Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has extended the public comment period for the draft plant-specific supplement to the "Generic Environmental Impact Statement (GEIS), NUREG-1437," regarding the renewal of operating licenses DPR-33, DPR-52, and DPR-68 for an additional 20 years of operation at the Browns Ferry Nuclear Plant, Units 1, 2, and 3 (BFN).

The application for renewal was received on January 6, 2004, pursuant to 10 CFR part 54. A notice of receipt and availability of the application, which included the environmental report (ER), was published in the **Federal Register** on January 13, 2004, (69 FR 1012). A notice of intent to prepare an environmental impact statement and conduct scoping process (69 FR 11462) and a notice of acceptance for docketing and notice of opportunity for hearing (69 FR 11460) regarding renewal of the facility operating license were published in the **Federal Register** on March 10, 2004. The purpose of this notice is to inform the public that the U.S. Nuclear Regulatory Commission (NRC) has extended the comment period on the environmental scope of the BFN license renewal review in response to a request from a member of the public. In view of the importance of meaningful stakeholder input on the environmental scope of the BFN license renewal review, the NRC has decided to extend the comment period.

Any interested party may submit comments on the environmental scope of the BFN license renewal review for

consideration by the NRC staff. To be certain of consideration, comments on the draft supplement to the GEIS and the proposed action must be received by June 4, 2004. Comments received after the due date will be considered if it is practical to do so, but the NRC staff is able to assure consideration only for comments received on or before this date. Written comments on the environmental scope of the BFN license renewal review should be sent to the Chief, Rules and Directives Branch, Division of Administrative Services, Office of Administration, Mailstop T-6D59 U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.
