

standards to protect and guard against the misuse of individually identifiable health information. See 45 CFR Parts 160 and 164. Some health professionals have been concerned that contacting patients and discussing health related information via TRS poses a possible violation of the Privacy Rule because a "third party," the TRS CA, hears the information being discussed as the call is relayed. Some state TRS facilities have informed the FCC that health professionals are requiring all of the facility's CAs to sign disclosure forms before they will use TRS to contact patients with hearing or speech disabilities.

We therefore emphasize that all forms of TRS, including "traditional" TTY based relay, Internet Protocol (IP) Relay, Video Relay Service (VRS), and Speech-to-Speech (STS), can be used to facilitate calls between health care professionals and patients without violating HIPPA's Privacy Rule.
