

corporate leadership. Additionally, corporate membership will allow the EPA to explore broad and innovative approaches to achieving environmental benefits stemming from corporate-level decisions, such as supply chain management and product stewardship.

The criteria for corporate members are expected to include: participation by a substantial number of their facilities in Performance Track or similar State programs and commitment to increase this participation over time. The EPA believes this link between the corporate and facility programs will encourage stronger corporate-level commitment to Performance Track and performance excellence. Other criteria would parallel those that Performance Track currently applies to facilities, with a greater emphasis on companies working with their suppliers and customers to achieve environmental improvements.

EPA expects to solicit applications for this program later in 2004.

Dated: April 27, 2004.
