Rapid Development of Infrastructure, Monitoring and Evaluation and Behavior Change Communication Activities at the Ministry Responsible for the Fight Against AIDS in Cote d'Ivoire; Notice of Intent To Fund Single Eligibility Award**A. Purpose**

The Centers for Disease Control and Prevention (CDC) announces the intent to fund fiscal year (FY) 2004 funds for a cooperative agreement program to rapidly help the Ministry responsible for the fight against AIDS (MLS) to develop sustainable, indigenous capacity to support its role as the principal coordinating body for a multisectoral, decentralized and comprehensive response to HIV/AIDS in the Republic of Cote d'Ivoire. The

Catalog of Federal Domestic Assistance number for this program is 93.941.

B. Eligible Applicant

The Ministry responsible for the fight against AIDS of Cote d'Ivoire (MLS) is the only organization that can apply for these funds. MLS is mandated by the government of Cote d'Ivoire to coordinate HIV/AIDS activities in the country, including monitoring and evaluation (M&E) of programs and behavior change communication (BCC) activities.

C. Funding

Approximately \$250,000 is available in FY 2004 to fund this award. It is expected that the award will begin on or before September 1, 2004, and will be made for a 12-month budget period within a project period of up to three years. Funding estimates may change.

D. Where To Obtain Additional Information

For general comments or questions about this announcement, contact: Technical Information Management, CDC Procurement and Grants Office, 2920 Brandywine Road, Atlanta, GA 30341-4146, Telephone: 770-488-2700.

For program technical assistance, contact: Karen Ryder, Project Officer, CDC/Projet RETRO-CI, 2010 Abidjan Place, Dulles, Virginia 20189-2010, Telephone: (225) 21-25-41-89, E-mail: kkr1@cdc.gov.

For financial, grants management, or budget assistance, contact: Shirley Wynn, Contract Specialist, CDC Procurement and Grants Office, 2920 Brandywine Road, Atlanta, GA 30341, Telephone: 770-488-1515, E-mail: zbx6@cdc.gov.

Dated: June 16, 2004.

[Program Announcement 04192]

Enhancement of HIV/AIDS Prevention, Care and Treatment Services in Zanzibar in the United Republic of Tanzania; Notice of Intent To Fund Single Eligibility Award**A. Purpose**

The Centers for Disease Control and Prevention (CDC) announces the intent to fund fiscal year (FY) 2004 funds for a cooperative agreement program to support the public health infrastructure in Zanzibar to increase their capacity to prevent HIV transmission from mother-to-child and to improve access to comprehensive HIV/AIDS care and support programs in the public sector. The Catalog of Federal Domestic Assistance number for this program is 93.941.

B. Eligible Applicant

Assistance will be provided only to Zanzibar AIDS Control Program (ZACP). The ZACP is currently the only appropriate and qualified organization to conduct a specific set of activities supportive of the CDC/GAP goals for enhancing HIV/AIDS prevention, care and treatment services in Zanzibar because:

The ZACP is uniquely positioned, in terms of legal authority and support from the Government of the United Republic of Tanzania, and has the ability and credibility among Tanzanian citizens residing on the island of Zanzibar to coordinate the implementation of initiatives for HIV/AIDS prevention, care and treatment services in Zanzibar.

The ZACP has developed ANC, HIV (sentinel and population based) surveillance, HIV laboratory guidelines and strategic plans for enhancing ANC and other care and treatment services in Zanzibar, which allows the ZACP to immediately become engaged in the activities listed in this announcement. The purpose of the announcement is to build upon the existing framework of health policy and programming that the ZACP has itself initiated.

The ZACP has been mandated by the United Republic of Tanzania government to coordinate and implement activities necessary for the control of epidemics, including HIV/AIDS and STDs.

The ZACP also has the ability to technically oversee the project, ensuring

the activities implemented are integrated into the national strategy for combating HIV/AIDS in Zanzibar.

C. Funding

Approximately \$1,500,000 is available in FY 2004 to fund this award. It is expected that the award will begin on or before September 1, 2004, and will be made for a 12-month budget period within a project period of up to 5 years. Funding estimates may change.

D. Where To Obtain Additional Information

For general comments or questions about this announcement, contact: Technical Information Management, CDC Procurement and Grants Office, 2920 Brandywine Road, Atlanta, GA 30341-4146, Telephone: 770-488-2700.

Demonstration Projects for Implementation of Rapid HIV Testing in Historically Black Colleges and Universities and Alternative Venues and Populations

Announcement Type: New.

Funding Opportunity Number: 04158.

Catalog of Federal Domestic

Assistance Number: 93.943.

DATES: *Application Deadline:* July 23, 2004.

SUMMARY: The purpose of this project is to demonstrate new models for diagnosing HIV infection, a priority strategy in the context of the Advancing HIV Prevention Initiative (AHP). AHP is aimed at reducing the number of new infections caused by Human

Immunodeficiency Virus (HIV) each year in the United States by emphasizing greater access to HIV testing and provision of prevention and care services for persons infected with HIV. Demonstration projects will be funded to show the feasibility, and demonstrate best methods of, integrating routine HIV testing programs (including rapid testing), in a variety of venues.

Current HIV screening programs rely on individual, provider-administered assessments of risks for HIV infection, and do not identify risks which would indicate HIV testing for all HIV-infected persons. The alternative to individual risk assessment is the offering of HIV testing on a routine basis. Where routine offering of HIV testing has been utilized in areas with high HIV prevalence, the rate of HIV positive tests (two to seven percent in hospitals and emergency rooms) is similar to or exceeds that observed nationally in publicly funded HIV counseling and testing sites (two percent) and Sexually Transmitted Disease (STD) clinics (1.5 percent). HIV prevalence among persons tested in outreach settings is also consistently higher than among those tested at traditional testing clinics.

Historically, many persons tested in outreach settings never receive their test results. Because results of rapid HIV tests are available within 30 minutes, rapid HIV testing offered routinely in a variety of clinical settings and outreach efforts in nonclinical settings in high-risk communities has the potential to both reach persons at high-risk for HIV infection and to ensure that they will receive their test results.

The first part of this announcement describes a funding opportunity for demonstration projects to provide rapid HIV testing at Historically Black Colleges and Universities (HBCUs). Recent presidential proclamations support the development of research aimed at, and resources earmarked for HBCUs. There are between 102 and 118 HBCUs in the US, mostly in the South. The collective African-American student body of these schools exceeds 150,000 with an approximate age range of 18-35.

New and innovative HIV prevention programs that focus on young African American college students are needed; this is made clear by the epidemiology of HIV in the United States, and by a recently identified cluster of HIV infections among young African American male college students attending HBCUs in the South. Black males (and to a lesser extent Black females), ages 18-44 are the racial/ethnic group most disproportionately affected by HIV in the entire United

States. A recent cluster of HIV infections among black male college students in North Carolina underscored the urgency of focusing attention and prevention efforts on young adults who may not have been previously or adequately served by HIV prevention programs.

CDC will use findings from these demonstration projects to design and implement HIV/AIDS prevention messages and activities in diverse settings, and serving diverse populations.

The second part of this announcement includes new strategies to identify HIV positive persons in order to provide assistance for linkage to treatment, care and prevention services. Because many newly diagnosed HIV positive persons have received care in medical settings in the year preceding their diagnosis without being offered HIV testing, diverse medical settings are the focus of the second part of this announcement. CDC will support primary care clinics, or alternative medicine clinics (homeopathic, naturopathic or chiropractic), that service high risk populations and/or communities, to develop demonstration projects to offer HIV testing to their clients. The Primary Care clinics will include, but will not be limited to: public or private health centers; ambulatory clinics; WIC clinics; managed care organizations; or other primary care facilities, either affiliated with a university, health department, or community based organization.

The third part of the announcement focuses on Native Americans, migrant farm workers and pre-or post-operative transgendered persons. These are communities that are disproportionately affected by HIV or are at increased risk for emerging HIV epidemics because of high levels of risk behaviors associated with HIV transmission. We will fund health departments and community based organizations to create projects to demonstrate new outreach models for rapid HIV testing in these populations.

I. Funding Opportunity Description

Authority: This program is authorized under the Public Health Service Act sections 301, 311, and 317 (42 U.S.C. 241, 243 and 247(b)), as amended.

Purpose: The purpose of the program is to: (PART 1) introduce rapid HIV testing programs to serve attendees of HBCUs and Hispanic Serving Institutions (HSIs); (PART 2) develop and evaluate new models for providing rapid and conventional HIV testing into clinical venues that have not offered routine HIV screening in the past in high risk communities; and (PART 3) introduce rapid HIV testing in clinical
