¹ Although this rate process seeks approval for a 5-year period (FY 2005–2009), 6 years of data are shown in the above table because FY 2004 data is estimated.

Environmental Compliance

In compliance with the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 4321, *et seq.*); Council on Environmental Quality Regulations (40 CFR 1500–1508); and DOE NEPA Regulations (10 CFR 1021), Western has determined that this action is categorically excluded from the preparation of an environmental assessment or environmental impact statement.

Determination Under Executive Order 12866

Western has an exemption from centralized regulatory review under Executive Order 12866; accordingly, no clearance of this notice by the Office of Management and Budget is required.

Regulatory Flexibility Analysis

The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) requires Federal agencies to perform a regulatory flexibility analysis if a final rule is likely to have a significant economic impact on a substantial number of small entities and there is a legal requirement to issue a general notice of proposed rulemaking. Western has determined that this action does not require a

regulatory flexibility analysis since it is a rulemaking of particular applicability involving rates or services applicable to public property.

Small Business Regulatory Enforcement Fairness Act

Western has determined that this rule is exempt from congressional notification requirements under 5 U.S.C. 801 because the action is a rulemaking of particular applicability relating to rates or services and involves matters of procedure.

Availability of Information

Information regarding this rate formula extension is available for public review in the Colorado River Storage Project Management Center, Western Area Power Administration, 150 East Social Hall Avenue, Suite 300, Salt Lake City, UT 84111. Some of these documents are also available at <http://www.wapa.gov/crsp/rateanal.htm> under CRSP Rate Adjustment documents for the Amistad and Falcon Projects section.

Submission to Federal Energy Regulatory Commission

The rate formula extension herein confirmed, approved, and placed into effect on an interim basis, together with supporting documents, will be submitted to the Commission for confirmation and approval on a final basis.

Order

In view of the foregoing and pursuant to the authority delegated to me, I confirm and approve and place into effect on an interim basis a renewal of the rate formula provisions contained in the Contract and supplemented. The rate formula has been in effect since June 8, 1999. The rate formula provisions shall remain in effect on an interim basis, pending the Commission's confirmation and approval of this or a substitute rate formula on a final basis through June 7, 2009.

Dated: April 20, 2004.

Any comments related to this ICR should be submitted to EPA and OMB within 30 days of this notice. EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing in EDOCKET as EPA receives them and without change, unless the comment contains copyrighted material, CBI, or other information whose public disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in EDOCKET. The entire printed comment, including the copyrighted material, will be available in the public docket.

Although identified as an item in the official docket, information claimed as CBI, or whose disclosure is otherwise restricted by statute, is not included in the official public docket, and will not be available for public viewing in EDOCKET. For further information about the electronic docket, see EPA's **Federal Register** notice describing the electronic docket at 67 FR 38102 (May 31, 2002), or go to <http://www.epa.gov/edocket>.

Title: NSPS for Stationary Gas Turbines (40 CFR Part 60, Subpart GG) (Renewal).

Abstract: Owners and operators of stationary gas turbines subject to New Source Performance Standard (NSPS) subpart GG must submit a one-time-only notification of construction/reconstruction, modification, and startup date, initial performance test date, physical or operational changes, and demonstration of a continuous monitoring system. They also must provide a report on initial performance test results, monitoring results and any excess emissions. Records must be maintained of startups, shutdowns, malfunctions; periods when the continuous monitoring system is inoperative; sulfur and nitrogen content of the fuel; fuel to water ratio; rate of fuel consumption; and ambient conditions. Records must be maintained for two years. Responses to this information collection are deemed to be mandatory, per section 114(a) of the Clean Air Act. This information is being collected to assure compliance with 40 CFR part 60, subpart GG.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 56 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able

to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners and Operators of stationary gas turbines with a heat input at peak load equal to or greater than 10.7 gigajoules per hour.

Estimated Number of Respondents: 535.

Frequency of Response: Semiannual.
Estimated Total Annual Hour Burden: 59,519 hours.

Estimated Total Annual Costs: \$3,837,190, which includes \$0 annualized capital/startup costs, \$0 annual O&M costs, and \$3,837,190 annual labor costs.

Changes in the Estimates: There is a decrease of 33,920 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is due to a reduction in the number of existing sources resulting from a more accurate estimate of the average number of existing and anticipated new sources.

Dated: April 13, 2004.

Oscar Morales,

Director, Collection Strategies Division.
