

SUPPLEMENTARY INFORMATION: Individual respondents may request confidentiality. If you wish BLM to withhold your name or street address, except for the city or town, from public view or from disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your written comment. We will honor requests to the extent allowed by law. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be available for public inspection in their entirety.

Background Information: The Eastern San Diego County Planning Area encompasses 98,902 acres of land administered by the BLM in Eastern San Diego County, California. BLM lands within the Planning Area are administered by the El Centro Field Office and are immediately west of the California Desert Conservation Area. Land management within the Planning Area is currently guided by the Eastern San Diego County Management Framework Plan, completed in 1981. There are two Wilderness Areas (Carrizo Gorge and Sawtooth Mountain) within the Planning Area. There are also four Wilderness Study Areas. Two Areas of Critical Environmental Concern (Table Mountain and McCain Valley) are designated. Lark Canyon Off-Road Vehicle Area is managed for vehicular recreation. Remaining areas are managed in accordance with Multiple Use Classes.

The intent of the current Resource Management Plan and EIS preparation process is to analyze and update land and resource management objectives within the Planning Area. The Resource Management Plan will consider: impacts posed by rapid population and community growth, the need to make resource decisions that are scientifically sound, legally defensible and sustainable resource decisions, the need to provide access to significant energy sources and communication sites, the need for utility corridors, the need for continuation of grazing activities, the need to maximize use of public lands in species recovery and habitat conservation, and the need to provide adequate facilities for safe recreation and visitation on the public lands.

Issues to be addressed in the Resource Management Plan will include recreation, off-highway vehicle use, routes-of-travel designations, wildlife, botanical resources, endangered species, cultural resources, Native American concerns, visual resources, livestock grazing, wilderness, fire management,

and mining. Existing wilderness study areas designations will be evaluated. Boundaries and existence of currently designated wilderness areas will not be changed. Compatibility with management plans proposed by other public land management entities for adjacent lands will be considered.

The Resource Management Plan and EIS will be prepared by an interdisciplinary team with specialists for recreation, wilderness, botany, biology, archeology, wildlife, range management, realty, visual resources, geology and mining, range management and planning.

The approved Resource Management Plan will replace the existing East San Diego County Framework Management Plan as the document guiding land and resource management decisions on BLM-administered lands in the Planning Area.
