Affected entities: Entities potentially affected by this action are individuals and businesses importing marine engines.

Title: Information Requirements for Importation of Nonconforming Marine Engines.

Abstract: Individuals and businesses importing marine engines, including outboard engines and personal water craft, request approval for engine importations. The collection of this information is mandatory (40 CFR 89.601 *et seq.*, 91.701 *et seq.*, & 94.801 *et seq.* and Clean Air Act Sections 203 and 208) in order to ensure compliance of nonconforming engines with Federal emissions requirements. Joint EPA and Customs regulations at 40 CFR 89.601 *et seq.*, 40 CFR 91.701 *et seq.*, 40 CFR 94.801 *et seq.*, and 19 CFR 12.74 promulgated under the authority of Clean Air Act Sections 203 and 208 give authority for the collection of information. This authority was extended to nonroad engines under section 213(d). The information is used by program personnel to ensure that all Federal emission requirements concerning imported nonconforming

engines are met. Any information submitted to the Agency for which a claim of confidentiality is made, is safeguarded according to policies set forth in title 40, chapter 1, part 2, subpart B—Confidentiality of Business Information (*see* CFR 2), and the public is not permitted access to information containing personal or organizational identifiers. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR Part 9.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Burden Statement: EPA estimates that 1,000 respondents annually will, on average, import nonconforming marine engines 3.1 times each year. Each importation will require one half hour to prepare and submit the required information, yielding a total burden of 1550 hours. The total cost associated with this reporting burden is \$77,500. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of

information; and transmit or otherwise disclose the information.

Dated: June 21, 2004.

Robert Brenner,

Acting Assistant Administrator, Office of Air and Radiation.
