

incentive program for contractors to purchase capital assets manufactured in the United States. This incentive program applies to contracts for the procurement of a major defense acquisition program and applies to contracts entered into after May 2005. Section 822 authorizes the Secretary of Defense to use the Industrial Base Capabilities Fund established under Section 814 of Public Law 108-136 for this purpose. This section also directs the Secretary to provide consideration in source selection for contractors with eligible assets for major defense systems and makes provision for establishing implementing regulations.

As the Department crafts this incentive program, industry input is considered essential. What does industry believe are the factors or inducements that would motivate contractors to purchase capital assets manufactured in the United States? It should be noted that no funds have been appropriated for the Industrial Base Capabilities Fund. Therefore, the Department is seeking suggestions for other alternatives. Interested parties are invited to submit written comments to assist the Department in its deliberations and discussions.

Material that is business confidential information will be exempted from public disclosure as provided for by 5 U.S.C. 552(b)(4) (Freedom of Information Act rules). Anyone submitting business confidential information should clearly identify the business confidential portion of the submission and also provide a non-confidential submission, which can be placed in the public file. Comments not marked business confidential may be subject to disclosure under the Freedom of Information Act.

### Summary of Information Collection

The clause at DFARS 252.211-7005, Substitutions for Military or Federal Specifications and Standards, is used in solicitations and contracts for previously developed items. The clause encourages offerors to propose management or manufacturing processes, that have been previously accepted by DoD under the SPI program, as alternatives to military or Federal specifications and standards cited in the solicitation. An offeror proposing to use an SPI process must:

(1) Identify the specific military or Federal specification or standard for which the SPI process has been accepted;

(2) Identify each facility at which the offeror proposes to use the SPI process in lieu of military or Federal specifications or standards cited in the solicitation;

(3) Identify the contract line items, subline items, components, or elements affected by the SPI process; and

(4) If the proposed SPI process has been accepted at the facility at which it is proposed for use, but is not yet listed at the SPI Internet site, submit documentation of DoD acceptance of the SPI process.
