

### Additional Programs

NSF has applied to use supplemental programs 2 and 5, based upon the criteria detailed in OSHA's March 9, 1995 **Federal Register** notice on the NRTL programs (60 FR 12980, 3/9/95). This notice lists nine (9) programs, eight of which (called the supplemental programs) an NRTL may use to control and audit, but not actually to generate, the data relied upon for product certification. An NRTL's initial recognition will always include the first or basic program, which requires that all product testing and evaluation be performed in-house by the NRTL that will certify the product. NSF's current scope also includes the use of Programs 4, 8, and 9. OSHA's on-site review report on NSF's application for expansion indicates that NSF appears to meet the criteria for use of the following additional supplemental programs: Program 2: Acceptance of testing data from independent organizations, other than NRTLs.

Program 5: Acceptance of testing data from non-independent organizations.

### Preliminary Finding on the Application

NSF has submitted an acceptable request for expansion of its recognition as an NRTL. In connection with this request, OSHA performed an on-site review of NSF's NRTL facilities and, in the on-site review report, the assessor recommended the expansion for the additional test standard (see Exhibit 16 in Docket No. NRTL2-98).

Our review of the application file, the assessor's report, and other pertinent documents, indicates that NSF should be capable of using the additional test standard listed above. Accordingly, OSHA has made a preliminary finding that NSF International can meet the requirements, as prescribed by 29 CFR 1910.7, for the expansion of its recognition to include that test standard. This preliminary finding does not constitute an interim or temporary approval of the application.

OSHA welcomes public comments, in sufficient detail, as to whether NSF has met the requirements of 29 CFR 1910.7 for expansion of its recognition as a Nationally Recognized Testing Laboratory. Your comments should consist of pertinent written documents and exhibits. To consider a comment, OSHA must receive it at the address provided above (see **ADDRESSES**), no later than the last date for comments (see **DATES** above). Should you need more time to comment, OSHA must receive your written request for extension at the address provided above no later than the last date for comments.

You must include your reason(s) for any request for extension. OSHA will limit any extension to 30 days, unless the requester justifies a longer period. We may deny a request for extension if it is frivolous or otherwise unwarranted. You may obtain or review copies of NSF's request, the recommendation on the expansion, and all submitted comments, as received, by contacting the Docket Office, Room N2625, Occupational Safety and Health Administration, U.S. Department of Labor, at the above address. You should refer to Docket No. NRTL2-98, the permanent record of public information on NSF's recognition.

The NRTL Program staff will review all timely comments and, after resolution of issues raised by these comments, will recommend whether to grant NSF's expansion request. The Agency will make the final decision on granting the expansion and, in making this decision, may undertake other proceedings that are prescribed in Appendix A to 29 CFR 1910.7. OSHA will publish a public notice of this final decision in the **Federal Register**.

Signed at Washington, DC this 22 day of April, 2004.

**John L. Henshaw,**

*Assistant Secretary.*
