined data in planning their future purchase to cover their needs. Importers of U.S. cotton use the data in making their plans for purchases of U.S. cotton. AMS and other government agencies are users of the compiled information.

Agricultural Marketing Service

Title: Seed Service Testing Program.

OMB Control Number: 0581-0140.

Summary of Collection: The Agricultural Marketing Act (AMA) of 1946, as amended by 7 U.S.C. 1621 authorizes the Secretary to inspect and certify the quality of agricultural products and collect such fees as reasonable to cover the cost of service rendered. The purpose of the voluntary program is to promote efficient, orderly marketing of seeds and assist in the development of new and expanding markets. Under the program, samples of agricultural and vegetable seeds submitted to the Agricultural Marketing

Service (AMS) are tested for factors such as purity and germination at the request of the applicant for the service. The Testing Section of the Seed Regulatory and Testing Branch of AMS that test the seed and issues the certificates is the only Federal seed testing facility that can issue the Federal Seed Analysis Certificate.

Need and Use of the Information: Applicants generally are seed firms who use the seed analysis certificates to represent the quality of seed lots to foreign customers according to the terms specified in contracts of trade. The only information collected is information needed to provide the service requested by the applicant. Applicants must provide information such as the kind and quantity of seed, tests to be performed, and seed treatment if present, along with a sample of seed in order for AMS to provide the service. Only authorized AMS employee used the information collected to track, test, and report test results to the applicant. If the information were not collected, AMS would not know which test to conduct or would not be able to relate the test results with a specific lot of seed.

Title: Reporting and Recordkeeping Requirements for 7 CFR, Part 29.

OMB Control Number: 0581-0056.

Summary of Collection: The Tobacco Inspection Act (U.S.C. 511) requires: (1) That all tobacco sold at designated auction markets in the U.S. be inspected and graded; (2) for the establishment and maintenance of tobacco standards for U.S. grown types; (3) for the collection and dissemination of market news; and (4) for provisions to be made for interested parties to request inspection and grading services on an "as needed" basis. The Dairy and Tobacco Adjustment Act, 1983 (P.L. 98-198) gives authorization to the Secretary to inspect all tobacco offered for importation into the United States for grade and quality except cigar and oriental tobacco which must be certified by the importer as to kind and type and in the case of cigar tobacco which will be used solely in the manufacture or production of cigars. Also, the Secretary has the authority to fix and collect fees from the importers to cover the cost of inspection.

Need and Use of the Information: Various forms are used for inspection and certification process. The primary sources of data used to complete the forms are used in all business transaction. Only essential information that cannot be gathered from other sources is collected. If the information were collected less frequently, it would eliminate data needed to keep the tobacco industry and the Secretary abreast of changes.

Description of Respondents: Business or other for-profit.

Number of Respondents: 412.

Frequency of Responses: Recordkeeping; reporting; on occasion.

Total Burden Hours: 4,547.
