**FOR FURTHER INFORMATION CONTACT:** Requests for additional information should be directed to the attention of Marguerite Owen, General Counsel, ESLGB, (202) 482-0531 or [mowen@doc.gov](mailto:mowen@doc.gov).

**SUPPLEMENTARY INFORMATION****I. Abstract**

Chapter 1, Public Law 106-51, "The Emergency Steel Loan Guarantee Act of

1999" ("Act") established an Emergency Steel Loan Guarantee Program ("Program") which is designed to provide guaranteed loans to qualified steel and iron ore companies by private banking and investment institutions. A Board composed of the Chairman of the Federal Reserve Board, the Chairman on the Securities and Exchange Commission, and the Secretary of the Department of Commerce ("Board") has been given the responsibility to oversee this Program.

A loan guarantee may be issued upon application to the Board by a private banking or investment institution, which proposes to enter into an agreement to provide a loan to a qualified steel company. A qualified steel company is defined in the Act to mean any company that: (A) Is incorporated under the laws of any State; (B) is engaged in the production and manufacture of a steel mill product; and (C) has experienced layoffs, production losses, or financial losses since January 1998. The Act established several conditions applicable to each loan guarantee issued by the Board.

Subsequent to the review of an application by the Board, a successful applicant will be required to sign a guarantee agreement as a condition of receiving the loan guarantee from the Board. The guarantee agreement provides the terms and conditions of the loan guarantee, and sets forth the requirements, including reporting and record keeping, that the lender must meet for the guarantee to remain in force.

When the program's authorizing legislation was initially enacted, the Board's authority to issue guarantees was scheduled to terminate on December 31, 2001, and guaranteed loans were required to be repaid by December 31, 2005. Public Law 107-63 extended the Board's authority to guarantee loans through December 31, 2003 and extended the date by which all guaranteed loans must be paid in full to no later than December 31, 2015. The authority to issue new loan guarantees, in fact, expired on December 31, 2003. As such, the Board had not previously requested an extension of Paperwork Reduction Act (PRA) approval for its various information collections associated with issuance of new guarantees. However, the authority to issue new loan guarantees was restored by section 211 of Public Law 108-199, enacted January 23, 2004. This law extended the Board's authority to issue new loan guarantees through December 31, 2005. Thus, the Board needs to reinstate, and receive PRA approval for,

its previously existing information collection.

## II. Method of Collection

The signed final guarantee documents for the individual loan guarantees will be submitted in hard copy because they will contain privileged financial and commercial information that is protected from disclosure under the Freedom of Information Act (FOIA).

**SUPPLEMENTARY INFORMATION:** Exports of electricity from the United States to a foreign country are regulated and require authorization under section 202(e) of the Federal Power Act (FPA) (16 U.S.C. 824a(e)).

On March 12, 2004, the Office of Fossil Energy (FE) of the Department of Energy (DOE) received an application from SESCO to transmit electric energy from the United States to Canada. SESCO proposes to arrange for the delivery of electric energy to Canada over the existing international transmission facilities owned by Basin Electric Power Cooperative, Bonneville Power Administration, Eastern Maine Electric Cooperative, International Transmission Company, Joint Owners of the Highgate Project, Long Sault, Inc., Maine Electric Power Company, Maine Public Service Company, Minnesota Power Inc., Minnkota Power Cooperative, New York Power Authority, Niagara Mohawk Power Corporation, Northern States Power, Vermont Electric Power Company and Vermont Electric Transmission Company. The construction, operation, maintenance, and connection of each of the international transmission facilities to be utilized by SESCO, as more fully described in the application, has previously been authorized by a Presidential permit issued pursuant to Executive Order 10485, as amended.
