**Wireless Telecommunications Bureau  
Extends the Freeze on High Power Use  
of the 460-470 MHz Band Offset  
Channels**

**AGENCY:** Federal Communications  
Commission.

**ACTION:** Notice.

**SUMMARY:** This document informs that the freeze on the filing of applications for high power operations on 12.5 kHz offset channels in the private land mobile radio (PLMR) 460-470 MHz band will remain in effect until December 31, 2005. The Bureau is extending the duration of the freeze to provide hospitals and other health care providers that operate medical telemetry equipment in the 460-470 MHz band adequate time to migrate to spectrum dedicated to the Wireless Medical Telemetry Service ("WMTS"), while providing PLMR users a date certain by which the freeze will end. The Bureau does not anticipate any further extensions of the December 31, 2005 deadline.

**DATES:** Effective July 8, 2004.

**FOR FURTHER INFORMATION CONTACT:** Freda Lippert Thyden, [freda.thyden@fcc.gov](mailto:freda.thyden@fcc.gov), Public Safety & Critical Infrastructure Division, Wireless Telecommunications Bureau, (202) 418-0627, or TTY (202) 418-7233.

**SUPPLEMENTARY INFORMATION:** This is a summary of a Public Notice released on July 8, 2004.

1. The Commission, in 1995, adopted a new, more efficient channel plan for PLMR services in the 450-470 MHz band. Under the channel plan adopted, channels in the 450-470 MHz band that were 12.5 kHz removed from regularly-assignable channels at that time ("12.5 kHz offset channels") would be available for high power operations. Previously, medical telemetry systems used these "offsets" on a secondary, noninterference basis to primary adjacent channel PLMR operations. Recognizing that co-channel, high power operations could result in interference to medical telemetry operations, the Bureau froze the filing of applications for high power operations on offset channels in the 450-470 MHz band pending resolution of the medical telemetry issues.

2. In June 2000, the Commission established the Wireless Medical Telemetry Service (WMTS), an action aimed at ensuring that in-hospital medical telemetry devices can operate
