

over time. This information collection request renewal also incorporates impacts associated with a program change to the Spill Prevention, Control and Countermeasure (SPCC) regulations since the last ICR approval (May 2, 2001). EPA issued revisions to the final SPCC regulations on July 17, 2002.

A facility-specific response plan (FRP) will help an owner or operator identify the necessary resources to respond to an oil spill in a timely manner. If implemented effectively, the FRP will reduce the impact and severity of oil spills and may prevent spills because of the identification of risks at the facility. Although the owner or operator is the primary data user, EPA also uses the data in certain situations to ensure that facilities comply with the regulation and to help allocate response resources. State and local governments may use the data, which are not generally available elsewhere and can greatly assist local emergency preparedness planning efforts.

EPA reviews all submitted FRPs and must approve FRPs for those facilities whose discharges may cause "significant and substantial harm" to the environment in order to ensure that facilities believed to pose the highest risk have planned for adequate resources and procedures to respond to a spill. (See 40 CFR 112.20(f)(3) for further information about the criteria for "significant and substantial harm.")

None of the information to be gathered for this collection is believed to be confidential. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 60 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources;

complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: The owner or operator of a facility that is required to have a SPCC plan under the Oil Pollution Prevention regulation (40 CFR part 112) and that could cause "substantial harm" to the environment must prepare and submit to EPA a facility response plan. (See 40 CFR 112.20(b)(1) and (f) for further information about the criteria for substantial harm.)

Estimated Number of Respondents: 10,644.

Frequency of Response: On occasion, as needed.

Estimated Total Annual Hour Burden: 634,994.

Estimated Total Annual Cost: \$17,931,000, includes \$21,000 annual startup/capital costs, \$0 annual O&M costs and \$17,910,000 annual labor costs.

Changes in the Estimates: There is an increase of 51,864 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is due to an adjustment to account for growth of the affected facility universe over time. This increase is partially offset, however, due to program changes to the Spill Prevention, Control, and Countermeasure (SPCC) Plan regulations that exclude wastewater treatment facilities.

representing a broad range of interests and scientific expertise. It will provide advice to the Agency on matters related to the validation of assays under consideration by the Endocrine Disruptor Screening Program (EDSP). The Committee will analyze relevant scientific issues, protocols, review data and interpretations of data for the assays. The major objective of the Committee is to provide advice and recommendations to the EPA Administrator on scientific and technical aspects of the assays as they progress through the validation process. EPA has determined that this advisory committee is in the public interest and will assist the Agency in performing its duties as prescribed by the Food Quality Protection Act of 1996. Copies of the Committee Charter will be filed with the appropriate congressional committees and the Library of Congress.
