DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[Program Announcement 04110]

Addressing Emerging Infectious Diseases in Bangladesh; Notice of Intent To Fund Single Eligibility Award

A. Purpose

The Centers for Disease Control and Prevention (CDC) announces the intent to fund fiscal year (FY) 2004 funds for a cooperative agreement program to strengthen the capacity in Bangladesh to detect and evaluate emerging infectious diseases and to evaluate new vaccines and other interventions that may offer approaches toward their prevention. The Catalog of Federal Domestic Assistance number for this program is 93.283.

B. Eligible Applicant

Assistance will be provided only to the International Centre for Diarrhoeal Disease Research, Bangladesh (ICDDR,B). Eligibility is limited to ICDDR,B because:

- Activities to be supported under this program include both new projects and follow-on of projects previously conducted at ICDDR,B that are dependent upon established ICDDR,B surveillance systems in special populations in Bangladesh, including in an urban slum area (Kamalapur), rural sites (Abhoynagar and Mirsarai), and a network of hospitals and health centers. No other organization has access to these surveillance systems and so only ICDDR,B can conduct the activities.

- ICDDR,B is the only known institution in Bangladesh which possesses the scientific and management capability to meet program requirements without jeopardizing or compromising the quality of the research and other activities. ICDDR,B was established in 1978 and includes a mix of national and international staff, including public health scientists, laboratory scientists, clinicians, epidemiologists, information technology professionals, and experts in emerging infectious diseases and vaccine sciences, etc. ICDDR,B collaborates with the Bangladesh Ministry of Health, universities, community groups, private industry, U.S. governmental institutions (e.g., USAID), governments of other countries, and others to study and address infectious disease health problems in Bangladesh and the surrounding region, leading to solutions that can be applied in developing countries worldwide.
