

emissions budgets for the plan are shown in Table 2.

TABLE 2.—ANCHORAGE MAINTENANCE AREA MOTOR VEHICLE EMISSIONS BUDGETS THROUGH 2023 AND BEYOND
[Tons CO/winter day]

Year	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013
Budget	111.0	110.7	110.4	110.0	109.7	109.4	109.1	108.8	108.5	108.1
Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
Budget	107.1	106.6	106.1	105.6	105.1	104.6	104.1	103.6	103.1	103.1

Emission budgets for years beyond 2023 are to be computed through linear extrapolation with the following equation: Mobile Source Emission Budget (tons per day) = $0.438 \times \text{Year} - 2023 + 103.34$.

EPA found these motor vehicle emissions budgets adequate for conformity purposes. See 69 FR 12651, March 17, 2004.

VI. Proposed Action

EPA is proposing approval of the Anchorage CO Maintenance Plan and redesignation of the Anchorage CO nonattainment area to attainment. This proposed redesignation is based on validated monitoring data and projections made in the maintenance demonstration. EPA believes the area will continue to meet the NAAQS for CO for at least 10 years beyond this redesignation, as required by the Act. Alaska has demonstrated compliance with the requirements of section 107(d)(3)(E) based on information provided by the MOA and contained in the Alaska SIP and Anchorage, Alaska CO maintenance plan. A Technical Support Document on file at the EPA Region 10 office contains a detailed analysis and rationale in support of the redesignation of the Anchorage CO nonattainment area to attainment.

VII. Statutory and Executive Order Reviews

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this proposed action is not a “significant regulatory action” and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, “Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use” (66 FR 28355, May 22, 2001). This proposed action merely proposes to approve State law as meeting Federal requirements and imposes no additional requirements beyond those imposed by State law. Accordingly, the Administrator certifies that this proposed rule will not have a

significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule proposes to approve pre-existing requirements under State law and does not impose any additional enforceable duty beyond that required by State law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104–4).

This proposed rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). This action also does not have Federalism implications because it does not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This action merely proposes to approve a State rule implementing a Federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. This proposed rule also is not subject to Executive Order 13045 “Protection of Children from Environmental Health Risks and Safety Risks” (62 FR 19885, April 23, 1997), because it is not economically significant.

In reviewing SIP submissions, EPA’s role is to approve State choices, provided that they meet the criteria of the Clean Air Act. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be

inconsistent with applicable law for EPA, when it reviews a SIP submission, to use VCS in place of a SIP submission that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. This proposed rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).
