

**Transmittal No. 04-07****Notice of Proposed Issuance of Letter of Offer  
Pursuant to Section 36(b)(1)  
of the Arms Export Control Act****Annex  
Item No. vii****(vii) Sensitivity of Technology:**

1. The SM-2 Block IIIA Standard missile is a U.S. Navy surface-launched guided missile and classified Secret. It is operationally deployed on cruisers, destroyers, and frigates for use against air and surface threats (aircraft, missiles, and ships). The guidance system employs a continuous-wave radar link for homing to the target. Steering and roll commands from the adaptive auto pilot system provide flight stability via four aft-mounted control surfaces. Propulsion is provided by a solid propellant, dual thrust rocket motor, which is an integral part of the missile airframe. The target-detecting device is a complex fuze with dual radar systems to optimize warhead lethality against a spectrum of target sizes and speeds.

2. The MK 44 Guided Missile Round Pack (GMRP) Tactical Missiles each consist of a MK 116 Block 1A Rolling Airframe Missile (RAM) within a MK 8 Launching canister. The MK 44 GMRP (containing the RAM missile) is Unclassified but considered sensitive. If the missile is removed from its sealed launching canister, the missile is considered Confidential. The GMRP is transported in a tri-pack shipping and storage container and is loaded as an All Up Round into the launchers. Only in extreme cases would a missile be removed from its canister. Some Secret software is loaded into the missile. Extraction of the Secret software would be difficult. The documents are not considered sensitive and are Unclassified.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures or equivalent systems which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that Korea can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.
