Title: NESHAP for Primary Aluminum Reduction Plants (Renewal).

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Primary Aluminum Reduction Plants (40 CFR part 63, subpart LL) was proposed on September 26, 1996 and promulgated on October 7, 1997. These standards apply to the owners or operators of new or existing potlines, paste production plants, or anode bake furnaces associated with primary aluminum production and located at a major source, and for each new pitch storage tank associated with a primary aluminum reduction plant.

In order to ensure compliance with the standards, adequate recordkeeping and reporting is necessary. This information enables the Agency to identify the sources subject to the standard; ensure initial compliance with emission limits, and verify continuous compliance with the standard.

This rule requires written notification when: an area source increases its emissions such that it becomes a major source; the initial startup is before the effective date of the standard; the effective date of a new or reconstructed source is after the effective date of the standard, and for which an application for approval of construction or reconstruction is not required; there is an intent to construct a new major source or reconstruct a major source after the effective date of the standard, and for which an application for approval or construction or reconstruction is required; an initial performance test occurs; an initial

compliance status is submitted; an affected source intends to use an hydrogen fluoride (HF) continuous emission monitor; and owner or operator develops and submits an engineering plan to the applicable regulatory authority upon request. In addition, sources are required to: submit results of performance tests; provide semiannual reports unless quarterly reports are required as a result of excess emissions; develop a startup, shutdown, and malfunction plan; and maintain records for a period of five years following the date of each occurrence, measurement, maintenance, corrective action report, or record.

All reports are sent to the delegated state or local agency. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 2,189 (rounded) hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to adjust the existing ways to comply with any previously applicable instructions and requirements; to train personnel to be able to respond to a collection of information; to search data sources; complete and review the collection of information; and to transmit or otherwise disclose the information.

Respondents/Affected Entities: Owner/operators of new or existing primary aluminum reduction plants.

Estimated Number of Respondents: 23.

Frequency of Response: Initially, quarterly, semiannually, on occasion.

Estimated Total Annual Hour Burden: 122,607 hours.

Estimated Total Annual Costs: \$7,870,195, which accounts for annual O&M costs of \$114,000, no capital/startup costs, and Respondent Labor costs of \$7,756,195.

Changes in the Estimates: There is an increase of 1,330 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burden. This increase was due to an increase in the number of responses.

Dated: July 21, 2004.

Director, Collection Strategies Division.
