SUPPLEMENTARY INFORMATION: Reports published in 2001 by the National Academy of Sciences (NAS) and the General Accounting Office (GAO) provided a critical evaluation of the effectiveness of wetlands compensatory mitigation for authorized losses of wetlands and other waters under Section 404 of the CWA. Section 404 regulates discharges of dredged and fill materials into waters of the United States and requires compensatory mitigation for unavoidable impacts. The independent analyses and other commentaries highlighted a number of shortfalls and identified a variety of technical, programmatic, and policy recommendations for the Federal agencies, States, and other involved parties.

An interagency team drafted the National Mitigation Action Plan endorsing the goal of no net loss of wetlands and outlining specific action items that address the concerns of the NAS, GAO, and other independent evaluations. The 17 actions, with various agency leads, address areas of concern, including collection and availability of data, clarifying performance standards, improving accountability, and integrating mitigation into the watershed approach. Development of the Stream Mitigation Compendium is one of these action items. The FIMW is seeking public review before finalizing this document.

Please note that comments, including names and street addresses of respondents, are available for public review in a docket. Copies of the draft Stream Mitigation Compendium are available at the Mitigation Action Plan Web site at <http://www.mitigationactionplan.gov> (Click on "Status of Action Items" and locate and click on "Stream Mitigation Compendium" in the summary table). A printed copy of this document can be obtained by contacting: Palmer Hough, U.S. Environmental Protection Agency, Wetlands Division (4502T), 1200 Pennsylvania Avenue, NW., Washington, DC 20460.
