o. *Scoping Process*: Scoping is intended to advise all parties regarding the proposed scope of the EA and to seek additional information pertinent to this analysis. The Commission intends to prepare one Environmental Assessment (EA) on the project in accordance with the National

Environmental Policy Act (NEPA). The EA will consider both site-specific and cumulative environmental effects and reasonable alternatives to the proposed action. Should substantive comments requiring re-analysis be received on the NEPA document, we would consider preparing a final NEPA document.

At this time, the Commission staff does not anticipate holding formal public or agency scoping meetings near the project site. Instead, staff will conduct paper scoping.

As part of scoping the staff will: (1) Summarize the environmental issues tentatively identified for analysis in the EA; (2) solicit from participants all available information, especially quantifiable data, on the resources at issue; (3) encourage comments from experts and the public on issues that should be analyzed in the EA, including viewpoints in opposition to, or in support of, the staff's preliminary views; (4) determine the resource issues to be addressed in the EA; and (5) identify those issues that require a detailed analysis, as well as those issues that do not require a detailed analysis.

Consequently, interested entities are requested to file with the Commission any data and information concerning environmental resources and land uses in the project area and the project's impacts to the aforementioned.
