

disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

III. What are EPA's Burden and Cost Estimates for this ICR?

Under PRA, "burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain or disclose or provide information to or for a Federal Agency. For this collection it includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of this estimate, which is only briefly summarized in this notice. The annual public burden for this collection of information is estimated to average 29.5 hours per response. The following is a summary of the estimates taken from the ICR:

Respondents/affected entities: Manufacturers or importers of chemical substances, mixtures, or categories.

Estimated total number of potential respondents: 11.

Frequency of response: On occasion.

Estimated total/average number of responses for each respondent: 1.79.

Estimated total annual burden hours: 580 hours.

Estimated total annual burden costs: \$48,972.

IV. Are There Changes in the Estimates from the Last Approval?

This request reflects a decrease in the total estimated burden of 2,775 hours (from 3,355 hours to 580 hours) from that currently in the OMB inventory. This decrease is attributable to a reduction in the assumed number of PAIR reports filed annually, from an average of 118.00 per year to 19.67 per year. The more recent average is based on the past 3 years (2001–2003) of PAIR reporting data. The annual average numbers of respondents (reporting sites) is 11, which has also decreased from the previous assumed average of 48.

V. What is the Next Step in the Process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Fourth Meeting of the World Trade Center Expert Technical Review Panel To Continue Evaluation on Issues Relating to Impacts of the Collapse of the World Trade Center Towers

AGENCY: Environmental Protection Agency.

ACTION: Notice of meeting.

SUMMARY: The World Trade Center Expert Technical Review Panel will hold its fourth meeting intended to provide for greater input from individuals on ongoing efforts to monitor the situation for New York residents and workers impacted by the collapse of the World Trade Center. The panel members will help guide the EPA's use of the available exposure and health surveillance databases and registries to characterize any remaining exposures and risks, identify unmet public health needs, and recommend any steps to further minimize the risks associated with the aftermath of the World Trade Center attacks. The panel will meet several times over the course of approximately two years. These panel meetings will be open to the public, except where the public interest requires otherwise. Information on the panel meeting agendas, documents (except where the public interest requires otherwise), and public

registration to attend the meetings will be available from an Internet Web site. EPA has established an official public docket for this action under Docket ID No. ORD–2004–0003.

DATES: The fourth meeting of this panel will be held on June 22, 2004, from 9:30 a.m. to 5:15 p.m., eastern daylight savings time. On-site registration will begin at 9 a.m.

ADDRESSES: The meeting will be held at St. John's University, Saval Auditorium, 101 Murray Street (between Greenwich Street and West Side Highway), New York City (Manhattan). The auditorium is located on the second floor of the building and is handicap accessible. A government-issued identification (*e.g.*, driver's license) is required for entry.

FOR FURTHER INFORMATION CONTACT: For meeting information, registration and logistics, please see the Web site <http://www.epa.gov/wtc/panel> or contact ERG at (781) 674–7374. The meeting agenda and logistical information will be posted on the Web site and will also be available in hard copy. For further information regarding the technical panel, contact Ms. Lisa Matthews, EPA Office of the Science Advisor, telephone (202) 564–6669 or e-mail: matthews.lisa@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Meeting Information

Eastern Research Group, Inc., (ERG), an EPA contractor, will coordinate the meeting. To attend the meeting as an observer, please register by visiting the Web site at: <http://www.epa.gov/wtc/panel>. You may also register for the meeting by calling ERG's conference registration line between the hours of 9 a.m. and 5:30 p.m. e.d.s.t. at (781) 674–7374 or toll free at 1–800–803–2833, or by faxing a registration request to (781) 674–2906 (include full address and contact information). Pre-registration is strongly recommended as space is limited, and registrations are accepted on a first-come, first-served basis. The deadline for pre-registration is June 17, 2004. Registrations will continue to be accepted after this date, including on-site registration, if space allows. There will be a limited time at the meeting for oral comments from the public. Oral comments will be limited to five (5) minutes each. If you wish to make a statement during the observer comment period, please check the appropriate box when you register at the Web site. Please bring a copy of your comments to the meeting for the record or submit them electronically via e-mail to meetings@erg.com, subject line: WTC.

II. Background Information

Immediately following the September 11, 2001, terrorist attack on New York City's World Trade Center, many federal agencies, including the EPA, were called upon to focus their technical and scientific expertise on the national emergency. EPA, other federal agencies, New York City, and New York State public health and environmental authorities focused on numerous cleanup, dust collection and ambient air monitoring activities to ameliorate and better understand the human health impacts of the disaster. Detailed information concerning the environmental monitoring activities that were conducted as part of this response is available at the EPA Response to 9-11 Web site at <http://www.epa.gov/wtc/>.

In addition to environmental monitoring, EPA efforts also included toxicity testing of the dust, as well as the development of a human exposure and health risk assessment. This risk assessment document, *Exposure and Human Health Evaluation of Airborne Pollution from the World Trade Center Disaster*, is available on the Web at <http://www.epa.gov/ncea/wtc.htm>. Numerous additional studies by other Federal and State agencies, universities, and other organizations have documented impacts to both the outdoor and indoor environments, and to human health.

While these monitoring and assessment activities were ongoing, and the cleanup at Ground Zero itself was occurring, EPA began planning for a program to clean and monitor residential apartments. From June 2002 until December 2002, residents impacted by World Trade Center dust and debris in an area of about 1 mile by 1 mile south of Canal Street were eligible to request either federally-funded cleaning and monitoring for airborne asbestos or monitoring of their residences. The cleanup continued into the summer of 2003, by which time the EPA had cleaned and monitored 3,400 apartments and monitored 800 apartments. Detailed information on this portion of the EPA response is also available at <http://www.epa.gov/wtc/>.

A critical component of understanding long-term human health impacts is the establishment of health registries. The World Trade Center Health Registry is a comprehensive and confidential health survey of those most directly exposed to the contamination resulting from the collapse of the World Trade Center towers. It is intended to give health professionals a better picture of the health consequences of 9/11. It

was established by the Agency for Toxic Substances and Disease Registry (ATSDR) and the New York City Department of Health and Mental Hygiene (NYCDHMH) in cooperation with a number of academic institutions, public agencies and community groups. Detailed information about the registry can be obtained from the registry Web site at: <http://www.nyc.gov/html/doh/html/wtc/index.html>.

In order to obtain individual advice on the effectiveness of these programs, unmet needs and data gaps, the EPA has convened a technical panel of experts who have been involved with World Trade Center assessment activities. Dr. Paul Gilman, EPA Science Advisor, serves as Chair of the panel, and Dr. Paul Liroy, Professor of Environmental and Community Medicine at the Environmental and Occupational Health Sciences Institute of the Robert Wood Johnson Medical School—UMDNJ and Rutgers University, serves as Vice Chair. A full list of the panel members, a charge statement and operating principles for the panel are available from the panel Web site listed above. Panel meetings typically will be one- or two-day meetings, and they will occur over the course of approximately a two-year period. Panel members will provide individual advice on issues the panel addresses. These meetings will occur in New York City and nearby locations. All of the meetings will be announced on the Web site and by a **Federal Register** Notice, and they will be open to the public for attendance and brief oral comments. The focus of the fourth meeting is to discuss issues surrounding development of a World Trade Center dust signature. The panel will also discuss issues surrounding development of a screening survey to determine the geographic extent of World Trade Center contamination, as well as World Trade Center contamination as a function of building use and cleaning history. Further information on panel meetings can be found at the Web site identified earlier: <http://www.epa.gov/wtc/panel>.

III. How To Get Information on E-DOCKET

EPA has established an official public docket for this action under Docket ID No. ORD-2004-0003. The official public docket consists of the documents specifically referenced in this action, any public comments received, and other information related to this action. Although a part of the official docket, the public docket does not include Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. The official public

docket is the collection of materials that is available for public viewing at the Office of Environmental Information (OEI) Docket in the Headquarters EPA Docket Center, (EPA/DC) EPA West Building, Room B102, 1301 Constitution Avenue, NW., Washington, DC 20460. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the OEI Docket is (202) 566-1752; facsimile: (202) 566-1753; or e-mail: ORD.Docket@epa.gov.

An electronic version of the public docket is available through EPA's electronic public docket and comment system, EPA Dockets. You may use EPA Dockets at <http://www.epa.gov/edocket/> to submit or view public comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Once in the system, select "search," then key in the appropriate docket identification number.

Dated: June 2, 2004.

Paul Gilman,

EPA Science Advisor and Assistant Administrator for Research and Development.

Administrative Order on Consent—Portland Cement, Site 5

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed settlement agreement pursuant to section 122(g)(4) of CERCLA, request for public comment, and notice of opportunity for a public meeting.

SUMMARY: Notice is hereby given of a proposed settlement pursuant to section 122(g)(4) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, 42 U.S.C. 9622(g)(4), concerning the Portland Cement Superfund site, Site 5 ("Site 5"). The proposed settlement is embodied in an Administrative Order on Consent ("AOC") between the United States, on behalf of the United States Environmental Protection Agency ("EPA"), the present owners of Site 5 (the 1967 Trust and the 1981 Trust, hereinafter, collectively the "Trusts"),
