HHS has delegated responsibility for the implementation of this Act to CDC's

Office on Smoking and Health (OSH). OSH has collected ingredient reports on cigarette products since 1986. The Comprehensive Smokeless Tobacco Health Education Act of 1986 (15 U.S.C. 4401 *et seq.*, Pub. L. 99-252) requires each person who manufactures,

packages, or imports smokeless tobacco (SLT) products to provide the Secretary of Health and Human Services (HHS) with a list of ingredients added to tobacco in the manufacture of smokeless tobacco products. This legislation also authorizes HHS to undertake research, and submit an annual report to the Congress (as deemed appropriate), discussing the health effects of ingredients in smokeless tobacco products. HHS delegated responsibilities for the implementation of this Act to CDC's Office on Smoking and Health (OSH). The oral use of SLT represents a significant health risk which can cause cancer and a number of non-cancerous oral conditions, and can lead to nicotine addiction and dependence. Furthermore, SLT use is not a safe substitute for cigarette smoking. The estimated annualized burden is 254 hours.
